TELEPHONES: No telephones available for connecting onboard at Iggesund. At Hudiksvall telephones available. Skr 25 per day plus cost of calls.
IDENTIFICATION CARDS: Not needed. If crew going to doctor or to hospital preferable he carries passport.
SERVICES: No tank cleaning or discharge of tank washings.
PORT REGULATIONS: Speed limit: maximum 5 knots within the harbour basin. Plastic pipe is laid out on the bottom around the oil berth, anchoring during berthing is prohibited. Pipe filled with compressed air after vessel's mooring, comes up to the surface forming ring around vessel and oil jetty as protection against oil leakage.
DELAYS: During Winter (December-April) delays on berthing/sailing owing to ice in fairways and alongside quays. Mooring delays will occur owing to ice between vessel and quay.
GENERAL: Hudiksvall port is very near town. Railway station, bus station, etc., very near port. Oil port about 700 m. from town.
The port of Stocka is closed to commercial vessels.
AUTHORITY: Hudiksvalls Hamnstyrelse, Tullhuset, 82400 Hudiksvall, Sweden. *Tel:* 0650/19166. *FAX:* 0650/17140. *Contact:* Arne Strandell, Harbour Master.

HUSUM: 63.20 N. 19.09 E. (See Plan)

PILOTAGE: Contact local Agent: Grundberg Shipping AB, Tel: 0660-10235. Clearing Tel: 0660-82805, 82806.
MAX. SIZE: Max. draft 10.6 m.
TUGS: Available.
BERTHING: No special requirements other than authority from local Agent.
In the South part of the harbour basin there is a new concrete berth; namely the raw material berth.
(i) The South part of the wharf is 180 m. long with 11.4 m. depth.
Loading: Pulp and paper by mobile cranes. Turpentine and resin-oil via 6 in. – 8 in. pipe-connections. Capacity 200 t.p.h.
Discharging: Raw oil via 12 in. and sodium hydrate via 6 in. – 8 in. pipe-connections. Unloading of limestone, china clay, sodium sulphate, sulphur, aluminium sulphate, softwood and hardwood by mobile cranes.
(ii) The North part of raw material berth is 65 m. long, 10 m. depth. with a solid Ro-Ro berth 16 m. wide. There are connections available for loading/unloading fluid products.
To the North of the raw material berth there is the loading berth, 300 m. long and approximately 10 m. depth for loading pulp and paper using mobile cranes. Connected to the loading berth is a solid Ro-Ro berth with a ramp, length 30 m.
There are warehouses with a total storage capacity of 15,000 sq.m.
(iii) Barge quay with length 90 m. and width 40 m. for vessels up to 120 m. LOA for discharge of timber.
STEVEDORES: Stevedores can be ordered from representative of local Agent. Labour must be ordered prior to 1400 hours to start following day or for a second shift. Labour for the same day at 1000 hours must be ordered at 0800 hours, labour for 1200 hours ordered at 0930 hours and labour to start at 1400 hours ordered prior to 1100 hours.
FRESH WATER: Available through hose pipes.
FUEL: All grades and viscosities available through bunker suppliers.
AIRPORT: Approximately 15 minutes by car, served by regular airlines.
TIME: GMT plus 1 hour. Summertime kept April to October.
POLICE/AMBULANCE/FIRE: All services available.
TELEPHONES: Available on wharf.
SERVICES: Post, telefax and telex facilities. Various other services available or can be provided.
GENERAL:
Tides: Water level in metres above (+) and below (−) average water level.

High water level	+1.0 m.
Normal high water level	+0.7 m.
Normal low water level	−0.6 m.
Low water level	−1.1 m.

OPENING/CLOSING HATCHES: Usually carried out by the vessel's crew.
AIRPORT: Lulea 85 km. from Karlsborgsverken.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Telephone 90000 in emergency and ask for service required.
TELEPHONES: Available at quays.
SHORE LEAVE: Allowed.
AGENT: Grundberg Shipping AB, P.O.Box 716, S-941 28 Pitea, Sweden. Tel: 0911 46070. Telex: 68307 Shipexp S. Fax: 0911 46175. Cables: Grundbergs Pitea.
All communications to be via Pitea.

KARLSHAMN: 56.10 N. 14.52 E. (See Plan)

DOCUMENTS:
3 Crew Lists (IMO Forms).
3 Passenger Lists.
2 Tobacco Lists.
2 Stores Lists.
1 Manifest.
1 Bill of Lading.

PILOTAGE: Vessels approaching port call Karlshamn Pilot Station 5 hours in advance on VHF Channel 16. Pilot boat orange coloured. Lights and sound signals as international regulations. Pilot boat always located 2 nautical miles South from Ortholmen Pilot Station, this point marked on charts. Location of anchorage in same area where Pilot taken. (Also see "Stockholm").

ANCHORAGES: Depths of water in anchorage area approximately 20 m. – 25 m.

MAX. SIZE: Max. draft: Tankers at Kolo Oil Harbour and Oxhaga Oil Harbour require 0.5 m. underkeel clearance if fitted with double bottom, and 1.0 m. if not. For remaining harbours within the port area minimum 0.5 m. underkeel clearance required.

Max. length of vessels at Kolo Oil Harbour 260 m., at Oxhaga Oil Harbour 220 m., at Sutudden Oil Harbour 190 m., and at Stilleryd Harbour 220 m. No tide.

HEALTH: If infectious disease on board Master must immediately send information to Agent.

RADIO: Karlskrona Radio.

RADAR/VHF: The pilot station is fitted with radar and VHF.

TUGS: 2 tugs available, 3,000 h.p. and 2,000 h.p. Join vessels about 1 nautical mile outside harbour boundary. Tugs lines always used. Vessels of 10,000 d.w.t. and over require a minimum of one tug.

BERTHING:
Inner Harbour: West Harbour Area.

Berth	*Length* (m.)	*Depth* (m.)
Ocean Quay	150	9.0
Soja Quay	250	8.5
West Quay	400	7.5 – 6.0

These quays are served by 2 rail-bound bulk goods cranes of 5 – 10 tons. 2 grain elevators available.

Via the West Harbour area oil seed plants, copra and vegetable oils for the Karlshamn Oil Factory (AKO) are shipped as well as other bulk goods.

East Harbour Area.

Berth	*Length* (m.)	*Depth* (m.)
East Pier	160	7.5
East Quay	350	6.0

The East Pier is equipped with 2×6.7 tons rail-bound unit goods cranes. Adjacent to the East Pier are 2 stores with a total floor area of 7,000 sq.m.

Loading and discharging is carried out with mobile cranes at the East Quay. The Harbour has 3 mobile cranes with lifting capacities ranging from 4 tons to 23 tons.

Goods shipped via the East Harbour area include timber products, timber, bulk goods and general cargo.

Sterno Harbour:
A special harbour for stone products, wood and timber. Depth is 6 m.

Stone blocks are loaded at a special quay and crushed stone products, chiefly diabase which is used for producing mineral wool, are discharged from quay by a stone-crushing plant. The crushing plant is owned by NCC.

Stilleryd Harbour:
The harbour consists of a 400 m. long quay with water depths of 8 m. and 11 m. on the West side, and one 150 m. long quay on the East side with 8 m. water depth. 2×35 ton and 1×20 ton luffing cranes are used for loading and discharging vessels and they are backed up by mobile cranes. Double railway tracks serve the quay.

The harbour also has Ro-Ro facilities with depths 8.0 m. – 11.0 m. Stilleryd Harbour accommodates vessels of up to 40,000 d.w.t. The harbour area features 6 warehouses with a total storage area of 32,000 sq.m. Adjacent to the quay area is a stockyard of approximately 200,000 sq.m., of which 50,000 sq.m. is asphalted.

Sodra Skogsagarna ship products like paper pulp, paper, wood chips, pulpwood, etc. via the Stilleryd Harbour. Fernstroms Granitindustrier ship stone blocks while Vikingtra AB ship wood and timber via this harbour.

MEDICAL: Hospital facilities available.

TANKERS: Different lines used. From 12 in. to 6 in. depending on cargo to load/discharge. 3 different loading/discharging berths available. 1 at Inner Harbour, 1 at Kolo Harbour and 1 at Oxhaga.

Kolo Oil Harbour:
Position Lat. 56° 09′ N., Long. 14° 43′ E. Pilot boards by Laknallarna, position Lat. 56° 07′ 8″ N., Long. 14° 53′ E. Max. LOA 260 m., max. draft 13.5 m. 75,000 d.w.t. or 100,000 d.w.t. with part load. Depth at berth and approaches 14.00 m. 2 tugs are generally used.

The pipeline is 20 in., length 400 m. and hose connection 12 in. Max. rate, 1,500 cu.m./hour (HFO). There are no ballast facilities and no clean ballast can be discharged into harbour. Vessels are allowed to clean tanks and gas free in the roads only.

Fresh water available at 20 t.p.h. by pipeline.

Old Oil Harbour:
Situated at Sutudden where a large number of major oil corporations and manufacturing companies have their depots. Heavy and light fuel oils, diesel oil, petrol and paraffin are imported and stored here. Storage capacity amounts to approximately 180,000 cu.m. of which half consists of underground storage facilities.

The oil quay has a depth of 11.0 m. and can accommodate fully-laden tankers of up to 30,000 d.w.t. with draft 10.50 m.

Oxhaga Oil Harbour:
The oil harbour is situated at Munkahusviken where the water depth the quay is 13 m. Underground storage facilities with a total capacity 400,000 cu.m. – 200,000 cu.m. for heavy oil and 200,000 cu.m. for li oil – have been constructed. Storage has been leased to manufactur companies, municipalities and oil companies.

There is an LPG underground storage of 50,000 cu.m. within harbour. LPG tankers discharge at the oil pier.

Oxhaga Nabb's oil harbour is used by fully laden tankers 50 – 55,000 d.w.t. Depth of water 13 m., max. draft 12.5m.

An above ground storage area for petroleum, oil and chemicals planned for the oil harbour areas. Surveys have shown that it is possib to build additional underground storage facilities for petroleum produ in the Oxhaga area.

DENSITY: 1006.

FRESH WATER: Fresh water available and delivered by hoses.

FUEL: All grades available.

CONSULS:

Denmark, Tel: 16000.	Netherlands, Tel: 19760

RADAR: Radar service available when entering port. Tel. 0455/2507 or 0455/50780.

TUGS: Tug assistance available.

BERTHING: Total quay length 4,700 ft., oil terminal 400 ft., Dep alongside quay 13 ft. – 33 ft., oil terminal 29.5 ft. Ro-Ro quay 23 ft.

STEVEDORES: Available. Ordered through Agents or directly b tel. 0455/10518.

MEDICAL: Advance notice to Agents desirable.

TANKERS: No specific requirements applicable to oil carrie Two tanker berths available. Draft 7.0 m. and 8.5 m.

FRESH WATER: Available, customary delivery from quay-berth.

FUEL: All grades available. No advance notice required.

CONSULS:
Danish Vice-Consul, tel. 15006.
Netherlands Vice-Consul, tel. 10926 and 12495.

REPAIRS: All types of deck and engine repairs possible.

DRY DOCKS: Largest dry dock: length 185 m., breadth 20.76 m depth 8.80 m. Six smaller docks.

OPENING/CLOSING HATCHES: Normally carried out by crew.

REPATRIATION: Not allowed.

AIRPORT: 30 km. from port.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Tel. 90000.

TELEPHONES: None available.

SERVICES: Compass adjusting.

AUTHORITY: Karlskrona Stadsbyggnadskontor, Amiralitesgatan 2 37101 Karlskrona. *Tel:* 0455-83000.

KARLSTAD: 59.23 N. 13.31 E. (See Plan)

PORT LIMITS: Vessel considered to be an "arrived ship" when berthed, or anchored South of the Gerholmsrevet Buoy in case of congestion.
DOCUMENTS: As usually required in Swedish ports.
PILOTAGE: Not compulsory. However Pilots available.
ANCHORAGES: There is a safe anchorage South of the Gerholmsrevet Buoy, sand and clay.
RESTRICTIONS: There are no restrictions imposed upon entry.
MAX. SIZE: Vessel's length, breadth and draft maximised by the locks of the Trollhatte Canal (88 m. × 13.2 m. × 5.4 m.).
HEALTH: Documents' etc. as usually required in Swedish ports.
RADIO: Gothenburg Radio.
VHF: ETA to be given to Karlstad Port Radio (0800 – 1600 hrs. local time).
RADAR: No port radar available.
TUGS: Two icebreaking tugs available. Ship's lines usually used.
BERTHING:

Vanerterminalen	Length	175 m.
(The Venerterminal)	Ship draft	5.4 m.
Mobile cranes		
Styckegodskajen	Length	270 m.
(The general cargo quay)	Ship draft	5.4 m.
Three general cargo cranes	6 tons	
Trakajen	Length	120 m.
(The wood quay)	Ship draft	5.4 m.
Mobile cranes		
Kolkajen	Length	350 m.
(The coal quay)	Ship draft	5.4 m.
One bulk cargo crane	5 tons	
One heavy-lift crane	28 tons	
Wermlands Kajen	Length	200 m.
(Wermlands Quay)	Ship draft	5.4 m.
One container crane		
Lambergshamnen	Length	230 m.
(The Lamberg Harbour)	Ship draft	5.0 m.
Mobile cranes		
One heavy-lift crane	160 tons	
Inrehamnen (Inner harbour)	Not used by merchant vessels.	
Oljehamnen	Each pier	70 m.
(Oil harbour)	Mooring space both sides	
Three jetties for handling oil, etc.	Ship draft	5.4 m.

STEVEDORES: Modern and extensive machinery equipment. Loading/discharging can be arranged in two or three shifts.
MEDICAL: Hospital facilities available.
DENSITY: Fresh water in the port.
FRESH WATER: Delivered by hose from piping on the quay.
FUEL: All kinds of bunker oil available.
CONSULS: Denmark, Finland, Germany and Norway.
REPAIRS: All kinds of deck and engine repairs possible. Slipway 2,300 tons
SURVEYORS: All major Classification Societies represented in nearby port of Gothenburg. Government ship surveyor situated at Karlstad.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Usually carried out by crew
CUSTOMS ALLOWANCES: As usually allowed in Swedish ports.
CARGO GEAR: Shore gear usually used.
REPATRIATION: Crew changes and repatriation can be effected.
AIRPORT: Regular domestic airlines. Several flights per day to and from Stockholm and Gothenburg.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Telephone number 90 000.
SERVICES: Tank-cleaning equipment and facilities for discharge of tank washings available.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not necessary for shore leave.
REGULATIONS: Ship's propulsion machinery may not be used when ship is berthed.
DELAYS: Normally not to be expected.
AUTHORITY: Karlstads Hamn, Box 5030, S-65005 Karlstad, Sweden. *Tel:* 054-195000. *FAX:* 054-113316. *Contact:* Captain P. Thomas Ahsberger, Port Director. Ake Sallnas, Harbour Master.

KLINTEHAMN: 57.23 N. 18.11 E. (See Plan)

The Harbour Quay is 340 m. long and depth 5 m. Depth on entrance 5.5 m. The most unfavourable winds are South — West. The harbour is however to be considered as good and safe.

Most products are loaded/discharged with mobile cranes.

Documents needed are Nationality Certificate, Bill of Measurement, Passenger List, Crew List, Derat Certificate, Ship's and Crew Declaration.

Pilot Station at Visby. Pilots have VHF on Channel 16.

Bunkers and water can be obtained.

AUTHORITY: Gotlands Kommun, Hamnkontoret, 62020 Klintehamn, Sweden. *Tel:* 0498-40076. *Contact:* Curt Ohlsson, Port Captain.

KOPING: 59.31 N. 16.00 E. (See Plan)

DOCUMENTS: See "Stockholm".
PILOTAGE: Via Sodertalje: Pilots obtainable for inward bound vessels from Landsort to Sodertalje and from Sodertalje to Koping; for outward bound vessels from Koping and Sodertalje. Via Stockholm: Pilots obtainable for inward bound vessels from Simpnas, Furusund, Sandhamn, Dalaro and Landsort to Stockholm and from Stockholm to Koping; for outward bound vessels from Koping and Stockholm. (Also see "Stockholm"). Harbour pilotage obtainable but not compulsory in harbour area. Assistance of a boatman is compulsory for arriving vessels.

Distances: Landsort – Sodertalje (nautical miles), 34; Sodertalje – Koping, (nautical miles), 69; Landsort – Dalaro, (nautical miles), 32; Dalaro – Stockholm, (nautical miles), 46; Sandhamn – Stockholm, (nautical miles), 36; Stockholm – Koping, (nautical miles), 78; Vasteras – Koping, (nautical miles), 27; Harbour Pilotage, (nautical miles), 2.
ANCHORAGES: At the "Broken" light buoy, clay bottom.
RESTRICTIONS: Ice is prevalent in Lake Malaren and the inlet from the Baltic from January to March, but the entrance channel is kept open during Winter season.
MAX. SIZE: The pilot station on Lake Malaren, Tel: 0755/30467, will give information on the max. admissible sizes of vessels. In general the following applies:

Max. Admissible	*Via Sodertalje*	*Via Stockholm*
Length	124 m.	110 m.
Breadth	17 m.–18 m.	15 m.
Draft	6.5 m.–6.8 m.	5.65 m.
Height of masts above water level	35 m.	26 m.

The figures stated for the draft are subject to variation according to the water level. The entrance fairway to the port has been dredged to a depth 7.6 m., the width of the bottom being 60 m.
VHF: Work frequency Channel 14. Call Koping Port Radio, Channel 16.
TUGS: Available day/night.
BERTHING: *Deep-Water Harbour:* (built 1932, large extension 1936-64) has 152 m. of quayage with a depth of 6.2 m. and 377 m. with a depth of 7.3 m. alongside, and is equipped with 4×7 ton level-luffing jib cranes, 2 of them having a maximum lifting capacity of 10 tons each at 18 m. radius; 1×33 ton and 1×36 ton "multi-purpose" crane.

There is also an 80 m. quay, depth 6.2 m. – without cranes – where loading/unloading by vessel's own winches can be undertaken.

Mobile cranes also available.

The quays are rail-connected and equipped with connections for supplying electricity, telephones and fresh water.

There are about 10,000 sq.m. of concrete stockyards within reach of the cranes, and outside this area and at a short distance from the cranes, a space of about 40,000 sq.m. is available for storage of goods. There are also about 22,000 sq.m. of sheds of different types in connection to the quays.

The cranes are well equipped with lifting devices such as grabs of different types etc. Conveyor belts of varying length, fork trucks, trimming and other cargo handling equipment are also available.

Oil Harbour: A modern oil harbour is situated at the mouth of River Kopingsan (North side), the jetty having one outside and one inside berth with depth of 7.6 m. and 5.7 m. respectively.

On the North side is an 80 m. concrete quay for grain loading vessels. Depth alongside 7.3 m.

Private Wharves: A private harbour, belonging to Cementa Co., is situated in the immediate vicinity of the "Deep-Water Harbour". There is a 110 m. concrete quay, with 7.3 m. alongside, and 1×6 ton travelling portal crane and 1 belt conveyor available. There is also a 50 m. pier, same depth, for self-unloading (cement) vessels.
STEVEDORES: Working hours: 0700 – 0900 hrs., 0930 – 1300 hrs. and 1330 – 1600 hrs. (Monday to Friday). Special conditions on Christmas Eve, New Year's Eve, Easter Eve, Whitsun Eve and Midsummer Eve.

Overtime work: can usually be executed on Mondays, Tuesdays, Wednesdays, Thursdays and Fridays and for 6 hours on Saturday.
FRESH WATER: Available.
FUEL: Available.
REPAIRS: Minor mechanical, electrical and other repairs can be carried out by different local firms. Diver available.
GARBAGE DISPOSAL: Service available. Contact Malarterminalen Koping AB. Tel: 18110.
WASTE OIL DISPOSAL: Service available. Contact Malarterminalen Koping AB. Tel: 18110.
SEAMAN'S CLUBS: None.
AUTHORITY: Malarterminalen Koping AB, Box 142, S-731 23 Koping, Sweden. *Tel:* 46-221-18110. *FAX:* 46-221-20835. *Contact:* Arne Risfors, Managing Director.

KRISTINEHAMN: 59.19 N. 14.07 E. (See Plan)

PORT LIMITS: A line drawn Westward from Strandudden to Valon (see Swedish Chart No. 132) defines the seaward limits of the port.
PILOTAGE: Pilotage compulsory for vessels exceeding 1,200 d.w.t. regardless of cargo being carried and for all ships carrying dangerous cargo.

Certificate may be granted to sail without Pilot after service-examination.

Pilots available at Vanersborg, the entrance to the Lake of Vanern after leaving Trollhatte Canal, and at Kristinehamn.

No local pilotage.

DOCUMENTS:
Certificate of Nationality.
Identification and Measurement Papers.
Oil Log.
Certificate regarding insurance for oil damage.
Derat Certificate.
Last Port Clearance.
1 copy of General Declaration (Form 611.10).
2 copies Ship's Stores Declaration (Form 611.13).
2 copies Crew's Effects Declaration (Form 616.8).
2 copies Cargo Declaration (Form 611.7).
1 copy Crew List (Form 612.13).
1 copy Declaration on account of Import Prohibition as to Livestock (Form 730.5).
1 copy Maritime Declaration of Health (Form 612.7).
ANCHORAGES: In the Varnumsviken, N.W. of Kristinehamn. The roads have a depth of 5 m. – 9 m., bottom clay.
RESTRICTIONS: In Winter, the fairways to the harbour will be kept open by the local icebreaker from 0600 hrs. until 1600 hrs. Any icebreaking services beyond these hours have to be ordered and will be charged accordingly.
MAX. SIZE: All vessels capable of passing through the Trollhatte Canal can enter Kristinehamn. Max. dimensions: Length 87 m., beam 13 m., draft 5.3 m.
HEALTH: First entry will be cleared alongside, otherwise automatic.
VHF: The port can be reached by VHF Channels 9, 11, 12, 14 and 16. In Winter, the icebreaking tug may communicate on all channels.
Instructions/Regulations regarding traffic communications will be available when passing the Trollhatte Canal.
RADAR: No port radar service.
TUGS: The tug "Dan", 600 b.h.p. and 5 tonnes bollard pull, will assist on request.
BERTHING: The outer harbour (Berths No. 20 – 25), has a quay of 360 m. length; in the river there is a quay (Berths No. 16 – 19) approx. 170 m. length. Depth 5.7 m. at chart datum.
On the S.W. side of the river there is a berth, 88 m. length, for loading grain. Loading equipment on berth. Depth 5.7 m.
On the West side of Varnumsviken, Kroksvik, there is a 80 m. concrete pier for discharging refined oil products. Depth 5.7 m.
Also see "Tankers".
CRANES: 3 × 7 tonne slewing cranes with luffing jibs and 1 × 24 tonne with luffing jib, on rails, in the outer harbour (Berths No. 20 – 25). Three railway tracks underneath the portals along the quay. One fixed crane, 40 tonnes, at Berth No. 16.
BULK CARGO FACILITIES: On the S.W. side of the river there is a loading elevator for agricultural produce. Loading capacity 200 tonnes per hour.
On Berths No. 20 – 25, bulk commodities like coal, ore, grain and scrap iron can be handled by Cranes No. 7, 8 and 9 equipped with grabs.
SPECIALISED CARGO HANDLING FACILITIES: No special equipment for handling containers. No Roll-on/Roll-off berth.
BRIDGES: None.
STEVEDORES: Working hours 0700 – 1600 hrs., Monday to Friday.
General cargo: 40 – 60 tonnes per gang per hour.
Forest industries produce: Approx. 100 tonnes per gang per hour.
MEDICAL: Full hospital facilities available without prior notice.
TANKERS: There is a concrete pier, length 80 m., on the West side of Varnumsviken, with a berth on each side. Max. draft 5.3 m. The pier is equipped with a crane for lifting lines. Diameters of discharging lines are 6 in. and 8 in. Average discharging rate 500 – 700 cu.m.p.h.
DENSITY: 1000 (Fresh water).
FRESH WATER: Available at Berths No. 20 – 25, rate 5 – 10 tonnes per hour.
FUEL: Available at all berths, delivered by truck.
FIRE PRECAUTIONS: As per international standards.
CONSULS: France, Germany and Norway are represented at Karlstad, 45 km. distant.
REPAIRS: All types of deck and engine repairs can be carried out.
DRY DOCKS: None.
SURVEYORS: Lloyd's and Norske Veritas.
GANGWAY/DECK WATCHMEN: Not required.
CUSTOMS ALLOWANCES: 1 litre spirits, 1 litre wine, 5 litres beer and 200 cigarettes per person. Additional allowances for the Master.
CARGO GEAR: Shore cranes normally used.
REPATRIATION: Can be arranged.
AIRPORT: At Karlstad, 45 km. distant.
TIME: GMT plus 1 hour. Summertime GMT plus 2 hours.
HOLIDAYS: January 1st and 6th, May 1st and 20th, December 24th, 25th, 26th and 31st. Cargo work can be arranged on these days.
POLICE/AMBULANCE/FIRE: Dial 90000.
EMERGENCY CO-ORDINATION CENTRE: Dial 90000 and the Centre will notify the necessary services.
TELEPHONES: Can be arranged on request.
SERVICES: No facilities for disposal of tank cleanings.
BANKS: Handelsbanken and Wermlandsbanken represent a number of foreign banks.
STORING: See "Prelims".

1. Vessels can be stored by trucks only.
3. Trucks can proceed alongside the berth.
4. Fork lift trucks can be used when handling stores.
5. Ship's chandler will take care of Customs Regulations.
6. Local riggers can be employed to assist with storing.

SHORE LEAVE: Permitted, no restrictions.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
GARBAGE DISPOSAL: Garbage containers available at the dockside. Contact the Harbour Authority.
WASTE OIL DISPOSAL: A tanker truck is available and will be placed alongside ship on request. Waste oil must be pumped by vessel's own equipment into the truck. Maximum delivery is limited to 4 cu.m. per call, for which there is no charge.
SEAMAN'S CLUBS: No Seamen's Club.
CURRENCY: Swedish Kronor (SEK).
DELAYS: Normally no delays.
DEVELOPMENTS: None.
AUTHORITY: Kristinehamns Hamn, Hamnvagen 6A, S-681 Kristinehamn, Sweden. *Tel:* 0550-88000. *Telex:* 66030. *FAX:* 055 83897. *Contact:* Jim N. Hjelmtvedt, Harbour Master/General Manag

LANDSKRONA: 55.52 N. 12.48 E. (See Pla

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot available on request from Helsingborg Pilot Station daytime. 5 hours' notice required. Pilot stations and boats equipped w VHF. Pilot boards and disembarks off the fairway entrance or as agre with the Pilot Station. (Also see "Stockholm" and "General-Pilotag before first port).
ANCHORAGES: Vessels of up to 10 m. draft can safely anchor No of Staffans Bank.
MAX. SIZE: Depth in channel and harbour 11 m. (36 ft.). Max. dr 10 m. Max. LOA 190.0 m.
HEALTH: See "Stockholm".
RADIO/VHF: Gothenburg Radio, call sign SAG. Pilot station, pilot boa and tugs equipped with VHF Channel 16. Harbour Office equipped w Channels 16 and 10.
TUGS: Tugs usually meet off Pilhaken Lightbuoy. Ship's lines.
BERTHING: Terminal for handling bulk cargoes. Rock phosphate c be discharged with a capacity of 8,000 tons per 24 hours.
MEDICAL: Medical attention and hospital facilities available.
TANKERS: No oil berth in Landskrona.
DENSITY: Density of water changes with currents.
FRESH WATER: Available from quay.
FUEL: Small quantities of fuel oil can be obtained from quay.
CONSULS:

Danish Vice-Consulate	Tel: 0418/16150
Finnish Vice-Consulate	Tel: 0418/78000

AUTHORITY: Landskrona Hamn, Box 275, 261 23 Landskron Sweden. *Tel:* 0418-79003. *FAX:* 0418-27694. *Contact:* Sven Hakansson, Port Director.

LIDKOPING: 58.30 N. 13.10 E.

DOCUMENTS:
3 Crew Lists (IMO Fal Form 5).
2 Crew Effects List (IMO Fal Form 4).
2 Ship's Stores Declaration (IMO Fal Form 3).
PILOTAGE: Compulsory for vessels over 1,200 d.w.t.
MAX. SIZE: Length 87 m., beam 13 m., draft 5.3 m. and air draft 27 are maximum dimensions for passing through the Trollhatte Canal.
VHF: Lidkoping Harbour operates on Channel 16.
TUGS: One tug available, 920 h.p.
CRANES: 3 shore cranes of 5 tonnes each.
STEVEDORES: Working hours 0700 – 1600 hrs., Monday to Friday.
MEDICAL: Hospital facilities available.
FRESH WATER: Available.
FUEL: Gas oil available.
REPAIRS: Workshops can undertake repairs.
HATCHES: Opening/closing carried out by crew.
REPATRIATION: Facilities exist for carrying out crew changes.
AIRPORT: Nearest International Airport is Gothenburg, 130 km. dista
TIME: GMT plus 1 hour, Summertime GMT plus 2 hours.

POLICE/AMBULANCE/FIRE: Dial 90000
GARBAGE DISPOSAL: Containers are placed on the quay free of charge.
WASTE OIL DISPOSAL: Facilities available (up to 5 cu.m.) with 24 hour notice to Harbour Authorities.
SEAMAN'S CLUBS: None.
AUTHORITY: Lidkopings Hamnterminal AB, P.O.Box 900, S-53119 Lidkoping, Sweden. *Tel:* (0) 510-222 50. *Telex:* 67336. *FAX:* (0) 510-62189. *Contact:* Jan Kallsson, Harbour Master.

LULEA: 65.35 N. 22.09 E. **(See Plan)**

DOCUMENTS: See "Stockholm".
Certificates: See "Stockholm".
APPROACHES: *Fairways:* Two fairways lead into Lulea. The South Fairway, Germandoleden, is about 17 nautical miles long and the North Fairway, Sandoleden, is about 27 nautical miles long.
Special rules and traffic regulations apply to these fairways.
Ice Conditions: The port area is generally ice-infested during the period December-April. During this period, ships at sea are assisted by the State-owned icebreaker and within the harbour area by the Lulea Bogserbats AB port icebreaker. Year-round navigation has been possible since Spring 1970.
PILOTAGE: Telegraphic address, "Pilotstation Lulea". Tel: (0920) 55356 or (0920) 294000. Advance notice 5 hours. VHF Channel 16. Pilot boat, orange with international signals. Pilot boards about 2 nautical miles West of Rodkallen for entering Germandoleden and 1 nautical mile N.E. of Farstugrundens Lighthouse for entering Sandoleden. Location of anchorage when awaiting Pilot: West of Rodkallen and South of Farstugrunden Lighthouse.
ANCHORAGES: Germandofjarden, 1.5 nautical miles S.E. of Larsgrundet Lighthouse and Inner Roads.
MAX. SIZE: Max. draft at MW 11.2 m. (up to "Panamax") in Sandoleden and 7.5 m. in Germandoleden.
HEALTH: No special regulations.
RADIO: Stockholm Radio.
VHF: Port Authority on Channels 16, 14, 12, 11 and 10.
Traffic Control on Channels 16, 14, 13, 12, 11 and 10 throughout 24 hours. Tel: (0920) 294000 or (0920) 55356.
Tugs on Channel 16.
TUGS: Meet ships at the Inner Road for the ore dock, and in Sandoleden 1 nautical mile South of the coal quay (Victoria Harbour) and the oil terminal. Tug's lines to be used.
Two tugs of 4,200 h.p. each are available for towing and ice breaking.
Towing: Lulea Bogserbats AB is responsible for towing and ice breaking in the Port of Lulea. Special tug regulations apply at Uddebo Oil Port, Victoria Harbour and the Ore Quay. Tugboat assistance can be ordered through Lulea Traffic, Tel: (0920) 294000 or (0920) 55356, or through VHF call Channels 16 and 14.
Boatmen: The port boatmen are on duty if needed at all quays. They can be ordered through Lulea Traffic – Tel: (0920) 294000 or (0920) 55356 – or VHF call Channels 16 and 14. At the Ore Quay, however the respective companies provide their own boatmen.
BERTHING: *Deep Quay:* Length 150 m., depth 8.0 m. No goods handled.
Cement Quay: Length 60 m., depth 9 m. Cement.
LKAB Ore Quay: Length 415 m., depth 13.2 m. Iron ore. Two shiploaders of 4,000 t.p.h. each.
SSAB Quay: Length 498 m., depth 8.0 m. No goods handled.
Victoria Harbour: Length 775 m., depth 9.0 – 12.2 m. Coal, coke, iron, steel, limestone. Three 18 ton grab cranes, 35 tons with hook and 1×25 ton gantry crane (rate 800 t.p.h.).
Stromoren Ro/Ro Quay: Length 120 m. Depth 9.0 m.
STEVEDORES: Bottenvikens Stuveri AB. Tel: (0920) 55600.
TANKERS: Diameter of lines from 150 mm. up to 350 mm. 2 oil jetties depth 7.8 m. and 12.2 m. Length 20 m. and 60 m. respectively. Facilities for receiving dirty ballast. Capacity 300 cu.m./hr.
New Oil Berth: Max. LOA 250 m., max. beam 32.3 m., max. draft 11.2 m., max. d.w.t. 45,000. Distance bow to manifold 120 m. Vessels berth starboard side to.
DENSITY: Fresh water, 1000.
FRESH WATER: Fresh water available at all berths. Minimum charge U.S.$ 30.00. Cost U.S.$ 2.20 per ton.
FUEL: All grades of oil available.
CONSULS: Telephone Numbers:

Danish 15602	French 16329	Norwegian 221790
Finnish 50140	Germany 53852	U.K. 55202

REPAIRS: Only small engine repairs.
SURVEYORS: Bothnia Control. Tel: 55412.
GANGWAY/DECK WATCHMEN: Safety watchmen are to be on board all tankers when loading or discharging.
OPENING/CLOSING HATCHES: Ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes or 250 grams of tobacco for each Crew member every 10 days. (Wine/Spirits) 1 litre for each Crew member over 20 years old, every 10 days.
AIRPORT: 15 km. from port. Served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: See "Stockholm".
POLICE/FIRE/AMBULANCE: Tel: 90 000.
TELEPHONES: Connections available at oil terminal, coal terminal and ore terminal.
IDENTIFICATION CARDS: Not necessary.
GARBAGE DISPOSAL: Garbage containers can be placed alongside, free of charge. Contact Lulea Traffic, VHF Channel 14, or ship's agent.
WASTE OIL DISPOSAL: Waste oil can be disposed of via tanker trucks, minimum pumping rate of 5 cu.m. per hour is required from the ship. Up to 8 cu.m. can be disposed of free of charge. The service can be arranged through ship's agent or through Port of Lulea, Traffic Division, Fax: 0920-55594.
SEAMAN'S CLUBS: A football field is available near Victoria Harbour. *Lulea Soldiers' and Sailors' Institute:* Seamen and national servicemen who come to Lulea have their own premises at Stationsgatan 72, where various facilities are available, including a canteen with reasonably priced food, billiard table, TV, telephone and a music room. These premises are open Monday-Friday 1700 – 2200 hrs. and Sunday 1800 – 2230 hrs.
Lulea Soldiers' and Sailors' Institute. Tel: 27426 or 28875.
CURRENCY: Swedish Kronor (SEK). U.S.$ 1.00 = SEK 8.00 (1.2.94).
DEVELOPMENTS: A new quay for iron ore is planned (See "Plan").
AUTHORITY: Lulea Hamn, Stromorvagen 9, 97437 Lulea, Sweden. *Tel:* (0920) 294007. *After Hours Tel:* (0920) 294000. *Telex:* Lulots 80241. *FAX:* (0920) 55594. *Contact:* Bo Westman, Port Director.

LYSEKIL: 58.17 N. 11.26 E. **(See Plan)**

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot boards 2 miles West of Gaven Lighthouse. 5 hours advance notice required. Pilot ordered by VHF Channel 16 or telephone No. 60800.
ANCHORAGES: Safe anchorages both for small and large vessels just outside harbour in Gullmarsfiord.
RESTRICTIONS: No restrictions night entry, except max. draft possible 30 ft. No tide.
MAX. SIZE: Maximum permissible length for berthing about 600 ft. Draft 30 ft.
HEALTH: Declaration of Health only when required from Customs or for vessel coming from outside Scandinavia.
RADIO: Cable Agents giving ETA, draft, cargo and cash required via Gothenburg Radio.
RADAR/VHF: No port radar service, VHF for calling Pilot, Channel 16.
TUGS: Must be requested through Agent at least 12 hours before arrival.
BERTHING: 4 berths available. Grotorev: Length 240 ft., max. draft 34 ft. Gullmarskajen: Length 600 ft., max. draft 30 ft. Grotokajen: 500 ft., max. draft 22 ft. Anderssons Kav: 400 ft., max. draft 18 ft. Railway on all berths.
CRANES: Five mobile harbour cranes working all berths. Maximum capacity 80 tons. No restrictions against using ship's own gear.
STEVEDORES: Ordered by Agents.
MEDICAL: Hospital in town.
TANKERS: See the port of "Brofjorden".
DENSITY: About 1027.
FRESH WATER: Available from shore installation.
FUEL: Gas oil and diesel available.
CONSULS: Denmark, Finland, Iceland, Norway.
REPAIRS: Small repairs possible.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Normally opened by crew.
CERTIFICATES: Registered Tonnage Certificate.
CUSTOMS ALLOWANCES: See "Stockholm".
HOLIDAYS: See "Stockholm".
REPATRIATION: Change of crew and repatriation possible.
AIRPORT: None.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
TELEPHONE: Police, Ambulance, Fire Brigade, Tel: 90000.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Lysekils Hamn, Hamnkontoret, S-45300 Lysekil, Sweden. *Tel:* 0523-14090. *FAX:* 0523-14094. *Contact:* Olle Samuelson, Harbour Master.

MALMO (including Limhamn): 55.37 N. 13.00 E. **(See Plan)**

DOCUMENTS:
2 Crew Lists.
1 Passenger List.
2 Lists of Personal Effects (Tobacco List).
1 Declaration of Health.
2 Stores Lists.
3 Cargo Manifests.
1 Bill of Measurement.
1 Certificate of Nationality.
1 Derat Certificate.
PILOTAGE: Malmo Pilot Station serves the ports of Malmo, Trelleborg and Ystad and the Falsterbo Canal. Pilots for through-pilotage can be obtained. A 24 hour watch on VHF Channels 16 and 20 or telephone 4640115269 is maintained. The Pilot Station is equipped with Telex: 32435 MLOTS. Fax: (40) 301868.

Pilots can also be arranged through ship's local Agent. 5 hours notice is required. Pilot boat orange-coloured cutter equipped VHF and radar. Pilot boards at Malmo roadstead. In case of bad weather vessel awaits Pilot at roadstead. (Also see "Stockholm" and "General – Pilotage" before first port).

ANCHORAGES: Vessels anchor about 5 cables North of Fairway Buoy "Roder Prick" and East of leading lights Centralhamnsrannan Nedre and Ovre, and S.W. of leading lights Malmo Oljehamn Nedre and Malmo Oljehamn Ovre. Depth 12 m. to 14 m. and bottom hard clay. Larger vessels will be anchored at the Pilots directions.

RESTRICTIONS: Speed must be reduced inside breakwaters. When red flag hoisted (red lantern at night) at the N.E Dry dock pier head, indicating dock gates open, vessels may pass breakwater at minimum speed. Bridge opening signal for passing from South Wharf Basin; 2 long blasts, followed by 1 short.

MAX. SIZE: *Bulk/Oil Harbour:* Max. length 260 m. on draft not exceeding 12.5 m. for bulk harbour and 11.4 m. for oil wharf.
Free Port: Max. length 225 m. on draft not exceeding 8.6 m. Max. length recommended in New Harbour is 150 m. on max. draft 6.6 m. and in Industrial Harbour 170 m. on max. draft 8.4 m. No tides.

HEALTH: Free Pratique automatically granted arriving from non-infested areas. If arriving from infested areas Health Declaration must be presented immediately on arrival. If diseases on board suspected, vessel allowed to enter after approval of City Medical Adviser, but nobody allowed on board until vessel's crew examined by doctor and after approval of Medical Adviser.

RADIO: Vessel can route ETA cables through Gothenburg Radio (call sign SAG or Channel 26 on VHF), open all hours. Radio stations can also be called by radio-telephone on 2182 kHz.

VHF: Port Control Office equipped with VHF (Channels 16, 9, 10, 11, 12, 13 and 14, watch on Channel 20), open Monday-Friday, 0600 hrs. – 2200 hrs. Masters can receive information about berthing, present traffic and existing hazards to navigation in harbour area. Telex: 33275. Fax: 040-302517.

BERTHING:
Passenger Harbour:

Berth	*Length (m.)*	*Depth (m.)*
304 – 308	1,903	6.5
401 – 404	1,180	4.0 – 6.0

3 of these cranes can be equipped with grabs

Port of Limhamn: Incorporated with Malmo Port Authority 1978. This port consists of a cement jetty, a centreport and a ferry port.

The Port of Limhamn lies to the South of Malmo and is accessible via two fairways; the Southern one has a depth of 5.0 m. and leads to the Ferry Harbour, and the Northern fairway has two branches, one to the Oil Harbour with a depth of 10.5 m. and one to the Central Harbour with a depth of 8.6 m.

Berth	*Length (m.)*	*Depth (m.)*	*No.*	*Cranes (tons)*
Centreport:				
107 – 111	500	8.4	1	5 (private berth)
104 – 106	200	8.0 – 8.4	–	
112 – 113	180	8.0	–	
117 – 118	200	8.0	–	
Ferry port:				
217, 220		5.0		Car ferry berth
Oil berth (jetty):				
125	90	10.0		Loading plant for cement and tanker berth

TUGS: Tugs usually meet vessels at roadstead. Tugs lines used.

Tugs can be arranged through a shipbroker or the Port Control offi and are available round the clock from the Red Tug Fleet Co. Ltd Malmo. 2×3,000 h.p. tugs available. Others are available if necessa

BRIDGES: Will be opened with certain exceptions 0700 – 1700 hr weekdays. May be opened other hours on request to Port Control Offic

CONTAINER HANDLING FACILITIES: 10 Roll-on/Roll-off ramp 2 container berths with 2×46 tons capacity container cranes, 4 fork trucks with 25 – 46 tons capacity.

STEVEDORES: Normal working hours are from 0700 – 1600 hr Monday to Friday. Standard overtime shifts of up to 4.5 hours can b arranged. Additional overtime work can be obtained by spec arrangement with the Terminal Company. Overtime work can also b arranged on Saturdays, Sundays and holidays.
Stevedore Company: Malmo Sjoterminal AB, Hjalmaregatan 1, 211 Malmo. Tel: 040-34 40 00. Telex: 32713 Seaterm S. Fax: 40-3025 Director: Bertil Cederholm.

MEDICAL: No advance notice required for medical attention. Go hospital facilities available. See also "Health".

TANKERS/BULK CARRIERS: The Bulk/Oil Harbour in th Northernmost section of the port of Malmo can be reached by a spec approach fairway, the Oil Harbour channel, which has a depth of nea 43.5 ft. The harbour is equipped with 7 berths, 2 of these being for ocea going tankers with modern equipment for the unloading of oils a chemicals. Water depth varies between 19.5 ft and 39 ft.

The harbour can accept fully-loaded tankers of up to 60,000 d.w.t. a well as partly-loaded ships of up to 100,000 tons.

The berths for ocean-going tankers are each equipped w 3 hydraulically manoeuvrable transfer plants for faster and more reliab unloading. A piping system leads from the berths, unloading capacity up to 2,000 tons per transfer plant per berth per hour. Tanks and pip can be heated from a central steam-production station used by all firm The Oil Harbour area also contains storage tanks for liquid chemica and solvents. There are also good possibilities for development wit the area, e.g. petrochemical industries.

Berth	*Quay Length*	*Depth*	*Crane capacity*
1001 – 1002	200 m.	13.5 m.	3×20 tons (500 t.p.h
1003	260 m.	12.0 m.	
1004	260 m.	12.0 m.	
1006 – 1007	90 m.	6.0 m.	
1008 – 1009	90 m.	6.0 m.	
1010	100 m.	6.0 m.	

Also see "Berthing" – Port of Limhamn.

Report: *Cautionary Advice – In Port:* The port is approached from th N.W. via a relatively narrow dredged channel, marked with buoys a keeping 2 red leading lights in line. A current with a velocity of up t 2 knots may set across the channel, usually in a Northeasterly directio It is, therefore, important that tugs are made fast with good lines befo the channel is entered. Strong Southerly and Southeasterly wind particularly in the Spring, may lower the water level in the harbo considerably below mean water level. The average density of th harbour water is 1010 at MLW.
Berthing Procedure: The procedure is similar for both berths used b Esso. Vessels berth port side alongside, and are normally swung in th manoeuvring basin North of the berth, assisted by tugs. If underke clearance permits, the starboard anchor is used and vessels are th pushed alongside the breasting face which is protected by truck tyre on wood.

DENSITY: Average density 1010. No tide experienced.

FRESH WATER: Fresh water can be ordered from the Port Contr office (Tel: 040-128864) and is available at all quays at a rate of abo 20-30 t.p.h.

FUEL: All types of bunker oil are available from tank trucks at variou quays in Malmo and Limhamn.

FIRE PRECAUTIONS: Apart from usual non-smoking precaution vessel discharging or loading dangerous goods of Class 1 in IMO cod required to have a fire guard on board at all times.

In Oil Harbour the shore-valve watchman also serves as fire guard

REPAIRS/DRY DOCKS: Ship and engine repairs of all kinds carrie out by Rayni. Tel: 040-970440. Fax: 040-232734.

Dry dock for small vessels.

SURVEYORS:
1. Cargo Inspectors available.
2. Surveyors available.

GANGWAY/DECK WATCHMEN: Not considered necessary other tha in Malmo Oil Harbour. Decision to be made by Master.

OPENING/CLOSING HATCHES: Normally carried out by stevedor on ocean-going vessels.

CERTIFICATES:
Load line Certificate.
Radio Certificate.
Safety Equipment Certificate.
Gear Certificate.

CUSTOMS ALLOWANCES: Tobacco, 200 cigarettes or 40 cigars or 150 grams of smoking tobacco per week out of bond. Spirits, 0.75 litre spirits per week out of bond.

CARGO GEAR: No additional requirements.

REPATRIATION: Facilities exist for effecting crew changes and arranging repatriations.

AIRPORT: Sturup Airport, served by regular airlines, situated about 25 km. from Port of Malmo.

Helioport: Malmo Port, Freeport, service after special order. See "General".

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: See "Stockholm". Oil tankers can be dispatched all hours.

POLICE/AMBULANCE/FIRE: Tel: 90000.

EMERGENCY CO-ORDINATION CENTRE: Marine Centre Malmo (Tel: 040/11 55 55) include Royal Navy, Swedish Coast Guard, Swedish Administration of Shipping and Navigation and Pilots.

SOS – Alarm Centre Malmo (Tel: 90 000).

TELEPHONES: Can be connected in Bulk Harbour and can be ordered from the Port Control office. Tel: 040-128864.

STORING: See "Prelims".

1. Vessels can be stored by truck in all docks except the Oil Harbour.
2. If barges available ships may be stored with same if not interfering with cargo handling. In Oil Harbour, regulations must be followed.
3. Yes, excluding Oil Harbour, distance 30 m.
4. Yes, if not interfering with cargo handling.
5. General regulations for Sweden.
6. Yes.

Port Control Office: Monday-Friday, 0600 hrs. – 2200 hrs. Tel: 040-344189, 128864. VHF radio Channels 16 and 14.

Salvage work is available from The Red Tug Fleet Co. Ltd. in Malmo. Tel: 040-124492.

Seaman's Centre (Sjomansgarden): Fiskehamnsgatan 3, Malmo. Tel: 040-124135. Chapel, lounge, hobby rooms, restaurant, cafeteria, etc.

Seaman's Hotel (Neptun): Citadellsvagen 4, Malmo. Tel: 040-239605.

Ship Chandlers: A number of ship chandlers are located in the immediate vicinity of the port.

Waste Containers for ship's waste (but not for engine-room waste or oil) are available on all quays.

Waste Oil: Contact the Port Control Office in order to dispose of waste oil from the engine room.

Watchmen: A number of security companies are active in Malmo – see the telephone book. For safety personnel for discharging of tankers, contact AB Skeppshjalp. Tel: 040-978789.

Weighing Station: Located at the entrance to the Free Port. Tel: 040-344258. Open 0730 – 1200, 1230 – 1600.

Workshop Service: See "Repairs/Dry Docks". Smaller workshops are located in Malmo and Limhamn – see the telephone book.

AUTHORITY: Malmo Seaterminal Co. Ltd., P. O. Box 556, Hjalmaregatan 1, S-21120 Malmo. *Tel:* 40-344000. *Telex:* 33275 Mport S. *FAX:* 46-40-302517. *Contact:* Bertil Cederholm, General Manager. Jan Olsson, Marketing Manager.

NORRKOPING: 58.36 N. 16.12 E. (See Plan)

DOCUMENTS: 3 Customs Documents. 3 Health Documents. 3 Crew Lists. 3 Passenger Lists. 3 Manifests.

Master of ship arriving at first Swedish port from abroad has to give Maritime Declaration of Health on special form.

PILOTAGE: See "Stockholm". Ships will be received 2 nautical miles North of the lighthouse Gustav Dahlen. The Pilot must be ordered on radio, telephone or in some other way at least 5 hours before piloting to start.

ANCHORAGES: Lat. 58° 38.7′ N., Long. 16° 22.5′ E. Depth 70 ft.

RESTRICTIONS: Tankers loaded with more than 10,000 tons gasoline must not move in port at night-time. Tankers over 15,000 d.w.t. will not be shifted at night-time. Pampushamnen Oil Jetty: Tankers loaded with more than 10,000 tons must not enter at night-time. Inner Harbour: Tankers loaded with more than 15,000 tons must not enter at night-time.

MAX. SIZE: Pampushamnen Oil Jetty can berth vessel of about 70,000 d.w.t. with max. draft of 11.4 m. MLW. Gastgivarehagen Oil Jetty can berth vessel with a max. draft 8.4 m. MLW and length 195 m. Ramshall and Tallbacken Oil Jetty can berth vessel with max. draft 7.9 m. MLW, length 177 m., breadth 24.4 m., daytime only. General cargo and bulk cargo quay at Pampushamnen with max. draft 11.4 m. MLW. General cargo quay (Ohmanskajen via the Lindo Kanal) can berth vessel max. draft 8.4 m. MLW and max. LOA 190 m. Dry cargo vessels of 15,000 d.w.t. or more for Ohmanskajen daylight entry only. Dry cargo vessels of max. LOA 190 m. and max. breadth of 23 m. and vessels of max. LOA 180 m. and max. breadth of 26 m. permitted. Vessels exceeding this size shall obtain prior permission from Pilots to enter the Ohmanskajen through the Lindo Kanal. Vessels must be able to make headway through the Kanal with a speed not exceeding 5 knots. Dry cargo vessels of 25,000 d.w.t. or more should have bridge controlled main engines. Inner Harbour can berth vessel max. draft 6.4 m.

Largest tanker at Pampushamnen, 66,875 d.w.t. LOA 236.46 m., Beam 33.3 m. Also see "Tankers".

Largest dry cargo vessel at Pampuskajen: 43,793 d.w.t., LOA 183 m., Beam 31.1 m. A vessel of LOA 199.7 m. and Beam 33.3 m. has also berthed.

Largest dry cargo vessel at Ohmanskajen: 34,976 d.w.t., LOA 181 m., Beam 26.4 m.

RADIO: Stockholm Radio, Tingstade Radio.

TUGS: 2 tugs available, 1,680 b.h.p. and 3,400 b.h.p. The 2 tugs are icebreaking. Join vessel off St. Juten Lat. 58° 38.1′ N., Long. 16° 19.6′ E. Ship's lines to be used. All towing is carried out subject to "Scandinavian Tugowners Standard Conditions of the year 1959 revised 1974".

RADAR/VHF: VHF Channel 9, 14 and 16. No radar.

BERTHING: No specific requirements except at Oil Jetty Tallbacken and Ramshall, which require daylight docking and undocking.

Berths specially equipped for grain, berths equipped for containers, berth for Ro/Ro traffic, berths handling liquid chemicals. 5,300 m. of quayage with depths of 5 m. – 12 m. and 6 oil jetties.

Norra kajen: Norra kajen is used primarily for the handling of coal, steel, bulk commodities and raw wood material. The quay is equipped with bulk handling cranes, and the water depth is between 6.0 m. and 7.0 m.

Sodra kajen: Used primarily for timber, forest products and general cargo shipped in small tonnage. Water depth 6.0 m. – 7.0 m. Grain, fodder, fertilisers and clay are handled on a section of the quay between Ohmanskajen and Sodra kajen. Depths here are between 7.0 m. and 9.0 m.

Ohmanskajen: With a water depth of 9.0 m., Ohmanskajen is mainly used for general cargo, containers and forest products.

Adjacent to Ohmanskajen there is one Ro/Ro berth (depth 9.0 m.) and a passenger terminal (depth 8.0 m.) with storing areas and warehouses for goods storage. 2×30 ton cranes for container handling.

Pampusterminalen: Pampusterminalen, water depth 12.0 m. has the capacity for serving 2 vessels simultaneously and 30,000 to 40,000 tonners can utilise their carrying capacities at full draft. Via Pampusterminalen, general cargo, forest products and bulk commodities are handled. Cargoes are moved by the ship's own equipment, which is complemented if necessary by 5 shore cranes. The quay is also used by Ro/Ro vessels with stern quarter ramps.

Adjacent to Pampusterminalen, there are large areas for storing goods within fenced grounds. Warehouses are available for weather-sensitive goods. Pampusterminalen has a railway connection as well as high standard roads connecting with European highways and major district roads.

Pampushamnen Pier No. 3 Ro/Ro berth for coal discharge: A Ro/Ro berth has been added to Pier No. 3 for discharging of coal from barges.

CRANES: All cranes are operated by Norrkopings Hamn and Stuveri AB. These include 14 electrical transportable quay cranes with a capacity of 4 – 10 tonnes, two 30 tonnes cranes which together can lift 50 tonnes, and in Pampus Harbour 2 electric cranes of 35 tonnes and 50 tonnes, and one mobile crane of 36 tons. There are also 2 mobile cranes of 6 – 23 tonnes. One fixed heavy lift crane with a maximum lifting capacity of 320 tonnes (water depth alongside crane is 9.0 m.) and one 4 tonnes floating crane.

SPECIALISED CARGO HANDLING FACILITIES: *Ro/Ro Berths:*

One Ro/Ro berth with a fixed concrete ramp and a water depth of 9 m. Loading and discharging by shore cranes (30 tons) may take place simultaneously with Ro/Ro operations. Stern loading vessels port side alongside.

One Ro/Ro berth with a fixed concrete ramp and a water depth of 8 m. for Ro/Ro operations only. Stern loading vessels starboard side alongside.

One Ro/Ro berth with a fixed concrete ramp adjacent to the heavy lift crane (320 tons) specially designed for heavy loads. Water depth 9 m.

One Ro/Ro berth with depth of 7.5 m. for discharging coal.

Djuron

Grain Terminal, position Lat. 58° 38′ N., Long. 16° 20.1′ E. 160 m. long concrete pier with a water depth of 12.2 m. MLW. Travelling grain loader with maximum loading capacity 500 tonnes/hour. Max. elevation above MLW 18 m.

Braviken

Paper Mill, Holmens Bruk AB. Lat. 58° 38.3′ N., Long. 16° 16.1′ E. 126 m. long concrete pier with a water depth of 8.8 m. MLW. Mobile cranes for loading on request. Otherwise ship's gear. Ro/Ro fixed concrete ramp 20 m. wide with a water depth of 6.8 m. MLW. Stern loading vessels starboard side alongside.

STEVEDORES: Gangs must be ordered before 1400 hrs. day before arriving.

MEDICAL: Arranged by Agent. All services available.

TANKERS: *Pampushamnen:* Pier I: Depth alongside 12 m. The berth is equipped with a crane for the handling of hoses and has pipe connections for all petroleum and bitumen products. Permanent gangway for the use of tankers.

Pier II: Depth alongside 12 m. The berth is equipped with a crane for the handling of hoses, and 3 mechanical couplings and has pipe connections for all petroleum products. Permanent gangway for the use of tankers.

Pier III (coastal tonnage): Depth alongside 7.5 m. The berth is equipped with a crane for the handling of hoses and has pipe connections for all petroleum products.

Fuel oil: one 18 in. and one 16 in. pipelines for discharging. 2 connections with 8 in. hoses. Gas oil: 14 in. pipes with 2 connections to 8 in. hoses. Asphalt: 10 in. pipes. Gasoline: 12 in. pipes with 1 connection to 8 in. hose. Connection to bigger or smaller hoses possible through existing flange-connections.

Pipe connections for discharging ballast water are installed at all piers at Pampushamnen. Receiving of ballast water is covered by ballastage. Ballast water containing any chemical agents not accepted. Receiving capacity during the first hour is 650 cu.m. Thereafter, 150 cu.m.p.h.

Tallbacken (Pol Transport): Depth alongside 8.5 m. Beam of vessels restricted to 24 m. (78 ft. 9 in.) due to passage through the Handelo drawbridge. Vessels require own gear for the handling of hoses.

3 connections for variable kinds of oil, 8 in. hose connections.

Gastgivarehagen (Pol Transport): Depth alongside 9 m. The berth is equipped with a crane for the handling of hoses.

4 connections for variable kinds of oil, 8 in. hose connections.

DENSITY: 1000.

Within the port area a total of 25 straddle, fork and clamptrucks, as well as 2 front loaders, the biggest fork truck having a lifting capacity of 25 tons.

A storage space of 21,000 sq.m. inside warehouses, and an open air space of 140,000 sq.m.

STEVEDORES: Require notice before 1500 hrs. if loading/discharging shall start at 0730 hrs. following morning, or notice before 1000 hrs. if loading/discharging shall start 1300 hrs. the same day.

Stevedoring Company: Solvesborg Stuveri and Hamn AB. Tel: 0456-10119, 12295.

TANKERS: 3 Shore-lines for oil products from oil jetty to depots.

1. 250 mm. for Bunker C (2nd fuel).
2. 200 mm. for paraffin oil.
3. 200 mm. for petrol. For discharge coasters use ship's equipment.

Larger ships discharging Bunker C oil use harbour's 8 in. rubber hose.

FRESH WATER: Available.

FUEL: Ordered from oil companies by ship's Agents.

CONSULS: Royal Norwegian Vice-Consulate, Stortorget 10, Box 115, S-29401 Solvesborg. Tel: 0456-150 20.

REPAIRS: Carried out by local workshops.

DRY DOCKS: Facilities available.

GANGWAY/DECK WATCHMEN: Watchmen normally not needed. Can be ordered by ship's Agents.

OPENING/CLOSING HATCHES: Normally opened/closed by crew.

CERTIFICATES: See "Stockholm".

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes/week per head. Wine/spirit: normally 1 litre/week.

Customs House, Tel: 12000.

REPATRIATION: Possible.

AIRPORT: 50 km. to Kristianstad Airport and 60 km. to Ronneby Airport. Served by regular inland airlines.

TIME: Local time is GMT plus 1 hour. Summertime GMT plus 2 hours.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Dial 90 000 and ask for Police, Ambulance or Fire Department.

TELEPHONES: Telephones available in Agent's offices at quay and telephone boxes.

IDENTIFICATION CARDS: Not needed.

DELAYS: Normally no delays.

GARBAGE DISPOSAL: Blue, closed, containers are placed in harbour area. Notify harbour authority, if used.

WASTE OIL DISPOSAL: Tanker trucks of 12 cu.m. available at any berth.

SEAMAN'S CLUBS: Telephone boxes and post office in city centre. No other services for seamen.

CURRENCY: Swedish Kronor (SEK).

AUTHORITY: Solvesborgs Stuveri & Hamn AB, Box 60, S-294 01 Solvesborg, Sweden. *Tel:* 46-456-10119, 12295, 12262. *FAX:* 46-456-14938. *Contact:* Kjell Andersson, Managing Director.

STENUNGSUND: 58.04 N. 11.49 E. (See Plan)

LOCATION: Stenungsund is located on the East side of Askero Fjorden about 23 miles North of Gothenburg. There are 3 terminals.

1. The Power Board Terminal.
2. The Borealis Havden Terminal.
3. The Norsk Hydro Terminal.

The terminals are located about 20 miles from the Hatteberget Light Tower (Lat. 57° 52′ N., Long. 11° 28′ E.) and are reached via Marstrands Fjorden and Hake Fjorden.

DOCUMENTS:

3 Crew Lists.
2 Passenger Lists.
1 Tobacco and/or Stores List.
1 Manifest.
1 List of Animals on Board (if any).
Access to the usual ship's papers (measurement, register, certificate, etc.).
If away from Sweden more than 15 days: Bill of Health.

APPROACHES: When approaching from the West, ships must kee North of the area dangerous due to mines extending to Lat. 57° 47′ N Long. 11° 03′ E.

Currents in this area are unpredictable and are much influenced b the wind. Ships have reported experiencing a change in direction o current on approaching the Hatteberget Light Tower, for example, Sou going outside Hatteberget, North-going inside Hatteberget. Currents o 1 to 3 knots have been experienced.

Seabuoy-Berth: For larger ships bound for Stenungsund th recommended track is Algo Fjorden shown on charts as passin between N. Meholm and S. Meholm is not always followed by Pilot some preferring to pass South of the Hunden Shoal and S. Meholm Great caution is needed in taking this Southerly route as there ar unmarked dangers. During darkness or in poor visibility the Pilot intentions should be fully discussed before entering Algo Fjorden.

The channel between Bratton, Kallon and Almon Islands at the Nort end of Hake Fjord and under the Tjornbron (bridge) between Kallon an Almon is in the form of an "S" bend and vision is obstructed. Traff may be suddenly met with little warning, particularly as some ships d not carry Pilots, and there is no speed limit. Engines should be o standby, anchors ready and manned in this area.

PILOTAGE: The pilot boat is steel hulled, painted orange, and it wi meet ships based on ETA and VHF contact. The Pilot boards a Hatteberget Light Tower. Pilots will not handle large vessels durin darkness. Those ships must anchor and await daylight. ETA advice t Pilot to be sent to "Lotsarna Marstrand" via Goteborg Radio at leas 5 hours before arrival giving ship's name, flag, draft, ETA pilot statio and destination.

ANCHORAGES: While awaiting berth vessels anchor outside harbou N.W. of Powerboard Jetty. Safe anchorages everywhere, but fairwa South of Galteron Lighthouse has to be avoided.

RESTRICTIONS: Max. draft in channel 13.0 m. Night navigation i decided by individual case.

Bridge height at Tjornbron is 43 m.

MAX. SIZE: *Powerboard Jetty:* Max. draft North side 12.30 m., Sout side 10.50 m.

Statoil Havden: Max. LOA 240 m. Max. draft 14.0 m. Distance bow t manifold 99.0 m.

Norsk Hydro Terminal: Max. LOA 100 m. Depth 9.5 m.

HEALTH: No special Pratique necessary. If any disease or feve suspected on board, doctor must be called on arrival. Pratiqu automatically granted when entering from another port in Sweden.

RADIO: Gothenburg radio.

VHF: Pilot on Channel 16. Working on Channel 6.

TUGS: At present no tugs are stationed in Stenungsund but have to b ordered from Gothenburg at least 2 hours' steaming away.

Tugs are diesel driven, single screw, single rudder. Tugs are mad fast after passing Vinterholmen at the North end of Hake Fjord an before passing through the narrows under the bridge. Tugs tow on th hook using ship's ropes. The larger tugs use two ship's ropes out of th same lead and care must be taken to equalise the load on the two line before full load is taken.

The Pilot carries his own VHF set (having Channels 16, 13 and 12 and uses this to communicate with the tugs.

50,000 d.w.t. tankers use 3 tugs, 1 large tug forward, 1 large an 1 smaller tug aft.

MEDICAL: Doctors and dentists available at short notice. Hospital situated at Uddevalla and Kungalv, ambulances at Stenungsund.

TANKERS: The Powerboard Terminal:

General: The Powerboard Jetty is a finger pier aligned East/West locate on the East side of the Askero Fjord about 1 nautical mile North of th town of Stenungsund (Lat. 58° 05.3′ N., Long. 11° 49.2′ E.). It is show on B.A. Chart 890. It is used for the import and export of fuel oil for th power station located 0.5 miles away and for the import of product solvents and LPG for oil and petrochemical companies.

Cautionary Advice: Currents in Askero Fjorden are unpredictable bot in speed and direction but generally run across the direction of the finge pier. The fendering of the outer corners of the pier is of low energ absorption characteristics and heavy landings must be avoided. Anchor should be manned and ready for letting go.

Berthing Procedures: On proceeding up Askero Fjorden past Havde the ship is swung to starboard with the assistance of tugs and lined u for the pier. Anchors are sometimes used to help steady the bow on th correct heading, and as assistance in bringing the ship up.

Ocean-going ships berth on the North side of the pier and ar therefore, starboard side to berth. When in position, most ships' stern protrude beyond the end of the pier by as much as one-third of the length, therefore, maximum attention must be paid to the stern mooring Because moorings placed on the buoy on the starboard quarter or o the bollards on the South shore prevent ships from using the South sid of the pier the terminal will not, as a rule, put moorings to these point However, in periods of unsettled weather, particularly if winds are fro the S.W., Masters of the larger ships should insist on stern mooring being sent to the buoy and South shore. It should be borne in mind tha tugs are not readily available at Stenungsund. Moorings are take ashore initially by boat and then by heaving line. The forward spring lin is usually first line ashore. No shore moorings are provided.

Gangway: Ship's gangway is used, there is ample room on the jetty t land the gangway abaft the manifold. Note that when ship is light th normal ship's gangway will become very steep (over 50°) and specia safety precautions to prevent accidents to personnel will be necessar

Fendering: The concrete strong points of the pier are protected b tubular rubber 600 mm. diameter erected horizontally. The concre outer corners are well protected with low friction fenders.

Cargo Connections and Handling: HFO, Heating Oil, Naphtha an Mogas are handled. Ullages and temperatures are taken jointly wi shore representative upon arrival alongside.

Starboard manifold should be prepared for 10 in. hoses, 2 or 3 flexib hoses with 10 in. ASA bolted flanges are usually connected. Starboa derrick and a 4 ton shore crane are used for hose connection.

Concurrent loading and discharging are not allowed. Maximum back pressure is 10 kg./sq.cm.

Naphtha receiving capacity is maximum 3,000 cu.m.p.h. Normal discharge rate is about 1,800 cu.m.p.h.

Deballasting Facilities: The terminal has limited high flash ballast reception facilities, about 2,400 cu.m. Discharge rate is about 500 cu.m.p.h.

Clean oil-free ballast may be discharged overboard but it is the ship's responsibility to ensure that the ballast water is oil-free and very heavy penalties are imposed for oil pollution.

Passing Traffic, Weather, Tide, etc.: There are no unusual problems except for strong S.W. winds when it is important that breast moorings are run to the starboard quarter buoy and to the South shore.

Special Regulations: No small craft are allowed alongside ship while at jetty. No bunkering during loading and discharging.

Oil Pollution Safeguards: Floating oil booms – partly fixed and partly portable are available to surround the ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: Remote-controlled foam-guns and water monitors are available at the berth.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

Additional Information: The berth on the South side of the Powerboard finger pier also handles HFO, heating oil, naphtha and mogas but is mainly used for loading/discharging LPG.

Statoil Terminal, Havden: *General:* Statoil's Havden terminal berth is located on the North side of the Havden peninsula on the East side of Askero Fjorden (Lat. 58° 05′ N., Long. 11° 48.5′ E.). It is a marginal type berth with a breasting face about 60 m. long. It is used for the discharge of naphtha and LPG.

Cautionary Advice: See "Powerboard Terminal".

Telegraph cables (shown on the chart) run out from the shore close Northwards of the berth and anchors should not be used. In addition, the dredged area tapers quite sharply towards the East end of the berth and use of an anchor could result in the ship "sitting" on the anchor or its cable.

Berthing Procedures: On arriving off Havden the ship is swung to starboard with the assistance of tugs and steamed slowly to the berth. Ships always berth starboard side to berth. Moorings are taken ashore by motor boat, the forward spring is usually the first line ashore. The stern of the ship is not well sheltered from the prevailing S.W. winds and special attention must be paid to putting out good stern moorings. It must be remembered that tugs are not readily available in Stenungsund. No shore moorings are provided.

Gangway: Ship's gangway used, ample room on the jetty to land the gangway aft of the cargo manifold. Note that, when ship is light, the normal ship's gangway will become very steep (over 50°) and special precautions to prevent accidents to personnel will be necessary.

Fendering: Each of the 3 concrete strong points is fendered by truck tyres around a rubber core slung horizontally. Care should be taken not to land initially between the strong points.

Cargo Connection and Handling: Only naphtha and LPG are handled at this berth. No bunkers can be provided. 2×10 in. fully counterbalanced hard arms of Chicksan manufacture are provided. Each has 10 in. ASA bolted flanges.

Ullages and temperatures are taken together with shore representative upon arrival alongside.

Starboard manifold should be prepared to accept 2×10 in. hard arms. If ship's manifold has large overhang outside the support, this should be jacked up before connection of arms. Stays, derricks, etc., in vicinity of starboard manifold should be removed. There are no facilities for receipt of dirty ballast at the terminal.

Oil Pollution Safeguards: Floating oil booms, partly fixed, partly portable are available to surround ship and jetty. Mechanical suction equipment is available.

Fire Fighting Equipment: The jetty is equipped with a fire water and a foam line and portable monitors.

Fresh Water: Good quality fresh water is available ex-jetty by hose, rate 25 t.p.h.

Norsk Hydro Terminal: Max. LOA 100 m. Depth 9.5 m.

FUEL: Only available by barge from other places (i.e. Gothenburg). Bunkering only during daylight. Can be ordered at short notice.

FIRE PRECAUTIONS: Normal precautions.

CONSULS: At Gothenburg.

REPAIRS: Minor repairs can be made locally, large repairs by labour from Gothenburg shipyards. Gas-freeing alongside with Port Captain's approval only. Repairs alongside with Port Captain's approval only.

SURVEYORS: D & D Marine Consult, Upplandsgatan 25, 11360 Stockholm. Tel: 08-34 1590.

GANGWAY/DECK WATCHMEN: Watchmen from ashore necessary when telephone connected.

CUSTOMS ALLOWANCES: 200 cigarettes. 1 bottle of spirits.

REPATRIATION: All facilities exist.

AIRPORT: Gothenburg 50 km. away. Regular airlines.

TIME: GMT plus 1 hour.

HOLIDAYS: Tankers load and discharge all year round.

TELEPHONES: Connected on board if required. Watchmen attend calls. Fireman and alarm on jetty during whole operation.

SHORE LEAVE: Permitted. Distance to Stenungsund 1 km., Uddevalla 40 km. or Gothenburg 50 km. by bus, train or taxi. Shore passes issued at the gate.

IDENTIFICATION CARDS: The gate at the Powerboard Terminal is TV-guarded. Each crew member must carry a Passing Permission allowing passage through the gate. Required number of permissions will be handed over to the Master by the Agent on ship's arrival. Passing Permission at Statoil Terminal, Havden, is not required.

GARBAGE DISPOSAL: Container available for garbage, free of charge.

WASTE OIL DISPOSAL: Reception facilities for engine slops only up to a maximum of 15 cu.m. at a time.

SEAMAN'S CLUBS: None.

CURRENCY: Swedish Kronor (SEK).

SHIPMASTER'S REPORT: January 1989 (Updated 1990).

Pilotage: On approaching the port, call 'Marstrand Pilot' on VHF Channel 11. The pilot usually boards between Hatteberget Light Tower and Astol Island to the N.W., from a fast launch painted orange. The water in the approaches is deep. The Racon on Hatteberget Light is usually visible when passing the Skaw. It takes approximately 1.0 hours – 1.5 hours to reach the Statoil berths.

Anchorage: There are no safe anchorages outside the fjord. If vessel is awaiting a berth it is usual to anchor to the West of the berths. An alternative anchorage is in the area 6 miles North of Algon Island, which is within the pilotage waters.

Max. Size: Power Board Terminal: On the North side of the jetty the maximum draft is 12.6 m. and on the South side 10.6 m.

Statoil Terminal: This berth is to be dredged to 14.0 m.

Tugs: There are no tugs stationed at Stenungsund. If tugs are required they have to be ordered from Gothenburg, which is 2.5 hours away by sea. 5 hours notice is required. Tugs normally join vessel at the 'S' bend at Tjornbron Bridge. Vessels of 32,000 cu.m. capacity require 2 tugs for berthing and one for unberthing.

Berths: Power Board Terminal: Lat. 58° 05.3′ N., Long. 11° 49.2′ E.

The finger pier is located on the East side of Askero Fjord and is aligned in an East/West direction. The pier is 1 mile North of Stenungsund.

The jetty is used for the import of oil for the power station and for import of LPG and ethylene for oil companies.

Approach to the berth is difficult in strong S./S.W. winds.

Vessels berth head-in, starboard side alongside, on the North side of the jetty and port side alongside on the South side. The offshore anchor is often used when berthing.

On the North Berth, vessels should be well secured at the stern when S./S.W. winds are blowing and well secured at the South Berth when N.W./N. winds are blowing.

Statoil Terminal: The berth is located on the North side of Havden Peninsula, to the West of Stenungsund. Vessels are swung to starboard and then pushed slowly into the berth. The stern overhangs when alongside, so good moorings are required aft when S./S.W. winds are blowing. The leads for the after moorings are poor and the leads for the headlines are long.

Cargo: Power Board Terminal: Ethylene is handled on both sides of the jetty, dependent on the receiver. Neste use the North side and Statoil use the South side. The North side berth is equipped with an 8 in. hydraulic arm (150 ASA) with clamps and automatic disconnect mechanism. The South side berth is also equipped with an 8 in. (150 ASA) hydraulic arm, but without clamps. Shore supply the necessary reducers. No VRL connected.

Initially small amounts of cargo are pumped ashore from each tank in turn, so that samples can be taken on the jetty. Analysis takes about 2 hours. The cargo temperature is to be at least −100°C. and usually colder temperatures required. If the temperatures are correct, the shore facility can usually handle rates up to 500 cu.m.p.h. on the North side and 200 cu.m.p.h. on the South side. Hot gas required on completion. It usually takes about 20 minutes to clear line, so about 40 mb. is required in the tanks. The jetty has a steam/hot water line for de-icing. Local surveyor used.

Statoil Terminal: LPG handled at this berth. Discharge is by 10 in. (150 ASA) non-hydraulic arm. Shore supply the necessary reducer, no VRL. Samples are taken prior to arm being connected. Analysis takes 3 hours. Once lines are cool, the rate can be increased to maximum. Cargo goes into cavern storage so any rate can be accepted without difficulty. There was very little contact with the shore once discharge had commenced.

A surveyor from the terminal and SGS are available for figures. Terminal surveyor will use density from sample for calculations.

General: Power Board Terminal: There is an electric crane with 4 ton SWL on the North side. No trucks allowed on jetty. Trolleys available for the 300 m. haul from the roadway.

Statoil Terminal: Stores can be manhandled from the barrier which is approximately 300 m. from the ship. A hand driven shore crane can be used for loading stores. There is a telephone in the cabin on the jetty. Fresh water is available. All medical facilities are available locally. Stores are expensive.

AUTHORITY: Vattenfall, S-44487 Stenungsund, Sweden. *Tel:* 46-303-66141. *FAX:* 46-303-66161. *Cables:* Kraftverket. *Contact:* Ove Kristoffersson, Harbour Master.

Statoil Petrokemi AB, S-44481 Stenungsund. *Tel:* 0303-87000. *FAX:* 0303-87444. *Contact:* Morgan Hermansson or Anders Ranswall, General Managers.

Norsk Hydroplast AB, S-44483 Stenungsund. *Tel:* 0303-71560. *Telex:* 21206. *FAX:* 0303-84756. *Contact:* Stig Grunden, General Manager.

STOCKHOLM: 59.19 N. 18.03 E. **(See Plan)**

DOCUMENTS:

(a) Crew List: Normally 2 copies; for oil harbour at Loudden and Free Port, 3 copies.

(b) Passenger List: Regular passenger services 2 copies; cruise ships (lists for cruise ships must be sent in advance to Agent for forwarding to Immigration Authorities), 2 copies.

(c) Customs Documents: Arrival report (form can be obtained on arrival), 4 copies. Crew Effects Declaration, 2 copies. Ship's Stores Declaration, 2 copies.

(d) Quarantine Certificate or Bill of Health: Derat Certificate not more than 6 months old to be shown. *Note:* Additional quarantine regulations may be imposed in special circumstances.

(e) Manifest: 3 copies.

(f) Bills of Lading: 1 copy of each. Liners may be subject to other regulations with regard to *(e)* and *(f)* above.

(g) Ship's Documents: Tonnage Certificate. Certificate of Nationality.

PILOTAGE: *(Sweden General).* Applications for licensed Pilots should be made at least 5 hours before pilotage is due to commence. When making application specify name of vessel, tonnage, draft and destination. Also give estimated time for taking Pilot on board and route. If this procedure not followed, the Maritime Service cannot guarantee to supply a Pilot without considerable delay to vessel.

Preferable make application by telephone, or by radio via a coastal station or by some other method direct to pilot station nearest point where pilotage is to begin. Also possible request Pilot by VHF telephone to any Maritime Service Pilot Station, Pilot waiting point or lighthouse which is equipped with VHF.

The Maritime Service's network of permanent VHF telephone stations has been extended to give almost complete coverage of all pilot stations and waiting points and is also operative for a number of lighthouses. The radio stations can operate on different Channels and are equipped for frequency modulation. During hours when pilot stations are open, a constant watch is kept on frequency 156.80 MHz (Channel 16). This frequency should be used for all signals and replies – and for distress traffic. Outside these hours, normal traffic transmissions, i.e. applications for Pilots, etc. should be made on frequency of 156.65 MHz (Channel 13) or on reserve operating frequency of 156.60 MHz (Channel 12).

When making VHF telephone call, the type of call signal that should be sent is "Lotsarna (or pilot station) plus the name of the pilot station or the pilotage attendance".

	Arholma	*Sandhamn*	*Landsort*
Cable address	Furusund Pilot Station	Stockholm Pilot Station	Nynashamn Pilot Station

(c) Depth	33 – 38 fathoms	11 – 22 fathoms	11 – 16 fathoms

RESTRICTIONS: Very large passenger vessels and fully-loaded tankers of approx. 15,000 d.w.t. or over not allowed pass through Skerries during darkness.

Ships with gross tonnage exceeding 400 tons must proceed only on an Easterly course in Lindalssundet. Ships with gross tonnage exceeding 400 tons must not proceed through Kodjupet and Sandhamnssundet (between Sandon and Korso).

Tankers with gross tonnage exceeding 22,000 tons must be accompanied by a tug through the Archipelago to Stockholm and nearby ports.

Ships with a gross tonnage exceeding 400 tons, not using a Pilot, must be equipped with VHF telephone which must be continuously watched on Channel 16 and 9.

A vessel reporting system has been established covering the entrances to the Port of Stockholm. Vessels over 300 g.r.t. report to Stockholm Pilot Station ("Lotsarna Stockholm") when passing wa points. Reports to be given by VHF Channel 9.

Tankships with gross tonnage exceeding 800 tons carrying crude products, mineral oil and certain chemicals must have licensed Pilot the passages Arholma-Stockholm; Soderarm-Stockholm; Sandham Stockholm; Landsort-Stockholm; Landsort-Nynashamn; Landso Sodertalje and in the Lake of Malaren.

MAX. SIZE:

Max. Dimensions Passenger – or Dry Cargo Ships:

DAYLIGHT

	LOA (m.)	*Beam (m.)*	*g.r.t.*	*Draft (m.)*
Sandhamn	245.0	35.0	43,000	11.0
Dalaro/Langgarn	185.0	26.0	18,000	10.0
Furusund/Soderarm	185.0	26.0	18,000	7.0
Gustavsberg	60.0	9.5	—	4.2

Ships larger than 30,000 g.r.t. or longer than 215 m. to be assiste by 2 Pilots and to have assistance of tugs through the Archipelago.

DARKNESS

	LOA (m.)	*Beam (m.)*	*g.r.t.*	*Draft (m.)*

* Different heights of the water refer to the Swedish State Measure Datum.

** Besides the quay cranes there is a pontoon crane of 260 tons lifting capacity, with own propelling machinery.

CERTIFICATES:
Tonnage Certificate.
Certificate of Nationality.
Derat Certificate not more than 6 months old.
Ship's articles, Crew List or similar document listing all persons signed on aboard.

CARGO GEAR: Cargo vessels carrying goods which constitute a fire or explosion hazard or other flammable or otherwise dangerous goods must notify Port Authorities in advance the nature and quantity of goods concerned. In certain cases a red flag or red light must be carried at mast head.

REPATRIATION: Crewmen may be signed-on and paid-off. Whether paid-off crewmen will be allowed to remain in the country and seek new employment, depends on existing bi-lateral agreements between countries. Generally, only a citizen of a Scandinavian country may seek work in Sweden without a special labour permit.

FRESH WATER: Fresh water may be obtained from quayside. 1,000 cu.ft./hr. can be delivered from quayside. At Loudden max. 3,500 cu.ft./hr. can be delivered.

FUEL: All grades bunker oil, lubricating oil, etc. can be supplied.

REPAIRS: All types of deck and machinery repairs can be carried out.

DRY DOCKS: None.

AIRPORT: Arlanda, approx. 22 miles from central Stockholm. Served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day (January 1st); Epiphany (January 6th); Good Friday (variable Friday in March/April); Easter Monday (variable Monday in March/April); May 1st; Ascension Day (variable Thursday in May/June); Whit Monday (variable Monday in May/June); Midsummer Day (variable Saturday in June); All Saints' Day (first Saturday in November); Christmas Day (December 25th); Boxing Day (December 26th). No work is normally done on these days.
POLICE/AMBULANCE/FIRE: Tel: 90 000.
TELEPHONES: Ship-to-shore telephone connections can be provided at most quays.
SERVICES: Electric current can be laid on at some quays. Port is responsible for collection of oil residues. Licensed compass adjusters available.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Passport or Seaman's Discharge Book with photograph.
GARBAGE DISPOSAL: A collection service is available. Containers are provided alongside. Charges are included in the port dues. For service call 08-6702600, and ask for Traffic Central.
WASTE OIL DISPOSAL: Collection service available by tanker trucks at any berth. Charges are included in port dues. Call Traffic Central (see above) for service.
SEAMAN'S CLUBS: Available.
DELAYS: Occasionally shortage of stevedores. Some delay may be caused by ice, but port kept permanently open by ice-breakers.
AUTHORITY: Port of Stockholm, P.O.Box 27314, S-10254 Stockholm. *Tel:* 08-6702600. *Telex:* 10612. *FAX:* 08-6702601. *Cables:* Capitalport. *Contact:* Thomas Krokstedt, Harbour Master.

STORUGNS, Gotland Is.: 57.50 N. 18.48 E. (See Plan)

Situated on Eastside of Bay of Kappelshamn on the North coast of Gotland.
DOCUMENTS: Vessels arriving from foreign ports shall have the following documents:

1 Crew Manifest.
1 Stores List.
3 Crew Lists.
Tonnage Certificate.
Certificate of Nationality.
Declaration of Health (Derat Certificate), not older than 6 months. Not applicable to vessels from Scandinavian ports.

NOTICE OF ARRIVAL: On which the loading turn number is based, should be given when the vessel has passed Lat. 57° 52′ N. The notice can be given by VHF (Storugns Harbour Radio).

Vessels may not berth without permission of the Company.
PILOTAGE: Pilot boards in the outer approaches and should be ordered at least 5 hours in advance by Tel: 0498/227010 (Storugns) or 210138 (Visby). Pilots keep watch on VHF Channel 16.
ANCHORAGES: With good holding ground. Vessels waiting in the roads should keep watch on VHF Channel 16 during ordinary harbour working hours.

Ships lying in the roads shall anchor so that in-going and out-going vessels can pass without hindrance or risk. Anchoring in Kappelshamnsviken in the area between Lat. 57° 51′ N. and an E.W. line 200 m. South of the quay's Southernmost point is prohibited unless permission is obtained from the Company.
Prohibited Anchorage: See "Plan".
RESTRICTIONS: The harbour can be entered at all times regardless of wind direction except during strong Northerly winds.

The bay is normally ice-free. During exceptionally cold spells with Northerly winds traffic may be temporarily stopped or hindered by ice-floes.
MAX. SIZE: Depth at entrance and at quay 10 m. Vessels up to 20,000 tons have loaded to full draft. Max. draft 9.2 m.
HEALTH: No restrictions provided no disease or fever on board and vessel not arriving from port where disease or fever in existence.
RADIO: 96 and 24 hours before vessel's ETA preliminary notice must be given to the Company. Changes of ETA exceeding 10% of the remaining time must be reported. It is, however, not necessary to report changes of less than 1 hour. The Company may under special circumstances waive the obligation to give 96 hour notice.

On the arrival of a vessel in the harbour area notice of arrival must be given either in writing, or by telephone 0498/227100 or by VHF radio. In respect of notice of arrival the harbour area is Kappelshamnsviken South of Lat. 57° 52′ N. If a vessel, owing to bad weather or for any other reason cannot safely lie within the harbour area, the Compan may accept notice of arrival from vessel North of above mentione latitude.

Between 0500 hrs. and 2230 hrs. vessels waiting in the roads sh keep watch on VHF radio or, if the vessel is not equipped with such, o the ordinary radio.
Coastal Radio Stations: Stockholm Radio and Tingstade Radi (Tingstade Radio, radio telegrams only).
VHF: Storugns Harbour Radio VHF Channel 16.
TUGS: Rederi AB Gute. Tel: 0498-223000. On the island of Gotland
BERTHING: The harbour which is situated on the Eastern side o Kappelhamsviken is intended solely for the loading of limestone whic is obtained from the nearby quarry. The Gotland limestone, which is o high purity and has a very low percentage of impurities, is used i cellulose, sugar, metallurgic and chemical industries, and in iro production.

The limestone is delivered in 11 different grades. The density i 2.5/2.6 tons/cu.m.

The stowage factor varies between 17 and 26 (17 – 18 for grade 0 – 3 mm., 23 – 26 for grades between 3 and 120 mm., and 20 – 2 for grades above 120 mm.).

Quay	*Length*		*Depth*	
Quay 1 outside	140 m.		outside	9.5 m.
inside	120 m.		inside	7.0 m.
Quay 2	48 m.	(no loading)		5.0 m.
Quay 3	110 m.		outer	7.0 m.
			inner	6.0 m.

Boatmen: Vessels with Pilots on board need not order boatmen. Othe vessels can obtain boatmen service through their Agents or by callin the boatmen service firm "Trossvakt" on Tel: 0498/225433. Bookin should be done at least 2 hours before ETA. Shipper/NordKalk A cannot offer boatmen service.
BULK HANDLING FACILITIES: The loading elevators are movabl along their respective quays. The capacity on Quay 1 (loading o limestone only) is about 500 – 1,000 t.p.h and on Quay 3 (loading o quick lime only) about 300 – 600 t.p.h.
Shipmaster's Report: 1979. Loading rate 967.5 t.p.h.

Cleaning of holds, discharging of ballast and opening of hatches sha be carried out in sufficient time to avoid delays in loading. The loadin should be so planned that shifting of the vessel and loading elevator can be avoided as far as possible.
STEVEDORES: Normal working hours are Monday – Thursda 0530 hrs. – 2230 hrs. and Friday – Sunday 0600 hrs. – 1900 hr Overtime working to complete loading is available to a limited degree.

During ordinary working hours vessels are loaded by turn. The tur is based upon the time of notice of arrival.
MEDICAL: Central hospital at Visby.
FRESH WATER: Not available.
FUEL: Most grades available from Visby subject prior notice.
CONSULS: Nearest consuls at Visby for Denmark, Finland, Norway an Germany.
REPAIRS: Only minor repairs possible.
DRY DOCKS: None.
GANGWAY/DECK WATCHMEN: Not compulsory but available.
OPENING/CLOSING HATCHES: Ship's crew open and close.
CUSTOMS ALLOWANCES: Presently 200 cigarettes per head/wee Practically no spirits allowed out of bond.
REPATRIATION: Good possibilities for changing crew.
AIRPORT: Visby.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Tel: 90 000.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Seaman's Book or Passport if travellin outside port area.
AUTHORITY: NordKalk Storugns AB, Storugns, S-62034 Laerbr Sweden. *Tel:* 0498-227100. *Telex:* 4150 Nkalk S. *FAX:* 0498-22722 *Contact:* Bjoern Mathiasson, Harbour Master.

STROMSTAD: 58.56 N. 11.10 E.

DOCUMENTS/PILOTAGE: See "Stockholm".
ANCHORAGES: Available within port for vessels up to and includin 3,000 d.w.t.
MAX. SIZE: Cargo ships (not tankers), max. 3,000 d.w.t.
BERTHING: No particular restrictions for berthing within the port.
FRESH WATER: Available.
FUEL: Not available.
REPAIRS: Repairs possible.
GANGWAY/DECK WATCHMEN: Necessary.
OPENING/CLOSING HATCHES: Carried out by crew.
REPATRIATION: Facilities exist for effecting crew changes.
AIRPORT: Landvetter (Gothenburg). Distance: 200 km. There is also a local taxiplane.
HOLIDAYS: Cargo work cannot be arranged on holidays.

BERTHING: Around the clock berthing. No restrictions except draft. Following drafts (fresh water) accepted in Sundsvall and adjacent ports.

Kubikenborg: Lat. 62° 22.7′ N., Long. 17° 22′ E.

Length of quay 150 m. Max. length 192 m. Max. draft 10.5 m. 1 shore crane, capacity 5 tons. 1 suction-installation, capacity 150 t.p.h. Pilot distance 12 nautical miles. Distance from Sundsvall Town 4 km.

Ortviken: Lat. 62° 23.8′ N., Long. 17° 21.8′ E.

Oil Berth: Quay length 140 m. Max. draft at max. 200 m. length is 10.8 m. Pilot distance 12 nautical miles. Distance from Sundsvall Town 4 km.

Ostrand: Lat. 62° 29′ N., Long. 17° 21′ E.

Oil Berth: Tankers berthed outside a steel barge, max. LOA 200 m., max. draft 7 m. Pilot distance 17 nautical miles. Distance from Sundsvall Town 15 km.

Soraker: Lat. 62° 30.5′ N., Long. 17° 30′ E.

Length of quay 150 m. Max. LOA 90 m. Max. draft 5.8 m. 1 shore crane, capacity 10 tons. Pilot distance 11 nautical miles (East of the Alno Island). Pilot distance 20 nautical miles (West of the Alno Island). Distance from Sundsvall Town 34 km.

Stockvik: Lat. 62° 20′ N., Long. 17° 22′ E.

Length of quay 190 m. Max. draft 7 m. 3 shore cranes, capacity 6 tons each. Pilot distance 10 nautical miles. Distance from Sundsvall Town 9 km.

Sundsvall Town Quay:* Lat. 62° 23.5′ N., Long. 17° 19.5′ E.

1 Berth:	Length 90 m. Max. draft 7.8 m.
1 Berth:	Length 175 m. Max. draft 5 m. – 7 m.
1 Ferry/Ro-Ro Berth:	Max. beam 15 m. Max. draft 7.5 m.

No cargo is handled on Sundsvall Town Quay. Pilot distance 12 nautical miles.

Sundsvall Oil Berth:* (Vindskarsudde) Lat. 62° 23.2′ N., Long. 17° 21.8′ E.

Length of quay 100 m. Depth 12.0 m. Max. LOA 250 m. Max. draft 11.3 m. Max. d.w.t. 70,000. 3 swinging arms, each of 10 in. dimension. Pilot distance 12 nautical miles. Distance from Sundsvall Town 3 km. Vessels berth port side to.

Svartvik:* Lat. 62° 19′ N., Long. 17° 22′ E.

Length of quay 140 m. Max. draft at 100 m. length is 4.5 m.

Distance from Sundsvall Town 11 km.

Port of Sundsvall* (Tunadalshamnen): Lat. 62° 25′ N., Long. 17° 23′ E.

Length of quay 450 m. Max. draft 9.1 m. 3 shore cranes, capacity 10 tons – 20 tons. Additional berth: Length of quay 200 m. Max. draft 12.5 m. Pilot distance 13 nautical miles. Distance from Sundsvall Town 7 km.

Ro/Ro Berth: Depth 9.4 m. Max. beam 30 m. Max. draft 9.2 m.

LPG Berth: Quay for discharge of LPG. Storage capacity 8,000 tons. Depth alongside 11.0 m. Max. draft 10.5 m.

Tunadal Sawmill: Lat. 62° 25′ N., Long. 17° 23′ E.

Length of quay 195 m. Max. draft at 80 m. length is 7 m. Pilot distance 13 nautical miles. Distance from Sundsvall Town 7 km.

Vivstavarv: Lat. 62° 29′ N., Long. 17° 28′ E.

Length of quay 160 m. Max. draft 7.3 m. Pilot distance 17 nautical miles. Distance from Sundsvall Town 18 km.

*These ports are administered by Sundsvall Port Authority.

CRANES: 3 cranes available 10 – 20 ton. At Tunadalshamnen cargo is also handled by mobile cranes. Also see "Berthing".

STEVEDORES:

Ordinary working hours Monday – Friday 0700 – 1600 hrs.

Overtime on Saturdays 0700 – 1330 hrs. at 100% additional cost.

MEDICAL: First class medical attention and dental care available.

TANKERS: See "Berthing".

CUSTOMS ALLOWANCES: See "Stockholm".

DENSITY: Nearly fresh, 1002 – 1005.

FRESH WATER: Supplied at Sundsvall, Kubikenborg, Stockvik and Tunadal.

FUEL: All grades delivered. Notice must be given in good time, since these installations normally close down at weekends.

CONSULS: Finland, Germany, Iceland, Netherlands, Norway.

REPAIRS: Most repairs possible through local repair shops.

DRY DOCKS: Lunde Varv outside Kramfors.

SURVEYORS: Cargo inspectors available through Sundsvall Control Service or Lloyd's Agency for cargo or vessel.

Surveyors available from Stockholm in most cases. Call Agents for details at time.

AIRPORT: International airport 22 km. outside town. Good facilities to effect repatriation.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

HOLIDAYS: See "Stockholm".

POLICE/AMBULANCE/FIRE: Tel: 90 000.

EMERGENCY: CO-ORDINATION CENTRE: Tel: 90 000 giving full details of situation or call Harnosand Coast Radio Station VHF or MF.

SHIP WATCHMEN AND SHIP'S TELEPHONE: Available. Compulsory at oil terminals only.

STORING: Vessels stored by truck only, through assistance of stevedores and forklifts. Can be done close alongside ship.

GARBAGE DISPOSAL: Container available at no charge.

WASTE OIL DISPOSAL: Sludge is collected free of charge if ordered 24 hours in advance.

There are no facilities for dirty ballast.

SEAMAN'S CLUBS: None.

CURRENCY: Swedish Kroner (SEK).

GENERAL: *Dangerous Cargo:* Ships carrying dangerous cargo must notify Port Authorities in advance of nature, quantity and IMO code number of goods concerned.

Wintertime: Ice-breaker service available if needed (Wintertime December to April).

AUTHORITY: Port of Sundsvall, Box 805, S-85123 Sundsvall, Sweden. *Tel:* (060) 123180. *Telex:* 71011 SUSAB S. *FAX:* (060) 193507. *Contact:* Owe Linton, Managing Director. Tel: (060) 193525.

TRELLEBORG: 55.21 N. 13.09 E. (See Plan)

DOCUMENTS: See "Stockholm".

PILOTAGE: Available day and night. To obtain Harbour Pilot report 5 hours in advance. To obtain outward Pilot report 24 hours in advance of departure. Pilot meets inward-bound ships on Roads at Trelleborg Light Buoy (Lat. 55° 20′ N., Long. 13° 08.5′ E.). Outward-bound Pilot obtained from pilot station of Malmo. Tel: 040-115269, 040-978315. Pilot boats provided with short-wave radio telephone. Also see "Stockholm".

ANCHORAGES: Recommended West of entrance fairway between Fairway Buoy and No. 1 Light Buoy. Depth varies from 7 m. – 14 m. Anchor ground good – clay and sand.

RESTRICTIONS: Entrance a straight, perch-buoyed fairway of about 1,300 m. length, having measured depth of 8.5 m., and a bottom width of 100 m. Distance between moles (outer – 125 m.) and (inner – 96 m.)

HEALTH: See "Stockholm".

VHF: Port and pilot station on Channels 8 and 67.

TUGS: Tug-boats can be obtained promptly from Malmo.

BERTHING: New Harbour has depth of 8 m. with quay on Northern side of basin. It is 1,640 ft. long and served by 1 bridge crane (6.2 tons) and 1 mobile crane of 36 tons. Western Harbour Basin has depth of 8 m. Eastern Harbour Basin has depth of 8.0 m. Oil Quay 230 ft. long, depth at quay of 8 m. is situated on Southern side of New Harbour. Tankers of max. length 570 ft. can approach this quay. Five berths equipped for Ro/Ro traffic.

STEVEDORES: Available (Tel: 43135).

FRESH WATER: Available on all quays at request to Harbour Office.

FUEL: All grades bunker oils supplied at oil quay through direct pipeline from sea depot. Order on phone Trelleborg 107 76.

REPAIRS: Available through private firms. Tel: Trelleborg 150 60, 109 66 or 124 50.

CONSULS: Denmark, Norway and Germany.

TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.

TELEPHONES: Ship's telephone available at Oil Quay, Tel: 148 28, and at the Harbour Bridge, Tel: 147 67. Order is made through Harbour Office.

SERVICES: Divers available through the Harbour Office.

GARBAGE DISPOSAL: Drums or skips available alongside. Contact Port Office (Tel: 0410-53900) during daytime (0700 hrs. – 1600 hrs.). Normally there is no charge.

Oil Quay (North part of Lucernakajen): Depth 8.3 m., equipped wi 3×8 in. pipelines.
Ferry Harbour: Quay length 100 m., depth 6.3 m.
Inner Harbour: Quay length 900 m., depth alongside from 4 m. to 6 m
Oil berth: Length 15.0 m., depth alongside 6 m.
FRESH WATER: Can be obtained from all quays.
AUTHORITY: Vasterviks Hamn, Box 3093, 593 03 Vastervik, Swede *Tel:* 0490-88860. *Contact:* Olof Lindroos, Harbour Master.

VISBY: 57.38 N. 18.17 E. (See Pla

DOCUMENTS: See "Stockholm".
PILOTAGE: Pilot stationed at Visby Pilot Station. Pilot boards in Visb Roads and is available between 0600 hrs. and 2200 hrs. 12 hours' notic of ETA is required. Pilot listens out on VHF between 0600 hrs. an 2200 hrs. Tel: (0498) 10138.
ANCHORAGES: Outside harbour, water depth 30 m. to 50 m. Cla bottom. No mooring buoys.
Restrictions: It is forbidden to anchor within the marked area outsid Visby port entrance (for limits see chart).

At Hogklint, which is approximately 4 miles South of Visby, there a several sea cables, amongst which is the "Gotland Cable" whic supplies Gotland with electricity. Anchoring is not permitted within 300 m either side of the "Gotland Cable".
RESTRICTIONS: No tide in harbour. Currents outside harbour up t 4 knots running along coast. Prevailing winds, Summer time mostl S.W., Winter between N.W. and N.E. Harbour open to winds betwee S.W. – W., which when strong produces swell along the piers.
Fairway: This passes from the sea between the breakwaters to the o harbour and is dredged to approximately 9.0 m., permitting vessels wi drafts of 7.2 m. to enter.

There are leading lights (4 lights) for entrance into Visby Harbou also red day markers.

Water Levels: High water level +0.8 m.
Normal high water level +0.5 m.
Normal low water level −0.4 m.
Low water level −0.7 m.

MAX. SIZE: Maximum draft permitted for vessel proceeding to the o harbour is 7.2 m., to the outer harbour 6.3 m. and to the inner harbou 5.6 m.
TUGS: None available.

BERTHING:

Harbour	*Length* (m.)	*Depth* (m.)	*Remarks*
Outer Harbour			
Ferry Berth No. 6	160	7.0	Ferry berth with fixed 32 m. width ramp. Terminal Building serves both Berths No. 5 and 6.
Ferry Berth No. 5	200	7.0	Same as Berth No. 6.
Outer Oil Quay	60	8.0	3 ton crane for hose lifting. 8 in. hose connections. Capacity 250-300 cu.m.p.h.
Southern Small Boat Harbour	300	2.0	Small boat harbour with 2 bridges. Entry to the West of Fish Harbour.
Inner Harbour			
Outer Part			
North Breakwater	350	6.0	Ferry Berth No. 3 at quay's inner part (quay length 130 m.) Ro/Ro berth with fixed 20 m. width ramp. Remaining quay length used mainly for timber and pulp loading.
Holmen			
West Quay	220	6.0	Ferry Berth No. 4 with fixed 18 m. ramp. 1×5 ton rail mounted gantry crane, movable along 125 m. of quay length.
Eastern Quay	120	6.0	Fixed electric crane (max. 15 ton). Sawdust loading via nozzle (capacity 120 t.p.h.)
G:a Oil Quay	42	6.0	Quay with support dolphin.
Fishing Harbour	390	3.0	
Inner Part			
Ferry Berth No. 1	110	6.0	Fixed 16 m. wide Ro/Ro ramp.
Ferry Berth No. 2	115	6.0	Fixed 30 m. wide Ro/Ro ramp.
Fish and Small Boat Harbour	240	4.0-3.0	Visitors' Harbour 3 m. deep (approx.)

BRIDGES: No bridges or overhead cables.
STEVEDORES: Working hours, Monday – Friday 0700 – 1600. Overtime possible.
TANKERS: See "Berthing".
FRESH WATER: Available.
FUEL: Oil available.
REPAIRS: Only small repairs are possible.
AUTHORITY: Visby Harbour Office, Skeppsbron 18, S-62157 Visby, Sweden. *Tel:* 0498-69475. *Contact:* Bengt Widegren, Harbour Master.

WALLHAMN: 58.01 N. 11.42 E. (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
2 Tobacco and/or Stores List.
2 Crew Effects Declaration.
PILOTAGE: Pilot boards at Hatteberget. Telegraphic Address: "Pilotstation Marstrand", Tel: 0303–60004. VHF Channel 16.
5 hours' notice to be given through Agent.
2 hours' notice to be given by vessel.
ANCHORAGE: As advised by Pilot Station.
MAX. SIZE: Max. draft 10.0 m. Max. length – no restriction. Berth No. 6: Max. draft 5.5 m., max. length 110.0 m.
HEALTH: No special action except for suspected disease, in which case Agent should be contacted for further information.
RADIO: Gothenburg Radio.
VHF: Wallhamn Harbour Radio – Channel 16.
TUGS: Tugs from Gothenburg will join at entrance.
BERTHING: Four berths for Roll-on/Roll-off: (1) 180 m. × 10.8 m. depth. (2) 130 m. × 10.8 m. depth. (3) 160 m. × 8.5 m. depth (4) 240 m. × 8.5 m. depth.
One berth for loading stone products. Length 110 m. Depth 6.0 m.
CRANES: 2 container gantry cranes.
STEVEDORES: ETA given to Agents is sufficient.
MEDICAL: Doctors and dentists available at short notice. Nearest hospital in Kungaelv, 35 km.
FUEL: Most grades of bunker oil available with short notice.
CONSULS: In Gothenburg, 60 km. away.
REPAIRS: Can be arranged.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: By crew or by stevedores.
REPATRIATION: All facilities available.
AIRPORT: Landvetter International Airport, Gothenburg, 85 km. away.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Stevedoring and clearance of vessels can be performed every day of the year, 24 hours' service.
POLICE/AMBULANCE/FIRE: Tel. 90 000.
SHORE LEAVE: Permitted within limits laid down by police.
IDENTIFICATION CARDS: Not necessary. Seamen's Book or Passport should be carried.
GARBAGE DISPOSAL: Service available. Dustbins provided on quay, free of charge when quantities are reasonable.
WASTE OIL DISPOSAL: Service available and provided through port authorities. Free of charge if certain conditions are fullfilled. Contact Port Authority for details.
SEAMAN'S CLUBS: None.
CURRENCY: Swedish Kronor (SEK).
AUTHORITY: Wallhamn Terminal AB, S-440 60 Skarhamn, Sweden. *Tel:* 46-304-679900. *Cables:* Wallhamn. *FAX:* 46-304-660977. *Contact:* U. Andersson, Agency Manager. C. Frisk, Port Director.
Agency: Tel: 46-304-679967. Fax: 46-304-660473.

YSTAD: 55.26 N. 13.50 E. (See Plan)

DOCUMENTS:
Crew List.
Passenger List.
Custom Documents.
Manifests.
Bills of Lading.
Ship's Papers, etc.
TRAFFIC WARNING SYSTEM: Vessels approaching Ystad, listen on Channel 10 and 16 for broadcast announcing ferry departures. All inward bound and outbound vessels have to announce their intention, and when manoeuvring within the port area, Channel 10 has to be used.
PILOTAGE: Vessels approaching Ystad's Harbour must apply for Pilot at Malmo at least 5 hours before pilotage due to commence. Tel: 040-115269 or 040-978315 or VHF (Channels 16 or 20), stating tonnage, draft and destination. VHF call sign "Lotsarna" plus name of pilot's station. (Also see "Stockholm".) Pilot boards at Ystad Roads Lightbuoy (Lat. 55° 23.5′ N., Long. 13° 47.5′ E.).
ANCHORAGES: Road: 1.0 nautical mile S.W. harbour entrance, 9 m. – 10 m. depth; sand and clay, good anchorage ground. The road is open to winds from S.S.W.
MAX. SIZE: Largest fully loaded vessel that can enter harbour about 5,500 d.w.t. Depth 7.2 m., max. draft 6.7 m. (22 ft.)
RADIO: Goteborg and Stockholm.
VHF: 24 hour watch at Malmo pilot station on VHF Channel 16 and "Ystad Port Radio" on Channel 16 during office hours (0700 – 2400 hrs.).
TUGS: Tug usually meets vessel at entrance buoy. Ship's lines used. Tugs not compulsory.
BERTHING: Vessels of 150 m. length and 20 m. breadth can enter harbour. Max. draft 22 ft. at MWL.
Ro/Ro Berth: Three movable ramps for lorries/goods. Breadth 8 m., 10 m. and 12 m. One railway ferry ramp with a fixed car ramp to upper deck.
CRANES: 2×6 tons (9 ton with double gear), 1×5 ton, 1×3 ton. All cranes are rail-mounted and electric. 1×36 ton mobile crane.
STEVEDORES: Stevedores must be ordered from Ystads Stuveri AB, Tel: 0411-18080. Working hours Monday – Friday 0700 – 1630 hrs. Meal intervals 0900 – 0930 hrs. and 1200 – 1230 hrs.
MEDICAL: Agents to be notified in advance if medical attention wanted.
TANKERS: Load/discharge lines 8 in. diameter, but reducing pieces for 6 in. and 10 in. diameter. (Tankfarm of 40,000 cu.m.)
DENSITY: Density in harbour is 1006-1010.
FRESH WATER: Available from quays. About 10 t.p.h.
FUEL: Coal and oil can be obtained by lorries.
CONSULS: Danish Consul, Tel: 72840. Finnish Consul, Tel: 18400. Norwegian Consul, Tel: 11635.
REPAIRS: Mechanical workshop.
SURVEYORS: Surveyor appointed by the Swedish National Administration of Shipping and Navigation at the Port Office.
GANGWAY/DECK WATCHMEN: Can be arranged.
OPENING/CLOSING HATCHES: Crew or stevedores.
CERTIFICATES: See "Stockholm".
CUSTOMS ALLOWANCES: Tobacco, about 200 cigarettes or 200 gram of tobacco for each member of crew. Spirits, 1 bottle for each member of crew.
CARGO GEAR: Loading/discharging with shore cranes and Roll-on/Roll-off ramps.
AIRPORT: 30 km. distant and served by regular airlines.
TIME: GMT plus 1 hour in Winter. GMT plus 2 hours in Summer.
HOLIDAYS: Christmas; New Year; Easter; Whitsun and Midsummer. No cargo work.
POLICE/AMBULANCE/FIRE: Police, Tel: 13620; Ambulance and Fire, Tel: 90000.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Not needed.
GARBAGE DISPOSAL: Containers about 7 cu.m. capacity for firm garbage can be placed alongside. The charge will be about SEK 600 (container delivery and emptying included). Call Port Office or agent, for further information.
WASTE OIL DISPOSAL: Sludge can be collected by tank lorry, free of charge. Other kinds of oil contaminated water can be delivered to a 500 cu.m. tank. Charge SEK 75/cu.m. Port Office can supply further information.
SEAMAN'S CLUBS: None.
CURRENCY: Swedish Kronor (SEK).
GENERAL: *Refuse Disposal:*
Contaminated Water: To the reception station at Revhuskajen (max. 500 cu.m.).
Waste Oil: Via a tank-truck (max. 10 cu.m.).
Solid Garbage: Via a motorised container to a refuse dump (max. 12 cu.m.).
AUTHORITY: Ystads Hamn, Hamnkontoret, Hamngatan 18, S-27100 Ystad, Sweden. *Tel:* 0411-77263, 77000. *FAX:* 0411-74950. *Cables:* Southport. *Contact:* Torsti Lehtinen, Harbour Master.

Switzerland

BASLE: 47.33 N. 7.34 E. (See Plan)

PORT LIMITS: A line drawn 50 m. off the shore.
DOCUMENTS:
1 Rhine-Manifest or "T"-Paper.
1 Provisions List.
The respective documents, mentioned in No. 1.10 of the Rhine Shipping Police Regulation have to be on board. Where possible, cargo manifests and stowage plans should be forwarded ahead of the vessel to the local Agent.
PILOTAGE: Holders of a High Rhine Shippers Licence have to Pilot the vessel between Basle and Birsfelden. Such licence-holders can be ordered at Signal-station (VHF Channel 18 or telephone 6314400 or Birsfelden Locks 3113855).
ANCHORAGES: Vessels moored at riverside quays have to use anchors.
RESTRICTIONS: Shipping is blocked from high water mark II (gauge Rheinfelden 430 cm. up– resp. 450 cm. downstream of the Middle Bridge at Basle). Other restrictions will be announced by the Port Authority.
MAX. SIZE: Water Depth: 3.50 m.
Air Draft: 5.70 m. to basin II, port of Kleinhuningen; 7.00 m. to all the other port areas of Basle Town; 4.80 m. to 7.00 m. to the ports of Basle Country.
Beam: 11.40 m. to basin II, port of Kleinhuningen and through the locks of Birsfelden.
Length: 110 m. for the section between the Middle Bridge at Basle and the locks of Birsfelden.
VHF: Port Authority on Channel 18 (call: Signalstation). Working hours: Monday to Friday 0500 – 2100 hrs., Saturday 0500 – 1300 hrs.
TUGS: Only one private tug/pushboat is available (call: BRAGTANK, Tel: 6314422 or from ship to ship on VHF Channel 10: Vogel Gryff). Tug assistance is necessary for the section between Basle and Birsfelden from High Water Mark I (gauge Rheinfelden 350 cm.) for single engine vessels.
BERTHING: Two artificial basins at Kleinhuningen, riverside quays at Kleinhuningen (Klybeckquai), St. John, Birsfelden and Au. Load/discharge of dry cargo is done by shore equipment.
Also see "Max. Size".
CRANES: 62 shore cranes with lifting capacities up to 2×300 tons.
SPECIALISED CARGO HANDLING FACILITIES: 2 container terminals. No LPG berth.
BRIDGES: Railway bridges across the channel to basin II, port of Kleinhuningen, permit a max. air draft of 5.70 m.
STEVEDORES: Working hours: Monday to Friday 0500 – 2100 hrs., Saturday 0500 – 1300 hrs.
MEDICAL: Hospital facilities available.
TANKERS: Tanker piers at Kleinhuningen (Klybeck Quay and Basin I; the last one for oil only), St. John (vegetable oil and stove oil), Birsfelden and Au.
Tankers with dangerous goods (K1 and K2 products) are not allowed to enter the basins. Load/discharge done by vessel's pumps.
FRESH WATER: Good quality potable water available.
FUEL: Diesel oil available.
CONSULS:
Austria
Belgium
Benin
Brazil
Cape Verde
Denmark
Ecuador
Finland
France
Germany
Hungary
Italy
Jamaica
Luxembourg
Mali
Mexico
Monaco
Netherlands
Norway
Peru
Sweden
Spain
Thailand
Togo
Uruguay
REPAIRS: Deck and engine repairs are possible as well as those to electric installations and electronic equipment.
DRY DOCKS: No dry dock, no slip.
SURVEYORS: Agents of Surveillance and Classification Societies are nearby.
GANGWAY/DECK WATCHMEN: At least one member of the crew has to stay aboard as watchman.
HATCHES: Opening/closing carried out by ship's crew.
CUSTOMS ALLOWANCES: Swiss Regulations apply.
REPATRIATION: Scheduled aircraft connect Basle-Mulhouse Airport daily with most important European airports. Also good railway connections.
AIRPORT: See "Repatriation".
HOLIDAYS: The ports are closed for work on New Year's Day, Carnival (two half days in February or March), Good Friday, Easter Monday, 1st May, Ascension Day, Whit Monday, 1st August (National Day), Christmas Day and Boxing Day.
POLICE/AMBULANCE/FIRE: Emergency services are available through the Port Authority (VHF Channel 18) or direct by telephone:

Ambulance:	144
Police:	117
Fire:	118

TELEPHONES: This service is available aboard ships at the berths for passenger boats by prior arrangement through the Agents.
SERVICES: Oily waste disposal boat available from Monday to Friday 0700 – 1700 hrs.
SHORE LEAVE: Permitted when Immigration and Customs requirements have been satisfied, as long as the crew rejoin the vessel before departure.
IDENTIFICATION CARDS: It is recommended to carry an identification card or a Passport. Shore passes are not issued.
GARBAGE DISPOSAL: Garbage drums and containers placed alongside.
WASTE OIL DISPOSAL: Call Bibo Regio, ship to ship VHF Channel 1
SEAMAN'S CLUBS: Seemannsclub der Schweiz, Westquaistrasse 3
Basel. Tel: 6315818.
CURRENCY: Swiss Franc (SFr.).
REGULATIONS: All the Rhine Shipping Regulations, recommended the Central Commission for the Navigation on the Rhine, are valid.
AUTHORITY: Rheinschiffahrtsdirektion Basel, P.O.Box, CH-401
Basel, Switzerland. *Tel:* 061-6314545. *FAX:* 061-631459
Telex: 997130 SBB CH. *Contact:* R. Hardmeier, Director.

Syrian Arab Republic

GENERAL

PORT REGULATIONS:

In corroboration of Articles 2 and 8 of the Decree Law No. 154/1961 which created the General Directorate of Ports and invited them to control the safety and security of ports and territorial waters and empower them to enact communiques and instructions for same and for public interest, the following provisory instructions will be in force for vessels lying in the Syrian ports and territorial waters until permanent regulations are issued for the safety of the harbours.

1. Any vessel calling at Syrian ports should contact the pilotage station or the signal towers upon entering Syrian territorial waters 12 miles (marine) giving her name, nationality and her cargo in case the whole or part is dangerous, also her ETA at the waiting zone of the port of destination.
2. The Masters of foreign vessels lying in Syrian ports should hoist the Syrian flag (size 63 cm.×126 cm.) in accordance with international maritime courtesy. The Agent should supply any vessel without same upon her arrival at Syrian ports.
3. The vessel should hoist international signals for a Pilot or for dangerous cargo, also the quarantine flag, etc., in accordance with her situation while approaching Syrian ports.
4. The vessels once in territorial waters are not authorised to receive any person on board before Free Pratique is granted by Harbour Authorities.
5. It is forbidden to receive any person after Free Pratique and during the stay of the vessel either in road or inner basin unless by written authorisation from the Harbour Authorities. Customs and Security are exempt when in service.
6. It is forbidden for a vessel to use her wireless when lying in Syrian ports or at anchorage unless with authorisation from the Harbour Authorities and in emergency cases.
7. It is forbidden for vessels lying in Syrian ports to use their own steam or electrical blowers, amplifiers or make any other signals not allowed by international rules to avoid sea collisions or the light signals authorised by the Harbour Authorities in accordance with Article 14 of the present communique.
8. Masters should keep at any time on board of their vessels while lying in the ports a continuous watch and enough seamen in order to secure the exploitation department necessities or during emergency cases, and in order to take the necessary steps to avoid fire and damages to others (Article 17 of D/Law 193).
9. If a Syrian watchman is appointed to watch the vessel, he must have an authorisation order from the Harbour Authorities. The shipping Agent is responsible for the execution.
10. It is forbidden to use the vessel's life-boats in the ports or in territorial waters unless by previous written authorisation from the Harbour Authorities on the basis of a written request stating the causes, the time of the dropping down of the life-boat from the vessel, and the time of its lifting provided the cause is necessary.
11. All vessels should keep their gangways up from sunset to 0700 hrs.
12. The hatches, stores, etc., should be covered and locked, if possible, during the night.
13. In case any objects from the vessel or their cargo drop into the sea, the Master should inform both the Port Co. and the Harbour Master immediately of same.
14. The following signals should be used for the above mentioned cases as follows:

	Signals	
Case	*Sound*	*Lights*
(a) Attack by thieves	Sequence of 6 short blasts.	Sequence of 6 light signals and flashes from the foremast.
(b) Case of fire onboard or alongside	Sequence of long blasts, each set 6 blasts.	Sequence of 6 long flashes.
(c) Case of serious injury	Sequence of 2 long blasts.	Sequence of 2 long flashes from the foremast.
(d) Case of stranding	Sequence of 4 long blasts.	Sequence of 4 long flashes.

N.B.

1. Distance time between each sequence is half a minute, but the length of the signals should be in accordance with international signals regulations.

2. The above signals should be accompanied by wireless call on Channel 16 to both Pilotage and Stations in Syrian ports.

3. The above instructions do not forbid the use of other sound and light signals stated in the international rules.

NOTICE: Vessels proceeding to Syrian ports are required to signal the following to the port radio station when 50 miles from the port of destination.

(a) ETA.
(b) Nationality.
(c) Name.

BANIAS: 35.14 N. 35.56 E. (See Plan)

DOCUMENTS:

5 copies Crew List.
1 copy Vaccination List.
1 copy Stores List.
1 copy Private Stores List.
1 copy Slop Chest.

In case of cargo to be discharged, Original and 2 copies Manifest and 3 copies Bill of Lading.

APPROACHES: Vessels bound for Banias should follow the following:

(a) Lat. 35° 13′ 00″ N., Long. 35° 42′ 00″ E.
(b) Lat. 35° 13′ 00″ N., Long. 35° 56′ 56″ E.
(c) Lat. 35° 16′ 00″ N., Long. 35° 55′ 25″ E.
(d) Lat. 35° 16′ 00″ N., Long. 35° 40′ 34″ E.

Otherwise vessels are subject to severe fines.

PILOTAGE: Compulsory. Pilots board all tankers approaching the Terminals. These Pilots act in the same capacity as Mooring Masters in the berthing of vessels, after which they supervise the raising of the flexible hoses and their connection to the ship's manifold. During loading operation they act as the Company's Representatives. The Company's Mooring Masters will meet tankers in the vicinity of Marqab Light Buoy.

It is requested that tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft., above the water. This can be adjusted to suit conditions. A pilot ladder should be rigged abaft the accommodation ladder, to within 3 ft. above the water. This will enable the Pilot to ascend the pilot ladder clear of the launch and then step on to the lower platform of the accommodation ladder. United Kingdom Merchant Shipping (Pilot Ladders) Rules is relevant.

ANCHORAGE: In the event of a berth not being available, or suspension of mooring operations on arrival, a good anchorage can be used South of the berths in the vicinity of the Marqab Light Buoy positioned at: Lat. 35° 12′ 27″ N., Long. 35° 54′ 46″ E. It is important to maintain a listening watch on VHF, Channel 16 or visual watch on the shore Signal Station positioned approximately at Lat. 35° 13′ 04″ N., Long. 35° 57′ 00″ E. and recognised at night by lozenge shaped lights, in order to avoid delays.

On being advised of expected time "Mooring Master will board", heave short your anchor before his arrival.

Vessel Berthing Confirmation: Vessels waiting at anchorage for confirmation or other reasons beyond the control of Banias Terminal, will be boarded by Mooring Master within 4 hours after such confirmation is received, providing free allocated berth and suitable weather.

RESTRICTIONS: Berthing operations for loading and unloading will take place only between 0700 hrs. and 1600 hrs. (local time) in Winter, and 0600 hrs. and 1800 hrs. (local time) in Summer, i.e. during daylight, SHINC and weather permitting. Summer starts 1st May and Winter starts 1st November.

MAX. SIZE: See "Berthing".

NOTICE OF READINESS: Time of Notice of Readiness tendered will be considered when vessel arrives in the very near vicinity of the Marqab Light Buoy (position Lat. 35° 12′ 27″ N., Long. 35° 54′ 46″ E.), where the Pilot/Mooring Master will board and receive ship and remain on board throughout the entire operation.

HEALTH: Masters of tankers due may obtain Free Pratique by addressing the usual quarantine message to their Agents through commercial radio channels.

RADIO/VHF: Banias Terminal Radio Station – Call sign: "YKM 5". Frequency: 500 kHz and 442 kHz and VHF Channel 16. Also see "Radio Procedure" below.

Tanker VHF Radio Communications: Vessels approaching Banias can communicate with the Terminal by FM, VHF, Channel 16. Range 30 to 40 miles. Frequency 156.8 MHz. Simplex Operation. Call sign: "Banias". On arrival, ship's radio installations will be sealed according to normal practice and the boarding Mooring Master will put his own portable equipment on board. Communications will then be as follows:

Banias – Equipment: Fixed station sited in the Terminal. Call sign: "Banias". Frequency: Transmitting 163.6 MHz. Receiving 159.1 MHz. Range: 8 miles. Watches: Continuous whilst vessels are in port or immediate vicinity.

Mobile Station – Equipment: Placed aboard vessel on arrival at Banias. Call sign: Ship's name. Frequency: Transmitting 159.1 MHz. Receiving 163.6 MHz. Range: 5 miles. Watches: Mutually agreed between ship and the Terminal on first establishing contact.

Note: The radio telephone circuit is connected with the main Company Communications network in Banias Terminal.

Radio Procedure:

Station	*Banias Syria* Private station for communication with tankers bound for Banias, Syria.

Call sign: YKM5
Address: S.C.O.T. Banias – Syria

MF Schedules (A1)

Banias Radio Station (YKM5) keeps a 24 hours continuous watch on 500 kHz and answers calls on 500 kHz. QSY 440 kHz for traffic. Broadcasts traffic list on 500 kHz at 0430, 0830, 1230, 1630 and 2030 (GMT). Receives on ship frequencies 425, 454, 468, 480 and 512 kHz – also broadcasts traffic lists, on 440 kHz at 0432, 0832, 1232, 1632 and 2032 (GMT).

HF Schedules (A1)

Time GMT	*Listens on*	*Answers on*	*Traffic list at (GMT)*
04 – 05	4 MHz Band	4351 kHz	0410
05 – 06	8 MHz Band	8667 kHz	0510
08 – 09	6 MHz Band	6493 kHz	0810
09 – 10	12 MHz Band	12987 kHz	0910
12 – 13	8 MHz Band	8667 kHz	1210
13 – 14	16 MHz Band	16967 kHz	1310
16 – 17	16 MHz Band	16967 kHz	1610
17 – 18	6 MHz Band	6493 kHz	1710

VHF Schedules (F.3)

Banias Terminal keeps watch on Channel 16. This has a range of approximately 40 miles and its call sign is "Banias Control".

For traffic, change to another channel as instructed by Banias Terminal.

Note: YKM5 deals only with traffic for SCOT Banias QSJ nil.
YKM5 uses only two frequencies out of HF schedule.
From 0500 to 0600 on 8667 kHz.
From 0800 to 0900 on 6493 kHz.
From 1700 to 1800 on 6493 kHz.

Confirmation of ETA's: To avoid delay on arrival, it is essential and in your interest to communicate with YKM5 at least 48 hours prior to arrival, and thereafter maintain contact, also stating cargo quantity and grade, max. rate (load/offload), SWL of derrick capacity, specific gravity and temperature, n.r.t. and arrival draft. Failure to give any notice at least 24 hours prior to arrival may delay the Notice of Readiness by an amount equal to the difference between 24 hours and the number of hours of notice prior to arrival, and this at the sole discretion of the Terminal.

In the event of a ship having arrived without having contacted Banias Control 4 hours before ETA, a 4 hour period shall accrue to Banias Terminal before a Mooring Master boards the ship.

TUGS: Available only on demand from General Directorate of Harbours at Lattakia.

MOORING REQUIREMENTS:

Forward:

Anchors to be fitted with marker buoys with 20 fathoms of line.
2×120 fathom mooring lines.
2 rope stoppers.
1 suitable wire stopper (preferably Carpenter Patent) for use with 4.75 in. mooring lines.

Aft:

4×120 fathom mooring lines.
4 rope stoppers.
2 suitable wire stoppers (preferably Carpenter Patent) for use with 4.75 in. to 5.5 in. mooring lines.

Boat Ropes

To be rigged on either side of ship, and of not less than 4.5 in. circumference.

Derricks and Cranes: Must be capable of plumbing overside abreast of discharging manifold.

Load/Offload Manifold:

2 × 0.25 in. spanners.
2 × 0.875 in. spanners.
2 × 7 lbs. hammers.
1 × 2 lbs. axe.

Hose hang-off bitts are required at about 10 ft. from the ship's rail at the loading manifold, to secure submarine hoses on the port side.

Safety of Mooring and Anchor Chains: Vessel must have not less than 11 shackles of anchor chain on each side.

On completion of mooring operation, vessel must have between 6.5 and 7.5 shackles of anchor chain tight in the water in conformity with vessel's LOA.

BERTHING: The open sea line berths (CBMS) are situated to the North of Marquab Light Buoy.

Each berth is equipped with flexible hoses connected by pipelines to shore installations.

At all berths vessels moor using both anchors forward, with wires to a buoy on the port bow, one buoy astern and one on each quarter. Hoses are lifted on the port side to be connected to the ship's manifold which must have pressure gauge fitted.

Berths No. 2 and 3:

	Loading	Unloading
Max. LOA	925 ft.	900 ft.
Min. LOA	600 ft.	600 ft.
Max. d.w.t.	130,000 tonnes	97,000 tonnes
Max. Draft:		
Berth No. 2	52 ft. (Summer)	50 ft. (Winter)
Berth No. 3	53 ft. (Summer)	51 ft. (Winter)
Min. SWL of Derrick	7.5 tons	

Vessel's pumps to maintain pressure of 7 kg./sq.cm. at ship's connecting manifold during the entire discharging operation.

Vessel should have the possibility of ballasting while discharging cargo at any time without contamination of cargo and delaying operations (Segregated ballast systems).

Max. loading rate per berth per hour: 5,500 tons when both berths are in use.

Berth No. 4:

Max. LOA	750 ft.
Min. LOA	560 ft.
Max. Draft	42 ft. (Summer and Winter).
Min. SWL of Derrick	7.30 tons.
Max. d.w.t.	66,000 tonnes.
Min. d.w.t.	30,000 tonnes.

Berth is equipped with 2×24 in. sea lines, and 2×16 in. hose strings ending with 2×12 in. hoses and valved displacement manifold.

A minimum distance of 3.0 m. between ship's manifold and ship's rail is required for safe connections.

One of the sea lines is for displacement purposes only.

Max. loading rate 2,000 tons per hour.

Berth No. 5:

	In Summer	In Winter
Max. LOA	840 ft.	815 ft.
Min. LOA	600 ft.	600 ft.
Max. d.w.t.	85,000 tonnes	66,000 tonnes
Min. d.w.t.	35,000 tonnes	35,000 tonnes
Max. Draft	43 ft.	41 ft.
Min. SWL of Derrick	7.5 tons	

Berth is equipped with PLEM mounted sub-sea valves remotely operated from shore.

Loading rate: 2,000 cu.m./hr. for heavy fuel and 1,900 cu.m./hr. for white products.

Discharging rate for gas oil: 3,000 cu.m./hr.

Note: Ship's hose connecting manifold to be equipped with pressure and temperature gauges.

Berth No. 6:

	In Summer	In Winter
Max. LOA	700 ft.	650 ft.
Min. LOA	500 ft.	500 ft.
Max. d.w.t.	50,000 tonnes	40,000 tonnes
Min. d.w.t.	20,000 tonnes	20,000 tonnes
Max. Draft	34 ft.	32 ft.
Min. SWL of Derrick	7.5 tons	

Berth is equipped with PLEM mounted sub-sea valves remotely operated from shore.

Max. loading rate: 1,500 cu.m./hr. for vacuum gas oil and 2,000 cu.m./hr. for premium gasoline.

Ship's hose connecting manifold to be equipped with pressure and temperature gauges.

Berth No. 7: (For LPG).

Max. LOA	700 ft.
Min. LOA	350 ft.
Max. d.w.t.	7,000 tonnes.
Min. d.w.t.	3,000 tonnes.
Max. Draft	24 ft. (Summer and Winter).
Note:	
Min. LOA	300 ft. can be accepted but only in fine weather, provided ship has sufficient ropes.
Min. SWL of Derrick	3 tons.
Single derrick or crane for lifting:	(a) One string of 8 in. cargo hose. (b) One string of 4 in. balance line hose.

Note: Both strings of hose (210 ft.) end with relevant class 300 ASA Camlock coupling and butterfly valve.

Minimum Cargo Temperature:
(a) Summer + 10°C.
(b) Winter + 10°C or ambient temperature.

Flow rate: 300 t.p.h.

Max. pressure at ship's manifold: 7.0 kg./sq.cm.

Ship's manifold to be equipped with clean filters, temperature and pressure gauges.

Ship's connecting flanges to be diameter 8 in. and 4 in. respectively, class 300 ASA.

Minimum time for opening and closing any line valve to be more than 30 seconds to avoid surges.

All tools to be of a non-spark generating metal, such as copper.

Berth No. 7: (For Jet Fuel).

Max. LOA	700 ft.
Min. LOA	350 ft.
Max. d.w.t.	20,000 tonnes.
Min. d.w.t.	8,000 tonnes.
Max. Draft	28 ft. in Summer. 26 ft. in Winter.
Min. SWL of Derrick	5 tons.

Loading rate: 1,500 cu.m./hr.

Discharge rate: 2,200 cu.m./hr.

Maximum pressure at ship's manifold during discharge: 7 kg./sq.cm.

Ship's manifold to be equipped with filters which are to be cleaned and ready for use at each call.

Ship's connecting manifold to be equipped with pressure gauge.

All connection tools (spanner, hammer, etc.) to be of copper.

HOSES: Berths are numbered from North to South:

No. 2: For Crude Oil: 2 strings of 10 in. hose ending with 12 in. reducers (160 ASA).

No. 3: For Crude Oil: 2 strings of 16 in. hose ending with 12 in. reducers (150 ASA).

No. 4: For Fuel Oil: 2 strings of 12 in. hose ending with 12 in. butterfly valves, and displacement manifold (150 ASA).

No. 5: For Fuel Oil and White Products: One string of 16 in. hose for each, ending with 12 in. butterfly valve (150 ASA).

No. 6: For Fuel Oil and White Products: One string of 16 in. hose for each, ending with 12 in. butterfly valve (150 ASA).

No. 7: For LPG and Jet Fuel:
LPG: One string of 8 in. hose ending with 8 in. butterfly valve (300 ASA). One string of 4 in. hose ending with 4 in. butterfly valve, and used as balance line (300 ASA).
Jet Fuel: One string of 12 in. hose ending with 12 in. butterfly valve (150 ASA).

LOADING/DISCHARGING:

1. Ship's hose connecting manifold to be equipped with pressure gauge.
2. When discharging, the pressure at the ship's manifold should not exceed 7 kg./sq.cm., and within this range of pressure the Terminal installations are capable of receiving at various rates, depending on berth and storage tanks allocated to the ship. The Terminal Administration would prefer the ship's pumps to be rated accordingly, and to be of the centrifugal type.
3. Loading-on-top slops (LOT) is not acceptable, and slops to be segregated from cargo, as Banias Terminal is not equipped with slop treatment facilities. Pressure gauge to be fitted on ship's port side connecting manifold.

BALLAST: The Port Authority is most strict and will impose heavy fines for any oil pollution of the sea. In addition, vessels may be ordered out of the berth and at risk of losing turn. Ensure ballast quantity onboard is kept to about one third of d.w.t. in Winter and one quarter of d.w.t. in Summer for safe manoeuvring in the prevailing weather conditions. Excess ballast causes delay.

Banias is an open roadstead and sudden changes in weather can be experienced especially during the Winter months. It is good practice to commence loading as soon as hoses are connected and whilst ballast discharge is still in progress, always providing this can be achieved safely and with no danger of contamination.

POLLUTION: The Port Authorities will, in cases where pollution is ascertained, collect a declaration from the Master of the offending ship, in which declaration he authorises his Agents to pay any fine to be levied by the Official Committee in the future.

In the light of the above and to avoid any delay to vessels, Owners are kindly requested to:

1. Supply vessels with necessary chemicals to destroy any quantity of oil overflowing into the sea.
2. Provide a bank guarantee of Stg. £5,000 to be deposited against eventual fines. Such a guarantee (or cash) must be given before offending vessel is released.

MEDICAL: Hospital facilities or other relevant medical information are available through Agent on and/or prior to arrival of vessel.

FRESH WATER: Available through Agents by means of barges, cost U.S.$10.00 per ton.

FUEL: Diesel oil available via Agent.

SURVEYORS: Through Agents – Shipco.

CUSTOMS ALLOWANCES: According to regulations or at Customs' own discretion.

REPATRIATION: Facilities exist through Agents.

TIME: Local time is GMT plus 2 hours.

SERVICES: In the event of tankers requiring assistance to lift loading hoses, recover lost anchors, and cables, etc., limited aid may be given during normal working hours. Current charges are available on application from Agent.

SHORE LEAVE: Permission may be obtained from Immigration Dept. ashore through Agents.

GARBAGE DISPOSAL: Available via Agent.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: Usual local facilities.

CURRENCY: Syrian Pound.

REGULATIONS: Terminal Requirements and Conditions of Use of Terminal Facilities will be handed over to Master of vessel at each time of call. The following are some of the regulations in the booklet.

Vessel in Berth: Ships are not allowed to remain in berth for any reason when loading operation stopped. Hoses should be disconnected and dropped to sea unless stay authorised by Terminal Superintendent.

Deck Watch: A continuous watch on deck must be maintained throughout the operations, especially towards the Shore Signal Station positioned as follows: Lat. 35° 13′ 04″ N., Long. 35° 57′ 00″ E, to ensure safe operations and to avoid delays, in addition to a continuous watch on Channel 16.

Lighting: During hours of darkness the manifold and poop mooring area of the sea in vicinity of ship should be adequately lit.

Main Engines: Must be kept on shore notice. Repairs which will immobilise must not be carried out in berth.

Deck Machinery: Must be ready for immediate use at all times.

Whistle or Siren: To be available at all times.

Signalling: An "Aldis" type lamp to be readily available.

Stores, Provisions, Etc.: It is strictly forbidden for provisions, stores or other items to be received or discharged whilst loading is in progress. Launches or other craft must not lie alongside during the same period.

Tanker Safety Regulations: Tanker Safety Requirements must be strictly adhered to at all times. The Mooring Master is authorised to stop all operations should he consider the safety regulations are not being complied with.

Please refer to Tanker Safety Guide (LPG and Others).

Boarding: The boarding of a vessel whilst in a mooring is restricted to persons holding valid passes which are issued by the Terminal Superintendent on application to ship's Agents and authorised chandlers. This restriction is applied in conjunction with the Syrian Harbour and Security Authorities. Ship's crew are not to be disembarked for any reason before official authorisation is granted.

Guests: Guests are not allowed unless visit is approved by Master and Shore Representative jointly.

Action in Case of Emergency: In the event of a fire, oil spillage, or other emergency on the vessel, the emergency signal is: *Three or more blasts of not less than ten seconds duration each, on whistle or siren supplemented by a continuous ringing of the general alarm bells.*

Dry Certificate: Master to provide 3 copies of Dry Tank Certificate to Shore Representative duly signed.

Leaving Berth due to Bad Weather: Ship must let go the mooring ropes in water and leave berth. The ropes can be collected when weather permits.

NOTICE TO MASTER: Please be advised that any complaint or dispute between ship's and SCOT's personnel which may arise during your stay in berth, must be brought to the attention of Banias Terminal Superintendent before leaving berth for necessary investigation.

Complaints reaching the Terminal after vessel's departure will be discarded.

DELAYS: Confirmation, restricted berthing hours, unsuitable weather and free berths.

WEATHER: The Director of Port Authorities has issued statistics of the weather conditions along the Syrian coast after an experience of 20 years.

State of winds and whirlwinds on the Syrian Coast

Winter	*Kind and direction of winds*
December	Regular winds blowing from N.E. to S.E., sometimes S. to S.W., the alteration of winds is accompanied with rains.
January	Excess of storms starting to blow from S.E. to N.E. The alteration of winds from the E. is occasionally accompanied with heavy rains with probability of hail.
February	Excess of storms and heavy rains blowing from S.W. to N.E. and E.
Spring	*Kind and direction of winds*
March	Variable winds from S.E. to S.W. and accompanied by heavy rains and altering to N.W. slight.
April	Variable winds from N.W. and S.W., and S. winds accompanied with light rains.
May	Regular winds blowing S.W. to N.W. and altering to S. sometimes accompanied by rain.
Summer	
June	Slight winds from S.W. and S.
July	Moderate winds from S. to S.W.
August	Slight N.W. winds.
Autumn	
September	Winds S.W. and N.W. accompanied by some rain from 15th September. Winds will lighten during the end of the day and will alter at night to slight E.
October	Variable winds from W. to S. and N.W. accompanied by rain will alter at night to E.
November	The winds are variable from N.E. and N.W. accompanied sometimes by rain which will alter to E.

SHIPMASTER'S REPORT: Cigarette allowance is strictly enforced at 40 cigarettes per man, and has to be carefully declared. If the Chief Steward has a slop-chest, it has to be carefully declared. Whisky has to be declared separately from other spirits, but in practice it is better to declare each type of spirits separately.

The ship's Log Book is stamped by the police.

AUTHORITY: Syrian Company for Oil Transport (S.C.O.T.), P.O.Box 13, Banias (Tartous), Syrian Arab Republic. *Tel:* 963-43-711300, 711301, 711302, 711303. *Telex:* Scot 441012 Sy. *Cables:* Scot, Banias. *FAX:* 963-43-710418. *Contact:* M.T. Askar, Terminal Superintendent in charge.

BORJ ISLAM: 35.40 N. 35.48 E. **(See Plan)**

SHIPMASTER'S REPORT: October 1980.

LOCATION: Borj Islam is located at Lat. 35° 40′ N. Long. 35° 47′ 35″ E. 1.4 miles to the North of Ras El Fasori.

This location was adapted about 2 years ago by the Syrian Government as a discharge zone for LPG carriers and tankers of small tonnage. In this respect, we know that the last vessel to visit this port was an LPG carrier of approximately 5,000 tons.

The coast is a conspicuous promontory with deep water in front of it. For mooring at night, there are no lights indicating this berth, and this presents difficulties.

By day, one can steer towards the cement works which is the most important point of reference in that vessels berth beneath these works.

ANCHORAGES: Vessels arriving by night should anchor in the nearby roads of Lattakia.

By day, the advisable anchorage is 200 m. on a bearing of 140° from the cement works.

PILOTAGE: Pilot must be contacted on arrival on VHF Channel 16 at Lattakia, and instructions will be given for berthing. The Pilot boards vessels at Borj Islam.

BERTHING: This is very difficult since there are no berths or buoys. The vessel berths "stern to the land" with 2 anchors 6/7 shackles on each and lines are fixed on to rocks.

Great attention must be paid to winds from the South or S.W. and West or N.W., since this location is open to such winds.

DISCHARGE: This is effected with hoses (supplied by the ship for connection purposes). The product is discharged slowly to tanker trucks.

The position where the vessel anchors has a depth of water from 11 m. to 40 m.

LATTAKIA: 35.31 N. 35.46 E. **(See Plan)**

PORT LIMITS: The seaward boundary of the port is about 2 miles West of the main breakwater, starting with the entrance line of 133° South.

DOCUMENTS: In addition to the copies of Bills of Lading, Cargo Manifests and the various Ship's Certificates, the Master of an arriving vessel must produce the following documents:

- Crew List, showing full names of crew members, nationality, date of birth, and rank onboard.
- Stores List.
- Passengers List.
- Health Certificates and International Inoculation Certificates.
- All other documents relevant to the ship.

PILOTAGE: Upon a vessel's arrival at the anchorage area, she may call the Pilot in any of the following ways:

(a) Flying the internationally recognised flag.
(b) Blowing the ship's whistle – 2 long and 1 short.
(c) Calling the pilot station on VHF – Lattakia pilot station – using Channel 16.
(d) Signalling the pilot boat. – Grey colour hull and white colour bridge, always flying the Pilot's flag (letter "H").

The Pilot boards an arriving vessel when she has reached a distance of about a few hundred metres West of the Breakwater Head under good weather conditions. When the weather is bad, an arriving vessel is directed to the port basin entrance by VHF. The Master is advised of proper directions to follow and when he is to lower the pilot ladder to the lee side, by the Pilot.

Traffic List: Broadcast twice daily on VHF Channel 16:

Meeting takes place at 1100 hrs.

ANCHORAGES: Upon arrival at the anchorage area referred to under "Port Limits", the vessel has to wait for orders. This Anchorage Area has a depth of 20 m. – 25 m., and all Masters waiting there have to keep listening on VHF Channel 16, from 0600 until 2200 hrs. local time, for fresh orders. It is always recommended to keep a special watch on VHF Channel 16, for sudden orders.

RESTRICTIONS: The state of tide at Lattakia is negligible, and all vessels may enter and sail out of the harbour by night or day provided she has a Pilot onboard.

MAX. SIZE: The maximum permissible length, breadth and draft of an arriving vessel are determined by the place of berth or anchorage point outside the breakwater.

HEALTH: All arriving vessels are boarded by the quarantine service to whom all relevant documents are submitted, in particular the Derat Certificate, and incidents onboard reported.

The application is filed by the Agent, who accompanies the boarding authorities. Free Pratique is never automatic.

RADIO: The name of the Lattakia station is "Lattakia Radio" on 2182 kHz or Channel 16 on the VHF. Following first contact another Channel is agreed upon, leaving Channel 16 for the pilotage service.

VHF: See "Radio" and "Pilotage".

TUGS: 16 tugs up to 1,100 h.p. Tugs are always under the direct orders of the Pilot and join the vessel at the point the Pilot boards. Usually ship's lines are used but there is no charge for the use of the tug's lines.

BERTHING: Quay berths available as follows:

Name	*Length* (m.)	*Depth* (ft.)	*Remarks*
Khahaleh Quay	600	31	28 ft. 6 in. at the root.
Silo Quay	185	25	27 ft. 6 in. at the root.
Passenger Quay	240*	22 – 31	
*East Division	55	—	21 ft. at the root.
*West Division	185	—	25 ft. at the root.
Eastern Quay	270	22	
Northern Quay	276	13	
Others	530	—	For Port Services.

None of these quays is a specialised one. Cargo is loaded or discharged either by the ship's gear or Port Co. cranes, at the entire discretion of the latter. A ship may operate in the basin or open road in and from barges.

CRANES: Electric quay cranes: 16×3-6 tons (18×6-16 tons electric cranes will be available on the extension – see "Developments"). Mobile cranes: 58×3-12 tons, 4×15 tons, 6×70 tons. Floating cranes: 1×100 tons, 1×32 tons. Forklifts: 2×30 tons (containers), 92×2-6 tons, 4×8 tons. Straddle carriers: 4×32 tons. 2 floating cranes, 100 tons and 32 ton.

BULK CARGO FACILITIES: *Grain Silos:* In the silo, there are 72 storage bins, the capacity of each is 45,000 tons of grain in which operations of sieving, fumigation, drying and filling can be carried out.

Grain is shipped automatically onboard vessels at a rate of 150 t.p.h. This rate can be doubled when the repairs are completed. Grain is discharged ex-vessels by sucking devices, the total capacity of which reaches 200 t.p.h. A study is being carried out to provide grain silos with automatic intake equipment and to develop the silos quay.

STEVEDORES: 24 hours' ETA advice is required to arrange working gangs if vessel is scheduled to operate on arrival. The average loading and discharging rates vary with the type of vessel, nature of cargo, where berthing and whether working in lighters or not.

MEDICAL: Except for urgent cases on board, the Agent need not be notified in advance. Hospitals in town available, and likewise doctors and private clinics. No particular inoculations are required.

DENSITY: 1033 (33 grams Salt per cu.m.).

FRESH WATER: Supplied either from hydrants alongside main quay or from tank barge (capacity 170 tons).

FUEL: All types of marine fuels are available, may be delivered in any quantity from tank trucks alongside quay. 48 hours' notice is required.

FIRE PRECAUTIONS: No specific precautions except that vessels carrying explosives must operate and discharge into lighters in the open Roads.

CONSULS: Sweden, Finland, Netherlands, Greece, Italy, Spain, Portugal.

REPAIRS: Only minor deck, radio, and radar repairs may be carried out. Extensive and specialised workshops are not available.

DRY DOCKS: Not available. Only a 900 ton slipway is in operation.

SURVEYORS: Only minor surveys by Lloyd's, German Lloyd and Veritas.

GANGWAY/DECK WATCHMEN: Compulsory and are supplied at a hire rate of LS 48.00 per watchman per day.

HATCHES: Normally opened and covered by the ship's crew.

CUSTOMS ALLOWANCES: Cigarettes, 2 packs per man. Spirits, as would be reasonably agreed with the Customs on board prior to sealing the vessel's stores.

CARGO GEAR: Two floating cranes are available – one of 100 tons capacity and the other of 32 tons. Both may be used at the entire discretion of the Lattakia Port Company. Also one mobile crane of 25 tons capacity.

REPATRIATION: All facilities exist and are attended to by the vessel's Agent.

AIRPORT: Damascus International airport is 340 km. from Lattakia by road.

TIME: Winter Time GMT plus 2 hours. Summer Time GMT plus 3 hours.

HOLIDAYS: Following the Lunar Calendar, the first 2 days of Bayram and Al-Adha are the only non-operational days.

POLICE/AMBULANCE/FIRE: Police Tel. No. 93; Ambulance Tel. No. 93; Fire Tel. No. 91.

TELEPHONES: No proper arrangements exist. Vessels in port may use VHF Channel 16 with the pilot station of Lattakia Radio.

SHORE LEAVE: Crew members allowed ashore to visit the city with shore passes issued by the Police Authorities in the port.

IDENTIFICATION CARDS: Shore passes in addition to the Seaman's Book.

DELAYS: Vary with state of congestion prevailing in the port.

DEVELOPMENTS: The execution of the 2nd development stage underway and it will cover the following new facilities:

Specialised container and Ro/Ro quays.

	Length	*Draft*
Containers	260 m.	13.3 m
Containers	190 m.	11.8 m.
Ro/Ro	200 m.	11.8 m.
General Cargo	350 m.	11.8 m.
General Cargo	425 m.	10.5 m.
General Cargo	450 m.	7.0 m.

In addition there will be new warehouses and stacking areas totalling 230,000 sq.m.

In its planning, the Company has provided for the import of equipment and machinery in a way that meets the needs of the enlarged area. Same will be supplied in accordance with fixed time schedules corresponding to the progress of execution.

There have been calls for tenders for the supply of the following equipment:

16 mobile quay cranes of 6 tons capacity (contract presently being negotiated).

2 mobile quay cranes of 16 tons capacity (contract presently being negotiated).

2 tug boats 1,500 tons (under contract).

3 passenger boats, each can accommodate 15 passengers (under contract).

Gantry cranes 45 tons capacity (under contract).

10 forklift trucks 10 tons capacity (under contract).

2 forklift trucks 30 tons – 35 tons capacity (under contract).

4 straddle carriers (under contract).

A call for tender for the supply of the following equipment is presently being prepared:

Diesel mobile crane 10 tons capacity.

A pilot boat.

VHF station and equipment.

SHIPMASTER'S REPORT: December 1979.

Documents: Health Declaration, De-Rat Certificate, Ship's Register, Cargo Manifest, all Safety, Load line and Radio Certificates.

Pilotage: Compulsory. Pilot boards in the Roads. Normal ETAs required.

Anchorage: Vessel anchored approximately 1 mile West of the breakwater in 60 ft.

Restrictions: Vessel may enter and leave at any stage of the tide; day or night.

Max. Size: Max. draft at present 28 ft. 6 in., (this is to be increased). Keel clearance of 1.5 ft. required.

Health: Vessel anchors on arrival. Free Pratique filed by Agent who accompanies boarding authorities. The authorities sign the log book and inspect all certificates which must be up-to-date.

Radio: Lattakia Radio or Banias Radio.

VHF: Pilot and Port Authority on Channel 16.

Tugs: 5 tugs available. Tugs are required for berthing, however vessels may unberth without tugs.

Berthing: Vessel berthed at the main quay which is 1 mile from the entrance. A total of 4 berths are available plus a Ro/Ro berth. Max. size (approximately) LOA 190 m., beam 25 m. and deepest draft 28 ft. 6 in. The least depth of water in the channel from sea to the berth is 30 ft. Mean tidal range is negligible. Nature at the bottom is mud and the density is 1033.

Cargo Handling Facilities: There are bulk handling facilities for grain and molasses.

Cranes: There are approximately 20×5 ton cranes on the main quay. There are 2 floating cranes, 1 of 35 tons capacity and the other 100 tons capacity.

There is limited storage space for containers, however this is to be increased. There is equipment for handling 20 ft. and 40 ft. containers.

Facilities: The following are available: Fresh water (poor quality), fresh provisions (poor quality), minor repairs, airport (at Damascus 340 km.), Lloyd's Surveyor (Agency), Salvage Surveyor (Agency), ship's laundry (good but expensive), bunker fuel oil and diesel oil (by truck), doctor and hospital, groceries and meats.

Consuls: Sweden, Finland, Netherlands, Greece, Italy and Portugal.

SHIPMASTER'S REPORT: January 1982.

Approaches to Lattakia: The entrance to Lattakia Harbour is well defined but vessels must approach the Green Buoy near breakwater with extreme caution. A wreck is located in position: Lat. 35° 32′ N. Long. 35° 43′ E., approximately on a bearing of 275° – 1.8 miles from the Green Buoy. A wide berth must be given on entry to Lattakia to this wreck (m.v. "Bravo Neck") with full load of cargo.

The harbour is generally congested and a long delay at outer anchorage must be anticipated. It is advisable for ships to register in advance if this is feasible, to avoid delay. The outer anchorage does not afford good holding ground and during near gale force winds ships are liable to drag anchor.

A traffic list is generally broadcast on VHF Channel 16 at 0600 hrs and 1800 hrs. daily.

Logistic supplies are poor and water is a difficult commodity to obtain. Ships are advised to top up with water and fuel before arrival at Lattakia.

A prominent land mark (whitish hotel) is visible approximately 1 mile West of Rasibin Hani Light.

AUTHORITY: Lattakia General Port Company, P.O.Box 220, Baghdad Street, Lattakia, Syrian Arab Republic. *Tel:* 23900/1/2/3/6. *Telex:* 451008 Lapoco Sy. *Cables:* Latakia Port. *Contact:* Madhat Abul Shamlat, General Manager.

TARTOUS: 34.53 N. 35.45 E. (See Plan)

DOCUMENTS: Bill of Health – The usual International form should be filled in on arrival and the Agent will deliver on board the Bill of Health and Port Clearance upon departure.

Manifests – Should be certified by the Syrian Consulate at port of loading in 4 copies.

Ship's Registry – To be presented to the Port Authorities upon request.

Crew List – 4 copies should be handed over to the Agent along with passenger or transit manifests.

Stores List – 2 copies required by Customs who will allow 40 cigarettes to be retained by each person on board, the balance of slop chest and stores shall be sealed during ship's stay in port. Customs officers are at liberty to search crew quarters.

Derat Certificate – Valid certificate required and no extension can be obtained.

PILOTAGE: See "Berthing".

APPROACHES: Vessels approaching the port should keep to the authorised passage defined by the following co-ordinates:

Lat. 34° 56′ 24″ N.	Long. 35° 38′ 00″ E.
Lat. 34° 56′ 24″ N.	Long. 35° 48′ 36″ E.
Lat. 34° 59′ 00″ N.	Long. 35° 50′ 00″ E.
Lat. 34° 59′ 00″ N.	Long. 35° 52′ 36″ E.
Lat. 34° 54′ 24″ N.	Long. 35° 51′ 12″ E.
Lat. 34° 54′ 24″ N.	Long. 35° 37′ 48″ E.

ANCHORAGE: Vessels proceeding to Tartous pick up Pilot at the Anchorage which is 0.5 miles S.W. of the main breakwater. The rocky bottom constitutes good holding ground with a depth of up to 20 m. of water.

RESTRICTIONS: *Terminal Regulations:* All tankers must be equipped with S.B.T., I.G.S. and C.O.W. and not be more than 20 years old.

MAX. SIZE: At present minimum depths are at the entrance of the harbour about 2 cables seaward of the green light on the S.W. Breakwater. Depth about 33 ft. Max. draft 32 ft. dependent on swell. Also see "Tankers".

RADIO: *Confirmation of ETA:* Before arriving at Tartous terminal, tankers must inform Tartous Control (T.T.C.) of their ETA, 72 hours and 24 hours in advance, stating: Discharging port and quantity of cargo required. Also must make contact with T.T.C. at least 2 hours before ETA at Tartous anchorage area to receive loading instructions.

Procedures for Coast Station Communication: All times in GMT.

1. After general call on 500 kHz, terminal broadcasts traffic lists on 479 kHz at 0730, 1130, 1430 and 2030 hrs., and keeps watch on 500 kHz from 0500 hrs. till 2130 hours. Answers on 479 kHz.

2. After general call, transmits its traffic lists simultaneously on 8472 and 12699 kHz at 0830, 1330 and 1930 hrs.

Keeps watch on the 8354 – 8374 kHz band from 1100 – 1130 hrs.
from 1500 – 1530 hrs.
from 1800 – 1830 hrs.

And answers simultaneously on 8472 and 12699 kHz.

3. Keeps watch on Channel 16 for 24 hours.

4. Keeps watch, calls and replies on 2182 kHz from 1100 – 1130 hrs.
from 1430 – 1500 hrs.

5. Land station charge free for motor tankers.

Tartous Terminal Station, Lat. 34° 57′ N., Long. 35° 52′ E.:
FC YKI 500 A1 600 watt. Hours 0700 – 2300 hrs.
479 A2
427 A2
8472 A1
12699 A1

BERTHING: Mooring Masters are supplied by the terminal and vessels can contact the terminal directly by telex No. 470002 sy, or through Shipping agent in Tartous, giving their ETA and requirements. Vessels berth heading to the predominant S.W. winds, i.e. starboard side alongside unless contrary winds prevail at the time of the berthing.

Southern breakwater – 2,650 m. long called Main breakwater
Northern breakwater – 1,650 m. long called Lee breakwater

The distance between the 2 heads of these breakwaters is 250 m. with a depth of 10.5 m., which is being dredged in order to bring it up to 13 m.

The harbour is divided into 3 basins which are protected by the 2 breakwaters: (1) The North basin; (2) The Middle basin; (3) The Southern basin. The Southern basin is the only one used presently, for the discharge of cargo.

12 vessels can be moored at anchor inside the breakwater of this basin, the depth being between 8 m. – 13 m. The turning circle at the entrance is 450 m. diameter with a depth of 11 m. – 13 m.

The main quay which is 150 m. wide offers on its Southern side from the shore side 300 m. of jetty with a depth alongside of 2 m. – 4 m., 300 m. with 8 m. and 200 m. with 9 m. to 10.5 m. depth. A standard gauge railway line is installed on the entire length of the quay.

FLOATING CRANE: A floating crane of 100 tons lifting capacity available.

POLLUTION: See "Banias".

MEDICAL: Medical facilities are available, but serious cases may involve transportation to Lattakia or Damascus.

TANKERS: *Operator:* Syrian Crude Oil Transportation Co.

Maximum safe length of tankers acceptable – 280 m.
Maximum safe draft of tankers acceptable – 52 ft.
Maximum deadweight of tankers acceptable – 35,000 – 100,000 tons.

There are 2 berths for loading:

No.	*Max. Rate*	*Sealine*	*Hoses*	*Depth of Water*
1 (North)	4,000 t.p.h.	1×28 in.	2×12 in.	76 ft.
2 (South)	5,000 t.p.h.	1×28 in.	2×12 in.	72 ft.

Loading is by gravity and loading rate depends upon height of tank and level of oil. All strings of hoses are fitted with 12 in. connections.

Notice of Readiness: Notice of Readiness will be accepted when vessel arrives in the very near vicinity of the anchorage area (Position Lat. 34° 56′ 42″ N., Long. 35° 49′ 30″ where the Mooring Master, who is Company's representative, will board and receive vessel and remain on board throughout the entire operation.

Pilot Ladder: Combination of accommodation and pilot ladder to be rigged, accommodation ladder to be lowered to within 12 ft. of water. Pilot ladder to be placed abaft and to within 3 ft. of water.

Anchorage: In the event of berth not being available or suspension of mooring operations on arrival a good anchorage is to be used South of the berths in the vicinity of the anchorage area.

Shore Control will keep vessel advised of expected time of berthing, etc.

It is important and in the vessel's interest to maintain a listening watch on Channel 16 or a visual watch on the shore, to avoid delays.

On being advised of expected time "Mooring Master will board", heave short anchor before his arrival.

Moorings:

Forward: Anchors to be fitted with marker buoys with 20 fathom of line. 2×120 fathom mooring lines; 2 rope stoppers; 1 suitable wire stopper (preferably carpenter patent) for use with 4.75 in. – 5.5 in. circ. mooring wires.

Aft: 4×120 fathom mooring lines; 4 rope stoppers; 2 suitable wire stoppers (preferably carpenter patent) for use with 4.75 in. – 5.5. in. circ. mooring wires.

Boat Ropes: To be rigged on either side and of not less than 4.5 in. circ.

Derricks and Cranes: SWL of 7 tons is recommended. it must be capable of plumbing overside abreast of loading manifold.

Loading Manifold: 2 suitable reducers to be fitted prior to arrival on port side and to be connected to the Oil Company's hose connections (12 in. series 150 flanges). The following tools to be available: 2 spanners 0.375 in., 2 spanners 0.875 in., 2 hammers 7 lbs., 1 axe 2.5 lbs.

Hose hang-off bitts are required at about 10 ft. from the ship's rail at the loading manifold to secure submarine hoses on the port side.

Safety of Mooring: On completion of mooring operation vessel must have not less than 7.5 shackles of anchor chain in the water.

Ballast: No dirty ballast.

(a) The Port Authority is most strict and will impose heavy fines for any oil pollution of the sea. In addition they may order vessel out of the berth to sea to clean any such contaminated ballast, and keep it on board vessel in a separate or slop tank. N.O.R. will not be accepted until ballast becomes clean.

(b) Ensure ballast quantity on board is kept to a minimum to safe manoeuvre in the prevailing weather conditions.

(c) Excess ballast causes delay, Tartous is an open roadstead consequently sudden changes in weather can be experienced especially during the Winter months.

(d) Leakage or spillage of oil on board ship must be collected and not be swept or washed overboard.

Ship's Assistance: Ship's crew with an Officer in Charge to assist in all operations as advised by the Mooring Master. This includes lifting, connecting, disconnecting, lowering of hoses and tending anchor cables and moorings.

Deck Watch: A complete watch on deck must be maintained throughout the operation, especially towards the shore Signal Station to ensure safe loading and to avoid delays.

Deck Scuppers Plugs: Ensure scuppers are effectively plugged. On no account should plugs be removed.

Loading Operations: (a) Ship's personnel are solely responsible for the loading operations, ie. starting, loading rate, tank switching, topping off, stopping, etc. The Mooring Master will pass requirements to Shore Control. It is in vessel's interest *to advise loading rate required, also to give 30 minutes' notice of expected time of commencing loading.*

(b) Should vessel require adjustments in the loading rate, please advise the Mooring Master, sufficient notice must be given to enable shore operators to comply. Failure to give proper warning may cause delay or a tank overflow on board.

(c) The Mooring Master will not transmit any loading instructions to the shore until the responsible Ship's Officer has admitted that:

Ship is safely moored.
Hoses are correctly connected.
All valves have been set for receiving cargo.

Order to start will be taken as final.

Vessels in berth: Ships are not allowed to remain in berth for any reason when loading operation is stopped, or disconnect hoses and drop them into the sea unless authorised by Terminal Superintendent.

Lighting: During hours of darkness the manifold, poop, mooring area of sea in vicinity of ship should be adequately lit.

Main Engines: Must be kept on short notice. Repairs which will immobilise them must not be carried out in berth.

Deck Machinery: Must be ready for immediate use at all times.

Whistle or Siren: To be available at all times.

Signalling: An "Aldis" type lamp to be readily available.

Stores, Provisions, etc.: It is strictly forbidden for provisions, stores or other items to be received or discharged whilst loading is in progress, launches or other craft other than Company launches must not lie alongside during the same period.

Tanker Safety Regulations: Must be strictly adhered to at all times. The Mooring Master is authorised to *stop all operations* should he consider that Safety Regulations are not being complied with.

Boarding: The boarding of vessel whilst in mooring should be restricted to persons holding valid passes which are issued by the Terminal Superintendent on application to ship's Agents and authorised Chandlers. This restriction is carried out in conjunction with the Syrian Harbour and Security Authorities.

Vessel not allowed to send any crew or materials outboard for any reason before asking Agents for granting the official authority.

Guests: Masters wishing to receive guests on board should make arrangements through their Agents.

Action in Case of Emergency: In the event of fire, oil spillage or other emergency on the vessel

The Emergency Signal is

3 or more blasts of not less than 10 seconds duration each on whistle or siren supplemented by a continuous ringing of the general alarm bells.

Corridor: The corridor must be followed by vessel to Tartous Terminal:

Corridor Leading to Tartous Terminal

(a) Lat. 34° 59′ 00″ N., Long. 35° 50′ 00″ E.
(b) Lat. 34° 59′ 00″ N., Long. 35° 52′ 36″ E.
(c) Lat. 34° 56′ 24″ N., Long. 35° 38′ 36″ E.
(d) Lat. 34° 56′ 24″ N., Long. 35° 38′ 00″ E.
(e) Lat. 34° 54′ 24″ N., Long. 35° 37′ 48″ E.
(f) Lat. 34° 54′ 24″ N., Long. 35° 51′ 12″ E.

FRESH WATER: Unlimited supplies available to vessels berthed alongside the main pier.

FUEL: Only available in very limited quantities by tanker truck.

SHORE LEAVE: No amenities for the crew exist in the town of Tartous but crew may, if required, proceed ashore with a landing permit issued by the local security services.

WEATHER: See "Banias".

DEVELOPMENTS: A new quay for phosphate is now under construction 300 m. long and 4 m. depth and will be prolonged by a quay of 250 m. length and 11 m. depth for vessels loading phosphate up to 35,000 tons capacity. One shiploader, rate 1,000 t.p.h.

A dry dock will soon be under construction for repairing vessels and tankers with a capacity varying between 40,000 tons and 60,000 tons. Also 2 slip-ways for general overhaul for small vessels of 1,000 tons and less.

SHIPMASTER'S REPORT: September 1979

Time Zone: GMT plus 2 hours.

Papers Required:

1 Health Declaration.
8 Crew Lists.
1 General Information Sheet (Ship's details)
1 Provisions List.
1 Bonded Stores List.
1 Crew Effects List.
1 Firearm & Ammunition Declaration (Letter even if none).

Radio: Certain regulations are in force when approaching Tartous. When 50 miles off the coast, the following should be sent through Lattakia Radio to Tartous Harbour Master.

1. Name of ship.
2. Nationality.
3. Type of Vessel.
4. Position and time.
5. Maritime Passage to port of call.
6. Speed.

From experience it was found that Lattakia Radio did not answer until 0630 hrs. Local Time.

Approaches: Approach to Tartous should be made along the Maritime Passage between the parallels of 34° 54′ 24″ N. and 34° 56′ 24″ N. on a course of 090° from 12 miles off.

Pilotage: Pilots commence work between 0530 hrs. and 0600 hrs. and can be called on VHF Channel 16. The pilot station will require draft, length, and type and tonnage of the cargo. The latter being important as vessels with less than 300 tons have priority, as do container vessels and Ro/Ro ferries.

It is most probable that it will be necessary to anchor off because of congestion. Vessel was anchored in a position with the end of the main breakwater bearing 110° True, distance 1.35 miles in a depth of 15 fathoms. Holding ground is reputed to be good.

Clearance: Vessels will normally be cleared on arrival at the anchorage if arriving in the morning or before 1400 hrs. If not, then Notice of Readiness can be sent via Tartous Radio.

Registration: It is possible to proceed to Tartous, register a turn for berthing and then proceed to another port.

When waiting for a berth, provision should be made for a delay of about two weeks.

Fresh Water: Requests for fresh water should be made in good time. At time of writing, there is only one meter in the port, though all the berths have water laid on, so vessels have to take it in turn. Applications should be made through the Agent for water. Vessels at anchor are brought in and tie up stern to the N.W. corner of the Southern pier, the water hose then being passed over the stern, ship's hoses will be required. Pressure is good, water being supplied at about 15 to 20 tonnes/p.h. As supply of water cannot be guaranteed when a request is made, water stocks should be conserved.

Berthing: Berths are available on both sides of the Southern pier and at the end, though this area is reserved for the Ro/Ro ferries and small craft. Further berths are at the breakwater with the vessels tying up in a "Mediterranean Moor", i.e., stern to.

General: The Government Agency, Shipping Agencies Co., can be reached on Channel 16 or through Tartous Radio, their telephone numbers being 21541 & 20940.

Information regarding berthing is given by the pilot station on Channel 16, possibly in the evening before berthing, or in the morning about half an hour before berthing. Standard procedure is to weigh anchor an proceed slowly towards the four buoys marking the entrance channe The Pilot may request that you enter the port slowly and he will boar inside the breakwater. There is no difficulty in this, but it should be note that there is a noticeable current flowing Northwards even though the is no wind.

In the Summer months, there is a seasonal low over the mainland o Syria which gives rise to a prevailing Southwesterly air stream, mo noticeable in the afternoons with the advent of the sea breezes. Period of calm are also experienced and winds from other directions but not o any great force. In the Winter months gales are experienced.

A launch service is available for vessels at anchor and at th breakwater berths, this can be arranged through the Agents. Four tug are available, two large and two small, one of the latter doubling as th pilot launch, identifiable by the pilot flag.

Cranes are available on both sides of the pier except where the si is under construction. A phosphate berth is situated at the South sid of the harbour, there being silos for this berth, at present it is fed b road transport from the mines inland. However, it is understood that a railway is being constructed for this. Another pier (mole) is bein constructed between the existing Southern Pier and the Naval Pier i the North of the harbour. Fresh vegetables are available in season.

AUTHORITY: Harbour Master, Tartous, Tartous Port Administratio *Telex:* 20562.

Oil Terminal: Syrian Crude Oil Transportation Company, P.O.Box 5 Tartous, Syrian Arab Republic. *Tel:* 222840, 222841 and 22284 *Telex:* 470002 SY. *Cables:* Petsyria - Tartous. *Contact:* Taher Khal Terminal Superintendent.

NOTES

Please also advise Shipping Guides Ltd.

Taiwan

GENERAL:

RESTRICTIONS: The Taiwan Authorities have the following countries on their blacklist: Cambodia, The People's Republic of China, Albania, Rumania, Cuba, Vietnam and Russia. They have decided that ships are not allowed to call at a port in Taiwan immediately before or after a call in these countries, and that ships belonging to, managed by, or operated by companies in breach of these rules are not allowed to call at ports in Taiwan.

ENTRY PERMIT: Vessels flying the flags of nations not having diplomatic relations with the Republic of China (Taiwan) must obtain an Entry Permit before arrival. To enable Agents to apply for an Entry Permit, the following documents must be supplied prior to vessel's arrival:

1 photograph, 6 in. × 8 in., shipside view, clearly showing the vessel's name, 1 copy of the vessel's Certificate of Registry. (In the case of a Danish, Norwegian or Swedish vessel, a copy of the International Tonnage Certificate will serve this purpose).

The following ships do not require an entry permit:

(a) those flying the flag of Japan, Liberia, the Philippines or the U.S.A.
(b) those flying the flag of any country having diplomatic relations with the Republic of China (Taiwan).

Vessels arriving at Taiwan ports to carry out cargo discharging and/or loading operations must be registered with the Harbour Authorities, and the following documents are required.

Discharging: A letter of appointment from the vessel's Registered Owners (not Managers, Operators, Agents, or Disponent Owners) to the vessel's Taiwan Agents. If the agency appointment is made by a Charterer, then a copy of the Charter Party (and Time Charter Party if relevant) will be required. If the Charter Party is signed on behalf of Owners, then a copy of the authority from the Owners to the signatory will be needed. In all events, documents clearly showing the line of authority from Registered Owner to Agency Appointed must be produced.

Loading: As for discharging, together with a copy of the Export Permit issued by the Board of Foreign Trade.

When a vessel is loading export cargo where freight is paid in Taiwan, a detailed Freight List and a deposit or a bank guarantee covering the total freight must be lodged with the Harbour Bureau. The deposit, or guarantee, is returnable after the cargo reaches its destination.

HUALIEN: 23.59 N. 121.38 E. (See Plan)

PORT LIMITS:

(A) Lat. 23° 56′ 28″ N., Long. 121° 36′ 13″ E.
(B) Lat. 23° 56′ 29″ N., Long. 121° 36′ 48″ E.
(C) Lat. 24° 00′ 20″ N., Long. 121° 38′ 45″ E.
(D) Lat. 24° 00′ 47″ N., Long. 121° 38′ 18.1″ E.

DOCUMENTS:

Ship's Register.
Derat Certificate.
Last Port Clearance.
Aids to Navigation Charges Memo.
Pratique.
8 copies Crew List.
1 copy Crew List visaed by office of China Mission (applicable to American vessels).
8 copies Passenger List – landing and transit.
1 List showing dates of vaccination of all crew and any landing passengers from infected areas.
1 Chinese Maritime Customs Stores List.
1 copy Crews Personel Effects List.
1 List Foreign Currency in Safe.
1 List Narcotics in Safe.
2 Lists Arms and Ammunition.
1 Set of copy Bills of Lading.
3 Manifests of Inward Cargo.
3 Manifests of Through Cargo.
3 Lists of Unmanifested Inward Parcels.
3 Lists of Mail for Landing.
Vessel's Log Book.

APPROACHES: Vessels should approach on a course of not less than 280°(T). There is extensive construction work taking place on both the Eastern and Western breakwaters with caissons anchored in the channel.

The inner channel is very narrow (80 m.) and care should be taken when adjusting course, when approaching and passing Berth No. 1.

PILOTAGE: Compulsory. Pilot boards at quarantine anchorage. At anchorage hoist 'G' flag.

ANCHORAGE: *Quarantine Anchorage:*

Positions:		
(A)	Lat. 23° 57′ 25.5″ N.,	Long. 121° 36′ 15.5″ E.
(B)	Lat. 23° 57′ 18″ N.	Long. 121° 36′ 33.5″ E.
(C)	Lat. 23° 57′ 53.3″ N.	Long. 121° 36′ 52.5″ E.
(D)	Lat. 23° 58′ 01″ N.	Long. 121° 36′ 34.1″ E.

RESTRICTIONS: Hualien Harbour closed to all ships at 0000 hrs. until 0500 hrs. Large ships not allowed to enter after sunset.

MAX. SIZE: Draft not exceeding 14.0 m. may enter Hualien Harbour at present time.

HEALTH: At anchorage hoist 'Q' flag. If the vessel receiving a notice of Radio Pratique can take up a berth; it need not hoist "Q" flag.

RADIO: Hualien Radio XSY; ETA reported at least 24 hours before arrival.

TUGS: Normally used in harbour. Ship's lines should be used. 4 tugs, 1×2,400 h.p., 1×1,600 h.p. and 2×3,200 h.p.

BERTHING: *Deep Water Wharf:* 2,887 m. (25 berths) capable of berthing 2 – 3×6,000, 3 – 4×7,000, 4 – 5×1,000 and 3 – 4×15,000, 2×30,000 and 7×60,000 ton vessels at the same time.

Berth No.	*Length* (m.)	*Max. Draft* (m.)	*Remarks*
1	123	7.5	General Cargo
2	153	7.5	General Cargo
3	134	7.5	General Cargo
4	160	9.5	Sugar
5	160	9.5	Gravel
6	160	8.5	General Cargo
7	120	6.5	Gravel
8	220	10.0	Gravel
9	103	9.5	—
10	183	9.5	Cement Clinker
11	185	9.5	Minerals
12	150	7.5	Construction Ship use
13	185	9.5	Logs and Woodchips
14	185	9.5	Logs and Woodchips
15	100	9.5	Logs and Woodchips
16	144	7.5	Not in use at present
17	200	10.5	Open yard
18	200	10.5	Open yard
19	300	14.0	Cement
20	300	14.0	General Cargo
21	200	14.0	General Cargo
22	210	14.0	General Cargo
23	270	14.0	General Cargo
24	270	14.0	General Cargo
25	330	14.0	General Cargo

CRANES: Mobile cranes: 1×45 tons, 2×25 tons and 1×2 tons. There are 25 forklift trucks (with 2 tons – 20 tons lifting capacity) and 10 mini-tractors.

BULK CARGO FACILITIES: At Berths No. 5, 7 and 8 there is a conveyor system for loading gravel. At Berth No. 10 two cement silos (12,000 tons) with a conveyor system owned by Asia Cement Co., for loading bulk cement and Kiln Fresh Cement Clinker. At Berth No. 11 there is a conveyor system owned by China Steel Corp. for loading dolomite and crystalline limestone.

There are 21 single rope hook-on type grabs; 4 grabs at Berth No. 15 owned by Chung Hwa Pulp and Paper Corp. for discharging woodchips into trucks, 7 grabs at Berth No. 18 owned by Asia Cement Co., for discharging coal and 22 grabs belonging to Hualien Harbour Bureau for discharging gypsum, coal, metal and ores, etc. into trucks.

SPECIAL CARGO FACILITIES: There are 6 godowns on the Western wharves with a total capacity of over 40,000 tons.

There are 4 hoppers at Berths No. 13 and 14, owned by Chang Hwa Pulp and Paper Corp., for discharging woodchips into rail wagons or trucks.

STEVEDORES: Stevedores will be assessed against ships except when otherwise agreed between ships and consignees or shippers.

Advise ETA before 0800 hrs. in order to arrange gangs for 1800 hrs. same day.

Port Performance:

Daytime Work: 0800 – 1700 hrs. (0800 – 1730 hrs. in Summer).
Night Work: After completion of 8 hours daytime work till 24 hours.
Morning Work: 0600 – 0800 hrs.
General Cargo: 200-250 tons per day with only 1 gang.

Bulk: Cement loader at Berth No. 10 can load 600 t.p.h. Dolomite elevator at Berth No. 11 can load 1,200 – 1,500 t.p.h. Gravel elevators at Berth Nos. 5, 7 and 8 can load 500 t.p.h. each. Coal, ores, gypsum etc. grab buckets can unload 80 t.p.h. with only 1 gang.

MEDICAL: Hospitalisation can be arranged through Agent.

FRESH WATER: Fresh water available at all berths. Water supply will be assessed against ships and ordered through Agent. Rate 30 t.p.h.

FUEL: 6 grades obtainable from Chinese Petroleum Corporation:

1. Marine Gas Oil: SUS at 100°F, max. 38.
2. Marine Diesel Oil: SUS at 100°F, 35 – 45.
3. MF-80 (MD-600) C.S. at 122°F, max. 80 (RD No. 1, 100°F, max. 600).
4. MF-280 (MD-2700) C.S. at 122°F, max. 280 (RD No. 1, 100°F, max. 2700).
5. MF-380 (MD-4000) C.S. at 122°F, max. 380 (RD No. 1, 100°F, max. 4000).
6. Bunker C: SFS at 122°F, max. 200, C.S. at 122°F, max. 400.

Fuel line 6 in. connection, no barge available, notify in advance.

REPAIRS: Only minor repairs can be attended to in Hualien. For other repairs the nearest facilities are at Keelung or Kaohsiung.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES:

Ship's Nationality Certificate.
Passenger ship Safety Certificates.
Cargo ship Safety Construction Certificates.
Cargo ship Safety Equipment Certificates.
Cargo ship Safety Radiotelegraphy (Radiotelephony) Certificates.
International Load Line Certificate.
International Oil Pollution Prevention Certificate.
International Sewage Pollution Prevention Certificate (1973).

CARGO GEAR: Loading/unloading normally effected by ship's gear.

AIRPORT: Domestic airport (10 km.) with connection to Taipei and Kaohsiung Airport.

TIME: GMT plus 8 hours.

POLICE/AMBULANCE/FIRE: Police, Tel: 223419. Ambulance, Tel: 223419. Fire, Tel: 223419. Emergency, Tel: 119 or 223419.

SHORE LEAVE: Crew members are allowed ashore only in the city of Hualien, from 0600 hrs. till 2400 hrs. Before going ashore each crew member must apply for shore pass at the Immigration Office.

IDENTIFICATION CARDS: Passport or Seaman's Book required.

GARBAGE DISPOSAL: Garbage collection service is available. This service is provided by the Port Authority. The garbage truck goes around the wharves at 0900 hrs. to collect garbage. Charges per day as follows:

Classification	*Daily Rates (NT$)*
Ships less than 5,000 G/T	197
Ships of 5,000 G/T or more but less than 15,000 G/T	375
Ships of 15,000 G/T or more	552

50% discount for ships below 500 G/T. 100% surcharge for international passenger or tourist ships. 90% discount for yachts. 30% additional charge on national or legal holidays and Sundays. Carriers shall self-dispose of waste from their holds.

WASTE OIL DISPOSAL: Not available at present.

SEAMAN'S CLUBS: Hualien Harbour Seamen's Club, Tel: 224633/223171. Facilities include postage and telephone service, food and beverages, foreign exchange, tourist information and recreation room. Open Monday to Saturday 0900 – 1200 hrs. and 1300 – 1800 hrs.

CURRENCY: New Taiwan Dollars (NT$).

AUTHORITY: Hualien Harbour Bureau, No. 66 Hai Ann Road, Hualien, Taiwan, Republic of China. *Tel:* 038-325131. *Telex:* 3609. *FAX:* 038-333757. *Contact:* Te-An Han, Director.

AGENT: Sub-Agent controlled by: Jardine, Matheson & Co. Ltd., 13/14th Floor, World Trade Building, P.O.Box 81, 50 Hsin Shen South Road, Section 1, Taipei. Tel: (02) 393-1177. Telex: 21851, 11391 Jardines. Cable: "Jarocean Taipei" Fax: (02) 3413168, 3920435, 3931160.

Associated with Jardine Shipping Agencies.

KAOHSIUNG: 22.37 N. 120.16 E. (See Plan)

PORT LIMITS: Ship considered to be an "arrived vessel" when anchored at either of following locations:

1. Northern Anchorage: Within 2 miles radius off Kaohsiung Lighthouse (Lat. 22° 37′ 01″ N., Long. 120° 15′ 25″ E.) forming a sector between Southern side of outer harbour channel toward shore line Southward.
2. Southern Anchorage: Within a radius of 2.5 miles from the signal station of the second harbour entrance (Lat. 22° 33′ 21″ N., Long. 120° 18′ 28″ E.) forming a sector between Northern side of outer harbour channel toward shore line Northward.
3. For VLCC to discharge at 2 Monobuoys: SBM No. 1 position Lat. 22° 30′ 29″ N., Long. 120° 17′ 49″ E. SBM No. 2 position Lat. 22° 29′ 45″ N., Long. 120° 16′ 41″ E. Tankers are to anchor 1.5 miles West of the No. 2 SBM as directed by Agents.

DOCUMENTS:

10 copies Crew List.
1 copy Crew Effects Declaration (include cameras, radio, etc.).
1 copy Passenger List.
1 copy Stores List (including provisions, engine, deck and bonded stores).
1 copy *Arms and Ammunition List.
1 copy *Foreign Currency List (Ship's Money List and Private Currency List).
1 copy *Narcotics List.
2 copies Import Cargo Manifest.
1 copy Through Cargo Manifest.
1 copy List of Ports of Call.
1 copy Mail List.
1 copy †Parcels List (parcels to be landed).
1 copy †Parcels List (through parcels).
1 copy Specimen signature of Master, Chief Engineer and Chief Officer.

* These items are to be sealed upon arrival.

† Articles on these 2 lists may be sealed upon arrival as warranted by conditions.

Also see "Certificates".

Advise agent by telex prior to arrival full crew list, giving name, nationality, date of birth, Discharge Book number and Passport number.

APPROACHES: The First Harbour Entrance is dredged to 11 m. MLWS. The Second Harbour Entrance, dredged to 16 m., can accommodate vessels up to 100,000 d.w.t.

PILOTAGE: Compulsory. Agents will arrange for Pilot to board vessel at anchorage outside breakwater. Pilot boat flies code flag "H".

Container ships over 15,000 g.r.t. and other freighters or tankers over 15,000 g.r.t and 200 m. LOA must take 2 Pilots at double pilotage.

ANCHORAGES: To avoid being charged double pilotage fees, arriving vessels should anchor within a 2 miles radius of Chihoushan Lighthouse (Lat. 22° 38′ N., Long. 120° 15.4′ E.) unless instructed to wait off the Second Harbour Entrance, in which case they should anchor within a 2.5 mile radius of the Second Harbour Entrance Signal Station (Lat. 22° 33.4′ N., Long. 120° 18.4′ E.). The holding ground at both anchorages is good, and they are sheltered from the worst of the N.E. monsoon winds in Winter. Vessels may have to vacate the anchorages and proceed to sea should a typhoon approach.

Tankers arriving at the SBM terminals should anchor 1.5 miles West of the Buoy No. 2 to await arrival clearance, quarantine, Immigration, Agent and Cargo Supervisor who will board by Agent's launch. CPC Pilot, Loading Master and Watchmen will board by CPC tug. After discharge, the vessel should proceed to the Northern Anchorage to await clearance for sailing.

Also see "Port Limits".

RESTRICTIONS: Container ships can enter and sail 24 hours a d Other vessels up to midnight only. Vessels with max. draft 34 ft. if through the Second Harbour Entrance, must await high water to en via the First Harbour Entrance.

MAX. SIZE: Length and breadth no restriction (largest container s entered: 950 ft. LOA and 106 ft. beam). Max. draft inner harbour 52 during high tide. Tankers with draft over 50 ft. (2 ft. keel clearan discharge at Monobuoy outside.

HEALTH: Free Pratique granted at anchorage after Master comple Quarantine Declaration Form furnished by quarantine doctors. Ra Pratique available (See "Keelung"). No quarantine necessary if seco port in Taiwan.

Shipmaster's Report: Master visited the port in 1976 and Chol Certificates were not requested for inspection.

RADIO/VHF: Kaohsiung Radio (XSW). Normally used by Agents wh cabling vessels. Contact with the Agent and Port Authorities may made via Kaohsiung Port Radio on VHF Channel 16. Call Port Ra on Channels 16/14, 1 hour before arrival to report ETA at Kaohsiu Roads.

Also see "Documents".

TUGS: Harbour tugs usually join vessel after entry and while berthi Ship's lines always used. 20 tugs, 300 h.p. – 3,300 h.p. available.

BERTHING: No specific requirement except bulk-carriers and tank with max. draft of 34 ft. via the First Harbour Entrance, must berth dur high tide.

*Length of each berth. †Total length.

Wharves: There are at present 87 wharves with a total length 18,900 m. and 27 mooring buoys capable of accommodating 129 sh

CRANES: 39 mobile cranes × 15-80 tonnes capacity, 14 stationa derricks, 41 tractors, 117 towing tractors, 271 forklifts, 18 contain gantries, 2 P&H container gantries, 21 straddle carriers, 19 contain tractors, 2 railtainers, 8 transtainers, 84 grab buckets, 60 hoppers a 1,381 small trailers. The CSBC shipyard has 2×350 ton cranes.

4 floating cranes (30 ton, 60 ton, 100 ton and 200 ton), other float equipment includes 5 dredgers, 5 mud barges, 17 barges and 70 sm craft of various descriptions.

BULK HANDLING FACILITIES: *Coal:* China Steel Berth: Max. S 130,000 d.w.t. Max. LOA 320 m. Max. Draft 14 m. 2 cranes, 2 gra and conveyors. Daily rate 10,000 tonnes.

Berths No. 52 – 57: Max. LOA 200m. Max. Draft 10.5 m. Dischar by grabs and ship's gear. Rate 3,500 tonnes per day.

Grain: There are 3 silos, 2×40,000 tons capacity and 1×80,000 to capacity, unloading rate 300 – 500 t.p.h. 105 grabs also used discharge grain by ship's gear at hourly rate of 40 – 50 tons p gang/hour.

CONTAINER HANDLING FACILITIES: No. 1 – total length 848 consists of 4 berths, Nos. 40 – 43. Berths No. 42 – 43 served by 3 gan cranes with capacity 30-35 tonnes. 5 straddle-carriers available for 20 – 40 ft. containers. Storage yard of 10 hectares for 2,500 contai (TEU).

No. 2 – Includes 4 berths total length 1,025 m., Nos. 63 – 66. Be No. 64 – 66 are leased to lines for exclusive use. Berth No. 63 is only common user berth. Container handling equipment inclu 8 gantry cranes with capacity 30-35 tonnes and 16 straddle-carriers handling 20 ft. – 40 ft. containers. Storage yard of 45 hectares 12,000 containers (TEU).

No. 3 – Includes 3 berths, Nos. 68 – 70, with total length of 960 m. and a depth of 14 m. The terminal has 9 container cranes with capacity 40 tonnes, 5 transtainers and a 60 hectares container yard for 17,000 containers (TEU).

No. 4 – Container Terminal No. 4 is located at Chung-Hsing Commercial Harbour Area. The project is to build 7 deepwater container wharves from No. 116 to No. 122 with a total quay length of 2,280 m. The 92 hectare container yard is capable of storing 32,000 containers (TEU). The first Berth No. 116, completed in February 1985, has 320 m. length, 14 m. depth and 4,900 container (TEU) capacity. Its container handling equipment includes 3×40 tonnes container cranes and 3 transtainers for handling 20 ft. – 40 ft. containers. Berth No. 117 is equipped with 2×40 tonne capacity gantry cranes, 4×35 ton transtainers and 1×15 tonne forklift. Berths No. 118 and 119 are equipped with 3×40 tonnes capacity gantry cranes and 3×40 tonne transtainers. Berths No. 120 – 122 (each 320 m.) will be completed by late 1991.

STEVEDORES: All Government stevedores ordered by Agents as required.

Cargo Working Hours:

General Cargo:
0800 – 1200
1230 – 1800
1830 – 2400 (1600 – 2400 plus 100%)
0030 – 0700 (plus 150%) Night shifts only by special arrangement with Harbour Bureau and cargo receivers.

Containers:
0800 – 1200
1230 – 1800
1830 – 2400
0300 – 0700

N.B.: For quick despatch, relief gangs can be hired to work through meal breaks.

Port Performance:

Containers: 25 crane moves per hour.
General: 35 CBM/gang/hour or 420 tons/gang/day.
Bulk (except at special berths): 50 tons/gang/hour.

MEDICAL: No advance notice required unless emergency case. Vaccination Certificates against cholera inoculation (6 months) required.

See "Health" – Shipmaster's Report.

TANKERS: Discharge lines at oil terminal inside harbour 8 in. (2 berths), and 12 in. at Monobuoy outside with necessary reducers supplied from ashore. In latter case, Master must inform Agents size of ship's manifold.

There are 3 Monobuoys situated about 7 miles S.S.E. of the Northern Anchorage. Their positions are:

SBM No. 1 – Lat. 22° 30′ 29″ N., Long. 120° 17′ 49″ E. A white flashing signal light is mounted at the centre of the buoy with a range over 5 miles. The light appears for 1 second and goes off for 2, it then appears for 1 second and goes off for 11 seconds. This cycle is repeated. The area around the mooring buoy has a depth of 66 ft. and can accommodate tankers up to 250,000 d.w.t. The current runs at a maximum of 2.5 knots.

SBM No. 2 – Lat. 22° 29′ 45″ N. Long. 120° 16′ 41″ E. depth around the area about 98 ft. capable of discharging tankers up to 250,000 d.w.t. Characters of signal light mounted at the centre of the buoy: White flash 1 second on and 1 off for 3 times then 1 second on and 8 seconds off in that cycle.

The 2 buoy moorings have facilities for 2×12 in. hose connections. Bunkers and fresh water not obtainable. Stores can be arranged for delivery by boat. Other services available to tankers at the buoys are confined to those of urgent nature.

VLCCs programmed to use the SBM Terminal are required to anchor 1.5 miles West of the No. 2 SBM for arrival clearance. Pilot/Quarantine/Immigration, Cargo Supervisor and his hose-handling party board in this area from a tug. After the discharge of cargo, the vessel is required to proceed to the Northern Anchorage to receive sailing clearance.

SBM No. 3: Max. size 300,000 d.w.t., depth 105 ft. Also see "Shipmaster's Report" dated August 1992.

Petrochemical Storage Centre – Berth No. 61: Max. LOA 232 m. (225 m. preferred) Max. Draft 10.0 m. The berth is being extended and is soon to be equipped with 4 new Chicksans.

LPG: At Talinpu at Southern entrance to Kaohsiung Harbour.

LOA – Maximum 250 m., minimum 130 m. Chicksan flange 23.0 m. above LWL. Liquid line 16 in. Vapour line 8 in. Max. Depth 14.0 m. Discharge rate up to 2,000 kl.p.h. Tank capacity: (C3) 30,000 kl, (C4) 30,000 kl.

Berth	*Shore Lines* (in.)	*Hoses* (in.)	*Grades Handled*	*Max. Pressure* p.s.i.	*Rate* t.p.h.
18 – 20	4 – 16	4 – 8	Asphalt, FO, DO, Avgas, JP4, JP5	100	700
60 – 62	4 – 10	4 – 8	Petrochemicals, LPG, liquid NH_3	100	680
Talin E, W	10 – 24	8 – 12	Crude, FO, DO, Naphtha, JP4, JP5	100	3,000
SBM No. 1	1×34	2×12	Crude	100	5,000
SBM No. 2	1×42	2×12	Crude	100	7,000

N.B.: At SBM derricks/cranes of 10 tons SWL required. There are no tank cleaning or ballast disposal facilities.

Also see "Shipmaster's Report" dated April 1990.

DENSITY: Average 1015 in Summer, 1023 in Winter.

FRESH WATER: Most berths supplied from shore line, otherwise from barge (500 tonnes – 100 tonnes capacity) paying additional lighterage. Advise agent 24 hours in advance by telex of vessel's requirements.

FUEL: All grades, mostly received from 3 barges (capacity 500 tonnes each). Owners must contact suppliers for nomination through Chinese Petroleum Corp. before ship's arrival.

FIRE PRECAUTIONS: No specific regulations, but routine precautions should be enforced.

CONSULS: All in capital city Taipei, 230 miles North of Kaohsiung.

REPAIRS: China Shipbuilding Corp. provide 1,800 m. of quaywall and can handle any kind of repairs.

DRY DOCK: China Shipbuilding Corp. have a dry dock of 950 m. long with breadth 92 m. and average depth of 14 m. This dry dock is separated into 3 stages by 2 intermediate gates in between, of 380/390/180 m. respectively. Each stage can be independently operated to facilitate fabrication of ship sections, as well as to dock and repair ships.

A floating dock "Viva Island" LOA 174 m. with distance between side walls of 30 m. Draft over keel blocks 7.3 m. with lifting capacity of 11,500 tons.

SURVEYORS: S.G.S., Tel: (07) 561-1281. BV in Taipei, Tel: (02) 731-4218.

GANGWAY/DECK WATCHMEN: Recommended, to meet local security requirement.

OPENING/CLOSING HATCHES: Mostly handled by stevedores except steel hinged covers, which are to be done by crew.

CERTIFICATES: Ship's Registry, Load-line, Safety Construction, Safety Equipment, Safety Radio-telegraphy, I.O.P.P. and Derat Exemption Certificates must be inspected by Customs/Harbour Authorities.

CUSTOMS ALLOWANCES: 200 cigarettes or 1 box cigars and 1 bottle of wine or spirit allowed each. Application can be made to break seal for next issue once every 4 days.

CARGO GEAR: Cargo Gear Certificate must be valid.

REPATRIATION: Crew changes can be arranged.

AIRPORT: Kaohsiung Airport has frequent scheduled flights to major cities in Taiwan as well as regular international flights to Hong Kong, Singapore and Japan. For other international destinations, travellers must use C.K.S. International Airport which can be reached by motorway (3.5 – 4 hours) or via Taipei by domestic flight (40 minutes) and motorway (40 minutes).

TIME: Local: GMT plus 8 hours. No alteration during the year.

HOLIDAYS: New Year's Day (Jan. 1st – 2nd); Youth Day (Mar. 29th); Ancestors' Memorial Day (Apr. 5th); Labour Day (May 1st); Dragon-boat Day (5th day of 5th Lunar Month); Mid-Autumn Festival (15th Day of 8th Lunar Month); Confucius' Birthday (Sept. 28th); National Day (Oct. 10th); Taiwan Restoration Day (Oct. 25th); Late Pres. Chiang's Birthday (Oct. 31st); Dr. Sun's Birthday (Nov. 12th); Constitution Day (Dec. 25th); and Chinese Lunar New Year's Day (2 days mostly in Feb.). No work on New Year's Day (Jan. 1st), Labour Day (May 1st) and Chinese Lunar New Year's Eve and New Year's Day. Double stevedoring rates for rest of holidays.

POLICE/AMBULANCE/FIRE: Police and Ambulance: call 5612311 Ext. 441 or 2613000 Ext. 2717; Fire: 5612311 Ext. 443 or 2613000 Ext. 2731.

TELEPHONE: Telephone available for ships alongside wharf.

SERVICES: Laundry, ship-chandler and competent technicians available for repair of radar, radio, compass adjusting and other navigational aids. Tank cleaning equipment and facilities not available.

SHIP SUPPLY SERVICE: Off-limits deliveries can be arranged, although they are the exception rather than the norm.

SHORE LEAVE: Normally can be arranged.

IDENTIFICATION CARDS: Shore passes are issued and must be returned prior to departure.

GARBAGE DISPOSAL: A collection service is available. PVC garbage bags are provided on board. Ordinary collecting time is from 0800 – 1200 hrs. on weekdays (Monday through Saturday). Any ship in port requiring immediate collection service should either call the following telephone numbers: 5519620, 5622104 and hoist the "CD8" flag, or communicate through her agent with the harbour section of the Kaohsiung Harbour Bureau.

Charges: Every vessel whether moored at wharfs, buoys or in the anchorage, shall be charged as hereunder stipulated for harbour cleaning maintenance during its stay, commencing at anchorage until departure from harbour.

Classification	*Daily Rates (NT$)*
Ships less than 5,000 G/T	197
Ships of 5,000 G/T or more but less than 15,000 G/T	375
Ships of15,000 G/T or more	552

50% discount for ships below 500 G/T. 100% surcharge for international passenger or tourist ships. 90% discount for yachts. 30% additional charge on national or legal holidays and Sundays. Carriers shall self-dispose of waste from their holds.

WASTE OIL DISPOSAL: A collection service is not yet available.

SEAMAN'S CLUBS: Seamen's Club Kaohsiung, 30 Peng Lai Road, Kaohsiung, Taiwan, R.O.C. Tel: 07-521-5400. Services available include general information service, postage stamps, foreign exchange, rooms for reading and recreation including bridge games, billiards and MTV, and field tours can be arranged. The Club also offers beer, cigarettes, beverages in the music room, as well as all kinds of local souvenirs.

CURRENCY: New Taiwan Dollar (NT$). NT$ 8,000 may be brought in or taken out of the ROC. Unlimited foreign currency may be brought in and if declared on arrival, may be taken out. Without a declaration, not more than U.S.$ 5,000 in cash or the equivalent in any other foreign currency may be taken out.

REGULATIONS: No curfew exists. Port opened for container ships 24 hours day and night; for other vessels between 0600 – 2300 hrs. only. For vessels, having dangerous cargo on board, and super ore carrier (beyond Panama Max.) desiring of docking at China Steel Corporation's Berth No. 97, between sunrise and sunset only. Vessels flying flag of nations without diplomatic relations with the Republic of China must send 1 copy each of ship's photo (4 in.×6 in. broadside) and photocopy of Registry or Tonnage Cert. and 10 crew lists for application of entry permit. The application must be made 1 week before their arrival.

DELAYS: With rapid extension of the harbour and more new wharves and container terminals built, delay has been considerably reduced and very rarely occurs.

DEVELOPMENTS: An 80,000 ton silo will be built at the rear of Berth No. 72, which, includes continuous mechanical unloaders, take-in and take-out conveying systems, truck-loading device and railway car-loading device.

Construction of Container Terminal No. 5 due for completion in 1997. Terminal will have a length of 2,320 m., providing 3 berths with 16.0 m. depth and 4 berths with 14.0 m. depth.

SHIPMASTER'S REPORT: June 1983 (updated 1986).
Pilotage: Normal pilotage fees are charged from sunrise to sunset; a 50% surcharge is levied from sunset to 2400 hrs., and from 0500 hrs. to sunrise, and 100% surcharge from 2400 hrs. to 0500 hrs. If the Pilot(s) is/are embarked 2 miles or more from the breakwater at the First Harbour Entrance the above charges are doubled.
Immigration: Immigration Officials board with the Pilot/s off the First Harbour Entrance, and will join at any time between 0800 hrs. and 1800 hrs. Between 1800 hrs. and 2400 hrs. they only leave their office on the odd hour, and between 2400 hrs. and 0800 hrs. they only leave on the even hour. Time from leaving office to boarding is approximately 30 minutes.

SHIPMASTER'S REPORT: April 1990.
Berth No. 61:
Operator: CPC.
Max. draft 10.36 m.
Berth either side alongside.
LPG and petrochemicals handled.
LPG arms are 21 m. above water.
Maximum manifold pressure 7 bar.
Maximum ship's tank pressure 0.04 bar.
Cargo temperature required: Propane −42° C. Butane −4° C.
Butane liquid 10 in. Propane liquid 12 in. Vapour for both products 8 in.
Arrangement of arms: Vapour, Liquid, Liquid, Vapour.
VCM liquid 6 in. VCM vapour 4 in.
Berthing and unberthing from sunrise to sunset only.
Berth No. 104:
Operator: CPC.
Max. draft 14.50 m.
Berth port side to.
LPG and oil handled.
1×16 in. arm for liquid, 1×8 in. arm for vapour. Liquid arm is aft of vapour arm.
Cargo temperatures required: Propane −41° C. Butane −3° C.
All communication with the shore is by boat. No ship's personnel allowed through terminal.
Stores, etc., taken from boat during discharge.
Berthing and unberthing from sunrise to sunset only.
Berth No. 25:
Anhydrous ammonia discharged at this berth.
1×8 in. arm for liquid and 1×4 in. arm for vapour.

SHIPMASTER'S REPORT: August 1992.
SBM No. 3: Operator: China Petroleum Company.

Anchorage is West to W.N.W. of SBM No. 2. Upon anchoring, report time of arrival to Kaohsiung Port Control on VHF Channel 16, the time being required by the Agent for Inward Clearance. Pilots are arranged by the Agent, and vessel is informed of boarding time by Agent. No amount of calling on the VHF will get any response.

Pilot boards from a tug together with Surveyors, Mooring Master and hose handling gang, who also assist with mooring to the SBM.

Mooring is only undertaken in daylight hours. The latest time for a Pilot to board and be underway is 1700 hrs.

Unmooring is carried out at any time day or night.

Agent will board at the SBM with Customs, and requires a Crew List to be faxed to them at least a week before arrival for preparation of passes.

Shore leave is dependent on the frequency of the Ferry boat, about two a day.

A tug is normally moored aft whilst at the SBM, but is only done if a tug is available, and weather conditions merit it.

The area is fairly sheltered, but a heavy swell can affect the area, when there is bad weather in the China Sea.

Upon departure, report time to Kaohsiung Port Control.

AUTHORITY: Kaohsiung Harbour Bureau, 62 Lin Hai 2nd Road, Kaohsiung, Taiwan. *Tel:* (07) 561-2311, Ext. 200, 551-3445. *Telex:* 71219 KHB. *FAX:* 07-561-1694. *Contact:* Admiral C.Y. Yuan, Harbour Director. S.I. Ma, Deputy Harbour Director. M.W. Chen, Harbour Master.

Shore Passes (obligatory).
HARBOUR APPROACHES: Vessels shall pay close attention to t strong currents in the port entrance as well as East Breakwa Extension.
PILOTAGE: Compulsory from anchorage to dock and any oth movements in port. Pilot may also meet ships within 1 or 2 nautical mi North of breakwaters, upon Agent's request. While waiting outs breakwaters for a Pilot, vessels shall keep adequate space and ta care of both ship's and Pilot's safety. Before arrival, vessels shall cont Keelung Port Radio Station (Lat. 25° 09′ 42.5″ Long. 121° 44′ 57.5″ E.) via VHF on Channel 12 to ascertain Pilo exact boarding time.
ANCHORAGES: Area in outer harbour is 13.0 m. to 13.5 m. in dep and can only contain 4 ocean-going vessels at a time. Vessels may a anchor outside breakwaters for Pilots or entry instructions.
RESTRICTIONS: Keelung Harbour Bureau Vessel Traffic Con Center (VTCC) consists of Keelung Port Radio Station. Any ship sh apply in advance of her actual entry/exit by light signal or via VHF Keelung Port Radio Station, and shall not leave dock nor weigh anch nor sail, and remain close to harbour entrance before obtaining fro Harbour Bureau VTCC the signal permit to enter or leave.

Pilots berth vessels 0700 hrs. – 2300 hrs. Unberthing at any time.
MAX. SIZE: Max. possible overall length less than 900 ft. Vessels Agents shall declare ETA to Harbour Bureau 24 hours prior to th arrival.
HEALTH: Radio Pratique possible, vessel should advise Number Certificate of Sanitary Inspection. Pratique will be granted when ves is in anchorage. Two measures will have to be conducted by ship, the are: disinfection of ship, sampling of food and water, tetracycline dr for person, if the vessel arrives from an affected area within 5 days.
1. To obtain Free Pratique by radio, the Master is required to ca the following information to Agent within 4 to 36 hours prior to t vessel's arrival at the port.
   (1) Ship's name.
   (2) First port of the voyage and date/time of sailing.
   (3) Name(s) of port(s) and respective departure time, where t vessel called within the last 10 days prior to arrival at Repub of China ports.
   (4) ETA.
   (5) Kind of Derat Certificate, place and date of issue.
   (6) Number of crew and passengers on board.
   (7) If any illness or death occurred within 10 days prior to th vessel's arrival, and if so, give a detailed report.
   (8) If any rat or abnormal death of rats is found on board wi 10 days before the vessel's arrival.
   (9) If there is any shipment of foodstuff on board from an infect area.

(10) Any other information (if any doctor on board, etc.)
(Example:)
mv "....................." (ship's name)/New York 1st Mar 1300/Honolulu 16th Mar/25th Mar 1000/Yokohama 1st Nov 1977 Exemption/Crew 35 Passenger Nil/7 to 10 None

2. Vessels under the following conditions are not allowed to apply for the Radio Pratique:

(1) The interim time from the date when the vessel left the infected area and/or the place where infection is suspected to the date of the vessel's ETA at the Republic of China port, is not over the legal incubative period of infectious disease, i.e. 5 days for cholera, 6 days for plague and yellow fever.

(2) Infectious disease and/or suspected infectious disease and death occurred within 10 days prior to the vessel's arrival in the Republic of China.

(3) When any inactive rat is found or abnormal death of rats is found on board within 10 days prior to the vessel's arrival in the Republic of China.

(4) When the vessel possesses no valid Derat/Exemption Certificate.

3. The Quarantine Officer may still go on board the vessel after her berthing for re-inspection even if the Radio Free Pratique is granted.

If any discrepancy is found twice or more, then the vessel will be deprived of the right to apply for the Radio Pratique for one to three voyages.

4. Fumigation by hydrocyanic acid gas (discoids) and methyl bromide is carried out by quarantine station. Derat Certificate or Derat Exemption Certificate issued also by quarantine station.

5. *(i) Procedures of Ship's Sanitary Inspection:*

(1) The ship company or the agency shall deliver the ship's Pre-arrival Report to the local Quarantine Station of the National Quarantine Service of the Department of Health.

(2) All items of Sanitary Inspection Record will be checked and credits will be given by the Quarantine Officer from the Quarantine Authority during the Harbour Joint Inspection.

(3) Certificate of Sanitary Inspection will be issued to the ship which has passed the Sanitary Inspection.

(4) Before the arrival of a ship with valid Certificate of Sanitary Inspection, the agency shall submit the ship's Pre-arrival Report with the number of Certificate of Sanitary Inspection listed. Then the ship may be exempt from inspection on board if it meets the quarantine requirements.

(5) As soon as arriving at the port, the ship exempted from Sanitary Inspection shall submit Maritime Declaration of Health, Lists of Passengers and Crew, the Import Manifest as well as Derat Certificate or Derat Exemption Certificate to the Quarantine Authority. If the ship fulfils the quarantine requirements, a Certificate of Pratique will be issued according to Section 14 of the Quarantine Regulations.

(ii) Duties of Ship:

(1) Shipmasters with a valid Certificate of Sanitary Inspection shall report to the Quarantine Authority any incidence of sickness or death among the crew or passengers or the abnormal mortality of rats or mice on board directly or thorugh the agency before the ship arrives at the port.

(2) It is unnecessary to hoist the "Q" flag for the ship receiving the Notification of Entry Allowance. But the Shipmaster shall submit all the documents prescribed in 1-(5) directly or through his agency to the Quarantine Authority for examination within 6 hours of arrival (or the next working day if the ship arrives after office hours on that day).

(iii) Duties of the Agency:

(1) Hours before the arrival of a ship with Certificate of Sanitary Inspection, the agency shall submit two duplicates of Ship's Pre-arrival Report with the Certificate of Sanitary Inspection number to the Quarantine Authority. After the copies are reviewed and approved, the Quarantine Authority shall mark them with an "Entry Allowance" stamp and send one copy to the agency to inform the Harbour Joint Inspection Coordination Center and the Shipmaster as well as other related authorities.

(2) The agency shall submit all documents prescribed in 1-(5) and go through the entry procedures as soon as the ship arrives at the port.

(3) The agency shall report any cases of sickness or death of the crew or the passengers or any abnormal mortality of rats or mice to the Quarantine Authority as soon as the reports are received from the Shipmaster.

(4) The agency shall be fully responsible for the prompt delivery of any messages between the Quarantine Authority and the Shipmaster.

RADIO:

1. Call Name: Keelung Port Radio Station is called Keelung Port Radio (or K.P.R.).
2. Channel:
   (1) Channel 14 (156.7 MHz.) is used for Keelung Port Radio Station.
   (2) Channel 12 (156.6 MHz.) is a spare Channel, used for Keelung Pilot Station.
   (3) Channel 16 (156.8 MHz.) is used for distress, safety and emergency calls.
3. Communication Contents:
   (1) Messages for vessels to enter or leave.
   (2) Matters concerning navigation and anchorage.
   (3) Other Emergencies.
4. Communication Distance: Any waters within diameter of 10 nautical miles from this station.
5. Priority:
   (1) Emergency salvage at sea.
   (2) Messages for vessels departing.
   (3) Messages for vessels waiting outside breakwaters for entry instructions.
   (4) Messages for vessels at anchor in outer harbour.
6. Languages to be used:
   (1) Mandarin.
   (2) English.
7. Remarks: Communications always in plain language. Any codes or private conversations are not allowed unless approved by officers in charge.
8. Vessels shall contact Keelung Port Radio Station via VHF as soon as they are 10 nautical miles from the harbour and shall not be considered as "reported" unless answered by the station. The reporting time is to be counted for the basis for allocating berths. The report includes:
   (1) Nationality. (3) Call Letters.
   (2) Vessel's Name. (4) ETA Outside Harbour.
9. Communication Procedures: In accordance with international radio communication procedures.
10. Vessels without VHF or with VHF out of operation and thus unable to report earlier to Keelung Port Radio Station (25° 09′ 42.5″ N., 121° 44′ 57.5″ E.) shall contact the station by light signal until answered, as they report when vessel arrives within the visual scope of Ton Pan Yu Signal Station (domiciled with Keelung Port Radio Station) in the waters outside the harbour. The report includes:
    (1) Nationality.
    (2) Vessel's Name.
    (3) Call Letters.
    (4) Actual arrival time or anchoring time outside the harbour.
11. Vessels unable to report by light signal through lack of power shall use other means to report same information as indicated in item 10 above or hoist vessel's call letters enabling registration at the station.

Keelung Radio (XSW) 500 kHz and 460 kHz. Also on 8 MHz.

RADAR/VHF: No radar service to aid navigation in port. VHF and flashing lamp only used on ship's arrival. However, Pilots carry pocket walkie-talkie's to communicate with tugs and line-men on dock.

TUGS: The Harbour Bureau operates 12 tugs viz., 5×3,200 h.p., 2×2,400 h.p., 2×1,600 h.p. 1×1,200 h.p. and 2×700 h.p. China Petroleum Corporation (CPC) operate 2×3,760 h.p. at their Shen Ao Terminal.

BERTHING: Docking during daytime, and also during night-time if weather permits.

Berths	*Length* (m.)	*Depth* (m.)	*Remarks*
Eastern Berths:			
E2	200	9	Passenger Terminal, Quick Dispatch Berth (QDB) for cargo vessels.
E3	170	9	Quick Dispatch Berth.
E4	306.3	9	General Cargo/Bulk (128 m. private use).
E5	169.2	9	Private use.
E6	180	9	Quick Dispatch Berth.
E7	178	9	General Cargo/Bulk.
E8	240	9	General Cargo/Bulk.
E9-E11	620	12	No. 2 Container Terminal. 5×35 ton gantry cranes.
E12-16	various		Shallow water berths/private use.
E17	95	5	Bulk/Working Boat Berth.
E19	220	9	Container/Bulk.
E20	120	6	Domestic Lines Berth.
E21-22	226	9	Log/General Cargo.
Western Berths:			
W2	204.5	9	Passenger Terminal, General Cargo/Bulk.
W3	183	9	General Cargo/Bulk.
W4	167	9	Quick Dispatch Berth.
W5-W6	185.5	9	Private use.
W7-W8	242.42	8-9	Keelung-Hong Kong Line.
W12B	251	6.5-9	Bulk Wharf/Cement Silo 16,000 tons capacity.
W14	172.4	9	General Cargo.
W15	148.3	9	General Cargo.
W16	156.5	12	W16-W18: No. 3 Container Terminal, 2×40 ton container cranes.
W17	207	12	1×40 ton container crane.
W18	215.4	12	2×40 ton container cranes.
W18B	113.8	8	Bulk Wharf/Cement Silo 9,000 tons capacity.
W19	324.2	12	W19-W26: No. 1 Container Terminal, 3×40 ton container cranes.
W20	325.6	10.5	3×35 ton container cranes.
W21	236.6	10	1×35 ton container crane.
W22-W23	400	11	3×35 ton container cranes.
W24	240	13	1×35 ton container crane.
W25-W26	510	11-13	3×35 ton container cranes.
W27	150	7	Coastal Shipping.
W29	178	4.5-6.5	Coastal Shipping.
W30	180	10.5	Grain Silo 50,500 tons capacity.
W31-W32	330	10.5/11	Wharves for Bulk Cargo but with strengthening to allow discharge of heavy lifts.
W33	210	11.5	Oil Tanker Berth.
W33B	95.8	6.5	Oil Tanker Berth.

In total, there are 40 Operation Berths and 17 private use berths.

3 mooring buoys (No. 5 to No. 7) can accommodate 2 vessels of up to 10,000 tons and 15,000 tons and length overall 200 m.

CRANES: 14 mobile cranes, capacity 15 tons – 100 tons, 182 forklifts 1.5 tons – 25 tons, 8 log carriers, capacity 5 tons – 10 tons, 31 excavators, 5 shovels, 48 mini-tractors, 87 grab buckets, and 3 floating cranes, capacity 30 tons, 50 tons and 60 tons.

Other equipment: 194 forklifts, capacity 1 ton – 25 tons; 5 portable pneumatic unloaders (for grain unloading), and 75 grab buckets and 15 excavators.

SPECIALISED CARGO HANDLING FACILITIES: Wharves No. 16 to No. 26 and East No. 9 to No. 11, for container ships, Ro-Ro ships, and "LASH" vessels. Equipment includes 24 container gantry cranes, capacity 35 tons – 40 tons, 18 straddle carriers, 2 transtainer cranes, 9 stackers, 15 tractors and 22 trailers. Therein, Wharf No. 19 provides 3 super gantry cranes, max. load 40 tons, outreach 47 m., height (from top of rail to under spreader) 33 m., rail gauge 30 m., handling capacity 33 per crane hour.

Wharf No. 30, 3 grain suckers (for grain unloading), capacity 200 t.p.h. – 300 t.p.h. Silo capacity 50,500 tons.

STEVEDORES: According to the stowage plan and cargo details, stevedores are assigned by Harbour Bureau. Work time is divided into dayshift and nightshift.

Cargo Working Hours:

General Cargo and Bulk Wharves:	Container Terminal:
0800 – 1200 hrs.	0800 – 1220 hrs.
1300 – 1800 hrs.	1300 – 1820 hrs.
1900 – 2300 hrs.	1900 – 2320 hrs. – 100% Extra Charge.
0001 – 0300 hrs.	0001 – 0620 hrs. – 150% Extra Charge.

Port Performance:

General cargo up to 40 tons/gang/hr.

Average rate per day 480 tons.

Coal up to 60 tons/gang/hr. Rate per day 1,000-2,000 tons depending on availability of trucks.

Containers – 25 per crane/hr. excluding waiting time.

MEDICAL: All clinics and hospitals in Keelung area with English-speaking doctors. Modern hospitals available in Taipei, 30 km. away.

TANKERS: Bulk oil is discharged at Berth No. 33 and No. 33B which are fitted with 8 in., 10 in., 12 in., 16 in. and 18 in. pipelines. Length: 210 m. and 100 m., maximum draft: 11.5 m. at No. 33 and 6.5 m. at No. 33B.

Average discharge rate 550 t.p.h.

Monobuoys are also situated at Sha Lun, (W. Taiwan), connected to Taoyuan Refinery, at positions:

No. 1 Lat. 25° 09′ 00″ N., Long. 121° 11′ 27″ E.
No. 2 Lat. 25° 08′ 32.4″ N., Long. 121° 10′ 06.3″ E.

Discharge is possible at Sha Lun only under good weather conditions. Pilot boards 1 mile off the S.B.M.

Also see "Shipmaster's Reports", dated April 1990 and November 1993.

DENSITY: 1002 to 1023.

FRESH WATER:

1. Water supply facilities: Every wharf equipped with 2 hydrants of 2.5 in. in diameter, each tap delivering at rate of above 20 t.p.h.
2. Water barges, each barge delivering at rate of over 60 t.p.h.
3. Price:
   (1) Water supplied alongside priced at NT$45.00 (current exchange rate NT$27.00 to U.S.$1.00) per ton.
   (2) Water supplied by barges at NT$80.00 per ton.
4. Application: Ships/Agents shall notify Harbour Bureau as early as possible if they need fresh water.

FUEL: Bunkers available subject to ship's/Agent's advance notice to C.P.C. who operate the bunker facilities. 3 bunker barges available.

FIRE PRECAUTIONS: Special wharves for tankers, Wharves No. 33 and 33B having automatic fire equipment; fire brigade and fire boats available.

CONSULS: None. Mostly stationed at Taipei.

REPAIRS: Any ship which needs repairs must itemise repairs and declare them to Harbour Bureau via shipping company or Agent and then the repairs will be carried out in accordance with the relating articles under The Commercial Harbours Act and Administration Regulations on International Commercial Harbours. As to docking, ships may deal with China Shipbuilding Corp., Keelung Dockyard or Keelung Harbour Bureau repair plant via shipping companies or Agents.

There are over 400 m. of repair wharves, cranes up to 60 tons, plate and machine shops and foundry and a full staff of skilled tradesmen.

Repairs to radio, navigational and electronic equipment can be effected.

DRY DOCK: China Shipbuilding Corp. Keelung Dockyard has 3 dry docks, 2 for vessels under 100,000 tons and another for 25,000 tons. Keelung Harbour Bureau Repair Plant has 1 dock for vessels under 5,000 tons.

SURVEYORS: Surveys of all types can be arranged. Major classification societies are represented.

GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by authorities at gangway free of charge. Other gangway/deck watchmen are recommended.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, excepting new designs on modern vessels.

CUSTOMS ALLOWANCES: (1) Each crew member allowed 200 cigarettes in bulk or half a pound of tobacco. (2) Each crew member allowed 1 opened bottle of wine and 12 cans of beer.

REPATRIATION: Crew repatriation usually carried out through International Airport in Taoyung, and Immigration prefer either individual or group visa for landing crew from ship.

AIRPORT: Taiwan's international airport C.K.S. is 65 km. from Keelung via the Freeway No. 1. Travelling time approx. 1 hour. Flights are available direct to U.S.A., South Africa and most Asian destinations, and for Europe/Australia via Hong Kong, Bangkok or Singapore. Taipei domestic airport (30-40 minutes travelling time) has frequent scheduled flights to most major cities in Taiwan.

TIME: GMT plus 8 hours. No alterations.

HOLIDAYS: New Year's Day (1st–2nd Jan.); Chinese Lunar New Yea Eve and Day (3 days in Jan. and Feb.); Youth Day (29th Mar.); Ances Memorial Day (1 day in April); Labour Day (not a national holiday b only for labourers) (1st May); Dragon Boat Day (1 day in June); M Autumn Day (1 day in September); Confucius' Birthday or Teache Day (28th Sept.); National Day (10th Oct.); Taiwan Restoration Day (25 Oct.); late President Chiang's Birthday (31st Oct.); Dr. Sun's Birthd (12th Nov.); Constitution Day (25th Dec.).

POLICE/AMBULANCE/FIRE: The gangway guard assigned by Harbo Police or ship's Agent will act in emergencies.

TELEPHONE: Local telephones available to be placed on board.

SHORE LEAVE: Crew allowed ashore except for crew members fro People's Republic of China.

IDENTIFICATION CARDS: Passport or other identification papers a needed.

GARBAGE DISPOSAL: Garbage (except cargo waste) should be p in bags properly. Ship's Agent to notify Environmental Protecti Department of Keelung Harbour Bureau. Tel: (886) 4208356 for trans operations. Contact Operations Division of Harbour Bureau Tel: (88 4208287 for charges. Garbage collection and treatment will be charg depending on the tonnage as below:

1. NT$197/per day for tonnage under 5,000 tons. There is a 50 discount for tonnage under 500 tons.
2. NT$375/per day for tonnage 5,000-15,000 tons.
3. NT$552/per day for tonnage over 15,000 tons.
4. Double charge for passenger vessels.
5. At weekends and holidays, there is an additional charge of 30%.

REGULATIONS: Searching for stowaways is strictly carried out arrival and departure.

Discharge of smoke, tank washings, garbage, etc., not allowed.

DELAYS: Keelung has rainfall on about 200 days in a year, port sometimes congested after continuous rain.

GENERAL: Shore pass issued by Immigration for each crew memb on ship's arrival and will be collected on ship's departure. Anyone w loses a shore pass is subject to fine.

DEVELOPMENTS: Pneumatic unloader equipment for coal, capac 800 tons per hour, with 40,000 tons transit space to be built.

SHIPMASTER'S REPORT: April 1990 (Updated 1994).

Berth: Shen Ao.
Operator: CPC.
Maximum draft 10.80 m. (Winter) and 11.80 m. (Summer).
Max. LOA 225 m.
Max. Displacement 50,000 tonnes.
Berth starboard side alongside.
Port anchor used for berthing.

The berth is exposed to the N.E. monsoon (October to March) a delays due to winds (up to Force 9), and heavy swell can be expect in this period.

Sunrise to sunset movements only. The area is subject to fog in t mornings which can cause delays.

Arrangement of discharge arms for LPG said to be, from forwa Propane vapour, Propane liquid, Butane liquid, Butane vapour, but practice the products are interchangeable.

Storing at this berth is not recommended as the long, narrow walkw makes transport difficult.

SHIP'S OFFICER'S REPORT: November 1993.

Berth: Shen-ao.
Operator: CPC.
Maximum Draft: 10.80 m. (Winter) and 11.80 m. (Summer).
Maximum Displacement: 50,000 tonnes.
Maximum LOA: 225 m.

Between buoys and berth all dredged to 13.0 m.

When entering, leading green light bears 229°(T) from positi Lat. 25° 07.58′ N., Long. 121° 40.72′ E.

Starboard side alongside using port anchor.

When leaving the berth, anchor chain should be brought up 2 – 3 shackles on deck after which the Pilot will disembark.

Ling Hsing Mole can be passed safely at 30 m. off.

Delete soundings "8.1", "10", "8.4" meters 0.5 cables N.W. of Li Hsing Mole.

Two tugs of 3,400 b.p.h. (Voith-Schneider type) can be ordered VHF Channel 10.

During docking, tugs will be made fast on starboard side fore and a

Deck watch should attend to moorings all the time, due to sea swe specifically during N.E. Monsoon.

AUTHORITY: Keelung Harbour Bureau, Harbour Building, No. 1 Chu Cheng Road, Keelung, Taiwan, Republic of China. *Tel:* 886-2-423691 *Cables:* Kehbroc Keelung. *FAX:* 886-2-4284811, 428481 *Contact:* Cheng-Ming You, Harbour Master, Ching-Terng Huan Director.

AGENT: Jardine, Matheson & Co. Ltd, 4, Second Floor, Chung Che Road, Keelung. Tel: 886-2-4230161/4. Telex: 32187 Jardines. Fax: 88 2-4266371.

Associated with Jardine Shipping Agencies.

SUAO: 24.36 N. 121.52 E. (See Plan)

PORT LIMITS: Radius of 1 mile from North Point Lighthouse.
DOCUMENTS: Ship's Register, Derat Certificate, Last Port Clearance, Taiwan Tonnage Dues Certificate (valid 1 year), Crew List (8 copies), Stores List, Vaccination List and Yellow Book, Foreign Currency in Safe, Narcotics List, Bills of Lading, Manifest of Inward Cargo, Manifest of Through Cargo, Mail and Parcels List. Also see "General".
Distribution:
Quarantine Station: One copy each of Health Declaration, Crew List, Ports of Call, Manifest of Inward Cargo, Manifest of Through Cargo.
Customs Office: One copy each of Arms and Ammunition List, Narcotics List, Foreign Currency List, Parcels List (including Landing Parcels and Through Parcels), Stores List, Crew List, Specimen Signatures of Master and Chief Officer, Taiwan Customs Tonnage Dues (can be purchased from the Customs Office), and 3 copies each of Manifest of Inward Cargo and Manifest of Through Cargo.
Immigration Office: One copy each of Crew List, Arms and Ammunition List, Manifest of Inward Cargo, Ports of Call List.
Port Authority: One copy each of Crew List, Manifest of Inward Cargo, Manifest of Through Cargo.
Local Shipping Agent: One copy each of Ship's Particulars, Crew List, Manifest of Inward Cargo, Manifest of Through Cargo, Ports of Call.
APPROACHES: If approaching from the North or East, Kui Shan (Turtle Shaped) Island, 15 miles N.N.E. of the harbour entrance, provides a good landmark, with its 408 m. elevation.
San-Shien-Tai Island (30 m.), 1 mile E.N.E. of the entrance, is a good leading mark, and vessels should make their approach from the S.E., clearing the island by half a mile, before turning to enter. A 4.7 m. shoal exists about 450 m. S.W. of the island and another lies to the N.W. A red light sector marks danger areas near the entrance. The channel depth at the entrance is 22 m. The inner channels have depths of 15 m. to the North and 10 m. to the South.
PILOTAGE: Compulsory. Pilot boards at outside anchorage position (Lat. 24° 35′ 20″ N., Long. 121° 52′ 30″ E.). Hoist "G" flag. Daytime service only available.
ANCHORAGES: Water area from North shore to South shore, depth 14 m. to 31 m. and outer depth over 30 m. Ship may anchor and remain outside breakwater when waiting for Pilot or entry instructions.
RESTRICTIONS: Permission to enter must be granted by the Port Authority, ship's Agent should give ship's ETA to Port Authority of Suao 24 hours before arrival. Port closes from 2301 hrs. to 0200 hrs. daily.
MAX. SIZE: Max. draft 14 m. and LOA less than 290 m.
HEALTH: Radio Pratique possible (See "Keelung"). Quarantine will clear vessel in anchorage area. Stool test will be conducted if vessel arrives from an affected area within 5 days.
RADIO: Radio Suao, send cables to Harbour Master Suao, or Agent. Report ETA, draft, etc.
VHF: Channel 14 – 156.7 MHz for calling. Call sign "Suao Harbour Radio".
TUGS: Port Authority tugs assist with mooring and unmooring. Ship's lines used. 5 tugs, 2×2,400 h.p., 1×1,600 h.p., 1×1,200 h.p. and 1×1,000 h.p.
BERTHING: Docking during daytime, departure also during daytime, but sometimes at night time if permission granted from Authorities. Pilot compulsory. Vessel usually anchors in outer harbour for Pratique and inspection.
Deep water wharf 2,610 m. (13 berths) capable of accommodating vessels up to 298,000 d.w.t.

Wharf No.	*Length (m.)*	*Depth (m.)*	*Designed Depth (m.)*	*Uses*

11W	175	8.5	9.0	General Cargo
12W	200	8.5	9.0	Breakbulk
13W	180	8.5	9.0	Breakbulk

CARGO HANDLING FACILITIES: The port has no special facilities, 1 gantry crane for handling container cargoes. For the present time ship's derrick only for logs, timber, cement and general cargo.

Grabs:	9×3.5 cu.m. (3.5 tonnes each).
	12×2.2 cu.m. (1.8 tonnes each).
	6×4.5 cu.m.
Fork Lifts:	7×3 tonnes.
	2×2 tonnes.
	1×5 tonnes.
	2×7.5 tonnes.
	1×15 tonnes.
Mobile Cranes:	2×25 tons
	1×30 tons
	1×8 tons
	2×10 tons
Shovels:	2×3 tons (Bulldozer)
	2×1.2 tons
	2×1.7 tons.

STEVEDORES: Arranged by local Agent. Working hours: 0800 – 1200, 1300 – 1700, 1800 – 2300 and 2330 – 0300.
MEDICAL: Clinics with English speaking doctors available, modern hospitals available in Lotung, (St. Mary's Hospital, sponsored by Catholic Society) Ilan and Taipei by train or by car, 20 minutes, 30 minutes and 2 hours away respectively.
DENSITY: 1025.
FRESH WATER: Available by barge or alongside, subject 24 hours' advance notice.
FUEL: Supplied by one self-propelled barge.
CONSULS: None.
REPAIRS: Minor repairs can be carried out in port.
DRY DOCKS: Length 165 m., width 23.7 m., depth 7.7 m. Vessels under 10,000 g.r.t. can be accommodated.
GANGWAY/DECK WATCHMEN: Harbour policeman always assigned by Authority for gangway, free of charge.
OPENING/CLOSING HATCHES: Normally carried out by stevedores.
CERTIFICATES: International certificates, Register, Safety Equipment, Safety Construction, Safety Radio, Load Line, Cargo Gear, etc.
CUSTOMS ALLOWANCES: Each Crew member allowed 200 cigarettes for own use and 1 bottle of wine for entertaining and for own use, Master enjoys some privileges and can keep additional cigarettes for entertaining.
REPATRIATION: Crew repatriation usually carried out through international airport in Taoyuan, near Taipei. Application to be made to Keelung Harbour Bureau.
AIRPORT: International airport in Taoyuan, 3.5 hours by car from port.
TIME: GMT plus 8 hours. For local time check in Chinese, dial telephone 117 (free of charge).
HOLIDAYS: New Year's Day (January 1st), Youth's Day (March 29th), Late President Chiang Kai-Shek's Death – Memorial Day (April 5th), Labour Day (May 1st), Dragon-Boat Day (May 5th of Lunar Calendar), Mid-Autumn Festival (August 15th of Lunar Calendar), Birthday of Confucius (September 28th), Double Tenth Day (October 10th), Recovery Day of Taiwan (October 25th), Late President Chiang Kai-Shek's Birthday (October 31st), Birthday of Dr. Sun Yet-Shen (November 12th), Constitution Day (December 25th), Eve of Chinese New Year's Day (December 29th or 30th of Lunar Calendar), Chinese New Year's Day (first day of Lunar Calendar).
POLICE/AMBULANCE/FIRE: The gangway guard assigned by Harbour Police or ship's Agent will act in emergencies; in case of fire dial 119. Police and ambulance dial 110.
TELEPHONE: Local telephones available to be placed on board.
SHORE LEAVE: Crew allowed ashore, except for crew members from Communist countries.
IDENTIFICATION CARDS: Shore pass for foreigners issued by Immigration Office according to the passport or other identification papers.
REGULATIONS: Crew cannot shelter any unlawful person on board. Searching for stowaways is strictly carried out on arrival and departure.
DELAYS: Port is sometimes congested after continued rain and delays of a few days may be caused.
GENERAL: 3 Crew Lists sent by airmail from last port to Agent. Shore pass issued by Immigration Office for each crew member on ship's arrival and will be collected on ship's departure.
AUTHORITY: Suao Harbour Bureau, 3rd Floor, Suao Port Building, Suao, Ilan, Taiwan, Republic of China. *Tel:* 039-972001, 965121. *Contact:* J.Y. Wang, Port Director.

AGENT: Sub-Agent controlled by: Jardine, Matheson & Co. Ltd.,13/14th Floor, World Trade Building, P.O.Box 81, 50 Hsin Shen South Road, Section 1, Taipei. Tel: (02) 393-1177. Telex: 21851, 11391 Jardines. Cables: "Jarocean Taipei". Fax: (02) 3413168, 3920435, 3931160.
Associated with Jardine Shipping Agencies.

TAICHUNG: 24.18 N. 120.29 E. (See Plan)

PORT LIMITS: In radius of 1.5 miles from centre of the entrance between North and South Breakwater.
LOCATION: Exact position of Port – Lat. 24° 17′ 40.3″ N., Long. 120° 29′ 27.3″ E.
DOCUMENTS: *Required by Quarantine Station:*
1 copy Health Declaration.
1 copy Crew List.
1 copy Passenger List.
1 copy Ports of Call List.
1 copy Manifest of Inward Cargo.
1 copy Manifest of Through Cargo.
1 copy Derat Certificate.
1 copy Certificate of Sanitary Inspection.
Required by Customs Office:
1 copy Arms and Ammunition List.
1 copy Narcotics List.
2 copies Foreign Currency List.
3 copies Parcels List (1 for landing parcel, 2 for through parcels).
1 copy Stores List.
2 copies Crew List.
2 copies Mail List.
2 copies Passenger List.
4 copies Manifest of Inward Cargo.
4 copies Manifest of Through Cargo.
1 copy Personal Effects List.
1 copy Log List (for log ships only).
1 copy Ship's Register.
Required by Immigration Office:
2 copies Crew List.
2 copies Passenger List.
1 copy Arms and Ammunition List.
1 copy Narcotics List.
1 copy Manifest of Inward Cargo.
Required by Port Authority:
1 copy Crew List.
1 copy Passenger List.

Besides above documents, ship's Master should present Certificates of Ship's Registry, Safety Equipment, Safety Construction, Safety Radio and Load Line to the Port Authority for inspection.

Required by Local Shipping Agent: One each of Ship's Particulars, Crew List. Last Port's Name and Leaving (Last Port) time should be forwarded by airmail to the local Agent.

APPROACHES: Daytime entry only.

The entrance channel has a minimum depth of 13 m. (MLWS), is 1,600 m. long and 300 m. wide in a direction of 115° (T). Sometimes strong cross currents exist outside the breakwaters. In strong winds, the pilot vessel may be unable to leave the shelter of the breakwaters and vessels must pick up the Pilot inside the harbour entrance (See "Pilotage"). There have been groundings outside the harbour but these all appear to have been the result of bad navigation or the neglect of basic precautions.

PILOTAGE: Compulsory. At anchorage hoist "G" flag, contact Taichung Port Radio on VHF Channel 14. Pilots board about 1 mile off the end of the breakwaters. In the winter, however, the pilot launch is sometimes unable to leave the shelter of the breakwaters, and the Pilot must embark inside the breakwaters. Alternatively, if sufficient notice is given, vessels may pick up a Taichung Pilot off either Keelung or Kaohsiung. When it is known that bad weather exists off Taichung, this latter course of action is recommended to avoid possible berthing delays and danger to the ship.

ANCHORAGE: Water area in port limits, except entrance channel can be used for anchoring, depth from 12 m. to 20 m. Ship may anchor and remain outside breakwater when waiting for Pilot.

RESTRICTIONS: Permission to enter must be granted by signal station. Ship's Agent to report ETA to Port Authority 24 hours before arrival.

MAX. SIZE: Max. draft 13 m., LOA no limit.

HEALTH: Radio Pratique acceptable. If Radio Pratique is accepted, vessel can berth directly. If vessel arrives from a cholera affected area within 5 days, Quarantine will be conducted in the Turning Basin.

Also see "Keelung".

RADIO: Via Radio Taichung (XSW2) or Radio Keelung and Radio Kaohsiung. Send cables to Agent or Harbour Master Taichung for reporting ETA, draft, etc.

RADAR: No radar service to assist navigation in port.

VHF: Call sign "Taichung Port Radio", Channel 16 (156.8 MHz) for calling purpose, Channel 14 (156.7 MHz) for message exchange, Channel 12 (156.6 MHz) for harbour craft and pilot on duty. Pilots use walkie-talkies to communicate with tugs and mooring men.

TUGS: Authority tugs assist mooring and unmooring, ship's line used. 9 tugs, 800 h.p. – 3,400 h.p.

BERTHING: Wharves 1 and 3, depth 13 m., each length 250 m., total 500 m. for grain cargo, discharged by shore grain unloaders.

Wharf 2, depth 13 m., 250 m., for bulk cargo.

Wharf 4, depth 11 m., length 200 m., for liquid cargo (molasses and chemicals).

Wharf 4A, depth 9 m., length 185 m., for logs and cement.

Wharf 5A, depth 11 m., length 220 m., for general cargo.

Wharves 5, 6, 7 and 8, depth 11 m., length 800 m., for general cargo.

Wharf 8A, depth 11 m., length 260 m., for general cargo.

Wharf 9, depth 14 m., length 260 m., for containers.

Wharves 10 and 11, depth 13 m., length 640 m., for containers (See "Shipmaster's Report" – 1982).

Wharves 12 and 13, depth 11 m., length 400 m., for general cargo.

Wharves 14 and 15, depth 10 m., length 360 m., for general cargo.

Wharves 23 and 24, depth 10 m., length 360 m., for general cargo.

Wharf 25, depth 11 m., length 200 m., for general cargo.

Wharves 26 and 27, depth 11 m., length 400 m., for general cargo (Cement – Wharf 27).

Wharf 28, depth 11 m., length 145 m., for cement.

Wharf 29, depth 14 m., length 250 m., for coal (coal unloader is planned) (See "Shipmasters' Reports" – 1982 and 1987).

Wharves 31 and 32, depth 14 m., length 600 m., for containers.

Wharves W1 and W2, depth 13 m. and 14 m. respectively, length 250 m. each, for petroleum and chemical products.

Wharves No. W 101 and W 102, depth 18 m., length 340 m. each, for coal handling.

(For their locations see "Plan").

CRANES: 1 mobile crane up to 40 tons capacity, 3 mobile cranes of 35 tons capacity, 1 mobile crane of 30 tons capacity, 1 mobile crane of 140 tons capacity. Large supply of forklifts, hoppers, grabs, electro magnets, conveyors, etc.

SPECIALISED CARGO HANDLING FACILITIES:

Container Terminal: Wharves 10 and 11. Each has 1×35 ton quay-side container crane.

Grain: Grain Elevators installed at Wharves 1 and 3, each silo capacity 60,000 tons. 2 unloaders, 400 t.p.h. each at Wharf 1 and 2 unloaders, 650 t.p.h. each at Wharf 3.

STEVEDORES: Stevedores and equipment can be hired from the Taichung Harbour Warehousing & Stevedoring Co., Teh-Long Warehousing & Stevedoring Co. and Taichung Harbour Bureau Marine Terminal Operations.

Cargo Working Hours:
0800 – 1200
1300 – 1700
1800 – 2300 (plus 100%)
0000 – 0600 (plus 150%)

Port Performance: General cargo 200 tons/gang/day. Bulk (other than grain silo) 300 tons/gang/day.

MEDICAL: Clinics and hospital with English speaking doctors available at town of Wuchi near the port.

DENSITY/TIDE: 1025/High tide and low tide average difference 3.74 m., when alongside pier keep watch on moorings.

FRESH WATER: Available alongside and by water tender with capacity 300 tons. No limitation on quantity.

FUEL: Ordinary bunkers available but 24 hours' advance notice required. Fuel barge (550 tons) operated by C.P.C.

CONSULS: None.

REPAIRS: Minor repairs can be carried out in port.

GANGWAY/DECK WATCHMEN: Harbour policeman always assign by authority at gangway free of charge.

OPENING/CLOSING HATCHES: Normally carried out by stevedor except new designs on modern vessels.

CUSTOMS ALLOWANCES: Each crew member allowed 200 cigaret and 1 bottle of wine for own use. Bonded store will be sealed on arriv

REPATRIATION: Crew repatriation usually carried out throu international airport in Taoyuan near Taipei, or Kaohsiung, abo 200 km. from this port.

TIME: GMT plus 8 hours. For correct local time dial Tel: 117, time rep in Chinese, free of charge.

HOLIDAYS: Commemoration Day of the Republic of China and N Year's Day (1st and 2nd January), Lunar New Year's Eve and Spr Festival (3 days late in January or early February), Youth Day a Chinese Martyrs' Day (29th March), National Tombs' Sweeping Day a Death of President Chiang Kai-shek (5th April), Labour Day (1st M for labourers only), Dragon Boat Festival (one day in June), Mid-Autu Festival (one day in September), Confucius' Birthday and Teacher D (28th September), National Day (10th October), Taiwan Restoration D (25th October), Chiang Kai-shek's Birthday (31st October), Dr. Sun Sen's Birthday (12th November), Constitution Day (25th December)

Cargo work can be arranged on holidays except Lunar New Yea Day, Labour Day, Dragon Boat Festival (only afternoon) and M Autumn Festival (only afternoon).

POLLUTION: Discharge of tank washings, etc., in port is prohibited (A see "Regulations – Harbour Bureau Notice").

POLICE/AMBULANCE/FIRE: Call Taichung Harbour Police T 6562394 or Liaison Centre of Taichung Harbour Bureau Tel: 65621

TELEPHONE: Local telephone available to be placed onboard.

SHORE LEAVE: Crew allowed ashore, except those from Burma, Cu mainland China and North Korea.

IDENTIFICATION CARDS: Not required, however passports or ot identification papers must be submitted for request of a shore pass.

GARBAGE DISPOSAL:

(1) This port owns a garbage truck for garbage and waste dispos The service starts from dawn.
(2) The garbage truck will collect the garbage from the galley or tra from crew's quarters only. The waste from the ship's holds or rep work shall be cleaned and transported out by truck at ship's o expense.
(3) Ship applying for garbage collection must put garbage into sea bags and piled up for the convenience of handling.
(4) For service Tel: (04) 656-2611, Extension 352 or 367.

WASTE OIL DISPOSAL: See "above".

Ships are strictly prohibited to dump waste or bilge oil into the s while in the port. The violator will be prosecuted according to t regulations for ship's waste disposal control.

SEAMAN'S CLUBS: Seaman's Service Centre may be consulted abo seaman's affairs. Tel: (04) 656-6119.

CURRENCY: New Taiwan Dollar. U.S.$ 1.00 = NT$ 26.37 (8.4.94).

REGULATIONS: Searching for stowaways is strictly carried out arrival and departure.

Harbour Bureau Notice:

1. Please show your shore pass together with your hand-carr articles to the gangway guard when going ashore and to the gate pol when coming aboard.

2. Photographing of the harbour, storing of explosive articles a displaying of fire crackers in the harbour area are prohibited.

3. Before obtaining a boarding pass which can be applied for you your ship's agency, you are not allowed to board another ship with yo shore pass.

4. Before going ashore, read over carefully the notice on your cr shore pass and comply with it.

5. Be sure not to lose your shore pass, nor should it be used others, since it is an important official document. If shore pass is lo the ship's Master must write an official note.

6. To avoid getting lost, keep in your mind the number and locati of the wharf at which your ship is alongside, and in case the location the ship is shifted contact your ship's Agent.

7. Always maintain aboard your ship a sufficient number of crew case of emergency.

8. For the prevention of stowaways, thefts and accidents, cre quarters and passenger cabins should be kept locked before their sho leave.

9. Pumping wasted oil and throwing rubbish into the water, exhausting thick smoke in the port area shall be subjected to a hea fine.

10. For the protection of foreign copyrights, pirated editions of fore books and records are not exportable.

11. Unless an application is approved by the Customs, any taxab article should not be taken off the ship, while each crew member allowed to carry ashore 2 opened packs of duty free cigarettes, 10 ciga or 2 ounces of tobacco.

12. Whenever you need assistance, please feel free to call 65623 6564334 or 6565849, ext. 275 upon which the Foreign Affairs Divis of the Harbour Police is obliged to serve you.

13. For further information, please consult directly with your Agen or Authorities concerned, as the rules contained in this notice may revised at any time.

Thank you very much for your co-operation.

GENERAL: Recommended chart: Chinese Navy Chart No. 0357, T Chung Kang.

DEVELOPMENTS: The 2nd phase project with an expansion of t commercial harbour and a new industrial harbour will be carried o soon. The North breakwater is being extended by 850 m., complet 1995.

SHIPMASTER'S REPORT: November 1982 (Updated 1994).

Stevedores: Cargo work: Around the clock. 0800 – 1200 hrs., 1300 – 1700 hrs., 1800 – 2300 hrs. and 0000 – 0600 hrs.

Health: Cholera still declared in Radio Pratique. If certificates are out of date, Radio Pratique is not acceptable.

Customs: Issues can be made after 5 days.

VHF: Pilots and Port Radio also officially work Channel 16 but we only make contact on Channel 14.

Berthing: No. 11 (Container Berth) is completed (Extension of No. 9 and 10)

Consuls: No British Consul.

Airport: Nearest airport at Taoyuan.

Report: This is a new port midway up the West coast of Taiwan. Plans for very extensive developments are at present in hand, stage one has been completed.

The Western coast is low lying and exposed. During N.E. monsoon season, when cold front comes from mainland China, the wind can be very strong, ships are advised to go South or North so that the Pilot may be taken off at Kaohsiung and Keelung. The water shelves fairly slowly and I am given to understand that in bad weather Panamax vessels anchor 2 miles West of port entrance, holding conditions not known. We were fortunate with calm conditions and anchored 5 cables S.W. of Breakwater South Light for a short period with no difficulties.

Pilot boards from launch outside and 1 tug is normally taken outside. VHF Channel 14 is used. They also use walkie-talkies to contact Harbour Control and tugs. Panamax vessels normally berth during daylight hours but may sail at any time. Pilot seemed competent and had an Assistant/Trainee Pilot with him. (September 1987: Pilot disembarks inside breakwater. Vessel must attain good speed and allow for set and N'ly wind when passing between Inner Breakwater and Outer Breakwater.)

Depth of Water: Vessel berthed at half tide with 12 m. draft. Grain silo 13 m. Berth No. 10 depth 13 m. Berth No. 9 depth 14 m. Dredging being carried out. Rise and fall of tide 3.5 m. depth 4.0 m. Dock water density Berth No. 10 found to be 1023.

Tugs: 7 tugs 1,600 h.p. – 3,400 h.p. Ship's ropes used. Normal conditions for Panamax, 1 tug each end.

Berths: Berth No. 10 (Berth No. 9 is similar) is a brand new container berth with 2 gantries for containers. Berth used for bulk coal discharge into lorries until new coal berth constructed. (Berth still not constructed in September 1987). Large flat area. Mooring bollards set at jetty edge every 23 m. A further set of unequally spaced large bollards are set along line 34 m. in from jetty. When mooring 4 head/stern lines, 2 springs and 2 long breasts each end are recommended. We experienced winds of over 30 knots off berth for short period, nobody seemed at all surprised, so would suggest this is reasonable tie-up.

Discharge: As stated this is a container berth. Panamax vessel with side opening hatches, port side to. Hatch centre stops and minor hatch fittings burnt off. Centre piece of hatch rail track tack welded on. Both hatch lids moved to starboard side. Section of ship's side rail in line with hatch burnt off. (This method not used on Berth No. 29). Wood sleepers placed on deck and mobile cranes lifted on board, 1 per hatch. These use small 4 – 5 ton grabs and discharge into lorries. Small bulldozer type vehicle put in each hold to move cargo to port side. Preparation about 1 day, discharge 9 days, replacing of pieces, etc., 1 day.

Bunkers: Heavy oil and diesel available by barge.

Lub. Oils: Most available, plenty of advance notice required.

Fresh Water: Available, from jetty or barge.

Repairs: Ship repairs undertaken with a 10,000 ton dry dock.

Money: Only New Taiwan Dollars available. U.S. Dollars can NOT be obtained. Obtain any other requirements at previous port.

Immigration: For non-Taiwanese crew this is a problem, including Hong Kong, British and Indian. If any crew changes expected give plenty of notice. Visiting Hong Kong shore staff such as Superintendents, etc., required to renew dock pass every 2 days. Crew issued with shore pass (with photo for Chinese ratings) this has to be shown at dock gate outward and inward. Passes collected in on sailing, loss of pass results in fine on holder.

Stores: Victualling, fresh fruit and vegetables, reasonable price and good quality. Milk, meat, European style tinned goods all up to Chinese National Standard (CNS). Chinese dried foods, etc. appear good.

Beer can be obtained but not spirits or foreign cigarettes.

Customs: One person at least, around all the time. Bond and beer locker sealed. Issue will be given after 5 days in port, but give plenty of notice.

Certificates Required: Register, Loadline, Safety Equipment, Safety Construction, Radio Safety, Derat, Liferaft.

Documents: Crew List, 10 copies. Crew Manifest, watches, etc. and including foreign money. List of Stores. Deck, Engine, Victualling, Bond, Arms & Ammunition List, Narcotics List, Arrival Report, Declaration of Health, Departure Report (these three their forms). Specimen signature Master and Mate, General paperwork, large amount for any purpose. If landing spares or items for overhaul (motors rewound, etc.) give plenty of notice.

Medical Facilities: All available.

Drugs: Do not appear to be a problem in this port.

Grain Silo: I was informed that usual discharge rate is 5,500 – 6,000 tonnes per day.

Radio Station: Taichung Local. 24 hour watch M/F, W/T no difficulties encountered.

Cameras: Not to be taken ashore.

Walport: Possible to change video tapes. NOT films.

Telephone: Placed on board.

SHIPMASTER'S REPORT: September 1987 (Updated 1990).

Vessel berthed at Berth No. 29.

There are still no bulk discharge facilities at the port.

The method used in the Shipmaster's Report (November 1982) for Berth No. 11 is still used, but the ship's rails were not cut away. Rigging and cutting took about 12 hours, and all 7 mobile cranes in operation from the deck after 24 hours.

On completion of discharge, hatches were completed at irregular intervals, due to machine downtime, etc. Rewelding and rigging carried out as discharge continued and the interval between completion of discharge and completion of hatch repairs was about 2 hours.

Arrangements were made for Class Surveyor to inspect and issue certificate at end of work but this was not done efficiently.

The rate of discharge varied between 5,500 t.p.h. – 6,000 t.p.h., variation being due to very heavy rain and typhoon. The average rate per hatch per day was approximately 800-900 tons.

SHIPMASTER'S REPORT: January 1990.

There are no gantry cranes for discharging of coal cargoes at the port. For a Panamax size vessel both the hatch covers, port and starboard, are shifted to one side. As we were starboard side alongside both our hatch covers were shifted towards extreme portside. In this case only half hatch was open throughout cargo operations.

Mobile cranes were placed on the main deck with dunnage underneath. Each crane had a 2 tonne lifting capacity and discharge is in to lorries on the quay. The discharge rate is about 1,000 tonnes/day per crane. This method of discharging will be used until the new berth, which will be equipped with cranes and conveyors, is ready in 1992.

The outgoing pilot disembarks inside the inner breakwater. Ships must pick up sufficient speed to counteract the wind/current between the inner and outer breakwaters.

AUTHORITY: Taichung Harbour Bureau, No. 2 – Section 3, Chung-Chi Road, Wuchi, Taichung County, Taiwan, Republic of China. *Tel:* (04) 656-2611. *Cables:* Taiwan Wuchi 7686. *FAX:* (04) 6571375, 6572300. *Contact:* Mr. Ding-Hsun Hsiaou, Harbour Master.

AGENT: Sub-Agent controlled by Jardine, Matheson & Co. Ltd., 13/14th Floor, World Trade Building, P.O. Box 81, 50 Hsin Shen South Road, Section 1, Taipei. Tel: 886-2-3931177. Telex: 21851/11391 Jardines. Cables: Jardines. Fax: 886-2-3413168, 3920435, 3931160.

Associated with Jardine Shipping Agencies.

NOTES

Please also advise Shipping Guides Ltd.

Tanzania

CHAKE CHAKE: 05.14 S. 39.46 E.

DOCUMENTS, HEALTH: Refer to "Zanzibar", where vessel required to call for clearance by Port Officals.
PILOTAGE: Not compulsory, but restricted to daylight only.
RESTRICTIONS: Entrance approached through Owen Channel or through passage between Mesale Island South and Ras Kingojelin. Depths from 10 to 22 fathoms but there are patches of 2.5 fathoms. Narrowest part of channel is 1.5 cables wide.

Vessels may enter and leave at any state of the tide, but in daylight hours only.
ANCHORAGES: No mooring buoys. Vessel's work cargo to lighters. Depth decreases to 3 fathoms for coastal anchorage off Ras Banani.
MAX. SIZE: 170 ft. length, 15 ft. draft.
TUGS: Not available and not required.
FRESH WATER: Not available.
FUEL: Not available.
STORING: Very limited facilities and it is recommended that where necessary all storing be done in Zanzibar.
AUTHORITY: See "Zanzibar".

DAR-ES-SALAAM: 06.50 S. 39.17 E. (See Plan)

PORT LIMITS: The Port of Dar-es-Salaam includes all tidal waters enclosed by a boundary which, commencing at high water mark at a point S.E. of Ras Koronja (approximately 9.66 km. East of the City of Dar-es-Salaam), follows a straight line due North to the West tip of the Outer Sinda Island. Thence a straight line to Makatumbe Lighthouse, thence a straight line drawn to South tip of Mbudya Island, thence a straight line drawn 254° to the high water mark at a point on the mainland South of the entrance to Mto Peremji. Thence following the high water mark around Msasani Bay, Dar-es-Salaam Inner Harbours to the first point due South of Outer Sinda Island.
DOCUMENTS:
Health Certificates (forms supplied by Pilot).
6 Crew Lists.
10 Passenger Lists.
Ship's Manifest.
Heavy Lift List.
Dangerous Cargo List.
Ship's Register.
Declaration and Advice of Consumable Stores (Form C-7 supplied by Customs).
Crew Declaration (Form C-8 supplied by Customs).
Shipmaster's Report: March 1981.
Declaration of Health.
1 Set of Vaccination Lists.
7 Crew Lists.
6 Passenger Lists.
Clearance from Last Port.
Ship's Register (Copy).
Dangerous Cargo Manifest.
Stores List (Form C-7).
Crew Declarations (Form C-8).
Parcel List (Form C-3).
Ship's Record & Master's Report (Form EAH-6007) (To Pilot).
Entry Report (Nasaco Form).
Departure Report (Nasaco Form).
Shore Pass (Form TIF 10).
PILOTAGE: Compulsory South of Makatumbe Lighthouse for all vessels over 200 n.r.t. The pilot launch shows the conventional day and night signals. Vessels wishing to enter must await the arrival of the pilot launch at the Outer Anchorage, and, if necessary, must anchor clear of the leading marks.
ANCHORAGES: Anchorage outside in 7 – 8 fathoms, sheltered by Makatumbe Island during S.W. monsoon but exposed to swell in N.E. monsoon.
Shipmaster's Report: In good weather tankers waiting can anchor in a depth of 18 m., 12 cables from Makatumbe Light on bearing 250° True.

Also see "Gangway/Deck Watchmen".
RESTRICTIONS: Movements in and out of the basin are subject to restrictions depending on drafts and state of the tide at Spring tides. Tankers, vessels over 135 m. LOA and vessels carrying explosives are not allowed to leave or enter during hours of darkness.

There is a signal station (with tower, flagstaff and red roof) on East Ferry Point (Lat. 6° 50′ S., Long. 39° 18′ E.). Entry prohibited signals are: day signal – black flag on masthead; night signal – 3 red lights disposed vertically, and distant signals – black square on white background.

The entrance channel at North end of the basin is about 1.25 miles in length from its outer entrance between the edges of the banks fronting North and South Reefs to the Inner Harbour, South of West Ferry Point.

There is a sharp bend in the channel at West Ferry Point. Minimum depth of 6.7 m. LWOST, and minimum width of 128.02 m. between the 4 fathoms contour lines. A very strong ebb and flood runs through the channel at periods of Spring tides. Maximum current at Spring tides – 3.5 knots. During period of S.E. monsoon strong winds and heavy seas may make entry difficult, but in Inner Harbour port working is normally unaffected by weather.

MAX. SIZE: Twin-screw vessels not exceeding 182.9 m. Draft 10.1 at HWOST, 7.0 m. at LWOST, and 9.1 m. at HWNT, and single-scre vessels not exceeding 175 m. Tankers LOA 182.87 m., 36,000 d.w. and draft 9.8 m. Also refer to "Mjimwema".
HEALTH: Radio Port Health Officer giving ETA, name last port a health condition of passengers and crew. "Q" flag to be displayed u Free Pratique given. Radio Pratique not available.
TUGS: 4 tugs available.
BERTHING: In the Inner Harbour there are mooring and anchora berths for up to 9 deep-sea ships ranging from 350 ft. to 600 (106.48 m. – 182.88 m.) in length and from 23 ft. to 30 ft. (7.01 m. 9.14 m.) in draft.

Deep water quays total length 2,016 m., comprising Berths No. 1-1 with 10.06 m. in depth at LWOST.

The port has completed major developments which shou significantly affect its capacity and efficency. No new berths are bei constructed but all existing berths (excluding the SPM Oil Terminal) ha been modified, modernised or rehabitated.

Berths No. 9, 10 and 11 have been converted into a dedicat container terminal (2 berths × 280 m.) with a capacity of about 100,0 TEU per annum. The terminal has 2 × 35 ton gantry guay cran 5 × 35 ton rubber tyred gantry yard cranes and a rail container termi (for both Tazara and TRC Railways) with 1 × 35 ton rail mounted gan crane.

Backing up the port terminal are 2 inland container depots in the Da es-Salaam area (Kurasini IDC, adjacent to the port and Ubungo ID about 15 km. along the port access road).

Also see "Developments".
Accommodation:

Harbour sheltered and roomy, water area 95.9 ha; consists of ti basin and Southern Creek, the latter having 11 deep-water berth Anchorage in basin and creek.

		Depth	*Max. length*
"A"	Stern mooring	9.1 m.	183 m.
"B"	Moored mooring	7.6 m.	153 m.
"C"	Moored mooring	7.6 m.	183 m.
"D"	Single anchor	7.3 m.	183 m. waiting berth only
"F"	Moored, buoys and anchor	8.0 m.	175 m.
"G"	Buoys	9.2 m.	175 m.
"H"	Buoys	9.2 m.	175 m.

In addition there are 2 coaster anchorages. The Southern Creek, the S.E. corner of the basin has a navigable distance of 1.5 miles ships drawing up to 30 ft. of water.
CARGO HANDLING FACILITIES: *Grain:* A new bulk grain silo of 30,0 tonnes capacity has been constructed in the port to facilitate gra imports.
Ro-Ro: Ro-Ro vessels berth stern to at Berth No. 6/7.
Equipment and Other Facilities:

Deep water vessels berthed in stream are loaded and discharged lighters. At the lighter quay there are 8 electric portal cranes for worki lighters (1 × 5 ton and 7 × 3 ton), on the main quay, the port ha 6 × 7 ton and 21 × 5 ton. There are 8 other portal cranes on the stackin yards as per details below:
(a) Belbase (AMI) — 2 × 10 ton cranes.
(b) Tanzania — 3 × 5 ton cranes.
Main Quay Cranes: Berths No. 1 – 8 have between them 24 por cranes of 7 tons capacity each.
Mobile Cranes: 2 × 30 ton, 13 × 11 – 7 ton, 14 × 6 ton, 2 × 4 ton a 1 × 120 ton floating crane – "Ndovu". These are moved between dee water quays, lighterage quays and any other points of work on t stacking yards as and when required.

Also see "Developments".
STEVEDORES: Week days (except Saturday) 0700 – 1500 h (45 minutes' break), 1500 – 2200 hrs. (no break), 2200 – 0600 h (no break). Saturdays 0700 – 1345 hrs. (no break), 1400 – 2100 h (no break). Sundays and public holidays 0700 – 1500 h (45 minutes' break), 1500 – 2200 hrs. (no break).
MEDICAL: Facilities available.
TANKERS: Kurasini Oil Jetty at which tankers up to 182.87 m. LO 9.8 m. draft and 36,000 d.w.t. can discharge refined products to tan ashore. There is a refinery on the opposite side of the creek to t Kurasini Oil Jetty; the tankers serving the refinery are not to exce 35,000 s.d.w.t. capacity. Also refer to "Mjimwema" where crude imports for Tanzania and Zambia are received.
DENSITY: 1025.
FRESH WATER: Available at deep-water berths, and a water ba supplies water to ships at anchorage. All water is chlorinated but sho be boiled and filtered. Water for boiler requires feed treatment (for solutions adequate).
FUEL: Fuel oil, diesel oil and gas oil available.
REPAIRS: Several light engineering workshops. There is a Tanza Harbour Authority Dockyard for construction and maintenance Tanzania Harbour Authorities' lighters and other small craft. This has slipway for vessels up to 100 ft., lifting power 100 tons. The P Administration employs scuba divers.
GANGWAY/DECK WATCHMEN:
Piracy: Shipmaster's Report: December 1993.

In early December whilst anchored 1.4 nautical miles North Eas Outer Nyakatombe Lighthouse the vessel was boarded by "locals" fr a wooden boat.

Of the 15 "locals" in the boat only two managed to board the vess and they escaped when discovered.

This first attempt to board at 0115 hrs. was followed by a sec attempt at 0405 hrs. and this time nobody managed to board. Du the first attempt, the lashings on the mooring lines on the forecastle w cut.

We informed the lighthouse and asked them to advise other vess at the outer anchorage.

CUSTOMS ALLOWANCES: Each crew member is allowed 1 carton of cigarettes, 1 opened bottle of spirits and 8 small beers.

All cabins are inspected by Customs.

REPATRIATION: Can be arranged.

AIRPORT: International airport with daily connections to all parts of the world.

TIME: GMT plus 3 hours. No alterations.

HOLIDAYS: Christmas Day and International Workers' Day are the only holidays on which no work is performed. Other holidays on which restricted working may be carried out are: Zanzibar Revolutionary Day (January 12th); Id-el-Fitr (2 days); Id-el-Haj; Good Friday; Easter Monday; Union Day (April 26th); Maulidi Day; Saba Saba Day (July 7th); Tanganyika Independence and Republic Day (December 9th).

SHORE LEAVE: Allowed.

GARBAGE DISPOSAL: Drums are provided on the quays.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: Missions to Seamen, Dock Gate 3, Kurasini. Tel: 20887. Hours: 0800 – 2200. Facilities: International telephone, postal service, bar, restaurant, shop, library, video, swimming pool, football, table tennis, darts, badminton, tennis and dances.

CURRENCY: Tanzania Shilling. U.S.$ 1.00 = 514 Shillings (March 1994).

DEVELOPMENTS: The rehabilitation of Berths No. 1 – 8 is well underway and will provide a better lay-out, refurbished buildings and new heavy duty paving throughout for handling all general cargo traffic in the port.

The second phase of the repaving of the Container Terminal Berths 9 – 11 is expected to commence in 1991 and will run for 2 years.

The Lighter Wharf modernisation, which was interrupted, is due for completion with the provision of new paving and services but no completion date is known.

New navigation lights and buoys to be installed (Daphne Reef, Hammond Rock and N.W. of Buoy No. 2).

Among future developments which are under consideration are:

1. Improvements to the dockyard.
2. Improvements to the entrance channel.
3. New crude oil import facility.
4. Improvements to fendering at Berths 9 – 11.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 1130, Dar-es-Salaam, Tanzania. *Tel:* 44437. *Telex:* 41346 Portreeve. *Cables:* Bandari, Dar es Salaam. *Contact:* P.Cholobi, Port Manager.

Tanzania Harbours Authority, P.O.Box 9184, Dar-es-Salaam, Tanzania. *Tel:* 21212, 46041. *Telex:* 41346 Portreeve. *Cables:* Bandari. *FAX:* 25551, 46043. *Contact:* Captain J.K.Kwayu, Chief Marine Officer.

MJIMWEMA TERMINAL: 06.49 S. 39.22 E.

DOCUMENTS and all General Information; refer to "Dar-es-Salaam".

LOCATION: The position of the Monobuoy is Lat. 6° 48.8′ South, Long., 39° 22.1′ East, lying approximately 1.5 miles offshore in Mjimwema Bay. The buoy lies in 24 m. depth of water. The currents are up to about 1 knot and the direction varies.

PILOTAGE: Mooring Master/Pilot boards at position Lat. 6° 46.5′ N., Long. 39° 22.1′ E., subject to advice from Signal Station. Should the Pilot not be available on arrival, vessels are advised to anchor 1.5 miles N.E. of Outer Makatumbe Lighthouse to await the pilot.

After mooring operations a Mooring Master/Pilot will remain on board. Vessels must provide adequate means of boarding for Pilot, Customs and other officials. A pilot ladder with spreaders 4 ft. from the water and manropes are required.

The Mooring Master shall be provided with meals and accommodation comparable to a senior officer on board. The crew of the mooring launch will be provided with food comparable with ratings on board. No special foods need be provided. Accommodation also required for 2 divers.

RESTRICTIONS: Berthing during daylight hours only. Unberthing at anytime.

MAX. SIZE: Monobuoy accommodates tankers up to 100,000 d.w.t. (part discharge) and 125,000 d.w.t. (complete discharge). Minimum length allowed 650 ft. Max. draft allowed 55 ft.

HEALTH: Customs, Port Health and Immigration will board vessels on arrival.

RADIO: Within 6 hours of clearing the loading port, each tanker shall provide the Agent with the following information:

(a) Name of Ship.
(b) Name of last port from which the vessel cleared and the loading port if different from above.
(c) Estimated date and time of arrival at Dar-es-Salaam (Mjimwema).
(d) Cargo loaded.
(e) API gravity.
(f) Arrival draft, fore and aft.
(g) Lifting capacity of derricks.
(h) Size of manifolds.
(i) Personnel requirements.

72 hours from the pilot station, a second cable should be sent to Agent with following information:

(a) Name of ship.
(b) Amended time of arrival.
(c) Names of crew leaving the vessel (if any).
(d) Requirements of doctor and dentist.
(e) Any other requirements.

A final cable should be sent about 36 hours from the pilot station giving finally amended ETA.

When within 20 miles of the terminal vessel should call Dar-es-Salaam Signal Station on Channel 12 VHF. Channel 16 is available but is not continuously monitored.

VHF Channels 16 calling, 12 berthing. VHF Channel whilst discharging to be decided.

The Mooring Master will be in direct control of all radio communications on the vessel while in the terminal area. Any unauthorised communications may result in the immediate cessation of all operations and removal from the berth.

READINESS: Notice of Readiness will be accepted by the Receivers Representative when the ship is berthed and connected.

Any vessel which is not, in the opinion of the Berth Controller, ready in all aspects to discharge, may be rejected until corrections are made. The Harbour Master's decisions are final.

MOORING: The following equipment is supplied by Tanzania Harbours Authority. 2×10 in. circumference nylon ropes, 100 ft. long with 2 joining shackles. These will be hoisted aboard from the launch using the Starboard boom.

The vessel approaches the buoy head to wind and tide or the resultant of these forces, and should have one ship's mooring rope lowered through the centre Panama Lead down to the water level with 15 ft. of 3 in. rope lashed to the eye. As the vessel approaches the buoy the launch will connect the ship's rope to the floating pick-up rope, which is hauled aboard until the mooring chain is through the Panama Lead. The 2 shore ropes are then shackled to the chain and made fast aboard.

BERTH: The Monobuoy is a single point mooring buoy. The body of the buoy being secured in a fixed position with 6 moorings and the top of the buoy is in the form of a turntable allowing the ship, moorings and hoses to take up the position the vessel lies naturally due to tide, wind and current conditions.

HOSES: Raising and lowering of, connecting and disconnecting of hoses as well as other shipboard duties will be performed by the ship's crew under the advice of the Mooring Master. The ship should be capable of lifting 10 tons on her derrick, with a minimum of 7.5 tons.

When the vessel is securely moored, the launch will bring the hoses alongside on the starboard side. The vessel will lower the cargo hook to the boatman who will hook it on to the lifting ring on the forward hose. The hose will then be lifted to full height on the boom and secured on the "Hang-off Chains" supplied. The hose is then lowered to the deck and the operation repeated with the after hose.

After completion of discharge the hoses will be filled with sea water by the ship. The hoses can then be disconnected from the manifold and lifted over the side of the ship and hung there on the slip ropes to be slipped off simultaneously with the moorings. This last operation will be carried out on the advice of the Mooring Master.

UNMOORING: On sailing, hoses will already have been disconnected and towed clear by the attendant launch. The weight of the moorings is taken off the pick-up rope, the shackles disconnected, and the chain and pick-up rope lowered into the water. The shore ropes and shackles are then lowered into the launch, usually from the port bow.

The Pilot will then disembark, using a combination gangway/pilot ladder on the port side.

BALLAST: Ballasting will be allowed during discharge but only with the express permission of the Discharging Master. In the case of ballasting into dirty tanks a Dry Tank Certificate must be first obtained. Vessels will be allowed to carry out Crude Oil Washing, but no other form of tank cleaning. There are no sludge tanks ashore.

FUEL: Agip Tanzania have a bunker barge but can only supply fuel oil.

FRESH WATER: Up to 300 tonnes of fresh water is available by water barge. A pumping rate of approximately 10 tonnes per hour may be expected. Approximate cost is U.S.$4.60 per ton.

STORES: Stores are available in Dar-es-Salaam, but the Tanzania Harbours Authority cannot undertake to transport stores to the Monobuoy. Transport of stores to the buoy will be the responsibility of the Agent.

REPAIRS: During periods of calm and the fact that there is little current, it is foreseen that the problem of riding up on the buoy may occur. The vessel's engines shall therefore be available at all times and the telegraph shall be on stand-by while the vessel is in the berth. Engine repairs are not permitted. Should a vessel not be able to use her engines the cargo will be stopped and the vessel towed to a safe anchorage at the vessel's cost, until she can safely return to the berth.

SHORE LEAVE: Shore leave can be arranged through Agents. Should any of the crew require to be landed for medical or relief reasons, the Agent will be reponsible for providing transport to the Inner Harbour. Tanzania Harbours Authority craft will on no account be available to ferry crew members to and from the passenger pontoon. The Monobuoy lies 4.5 miles from the passenger landing pontoon, which is situated in the Inner Harbour.

POLLUTION: It is the Master's responsibility to see that no oil of any kind is pumped or spilled overboard from his vessel. This includes oily water from bilges, crude residues from the previous voyages or any other matter that may result in the pollution of the area. Owners and Masters should comply with any international regulations and recommendations concerning the prevention of pollution of the sea.

Serious consequences will arise if the above rule is broken. All costs and expenses involved will be for the account of the vessel concerned and the Master may be prosecuted under the Tanzania Merchant Shipping Act.

REGULATIONS: While in the berth the vessel should provide a pilot ladder on the opposite side of the vessel to the gangway, secured at the rail and ready for use.

No boats of any kind shall be lowered without permission from the Customs, Immigration and Harbour Master, except in an emergency.

Tanzania Harbours Authority maintains vessels to assist in berthing. These vessels are under the direct supervision of the Mooring Master/Pilot. Any service or facility provided by the Tanzania Harbours Authority, including the services of the Mooring Master/Pilot and boats are the vessel's risk. The furnishing of Mooring Master/Pilot and launches or other services and facilities shall not be construed to be or give rise to a personal contract.

STOWAWAYS: Vessels are warned that stowaways remain a serious problem at the Terminal. All exterior doors should be kept locked, especially in the forecastle, and, if possible, the chain lockers should be sealed on deck. A thorough search prior to departure is essential.

Stowaways found aboard will be escorted ashore by the Port Police or the Pilot when he disembarks (contact Signal Station on VHF Channel 12).

AGENCY: The sole ship's Agency in Tanzania is National Shipping Agencies Co. Ltd (NASACO). The Department dealing with tankers at the Terminal is Ruvuma Department. Tel: Dar-es-Salaam 29425. Telex: 41235. P.O.Box 9082, Dar-es-Salaam.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 9184, Dar-es-Salaam, Tanzania. *Tel:* 21212, 46041. *Telex:* 41346 Portreeve. *Cables:* Bandari Dar-es-Salaam. *FAX:* 46043. *Contact:* Director General/Chief Marine Officer.

MKOANI (Kohani): 05.21 S. 39.38 E. (See Plan)

DOCUMENTS, HEALTH: Refer to "Zanzibar".

PILOTAGE: Pilot available on request from Zanzibar.

RESTRICTIONS: Vessels passing through channel between Zanzibar and Pemba should inform Port Authorities 24 hours in advance.

Entrance through Mkoani leading marks, buoyed and well-lit channel, depth of 11 fathoms. Vessels may enter and sail any time night and day.

ANCHORAGES: No mooring buoys. Minimum depth 6 fathoms. Vessels work cargo to lighters. Sandy bottom with mud close inshore.

MAX. SIZE: Length 250 ft.

TUGS: 2 tugs available.

FRESH WATER: Not available.

FUEL: Not available.

STORING: Very limited facilities and it is recommended that where necessary all storing be done in Zanzibar.

DEVELOPMENTS: A jetty, 130.4 m. long, is to be constructed offshore and joined to the shore by a causeway 466 m. long and 4.0 m. wide. Depth alongside 9.0 m. The jetty will be able to accept a vessel 4,000 d.w.t. on the outer side and small domestic steamers and dhows on the inner side.

AUTHORITY: Ministry of Ports and Shipping, Port and Marine Department, P.O.Box 263, Zanzibar. *Tel:* 32858, 32847 (home). *Telex:* 57267 Shipco TZ. *Contact:* Port Officer.

MTWARA: 10.16 S. 40.12 E. (See Plan)

DOCUMENTS, HEALTH: Refer to "Dar-es-Salaam".

APPROACHES: The entrance is approached by a channel marked by buoys and leading beacons. At its narrowest point abreast of Msemo Spit the channel is 1.5 cables wide. In spite of the sharp turn in this vicinity, vessels of up to 175.26 m. in length can enter the harbour at all stages of the tide. Once around the Msemo Spit there is a very good natural harbour with room for two 500 ft. vessels and 1 coaster alongside. There are 2 unmarked anchorages to accommodate vessels of up to 9.5 m. draft.

PILOTAGE: Compulsory. Pilot based at Dar-es-Salaam and flies to Mtwara when required. Scheduled flights 3 times a week. Early information concerning ETA to Harbour Master, Dar-es-Salaam. (Southbound vessels requested to divert to Dar-es-Salaam to embark Pilot).

Pilot boards 0.5 mile North of Shangani Reef Buoy from available craft.

Signal Station can be contacted on VHF, Channels 12 and 16, between 0600 hrs. and 2200 hrs.

ANCHORAGES: No safe anchorage outside port.

RESTRICTIONS: Port closed from 1800 hrs. to 0600 hrs. No tidal restrictions.

MAX. SIZE: Length 175 m., draft 9.76 m.

RADIO: Dar-es-Salaam or Mombasa Radio.

TUGS: Join vessel off Signal Station, when available.

BERTHING: Deep-water Quay: 1,248 ft. length; 9.75 m. depth alongside at low water. 2 berths available at quay.

Sheds and Stacking Yards:

The port has 4 sheds for reception and storage of cargo with a total area of about 16,272 sq.m.

Transit shed No. 1 floor area is 3,121.4 sq.m.
Transit shed No. 2 floor area is 3,121 sq.m.
Transit shed No. 3 floor area is 728 sq.m.
B.P. shed floor area is 9,302 sq.m.
Stacking yard area is 9,000 sq.m.

Cargo Handling Appliances:

2 Jones mobile cranes (11 tons).
7 Fork lift trucks (2.5 tons and 5 tons).
5 Tractor trailers.
2 Tractors.

Marine Craft:

The port owns 2 launches and 1 pilot boat.

CARGO GEAR: Vessels load/discharge using ship's gear.

STEVEDORES: Stowage plan required, preferably 2 weeks prior to arrival. Gang arrangements to be made 24 hours before arrival.

Normal Working Hours:

Weekdays:	1st shift:	0700-1500
	2nd shift:	1445-2215
Saturdays:	1st shift:	0700-1230
	2nd shift:	1230-2030

A maximum of 3 hours overtime is permitted after 2nd shift in order to finish the ship.

MEDICAL: Doctor and dentist available. All crew require valid chole and yellow fever inoculation certificates.

DENSITY: 1025.

FRESH WATER: Not normally available during daytime but available night in limited quantities.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Arranged by Agents.

HATCHES: Opening/closing carried out by stevedores.

REPATRIATION: Possible.

AIRPORT: 7 miles from the port. 3 scheduled flights a week to Dar-e Salaam International Airport.

TIME: GMT plus 3 hours.

HOLIDAYS: All holidays worked as Sunday except following days whe no work done: Christmas Day and 1st May.

POLICE/AMBULANCE/FIRE: Port Police Tel. 059-3152. Port Fi Brigade Tel. 059-3043.

TELEPHONES: Direct connection on board not possible.

BANKS: The National Bank of Commerce (NBC), P.O.Box 142, Mtwa Tel. 059-3267, 3304. Fax: 059-3329. This bank is within 2 km. of th port.

STORING: Trucks can proceed alongside the quay.

SHORE LEAVE: Crew allowed ashore.

IDENTIFICATION CARDS: Required.

GARBAGE DISPOSAL: Drums are provided alongside the quay. Whe the ship has sailed, final bills are immediately dispatched to the ship agent for payment.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Tanzanian Shilling. U.S.$ 1.00 = 514 TSh (March 1994).

SHIPMASTER'S REPORT: December 1981 (Updated 1990).

Vessel called at Mtwara on 1st December, 1981. The following fac were obtained from Port Manager and Pilot:

Documents/Health: Refer to Dar-es-Salaam.

Pilotage: Pilot is based at Dar-es-Salaam and flies to Mtwara whe required. Early information concerning ETA to "Harbour Master – Da es-Salaam". Pilot arrives by Air Tanzania regular flight. He may stay the Pilot's Rest House or aboard the vessel. Pilot boards 0.5 miles N of Shangani Reef Buoy from tug. Pilot ladder to be 3 ft. above wat Pilotage during daylight hours only. Signal station can be contacted Channel 12 between 0600 hrs. and 1800 hrs. Channel 16 also availab if required.

Approaches: Ras Msamgankuu lighthouse unlit. The entrance approached by a channel marked by buoys and leading beacons, unlit. Buoys only weighted and liable to drift. There are 2 unmarke anchorages to accommodate vessels of up to 9.5 m. All buoys and lea unlit.

Radio: "Mombasa Radio".

Tugs: Available from Dar es Salaam.

Cargo Gear: Ship's cranes or derricks used. Shore facilities (not us for discharging) consist of: 12 Hyster fork lift trucks (max. 3 ton 2 tractors and 10 trailers SWL 15 tons; 2 Jones mobile cranes × 15 to each and 5 Coles mobile cranes × 7 tons each.

Stevedores: Stowage Plan required, preferably before ship's arrival.

Medical: Doctor available. Medicine and/or injections in short supp and may not be available. All crew require valid Yellow Fever Certifica and anti-Malaria tablets should be taken on arrival.

Density: 1025.

Fresh Water: Sometimes available from quay in small quantitie No water barge.

Provisions: Fresh fruit and vegetables available in market.

Fuel: Not available.

Repairs: No facilities.

Gangway/Deck Watchmen: Arranged by Agent.

Agent: Only one Agent – National Shipping Agencies. Cable addre "Navigation Mtwara".

Identification Passes: Made out by Immigration Officials on boa Collected by Agent prior to departure.

Repatriation: Daily internal flights to Dar-es-Salaam.

Airport: 7 miles distant by road.

Time: GMT plus 3 hours (permanent).

Holidays: All holidays normally worked except Christmas Day a 1st May when no work possible.

Working Hours: Seven days weekly 0700–1500; 1500–2200 w requested extension from 2200–0100 if to finish vessel (except Hea Lifts).

Telephones: Direct connection on board not possible.

Telex: One machine in Post Office for general use. Otherwise Ag telephones Dar-es-Salaam Agent who forwards telexes.

Shore Leave: Crew allowed ashore.

Mail: Very slow.

Main Exports: Cashew nuts, sisal, timber, pigcon peas, Casava in ba (not palletised) or bulk (bags slit).

Fenders: Tyre fenders alongside cemented quay. Additional fend required by ship.

Cargo Security: Though adequate guards, security of cargo on qua a problem as frequent blackouts due to power failures.

Aero (RC): Strong signal operational 0800–1530 LMT.

Restrictions: Cameras must not be used. Taking of any photogra whatever is strictly prohibited.

Customs Allowances: Officers: 8 cans beer, 1 part bottle spirits. Rati 8 cans beer.

Heavy Lifts: Not worked after 1800 hrs. due to darkness.

Notes: (a) All navigation lights in Tanzania (except Zanzibar Island a Pemba Island) are unreliable.

(b) If next port is Dar-es-Salaam, Pilot will remain on board and ta vessel into Dar-es-Salaam.

SHIPMASTER'S REPORT: December 1983 (Updated 1990).

Documents/Customs Regulations:

Crew Declaration Form (Form C.8)
Declaration and Advice of Consumable Stores (Form C.7)
Passenger List or Nil List (Form C.6)
Parcels List or Nil List (Form C.3)

One copy of each of the above being required and 1 copy of the Manifest. (Company Manifest not acceptable, Form supplied locally.)

Dutiable goods allowance:

Each member of the crew including the Master is allowed 1 ounce of tobacco or 25 cigarettes per day. The Master and officers are also allowed a quarter pint of potable spirits and 1 quart of wine or beer. The other members of crew are allowed either a third of a pint of spirits or one sixth gallon of beer or one sixth gallon of wines. Dutiable stores are issued to a limit of 8 days (cigarettes) and 4 days (beer and spirits).

Quarantine Regulations:

1 copy of Maritime Declaration of Health.
1 Crew List with valid dates for Cholera and Yellow Fever.
Pratique not granted by radio.

Pilotage: Compulsory. Pilot is available between 0600 – 1800 hrs. and boards in an approximate position 1 to 2 miles North of Shangani Shoal.

Pilot boat (VHF Channels 12 and 16) – Pilots have hand set.

Anchorages: No recommended sea anchorage. If arriving off Mikindani Bay at night, it is prudent to cruise WELL OFF until daylight, currents are strong and set onshore.

A sheltered anchorage exists in the inner bay with reported good holding ground in about 12 fathoms.

Approaches to Berth(s): From the pilot station passing S.W. of Shoal Buoy into channel marked by an unlit buoy. The sharp bend around Msemo Spit requires very careful navigation and steering.

Radio: Standard instructions/communications.

VHF: Channels 12 and 16 available between 0800 – 1200 hrs. and 1400 - 1600 hrs. local time Mtwara Signal Station.

Tugs: Possibly available (on prior notice) from Dar-es-Salaam.

Description of Berth(s): Berth No. 3 situated on the main wharf which is of stone construction with rubber tyre fendering. Owned by Tanzania Harbours Authority.

Berthing: Night berthing/unberthing is not permitted.

Vessels normally berth starboard side to, 1 tug meets vessel off the signal station.

Mooring wires are permitted: shore gangway is available.

Density: 1025.

Tankers: Shore Lines: 10 in. Connections: 8 in. flexible hose. 65 m. from Eastern end of quay approximately. Grades: M.S., G.O., and K. Maximum Pressure: 75 p.s.i.

Ships' lifting gear required for 1.5 ton lift.

Fuel: Bunkers not available.

Fresh Water: Water supply has been improved but shortages may be felt in the dry season. It is reported to be of poor quality and should not be used for domestic purposes, unless boiled and filtered (See "Laundry and Stores").

Ballast: No ballast disposal or tank cleaning facilities available.

Port Regulations: Immobilisation of engines not permitted alongside.

Laundry and Stores Facilities: Reports indicate that fresh water and/or provisions obtained at Mtwara are of very poor quality and may have been the source of a severe infection which affected several ships' crews. Masters are, therefore, warned accordingly.

Repair Facilities: None available.

Crew Identification Cards: Crew require identity cards when proceeding ashore.

Medical: Medical facilities with government hospital available.

Precautions: Be careful of stowaways.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 530, Mtwara. *Tel:* 3125, 2121, 2183. *Telex:* 56076. *Cables:* Bandari. *FAX:* 3153. *Contact:* M.J. Mungure, Port Manager.

Tanzania Harbours Authority, P.O. Box 9184, Dar-es-Salaam, Tanzania. *Tel:* 21212, 46041. *Telex:* 41346 Portreeve. *Cables:* Bandari. *FAX:* 46043. *Contact:* Director General/Chief Marine Officer.

TANGA: 05.04 S. 39.08 E. **(See Plan)**

PORT LIMITS: From high water mark at Ras Kwawa 090° to the meridian of 39° 15′ E., thence 180° to the parallel of Lat. 5° 05′ S., thence 270° to the mainland at high water mark. Time of anchorage within port limits to constitute an "arrived vessel".

DOCUMENTS, HEALTH: Refer to Dar-es-Salaam.

Shipmaster's Report: March 1981.

Same as Dar-es-Salaam "Shipmaster's Report" except: 7 Passenger Lists, 2 sets Vaccination Lists, Heavy Lift List.

APPROACHES: Tanga is approached from the S.E. through channel in line with Ulenge leading marks bearing 319° (T). A 3 fathom bank to starboard is marked by ship channel buoy. Care should be taken in this vicinity as there is frequently a strong set to the N.E. On the port hand, Niule Reef is marked on Northern tip by a beacon. After passing Niule Reef Beacon it is necessary to turn to port on to Ras Kazone leading marks bearing 266° (T) until Ulenge Beacon is sighted.

A signal station is situated immediately below Ras Kazone High Light. Signals are exhibited to indicate if inner channel to harbour is clear.

Late afternoon arrivals to Tanga may encounter poor visibility of land marks due to haze from setting sun.

PILOTAGE: ETA required via Mombasa Radio, if not given by Agents at previous port of call. Pilot embarks from white launch in vicinity of Ulenge Beacon on Ras Kazone leading line. Pilot ladder required on port side in N.E. monsoon, and on starboard side in S.W monsoon.

Vessels wishing to enter must await the arrival of the Pilot at the outer anchorage and, if anchored, must anchor well clear of the leading lines.

Pilotage is daylight only, but during the N.E. Monsoon, when vessels lie at anchor facing out to sea, Masters with previous experience of Tanga will be granted permission to sail at night without a pilot.

Masters of deep-draft vessels, or Masters who are in any doubt about their approach, may request a pilot in a position approximately one mile S.E. of Buoy No. 1.

ANCHORAGES: Tanga has no deep water berths. It is a lighterage port where ships are worked at anchor in the stream. Eleven safe anchorages have been marked by means of beacons. The inner harbour provides 7 anchorages for use by deep sea vessels with length of up to 213 m., and drafts of between 6.4 m. and 9.5 m.

The outer harbour has 3 anchorages with drafts well over 9.45 m.

Incoming vessels without Pilot should not anchor within 1 mile of Ras Kazone.

RADIO: Mombasa Radio. Ras Kazone Signal Station keeps 24 hour VHF watch on Channel 12.

TUGS: Available on request from Dar-es-Salaam.

BERTHING: All except bulk cargo work is carried out at anchor. Vessels are not berthed in Inner Harbour during hours of darkness except by special request in cases of urgency.

Fertiliser Jetty: A Fertiliser Jetty with a single berth of 16 m. maximum draft is available in the harbour. The jetty has 2 cranes connected to a sophisticated hopper system for handling materials for the fertiliser factory only.

Also see "Cargo Handling Facilities".

Quays: The new Lighter Wharf, 240 m. long, is situated at the Eastern end of the port. It has a depth of 2.44 m. at low tide. The old wharf now under modernisation has a length of 140 m., and has similar depth of 2.44 m. at low tide.

Facilities for harbour dhows and schooners engaged in coastal wise cargo transportation are provided at the end of the old wharf where only 1 schooner or dhow can work at a time. The water alongside has a depth of 2.44 m. at low tide.

CARGO HANDLING FACILITIES: One 20 ton fixed crane and one 40 ton mobile container handling crane are available on lighterage wharf for heavy lifts. 12 cranes of 5 tons capacity also available. A jetty on the Eastern side of Ras Kazone provides 1 berth for vessels of 20,000 d.w.t. equipped for the discharge of bulk cargoes and liquid ammonia. Two portal cranes of 7 tons capacity fitted with grabs. Jetty currently handling bulk products for fertiliser factory.

The port is able to handle 20 ft. containers on 5×20 ton trailers.

The port has 33 fork lifts, 3 tractor, 1 shunter and 2 Coles cranes, 3×16 ton Scamel trailers, 6×8 ton Scamel trailers, 4 Hyster cranes, 1×35 ton front loader for container handling and 4 Scamel hoses. The above equipment is maintained by the Authority's mechanical and electrical workshops at the port.

Sheds and Stacking Yard: There are 3 sheds for reception and storage of cargo.

The main stacking yard which is rail and road served covers a total area of 20,000 sq.m. There is also a new yard which covers an area of about 861 sq.m. Shed Nos. 6 and 8 are mainly for handling exports while Shed No. 7 is for imports. Total floor space of the shed is 10,000 sq.m.

Marine Craft: The transfer of cargo from vessels working at anchor to the wharves and vice-versa is done by means of lighters. There are 30 lighters in use. In addition there are 4 lighter towing tugs, 3 runboats, 4 labour launches and 2 landing pontoons.

PASSENGER FACILITIES: All passengers and visitors to ships pass through the Customs Passenger Terminal at the Eastern end of the new lighter wharf, and embark or disembark from the pontoon landing stage. Private hire launches available.

TANKERS: Two buoys are situated in a restricted area at the Western end of the Port for the use of local tankers transhipping oil products from Dar es Salaam.

FRESH WATER: There is no water available, even on the Lighter Wharf, due to very low water pressure.

FUEL: Only available to coasters at the lighter quay.

SURVEYORS: A Lloyd's appointed surveyor is available for cargo, container, on/off hire and draft surveys. Contact Mr.G.R.Blackway, P.O.Box 794, Tanga. Tel: Tanga 43327. Telex: 45033 NOTCO.

REPATRIATION: Repatriation is possible through Tanga, but would be far easier through Mombasa or Dar es Salaam.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

CURRENCY: Tanzania Shilling (TS.).

All foreign exchange must be declared on arrival and may be checked before departure. A maximum of TS.200 may be tanken out of the country.

GENERAL: Refer to "Dar-es-Salaam" for all general information.

AUTHORITY: Tanzania Harbours Authority, P.O.Box 443, Tanga, Tanzania. *Tel:* Tanga 43078. *Telex:* 45000 Harbor TZ. *FAX:* 42360. *Contact:* Harbour Master/Port Manager.

Tanzania Harbours Authority, P.O. Box 9184, Dar-es-Salaam, Tanzania. *Tel:* 21212, 46041. *Telex:* 41346 Portreeve. *Cables:* Bandari. *FAX:* 25551, 46043. *Contact:* Captain J.K. Kwayu, Chief Marine Officer.

WETE (Pemba): 05.14 S. 39.43 E.

DOCUMENTS, HEALTH: Refer to Zanzibar.
PILOTAGE: Not compulsory, but restricted to daylight only. Vessels passing through channel between Zanzibar and Pemba should inform Port Authorities 24 hours in advance.
RESTRICTIONS: Entrance through Uvinje Cap, channel depth decreasing to 11 fathoms, with shallow patches to be avoided. Narrowest part of channel is 1.5 cables wide. Vessels may enter and leave at any state of tide but in daylight only.
ANCHORAGES: No mooring buoys. Vessels work cargo to lighters. Depth decreases to 2.5 fathoms. Mud bottom.
MAX. SIZE: 240 ft. length; 25 ft. draft.
TUGS: 2 tugs and 1 labour boat.
LIGHTERS: 3 lighters of 200 tons each.
6 lighters of 100 tons each.
FRESH WATER: Not available.
FUEL: Not available.
STORING: Very limited facilities and it is recommended that where necessary all storing be done in Zanzibar.
AUTHORITY: See "Zanzibar".

ZANZIBAR: 06.09 S. 39.11 E. (See Plan)

DOCUMENTS:
Bill of Health.
3 Crew Lists.
6 Passenger Lists.
3 Cargo Manifests.
3 Customs Manifests.
Also Required: Bills of Lading, Ship's Papers, Ship's Certificates, Health Certificates (Yellow Fever and Cholera).
PILOTAGE: Compulsory. Pilot requires ETA 24 hours before arrival. Contact can be made through pilot station (VHF Channel 16 – 24 hours a day). Pilot boat may be contacted on VHF when in operation – pilot boat is painted orange.

Vessels approaching from English Pass embark Pilot at Seagull Buoy, and vessels approaching from South Pass meet Pilot at Penford Buoys. Pilot takes vessel in an out, day and night. Vessels awaiting Pilot anchor at the boarding position.

Recommended time for entry and departure is between 0600 hrs. and 1800 hrs.
ANCHORAGES: 6 anchorages to accommodate vessels drawing up to 32 ft. Additional anchorage provided for vessels carrying explosives.
RESTRICTIONS: 2 entrances, English Pass and South Pass. The former is approximately 1 mile wide and has minimum depth of 6 fathoms 4 ft. and a very narrow angular turning corner of 1.7 cables width. South Pass wider and deeper than English Pass. Passes are well buoyed and lit. In English Pass, tidal stream runs North and is stronger on ebb than on rising tide. South Pass, tidal stream runs N.N.W. and stronger on flood than on ebb-tide. Vessel may enter or leave at any state of tide.
MAX. SIZE: (Anchorage) Length 1,100 ft., beam 110 ft., draft 32 ft.
Also see "Developments".
HEALTH: Pratique given by Quarantine Officer who boards on arrival. All crew required to be in possession of valid yellow fever and cholera inoculation certificates.
RADIO: No official call sign for the control station, but there is a new radio installation at the Agency on VHF Channel 16 with a call sign ZANSAC (Zanzibar National Shipping and Agency Corporation).
There is also a long-range radio on frequency 8297.3 kHz.
RADAR: No installation.
TUGS: No tugs are required as all vessels work in stream. Tugs are only used for towing barges to and from vessels, transporting labour and other stevedoring activities.
BERTHING: Concrete pile wharf 800 ft. long to North of Ras Shangani used mainly for lighterage purposes and for berthing Government coasters. Under special circumstances, upon prior request to Port Officer, vessels of less than 375 ft. length and drawing less than 20 ft. may be permitted to berth alongside, but due prevailing onshore winds this practice not encouraged.
Also see "Developments".
CRANES: Four old cranes and 1 mobile crane of 7 tons at the Wharf. No heavy lift cranes, however if heavy lift crane required, arrangements are easily made to put the load in a landing craft to be discharged at a point near the port, using lowloader to tow it to its destination. No objection to vessel using its own gear.
BULK CARGO FACILITIES: No berth for foreign vessels, all work carried out in stream.
Discharging Rate: 350 – 400 tons per gang per day in case of bagged stuff or pallets. No facilities for bulk cargo handling or containers, but one or two containers can be handled.
STEVEDORES: Normal working hours Monday to Thursday, 0700 to 1500 hrs. Friday 0700 to 1200 hrs.
Work can be extended on overtime for a second shift up till 2300 hrs.
Average rates: bagged cargoes 15 tons per gang hour, general cargo 8 tons per gang hour.
LIGHTERS:
2 lighters, open at the top for heavy equipment 280 tons each.
2 lighters for bag and general cargo, each with a capacity of 300 tons.
5 lighters for bag and general cargo, each with a capacity of 200 tons.
5 lighters for bag and general cargo, each with a capacity of 150 tons.
6 lighters for bag and general cargo, each with a capacity of 100 tons.
FRESH WATER: There is one water barge of 250 tons capacity. Wa can be supplied at the wharf by hydrant or at the anchorage in the strea by water barge.
FUEL: Not available.
SURVEYORS: Department of Marine Transport, P.O.Box 26 Tel: 32857.
STORING: See "Prelims".
1. Storage done by barges.
2. There is no restriction in doing so, provided the Master can allo both operations to be done simultaneously.
3. Yes.
4. Yes.
5. Stores have to be checked by the Customs Authority.
GENERAL: Members of the crew who wish to fish around the harbo limits have to notify the Signal Station and the harbour police of directi they are going. If the crew wish to visit the offshore island, they have contact the Agent who will obtain permission for them and advice.
DEVELOPMENTS: *The West Wharf:* Facing West with a total length 260 m. This is a combined length of 170 m. on the Northern end w 9.0 m. water depth for longer vessels of up to 30,000 d.w.t. The Southe portion of 90 m. length with 5.5 m. water depth is for smaller vesse berthing.
The North Wharf: Facing North with 130 m. length and 5.5 m. wa depth. This will also be used for smaller vessels' berthing.

The new jetty will extend some 10.0 m. further seaward of the existi one, and will have a container storage area located on the Southe end of the West Wharf.
AUTHORITY: Department of Marine Transport, P.O.Box 263, Zanziba Tanzania. *Tel:* 32858. *Telex:* 57267 Shipco TZ. *Cables:* Shippin *Contact:* Captain Ramadham Saleh, Port Officer. Major H. Kh. U. Mlind Director, Department of Marine Transport.

NOTES

Please also advise Shipping Guides Ltd.

Thailand

GENERAL:

IMMIGRATION: The Thai Immigration Department has issued a Notification, dated March 15th, 1976 to the following effect:

"Chinese or Hong Kong crew members not in possession of Seamen's Discharge Books, but holding Certificates of Identity only are not recognised as bona fide crew members, and are liable to Immigration Guarantees at 50,000 Baht per person, to be filed upon arrival."

All concerned are kindly requested to check and ensure that all Chinese crew members are in possession of either Passports or valid Seamen's Discharge Books, and not Certificates of Identity, to avoid complicated Immigration procedures involving deposits, etc.

REGULATIONS: Thai Government Regulations: Thai laws relating to the production, possession, distribution and use of narcotic drugs are extremely severe. Penalties for infringement range from prison sentences and fines to life imprisonment and even execution.

The Thai Navigation Act requires Masters of all vessels calling at Thai ports to observe the following:

On preparing to depart Thai waters, vessels shall fly the International Code flag indicating that the vessel is about to proceed to sea (code flag P).

If the vessel is to depart in the morning this flag is to be flown in the afternoon of the previous day, if departure is in the afternoon, code flag P is to be flown in the morning.

Departure shall be notified to the Harbour Master at least 6 hours before expected time of departure.

Documents required by Port Authorities (other than those required for specific ports) include:

Ship's Licence and Safety Equipment Certificate.
Certificate of Registration.
Certificates of Competency (including Radio Officers).
Radio Certificate.
Ship's Articles.
Last Port of Call Clearance.
Log Book.
Load Line Certificate.
Derat or Exemption Certificate.

BANGKOK: 13.26 N. 100.35 E. (See Plan)
KOHSICHANG: 13.10 N. 100.50 E.

LOCATION: Bangkok Port is located on the left side of the Chao Phraya River between Km. +26 and Km. +29, in the Klongtoey District of Bangkok.

PORT LIMITS: The waters under the Authority's jurisdiction and responsibility begin from the Memorial Bridge of the Chao Phraya River downstream to the Km. −18 in the Gulf of Thailand, about 57 km. long.

DOCUMENTS: Ship's forms: Crew List; Passenger List; Stores List; List of Arms and Ammunition for ship's use; List of Arms and Ammunition in possession of passengers; List of opium and harmful habit-forming drugs; List of crew private belongings (cigarettes, radio, gramophone, camera, etc., including foreign currencies and liquors); Dangerous Cargo List; List of heavy lifts; Stowage Plan; Inward Cargo Manifest; Transit Cargo Manifest; Through Cargo Manifest; List of Containers.

Documents to obtain from officials and Agents: Immigration forms No. 3, 4 and 35, obtainable from Agents. International Maritime Declaration, obtainable from Quarantine Officer.

For safety reasons, all dangerous goods such as calcium hypochlorite, butanox (methyl ethyl ketone peroxide), sodium hydrosulphide, nitrocellulose and potassium chlorate, are not allowed to be kept in a godown or dangerous goods warehouse. Such dangerous goods have to be discharged overside into a barge or cargo boat or truck.

APPROACHES: The entrance of the river Chao Phraya is marked by the Bangkok Bar light beacon situated at the Lat. 13° 26′ 24.3″ N., Long. 100° 35′ 48.1″ E. Sea-going vessels have to cross the bar at the mouth of the river through an 18 km. long bar channel, which is dredged to a depth of 8.5 m. from MSL (mean sea level), and a bottom width of 100 m. in the straight section and 250 m. in the curve.

The depth of the river within the port area varies from 8.5 m. to 11 m. from MSL.

The MSL at the Bangkok Bar and at Klongtoi is 2.3 m. and 1.63 m. above lowest low water respectively.

At present the limiting length of vessels entering the port is 172.2 m. (565 ft.). The limiting draft of vessels will be determined by the bar constant plus the depth of water (predicted in the Tide Table published yearly by the Hydrographic Department RTN) from LLW at the Bangkok Bar, but the max. draft of vessels allowed to cross the bar is not over 27 ft.

PILOTAGE: Pilotage is compulsory for vessels of overall length 50 m. or more, sailing between the entrance of the Bangkok Bar Channel and the upper limit of the port in the River (Km. +56 – Rama VI Bridge). Pilotage is under the supervision of the Harbour Department, a separate department attached to the Ministry of Transport and Communications. Advance notice required 48 hours prior to arrival.

Bangkok Bar Pilot Station (Red and white structure): Lat. 13° 22.6′ N., Long. 100° 35.9′ E., 22 km. from the Phra Chullachomklao Fort along the channel.

Also see "Shipmaster's Report" dated March 1984.

ANCHORAGES: See "Shipmaster's Report" dated March 1984.

RESTRICTIONS: *Bangkok:* No restrictions, able enter day and night, dependent tide at Bar Channel.

Kohsichang: No restrictions, able to enter day and night.

MAX. SIZE: Bangkok: Not exceeding 172 m. LOA. Max. draft 8.2 m.

Kohsichang: See "Berthing".

HEALTH: *Radio Pratique:* According to the Thai Ministry of Health's Regulations and International Health's Regulations Article 36:

Under the responsibility of ship's Master and shipping Agents, vessels from infected areas may apply for exemption of Quarantine through Radio Pratique by telegram sent to Quarantine Bangkok, stating name of ship, last port, number of passengers and health of crew and passengers.

(a) Vessels with passengers from infected areas proceeding to the berthing places in Bangkok must slow down at Paknam enabling Port Health Officer to board the ship for inspection.

(b) Vessels without passengers from infected areas go directly to berthing places in Bangkok where they will receive Port Health Officer for inspection.

Remarks: In case of suspected infectious disease on board any ship or anything suspect about health or ship sanitation, the ship's Master is requested, as early as possible, to inform the Port Health Officer at International Quarantine Office (Medical) Section, Immigration Division, North Sathorn Road, Bangkok, Tel. 39588.

Documents Required: 1 copy of Maritime Declaration of Health; 1 copy of Crew List; 1 copy of Passenger List; Derat or Derat Exemption Certificate.

Vaccination: Vaccination Certificates required: Cholera (only when leaving from infected areas); Yellow fever (only when leaving from infected areas).

However, vaccination may be done as deemed necessary by Port Health Officer even if the crew or passengers are from non-infected areas.

Vaccination certificates will be shown collectively for transit passengers/crew members and individually for disembarking passengers/crew members only.

Exemption from Vaccination: If the Port Health Officer is of the opinion that vaccination is contra-indicated on medical grounds, he shall provide the persons with reasons, written in English, underlying that opinion, which Health Authorities should take into account.

Death on Board: In the case of death on board after the ship arrived at the anchorage or at the port, permission to land the corpse must be obtained after the inspection of the Port Health Officer, if the cause of death was not quarantinable diseases.

Ship's Master or shipping Agent must inform the Port Health Officer if there are cadavers and/or remains on board of persons who died in a foreign port, in order to pass through the quarantine. The dead should be accompanied by a death certificate (or a true copy), signed by the medical officer and placed in a coffin hermetically sealed in a casket, which is air-tight and waterproof.

According to Immigration Law B.E. 2493 (1950): The traveller to Thailand must be free from diseases forbidden under section 14 (4) of the Immigration law such as: trachoma, leprosy, tuberculosis, venereal diseases, including persons having physical or mental defects who cannot earn their living.

RADIO/VHF: The Port Radio Station located at Lat. 13° 42′ 38″ N., Long. 100° 35′ 58″ E., is operated by the Port Authority of Thailand (P.A.T.) for the use of port business only.

Port Radio "Bangkok Thailand", call sign HSC 61 Station.

The incoming vessels are to communicate with port officers at the distance of between 1,500 – 2,000 miles by radio telegraphy.

HF – Power 1,000 watts.
– Port transmits on 8,466 kHz.
– Port receives on 8,363.2 – 8,367.2 kHz.
– Open 5 times a day at 0700, 1000, 1300, 1600 and 2000 hrs. GMT (About 30 minutes each time).

Information required from the vessel includes:

(1) Vessel's name and nationality.
(2) Last port of departure.
(3) Estimated time of arrival at Pilot Station.
(4) Draft (fresh water) in feet or metres.
(5) General cargo tonnage to be discharged.
(6) Dangerous cargo.
(7) Heavy lift required.
(8) Fresh water required.
(9) Number of passengers (landing and transit).
(10) Time of dropping anchor at Pilot Station.

So as to check the time to reach the Pilot Station, when entering the Gulf of Thailand, or at the distance between 400 – 1,000 miles, the vessel has to communicate with port officers again by radio telegraphy.

MF – Power 1,000 watts.
– Working frequency 500, 480, 454, 443, 425 kHz.
– Calling frequency 500 kHz.
– Traffic lists broadcast daily at 0450 hrs. GMT, and the beginning of every hour (2300 – 1700 hrs. GMT).

Upon reaching the Bar Channel, or at the distance of 6 – 10 miles from the Pilot Station, communication by radio telegraphy is to be changed to radio telephony, call sign "Port of Bangkok",

VHF – Power 60 watts,
– Calling Channel 16,
– Working Channel 14,

so that the vessel shall be informed of its mooring place.

Communication with the radio station of the Communications Authority of Thailand is required for any other business.

TUGS: Tugs join when vessel approaches berth, using tug's line without extra charge. 12 tugs available, 1,000 h.p. – 1,800 h.p. 2 tugs normally required for berthing and unberthing.

BERTHING: No difficulties in approaching berth. Agents will cable Master to inform when Pilot has been ordered to board vessel.

Final berth allocations are made each day at 1000 hrs. by a committee under the chairmanship of the Deputy-Director (Operation) of the Bangkok Port. The policy is known to be *First Come First Served* within certain conventions. Warships are given first priority in case of necessities.

Ships with break bulk import cargoes are berthed at the West Terminal. The dolphins and buoys are used to moor vessels loading exports, or undergoing minor repairs, etc. Vessels, on completion of discharge, and with cargo to load are moved to the dolphins. Container ships, which include combo and feeder ships, are berthed at the East Terminal. This is the general pattern of berth allocation, but there may be exceptions from time to time to meet the requirements of the day.

Midstream: 21 anchorage places and mooring buoys for sea-going vessels.

2 berths in front of Co-operative Salt wharf for 500 ft. vessels.

4 berths in front of Customs boarding station for 300 ft. vessels.

2 berths at Bangplakod for 565 ft. vessels.

1 berth at Bangplakod for 500 ft. vessels.

6 berths South Sathupradit (6 mooring buoys) for 450 ft. vessels.

3 berths North Sathupradit for 400 ft. vessels.

4 berths North of Krungthep bridge for 280 ft. vessels.

Berths: 87 wharves on both sides of the river for sea-going vessels:

Container terminal has a depth of 11.5 m.

18 berths at the East Quay and the West Quay for imported general cargo (km. 27 to km. 29) on the left bank of the river at Klongtoi operated by the Port Authority of Thailand for 565 ft. vessels with 27 ft. draft.

1 berth for imported cargo (km. 39.5) on the right bank of the river operated by Thai Maritime Company for 400 ft. and 280 ft. vessels.

2 berths for imported general cargo (km. 46) on the right bank of the river operated by Thai Maritime Company for 250 ft. vessels.

14 berths for imported petroleum products operated by private and government organisations for 150 ft., 350 ft. and 565 ft. vessels.

54 berths for export cargo operated by private companies for 280 ft. to 565 ft. vessels.

36 dolphins in front of Klongtoi Wharf. A row of 36 dolphins along the river at a distance of 275 m. from the Klongtoi Wharf, to accommodate 7 ocean-going freighters for exported cargo. Max. draft 8.2 m.

25 dolphins at Bang Hua Sua, Samutprakarn to accommodate 8 ocean-going freighters for imported-exported cargoes. Max. draft 8.2 m.

Kohsichang: 7 berths available, no limit on length, max. draft 35 ft. – 47 ft. Kohsichang is not under the jurisdiction of Port Authority of Thailand.

Also see "Shipmaster's Report" dated September 1982.

CRANES: 2 floating cranes of 125 tons capacity may be used for handling cargo in the ship's holds. Both are owned and operated by private companies.

Item	*No.*	*Capacity*
Rail-mounted Shoreside Container Cranes	12	32 tons
Semi-portal Cranes	12	3 – 5 tons
Transtainers	10	30 tons
Mobile Cranes	19	10 – 50 tons
Top Loader and Container Stackers	42	30 – 40 tons
Empty Container Reach Stackers	24	6 – 10 tons
Forklifts	334	7,000 – 10,000 lb.
Forklifts	43	5,000 lb.
Trailers for Towing Tractors	34	10 tons
Towing Tractors	30	8,000 – 12,000 lb.
Trailers	12	20 – 30 tons
Container Chassis	104	30 tons
Yard Hustlers	88	30 tons
Multi-purpose Trailers	10	10 tons
Motor Trucks	179	5 – 7 tons

BRIDGES: Bangkok port has one bridge only. However, as bridge up river, vessel permitted to pass bridge with LOA not exceeding 280 ft.

STEVEDORES: Vessel to advise Agents 48 hours prior arrival, text required in this cable to be ETA, Drafts, Tonnage of cargo aboard for Bangkok, Number of crew/passengers, Dangerous cargo/Heavy lifts, Gangs required. Undertaken by private companies.

Working Hours: 0800-1200 hrs. – day shift, 1300-1630 hrs. – day shift, 1630-1800 – overtime (working through), 1900-2400 hrs. – first half-night shift, 0100-0500 hrs. – second half-night shift, 0500-0700 – overtime (working through, but should apply for P.A.T. approval).

On Saturdays, Sundays and public holidays, the day shift finishes at 1600 hrs.

MEDICAL: Hospital facilities available, advance notice of ETA required.

TANKERS: No facilities.

DENSITY: Bangkok: Minimum 1000, maximum 1011; Kohsichang: 1021.

FRESH WATER: Available, supply can be made through barges and shoreline. Capacity of barges from 120 to 250 tons, rate of supply approx. 30 t.p.h. Advance notice 24 hours.

FUEL: Available. Supply can be made by barges, no delay on bunkering, advance notice 48 hours.

FIRE PRECAUTIONS:

1. Smoking is strictly prohibited in transit sheds and warehouses and in the vicinity of explosives and dangerous cargoes.
2. There is a Fire Brigade unit in the port area with fire fighting equipment, such as fire fighting vehicle, portable chemical fire extinguishers and tug equipped with fire fighting system.
3. It is prohibited to discharge and load dangerous cargoes, such as explosive cargoes and radio active substances.

REPAIRS/DRY DOCKS: No major facilities at the port. Mobile rep companies available. No berth dedicated for repair work.

SURVEYORS: Contact Port Authority.

GANGWAY/DECK WATCHMEN: Necessary. Theft of wire, paint a tools has occurred.

OPENING/CLOSING HATCHES: Normally by ship's crew.

CUSTOMS ALLOWANCES: *Customs Regulations:* It is prohibited law to bring the following articles into Thailand: narcotics: her morphine, cocaine, opium, heroin, marijuana etc.; obscene literature pictures, firearms or ammunition (except those obtained by permit fr the Police Department or the local registration officer).

Following items are permitted to bring into Thailand free of du personal effects: accompanied with the owner for his own or professio use in reasonable quantity, except motor vehicle, fireams a ammunition, provisions. As for spirituous liquor, cigarettes, cigars smoking tobacco, being personal effects and accompanied with t owner, the Director General of Customs may impose any restriction w respect to the exemption from payment of duty at any port as considers suitable but the quantity must not exceed: (a) cigarettes; t hundred grammes, (b) cigars, smoking tobacco; two hundred and f grammes, each or altogether, (c) spirituous liquor; one li Photographic/cinematographic apparatus and sound record machines imported by persons who temporarily visit Thailand for t purpose of taking photographs or recording; but films, plates or artic for recording, imported for such purpose must be in accordance w the condition and quantity specified by the Ministry of Finance: photographic films (roll); not exceed 5 rolls, (b) photographic fi (plates); not exceed 40 plates, (c) cinematographic films (8 or 16 m in width); not exceed 5 rolls, (to be re-exported within six months fr the date of importation).

Permanent residents of Thailand must register their cameras on t outgoing trip to gain duty free status.

The export of Buddha images and antiquities are prohibited exc for qualified educational, cultural and archaeological purposes.

CARGO GEAR: Supplied by stevedores except cargo tent and for truck.

REPATRIATION: Possible; however, no facilities for crew changes

AIRPORT: About 30 km. from port, regular services by airlines.

TIME: GMT plus 7 hours. No change during the year.

HOLIDAYS: New Year's Day, Buddhist's Day, Song-Kran Festival D (Thai New Year), Royal Plouging Ceremony Day, Coronation D Chulalongkorn Day, Constitution Day, PAT's Anniversary Day, H.M. King's and the Queen's Birthday, and Chakri Day. When any one these holidays falls on a Saturday or a Sunday, the following Mon is observed as a holiday.

POLICE/AMBULANCE/FIRE:

Police Tel: 2498888-91.

Marine Police Tel: 2496399, Ext. 2790.

Fire Department Tel: 2490399, Ext. 2993, 2999, 2444.

Ambulance Tel: 2494106, 2490399, Ext. 2223, 2224, 2258.

Hospital Tel: 2494106, 2490399, Ext. 2223, 2224, 2258.

EMERGENCY CO-ORDINATION CENTRE: Not available.

BANKS: Bangkok Bank (Klongtoey Branch). Tel: 2499312-4.

Thai Farmer Bank (Klongtoey Branch). Tel: 2490463-4.

STORING: See "Prelims".

1. Vessel can be stored by barges or trucks.
2. Vessel can store from barges during loading or discharging.
3. Trucks cannot proceed alongside the berth, but Port Auth provides the parking area for trucks inside the Port Authority's a

5. Regulations of Customs Department are in force regarding stor
6. —

TELEPHONE: Available when alongside PAT berths.
SERVICES: No tank cleaning equipment. No facilities for discharge of tank washings. Compass adjusting, but spare parts unavailable. Radar/VHF/radio repairs. Lloyd's, ABS, Veritas, Nippon Kaiji Kentei Kyokai Surveyors available.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Required for all crew and officers.
GARBAGE DISPOSAL: Service provided by Port Authority.
WASTE OIL DISPOSAL: Service provided. Ship's Agent to make arrangements with private licensed contractor and Harbour Department.
SEAMAN'S CLUBS: Mariner's Club, 227 Tarua Road, Klongtoey, Bangkok, 10110 Thailand. Tel: 2493801.
CURRENCY: Local currency is Baht.
Exchange Rate: 25 Baht = U.S.$ 1.00.
36 Baht = £ 1.00.
23 Baht = 100 Yen.
14 Baht = 1 Mark. (April 1994).
DELAYS: Occasionally congestion, delay 1 to 2 days.
DEVELOPMENTS: Container yard and general cargo area to be completed by 1997.

SHIPMASTER'S REPORT: September 1980.
During S.W. monsoon Pilots appear to always require pilot ladder on starboard side and for vessel to leave pilot station platform to starboard when entering. Custom Officials board at Paknam on way up river to check documents. For repatriations, Immigration require 2 clear working days. After 30 days in Thailand must apply for extension from Immigration at a cost of U.S. $15.00 per man. Vessel must fly 'Blue Peter' 12 hours before sailing from Bangkok or liable to a fine of U.S. $5,000. Require 2 copies of Immigration Form 4 (Crew List) for departure.

Telephone calls can be made via Bangkok Radio on Channels 25, 26, 27, after calling on Channel 26.

SHIPMASTER'S REPORT: September 1982.
Loading of tapioca products in bulk quantities of 25,000 tons and more at Kohsichang:

There are three ways of loading:

1. Vessel anchors off the N.E. coast of the main island. A number of mobile cranes, 12 to 15, are placed on deck by means of a floating crane. The cargo is brought alongside in barges, shovelled by stevedore-labour in canvas slings and dumped into the cargo holds. An average of approximately 3,500 tons per day can be reached, however, delays are experienced by rain and by too much swell for some of the barges alongside.

Stevedore Labour: An average of 300 persons (men, women, children) are onboard during the whole of the cargo operation. The cooking is done on deck. The daily fresh water consumption will increase by 20 tons to 25 tons. Fresh water is available by barge from the mainland.

This way of loading involves most ships; 7 to 9 ships can be handled simultaneously.

2. At the same anchorage as No. 1 above, the vessel will have alongside two floating elevators. A daily average of 13,000 tons can be reached, also depending on rain/swell. Many less people are involved. One ship at a time can be loaded.

3. Loading alongside a silo based on the mainland. The daily average here will be about 14,000 tons, however at a draft of about 40 ft. – 42 ft. the vessel will have to shift to the anchorage to complete loading as under 1 or 2 above, most probably No. 1. The silo belongs to 2 shippers of cargo only.

Trimming of cargo is done mainly by means of bulldozers but trimming by hand/shovel is often required additionally.

Holding ground at anchorage is good. Ships swing round on a rather strong tide. Wind/rain squalls are experienced.

SHIPMASTER'S REPORT: March 1984.
Pilotage: There is no longer a pilot vessel at the Bar. Instead, a peculiarly shaped red-painted lighthouse type beacon has been erected. This beacon has accommodation for the Pilots, who board vessels using a small grey pilot boat. Position of beacon: Lat. 13° 22.8′ N., Long. 100° 35.9′ E. (BA Chart 1046).
Anchorages: Bangkok Bar Anchorage: Any ship with draft able to enter Bangkok Harbour, can anchor at this anchorage to wait its turn to enter. Limits of this anchorage are shown on BA Chart No. 1046. Ships proceed close to the beacon mentioned under "Pilotage", to pick up the Pilot.
Kohsichang Anchorage: There are no longer any N.E. or S.W. monsoon anchorages. Throughout the year Kohsichang Harbour limits are from the Island, East to Long. 101° 51.5′ E. and between Lat. 13° 08.9′ N. and Lat. 13° 11.3′ N. (Thai Chart No. 114).

AUTHORITY: Port Authority of Thailand, Sunthornkosa Road, Klongtoey, Bangkok 10110, Thailand. *Tel:* 66-2-2490399. *Telex:* 72331 Pat Th. *FAX:* 66-2-2490885. *Contact:* Admiral Prachet Siridej, R.T.N., Chairman to the Board of Port Commissioners. Vice Admiral Somnuk Debaval, R.T.N., Director General. Mr. Payoongkich Chivamit, Managing Director of Bangkok Port.
AGENT: Jardine Pacific (Thailand) Ltd., 24th Floor, Times Square Building, 246 Sukhumvit Road, Bangkok 10110, Thailand. Tel: 66-2-2678520. Telex: 21441 Jarthai. Cables: Jarthai. Fax: 66-2-2678401/2.
Associated with Jardine Shipping Agencies.

ERAWAN (FSU): 09.06 N. 101.21 E. (See Plan)

LOCATION: Erawan Terminal is situated in the Central Gulf of Thailand, approximately 300 miles South of Bangkok.

The Terminal co-ordinates are: Lat. 9° 05.35′ N., Long. 101° 20.47′ E.
Charts: British and American Charts and Publications referencing the Terminal location are as follows:
British Admiralty Charts No. 3963 and 3983: Hlaem Kho Kwang to Hlang Suan, and Hlaem Talum Phuk to Hlaem Mae Ramphung.
China Sea Pilot Volume 1.
U.S.Government Chart No. 93010: Gulf of Thailand.
Floating Storage Unit (F.S.U.): The F.S.U. "Erawan" is a modified 87,000 tons tanker, yoke-moored on a custom built buoy secured to the sea bed.

The Terminal's operation and control centre, communications network and accommodation facilities are housed onboard.

The unit is capable of simultaneously receiving produced stabilised condensate and of loading vessels secured alongside at a maximum of 20,000 b.p.h.

Condensate is stored and off-loaded in a controlled, pressurised, inert gas environment and metered to vessels.
DOCUMENTS: *Vessel Documents required by Port Authorities from Vessel's Master, Inwards, On Arrival:*
5 copies General Manifest Inwards.
5 copies Ship's Register.
5 copies Inward Cargo Manifest.
5 copies Through Cargo Manifest.
Safety Equipment Certificate (for inspection).
Safety Construction Certificate (for inspection).
Safety Radio Certificate (for inspection).
Current Freeboard Survey Certificate (for inspection).
5 copies Derat Certificate.
Clearance Outward for Last Port (Original).
5 copies Inward Cargo Manifest.
5 copies Crew List.
5 copies Passenger List.
5 copies Through Passenger List.
5 copies Crew and Passenger Declaration.
5 copies List of Deck Stores.
5 copies List of Engine Stores.
5 copies List of Ship's Equipment and Stores.
5 copies List of Provisions and Bonded Stores.
5 copies List of Arms, Ammunition and Restricted Drugs.
Cargo Lifting Gear and Equipment Certificate (for inspection).
5 copies List of Foreign Currency.
PILOTAGE:
1. Pilotage within the Terminal area is compulsory, except when proceeding to anchor.
2. A Company Mooring Master will board all vessels scheduled to occupy the loading berth. Masters of the vessels must ensure that they are familiar with, and strictly observe all regulations, paying particular regard to those covering safe operations and pollution of the sea (by oil, dirty ballast, garbage, or any other material).

Mooring Masters:
1. All Mooring Masters carry their own radios, but this does not exempt the vessel from having operational Marine VHF sets.
2. Masters are reminded that Mooring Masters must be afforded boarding facilities complying with accepted international standards, with regard to the vessel's freeboard.
3. The assigned Mooring Master (or his relief) will remain onboard the vessel from the time of boarding until the vessel clears the berth.
4. Should a loaded vessel be returning to the anchorage, the Mooring Master will not necessarily anchor the vessel, (however, he may do so in certain circumstances). He will, however, remain aboard until the vessel clears the Terminal area, or completes any documentation requirements.

Term of Acceptance – Conditions of Entry: After boarding, the Mooring Master will hand to the Master of the vessel a letter entitled "Conditions of Entry into and Use of Erawan Terminal", in duplicate and the Master must sign and return to the Mooring Master one copy before the Vessel moves from the boarding point.

This letter details the terms under which the Company accepts that vessel.
APPROACHES: *Approaches to the Terminal:*
1. The Terminal approach is through the Company's gas field restricted zone via 2 approach channels, one from the South and the other from the East.
2. The Southern Approach Channel is 2 miles wide at its narrowest point, and based on a line between Lat. 8° 45′ N., Long. 101° 30′ E., and Lat. 9° 04′ N., Long. 101° 25′ E.
3. The Eastern Channel is 2 miles wide at its narrowest point, and based on a line joining Lat. 9° 14.5′ N., Long. 101° 35′ E, and Lat. 9° 09′ N., Long. 101° 32′ E., and Lat. 9° 04′ N., Long. 101° 25′ E.
4. Currents in the area are predominantly S.E.'ly and seldom exceed 1 knot.

Restricted Area: This covers the Company gas fields in the area. Within this area, all activities, which could endanger the platforms or pipelines, are forbidden. For example, anchoring of vessels (outside designated areas), dredging, mechanical fishing (trolling and trawling), disposal of refuse, etc.

The area is bounded by lines joining the following reference points:

Latitude	Longitude
9° 55′ N.	101° 10′ E.
9° 55′ N.	101° 35′ E.
8° 45′ N.	101° 10′ E.
8° 45′ N.	101° 45′ E.
9° 05′ N.	101° 45′ E.
9° 05′ N.	101° 35′ E.

ARRIVAL: *Arrival of Vessels:* The Terminal operates 24 hours but will only berth vessels during daylight hours (0600 – 1800), throughout the year, subject to prevailing weather.

Berthing on Arrival: Vessels berthing on arrival will be boarded by the Mooring Master in the anchorage area, or at a point advised by the Terminal Manager or Mooring Master.

Thai Officials may board with Mooring Master.

Anchoring on Arrival: Vessels obliged or instructed to anchor should do so in the recommended anchorage. Anchoring time should be reported to Terminal Control as soon as is practicable thereafter.

Notice of Readiness: Vessels should tender Notice of Readiness:

1. At the time of entering the anchorage area, if berthing on arrival.
2. At the time of anchoring (if instructed to do so by the Terminal Control), or entering the anchorage area if intending to drift.

Notice of Readiness will be accepted subject to the following conditions:

1. The Terminal is open.
2. The vessel arrived within loading range dates, and is nominated. The Terminal may under certain circumstances berth a vessel arriving earlier than it's nominated loading slot, subject to the non-prejudice of another ship, and available cargo or berth.
3. That the vessel has advised the Terminal of the Estimated Time of Arrival (ETA), 72 hours, 48 hours and 24 hours prior to arrival, and thereafter, of any subsequent changes in her ETA of more than 2 hours.
4. That the vessel fulfills all the obligations of the Terminal Regulations and Safety Check List, and is ready in all respects to berth and load the nominated cargo.
5. That it is during the hours of daylight, considered to be from 0600 hrs. to 1800 hrs. local time.
6. That it is not a public holiday or Sunday unless the vessel is berthed on that day.

Deductible Laytime:

1. Manoeuvring time into the loading berth.
2. Time required for deballasting, if not concurrent with undelayed loading operations.
3. Time lost due to fault or failure of the vessel, including suspension of loading for vessel's purpose and or delays incurred due to failure to observe Terminal Regulations.

ANCHORAGE: The anchorage is an area of 1 mile radius centered on Lat. 9° 04′ N., Long. 101° 25′ E.

Should a Master decide to anchor in this area, his attention is drawn to the depth of water.

For the purpose of being "arrived", a vessel should proceed to within the anchorage area.

Anchored Vessels:

1. Vessels should maintain a continuous 24 hour VHF radio listening watch on Channel 16 and Channel 17 for further advice or berthing instructions from Terminal Control.
2. Shifting Anchorage: Vessels requiring to vacate or re-anchor in the recommended anchorage should inform Terminal Control.
3. Lifeboats: Except in an emergency, where ship's personnel may be required to abandon ship, vessels are not permitted to turn out lifeboats, or lower them to the water.
4. Refuse and Garbage: The dumping of refuse and garbage in the sea within the restricted area is expressly forbidden.
   Galley waste, and all other general garbage, should be contained onboard in a sanitary condition until the vessel clears the Restricted Area. Masters are cautioned that fines will be incurred for non-compliance.
5. Craft Alongside: No small craft, other than those on official business, will be allowed alongside, either in the anchorage, or in the loading berth.
6. Loss of Anchor(s) and/or Anchor Cables: In the event that a vessel should lose anchor(s) and/or anchor cable, Terminal Operations will, under no obligation, give assistance in attempts to recover them, subject to support vessel availability and Terminal operational requirements. The Terminal reserves the right to recover expenses so incurred.
   The use of anchor marking buoys is recommended.

RESTRICTIONS/MAX. SIZE: *Vessel Size Restrictions:* Vessels of a max. LOA of 800 ft., and a minimum length such that two of the Terminal fenders will lay alongside the parallel body, may berth at the Terminal.

All vessels must maintain their deadweight below 70,000 tons while at the Terminal.

The minimum acceptable lifting amount will be 10,000 barrels.

Vessel's Age: Vessels over 15 years of age will not be accepted. Exceptions may be made in the following circumstances:

1. Vessels that have previously loaded at the Terminal without incident, provided that they are still with same Owner/Manager and can, in the sole opinion of the Terminal, continue to undertake loading operations in a safe manner.
2. Vessels that have been inspected by a Terminal Representative, or nominated substitute and in the Terminal sole opinion are suitable to load at the terminal.
   Vessels should be nominated and inspected well before the intended date of lifting.
3. In all cases the vessel must comply with all other acceptance criteria.
4. Acceptance will be withdrawn, at the sole discretion of the Terminal, if the vessel fails to maintain the required standards of the initial acceptance.

Inert Gas System: All vessels over 20,000 metric tons deadweight must be fitted with a fully operational inert gas system serving all cargo tanks.

Pumping Rates:

Maximum for the Terminal will be 20,000 bbls./hr.
Minimum for the Terminal will be 5,000 bbls./hr.
Also see "Berthing" – "Operational Requirements".

RADIO: *Standard message required from vessels:*

(aa) Name and call sign of vessel.
(bb) Flag, Classification Society and year built.
(cc) ETA in Local Time (GMT + 7 hours).
(dd) Owner/Manager and years with.
(ee) Summer Deadweight and Length Overall.
(ff) Segregated or clean ballast. If clean, deballast time required.
(gg) Double sides, double bottom or double hull.
(hh) Nationality of Master, Officers and crew.
(ii) If any pollution incidents or port prohibitions in last 2 years.
(jj) Cargo requirements in barrels (GSV).
(kk) Draft on arrival.
(ll Last Port.
(mm) Confirmation that all cargo tanks are inert with an oxygen conte below 8%.

Note: Any vessel whose last port was in Thailand, and is unable to gi full Notice of Arrival, should ask their Agent to contact Unoca Production Operations Department or the Terminal, and give the abo information prior to the vessel sailing.

TUGS: One service vessel with tug capability and equipped wi pollution/detergent spraying and foam fire fighting systems availab There are also 2 inflatable dinghies for use by the Mooring Master, t boarding, in suitable weather conditions.

BERTHING: *Operational Requirements:*

1. The operations, including berthing, unberthing, deballasting, loadin and emergency operations shall be conducted in accordance wi the following:
   - (i) Oil Companies International Marine Forum/Internatio Chamber of Shipping (OCIMF/ICS), International Safety Gui for Oil Tankers and Terminals (ISGOTT) – lastest edition.
   - (ii) OCIMF/ICS – Ship to Ship Transfer Guide (Petroleum) late edition.
   - (iii) OCIMF – Standards for Oil Tanker manifolds and associate equipment.
   - (iv) Company's Terminal Regulations.
2. Arrival Draft: Vessels must arrive at the Company's facilities on suitable draft and trim, compatible with safe manoeuvring.
   A guideline for suitable draft is provided by applying the followin criteria:
   - (i) Moulded draft amidships (dm.) in metres to be not less tha dm. = 2.0 + 0.02 L (length).
   - (ii) Trim by the stern not greater than 0.015 L (length).
   - (iii) Propeller(s) fully immersed.
     This guideline is in accordance with the requirements of th "International Conference on Marine Pollution, 1973 Regulation 13.
     Typically an approximate 25% Summer deadweight balla condition should normally achieve these criteria.
   - (iv) The Terminal reserves the right to request Master to amen their arrival draft, if such draft is deemed to interfere with sa operations.
   - (v) Mooring and Hose Handling: Use of ship's anchors in th loading berths is not permitted. Vessels scheduled to loa should have both anchors cleared away ready for emergen use. To prevent accidental release, the cable stoppers shou be utilised until advised to the contrary by the Mooring Mast
   - (vi) Equipment supplied by the Terminal shall be taken on boa using the Terminal lifting gear. Vessel's personnel must b available to take the equipment on board and carry out moor and hose handling duties as advised by the Mooring Mast
3. State of Readiness:
   - (i) Main engines and essential machinery must be maintained a state of readiness, which will permit immediate unberthi in an emergency situation.
     No main engine repairs are allowed whilst vessels are secur in the loading berth. Steam turbine engine vessels shou engage the main turbine turning gear.
   - (ii) A vessel may be required to vacate a berth, should the Moor Master consider that conditions so warrant.
   - (iii) Adequate vessel personnel are to be available for all loadi deballasting operations and any emergency situation. Officer must be on duty and available at all times.
   - (iv) Masters are advised that the vessel's personnel are a required for all mooring and loading hose connection dutie
   - (v) Terminal personnel will normally board the vessel after berthi to advise on loading hose connection.

Mooring at the Terminal:

- (i) The use of tug(s) is the Mooring Master's or Terminal Manag decision. Their movement and use is co-ordinated by the Moor Master, in agreement with the vessel's Master.
- (ii) Vessels scheduled to berth at the Terminal will normally berth p side alongside. All mooring and unmooring operations at t Terminal will be accomplished using tug(s).
- (iii) Should starboard side alongside berthing be required, the vess Master will be afforded adequate advance notice to prepare.
- (iv) Mooring alongside the Terminal:
  - (a) Initial mooring lines will be passed to the Termina messengers passed to the vessel using a line throwing gu Mooring will be as the plan agreed between Mooring Mas and the vessel's Master.
  - (b) All mooring wires used must have synthetic rope tails wi breaking strength at least 20% greater than the breaking of wires to which they are attached.
  - (c) Standard mooring consists of 5 head lines, 2 springs 4 stern lines and 2 springs.
  - (d) Adjustment of mooring lines must only be undertaken in presence of the Mooring Master.
    Indiscriminate working of moorings may cause damage to the vessel and the Terminal.

(e) Vessels fitted with tension winches must have them on "Manual Brake", when secured alongside.

(v) The close-alongside derrick should be topped, rigged and secured inboard during berthing/unberthing operations.

(vi) Loading Hoses:
- (a) 2×8 in. hose strings, with 150 ANSI flanges, are available for loading condensate.
- (b) Advice on connecting loading hoses is given by Terminal personnel.

(vii) Special Requirements for Vessel's Loading at the Terminal:
- (a) The deck fire water main should be kept pressurised to normal operating pressure at all times.
- (b) Two foam-making branches on hoses should be laid out forward and aft, adjacent to the loading manifolds, and be maintained ready for immediate use.

LOADING:

(i) Masters are required to maintain their vessel in a safe operating condition. The vessel's arrival freeboard must not be exceeded, and deballasting controlled accordingly.

(ii) Vessels arriving with clean ballast in their cargo tanks may first be required to load an amount of cargo equal to the amount of ballast to be discharged. They will then deballast and on completion of deballasting will resume loading.
Segregation of ballast water and oil cargo is the responsibility of the vessel's Master. The Company accepts no responsibility for any co-mingling of oil and water.

(iii) Masters of vessels are cautioned that no facilities exist which allow excess loaded cargo to be pumped back to the Terminal.
The Company is not responsible for overloading any vessel under any circumstances.
It is the loading vessel Master's responsiblity to stop cargo on completion of loading, in accordance with procedure given in (vi). Adequate provision should be made to receive a minimal "overrun" of condensate after the "stop" has been requested, whilst loading pumps stop and valves close.

(iv) Loading hoses are regularly pressure tested to ensure their integrity.
The vessel's manifold valves should remain closed until the Mooring Master requests the vessel's personnel to open them.

(v) Good communications between the vessel and Terminal Control are essential. The Mooring Master will carry a hand-held radio to facilitate communication between all parties concerned (i.e. Terminal – Mooring Master and vessel's personnel).
If the vessel is fitted with a VHF radio in the cargo control room, it must be maintained on Channel 17.
Clear and concise operational advice from the vessel is requested, especially when changing over tanks and when stopping cargo. The Terminal requests a minimum of 15 minutes notice prior to either a change of pumping rate or cessation of loading.
Under no circumstances should the loading vessel valves be closed against the Terminal loading pumps.

(vi) Completing Cargo Loading – Stop Procedure: Vessel to Terminal notification required as follows:

15 minutes notice – "Standby to stop loading".
– "Slow down to (state thousands of barrels/hour)".
5 minutes – "Standby" to stop – second advice.
Volume aboard – "Stop loading".

(vii) Masters are advised that a prolonged slow loading rate (5,000 b.p.h. or less) is unacceptable, due to the operational constraints of the Terminal condensate metering system.

BALLAST: *Ballast Discharge and Pollution Control:*

(i) The discharge of bilges or dirty ballast water from crude oil vessels into the Gulf of Thailand is strictly prohibited. Acceptance and treatment of dirty ballast is not available. Vessels must arrive with clean ballast only for discharge to the sea. By clean ballast, it is meant that ballast in a tank which, since oil was last carried therein, has been so cleaned that effluent therefrom, if it were discharged into clean calm water on a clear day, would not produce traces of oil on the surface of the water or on adjoining shorelines, or cause a sludge or emulsion to be deposited beneath the surface of the water or upon adjoining shorelines.

(ii) Vessels presented for loading, which cannot comply with the requirements of (i) above and have to retain ballast on board, are advised that any deadfreight so incurred will be for the vessel's account.

(iii) Ship's Bilges: Ships should arrive at the Terminal with bilges pumped empty. Any residues accumulating whilst the vessel is in port should be retained on board.
Heavy fines will be incurred by vessels discharging oil or oil polluted water whilst at the Terminal.

FUEL: Not available.
REPAIRS: No facilities.
TIME: GMT plus 7 hours.
SHORE LEAVE: Shore leave for visiting vessel's personnel is not permitted. Vessel's personnel may pass through the Terminal in an emergency, when special arrangements can be made through the vessel's Agent, in conjunction with the Terminal Manager.
GENERAL: *Vessel's Agent:* All the vessel's business, including Cargo and Customs Documentation and the Shipping Documents, will be conducted by the vessel's Agent.

SHIPMASTER'S REPORT: March 1993.
Location: Erawan Terminal (Floating Storage Unit), operated by Unocal Thailand, is situated in the Central Gulf of Thailand, approximately 300 miles South of Bangkok in position Lat. 09° 05.35′ N., Long. 101° 20.47′ E.
Documents: When coming from a port in Thailand, no documents required, only Port Clearance from last port. Otherwise all documents to be dealt with as under Sriracha, Thailand.
Pilotage: Compulsory. Berthing Master will board vessel in or near Export Tanker Anchorage.
Anchorage: The anchorage is an area of 1 mile radius, centered on Lat. 09° 04′ N., Long. 101° 25′ E. Water depth is approximately 200 ft.
Approaches: The Terminal approach is through the Unocal's gasfields restricted zone via 2 approach channels, one from the South, and the other from the East.
- (a) The Southern Approach Channel is 2 miles wide at its narrowest point, and based on a line between Lat. 08° 45′ N., Long. 101° 30.0′ E. and Lat. 09° 04′ N., Long. 101° 25′ E.
- (b) The Eastern Approach Channel is 2 miles wide at its narrowest point and based on a line joining Lat. 09° 14.5′ N., Long. 101° 35′ E. and Lat. 09° 09′ N., Long. 101° 32′ E. and Lat. 09° 04′ N., Long. 101° 25′ E.

Currents: Currents in the area are predominately Southeasterly and seldom exceed 1 knot.
Restrictions: Berthing daylight only. Max. wind speed 25 knots. Unberthing day and night.
Max. Size: LOA 250 m. Export tanker fullest displacement when alongside "FSU Erawan", not to exceed 70,000 tonnes.
Radio: 72 hours prior to arrival at the Unocal Field, vessels should advise Unocal Thailand of their ETA. Advice should be sent by cable via Bangkok Radio, Telex: 82632 UNOCAL TH, Fax: 02-541-1436 or Tel: 02-541-1970.
Notice of Arrival should state:
1. Name of vessel and call sign.
2. ETA in GMT and date.
3. Cargo requirements.
4. Deballasting time required.
5. Maximum loading rate.
6. Vessel's draft on arrival.
7. If there is any sickness aboard or clean Bill of Health.
8. Last port of call.
9. Any hull, bulkhead, valve or pipeline leaks on vessel, which could affect loading or cause pollution.
10. Distance in feet from bow to the cargo manifold.
11. Flange dimensions of vessel's manifold, if not ANSI B 76.5, B 1560, ASA 150 or equivalent.
12. Confirmation that all cargo tanks are inert with oxygen below 8%, and inert gas systems are fully operational.
13. Is there a derrick/crane at the port manifold, with a minimum safe working load of 10 tons.

All communications should be addressed to Section Head Gas and Condensate Sales, with copy to Manager FSU and Marine Control SLQ. An updated ETA should be sent 48 hours and again 24 hours prior to arrival at the Unocal field.

Vessels whose last port was in Thailand, and unable to give full Notice of Arrival, should have their Agent contact the Unocal Company or Terminal and give their ETA prior to sailing.
VHF: First contact to be made on Channel 16, working on Channel 17 with "FSU Erawan".
Radar: On approach, when 1 mile off "FSU Erawan", radars have to be switched off.
Tugs: One supply vessel "Smit Belait" available. It will bring Pilot and Loading Master on board, and assist in mooring. It will make fast with 1 tugline on starboard bow.
During unberthing, tug will pull the head of "FSU Erawan" into the wind, and will pick-up Pilot after mooring.
Tankers: 2×8 in. hoses to be connected on port manifold. Loading rate approximately 3,000 cu.m./hr.
On arrival, oxygen % content of all tanks will be measured. API of Erawan Condensate is 57.0.
Repairs: Not allowed, engines to be kept on short notice.
Time: GMT plus 7 hours throughout the year.

AUTHORITY: Unocal Thailand Ltd, Central Plaza Office Building, 1693 Phaholyothin Road, 10900 Bangkok, Thailand. *Tel:* 02-541-1970. *Telex:* 82632. *FAX:* 02-541-1436. *Contact:* Captain Michael E. Harris, Marine Superintendent.
AGENT: See "Bangkok".

KANTANG: 07.25 N. 99.31 E.

SHIPMASTER'S REPORT: April 1982.

PORT LIMITS: Vessels anchored in the bay between Ko Talibing and Ko Liang Hnua are considered to be "arrived ships".
DOCUMENTS:
6 Crew Lists.
4 Passenger Lists.
2 Stores Lists (including dangerous drugs, explosives, bonded items, ship's wireless sets, TV, radio, etc.).
2 Personal Property Declaration.
2 Cargo Manifests.
PILOTAGE: Not compulsory.
Due to shallow waters and absence of chart it is recommended to take the services of the local Pilot, though he speaks only local language. Pilotage distance is about 15 miles up the river.
Pilot boards at the anchorage and takes the vessel up to Kantang. Berthing is also done by him, but it is recommended that the Master does this himself.

ENTRANCE: No large scale chart is available. The only chart available is B.A. Chart No. 3942.

Keep well clear of Light Ko Liang and after passing Ko Liang Hnua on the starboard side keep equidistant from Ko Talibing and Ko Liang Hnua. Depth of water is about 10 m. up to Ko Liang Hnua Point (bearing 190°×4 miles approx.). This place is good for anchoring.

While going up and down river, there is a Customs check post at the mouth of the river and the vessel has to stop for Customs check and sign the register.

The maximum depth in the river at high water is about 5.5 m. at Springs and as low as 3.5 m. at Neaps.

The loading should be restricted as per the tidal conditions.

HEALTH: No Port Health Officer available. Hence Free Pratique not required.

RADIO: No way of communicating with the port from vessel. ETAs, etc. should be sent from the previous port by cable. On receipt of the ETA the local Agents will arrange berthing, etc.

VHF: Not available.

BERTHING: Berth is approximately 140 m. length. Hand leadline sounding at berth indicated depths minimum 10 ft. and maximum 16.5 ft. at low water and minimum 16 ft. and maximum 22.5 ft. at high water.

While the vessel is being loaded it sits on the bottom at low tide and again floats at high tide. The ground is soft sand. Since the vessel is not afloat at all times the cargo calculations and distribution should be accurate.

The main exports are cement in bags, fish meal and rubber in pellets which is mainly exported in LASH barges. The barges are loaded once a month. Generally half the wharf is occupied by LASH barges.

One oil berth also available. Small tankers with about 4 m. draft can go alongside.

CRANE: One mobile crane of 5 ton capacity is available. Priority given to loading LASH barges.

FRESH WATER: Available. Supplied by a small boat of 4 tons capacity.

FUEL: High speed diesel is available. Price is very high.

CONSULS: No consulates or embassies.

REPAIRS: Small repairs can be effected.

WATCHMAN: Recommended.

OPENING/CLOSING HATCHES: MacGregor hatches opened and closed by crew.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle of spirits.

CARGO GEAR: Supplied by the Stevedores.

REPATRIATION: No crew changes possible.

TELEPHONES: Trunk calls can be made from the main Telephone Exchange. Sometimes delays up to 1 hour is normal.

STORES: No ship chandler. Market is very close to the berth where fresh vegetables, pork, fish, beef and chicken available. No mutton available but live goats can be purchased.

KHANOM: 09.12 N. 99.54 E. (See Plan)

SHIPMASTER'S REPORT: October 1988.

LOCATION: Khanom, Nakorn Si Thammarat (Sumpun Mining Wharf).

DOCUMENTS: Same documents as Bangkok.

PILOTAGE: Not available. Wharf Foreman will board at anchorage and will give berthing advice.

ANCHORAGE: Lat. 09° 12′ N., Long. 99° 54′ E.

MAX. SIZE: *New jetty:* 25,000 d.w.t. Draft 9.0 m. – 9.5 m.

Old jetty: 15,000 d.w.t. Draft 8.5 m.

TUGS: None available. Small boat assists with running lines.

BERTHING: *New Jetty:* Vessel is moored to 6 buoys (3 forward and 3 aft) and is kept 3.0 m. off the jetty. Vessel is to be equipped with 6 lines of at least 240 m. length each.

LOADING: *Loading:* One belt conveyor for loading gypsum in bulk, rate 500 – 550 tonnes per hour.

Shifting: Good co-operation required with Foreman as vessel had to shift 3 or 4 times for each hatch.

Trimming: By small bulldozer, weight 2,000 kg.

SHIPMASTER'S REPORT: March 1993.

Vessel anchored 1.0 nautical miles off the berth in 9.0 m. (C.D.). Pilot available.

Vessel boarded at anchorage by Agent, Pilot and his assistant. Agent takes all paperwork, no authorities boarded. Pilot gives advice/information on berthing and suggested loading sequence. However, we decided on actual sequence.

On berthing, Pilot boards with assistant and Port Supervisor. Pilot on bridge, assistant aft and Supervisor forward, to assist with advice on ropes. Six mooring lines to be 280 m. long, and 2 to be 220 m. long. Anchor is also used on approach (up to 5 shackles paid out during shifting and 3 shackles on berthing).

To obtain required length of lines, either join two lines together or cut up older lines to obtain length. We joined section of old line plus 22 mm. × 35 m. wires, which had eyes each end (footwires used for log lashing). This was successful. This enabled lines to be kept on tension winches, it would be difficult if drum ends had to be used for shifting, i.e. 2 mooring lines joined together would not fit onto drums of tension winches.

When shifting ship, the Supervisor attends on bridge to assist/advise. He was very experienced and proved invaluable.

Loading by single loader, which can swing enough to load one hatch of this vessel's beam. It can also stretch or retract. Loading rate up to 800 tonnes/hr. Max. allowable air draft is 11.5 m.

Depth of water: There is a depth marker on quay. However, sounding round is advisable. Said to be vessel always afloat at 9.0 m. draft – load to max. draft 9.5 m.

Ships soundings approximately 15 cm. higher than scale, which closer inshore. Lowest low water 8.7 m., heights vary from 0.6 m. 1.7 m. above LLW. Using tables for heights at Pak Phun, supplied Pilot. Depths can be difficult to ascertain, due to 1.0 m. to 2.0 m. running at times. Check shore scale every hour and sound round ea H.W. and L.W. Bottom soft mud and sand. Caution recommended regard to water depths, no degree of certainty.

Fresh water is available from shore, using ship's hoses, but very sl

There are 2 boats available to run lines and a small tug stands-by mooring and unmooring, though not very powerful. We used tug's for unberthing.

Loading operations ran very smoothly. Loaded last 2,000 tonnes rising tide.

Ship's particulars: 15,832 g.t.; LOA 167 m.; beam 26 m.; Summer 9.50 m.

We loaded, on this occasion, to even keel draft of 9.40 m. (app 24,800 tonnes gypsum). Shore scale read 10.25 m. depth alongs quay (vessel 10.4 m., i.e. 1.0 m. UKC).

Vessel can lie alongside in good to fair conditions, but should be off quay 2.0 m. – 3.0 m. in moderate to rough conditions.

SHIPMASTER'S REPORT: September 1993.

VESSEL:

D.W.T.:	29,432 tonnes.
LOA:	180 m.
Beam:	23.1 m.
Cargo Loaded:	24,844 tonnes.
Final Draft:	Forward 9.75 m.
	Aft 9.76 m.

BERTH: Gypsum Berth No. 2: Position Lat. 09° 12.3′ Long. 99° 53.2′ E.

CHART: Largest scale chart available is B.A. 3963 (Laem Kho Kw to Lang Suan) to a scale of 1:240,000. All positions refer to this ch

GENERAL: Gypsum berth is situated at South end of Laem Na Th about 2.0 miles S.S.E. of the town of Khanom. There are two jett No. 1 is the Southernmost and older. The following remarks refer Jetty No. 2. A third jetty is planned to the N.W. of Jetty No. 2.

Gypsum is quarried about 200 km. away and brought by road in 25 lorries to be stockpiled near the berth. It is moved from the stockpile the conveyor in 16 ton lorries. Counting lorries seems to be the means of measurement.

Ships are moored to buoys off the jetty and are loaded via a fi conveyor. The ship has to be shifted to load each hold. The final is done on the rising tide, and the ship must sail immediately.

APPROACHES: From S.E., make for position Lat. 09° 12.0′ Long. 100° 00.0′ E., reducing speed after crossing the 20 m. cont The headland of Laem Kho Kwang, at about Lat. 09° 00′ Long. 99° 56′ E., is conspicuous on radar and helps to check posit

Laem Na Than consists of a series of very steep wooded h dropping sheer into the sea. The hill at the South end is conspicu as the coast South from there is low and fringed with a beach, wh the town of Ban Na Dan is shown on the chart.

The berth is very hard to see as the gypsum stockpiles are hid behind a wooded hill, and the two jetties are very small. The first t we saw was a ship at anchor off the berth.

Contact the Pilot on VHF Channel 16.

When about 7 miles from Laem Na Than, bring the South end of headland onto a bearing of 273°T and steer to make good a cours 273°T.

This course passes 7 cables South of the wreck charted in pos about Lat. 09° 12.8′ N., Long. 99° 56.1′ E. This wreck was not visib is supposed to be the remains of a wooden fishing boat and fishermen say it has now vanished.

The rising tide sets to the North, and the ebb runs to the South.

Watch the bearing of the South hill of Laem Na Than carefully as tidal streams set the ship quite strongly North or South of her cou The sea bed shelves gradually and evenly. After passing the pos of the wreck, come more to the North and anchor about 1.5 miles of Jetty No. 2 (North).

FORMALITIES: Agent, Pilot, Loading Master, Foreman and Surveyor board at anchor.

The Agent deals with formalities and requires the following docum

Crew List.
Crew Effects Declaration.
Stores and Bond List.
Passenger List.
Arms List.
List of Arrival and Departure dates at the last few ports.

One copy of each list was sufficient. Bonded Stores were not se or examined.

BERTHING: As the tide was flooding, we berthed heading South ship will require 3, preferably 4, ropes each end, of at least 380 m. normal 200 m. mooring ropes should be lashed together eye to Shackles are not suitable as the connection has to pass round drums. A total of 16, minimum 14, good mooring ropes are ther required.

The Pilot was very good. An assistant is stationed at bow and to advise on moorings. One tug of 1,500 h.p. is available. This is sea-going tug and not very manoeuvrable, but pushes as required. lineboats of about 250 h.p. are in attendance.

The offshore anchor is let go after clearing the buoys astern. in position, up to 7 shackles will have been paid out.

Four long lines are run to buoys at each end, 2 to seaward more or less ahead and astern, but slightly to seaward, two as ropes inshore of the jetty. After warping into position, 2 additional ropes are run out parallel. These can be single 200 m. lengths, advisable to prepare longer lines if possible (See "Plan").

The ship is positioned about 3.0 m. off the jetty, ready to load

BERTH: Berth No. 1 is the older, at the South end of the area. It is used by smaller ships that frequently shift to Berth No. 2 to top-off.

Berth No. 2 is about 30 m. long, aligned about 357° – 177°, and connected to the shore by a trestle about 200 m. long on an alignment of about 087° – 267°. The position of the head of the jetty is about Lat. 09° 12.4′ N., Long. 99° 53.2′ E. by GPS after applying corrections.

The jetty is of steel pile construction, its seaward face festooned with a random assortment of truck and tractor tyres. The ship must not lie against it. Occasionally during shifting, light contact was made. The berth is totally exposed to seaward, and during the N.E. Monsoon, ships are apparently thrown against it. Every Winter, the jetty has to be repaired. Judging by its appearance, repairs are in arrears.

DEPTHS: There are no tide tables for the port. The Pilot uses Thai tide tables for Ko Prap to the North, and Pak Phun to the South, and interpolates between them. The final loading is planned using readings taken from the tide gauge on the jetty.

We were told that zero on the tide gauge is about 0.8 m. above the sea bed. Soundings from the ship indicated that the water was a little shallower, about 0.4 m. deeper than the tide gauge. The depths increase immediately to seaward of the berth.

The policy is to stop loading when draft reaches 9.0 m., then on the flood tide top-off to about 0.2 m. less than the tide gauge reading, with a maximum sailing draft of 9.8 m.

LOADING: Gypsum is tipped into a hopper at the landward end of the jetty, and conveyed to the ship. The final stage of the belt is a telescopic and swivelling arm, that has a limited amount of range over the hatch. Max. airdraft is 12.5 m., or 11.5 m. during the N.E. Monsoon. Max. loading rate is about 800 t.p.h. Stowage factor is around 30 cu.ft./ton. No attempt is made to trim level with the loading arm. Instead, when each hatch is finished, a small bulldozer is hoisted in to trim level. The ship's cranes or derricks must be used for this. The bulldozer weighs about 3 tons.

The loading plan must be made out to reduce shifting to the minimum, but the shallow water and limited airdraft make deballasting difficult. When the draft reaches 9.0 m., loading will be stopped and the ship shifted to bring the midship hatch under the loader. As the tide rises, cargo will be loaded into this hatch until the final draft is reached. There is no opportunity to adjust fore and aft trim, so unless the cargo can be loaded exactly on the Centre of Flotation, the trimming effect must be allowed for at the earlier stop. The ship must sail before high water, and time must be allowed for the bulldozer to finish the last hold.

Cargo figures are calculated by draft survey.

SHORE LEAVE: No restrictions, and no passes needed. However, the ship must be shifted every few hours, so sufficient crew must be kept aboard to handle 8 ropes and the cable. If the ship's brow is used, it must be constantly attended as the vessel is not alongside. The Agent said that the plant would provide a launch to the seaward accommodation ladder, but we landed personnel using ship's cranes. Shore officials board and leave by scrambling along the (moving) conveyor belt.

FACILITIES: No stores are available, and we were told there were no medical facilities, though there is presumably something at Surat Thani, about 1.5 hours drive away.

The Agent and Pilots were all provided by the Charterer.

DEPARTURE: Tugs and lineboats ease the ship away from the jetty, helped by the anchor and No. 1 stern line. After this is let go, the ship is very hard to turn as she is so near the bottom. To seek the deepest water, steer to make good course 093°T, keeping the old jetty at the South end of Laem Na Than bearing 273°T, as described for approach. Maintain dead slow until soundings indicate adequate under-keel clearance. After passing position Lat. 90° 12.0′ N., Long. 100° 00.0′ E., the depth is great enough to ring full away and proceed on passage.

GENERAL: The Pilots and Loading Masters seemed very competent and apart from the shifting, all went well. There was no unauthorised boarding and pilfering. A Supervisor stays aboard during the load, and the 2 Pilots/Loading Masters stay for the last 24 hours.

The weather was calm. However during one squall, the ship sheered badly and the cable had to be hove in to keep ship off the jetty. During the N.E. Monsoon, I do not think this could be described as a safe berth. There are additional buoys to seaward near the No. 1 buoys fore and aft, which can be used to double up on moorings in the Monsoon.

SHIPMASTER'S REPORT: December 1993.

BERTH: Gypsum berth (Lat. 09° 12′ N., Long. 99° 53′ E.).

DOCUMENTS: Clearance is carried out by the Agent who takes all the required papers to the officials ashore.

NAVIGATION: The wreck in position Lat. 09° 12.8′ N., Long. 99° 56.1′ E. has been reported by local fishermen to the Pilot as non-existent. However, the Pilot advises that it is best to keep clear.

A gas pipeline is reported to have been laid from Khanom Power Station (Approx. position Lat. 09° 14.3′ N., Long. 99° 52.1′ E.) in an Easterly direction to the gas fields. It is therefore not recommended to anchor North of Lat. 09° 12.5′ N.

The Power Station is of recent construction and is reported to supply a large area.

ANCHORAGE: Vessels are advised to anchor in position 1.5 miles East of the jetty and South of Lat. 09° 12.5′ N. This was found to be a good anchorage with 6 shackles in about 12.0 m.

RADIO: Communications should be through the Agents, and after anchoring, a continuous watch should be kept on VHF Channel 16. The Pilot and local representative are equipped with VHF walkie-talkies which they use to contact vessels at anchor.

No continuous watch is kept ashore.

BERTHING: The gypsum loading facility (See "Plan") is privately owned and consists of 2 jetties on steel piles and a small quay built out from Laem Na Than for the loading of natural crude rock gypsum in bulk.

Jetty No. 1: Jetty No. 1 extends about 40 m. from the South side of the Point, providing a berth 70 m. long. It is concrete topped on steel piles with 2 fendered dolphins, one close East and one close West of the berth for protection. It can handle vessels up to about 8,000 d.w.t. with a max. draft of 7.8 m. forward and 8.6 m. aft.

Larger vessels may start loading on this berth and then move to Berth No. 2 to complete.

The loader on this berth is able to move through the 70 m. length of the berth, so shifting vessels between hold runs is not required.

Airdraft on this berth is estimated to be about 8.0 m.

Jetty No. 2: Jetty No. 2 is a 'T' jetty extending about 200 m. East of the Point, on steel piles of rather fragile construction. The original square end (35 m. wide) is well fendered with used tyres and now slightly rounded at the ends due to contact with vessels.

It was noted on berthing that a steel bracket on the Southern end of the jetty had previously been fractured.

This berth can handle vessels up to 190 m. LOA and 31 m. beam, loading to a max. draft of 9.2 m. at low water and 9.8 m. at high water.

The jetty supports a fixed loader which can swing through an arc of about 20 m. over the vessel with an outreach of about 18 m.

Max. airdraft is 11.0 m.

It is necessary to shift the vessel between runs for access to each hold.

Mooring: Mooring at both berths is to buoys with the offshore anchor used and starboard side to at Jetty No. 1 and portside to at Jetty No. 2. Mooring at Jetty No. 2: Two Pilots and the Supervisor board with the Agent at the anchorage.

One Pilot and the Supervisor take stations fore and aft to advise the Officers and ratings of the mooring arrangements and also take charge of the mooring operations.

It is necessary to have a minimum of 6 mooring lines at each end, 2 of which are joined end to end with 2 other ropes with shackles, if available, or lashings.

Approach is made either from the South on light draft, about 200 m. East of the jetty, or from the East passing North of the outer Southern buoys and the starboard anchor is let go when the outer buoys are in line with the bow.

Mooring lines are passed to the mooring buoys by 3 mooring boats and the vessel is moved into position by heaving on the moorings and the anchor is slacked away to about 7 or 8 shackles.

A tug of 1,500 h.p. assists as required.

The vessel is finally moored about 1.0 m. – 3.0 m. off the end of the jetty, heading North.

The Pilots have a set procedure for running the lines, and if this is followed, it is an efficient operation.

Shifting Ship: Shifting ship between holds is supervised by a Pilot and Supervisor who remain on board throughout loading and oversee all aspects of the operation.

If the set procedure is followed, the shifting is efficiently carried out without the assistance of main engines.

Weather: During the N.E. Monsoon, there is a continuous low swell causing the vessel to roll alongside.

The wind speed is watched carefully and the Pilot will not take vessels alongside in winds above 15 – 20 knots, and if wind speeds are expected to exceed 20 knots for a period, vessels will leave the berth and wait at anchor.

During this season, it is not unusual for a number of vessels to be anchored waiting to load.

It is reported that during the S.W. Monsoon all is peace and tranquility.

Tide: The tide is reported to be about 1.0 m. rise and fall.

There is a tide gauge on the South side of Jetty No. 2, and the ship's officers are requested to record the level hourly whilst alongside. The previous day's readings are used to predict the final day's high tide in order to complete loading on a rising tide to load the maximum cargo.

Depth: The Pilot reported that an allowance of 0.8 m. is made for the maximum drafts allowed.

This vessel sailed at 9.83 m. and a minimum depth under-keel of 0.7 m. was recorded, giving a total depth of 10.53 m. The tide gauge was reading 10.6 m., but with swell, this was not an acurate reading.

It is reported that the tide gauge depth covers the whole area off the Eastern Jetty. However, on the first approach to the berth from the South, a patch 0.4 m. less water was noted during the approach.

Cargo: Natural crude rock gypsum is mined some 180 km. inland and is brought to Khanom by lorry convoys and is stockpiled ashore in the open, so it is usually wet from rain.

The rock varies in size from about 15 cm. to dust and is brought from the stockpile to the loading hopper ashore by lorry and then to the vessel by conveyor belt.

A loading rate of 732 tonnes per hour was achieved for 35,000 tonnes loaded.

Stowage factor is quoted as about 30 cu.ft./tonne.

All stages of loading are supervised by the Pilot, who remains on board throughout and will modify the vessel's loading and ballast programme according to the tide conditions and to minimise shifting of the vessel and maximise cargo lifted.

FRESH WATER: Not available, so it is advisable to arrive with plenty, especially in the N.E. Monsoon, when long delays are possible.

MEDICAL: Medical attention is available for minor ailments locally and for more major problems at Surat Thani.

REPATRIATION: Vessel was advised before arrival that repatriation was not very practical and any crew changes should be arranged at ports before or after Khanom.

TIME: GMT plus 7 hours.

GENERAL: Provisions and bonded stores are available, but prices are high. Bonded stores in particular are more than double average prices elsewhere.

Immobilisation of the main engine is not to be recommended, especially during the N.E. Monsoon.

Sheltered anchorage can be obtained in position Lat. 09° 24′ N., Long. 99° 53.5′ E., in the lee of Ko Samui, and the Pilot advises that on occasions vessels have left the berth with the trimming bulldozer and shore moorings on board and completed trimming in this position, the shore equipment being landed to the tug for return ashore.

The anchorage off the berth is exposed to the N.E. Monsoon and swell.

Shore mooring lines, 3 in total, are available for an extra line aft and also for additional lines if required for bad weather.

In calm weather, a large number of small fishing boats work off the berth, inside the 10 m. line, inspite of this, no attempts to board the vessel were made, and it is reported that thefts from vessels in this area are unknown.

All staff employed were found to be pleasant to deal with, efficient and helpful.

SHIPMASTER'S REPORT: March 1994.

VESSEL: Gross: 4,576 tonnes. Net: 3,072 tonnes. D.w.t.: 8,875 tonnes. Summer draft: 7.62 m. LOA: 114.23 m. Beam: 18.6 m.
CARGO: Loading gypsum in bulk (7,600 tonnes).
CHART: We could not find any large scale chart or detailed illustration.
ANCHORAGE: About 1.6 nautical miles off shore. Depth about 15.0 m. Our anchor position was Lat. 09° 12.6′ N., Long. 99° 54.6′ E. Depth 14.5 m., mud and sand, holding is good.
DOCUMENTS: Same as other Thailand ports. Only the Agent boarded ship with documents/forms. No other officers come on board.
PILOTAGE: There are two Pilots, they act on behalf of the Port Authority, and communicate with the ship on VHF Channel 16.

The Pilot boarded the ship with two wharfmen. When the ship goes alongside, one will assist Chief Officer and the other will assist the 2nd Officer.

TUGS: One tug and two mooring boats available.
BERTHING: 2 private berths.
Jetty No. 1: Length about 60 m. (Position 09° 12.38′ N., 99° 52.875′ E. by GPS – Direction 254°). Depth said to be 7.5 m. forward and 7.8 m. aft, but we sounded on board 7.90 m. forward, 8.90 m. middle, and 9.40 m. aft.

There are no shore bollards for mooring. 3 mooring buoys forward and 3 mooring buoys aft are available. The mooring lines' lengths vary (150 m., 270 m., 350 m.). If ship's lines are short, it is possible to rent lines from shore.

Jetty No. 1 has a conveyor with capacity 600 tonnes/hr. and loading is throughout 24 hours.

Jetty No. 2: About the same conditions, but for larger ships (over 10,000 g.r.t.). Jetty length about 30 m. The ship shifts fore and aft many times for loading her cargo.
FRESH WATER: Available from shore.

KRABI: 08.04 N. 98.44 E. (See Plan)

DEVELOPMENTS: A deep sea port is to be constructed at Krabi. Construction to be completed between 1991 and 1997. Depth alongside 8.0 m. – 9.0 m.

SHIPMASTER'S REPORT: June 1987.

DOCUMENTS:
6 copies Crew List.
4 copies Crew Personal Effects Lists, including Currency Declaration.
4 copies Bonded Stores List.
4 copies Deck, Engine and Provisions Stores List.
2 copies All electrical items belonging to vessel (T.V., radios, tape recorders, video recorders, refrigerators, etc.).
Certificate of Registry.
Last Port Clearance.
All valid Safety Certificates.

Immigration: On arrival and departure all Crew Members have to sign a Thailand Immigration form in duplicate. All crew members must be in possession of Seaman's Discharge books.
APPROACHES: We used BA. Chart 3941. Berth can be approached from South West between islands of Ko Dok Mai and Ko Kai. Care must be taken of rock 6 ft. high (Him Hmusang), and the dangerous rock (P.D.) 1 mile N.N.W. of Him Hmusang. Coast and islands well defined on radar. It is best to approach in daytime due to the absence of any lights or navigational aids. The only light is East of Phuket (Ko Taphao Noi). The port can also be approached from South, keeping 2 miles to 3 miles East of Ko Kai and setting course 2.5 miles from Ko Ngang. The stockpile of gypsum is clearly visible from a distance of 6 miles. Approach is very picturesque.
PILOTAGE: No pilot available. A Loading Master boards with the Agent at anchorage and advises Master regarding manoeuvring and berthing. At berth vessel uses port anchor with 3 shackles and must have 14 good mooring ropes, minimum length 200 m. each and 70 mm. diameter.
ANCHORAGE: Anchorage when awaiting berthing is about 1.5 miles West of the trestle berth.
MAX. SIZE: Depth alongside at low water is 13.0 m. – 14.0 m.
HEALTH: Pratique granted by boarding party at anchorage. All ship's personnel to have valid Health Certificates.
RADIO/VHF: Bangkok Radio (HSA 4) used for contacting Agents and Charterers. VHF via Phuket Radio. Overseas calls can be made via Phuket Radio. Vessel allowed to use ship's radio station while loading.
TUGS: None available.
BERTHING: Vessel berthed at Leamphong Jetty at Krabi (South Thailand) to load Thailand natural gypsum in bulk.

Vessel manoeuvres to within 25 m. – 30 m. of the finger conveyor loading spout, and first drops port anchor. Then 2 lines each are given to bow and stern buoys, also 2 each to port bow and starboard bow and stern buoys. The vessel then breasts on the starboard lines to bring the starboard side to about 5 m. from the dolphin and spout. An extension conveyor is hung from the ship's crane to convey the gypsum into th hold. The vessel then shifts on mooring lines to bring the other hol under the spout. It is advisable to pre-plan loading so as to avo unnecessary shiftings.

All mooring lines are to have equal strain and are to be kept tig The bow and stern lines prevent the vessel from getting too close to t loading spout and dolphin.

Vessel must arrive with full ballast as the height from the waterline the loading conveyor 12.0 m.

Loading rate is approximately 300-400 tonnes per hour.

The vessel's cranes/derricks must be capable of lifting the extensi conveyor (approximately 3 tonnes) and bulldozer (approximat 2 tonnes).

MEDICAL: Medical attention only available in the most severe case The medical facilities are in Krabi town.
DENSITY: 1022.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: None available locally.
REPAIRS: No facilities available.
SURVEYORS: None locally, but may be arranged from Bangkok.
CUSTOMS ALLOWANCES: Normal allowances.
REPATRIATION: Possible through Bangkok.
SHORE LEAVE: Allowed. Nearest town is Krabi, distance 30 km., h the journey is on an uneven dirt road. Crew have to climb a vertical st ladder fixed to one of the trestle supports of the conveyor.

An excellent beach, safe for swimming, lies very close to the moorin
GENERAL: There is no need for special watchmen as only person required for loading board the vessel. There are about 10 persons board at any time. Other normal precautions to be taken.
Agent: Thaising Shipping Services Co. Ltd., No. 2/17-19, TSS Buildi Soi Sukhumvit 24, Phrakanong, Bangkok 10110, Thailand. Tel: 25 0247 (6 lines). Telex: 84436, 20012 (THAISIN TH). Cables: TSSSC Fax: (662)-258-5163.

SHIPMASTER'S REPORT: December 1988.

DOCUMENTS: See "Bangkok".

A large party of Customs and Immigration Officials, etc. will board launch when moored at the berth. Formalities quite straightforward.
PILOTAGE: No licensed Pilot as such, but a local "Berthing Mast may assist in berthing. This is recommended because the vessel h to pass between the mooring buoys, a number of which are below t sea surface. The ship's Master will have to manoeuvre hims Depths are in excess of 14.0 m. during the approach manoeuvres.
ANCHORAGE: About 1 mile from the berth in position Lat. 08° 04.4 Long. 98° 43.7′E. Depth of water 11 fathoms – 15 fathoms. The hold ground is good.
BERTHING: *Berth Position:* Lat. 08° 04.5′ N., Long. 98° 44.6′ E., ab 1.55 nautical miles from Ko Kwang. Name of berth: Leamplong Je Depth at berth: 12 m. minimum at LLWS. The berth consists of 7 moor buoys.
Mooring Arrangment: Port anchor to be used. The vessel will have prepare 5 light floating hawsers of 220 m. forward and 6 similar li aft.

Two launches are used to assist with the mooring operation, wh may be quite lengthy, because of the poor condition of some moor buoys. On our visit 3 of the buoys were half submerged, necessita the assistance of good swimmers/divers. Therefore, no attempt sho be made to moor during a squall or when a strong tidal stream is runn it may reach 2 knots at times. No mooring during night time.
LOADING: *Air Draft:* Strict maximum of 11.0 m., to the top of the ha coamings.
Loading Facility: The only commodity handled at this port is nat gypsum in bulk. A long flight of conveyor belts terminates on a wood platform on steel piles. These piles are quite dilapidated and on account may the ship's side rest against them. The final piece conveyor belt, about 15 m. long is held aloft by the ship's cran Therefore only geared bulk carriers are suitable to load here. Minim SWL of ship's gear to be 12 tons.

The vessel will have to shift with her mooring lines in order to pres each hold in front of the conveyor system. Trimming is done with as bulldozer.
Loading rate: 350 tonnes per hour (conveyor capacity). The daily load rate is about 7,000 tonnes, depending on stoppages for shifting vessel. Regular and careful check of the draft is necessary as there no weighing facilities ashore.
Working hours: 24 hours per day, Saturday and Sunday included.
Cargo: This natural gypsum has a stowage factor of a 0.82 cu.m./ton and has a water content as it is stowed in the o Within 24 hours to 48 hours of completion of a hold, the bilges already be full.
GENERAL:
Facilities/Shore Leave: Small quantities of fresh fish may be purcha locally, but very little else.

All access to and from the vessel is by launch and the starbo gangway.

The small town of Krabi is said to be 35 km. from the Leamplong J all by dirt road. Access is reportedly difficult during monsoonal rai

Shore leave is permitted but should be restricted in view of conditions.

The local agent, charterer's representative and one draft surv have to be accommodated on board during the whole stay.
Airport: The nearest airport is on the island resort of Phuket, whi connected by a regular boat service to the small town of Krabi. Ph has several daily flights to and from Bangkok and several Interna flights.
Charts: BA. 3941. No large scale chart available.

SHIPMASTER'S REPORT: August 1993.

1. The two submerged dolphins, one on either side of the conveyor, shown on "Plan No. 1", are no longer existing and do not represent any danger to vessel (This information given by Pilot).
2. There are now 2 mooring berths for loading gypsum. The configuration of mooring buoys is same in both cases (See "Plan No. 2").
3. A competent Pilot is stationed at Krabi. He boards all vessels and takes them to the moorings.
4. A total of 10 mooring ropes (not 14) were required (4 forward and 6 aft).
5. All mooring buoys are floating on surface. None were submerged. Two mooring boats assist in mooring.
6. Hawsers are available for hire at U.S.$ 100.00 per hawser throughout the full stay.
7. The breast ropes on port quarter are crucial and should be strong, especially in the months of July, August, September and October, when the Westerly wind tends to blow the stern towards the conveyor. Ships always go starboard side alongside.
8. There are no tugs. Fresh water is not available. Fresh vegetables can be bought at Krabi. Road is now good.
9. Authorities required photocopies of all statutory certificates, including copies of the Certificates of Competency of all deck and engineer officers on board.

LAEM CHABANG: 13.05 N. 100.53 E. (See Plan)

LOCATION: The Port is located on the Northeastern shore of the Gulf of Thailand, approximately 100 km. S.E. of Bangkok.
PORT LIMITS: Sea Buoy at channel entrance.
DOCUMENTS: See "Sriracha".
PILOTAGE: Pilotage is compulsory and will be provided by official Harbour Department pilots. Procedure for obtaining pilots is the same as for Bangkok.

Pilots can also be contacted by VHF Channel 13, 14 and 16.
ANCHORAGES: Anchorage can be obtained off Laem Chabang in position Lat. 13° 04′ 30″ N., Long. 100° 50′ 30″ E., at a distance of approximately 2.2 – 3.8 nautical miles from the port in depths of 14.0 m.

If necessary, sheltered anchorage can be found off Si Chang Island (Koh Si Chang, about 5 – 6 miles N.W. of Laem Chabang Port).
APPROACHES: The available depth in the Approach Channel is 14.0 m. at M.S.L. (approx. 12 m. at L.L.W.).

Directions: All vessels must obtain berth allocation from Laem Chabang Port prior to entering port. Procedure will generally be arranged through ship's Agent. No vessel should enter without berth having been allocated.

Vessels carrying hazardous cargo should obtain special permission from Laem Chabang Port, either through their Agent or directly.

To facilitate landfall, a light (flash 10 secs.) and racon are exhibited from Laem Chabang Hill (Khao Laem Chabang) VTS Station.

Port should be entered from a position off Buoy F. The direction of approach from sea into port entrance is 131°. Vessels pass between Entrance Buoys No. 1 and 2, and then between port and breakwater. The angle between the centre line of entrance and the port basin is 108°.
RADIO/VHF: Port radio services are available on following frequencies:

VHF:	Channels 12, 13, 14, 15, 16, 17, 18, 20, 23, 30, 67, 68 and 70.
HF:	8364 kHz, 8466 kHz, A1A, A2A 1 kW and 4145.0, 4420.8, 7949.0, 8292.5 kHz, J3E.
IF:	2182 kHz, A3E, H2E, 1 kW.
MF:	500 kHz, 428 kHz, A1A, A2A, 1 kW.

RADAR: A VTS Station, equipped with 'X' and 'S' band radar, is situated on top of Laem Chabang Hill.
TUGS: 2 tugs of 800 h.p. and 5 tugs of 3,000 h.p. are available. Tugs can be contacted on VHF Channel 13. Tug services are supplied by Laem Chabang Port.

Tugs will make fast upon Master's request, either inside or outside the breakwater.
BERTHING: There are 4 terminals available along the South Quay and they are numbered from landward to seaward.

Terminal B 1: Multi-purpose Terminal: Length 300 m. Depth alongside MSL 15.0 m. (approx. LLW 13.0 m.). Operated by Laem Chabang Port. Tel: (+66-38) 490000, Ext. 237. Fax: (+66-38) 490000, Ext. 236.

Terminal B 2: Container Terminal: Length 300 m. Depth alongside MSL 15.0 m. (approx. LLW 13.0 m.). Operated by: Evergreen Container Terminal (Thailand) Co.Ltd. Tel: (+66-38) 490052, 490060. Fax: (+66-38) 490068-70.

Terminal B 3: Identical to Terminal B 2. Operated by Eastern Sea Laem Chabang Terminal Co.Ltd. (ESCO). Tel: (+66-38) 490084-6. Fax: (+66-38) 490081-2.

Terminal B 4: Identical to Terminal B 2. Operated by TIPS Co.Ltd. Tel: (+66-38) 490111. Fax: (+66-38) 490121-2.

All Terminals have a height of 3 m. above MSL.

Along the North Quay, 3 terminals are available:

Terminal A 1: Coastal Terminal: Length 300 m. Height above MSL 3.0 m. Depth alongside MSL 6.5 m. (approx. LLW 4.5 m.). Operated by Laem Chabang Port (See "Terminal B 1").

Terminal A 3: Bulk Terminal: Jetty structure, water depth MSL 14.0 m. Operated for export of bulk and bagged sugar and for molasses by: Aawthai Warehouse Co.Ltd. Tel: (+66-1) 3532514. Fax: (+66-1) 3532514.

Terminal A 4: Bulk Terminal: Jetty structure to the West of the North Quay (along the Approach Channel), will probably be leased for bulk cargoes. Water depth MSL 14.0 m.
MAX. SIZE: 70,000 d.w.t. at the Bulk Terminal. 33,000 d.w.t. at the Container Terminal and 25,000 d.w.t. at the Multi-Purpose Terminal.
CARGO HANDLING FACILITIES: Each container terminal is equipped with 2 rail mounted quayside container gantry cranes of 40 tons capacity under the spreader, outreach 32 m.

They are also equipped with rubber tyred gantry cranes on the container yard and miscellaneous handling equipment.

The Multi-purpose and Coastal Terminals are equipped with mobile cranes.

Terminal A 3 is equipped with ship loader for bulk sugar.
CRANES: 6 quayside container gantry cranes with capacity 40 tons under spreader.

Mobile Equipment:
1×50.0 ton mobile crane.
1×40.0 ton mobile crane.
2×40.0 ton reach stackers.
2×42.0 ton reach stackers.
Forklift truck from 2 tons – 10 tons.
1×30.5 ton top loader.
1×30.5 ton container shifter.
3×30.5 ton 1 over 3 rubber tyred gantry cranes.
8×41.0 ton 1 over 4 rubber tyred gantry cranes.
Forklift truck from 2 tons – 10 tons.
Yard tractors, chassis and flat-bed semi-trailers and motor trucks.

MEDICAL: Full public hospital facilities available without prior notice are situated in Sriracha, about 10 km. to the North of the port.

Another modern hospital, which is private, is situated about 10 km. to the South of the port near the famous international seaside resort of Pattaya. Most doctors understand and speak English and other foreign languages.

The nearest is Laem Chabang Polyclinic and Ao Udom Hospital.
FRESH WATER: Fresh water delivered to vessels at wharves by pipeline by a rate of 30 t.p.h. Fitting on pipeline is 2.4 in. Minimum charge of 50 cu.m. Water 25 Baht/cu.m.
FUEL: Fuel can only be supplied by truck. Major oil suppliers can be contacted:

P.T.T. : Petroleum Thai Authority,
5th Floor, Industry Sale Section,
State Enterprise Sale Division,
Lardprao, Bangkok 10900.
Tel: (+66-2) 537-2321-25.
Fax: (+66-2) 537-2323.

Esso : 118/1 Sukhapiban 7,
Sukhapiban Road,
T. Tungsukla,
A. Sriracha,
Chonburi 20230.
Tel: (+66-38) 351-581, 351-195.
Fax: (+66-38) 351-583, Ext. 4736.

Shell : Shell Sriracha Tank Farm,
A. Sriracha,
Chonburi 20230.
Tel: (+66-38) 351-577, 351-302.
Fax: (+66-38) 351-578.

Caltex : 180/8 Moo 7,
T. Tungsukla,
A. Sriracha,
Chonburi 20230.
Tel: (+66-38) 352-333-35.
Fax: (+66-38) 352-335.

B.P. : B.P. Oil Co., Ltd.,
Lubricate Products Department,
Sitthivorakich Building,
11th Floor, 5 Soi Pirat,
Silom Road, Bangluk,
Bangkok 10500.
Tel: (+66-2) 235-5855-8.
Fax: (+66-2) 238-5313.

CONSULS: Embassies and Consuls are situated in Bangkok, about 120 km. (approx. 2 hours by road) from Laem Chabang Port.
REPAIRS: Only minor repairs can presently be executed.

An area to the North of the port has been leased for a ship repair yard, and is in use.
AIRPORT: An international airport is situated at U-Tapao, about 50 km. South of Laem Chabang.

Don Muang International Airport (Bangkok) is situated about 150 km. to the North.
HOLIDAYS: New Year's Day; Makha Bucha Day; Chakri Day; Songkran Festival Day; Coronation Day; Royal Ploughing Day; Port Anniversary Day; Wisakha Bucha Day; Asarnha Bucha Day; Buddist Lent Day; H.M. The Queen's Birthday; Chulalongkorn Day; H.M. The King's Birthday; Constitution Day; New Year's Eve.

When any one of these holidays falls on Saturday or Sunday, the following Monday is observed as a holiday. When any one of these holidays falls on Saturday and Sunday, the following Monday and Tuesday are observed.
POLICE/AMBULANCE/FIRE: Police Tel: (+66-38) 490555-6; Fire Tel: 210 or 211 (internal call); Ambulance: Call direct to the hospital or use the port ambulance.
TELEPHONES: Telephone on board are available on request. The charge is 300 Baht per day per line.
BANKS: There are many banks in this area, such as:

Thai Commercial Bank: Laem Chabang Branch. Tel: (+66-38) 331219-20.
Thai Farmer Bank: Laem Chabang Branch. Tel: (+66-38) 330920-1.
Bangkok Bank: Ao Udom Branch. Tel: (+66-38) 351148.
Krungthai Bank: Sriracha Branch. Tel: (+66-38) 312001-2.

GARBAGE DISPOSAL: Garbage is collected from vessels by truck or garbage boat at vessel's request. Charges are included in Port Dues. No drums or skips are made available (vessel's plastic garbage bags are generally used).

WASTE OIL DISPOSAL: No waste oil disposal service is presently available, but is expected by Mid-1996.

SEAMAN'S CLUBS: No Seaman's Club available. Shops, postage facilities, telephone services, etc., available at Pattaya, which can be reached by pick-up taxi.

CURRENCY: Thai Baht. U.S.$ 1.00 = 25.12 THB (8.6.94). One Baht divided into 100 Satang (almost out of use). Coins of 1 Baht (different sizes are in use), 5 Baht (Copper rim), 10 Baht (Copper inlaid centre) and bills of 10 (brown), 20 (green), 50 (blue), 100 (red) and 500 (purple) Baht available.

GENERAL: *Rescue and Distress:* The port tugs are available for rescue and distress missions. The Royal Thai Navy has a radio system, helicopters and ships available at Sattahip Naval Base for rescue and distress.

Rail Links: A railway links the Port (Container, Multi-purpose and Bulk Terminals) via a marshalling yard at Ao Udom and the Sri Racha Railway Station to the network of the State Railway of Thailand (SRT).

Small Craft Facilities: Small craft visiting the Port can generally berth at the Coastal Terminal. Alternatively, they can anchor in Laem Chabang Fishing Port, situated to the North of the Port, just South of Khao Laem Chabang.

No special yacht moorings are available.

Deratting: Deratting services are available. Contact Rentokil at 47/35-36 Moo 9, Sukhumvit Road, Banglamung, Chonburi. Tel: (+66-38) 422686-7. Fax: (+66-38) 426016.

Services: Ship chandlery is available. Contact ship's Agent or Terminal Operator.

Compass adjusting is available. Contact ship's Agent or Terminal Operator.

Tank cleaning services and hull painting services will be available by 1993.

Communication: Laem Chabang Port is connected by road to Bangkok and beyond, to Pattaya, Sattahip, Map Ta Phud and beyond, and to the whole N.E. part of Thailand.

The port is connected by road and will be connected by rail to Laos Pass through the bridge over the Mekong River in Nongkai.

DEVELOPMENTS: Laem Chabang Port is under studying for second stage of development.

AUTHORITY: Laem Chabang Port, T. Tungsukla, A. Sriracha, Chonburi 20230, Thailand. *Tel:* (+66-38) 490000/39. *Telex:* 75814 Lcp Th. *FAX:* (+66-38) 490142. *Contact:* Mr. Ramphoi Yamsaeng, Port Director.

AGENT: See "Bangkok".

MAP TA PHUT: 12.39 N. 101.09 E. (See Plan)

LOCATION: The Terminal is situated on the Eastern shore of the Gulf of Thailand between Sattahip and Rayong, approximately 180 km. East of Bangkok, in position Lat. 12° 39′ N., Long. 101° 09′ E.

ANCHORAGE: Lat. 12° 36′ N., Long. 101° 10′ E.

Depth: 15.0 m. (approx.). Bottom: Sand and mud.

RESTRICTIONS: Berthing and unberthing throughout 24 hours, weather permitting.

MAX. SIZE: 45,000 d.w.t., LOA 200 m. and max. draft 11.9 m.

TUGS: No tugs stationed at the port.

These services have to be arranged by ship's Agent. The number and capacity of tugs depends on vessel's size, draft and weather conditions and requirements of the Pilot(s), Ship's Master or the harbour authorities.

BERTHING FACILITIES: The marine terminal consists of 2 identical liquid cargo berths for import and export of mineral oils, chemicals and liquified gases.

Liquid Cargo Berth No. 1:

Length of Berth:	280 m.
Max. LOA:	160 m.
Water Depth:	12.5 m. (C.D.).
Max. Draft of Ship:	11.9 m.
Platform:	Fixed fendering.
Mooring:	4 mooring dolphins and 6 breasting dolphins (See "Plan").
Cargo:	Propylene oxide (PO). Butadiene (BD).

Liquid Cargo Berth No. 2:

Length of Berth:	280 m.
Max. LOA:	200 m.
Water Depth:	12.5 m. (C.D.).
Max. Draft of Ship:	11.9 m.
Platform:	Fixed fendering.
Mooring:	4 mooring dolphins and 6 breasting dolphins (See "Plan").
Cargo:	VCM, Naphtha.

Tidal and Weather Information:

Prevailing Wind:	S.W.'ly.	
Tidal Variation:	H.A.T.	+3.50 m.
	M.H.H.W.	+3.00 m.
	M.H.W.	+2.80 m.
	M.S.L.	+2.20 m.
	M.L.L.W.	+1.40 m.

MOORING: *Safe Mooring and Working Guide:* Thai Tank Termin Ltd. (TTT) is not responsible for towage operations of vessels. I compulsory that the services of a Pilot, who is authorised by IEAT to used each time the vessel has to be moved in the terminal area.

The following precautions are to be taken:

1. The Master is responsible for ensuring that mooring lines ar good condition, and that winches on securing devices are in effic operational order.
2. Any known defects in the vessel's mooring system or limitation mooring winch brakes should be reported to the Terminal Manag by the Master, in order that, if necessary, additional precautio may be agreed.
3. The Master shall ensure that the vessel's mooring ropes or wi are secured only to the proper fixtures provided for this purpos
4. In order to avoid damage to loading arms/hoses, the vessel sh be kept close alongside at all times.
5. Under no circumstances will a mixture of wires and synthetic rop in the same direction of service and to the same mooring point acceptable.
6. Where wires are used, they should be of similar breaking strai that of the rope.
7. Vessel must provide full power or steam on deck to all moor winches throughout the period alongside the jetty.
8. Once moored, vessel's winches must be secured with the bra hardened up. Winches must not be left on automatic tension.
9. Back springs should be as long as possible, and it is recommend that wires are used and secured to the mooring points on the je head/breasting dolphin.
10. Mooring lines must be adjusted under the supervision o responsible officer.
11. A strict watch must be maintained on the vessel's moorings at states of tide to ensure that all lines are properly tensioned a tended, to prevent undue movement of the vessel.
12. The Master should endeavour to ensure compliance with mooring layout.
13. The Terminal will require cargo operations to be stopped and tugs summoned if the vessel's movement will endanger load arms/hoses or in the absence of an alert efficient deck watch *delays/charges* caused by the ship's failure to observe the abo precautions will be for the ship's account.
14. In normal conditions, berthing/unberthing is permitted through 24 hours.

CARGO OPERATIONS:

Inspection of Vessels prior to Commencement of Loading/Unloadi Prior to commencement of loading or unloading operations, it shal the duty of the Master or Chief Officer with the appropriate T Representative to carry out inspections to ensure that all sa regulations are being observed.

Closing of Sea Valve connected with Cargo System: Prior commencement of loading or unloading operations, all sea suctions discharge valves connected to the cargo system shall be securely s and lashed, and stern discharge and other lines not in use, shal blanked-off.

Immediately after loading or unloading has commenced, a respons ship's officer shall make an overside inspection in the vicinity of all valves, to ensure that there are no leaks.

A similar periodical inspection throughout the loading or unload operations is required.

Closing of Doors, Portholes and Ventilators during Operations: W any cargo is being handled or during the ballasting, gas-freeing or t cleaning, after the unloading of such cargo, all doors and portholes the afterhouse facing on to the cargo tank deck, and the doors lea to the centrecastle from the accommodation shall be kept secu closed. All afterhouse ventilators shall be turned to face aft during th operations.

Loading and Unloading: Supervision and control throughout the pe of loading or unloading operations shall be exercised as follows:

1. A responsible ship's officer, who is thoroughly familiar with arrangements of the cargo lines, valves, pumps and cargo ven system of the vessel, shall be on duty, and an adequate numbe crew shall remain on board to deal with any emergencies.
2. A responsible member of the ship's personnel shall be stationed the vessel's main cargo control valve.
3. Prior to commencement of operations, the responsible ship's o shall confirm with the appropriate TTT Representative, that the st by, cease loading and other necessary signals, are prop understood and agreed.
4. During loading or unloading of cargo and when ballasting, all lids must remain closed. Ullage pipes and sighting ports ma opened for sampling and ullaging, but must be closed when samp or ullaging is not being carried out.

Agreement of Loading or Unloading Rates and Pressures: Pri commencement of operations, the maximum loading or unloading and pressure shall be agreed between the Master and the approp TTT Representative in charge of operations, bearing in mind the g of the products to be loaded or unloaded and the size and capac the vessel's cargo lines, gas venting system and vessel's pumps the appropriate loading or unloading plan agreed in writing.

Reduction of Loading or Unloading Rates:

1. Topping-off: When cargo tanks are being topped-off, loading should be reduced by means of the shore pumps or control va on shore on request by the ship's officer to the appropriate Representative. Under no circumstances shall any vessel atte reduce the rate of loading from shore by closing any vessel's va In particular, care should be taken to ensure that during chang from tank to tank, the valves to the empty tank are opened well b those on the tank being finished are shut down.
2. Line Clearing: Should any air or water be present in the line, pu speed should be regulated to eliminate the danger from s electricity until the air or water has been displaced.

Pressure Surge Precautions: Non-routine closing of the loading system's automatic intervention or "fail safe" closure of shipboard Emergency Shut Down (E.S.D.) valves can generate dangerous surge pressure. The Master may be asked to operate the system to enable timing of the valves to be checked, and may be requested to have valves adjusted according to the provisions of the IMO codes for vessels carrying Liquified Gases in Bulk.

TTT reserves the right to adjust loading rate if valve closing times are not compatible with the rates otherwise agreed.

Liquid Manifold: 2×8 in. hoses ANSI 150.

Please prepare manifold on the vessel's starboard side and reducer required from vessel in case of different manifold sizing.

Initial Discharge Rate: 700 cu.m./hr.

Max. Discharge Rate: 2,000 cu.m./hr.

BALLAST: *Ballasting:* As long as the vessel is moored at the berth, only segregated ballast tanks may be used. If it is necessary to ballast into the cargo tanks to maintain agreed manifold air drafts, permission will be granted by the Terminal Manager provided that:

(1) Cargo operations are suspended.
(2) Integrity between cargo and ballast is guaranteed by using a minimum 2 valves isolation.
(3) On commencement to ballast, pumps are to be started, and a vacuum shown on the pressure gauge before opening the sea valve.

Deballasting: Deballasting is not allowed in the harbour.

GENERAL:

Prohibition of Pollution:

(1) Pollution of the Terminal area by vessel effluent, condenser and waste water is prohibited.
(2) Soot emissions and any excessive exhaust emissions from the funnel or exhaust lines are to be avoided.
(3) Suitable measures are to be taken to avoid polluting the Terminal and personnel in the vicinity when water, vessel effluent and vapours are discharged.

Tank Cleaning:

(1) No tank cleaning or gas-freeing is permitted alongside, unless written permission has been obtained from the Terminal Manager.
(2) No vessel which has windsails in her tanks is permitted at berth alongside, unless such tanks are gas-free.
(3) No vessel is permitted to berth alongside when tanks are not gas-free, unless all tank openings are closed.

Product Spillage and Leakage:

(1) Prior to any handling of cargo or bunkers, all scupper holes shall be plugged and cemented in such manner as will make them leak-proof.
(2) All pipes, valves, connections and fittings, etc., used for handling cargo, shall be kept free from leakage.
(3) When loading or unloading has been completed, the flexible hose or hoses shall be drained and disconnected. Drip trays must always be used when pipeline connections are broken.
(4) If a product spillage occurs, the product shall be disposed of by a method agreed by the TTT Representative. Under no circumstances shall product be washed or swept overboard.
(5) All product spillage, whether on to the deck of the vessel or into the sea, must be reported immediately to the Jetty Operator, who will contact the necessary department concerned. Every possible action must be taken by the vessel and the Terminal to stop spillage, reduce spreading and recover the product.

Bunkering and Storing: No bunkering facilities are provided on the Terminal. Bunkering, storing and victualling of vessels may be permitted during operations, but only with permission of both the Terminal Manager and the Master of the vessel, provided that:

(1) Access to the Terminal is not obstructed.
(2) Cargo operations remain adequately supervised.
(3) Cargo operations which may allow vapours to escape on deck, e.g. sampling, ullaging, deflexing, etc., are suspended.
(4) Drums of oil, paint, steel plates, gas cylinders or any other heavy metal parts, which may cause a spark, should be landed on rubber or other suitable matting and not directly onto vessel's deck. These items must not be dragged or rolled along the deck.
(5) If an oil spillage occurs, the oil shall be disposed of either by mopping-up or by a method agreed by TTT Representative. Drip trays must always be used when pipeline connections are broken. Under no circumstances shall oil be washed overboard.
(6) The appropriate document indemnifying TTT against all accidents has been signed.
(7) The designated point for setting down of vessel's stores is at the discretion of the terminal personnel.
(8) If the above criteria are not met, TTT reserves the right to refuse permission.

Supply Vessel's Alongside: No supply vessels are allowed alongside.

Bathing: Bathing will not be permitted from the platform and approaches, or from the vessel whilst alongside.

Communications: Once a vessel has berthed, Terminal Supervisor will place a portable radio aboard the vessel to be used by the vessel for contacting the Terminal during operations. The radio will be set for direct contact with the Jetty Operator and Terminal Supervisor.

Safety Check List: The Master must complete and return to the Terminal Supervisor a Safety Check List certifying that all statutory conditions have been complied with, all necessary loading valves onboard are properly set, and the agreed Loading/Unloading Signals are understood. A copy of the Safety Check List, signed by both vessel and Terminal Representative, is to be retained on the vessel.

Thunderstorms/Suspension of Operations: During severe thunderstorms, or other climatic conditions, which may be hazardous to the safety of the operations, the loading or unloading of any cargo may be suspended by the responsible ship's officer and/or the appropriate TTT Representative.

All valves and tank openings should be closed, and where required, hoses or arms disconnected.

Repair Work and Maintenance: No boiler cleaning, chipping, scaling and scraping of steelwork, or work likely to cause sparks, shall be undertaken on any vessel (and no iron or steel hammers or other instruments, capable of causing sparks, shall be used for the purpose of opening or closing hatches), unless prior written permission of the Terminal Manager has been obtained.

Clearance of the Vessel: Owing to the highly flammable nature of the products handled at the Terminal, and in order to comply with the Petroleum Regulations, it is necessary to exercise strict control of access to the area.

Unauthorised persons are not allowed to enter a vessel berthed alongside the Terminal until it has been cleared by Agents and the Authorities.

TTT personnel and Representatives shall have access to the vessel for the performance of their duties. The Master will give them all the necessary information with regard to operations and shall allow them to inspect all safety equipment and handling facilities. Back-up support by the vessel's crew is to be assured.

Controlled Access to the Terminal: Persons with valid works passes are allowed to enter the Terminal to proceed to the jetty. Persons having lawful business with vessels, tradesmen and suppliers will be issued with a day pass by the Security Officer.

Crew members of a vessel are not allowed to enter the Terminal without permission, as mentioned in "Marine Terminal Pass Form".

The entry of women to the Terminal is restricted to female members of a vessel's crew or the wives of crew members.

The co-operation of the Masters and Shipping Agents is requested in the interest of safety.

There shall be prepared a gangway of approved pattern as means of access to a vessel. It shall be properly secured and tended. A notice board shall be displayed in a prominent area near the access to the vessel indicating "No admittance except on business" and "No smoking allowed".

Immobilisation of Engines:

(1) The main engine shall always be kept ready for immediate use. Urgent repairs may only be undertaken with written approval from the Terminal Manager.
(2) Repairs which restrict the manoeuvrability of the vessel may only be carried out and on the condition that the Master hires sufficient stand-by tugs to move the vessel, if so required. All consequential costs resulting from repair work carried out on the vessel while it is moored at the Terminal shall be borne by the vessel.
(3) Should the repair works represent a risk for the Terminal, or should the conditions of the approval be contravened, the Terminal Manager may require that the vessel be removed at the Owner's costs.

Anchors: Every vessel shall have anchors ready for immediate use.

Emergency Towing Wires: Any vessel, whilst alongside the Terminal, shall provide emergency towing wires of sufficient length to reach the water's edge with about 20 m. flaked on deck with an eye on the outboard end and inboard end made fast to the vessel's bitts on the offshore bow and quarter.

Number of Crew: The Master shall at all times retain sufficient crew on board to operate the vessel.

Gangway: Vessel's gangway required (Jetty platform: +7.5 m. (C.D.)).

SHIPMASTER'S REPORT: July 1994.

Vessel: 38,600 d.w.t. LOA 182 m. Max. draft 10.97 m. Arrival draft 10.0 m.

Cargo: 29,700 tonnes of Naphtha.

Port of Map Ta Phut (Rayong), Thailand.

The commercial port of Map Ta Phut was opened in 1992 and is developing strongly. Vessel berthed at Thai Tank Terminal Ltd. (TTT) Berth No. 2, and was the first ship to discharge naphtha at the pier, therefore the discharging was slow, 1,500 cu.m./hr. (maximum) through 2×8 in. hoses. The storage tank for naphtha is 56,000 cu.m. The berth has been completed, but the Chicksan arms have not been installed yet, also the shore gangway was missing. This is also the case on Berth (TTT) No. 1. Maximum draft at Berth No. 1 and No. 2 is 11.90 m.

Thai Tank Terminal only stores chemicals and petroleum products, and distribution of the products to the chemical industry in the area is by means of a 16 in. pipeline (about 5 km. long).

Pier No. 2 is to be fully equipped before the end of the year. Thai Tank Terminal facilities are inside the port, sheltered by manmade breakwater and fairly well protected from swell.

Berthing is possible throughout 24 hours, but the weather might delay Pilot to working during daylight hours only. Also the buoys and leading lights are unreliable, according to the Berthing Pilot.

The Terminal Manager of the Thai Tanker Terminal Ltd. said that this matter is underway and Thai Tanker Terminal has good co-operation with the Port Authorities. The buoys and leading lights are to be upgraded.

On the West side of the port, there is a long pier and at its end is a chemical berth. This is specially venerable to the weather. Frequent delays will occur at this pier, due to difficulties of berthing during bad weather.

The port is developing fast, also towards the East of Thai Tank Terminal. Building of new berths is underway for Shell and Caltex. These berths are mainly to serve the refinery, being built by Shell/Caltex. These piers are for loading petroleum products. The refinery is going to be supplied by a SPM Buoy 23 nautical miles offshore and is going to be able to receive VLCC's. The Thai Tank Terminal Ltd. is hoping to get the management of the SPM operations. The Manager said that if the demand for tank storage is fulfilled, they are going to need 3 times the land they have. TTT has the first option on the area between their facilities and the West pier for chemicals. This mentioned land is now sea and has to be filled-in.

The roads from Map Ta Phut to Bangkok are good, but towards the East, improvement of the roads is still going on. Pattaya is about 45 minutes drive from Map Ta Phut.

OPERATOR: Thai Tank Terminal Ltd., Liquid Cargo Terminal, Map Ta Phut Industrial Port, P.O.Box 21, Map Ta Phut, Rayong 21150, Thailand. *Tel:* (038) 683172. *FAX:* (038) 683173. *Contact:* Mr. Jirachai Naiwattanakul, Operations Manager.

PHUKET: 07.49 N. 98.25 E. (See Plan)

LOCATION: The Port of Phuket is located on the Western seaboard of Thailand, on the Andaman Sea in position 07° 49′ N., 98° 24′ 30″ E.

DOCUMENTS:

Entry documents and advance information.

Customs and Immigration Entry forms as well as list of other documents required on *vessel's own forms* to be completed in advance for presentation on arrival Phuket. Sent in advance fo the Agent from one of the previous ports together with request for the following information required 4 days in advance of vessel's arrival.

Confirmation of ETA and any subsequent revised ETA.
Master's name.
Last port of call before Phuket.
Next port of call after Phuket.
Net registered tonnage (n.r.t.).
Hatch distribution and gangs workable.
Cash advance of Master.

Flags: Vessels are required to fly the Thai flag and display the code flag "Q" on arrival.

PILOTAGE: There is no official Pilot available.

ANCHORAGES: The following anchorages are regularly used by ocean carriers of deep draft calling Phuket for loading or discharging cargo.

During the N.E. Monsoon Season: Prevailing wind from November through March, and periods of strong Easterly winds, vessels are recommended to anchor in position Lat. 7° 53′ N., Long. 98° 27′ 15″ E. about 0.5 mile off Laom Mai Pai to pick up the boarding party and stevedores, before proceeding to the actual anchorage for loading at position Lat. 7° 57′ N., Long. 98° 33′ E., about 1 mile off Koh Yac Hyai, depth approx. 16 m. (50 ft.) at LWOS. However, during calm weather periods, cargo operation will be carried out at the first mentioned anchorage.

During the S.W. Monsoon season: Prevailing from April through October, and any periods of strong Westerly winds, vessels are recommended to anchor at position Lat. 7° 53′ N., Long. 98° 27′ 15″ E. about 0.5 nautical miles off Laom Mai Pai, depth approx. 14 m. or 45 ft. at LWOS.

To facilitate cargo operations during swell from South, vessels are requested to anchor as close as possible to the above anchorage positions according to the Master's judgement.

No Pilot is required on approaching the above anchorage; however, it should be noted *three ocean-going dredgers* are operating in the area between Koh Dok Mai and Kon Khai Nok which should be passed at a distance of about 1,500 ft. to keep clear of their anchor lines. The dredgers are lit up and clearly visible at night.

It should also be noted during the new moon period there are several small fishing craft in the area.

RESTRICTIONS: *Channel:* The channel around Koh Tapae Kyai is normally passed clockwise and is marked by a system of buoys, the position of which are shown on Thai charts. However, it is also possible to turn around by swinging on the anchor just after passing Buoy No. 3 on a rising tide (South to North) just before high tide.

Width of Channel: Minimum 230 ft. at Buoy No. 6 measured (chart datum at LLW) at 6 m. depth curve. Maximum 900 ft. at Buoy No. 4 measured at 6 m. depth curve.

Restriction in Navigation: (1) Entering or leaving through the North channel involves a rather sharp turn with a radius of about 1,000 ft. and angle of about 115° between the axis of channel in a restricted area between Buoy No. 6 and Koh Tapai Noi Island. Please also note the wreck buoy between Buoy No. 6 and Koh Tapao Noi.

(2) The draft at Buoy No. 6 is about 24 ft. 6 in. at Lowest HW.

(3) At Buoy No. 5 are placed two pairs of mooring buoys parallel in the channel, occasionally used by tankers discharging petroleum products to Esso and Shell installations ashore. The width between the narrowest pair is about 150 ft. and vessels are required to pass between these mooring buoys.

HEALTH: All crew and passengers must have valid health certificates for cholera.

RADIO: Messages to and from vessels at sea on the West coast of the Malayan Peninsula are best transmitted via Penang Radio in time to allow re-transmission to Phuket at about the following local times:

Weekdays at 0930 hrs., 1400 hrs. and 1630 hrs. Sundays at 1630 hrs.

For vessels outside this area, messages can be sent via Bangkok or Singapore as applicable. Cables via Bangkok Radio are normally transmitted every second hour from 0800 to 2100 hrs. local time, whereas cables via Singapore are sometimes re-transmitted via Bangkok Radio and sometimes via Penang Radio.

There are no facilities for ship-to-shore communication in Phuket, but vessels are *not* required to close down their radio station or VHF set while in port.

There is long-distance telephone connection with Bangkok, Penang, Singapore and Kuala Lumpur from Phuket at all hours.

Despatch Cables: Agent will in all probability need to send cables via the ship's radio re-loading results, etc., subject to the Master's approval. The cost of all such cables is to be borne by the vessel.

TUGS: 1×2,000 h.p.

BERTHING: New Port: *Phuket Ocean Terminal:* C.T.International Lin Co.Ltd. entered into an agreement with the Royal Thai Government t manage and operate the port for 10 years from 21st October 1988.

Access:

(1) Access for vessels entering or leaving the port is via a 120 m wide channel, dredged to 9.0 m., and is 1.5 km. in length.
(2) There is a 360 m. turning circle to the North of the quay.
(3) Tidal range at Springs is 2.7 m.

Facilities:

Total Area	: 65 acres (26 hectares)
Ship Berths	: 2
Barge Berths	: 4
Total Berthing Length	: 1,180 ft. (360 m.)
Depth	: 10.0 m.
Forklifts	: 8× 2 – 3 tons
	1×25 tons
Tow Tractors	: 4×40 tons
	2× 5 tons
	1×10 tons
Drawbar Trailers	: 4×40 tons
	3×10 tons
	6× 5 tons
Front Loaders	: 1
Annual Maximum Handling	: 32,000 TEU.
Stacking Capacity	: 5,200 sq.m.
Transit Shed	: 38,736 sq.ft. (3,600 sq.m.)
General Cargo Area	: 55,952 sq.ft.

Old Port: At Laen Klusi, Thailand Smelting and Refining Co. Ltd. have built a crossway connected by a short bridge to a pier which is paralle to the channel. The pier and channel are presently only suitable t accommodate vessels up to about 10,000 d.w.t. and approx. 430 ft. long not exceeding 22 ft. draft. Vessels berthing at the pier are recommended to anchor at position Lat. 7° 48′ 24″ N., Long. 98° 25′ 12″ E. to awa loading and favourable tide.

Dimensions of the Pier: Length 61 m. (200 ft.), width 12 m. (40 ft.). Depth about 24 ft. 6 in. at LLW.

Fenders: The pier is protected by a system of wooden fenders in additio to which there is 1 fender at each end of the pier with solid rubbe buffers.

Mooring Buoys: There are 2 mooring buoys about 700 ft. apart, each at equal distance from the end of the pier.

MEDICAL: It is only possible to get a doctor on board in the most severe cases, but otherwise there are two hospitals in Phuket, one of which is managed by American Seventh Day Adventists Mission Doctors, and the other is a General Hospital.

FRESH WATER: Limited and difficult to obtain.

FUEL: Limited and difficult to obtain.

CONSULS: None.

SURVEYORS: No marine surveyors in Phuket; however, a surveyor can be called from Bangkok.

REPAIRS: No facilities.

POLICE/AMBULANCE/FIRE: Police Tel: 212046. Marine Police Tel: 214368, 211883. Police (Emergency) Tel: 211883. Fire Tel: 211111, 212456-7.

DEVELOPMENTS: 2 berths under construction. Depth alongside 10.0 m.

SHIPMASTER'S REPORT: January 1992.

Chart: B.A. Chart No. 3941.

Pilotage: Pilot not required for anchoring. Pilot may be contacted on VHF Channels 16 and 13 during working hours only, which are normally from 0600 hrs. to 1800 hrs.

Anchorage: Vessel anchored near the new fairway buoy off Laen Phan Wa Point (Position Lat. 07° 47.86′ N., Long. 98° 27.24′ E).

The anchorage is exposed to winds from the South and East and vessel dragged anchor when first anchored due to strong tide. The bottom appears to be coral. When it was noticed that the vessel was dragging, 5 shackles were lowered into the water and this held the position of the vessel in a Force 4 wind from the East which was across the tide and with a 2,500 tonne barge alongside.

Approaches: Laen Phan Wa and Ko Tai Phao Noi lights are conspicuous.

There is a dredger working in position Lat. 07° 46.6′ N., Long. 98° 27.2′ E. and it is not very well lit.

Strong currents were experienced when approaching the anchorage and vessel was set rapidly to the North, due to the flood tide.

There are numerous fishing boats to the South and West but the anchorage itself was clear.

The fairway buoy has been moved to position Lat. 07° 47.86′ N., Long 98° 27.24′ E and it has no light.

Max. Size: Maximum permissable draft 9.0 m.

Tugs: There are two tugs available, one is owned by the port authority and the other is privately owned. Both are 2,500 h.p.

Cargo Operations: Vessel loaded latex from a 2,500 tonne barge which has 10 tanks, each with a capacity of 250 tonnes. The barge is brought to the ship by a harbour tug.

It is possible to load two ships tanks at one time through 1×6 in. hose from the barge which is split into 2×3 in. hoses through a portable manifold. Cargo is loaded over the top. Loading rate is approximately 85 tonnes/hr.

No survey papers are required. The SGS surveyor did his own tank survey.

The surveyor, agent and shipper were on board throughout the operations.

General: Three persons from the agent's office board with customs and immigration and assist with completion of documentation. There is no boarding or clearance between 2100 hrs. and 0700 hrs. Many port officials board the vessel.

Ships papers are generally accepted but an official Crew Manifest is to be completed and all crew members to sign, the ship's Manifest is then attached. A 'nil' Cargo Manifest is required if the vessel has no cargo to discharge.

The airport is 18 miles to the North of the port and has frequent flights to Bangkok. No difficulties were experienced by crew leaving or joining. A boat service can be arranged through the agent.

SHIPMASTER'S REPORT: September 1993.

Chart: B.A. Chart No. 3941.

Approach: Laen Phan Wa and Ko Tachaonoi Lights are conspicuous. By day Komaithon Island is a good landmark for the port approach.

Pilot: Berthing daylight only. Night sailing without Pilot by arrangement.

Pilot boards from tug at Fairway Buoy and departs off berth at Buoy No. 5. Pilot spoke poor English.

VHF used when vessel expected, but not before 0800 hrs. No Pilot for anchoring.

Anchorage: About 0.4 miles East of Buoy No. 1 in 18.0 m. for loading latex from barge.

A large swell is experienced at times.

In 1991, a sister ship dragged anchor.

Channel: Leading lights discontinued. Beacons still in position. A new buoy to West of Turning Basin (Buoy No. 6) now positioned at Lat. 07° 49.3′ N., Long. 98° 24.45′ E.

Vessel swung in Turning Basin with aid of tug, to berth starboard side alongside.

Depth as charted (minimum 9.0 m. C.D.), in fact found slightly more.

Berth: Flat faced concrete quay with good fenders. We berthed at the South end of the quay with bow overhanging about 20 m. North Berth used by small cruise liners and tourist craft to local islands. There was 10.0 m. C.D. alongside at South end.

Moorings 2,1,2, each end. Bow moorings, except springs, all breast lines.

Accommodation ladder landed on quay.

Fresh water obtainable from quay hydrants.

Tugs: 1×2,500 h.p. tug available. Tug generally just pushes.

Loading: Latex direct from shore tanks at South end of quay, also from 25 tonne tank trucks and barges.

Loading rate about 90 t.p.h. Sometimes three tanks loaded at once.

Shippers have a tendency to short deliver their nomination which causes ullages. Can sometimes be made up using spare capacity in short tanks if grade correct. We had one tank left slack (below 100%), protest noted for product deterioration and deadfreight.

Product comes from far afield in Thailand.

Very messy loading, the least professional of the latex loading ports.

Medical: Quickly dealt with and efficient.

Stores: No Chandler. Agent will assist with shopping.

Authorities/Documentation: Agent makes out a lot of Thai forms which have to be signed. Thai Personal Effects Manifest, which has to be signed by each crew member with ship's copies attached.

Repatriation: No difficulty either way through Bangkok from local airport.

Shore Leave: A big holiday resort with all the usual attractions.

AUTHORITY: *Operator:* Chaophaya Terminal International Co.Ltd., Tambol Ao Makam, Amphoe Muang, Phuket 83000, Thailand. Tel: 391155-60. *Telex:* 69512 Pkport. *FAX:* (076) 391157.

AGENT: See "Bangkok".

SATTAHIP: Chuk Samet Port: 12.35 N. 100.55 E.

(See Plan)

LOCATION: Sattahip Bay is located on the Eastern coast of the Gulf of Thailand about 184 km. from Bangkok in Plutaluang sub-district of Cholburi Province.

PORT LIMITS: Extend to approximately 1,500 yards from the quay wall at Chuk Samet Port, and 1,000 yards from piers at Tungprong Port.

DOCUMENTS: See "Bangkok".

APPROACHES: The entrance channel is 100 m. wide, 2.7 km. long and the harbour basin 450 m. wide in front of the West quay-wall, having available a depth of about 10 m. below Lowest Low Water (LLW).

The entrance light buoy is at Lat. 12° 35′ 07″ N., Long. 100° 54′ 20″ E.

PILOTAGE: Compulsory for vessels over 50 m. LOA. Working daily during the day time only. Advance notice required 4 hours prior to arrival on working day (on holiday notice required at 0830 – 1200 hrs.). Radio frequency used when handling the vessel is 27125 kHz

ANCHORAGES: Anchorage area for waiting berth and Pilot:

Chuk Samet Port: Capacity: Eight deep-draft ships minimum depth 8 fathoms.

Tanker Berth (Pol Pier)	Commercial Berths (DWP 1 – 4)
Lat. 12° 37′ 03″ N.	Lat. 12° 37′ 25″ N.
Long. 100° 55′ 00″ E.	Long. 100° 55′ 00″ E.

Tungprong Port: Capacity: Four deep-draft ships minimum depth 10 fathoms.

Lat. 12° 43′ N.	Lat. 12° 45′ N.
Long. 100° 49′ E.	Long. 100° 49′ 30″ E.

Map Pier:

Lat. 12° 41′ 47″ N.	Long. 100° 50′ 31″ E.

RESTRICTIONS: Berthing possible throughout 24 hours.

MAX. SIZE: See "Berthing" and "Tankers".

RADIO: Radio telephone.

Name of Station	*Frequencies*	*Remarks*
MSC	2738 kHz	Day time
Portsat	2738 kHz	Day time
	4145 kHz	R/T – SSB
	6220 kHz	R/T – SSB
	8292.5 kHz	R/T – SSB

VHF: Calling Channel 16 (156.8 MHz)
Calling Channel 14 (156.7 MHz)
Interport use 157.5 MHz (Special Channel)

TUGS: 2 tugs available, 3,000 h.p. Join when vessel approaches berth, charge for use of tug's lines. 2 mooring boats available.

BERTHING:

Limitation of Draft:

Chuk Samet Port: Depth 32 ft. below LWOST or 36 ft. below MLW.

(1) For cruising in the channel
32 ft.
– 3 ft. for squat, tidal phenomena, etc.
– 2 ft. for under keel clearance
Draft = 27 ft. at LWOST

(2) For staying in port
32 ft.
– 2 ft. for under keel clearance
Draft = 30 ft. at LWOST

(3) Draft of the vessel could be increased for the day alongside by adding the figure of the height of tide at low water of that day to the figure of draft in (2) above (30 ft.+Height of tide at LW).

Sattahip Commercial Port:

Berth	*Length* (m.)	*No. Berths*	*Max. LOA* (m.)	*Max. Draft* (m.)
West Quay	540	3	180.0	9.0
North Quay	360	2	150.0	7.8

Cruise passenger ships are permitted to berth at Sattahip.

Map Pier: 1 berth, length 443 ft. Depth at MLW 38.8 ft.

CARGO HANDLING FACILITIES:

	No.	*Capacity*
Forklift trucks	7	7,000 lb.
Shortmast trucks	7	5,000 lb.
Yard hustlers	5	—
Chassis	15	—
Top loader	1	35 tons
Transtainer	1	—
Straddles – 8×40 ft.	3	—
– 8×20 ft.	3	—
Semi-portal cranes	2	23-45 tons
Pallets	1,000	—
Van carriers	10	—

Storage Area:

3 transit sheds, total area 11,470 sq.m.
Open storage area of 190,000 sq.m.
1 container freight station.
Container yard of 36,000 sq.m.

STEVEDORES: Vessel to advise Agent 7 days prior to arrival. Text required in this cable is: flag, ETA, draft, tonnage of cargo aboard for port, number of crew/passengers, dangerous cargo/heavy lifts, gangs required.

194 stevedoring contractors (both liner terms and chartered vessels under F.I.O. terms).

Working Hours: 0800-1200 hrs. – day shift, 1300-1630 hrs – day shift, 1630-1800 hrs – overtime (working through), 1900-2400 hrs. – first half-night shift, 0100-0500 – second half-night shift, 0500-0700 – overtime (working through, but should apply for P.A.T. approval).

On Saturdays, Sundays and public holidays, the day shift finishes at 1600 hrs.

MEDICAL: Hospital facilities available.

TANKERS: *POL Jetty:* Max. size 50,000 d.w.t., max. LOA 820 ft., depth alongside 36 ft., max. draft 30 ft. (plus/minus, depending on time and tide). Diameter of shore lines are 6 in., 12 in. and 20 in.

DENSITY: 1021.

FRESH WATER: Limited, 200 tons per trip, addition 100 tons for boiler. Supply can be made by water trucks, advance notice of ETA required.

FUEL: Available, supply can be made by barges, advance notice of ETA required.

REPAIRS: Only for minor repairs.

GANGWAY/DECK WATCHMEN: Necessary.

OPENING/CLOSING HATCHES: Carried out by stevedores without extra charge.

CUSTOMS ALLOWANCES: 200 cigarettes for each officer, 100 for each crew member for 3 days. One bottle each, wines and spirits, opened.

CARGO GEAR: Supplied by stevedores.

TIME: GMT plus 7 hours throughout the year.

POLICE/AMBULANCE/FIRE: Security centre 2187; Duty officer 2102 (after duty hours); Police 3180; Ambulance 116; Fire 117.

TELEPHONES: Available (U.S. military circuits).

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Required for all crew and officers.

SHIPMASTER'S REPORT: July 1981.

CHUK SAMET PORT:

For details concerning navigation, currents, clearance and documents, etc., see "B.A. Pilot No. 30" and "Guide to Port Entry".

Vessels approach on the beacon line at 017.5° (T), along the fairway marked by buoys. The beacons are installed on the pier and are easily visible. When entering and leaving, the cross current should be watched. The fairway buoys appear to be displaced somewhat Westwards.

Entry and Leaving: Only permitted between 0600 hrs. and 1800 hrs.

The Pilot comes from Bangkok. Also Authorities come from Bangkok for clearance.

A local Agent's office is not yet available, but will shortly be installed.

Wireless traffic from the port with Bangkok is permitted.

There are two tugs of 3,600 h.p. available.

Max. Draft: At present 32 ft. is allowed.

The pier running approximately North – South is 500 m. long, and the cross pier 365 m. long. Both are well equipped with rubber type fenders. The free area on the pier in front of the sheds is about 45 m. wide.

Cargo Handling: Both cranes and the tapioca conveyor can run on the crane rails both on the main and cross piers. The large crane lifts up to 40 tonnes at 35 ft. The small crane lifts 23.5 tonnes but is currently out of use, but should be back in service shortly. The port has 20 forklift trucks, 10 at 3.4 tonnes, and 10 at 2.3 tonnes. Also there are 10 lorries type HINO KL 340 at 7 tonnes.

A Sea Container Shifter is already available, capacity 30 tons. For containers there are three 40 ft. and three 20 ft. spreaders in the equipment store.

Water: Any quantity available. Water must be boiled prior to use.
Bunkers: Only by road tanker.
Ship Repairs: None.
Ships' Chandler: Should be available.
Hospital: Available.
VHF: Port Authority on Channel 16.
Weather Conditions: During S.W. monsoon there is a slight swell. From May to July is the rainy season, with storms and typhoons occurring in June and July. Currents are unimportant. The tide rises about 2 m.
General: S.W. from Sattahip, in the Thailand Gulf, natural gas is obtained. A gas pipeline from there to Sattahip is under construction. The line will then be taken overland from Sattahip to Bangkok.

A railway connection is being built. A road to Bangkok (approx. 180 km. = approx. 3 hours by car) is available.

Further Developments: Dredging and building of new piers will begin.

A large Gottwald crane (mobile at 40 tonnes) is stated to have been ordered, and will be delivered in about 6 months.

It is planned later on to install a IHI container bridge, and Sheds 1 and 2 will be demolished to make room for container handling.

AUTHORITY: Port of Thailand Authority, Sattahip Commercial Port, Plutaluang Sub-District, Sriracha District, Chonburi 20180, Thailand. *Tel:* 038-436344/436360. *Telex:* 75702. *FAX:* 038-436565.

From 1st January 1991: Royal Thai Navy.

AGENT: See "Bangkok".

SONGKHLA: 07.14 N. 100.35 E. (See Plan)

APPROACHES: The entrance channel is 4 km. long, and is dredged to 9.0 m. over a width of 120 m.

There is a turning circle with a diameter of 300 m. to the West of the quay.

PILOTAGE: Available. Pilot boards in the vicinity of the Fairway Buoy.
ANCHORAGE: To the West of the leading line (045° – 225°) and 090° from Ko Maeo Island in a depth of 9.3 m.
MAX. SIZE: LOA 173 m., draft 8.23 m. and beam 25 m.
TUGS: 2×1,600 t.p.h.
BERTHING: *Songkhla Ocean Terminal:*

Total Area	: 24.71 acres (10 hectares)
Ship Berths	: 3
Barge Berths	: 7
Total Berth Length	: 1,673 ft. (510 m.)
Storage:	
Port Area	: 94,000 sq.m.
Container Yard	: 25,000 sq.m.
Warehouse	: 6,720 sq.m.
Stuffing Shed	: 480 sq.m.
General Working Area	: 9,300 sq.m.
Port Capacity:	
Total Cargo Throughput	: 1,100,000 ton/year
Container Yard Stacking Capacity	: 2,300 TEU's.
Warehouse Stacking Capacity	: 8,000 tons at a time.
Container Stuffing Capacity	: 100 TEU/day.
Warehouse Cargo Receiving	: 1,600 ton/day.
Equipment:	
Reefer Plugs	: 100
Emergency Power Supply	: 2
Weight Bridge (30-80 tons)	: 2
Workshop	: 200 sq.m.
Maintenance Area	: 200 sq.m.
Forklifts	: 1×16 tons. 2×25 tons. 2×36 tons. 22×3.0 – 3.5 tons.
Tractor and Trailers	: 7×40 tons.
Tractors	: 5×5 – 10 tons.
Trailers	: 15×5 – 10 tons.

MEDICAL: Hospital in city, Tel: 311379, 313160, 311494,311017.
TANKERS: See "Report".
FRESH WATER: Available alongside.
CONSULS: Malaysia, Tel: 312778. U.S.A., Tel: 311826.
AIRPORT: Had Yai Airport close South of the city, (Tel: 244521).
POLICE/AMBULANCE/FIRE: Police, Tel: 311011, 312122, 311019 (Emergency). Fire, Tel: 311016, 311118.
GARBAGE DISPOSAL: Normal garbage collection service is available. Minimum charge is B 200 per order, B 1,000 per truck, 24 hour service. Tel: 331002.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: No Seaman's club in the port but there are many services in town. International telephone and postage services are available in the port.
CURRENCY: Thai Bahts (B).

REPORT: November 1991.

Railway Jetty: Old Jetty: Used by Shell, Caltex and Esso.

Max. Displacement	3,600 tonnes.
Max. Draft	5.2 m.
Max. LOA	81.0 m.
Max. Operating Pressure	6.5 kg./sq.cm.
Flowrate	100 – 120 cu.m./hr.
Pipeline/Manifold	
Gas Oil	6 in.
Premium/Regular (common line)	6 in.
Distance from Jetty to Depot	2,000 m.
Other Facilities	
Fresh water	Available.
Fuel	Not available.

PTT Jetty: New jetty located inside the port. Distance from jetty to dep is 1,200 m.

Jetty A: New jetty for LPG and Premium/Regular Mogas.

Max. Displacement	3,000 tonnes.
Max. Draft	6.0 m.
Max. LOA	75.0 m.
Operating Pressure	LPG 15 kg./sq.cm. Mogas 8.0 kg./sq.cm.
Flowrate	LPG 200 cu.m./hr. Mogas 180 cu.m./hr.
Pipeline/Manifold:	
LPG Liquid	6 in.
LPG Vapour	4 in.
Premium/Regular Mogas	6 in.

Jetty B: New jetty for bulk carriers.

Max. Displacement	500 – 30,000 tonnes.
Max. Draft	8.0 m.
Max. LOA	200.0 m.
Operating Pressure	8.0 kg./sq.cm.
Flowrate	180 – 360 cu.m./hr.
Pipeline/Manifold:	
Gas Oil	10 in.
Premium/Regular Mogas	6 in.
Jet – A1	6 in.

Shell Jetty: New jetty designed for vessels of 5,000 d.w.t.

Depth at LLW	7.0 m.
Max. LOA	103.0 m.
Max. Draft	5.5 m.
Distance from jetty to breakwater	100 m.

Jetty located at inner side of PTT Jetty.
Tug required for berthing and unberthing operations.
Pilot works in daytime only.

Maximum LOA for passing Channel	173.0 m.
Maximum beam for passing Channel	25 m.

Tugs: Vessel LOA 250 ft. – 450 ft. One tug required.
Vessel LOA over 450 ft. 2 tugs required.

Communications:
VHF Channel 16 for calling.
VHF Channel 13 for ship-to-ship.
VHF Channel 14 for pilot.

(B) THAI OIL – SBM.

(A) PORT FACILITIES (Excluding SBM).

DOCUMENTS:

Boarding of Immigration, Customs and Quarantine Officials:

The Immigration and Customs Officials will board all incoming vess
whereas the Quarantine Official will board on arrival at berth. If how
a vessel comes from an infected port the Quarantine Doctor will bo
The Officials demand that the main gangway is lowered.

Order of Clearance and Documentary Requirements:

Customs Authority: (Ship's forms)
12 copies Cargo Manifest (including port and Agent's requiremen
5 copies Transit Cargo Manifest.
8 copies Crew List.
6 copies Ship's Stores List.
4 copies List of Ship's Provisions, Steward, Deck and En
Departments.
4 copies Foreign Currency List.
4 copies List of Arms and Ammunition for Ship's Use.
4 copies List of Opium and Narcotics.
4 copies List of Ports called.
4 copies List of Passengers.
4 copies List of Mail.
4 copies List of Crew members' Personal Effects stating brands
serial numbers of watches, cameras, TV/radio sets, elec
calculators, refrigerators, typewriters, all sound and elec
equipment, etc.
4 copies List of Ship's Movable Properties, to declare brands
serial numbers as above.

When preparing the list of Crew members' Personal Effects and Ship's Stores' Lists, particular care should be paid to the exact quantities. Crew are allowed 200 cigarettes each, during the vessel's stay in port.

Failure to provide correct quantities on various forms will entail heavy fine and confiscation.

NOTE: Pornographic magazines and materials are prohibited and will be confiscated if found onboard.

Immigration Authority: For vessel having Thai Immigration Forms onboard, please prepare them ready for arrival. Otherwise Agency clerks will bring forms onboard and assist in completing them.

5 copies each of Immigration Form No. 3 (separately for *Landing* passengers and *Transit* passengers).

5 copies of Immigration Form No. 4 (Crew List).

2 copies of Immigration Form No. 35. Make out in duplicate, and 1 line for each name. Leave signature columns blank, where each crew member shall sign in presence of Immigration Officers in port.

1 copy Disembarkation/Embarkation card for each passenger, to be supplied in port.

Repatriation Crew holding valid Passports may be declared as passengers in order to facilitate Immigration Exit papers. Otherwise we need one full working day for preparation of Immigration papers (Sat/Sun/Holiday excepted).

Quarantine Authority:

1 copy of Maritime Declaration of Health (may be supplied in port).

2 copies of lists certifying the date of vaccination against Cholera for each crew member.

1 copy of Derat Certificate.

International Certificates of Vaccination against Cholera for all passengers and crew members.

Important to Master: On first arrival at Roads or berth do not allow any unauthorised people to board the vessel or allow any officers/crew members to disembark before 'Checking In' formalities by Immigration Officers and Customs Searching Party. Offence in this respect is liable to a fine not exceeding Baht. 5,000.00.

Departure: The 'Blue Peter' flag should be hoisted at the foremast of all sea-going vessels about to leave the harbour and shall be kept hoisted until the voyage has begun. In the case of vessels leaving in the afternoon, the flag shall be hoisted in the morning, in case of those leaving in the morning, the flag shall hoisted on the previous afternoon. Failure to comply with the regulations is subject to a fine not exceeding Baht. 5,000.00.

APPROACHES: The recommended courses approaching seaberth through the Southern part of Kohsichang are as follows:

from Junction point named "A"	Lat. 12° 43′ 00″ N. Long. 100° 44′ 36″ E.	True Course =360°
to Junction point named "B"	Lat. 12° 62′ 14″ N. Long. 100° 44′ 36″ E.	
from Junction point named "B"	Lat. 12° 56′ 14″ N. Long. 100° 44′ 36″ E.	True Course =022°
to Junction point named "C"	Lat. 13° 00′ 00″ N. Long. 100° 46′ 12″ E.	
from Junction point named "C"	Lat. 13° 00′ 00″ N. Long. 100° 462 12″ E.	True Course =037°
to Junction point named "D"	Lat. 13° 06′ 20″ N. Long. 100° 51′ 00″ E.	

from Point "D" A/C to 000°(T) up to Anchorage Area or Point "E"

Point "E"	Lat. 13° 07′ 00″ N. Long. 100° 51′ 00″ E.	

Refer Admiralty Chart No. 986; the "Hulk" in position Lat. 13° 07.7′ N., Long. 100° 52.8′ E. has been removed.

Vessels should always keep clear of the fairway channel as large bulk carriers sail on deep draft.

PILOTAGE: Compulsory in Sriracha area. Sriracha pilot station is established on "Ban Ao Udom", and can be contacted directly by VHF Channel 16 within 30 miles radius.

Boarding Area: The Government Pilot and Marine Supervisor will board at about 2 miles East of "Koh Thai Ta Mun" which lies South of Kohsichang, or at the position centred on Lat. 13° 07′ N., Long. 100° 51′ E. with a radius of 1 mile.

On receipt of an accurate ETA vessel will be advised by VHF regarding berthing time, whether to anchor and any likely delays. Flags indicating a request for a Pilot or Pilot on board should be flown. Accommodation ladder required (or in conjunction with pilot ladder).

ANCHORAGES: Recommended anchorage for vessels awaiting berth is within 1 mile of the position: Lat. 11° 04.8′ N., Long. 100° 51.0′ E. Refer Admiralty Chart No. 3965 and 986.

MAX. SIZE: MBK Bulk berth: 150,000 d.w.t. Draft 14.3 m.

Also see "Tankers".

HEALTH: See "Documents".

RADIO: *Commercial Radio Telegraphy:* (Tel: 5880842-4, 5882689, 5882683).

"BANGKOK RADIO".

Medium wave: Call sign HSA (Hotel Sierra Alpha).
Operating time: 24 hour service.
Traffic: 0700, 0900, 1200, 1500, 1800, 2100 and 2300 hrs. local time.
Calling frequencies: 500 kHz and 512 kHz.
Short wave: Call sign HSA 2 and HSA 3.
Operating time: 24 hour service.
Traffic: 0700, 0900, 1200, 1500, 1800, 2100 and 2300 hrs. local time.
Calling frequencies: 8686 kHz, 8573 kHz and 12800 kHz.

Masters of all vessels proceeding to Sriracha are to notify their Agent by radio of their expected time of arrival at least 3 days prior to arrival. This notice shall be amended in the event of any change in the time of arrival.

In addition to the above, the ETA message shall be confirmed 48 and 24 hours before arrival.

Pilots should be contacted 6 hours prior to arrival and terminals 3 hours prior to arrival.

The first notice of arrival is to contain the following information:
Last Port of Call.
ETA Pilot Station.
Best trimmable arrival S.W. draft.
Number of crew including the Master and his name.
Number of passengers, landing and transit.
Cargo grade and quantities to be discharged.
Discharging rates, barrels per hour.
Bunkers and water on arrival.
Urgent stores to be delivered on arrival, if any.
Bunkers and water to be delivered, if any.
Laundry service, if any.
Nature of any extraordinary repairs to be effected.
Any other matter to be attended to on arrival such as electronic equipment repairs, medical attention or hospitalisation, crew repatriation (in this case advise name, age, nationality, Passport number).
Cash required, if any.
Crew liberty launch service, if any.

VHF: Vessels calling at PTT should call on Channel 13 and advise Supply Operations Division the following:
(a) Name and call sign of vessel.
(b) Flag.
(c) LOA, draft and beam of vessel.
(d) ETA at Terminal.
(e) Nature of cargo, technical name, UN number (if applicable) and quantity.
(f) Distribution of cargo (and that to be left on board).
(g) Is vessel fitted with an Inert Gas System?
(h) Any defects of vessel or its machinery which may affect navigation, safety or the marine environment.

The terminal will also require technical details to the ship's cargo and cargo handling characteristics.

BERTHING: Sriracha Harbour Co.Ltd.:

Location: The terminal is located some 2 mile South of the City of Sriracha, in position Lat. 13° 09.20′ N., Long. 100° 53.10′ E., from where all usual commercial services can be obtained.

Note: There is no main harbour at Sriracha, which is mainly a fishing port with ferry access to Kosichang.

Pilotage: Compulsory. Pilot available 24 hours. Pilot boards 2 miles East of Kosichang.

Channel: 2.8 km. long with depth 9.0 m.

Max. Size: 70,000 d.w.t. There is no beam restriction.

Depth Alongside: 11.60 m. at LLW. 14.08 m. at MSL.

Pratique: Usual entry formalities available 24 hours.

Tugs: Available through Sriracha Harbour Co. Two tugs are normally used for berthing and one tug for unberthing.

Berths: Outer berth: Length 450 m. Width 40 m.
Inner berth: Length 350 m. Width 40 m.

Cargo Handling: 2×Kone level luffing cranes of 25 tons capacity with electric/hydraulic grabs, clamshells and magnets.

Other equipment: Weighbridges, excavators, mobile cranes, hopper conveyors, road transport, barges and steel skips available.

Bulk handling rates: 4,000 tonnes per day.

Fuel: Available by barge.

Services: All usual services available.

Operator: Sriracha Harbour Co.Ltd., 11th Floor, Glas Haus Building, 1 Soi Sukhumvit 25, (Daengprasert) Klongtoey, Bangkok 10110, Thailand. Tel: (662) 2606469-73. Telex: 84293 NTSRICH TH. Fax: (662) 2606293.

Harbour Office: 31/4 Moo 4, Surasak, Sriracha, Chonburi. Tel: (038) 312262/3. Fax: (038) 312630.

Also see "Shipmaster's Report" and "Report".

TANKERS: *Thai Oil – SBM:* See Part (B).

Thai Oil Sea Berth:

1. One conventional buoy mooring, consists of 6 buoys.
2. Position of berth: Lat. 13° 07.5′ N. Long. 100° 52.5′ E., 2.5 miles offshore.
3. Depth of water in berth: 48 ft. plus tidal height of the day above LLW. Minus 2 ft. under keel clearance. Vessel can berth heading either North or South depending on the current.
4. Capacity of berth: Capable of handling vessels of minimum size 30,000 d.w.t. up to max. size 120,000 d.w.t. with max. LOA 900 ft. (Max. distance from bow to manifold 435 ft.).
5. Discharge line: 2×24 in. dia. submarine line with 4 strings of 12 in. hose.
6. No berthing/unberthing during night. Earliest berthing time is 0600 hrs. and latest unberthing time is 1830 hrs.
7. Total of 18 ship's mooring lines (rope/wire) are required in good condition, not less than 220 m. in length each line, for 3 head and 3 stern buoy lines.
8. Communication: Thai Oil Company Limited, P.O.Box 2387, Bangkok, Thailand. Telex: THAIOIL TH 85802, 85808. Tel: Sriracha Thailand (038) 351555. Fax: (038) 351554.

Thai Oil Jetty:

Jetty Restriction	*Berth No. 1*	*Berth No. 2*	*Berth No. 3*	*Berth No. 4*	*Berth No. 5*	*Berth No. 6*
Deadweight allowed up to (tonnes)	2,500	2,500	2,500	5,300	5,300	5,300
Displacement allowed up to (tonnes)	3,200	3,200	3,200	6,000	6,000	6,000
Length overall (m.)	106.0	106.0	83.0	122.0	122.0	122.0
Max. available Depth (m.)	5.4	6.1	6.1	7.3	6.4	6.4
Bottom Clearance (m.)	0.6	0.6	0.6	0.6	0.6	0.6
Max. Draft allowed (m.)	4.8	5.5	5.5	6.7	5.8	5.8
Tide Range (m.)	3.9	3.9	3.9	3.9	3.9	3.9
Distance between Dolphins (fenders) (m.)	27.5	27.5	27.5	5×(7)	5×(7)	5×(7)
Distance between Mooring Bitt (m.)	120.0	120.0	104.0	41/180	41/170	41/170

Esso: 6 buoy conventional mooring owned and operated by Esso Standard Thailand Ltd. Vessels berth heading in either direction depending on the tide at the time of arrival. Max. size: 105,000 d.w.t. LOA 274 m. Draft 15.24 m.

2 ship's moorings required to each of 2 head and 2 stern buoys and one ship's mooring to each of 2 breast buoys. These are supplemented by 1 shore "preventer" wire from the 2 head and 2 stern buoys.

1×32 in. submarine line for crude oil with 2 strings of 12 in. hoses.

Ballasting is required during discharge to maintain 30% deadweight at all times. Additional ballast may be required during the S.W. monsoon period 1st June to 31st October. Technical test data for winches/wires required on arrival.

PTT Sea Berth: The PTT Sea Berth consists of a concrete platform with two breasting dolphins and mooring buoys for head and stern lines.

Vessels berth heading in either direction depending on current direction, using seaward anchor.

Mooring: 3 head/stern ropes, 3 forward and aft back springs plus one buoy rope to seaward buoy aft.

Night berthing not recommended in view of unlit buoys and platform.

Vessels programmed to this sea island berth are advised that it is to be regarded as an offshore buoy berth as far as shore facilities are concerned. Access to/from the shore should be by accommodation ladder rigged on the offshore side of the vessel.

In common with offshore buoy berths and in the absence of any shore standby craft, the vessel's lifeboats to be used for emergency evacuation of personnel.

PTT Sea Berth No. 4: Max. LOA 235 m. Max. draft 13.5 m. Max. size 60,000 d.w.t. Minimum size 1,000 d.w.t. Products handled: Fuel oil and diesel (2×8 in. and 1×6 in. hoses).

PTT Sea Berth No. 5: Max. LOA 181 m. Max. draft 12.5 m. Max. size 20,000 d.w.t. Minimum LOA 42 m. Only fuel oil handled (1×6 in. hose).

PTT Jetties:

Jetty	*Max.LOA* (m.)	*Max.Draft* (m.)	*Max. Size* d.w.t.
1	281	15.0	120,000
2	122	7.5	6,000
6	92	6.8	6,000
7	91	4.9	2,000

Jetty 1: Minimum size LOA 100 m. or 10,000 tonnes s.d.w.t. Maximum distance waterline to manifold 19.20 m. Maximum gas carrier 80,000 tonnes s.d.w.t. LPG unit is 15.0 m. South of centreline of Chicksans. Crude and HSD handled. Crude 2×12 in. hoses, products 1×12 in. hose.

Jetty 2: Minimum size LOA 40 m. or 500 tonnes s.d.w.t. Absolute maximum 6,000 tonnes s.d.w.t. Max. size LPG tanker 2,000 d.w.t. HSD handled. 1×6 in. hose.

Jetty 6: Minimum size 1,000 tonnes s.d.w.t., LOA 40 m. Absolute maximum 6,000 s.d.w.t. Crude and HSD handled. 2×8 in. hoses.

Jetty 7: Minimum size 1,000 tonnes s.d.w.t. HSD handled. 1×6 in. hose.

General: Qatar Crude Discharge: Considerable delay can be encountered in the discharge of Qatar Crude.

In this connection your attention is particularly drawn to any advice given to you on arrival by the Thai Oil Representative.

Back Loading from Coasters: Occasionally vessels are required to load cargo from 2,000/4,000 ton coasters at Sriracha. Loading a full cargo could take 3 to 4 days and Masters should bear this in mind for bunker and fresh water calculations.

Lightening to coasters to make Bangkok Bar draft: On arrival there is no VHF contact with shore, as vessel does not take a Pilot, and so should proceed straight to an anchorage within about half a mile of position 13° 07.6′ N., 100° 50.9′ E. There may be other vessels in this area engaged in ship/ship transfer. Do not rig an accommodation ladder, as four Yokohama rubber fenders are brought straight out to the vessel, and 2 lashed each side amidships. Shore officials will board via the pilot ladder to clear the vessel inwards. Accommodation is required for 2 Police Officers (one room) and 2 Supervisors with one Customs Officer (a second room) throughout the vessel's stay. 8 in. hoses are brought out on the first coasters, connected by a seven man hose handling gang, and left connected to the ship's manifold throughout the operations; the gang handles all hose connecting, and mooring, with a crane driver provided by the ship. This gang stays onboard most of the time and need to be allocated a smoking area. The coasters are programmed by Bangkok – copies of the programme being put onboard on arrival – and can be handled simultaneously one each side. If 2 products are involved usually one side is allocated for a particular product. The coasters moor with lightweight polypropylene lines and are well handled and efficient, capable of loading at about 1,250 tonnes/p.h. There are 4×2,000 d.w.tonnes, and 1×3,500 d.w.tonnes coasters with a round trip taking about 24 hours from departure to return alongside.

TUGS: Local company privately operates 3×2,500 h.p. tugs which are available on calling during working hours, and outside working hours when required if advance notice given.

MEDICAL: Hospital facilities available, advance notice of ETA preferred.

DENSITY: About 1021.

FRESH WATER: Can be supplied by barge at sea berths. 24 hours' notice required to Agent.

FUEL: Can be supplied by barge. 48 hours' notice required.

CUSTOMS ALLOWANCES: 200 cigarettes for each officer, 100 for each crew member for 3 days.

Each man allowed 1 opened bottle wine/spirits.

CONSULS: See "Bangkok".

AIRPORT: Situated about 25 km. from Bangkok, regular international services.

TIME: GMT plus 7 hours. No changes during the year.

SHORE LEAVE: No restriction on crews landing after immigration and health formalities have been satisfactorily completed.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: No facilities available.

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

CURRENCY: Thai Baht.

DEVELOPMENTS: *Laem Chabang Deep-Sea Port Project:* See "Lae Chabang".

SHIPMASTER'S REPORT: March 1984.

Loading of Tapioca Pellets in bulk at MBK berth:

Vessel: LOA 243.6 m., beam 32.3 m., deck over keel 18.6 m., dr 13.51 m., 74,010 tonnes d.w.t., 8 holds.

Silo with a berth called MBK Berth (Mah Boon Krong), operated Cargill Ltd., has been in existence for about 6 years.

The berth consists of 3 loading towers with sufficient mooring po at both ends.

Location of berth: Lat. 13° 08.2′ N., Long. 100° 53.1′ E.
Distance from shore: 1.6 miles.
Distance between towers: 50 m.
Radius of loading booms: 32 m.
Total loading range: 166 m.
Depth of water alongside: 12.8 m. at LW.
Loading capacity: Loading with 1 tower 350 t.p.h.
Loading capacity with 2-3 towers 600 t.p.h.

A vessel of our size has to be shifted for loading the end holds.

The loading spouts are equipped with trimming machines. The c connection to the shore is a conveyor belt of 2.8 km. length which ca be used for traffic. All traffic is carried out by boats. Therefore gangwa on both sides to be used.

A Pilot/Berthing Master brings the vessel alongside. Berthing w 2 tugs, bow to the North and starboard side alongside using the p anchor.

REPORT: December 1993.

Berth: Siam Seaport.

Operator: Siam Seaport Terminal and Warehouses Co.Ltd., Bangk

Located in the Eastern seaboard, the new industrial heartland Thailand, and about 10 km. by road from the Laem Chab Commercial Port, is Siam Seaport, a new deep sea terminal, desig specially to handle bulk and breakbulk cargoes. When constructio completed in mid-1994, Siam Seaport will offer an ideal bulk term where vessels of sizes ranging from 5,000 d.w.t. to 60,000 d.w.t. c safely berth all year round. The deep water at Siam Seaport is there most favourable to customers needing to transport bulk and breakb cargoes in the largest possible vessels.

Berth: Total length: Outer berth 400 m. Inner berth 340 m.

Draft: 12.5 m. basis MSL.

Size of Vessels: From 500 tonne barges up to 60,000 d.w.t. ocean-go vessels.

Equipment: One bulk loader, capable of loading 700 tonnes/hr. of bulk commodities, such as raw sugar, tapioca pellets, grain, etc.

Mobile cranes of 20 – 40 tonnes lifting capacity. Luffing shore cr (future). Forklifts, trucks, pay loaders, etc.

Services: Pilotage, waste disposal, tugs, computer processing, secu living quarters, stevedoring, lighting, packing, water, electr communications, sea land transport, bonded warehouse, Cust clearance.

Storage: 224,000 sq.m. (140 RAI); 10,000 sq.m. (bulk); 13,000 s (non-bulk); 10,000 sq.m. of bonded area; 36,000 tonnes of liquid tankage.

AUTHORITY: *Operators:* Thai Oil Company Limited. Refin Km. 124.5 Sukhumvit Highway, Au Udom, Sriracha, Cholburi 20 Thailand. (P.O.Box 2387, Bangkok 10501). *Tel:* (038) 351 *FAX:* (038) 351554. *Telex:* 85802, 85808 THAIOIL TH. *Contact:* Cap Prasit Khumsribus, Marine Supervisor.

Petroleum Authority of Thailand (P.T.T.) *Telex:* 75811 PTT SPT

Sriracha Harbour Co.Ltd. (See "Berthing").

(B) THAI OIL – SBM.

LOCATION: The SBM of Thaioil Co.Ltd. Sriracha is a Catenary An Leg Mooring (CALM) and located between the island of Ko Si Ch and mainland Thailand, in position Lat. 13° 07′ 4 Long. 100° 51′ 45″ E.

The water depth is approximately 23 m. (Ref. B.A.Chart No "Approaches to Ao Udom").

PILOTAGE: The use of Government Pilots is compulsory for ber and unberthing at the SBM.

The Pilot will board the incoming vessel approximately 1.0 na miles S.W. of the SBM in the pilot boarding area as indicated on Chart No. 986.

APPROACHES: *Approach to the SBM:* At the Thaioil SBM in Sri tankers are berthed with the hose strings lying on the port side o vessel. This configuration was chosen to cater for the general ten of vessels to swing to starboard (and away from the SBM) when the engine for astern movements during the final stages of the app

Special care is to be taken to prevent collision with local fish and/or other vessels under way or at anchor, the area betwe mainland and Ko Si Chang being congested with various m installations and activities.

The final approach is made at the slowest possible speed, ke the vessel manoeuvrable, and the SBM slightly open on the po never ahead, in order to let the tanker pass clear in case of oversh or if an emergency occurs.

The direction of the approach is governed by wind or current, or a combined effect of both, bearing in mind the vessel's draft and handling characteristics.

Ko Si Chang Bar: 4 marker buoys are laid in the Ko Si Chang Bar area indicating a safe passage across the bar. The buoys are numbered 1 to 4, and have the following characteristics:

Buoy 1: Green – flash every 5 seconds – radar reflector, in position Lat. 13° 03′ 04″ N., Long. 100° 48′ 47″ E.
Buoy 2: Red – 2 flashes every 5 seconds – radar reflector, in position Lat. 13° 03′ 15″ N., Long. 100° 48′ 40″ E.
Buoy 3: Green – flash every 5 seconds – radar reflector, in position Lat. 13° 03′ 40″ N., Long. 100° 49′ 43″ E.
Buoy 4: Red – 2 flashes every 5 seconds – radar reflector, in position Lat. 13° 03′ 51″ N., Long. 100° 49′ 35″ E.

RESTRICTIONS: Berthing and unberthing is carried out at day and night. Berthing restrictions apply to vessels with a draft greater than 14.8 m., which will be berthed on ebb tide only.

All tankers stemmed to discharge at the Thaioil SBM must be equipped with bow chain stoppers and manifold equipment in accordance with OCIMF Recommendations.

Owners assurance will be sought prior to acceptance.

MAX. SIZE: The buoy is designed to accommodate tankers of sizes between 60,000 d.w.t. and 230,000 d.w.t. (part-loaded).

Tankers of a deadweight of 320,000 tonnes (part-loaded) could also be accommodated, but this would require the adding of 2 pieces of floating hose to each hose string and may also incur additional draft penalty (See "Draft Information").

Draft Information: The maximum loaded draft over the Ko Si Chang Bar channel at any high water is 17.6 m., and calculated as follows:

Chart Datum above LLW	16.7 m.
Accuracy of Sounding	0.4 m. (minus)
Under-keel Clearance	1.5 m.
Rise in Tide	2.8 m. (minimum rise in tide any day)
Maximum draft	17.6 m.

Consequently any vessel with a draft of up to 14.8 m. can cross the bar channel at any time every day.

Although at certain periods of time, the maximum rise in tide can reach 3.9 m., the maximum draft for vessels calling at the SBM is restricted to 18.2 m. by the height of the pipeline end manifold (PLEM) above the sea bed.

Increase in draft beyond 18.2 m. for 'pumping-over-the-tide' is not permitted.

Within a radius of 950 m. around the SBM, the sea bed is dredged to a minimum water depth of 19.0 m. above LLW.

RADIO: *Information required prior to Arrival:* Vessel's arrival draft and ETA to be given 7 days, 3 days, 2 days and 1 day prior to arrival. Vessels should attempt to arrive on even keel or as close to even keel as possible.

VHF: Initial contact with the Pilot can be made on VHF Channel 16 (Call Sign "Thaioil Pilot"). Once the contact is established, communication will be switched to Channel 13 or 73.

Communication during discharge between ship and shore is carried out by the Thaioil representative on board.

In addition, the ship is to keep a constant radio watch on Channel 13.

TUGS: A 2,400 b.h.p. tug may be used to support the manoeuvrability of the tanker.

4 tugs (2×2,500 b.h.p. and 2×2,000 b.h.p.) are available in the area. For vessels over 700 ft. LOA, the Harbour Department Regulations require 2 tugs for berthing and 1 tug for unberthing.

BERTHING: *Buoy Dimensions:* Diameter 12.0 m. Skirt diameter 16.2 m. Height 5.3 m. Draft 2.6 m. (approx.).

The buoy is cathodically protected by sacrificial anodes.

A white navigation light flashing "U" every 10 seconds with a range of 5 nautical miles is mounted to the turntable some 5.0 m. above water level.

An octahedral radar reflector with a diameter of 0.5 m. is mounted on top of a steel rope guard some 5.5 m. above water level.

Buoy Mooring: The SBM is moored with 6 chain pendants of 3.5 in. (89 mm.) stud link chain, each having a nominal length of 330 m., average angle of the chains to the horizontal being between 48° and 52°. The 6 chain pendants are anchored to the sea bed with anchors of high holding power (200 tonnes).

Mooring Arrangement: (OCIMF Standard). Tanker moorings from the buoy comprise of 2×12 in. circumference × 150 ft. (45.72 m.) long double braided circular hawsers, complete with floats and thimbles at each end.

The buoy end of the 2 mooring hawsers are attached to triangular plates and lugs on the turntable, which is mounted on a continuous roller bearing and free to turn 360°. This allows the moored tanker to lie head into the wind and/or tide.

The tanker end of the 2 mooring hawsers terminate in 2 chafing chains of high tensile steel, 8.0 m. long, grade U3, 76 mm. stud link chain with triangular plate attached to it, which is connected to a second chafing chain of high tensile steel, 3.5 m. long, grade U3, 54 mm. stud link chain with triangular plate. A 250 mm. (8 in.) circumference 15 m. long pick-up rope, which is buoyed off is attached to each set of chafing chains.

For berthing purposes, the port pick-up rope will be connected to a 182 m. (600 ft.) long 250 mm. (8 in.) circumference messenger rope (first line to pick-up), while the starboard pick-up rope will be connected to a 91 m. (300 ft.) long 250 mm. (8 in.) circumference messenger rope (second line to pick-up).

Only vessels which are equipped to the latest OCIMF Standard, having bow chain stoppers (tongue or hinged bar type) and fairleads are accepted to moor at the SBM.

Berth Preparation: Prior to the tanker's arrival, the Assistant Marine Manager and the Marine Supervisor proceed to the SBM to ensure the hose string and mooring lines are not fouled or entangled around the SBM. The outer (starboard) mooring line is towed clear round the buoy to prevent any accidental fouling of the launch's propellers when manoeuvring to pick-up the inner (port) pick-up rope.

The second SBM mooring launch makes fast at the end of the 2 floating hose strings and tows the hose strings to port, in order to clear the path for the incoming tanker. After the mooring is completed, the launch tows the hose strings back to the tanker's manifold, in order to be ready for picking-up and connecting the hoses.

In the rare case that only one SBM mooring launch is available for berthing, the hose strings will be looped back and lashed to the turntable of the SBM, in order to prevent entanglement with the tanker's propeller.

Vessels with draft restrictions when passing the Ko Si Chang Bar (i.e. draft between 14.8 m. and 18.2 m.) should generally approach the SBM from the South on an ebb tide. This will enable the vessel to always manoeuvre with sufficient water underneath her keel.

Vessels with drafts below 14.8 m. can be berthed at any stage of the tide, provided they stay in sufficiently deep water. It should be born in mind that the 14.0 m. contour of the sea bed is only 1,400 m. (7.5 cables) to the East of the SBM.

Mooring: Once the Assistant Marine Manager and the Marine Supervisor have completed the berth preparations, they board the incoming tanker, and the SBM mooring launch returns to the SBM to connect the 182 m. (600 ft.) messenger rope to the pick-up rope of the port mooring line. The SBM mooring launch runs out the full length of the messenger rope and meets the incoming tanker. The tanker lowers a mooring rope which is picked-up by the launch and shackled to the end of the messenger rope.

The tanker is now in a position to pick-up the messenger and be manoeuvred to the SBM. It is pointed out, that warping the tanker up to the buoy is to be avoided. The tanker is manoeuvred to the buoy by use of her engines and rudder, while the messenger rope is only used to pick-up the slack of the messenger and heave up the chafing chain to the forecastle.

Once the chafe chain is in the correct position in the bow chain stopper, it is secured and the port mooring is thereby made fast.

The SBM mooring launch then returns to the SBM to pick-up the second (starboard) pick-up rope and shackle the 91 m. (300 ft.) messenger rope to it for passing to the tanker.

The second mooring rope is then secured in a similar manner.

Vessels of a deadweight below 150,000 tonnes, which have only one bow chain stopper provided on the forecastle, will secure only one chafing chain in the bow chain stopper and hang-off the second mooring line from a different fairlead, such that only the upper end of the chafing chain is in the fairlead and all weight is taken by the mooring secured in the bow chain stopper.

Unmooring: Tugs are normally not required in this operation. The leeward mooring is usually released first.

The 50 ft. pick-up rope of the first mooring is connected to a ship's mooring rope with a 3 in. circumference Manila tail. The ship's mooring is taken to a winch drum and the weight taken on the mooring rope until the bow chain stopper can be opened. The chain and the 50 ft. pick-up rope are then lowered, until the end of the pick-up buoy is just inside the centre fairlead. The pick-up buoy is attached and the Manila tail cut. The mooring falls into the water and is towed clear by the SBM mooring launch if required, to avoid fouling of the second mooring once it is released.

In adverse weather conditions, the same method of unmooring as described above is employed. It may be necessary to assist in taking off the weight of the mooring lines by short ahead movements with the ship's engine, but these must be used with discretion to avoid moving up to the buoy.

Once both moorings have been released, the tanker is given stern way until the bow is well clear of the end of the hose strings. The tanker then gives a good lee and the Assistant Marine Manager and Marine Supervisor disembark, the tanker can now proceed to sea.

LOADING: *Pipeline and Hose:* A 40 in. pipeline of 3.8 km. length connects the SBM with the storage tanks ashore. The pipeline is concrete coated and cathodically protected by sacrificial zinc anodes. The pipeline end manifold (PLEM) is located directly underneath the SBM.

Two underwater hose strings with a length of 85 ft. (25.9 m.) and an internal diameter of 20 in. in "Chinese Lantern" configuration connect the PLEM with the under buoy flanges. The hoses are electrically discontinuous in order to isolate the cathodic protection of the sea line and the buoy, and are supported by beadfloats for better buoyancy.

Submarine hose strings (2) configuration:

1 submarine hose one end reinforced	20 in. (ID) × 30 ft. length.
1 submarine standard line	20 in. (ID) × 25 ft. length.
1 submarine hose one end reinforced	20 in. (ID) × 30 ft. length.

The two floating hose strings, the inner one with a length of 830 ft. (253.0 m.) and the outer one with a length of 865 ft. (263.7 m.), and both with an internal diameter of 20 in./16 in. respectively, connect the turntable buoy flanges with the ship's manifolds. The hoses are electrically continuous except for the tail end hose, which isolates the cathodic protection of the SBM from the tanker. Either floating hose string can be isolated by closing the butterfly valve on the SBM turntable to allow discharging through one hose only.

In the rare case of discharging through one hose only, the other hose should be tied back and secured to the turntable in order to prevent it from fouling the ship's propeller.

Floating hose strings (2) configuration:

1 half integral floating hose with extra strengthening over the unsupported length	20 in. (ID) × 30 ft. length.
21/22 full integral floating hoses	20 in. (ID) × 35 ft. length.
1 break away coupling	20 in. × 16 in.
2 lightweight floating rail hoses	16 in. (ID) × 35 ft. length.
1 lightweight floating rail hose with extra buoyancy at both ends	16 in. (ID) × 30 ft. length.

Derrick: Refer to OCIMF Standard.

Port derrick to be rigged for hose connection.

Connecting Hoses: Hose connection is carried out by shore personnel with assistance of the ship's crew.

After the tanker is safely moored, the hose equipment consisting of rope slings, shackles, gaskets, nuts and bolts, Blake Stoppers and wire strops, are taken on board.

The hoses are lifted and connected one at a time, the inboard hose string first.

The blind flange at the end of each hose string is connected to a short lifting chain with an open link at the end. The lifting chain is supported by a PVC buoy connected to the chain by a small wire. The launch picks up the buoy and secures the open link on deck and brings the hose directly under the derrick head. The derrick runner hook is then secured to the open link and the hose is lifted out of the water until sufficient length is available for direct connection to the ship's manifold. The weight of the hose is then transferred to the snubbing chain by tightening the connecting chain which is shackled to the snubbing chain and securing it in the Blake Stopper which itself is to be secured to the ship's manifold bitts. The blank flange is removed and the hose connected to the ship's manifold. The butterfly valve at the hose end is opened and secured.

After connecting, both hoses are supported by rope slings suspended from the derrick runner hook in order to maintain a reasonable radius of bend. If necessary, the hoses are lashed on each side of the hose bar to reduce movement caused by swell.

Ship's impressed current cathodic protection, if operational, should be kept on.

Discharge of Cargo: Only one grade can be discharged at the time, dependent on shore requirements.

The quantity discharged is to be checked and compared with shore on the full hour at 2 hourly intervals. If at night the difference between ship and shore exceed 1,000 cu.m., then the cargo has to be stopped and the cause has to be investigated in order to ensure that no sub-sea leaks develop undetected.

During discharge, all floating hoses and the surrounding area should be checked frequently for oil leaks. If any oil leak is detected, the Marine Supervisor, who remains on board throughout the vessel's stay at the SBM, is to be informed without delay.

Throughout the vessel's stay at the SBM, one member of the shore crew is to be stationed on the forecastle to watch the SBM and notify the Thaioil Marine Supervisor before the vessel comes into contact with the SBM. Engines have to be ready on 10 minutes notice.

In the event that the mooring lines become fouled or the SBM hoses trapped between the SBM and the vessel, the SBM mooring launch will be utilised to clear as necessary. The launch remains on stand-by throughout.

Discharge Rate/Pressure: Maximum discharge rates that can be achieved vary between 7,200 cu.m./hr. and 8,300 cu.m./hr. respectively and are dependent on the flow characteristic of the crude oil.

The maximum discharge pressure permitted at the ship's manifold is 10 bar.

Hose Disconnection: This operation is carried out by shore personnel, with the assistance of the ship's crew.

Once cargo has been completed and shore valves are confirmed closed, the ship can close her manifolds. The butterfly valves at the end of the hoses are closed and secured and the hoses disconnected and blanked-off. The cargo runner hook is connected to the open link of the lifting chain of the outer hose and the hose lifted clear of the deck transferring the weight from the snubbing chain. The Blake Stopper is removed from the connecting chain and the hose lowered into the water. The SBM mooring launch will secure the open link of the lifting chain on her deck and disconnect the cargo runner hook. The PVC buoy is re-connected and the hose lowered into the water. The same procedure is repeated for the second (inner) hose and thereafter the hose gear is lowered into the SBM mooring launch, prior to unmooring.

If the hoses are found to lie close to the ship's propeller, they should be turned back and secured to the turntable, or pushed away by the SBM mooring launch.

Ballast: Masters are advised to commence taking permanent ballast as soon as necessary, to keep the vessel at maximum draft not exceeding 17.6 m.

Crude Oil Washing (COW): Marpol 73/78 Convention requires that crude oil washing be carried out during discharging. Full crude oil washing will be subject to Terminal agreement.

COW is to be carried out in accordance with the ship's COW Operations Manual and the International Safety Guide for Oil Tankers & Terminals (ISGOTT).

I.G. Failure: In the event of a inert gas plant failure, discharge and crude oil washing must be stopped until the I.G. system is fully operational again.

FUEL: All bunkers are available by barge at anchorage only. Quantities are limited unless advanced notice is given. It is recommended to confirm bunker requirements on arrival. Failure to do so may result in cancellation or delay.

FRESH WATER: Available by barge at anchorage only. Minimum order is 200 tonnes, delivery rate approximately 30 tonnes/hr.

REPAIRS: Only minor repairs can be carried out by local workshops or by Bangkok's facilities. Advance notice is necessary since spare parts are difficult to obtain.

Immobilisation: Immobilisation of engines or steering gear is not permitted at any time while the vessel is moored to the SBM. Engines and helm must be made available at short notice (i.e. within 10 minutes).

GENERAL:

Berth Security and Safety: Throughout the vessel's stay at the SBM, no other craft (i.e. bunker, water, and stores barge, etc.) is permitted to moor alongside the vessel, the sole exception being the SBM mooring launch.

Accommodation Ladder: Accommodation ladder to be rigged on both sides ready for the Pilot, and later the Government Authorities, to board the vessel.

Shore Personnel: A representative of Thaioil will stay on boa throughout the vessel's stay at the SBM. Adequate accommodation a messing facilities should be provided.

Additionally a 6 man shore crew, who are employed to watch the SB from the forecastle and stand-by for emergency hose disconnection, w remain on board. The shore crew will not need to be accommodated cabins, but will be satisfied with a room such as the gym or a tab tennis room. They will be provided with their own food, but will requ water.

At times, the ship's Agent will provide 2 Marine Police who will requ accommodation and messing facilities.

Stores and Provisions: Available at 48 hours notice. Fresh provisio are available in ample quantities and of good quality. Deck/engine sto are usually available in reasonable quantities, but selection is limited

WEATHER:

Current: The main direction of the current runs more or less paralle the shore line in a Northern direction during flood tide and in a Southe direction during ebb tide. The maximum rate of the current is arou one knot.

Tide: Refer to British Admiralty Tide Tables – Bangkok Bar/Ko Si Chan

Waves: In stormy weather, the maximum height of waves is 2.5 m. a wave period of approximately 6 seconds.

Wind:

(a) South West Monsoon season (May to October):
The prevailing wind during South West Monsoon season is fro the S.W.
This area is affected by squalls associated with cumulonimbu clouds and thunder storms. The storms can be very severe a peak gusts of 60 knots are not uncommon. The peak gust is bri and the wind settles therafter between 20 – 30 knots. All squal are accompanied by torrential rain.

(b) North East Monsoon season (November to April):
Predominant direction:

November to January	North, East and Variable
February to March	South and East
April	Variable

The velocity of the wind during this period is about 15 knots, and on rarely increases to 25 knots.

All initial correspondence to be sent to Bangkok Head Office.

NOTES

Please also advise Shipping Guides Ltd.

Togo Republic

KPEME: 06.12 N. 01.30 E. (See Plan)

PORT LIMITS: In accordance with the terms of Charter Party a vessel is considered to be an "arrived ship" when she is anchored between 1 mile and 2 miles from the end of the jetty.

Shipmaster's Report: April 1986.

Notice of Readiness can be tendered when ship is 1.2 nautical miles from jetty.

DOCUMENTS:

2 Crew Lists.
2 Stores Lists.
2 Private Property Declaration Lists.
2 Lists of last 2 Ports of Call.
2 Passenger Lists (if no passengers, 2 lists stating same).
2 Cargo Manifests.

APPROACHES: By day the extremity of the jetty (3 artificial islands and 2 loading machines) forms an obvious landmark.

At night a white light (situated at the extremity of the jetty, 23 m. above the sea) all around horizon – light 3 sec., occulting 1 sec., light 1 sec., occulting 1 sec.

PILOTAGE: The limits of the port of Kpeme are fixed at 1 mile from all points of the jetty. Pilot boards out at the above limits. The Company Pilot remains on board while ship is berthed and disembarks when vessel cleared port limits. International code pilot signal used. At night, vessel should anchor between 110° and 180° at least 1 mile from the end of jetty.

VHF: Radio station, call "Kpeme Pilot Station" on Channel 16. Pilot boat grey motor boat without special signals.

ANCHORAGE: Good holding ground (sand and mud) between 14 m. and 16 m.

RESTRICTIONS: Vessels should twice signal the date and probable time of her arrival. The first time 72 hours and the second time 24 hours prior arrival. Vessels berth in daylight only from 0530 hrs. – 1400 hrs. GMT. Unmooring can be effected day and night. Water approaches are clear. Any ship should have both fore anchor cables in perfect order and capable of being used in their entirety. Any ship should be able to leave immediately if she receives order to do so from Harbour Master. With this in mind, engines must be on standby. Ships are not authorised to cross port entrance without a Pilot on board. Winches aft to be in perfect order.

MAX. SIZE: Tankers up to 27 ft. draft on arrival. Bulk carriers up to 38 ft. draft on sailing. Max. length 225 m. Max. breadth 32 m. Height from waterline to hatch coaming 14.5 m.

HEALTH: Send message for Free Pratique within 24 hours of arrival to Port Health Officer, Kpeme.

RADIO: Until vessel within 600 miles, communicate through Portishead Radio, Senlis Radio and Dakar Radio. Within 500 to 300 miles via Abidjan Radio TUA 487 kHz. and within 300 miles via Lome Radio 5VA 472 kHz.

VHF: VHF radio station, call "Kpeme Port" on Channel 16. Also see "Pilotage".

TUGS: No tugs available. 2 mooring launches of 150 h.p. each are at vessel's disposal.

BERTHING: Loading facility comprised of 3 artificial islands carrying conveyor belts (2) for loading phosphate only. They are breasted by a row of 4 dolphins. Vessel moors using port anchor first and then the starboard anchor, and wires to 7 buoys which hold the ship parallel to the dolphins and about 5.0 m. – 10.0 m. off. Springs are run to the dolphins. Each loader delivers at a rate of 1,250 t.p.h. and 2 holds can be loaded at same time.

MEDICAL: Doctor of the Office Togolais des Phosphates at the Factory.

TANKERS: Moor at a special berth situated to the East at 0.4 miles away from the extremity of the phosphate pier. 1 submarine line 12 in. diameter, hose connection 8 in. diameter. At any time sufficient draft for securing and sailing, also fire hoses to be ready rigged on deck.

FRESH WATER: Not available. Vessel has to go to Lome.

FUEL: Not available. Gas oil available at Lome.

OPENING/CLOSING HATCHES: By ship's crew.

CONSULS: Nearest at Lome.

REPAIRS: No facilities available. Emergency repairs could be arranged in Lome.

CUSTOMS ALLOWANCES: 200 cigarettes or 2 oz. tobacco; 1 bottle of spirits. No Customs Authorities board the vessels or seal bonded stores.

REPATRIATION: Possible. Mooring boats have to be used for going ashore.

AIRPORT: Nearest Lome – 4 flights a week to Europe.

TIME: GMT.

HOLIDAYS:

Official Holidays in Togo:

1st January, New Year's Day; 27th April (Independence Day), Victory Day; 1st May, Labour Day; * Ascension Day; 15th August, Assumption; 1st November, All Saints' Day; ** Ramadan Day; ** Tabaski (Islamic Holiday).

*Date given by Christian calendar.

**Date given by Islamic calendar.

TELEPHONES: Placed on board, charges included in stay-in-port tax.

SHORE LEAVE: Allowed, but not advisable. See "Restrictions" and "Repatriation".

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: C.F.A. Franc (CFA Fr). FFr 1.00 = 100 CFA Fr (March 1994).

GENERAL: In the rainy season, high winds and swell may delay berthing operation.

Berthing only performed on an East-going current.

SHIPMASTER'S REPORT: February 1985 (Updated 1994).

Location: Kpeme is situated about 15 miles East of Lome, and about 115 miles West of Lagos, Nigeria. The position of Kpeme Jetty is approximately Lat. 06° 12′ N., Long. 01° 31′ E.

B.A. Chart 1861, Cape St. Paul to Lagos Harbour, with Plan, "Rade de Kpeme".

Approaches: The coast Eastward of Cape St. Paul is practically featureless, but good navigational marks are Port de Lome Breakwater, and Kpeme Jetty, which show well on the radar at distances of up to 20 miles. No dangers in the immediate approach from any direction. The occulting light on Kpeme Jetty Head is difficult to identify, and should not be relied upon, especially in hazy weather.

Documents: The Pilot deals with all port formalities, acting for Customs and Immigration. Documents required are as follows:

2 Crew Lists.
2 Stores Lists, including Bonded Stores.
2 Crew's Effects Declarations.
2 Lists of Ports of Call.
(For the last voyage or last 4 weeks, whichever is longer.)
2 Passenger Lists.
(If Nil, list should be made out with a "Nil" declaration.)

Pilot on board acts as Loading Master and Agent. About 30 minutes before completion of loading, documents are sent to Pilot for Master's signature. At th same time, the vessel singles up to 2 wires forward and aft.

Pilotage: Pilot, sometimes with Assistant Pilot, boards at the Anchorage together with 2 mooring gangs, each under the supervision of a Foreman, who is in constant contact with the Pilot. 2 mooring boats are available to assist with mooring. The Pilots remain on board at all times whilst the vessel is at the Jetty and have to be accommodated and fed.

Anchorages: The anchorage area is from 1.0 – 1.2 miles S.E. of Kpeme Jetty Head. Good holding ground, sand and mud; in about 20 m. of water.

Restrictions: All berthing and unberthing operations performed on an East going current only. (Due to the configuration of the berth.) If a vessel happens to be at the berth when a West going current should start, she will remain at the berth until such time as the normal East going stream re-establishes itself. In extreme cases unberthing could be accomplished with the assistance of 2 tugs from Lome.

Max. Size: Our vessel, (Panamax) LOA 228 m., breadth 32.2 m., is about the largest vessel handled by Kpeme. Largest vessel normally handled is LOA 225 m., but this vessel was accepted on condition that no cargo was to be loaded into No. 1 hold.

Also see "Loading".

Radio: The usual ETAs and requests for berthing prospects were sent to the Agents, (Office Togolais des Phosphates. Telex: 5214. Cable Address: Phospat Lome).

VHF: Port Control calls on Channel 16, and works Channel 13. Takes all details of the ship, and any requirements on arrival.

Notice of Readiness: Notice of Readiness Time is taken as the time the vessel actually anchors, and within the confines of the Charter Party.

Berthing: From the anchorage, the vessel approaches the berth in a wide sweep, to arrive about 1 cable off the berth, heading in a Westerly direction, when the port anchor is dropped. This is paid out to full scope, then the starboard anchor is let go. A headrope is then led to the buoy on the bow. Meanwhile, a shore after spring wire is hove up on the after mooring winch. Using this and also the main engine, the vessel is manoeuvred into position. This also involves heaving up the port anchor and slacking on the starboard anchor cable, to end up with about 7 shackles on the port anchor and about 4 shackles on the starboard anchor. Vessel then ends up in position for the shiploaders, which is on a heading of about 190° and about 4 m. off a set of small hydraulic fenders which front the islands on which the shiploaders are constructed. The mooring gangs then complete the mooring with shore wires.

Loading: Loading is by 2 shiploaders of 1,300 tonnes/p.h. each. Max. airdraft from Datum to loaders is 14 m. Berth is dredged to 14 m. at Chart Datum. Max. draft allowed at the berth is 38 ft. (11.58 m.) With these various restrictions, large vessels must berth with practically full ballast, and careful deballasting whilst loading is necessary to ensure that the vessel remains within the acceptable limits of draft and airdraft. It has to be remembered that the berth is an open roadstead, and a considerable swell can sometimes run (up to 2 m.). The berth is designed to berth vessel's head directly into the prevailing direction of the swell, to reduce rolling as much as possible, even so, there is still an appreciable movement of the vessel, even with little swell running. Also due to the swell, it is very difficult to read the draft with any accuracy. However, the shore weighing facilities for the phosphate are very accurate, and no real problems were encountered in this direction.(B/L is based on weight recorded by loaders during loading. No draft surveys.)

Liaison with the shore is carried out through the Pilot by telephone.

Terminal staff friendly and very co-operative.

Unberthing: As soon as, or just before the completion of loading, the shore mooring gangs start to single up the shore moorings. As soon as all shore wires are let go, the vessel's stern starts to move away from the berth with the current. The starboard anchor is weighed and then the Port anchor. Whilst swinging clear of the berth, and weighing anchor, an eye should be kept on the port breast line buoy aft, as it can pass quite close to the stern as the ship swings. After the port anchor is aweigh, the vessel is moved a little way from the berth, and drifts waiting for the Agent to bring out the documents; which usually takes about 30 minutes.

Medical: Basic medical treatment is available at Kpeme. Hospitalisation can be effected but it is necessary to go to Lome, where there are adequate facilities.

Fresh Water: Not available.

Fuel: Not available.

Repairs: No repairs can be carried out. If these are required, vessel would have to go to Lome, 15 miles to the Westward.

Repatriation/Airport: There is an International Airport at Lome, and repatriation can be arranged if necessary.

Shore Leave: Although not actually prohibited, shore leave is not really feasible, due to the fact that there are no facilities at Kpeme. Also there are no proper arrangements for a liberty boat to be laid on.
Storing: Fresh provisions are available in limited quantities. Rather expensive and of poor to fair quality. Orders taken by Port Control on vessel's first arrival.

AUTHORITY: Office Togolais des Phosphates, B.P. 379, Lome, Togo. *Tel:* (228) 21.39.01 *Telex:* 5214 Fosfat TG. *Cables:* Phosphates-Lome. *FAX:* (228) 21.71.05. *Contact:* Commandant K. Atefeibu, Harbour Master.

LOME: 06.08 N. 01.17 E. (See Plan)

DOCUMENTS:

13 Crew Lists.
5 Kroo-boy Lists.
5 Passenger Lists.
4 Lists Previous Ports of Call.
1 Maritime Declaration of Health.
1 List of Vaccinations.
1 Set Cargo Manifest and Bills of Lading.
2 Lists of Arms and Ammunition.
1 List of Stowaways onboard.
1 List of Animals onboard.

Togo Port is a free-port so no individual Crew Member Declaration is necessary.

APPROACHES: By night, the approach to the port is assisted by the following 4 lights:
Lome Light: Position 06° 08′ N., and 01° 15′ E. On top of the big water tower in the village between Lome City and the harbour. Group Fl. (2) white every 10 sec. Vis. 20 miles.
Baguida Light: Position 06° 09.5′ N., and 01° 19.5′ E. occ. white and red. Light 2.5 sec. occ. 0.5 sec. period 3 sec. Vis. 17 miles. The red light sector (42°) covers the breakwater as well as the old Lome Wharf in position 06° 07′ N., and 01° 13.5′ E.
Togo Port Entrance: On the head of the main breakwater a red tower is situated in position 06° 08′ N., and 01° 17.5′ E. Occ. red light 5 sec. every 6 sec. vis. 5 miles.

On the head of the counter-breakwater a green tower is situated in position 06° 08.2′ N. and 01° 17.4′ E. Occ. green light 5 sec. every 6 sec. vis. 5 miles.
Fairway Buoy: (Under repair in August 1994). A red buoy with metallic structure, situated in position 06° 07′ N., and 01° 19.94′ E. Quick flash red. Vessels entering the harbour have to leave this buoy on the port side. The buoy marks the beginning of the fairway.

By day, large light coloured transit sheds and a high, grey water tower (30 m.) in position 06° 08′ N., and 01° 16.5′ E. are the first indications of the port from the sea side.

PILOTAGE: Pilots are available 7 days a week and throughout 24 hours. Berthing is possible at anytime on Owners/Master's request, but movements normally commence between 0530 hrs. and 0600 hrs. (sunrise).

The sailing time is not restricted, but ships sailing after midnight have to give a written notice to the pilot station at 2200 hrs. latest. The pilot station is equipped with VHF radio-telephone listening on Channel 16, 14 and 12, throughout 24 hours.

Call and safety Channel 16. Communications on 12 and 14.
Business languages: French and English.
Only simplex operation, no telephone patch.,

The pilot cutter is a dark motorboat with yellow-orange superstructure on whose mast the international signal flag "H" flies. Showing pilot lights after sunset. The boat also has VHF telephone and is accessible on Channel 12.

Pilots board the vessel approximately 0.5 to 1.0 mile Southwards of the breakwater.

Pilots are compulsory for all ships of more than 300 g.r.t.

ANCHORAGES: Vessels which arrive during darkness should anchor about 0.5 to 1 mile South to S.E. of breakwater, in white sector of Baguida light in 15 m., where good holding ground (sand) obtained. Northern boundary of anchorage is red sector of Baguida Light.

RESTRICTIONS: Tankers may only berth during daylight hours but may unberth at anytime. Also see "Pilotage".

MAX. SIZE: The max. length of vessels admitted must not exceed 270 m. The max. draft for the general cargo-quay is 9.5 m. (31 ft.), for the bulk berth 11.5 m. (38 ft.) and for the tanker berth 14 m. (45 ft.)

For the West side of the container quay 11 m. (36 ft.) and the East side 12 m. (39 ft.)

HEALTH: Health Inspector will board on arrival alongside and examine for cases of infectious diseases, after which he will declare vessel Free or not. Vessels entering must fly international quarantine signal "Q".

RADIO/VHF: Lome has a radio coast station. Working frequencies are: 500 and 472 kHz. Call sign "5VA". Also on VHF Radiotelephone Channel 16 and medium wave telephone on 2182 kHz. when requested.

Lome Port has a VHF station working on Channels 16, 14 and 12 day and night. A radio homing transmitter is working on 379 kHz. Signal "LME". Position 06° 10.7′ N. and 01° 16.3′ E.
Notification of Ship's: Ship's agencies should be informed as soon as possible about the vessel's arrival at Lome. The ETA telegram should contain the ship's length, draft, the quantity of cargo to be loaded and discharged and the number of stevedore gangs required. In addition to that the ship's agency should be advised to inform the pilot station as soon as possible.

ETA notification can also be sent by telex directly to the harbour. Telex No. 5243 TGPORT TO.

TUGS: The port has 3 harbour tugs. "Akodessewa", 960 h.p., 17 tonn bollard pull; "Lome", 1,620 h.p., 24 tonnes bollard pull and "Aneh 3,000 h.p., 42 tonnes bollard pull.

For all vessels over 500 g.r.t. the tug service is compulsory. O 10,000 g.r.t. 2 tugboats are compulsory.

All tugs are equipped with following equipment: Radar, fire figh equipment and VHF radio-telephone. Working Channel 12. On Maste request, the tug can supply a towing wire.

BERTHING: Vessels berth according to their time of arrival in the roa Priority is however given to passenger ships, Ro/Ro vessels, contai ships as well as to vessels having less than 50 tons of cargo for loadi discharging.

The port is protected on the Western side by the main breakwa (1,720 m. long) and on it's East side by the counter breakwater (950 m

The general cargo quay is on each side (320 m. long) and has a wid of 72 m. 4 berths are available. 3 berths are suitable for ships w max. draft of 9.5 m. (31 ft.) and one for ships up to 7.0 m. (23 ft.) dr and a max. length of 145 m.

The container pier has 2 berths (Berths No. 5 and 6), each 250 m. length and 145 m. wide. There is 11 m. depth on the West side a 12 m. on the East side.

The bulk berth is situated on the inside of the counter-breakwa There is space for a vessel of 200 m. with a max. draft of 11.5 m. (38 f There is 6,400 sq.m. of free storage space. A clinker loading installat is able to load 1,000 t.p.h.

A tanker terminal is situated inside the counter-breakwater. Tanke with a max. length of 250 m. and max. draft of 13.50 m. (45 ft.) c berth here. Also see "Tankers".

The fishing port is situated in the Eastern part of the harbour. Th length of the quay is 60 m. and the max. draft 2.80 m. This installat has an auction hall of 1,500 sq.m.

The height of the piers at low water is 4.50 m. The average ti difference is 1.20 m.

There is no special Ro/Ro berth available for bow/stern/ramp vesse

Shed "A" (5,000 sq.m.) is situated on the general cargo pier. The are another 4 warehouses "C, D, E and F", each having 7,500 sq.m. storage space in the vicinity of the piers. One shed of 1,000 sq.m. available for dangerous cargo.

Burkina Faso have 2 warehouses of their own, each 5,000 sq Mali and Niger each have one of 5,000 sq.m.

The free-storage space for containers and heavy-lift cargo is abo 90,000 sq.m.

Car park for 2,500 cars.

Equipment/Gear: The port is provided with:

Mobile cranes from 10 tons – 60 tons.
Fork-lifts from 2.5 tons – 30 tons.
Toplifter of 30 tons.
Platform Trailers of 40 tons.
Tractors of 60 h.p.
Grain-elevator and Mobile-gangways.
Also container handling gear, trailers, chassis and spreaders.

There are 3 Pilot boats and 2 line-handling boats. On vessel's reque aluminium gangways are available.
Railway: The Togo-Railway (C.F.T.) which serves large parts of t country has an extension of its network into the port. Quay-sides a sheds are connected.

STEVEDORES: Agent should be informed as soon as possible of shi ETA, length, max. draft, tonnage to load and/or discharge and numb of gangs required.
Working Hours: In Lome the working time is as follow:

1. Day shift from 0700 hrs. – 1200 hrs. and 14.30 hrs. – 1730 hrs
2. 1st shift from 0600 hrs. – 1400 hrs.
   2nd shift from 1400 hrs – 2100 hrs.
   3rd shift from 2100 hrs. – 0600 hrs.

Except Saturdays and holidays when work is possible in overtime.

Furthermore, extra labour is available if required for night work in ord to complete loading and discharging operation. All work is done by p stevedores.

MEDICAL: Large hospital situated in Lome with doctors in attendan

TANKERS:
Societe Togolaise de Stockage Lome:

Max. Size: LOA – 250 m.
Dirty Ballast: Capacity 4,000 tons. Discharge rate 800 t.p.h.
Fresh Water: Available, 30 t.p.h.
Shore Gangway: Available.
Current: None.
Tidal Range: 0.90 m. – 1.50 m.
Nature of bottom: Sand.
Restrictions: Berthing and unberthing at any stage of the tide. Berth during daylight hours only, unberthing anytime.
Cargo facilities:

Grades handled	*Pipe-line Reference*	*Length (m.)*	*Load/ D'charge Rate t.p.h.*	*Max. Pressure*	*Hoses No.*	*Size*
Ballast		1200			1	6
Crude Oil	Brown	4200	1100	7/9 kg/ cu.m.	1	8
Fuel Oil	Black-Brown	4200	1000		1	8
Kerosene	Yellow-Ash	4200	600		1	8
Benzene	Blue-Yellow	4200	800		1	8
Diesel Oil	Yellow-Orange	4200	900		1	8

DENSITY: Density 1025. Harbour open to sea.

FRESH WATER: Available at every berth except tanker Sea Delivery rate 30 t.p.h. Fresh water examined monthly for purity Sanitary Authority.

FUEL: Diesel/gasoil is available in small quantities. There are 2 bun spots on the pier. Tank-lorries can supply bunkers at any berth.

FIRE PRECAUTIONS: No extraordinary precautions are required. Vessels with hazardous cargo should declare this on ETA telegram to Agent. During time in port these vessels should take necessary precautions themselves, and all fire hoses should be ready rigged on deck. By day international code signal "B" should be displayed and by night a red light should be shown at masthead or at an all-round visible place. Ships with dangerous cargo have to engage a watchman.

Smoking on berths and within sheds *strictly* prohibited. Infringements of fire regulations punishable by fine.

CONSULS: Ambassadors or Consuls from nearly all major maritime nations at Lome.

REPAIRS: Minor repairs only carried out by local workshops.

DRY DOCKS: Private slipway with 400 tons.

GANGWAY/DECK WATCHMEN: Gangway watchmen and hatch security watchmen available; they wear a distinctive uniform. Also see "Fire Precautions".

OPENING/CLOSING HATCHES: Either ship's crew or dock workers.

CERTIFICATES: All normal ship certificates should be available for inspection.

CUSTOMS ALLOWANCES: Because Togo-Port is a Free Port, no individual declaration by Crew members necessary.

CARGO GEAR: The port has no shore cranes. Ships have to use their own cargo gear. Only mobile cranes for cargo handling on the pier are available.

AIRPORT: Lome International Airport with flights most days to Europe.

TIME: GMT throughout year.

HOLIDAYS:

1st January	New Year's Day
13th January	National Holiday
24th January	Economic Liberation Day
24th April	Victory Day
27th April	Independence Day
1st May	International Labour Day
*	Ascension Day
21st June	Patriots of Pya
15th August	Assumption
23rd September	Agression Day
1st November	All Saints' Day
**	Ramadan Day
**	Tabaski (Islamic Holiday)
25th December	Christmas Day

*Date given by Christian calendar

**Date given by Islamic calendar

All other holidays will be worked in port with supplementary labour charges.

POLICE/AMBULANCE/FIRE: A telephone to contact Police, Fire service and Hospital is available day and night at the pilot station or on VHF Channel 16. The port is provided with an ambulance car as well as with a fire engine. Services have to be requested at the control tower of the pilot station.

TELEPHONES: 3 public telephones within the port limits. No telephones on board.

SERVICES: No tank cleaning or compass adjusting available.

IDENTIFICATION CARDS: Shore landing passes issued by port police on exchange of crew I.D. cards at the port gate.

DELAYS: Ships berth in rotation of arrival at anchorage. Priority given to passenger ships as well as to vessels having less than 50 tons of cargo for discharge.

GENERAL: *Port and Lome Town:* The Port Autonome de Lome is the only harbour of the Republic of Togo. There is a bulk phosphate jetty at Kpeme (position 06° 12′ N., and 01° 31′ E.).

Lome is the capital of the country and has 1,000,000 inhabitants. The port is situated about 5 km. East of the city. Taxis are available at the entrance of the port.

All shipping agencies and 2 banks maintain offices within the port premises.

On ship's request, a ship chandler comes onboard in order to provide fresh food and bonded stores.

Currency: The money in circulation is the Franc CFA. (100 Frcs. CFA=2 NF).

Seamen's Club: A modern seaman's club with swimming pool, video-room, library, hotel and bar is situated 0.6 km. away from the main gate of the port, and is at ship's crews disposal.

SHIPMASTER'S REPORT: July 1978 (updated 1990).

Documents: A mooring boat is available to Agents for the collection of documents on the Roads given prior notice.

Max. Size: Berth No. 1, depth 7.5 m. Berth No. 2, depth 10.5 m. Berth No. 3, depth 9.5 m. Berth No. 4, depth 9.5 m. Berth No. 5, depth 11.5 m. Berth No. 6, depth 12.0 m.

Allowance is made for swell hence the max. draft at No. 6 is 39 ft.

Health: Free Pratique can be obtained from the roads if all documents are sent to Agents concerned with directions for distribution.

Radio: Lome Radio has been out of commision since May, 1978, and may continue thus until further notice unless spares are obtainable from France.

Tugs: There is an additional tug 3,000 h.p., 42 ton bollard pull, fully equipped for fire and salvage. The smaller tug of 17 tons bollard pull, is also equipped for fire-fighting.

Tankers: Berth No. 6 on Western side of East Mole with a depth of 13.5 m. and max. draft allowed of 39 ft.

Fuel: Gas Oil available ex-road tankers at all berths but full range of fuels to be provided at new tanker berth (No. 6) by August, 1978.

Cargo Gear: While no fixed cranes are available, there is a range of mobile cranes 5×10 tonnes, 1×25 tonnes, 1×45 tonnes and a container tower crane of 70 tonnes. All capacities are reduced by reach and angle while freeboard may limit use still further. A grain hopper and vacuvator gear are in use.

Airport: Flights are frequent, mainly indirect, to and from Europe, with 1 weekly direct to New York.

Consuls: At present there is no British representation in Togo but a Consulate may be re-established. Accra is 3/4 hours drive from Lome.

Seaman's Club: A large accommodation block offering various rooms and flatlets is part of the compound. Seamen have priority and at reduced rates. The Home is in the charge of a German pastor and under German control and has a VHF set for communication with vessels in the Roads. It is open to non-seafarers.

Hotels: A wide range of hotels are available including luxury type catering for the expanding tourist traffic which takes advantage of the unique climate for this part of the Gulf of Benin.

Fresh Provisions: Wide choice and good quality but not cheap. It is advisable to have samples brought onboard before ordering.

Delays: While there is no registration as such, certain vessels on regular trade, plus those with cargoes qualified as important, do get priority and all are subject to the daily (except Sunday) Port Captain's Meeting at which all elements are represented. The results are not available until 1300 hrs. after which most Agencies communicate by VHF to their vessels in the Roads. Container ships and Ro/Ro ships have a priority.

Working Hours: Gangs work 0600 – 1400 hrs.; 1400 – 2200 hrs. and 2200 – 0600 hrs. daily except, there is no 2200 – 0600 hrs. shift on Sunday nights. Each has a half hour break after 4 hours working.

Surveyors: The Port Captain and Senior Pilot, represents Germanischer Lloyd. There is no Lloyd's representative.

General: Lome is the entry port for Niger and Upper Volta as well as Western Ghana so the road and rail traffic is considerable. The border with Ghana is on the Western side of Lome City. A re-entry visa is necessary when proceeding to Accra and takes 1 or 2 days to process. The Ghana Border Police can issue 1 day Visitors' passes.

AUTHORITY: Port Autonome de Lome. B.P. 1225, Lome, Togo. *Tel:* (228) 274742, 273391, 273392. *Telex:* 5243 TGPORT TO. *Cables:* Togoport. *FAX:* (228) 272627, 270248. *Contact:* S. Ottinger, Harbour Master. K. Amouzou, Deputy General Manager. Agbeyome M. Kodjo, Director General.

Tonga (Friendly Islands)

NUKU'ALOFA: 21.08 S. 175.12 W. (See Plan)

DOCUMENTS:
Immigration:
2 Crew Lists.
2 Passenger Lists.
Customs:
2 Crew Lists.
2 Passenger Lists.
1 Bond List.
3 Cargo Manifests.
Quarantine:
1 Crew List.
1 Crew Effects List.
Agents:
1 Crew List.
1 Passenger List.
3 Cargo Manifests.

PILOTAGE: Order through Agents at least 24 hours prior to arrival. Pilot boat may be contacted on R/T 1 hour before arrival at pilot station. This position is indicated on B.A. Chart (Approaches to Nuku'alofa). There are 2 approaches, namely the Ava Lahi Passage and the Piha Passage. Vessels using Piha Passage are limited to a length of 100 m.

Vessels may anchor in the vicinity of Buoy No. 1 if required to await Pilot, but this is not normally necessary as the Pilot is available as requested. Pilot boat carries usual signals.

ANCHORAGES: Vessels may anchor wherever they wish within the port, subject to the approval of the Secretary for Marine and Ports.

MAX. SIZE: Length unlimited, beam unlimited, draft 40 ft.

HEALTH: Radio Pratique may be requested from "Tongamed", Nuku'alofa. Any suspected disease or fever must be reported by radio.

TUGS: Tugs available after October 1994.

BERTHING: Queen Salote Wharf, Berths No. 1 and 2 are the only international berths in Nuku'alofa. Berth No. 1 length 93 m. and Berth No. 2 length 110 m.

STEVEDORES: There is a Master Porter employed by the Queen Salote Wharf Administration, who will supply whatever gangs are required. The number of hatches to be worked and the tonnage of cargo must be passed by the Agent to the Secretary for Marine and Ports at least 24 hours before vessel arrives.

MEDICAL: It is advisable to inform Agent in advance should medical attention be required. Hospital facilities are available. Vaccination Certificates are required for visitors who are staying. Ship's crew do not require them generally.

DENSITY: 1025 at all states of tide.

FRESH WATER: Available Queen Salote Wharf at 25 t.p.h.

FUEL: A small quantity of light diesel fuel could be supplied, sufficient to enable a vessel to make the port of Suva.

CONSULS:

Embassies and High Commissions:	*Consulates:*
Australia	France
United Kingdom	Germany
New Zealand	Korea
China	Nauru
	Spain
	Sweden

REPAIRS: Minor repairs can be carried out in the marine workshop.

GANGWAY/DECK WATCHMEN: Not necessary as entry to wharf is restricted.

OPENING/CLOSING HATCHES: This work is completely optional.

CERTIFICATES: Normal requirements. The Secretary for Marine and Ports may require to inspect cargo gear record.

CUSTOMS ALLOWANCES: A reasonable quantity is allowed by Customs according to expected stay in port. There are heavy penalties for smuggling.

CARGO GEAR: Valid certificates issued by competent authorities are recognised.

REPATRIATION: Crew changes and repatriation possible.

AIRPORT: 25 km. from town. Flights to and from Suva (Fiji) Tuesdays, Wednesdays, Thursdays and Saturdays. Flights to and from New Zealand Tuesdays and Saturdays. Flights to Apia (Western Samoa) Wednesdays and Fridays. Flights to Hawaii Mondays, Tuesdays and Thursdays.

TIME: The local time is 13 hours fast on GMT.

HOLIDAYS: *No work of any description is permitted on the Sabbath. This is strictly enforced.* Public Holidays are: New Years Day; Good Friday; Easter Monday; Anzac Day; Crown Prince's Birthday; Emancipation Day; His Majesty Birthday and Coronation; Constitution Day, His Majesty's Tupou I's Birthday; Christmas Day; Boxing Day.

POLICE/AMBULANCE/FIRE: In an emergency dial 911.

IDENTIFICATION CARDS: Not necessary.

GARBAGE DISPOSAL: The Quarantine Department is responsible for collecting garbage in plastic bags which are then incinerated at the wharf. Charge is T$ 40.00 per vessel more than 25 m. in length. Contact Tel: 24257.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Tongan Pa'anga (T$).

OTHER PORTS: Pangai, Ha'apai Group; Neiafu, Vava'u Group; both these ports are suitable for any size of vessel at anchor. Service is by lighter. Vessels of 400 ft. in length with a max. draft of 22 ft. may berth at Neiafu.

AUTHORITY: Ministry of Marine and Ports, P.O.Box 144, Nuku'alofa, Tonga. *Tel:* 23-168, 23-166, 22-555. *FAX:* 23-733. *Contact:* Captain S.T. Fotu, Secretary for Marine and Ports.

IDENTIFICATION CARDS: Seaman's Book is sufficient.
GARBAGE DISPOSAL: Service is available as requested.
SEAMAN'S CLUBS: The Mariners' Club, Wrightson Road, Port of Spain. Tel: (809) 625-4826 or (809) 627-4873. Most services available.
CURRENCY: Trinidad and Tobago Dollar (TT$). U.S.$ 1.00 = TTS 5.75 (July 1994).
REGULATIONS: Chaguaramas Terminals is a private port which has limitations on the cargo it can handle.
AUTHORITY: Chaguaramas Terminals Ltd., Chag Terminals Drive, Point Gourde, Trinidad. Mailing address: Chaguaramas Terminals Ltd., P.O.Box 608, Port of Spain, Trinidad. *Tel:* (809) 634-4384/4385, 627-5680. *FAX:* (809) 625-4083. *Contact:* General Manager.

CRONSTADT ISLAND: 10.39 N. 61.38 W. (See Plan)

Terminal owned and operated by Baroid Trinidad Services Ltd., handling bulk barytes and general oilfield supplies.

Vessels from abroad calling at Cronstadt are required to proceed first to Chaguaramas Bay for clearance formalities.

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".
PILOTAGE: Compulsory.
RESTRICTIONS: Berthing/unberthing in daylight only.
MAX. SIZE: 350 ft. length. This size vessel would overhang wharf approx. 80 ft. fore and aft. Depth alongside 13.7 m. Longer vessels can be accommodated with special clearance.
RADIO: North Post Radio Station, call sign "9YL".
VHF: Channel 16.
TUGS: One tug used for berthing if required.
BERTHING: Vessel moored with 2 springs, 3 head and 3 stern lines to dock. Discharging carried out with 80 ton shore crane with 3/4 cu.yd. clam shell bucket with capacity for bulk ore.
FRESH WATER: Available by barge.
FUEL: Available by barge.
GARBAGE DISPOSAL: No service available.
WASTE OIL DISPOSAL: No service available.
SEAMAN'S CLUBS: None.
CURRENCY: Trinidad and Tobago Dollar (TT$).
AUTHORITY: Baroid Trinidad Services Ltd., 59 Sackville Street, P.O.Box 765, Port-of-Spain, Trinidad. *Tel:* (809) 625-1691/2/3, 625-2584. *FAX:* (809) 627-5193. *Cables:* Baroid Trinidad. *Contact:* C. Fuller, General Manager.

AGENT: See "Port of Spain".

CROWN POINT, Tobago: 11.09 N. 60.51 W. (See Plan)

SHIPMASTER'S REPORT: December 1989.

BERTH: National Petroleum Buoy.
CHART: B.A. Chart No. 505.
APPROACHES: Crown Point Lt. and the airport lights make the area easily identifiable at night.

Crown Point Light structure is conspicuous and the hotels at Milford Bay are identifiable.

As vessel approaches Tobago she should beware of the strong W.N.W. set. The current sets to the North West past Sandy Point and the sea mooring. The approach to Sandy Point is made from the North on a South-Easterly course. When Sandy Point is abeam to port, at a distance of 0.5 miles, alter course to about 150° to close mooring buoy.

The buoy should be passed close on the port side on a heading of 150°. When the vessel is about two thirds of the ship's length past the mooring buoy and Crown Point Lt. bears 080° (0.1 miles – 0.13 miles off the shore) drop the port anchor.

The position of the buoy is Lat. 11° 08.75′ N., Long. 60° 50.95′ W.
ANCHORAGE: If waiting for the boatman, or weather to moderate, good anchorage can be obtained in Milford Bay or Great Courland Bay. Cruise ships and a few local fishermen may be encountered in this area.
SHOALS: There is a reef to the South of Crown Point Lt. with a depth of 8 m. at Low Water, which shoals rapidly to 2 cables off Crown Point. Vessels should take great care when departing from the mooring.

RADIO: At the time of arrival National Petroleum's Radio Station was not manned.

MOORING: The boatman has a 'Piroghue', which is a local type boat with a cabin. He comes from the hotel at Pidgeon Point and first appears about 0600 hrs. This is the best time to arrive as it is generally calm at this time.

The vessel backs down to the buoy with the aid of the thruster and sends 2 good stern lines from either quarter with mooring shackles.

When correctly moored, Crown Point Lt. bears 105° and the ship's head is 150°. In this position the vessel is about 250 m. from the shore and will have 3-4 shackles out on the port anchor.

When moored the depth at the mooring is 14 m. at Low Water.

CARGO OPERATIONS: No hose connections are made during the night time, although pumping at night often takes place.

The ship's floating hose of about 320 m. is towed ashore by the boatman to a hut on the beach below Crown Point Lt. structure. A snap connection is used. The pumping rate is about 300 bbls./hr. The capacity of the shore tanks is 1,800 bbls. (200 tonnes in 2 tanks). Gas oil, Aviation Jet Fuel and Motor Fuel are also handled. The ship's Motorola radio was landed ashore to assist with communications during pumping. The "Drogher" Customs Book was landed with the boatman and National Petroleum had entry made at the airport. There is no shore cargo paperwork.

The shore tanks are topped up about every 3 weeks.

AIRPORT: There are local flights between Tobago and Port-of-Spain every 2 hours from 0615 hrs.

International flights are expected to commence in the near future with wide-bodied aircraft, now that the runway has been lengthened.

It is possible to fly from Crown Point Airport to Port-of-Spain at a cost of Trinidad $100, but one often has to wait during the busy periods which are Sunday afternoons and holidays.

WEATHER: There is generally an off-shore wind blowing, which rises to a fresh breeze around midday.

There is generally an off-shore swell which at times can be quite large but it decreases as the vessel gets closer to the shore.

Squalls are often experienced, especially during the rainy season. Sometimes these squalls can be quite violent and dramatic wind changes may occur. They are usually of a short duration and if about to moor or unmoor it is best to wait until they pass.

GENERAL: The boatman will run crew members ashore and collect them at an appointed time.

As large aircraft may be using the airport in the near future, National Petroleum are under pressure to move the mooring buoy 50 m. South from its present position.

GALEOTA POINT: 10.05 N. 61.01 W. (See Plan)

LOCATION: Galeota Single Buoy Mooring Terminal is located 2.6 miles on a bearing of 208° from Galeota Point Lighthouse, and is an open unsheltered roadstead. Galeota Point is a narrow headland about 210 ft. high and located in Lat. 10° 08′ 00″ N., Long. 60° 59′ 30″ W. The lighthouse, mounted on a lattice steel tower located in Lat. 10° 08′ 32″ N., Long. 60° 59′ 40″ W., exhibits a light 87 m. above sea level which flashes white every 5 secs. and is visible for 22 miles. The buoy itself exhibits a quick flashing, (1 flash per sec.), red light, 10 ft. high, and visible for 4 miles through 360°.

DOCUMENTS:
Health Declaration (International Health Form to be filled out by Master on arrival).
Derat or Exemption Certificate.
Crew List (4).
Crew Customs Declaration (2).
Register.
Stores List (2) (Signed by Master).
Passenger Manifest (2) (If any passengers are aboard).
Bonded Stores List.
Clearance from last Port.
Manifest (if no cargo, a statement that vessel is in ballast).

ESSENTIAL REQUIREMENTS: MOST ESSENTIAL REQUIREMENTS TO BE MET BY TANKERS LIFTING OIL AT GALEOTA TERMINAL.

1. *Disposal of Ballast:* No dirty ballast will be pumped overboard. A separate ballast disposal line (16 in.) is available at the Terminal to pump ballast to a pit onshore where oil and water can be separated and disposal made.

2. *Notice of Arrival:* Incoming tankers must send ETA via commercial radio at least 72 hours before arrival at Galeota. Local time is GMT minus 4 hours and daylight saving (Summer Time) is not applicable.

3. *Arrival:* Company Loading Master and a Government Pilot if requested by the Tanker's Master will contact all incoming tankers about 3 to 4 miles from Galeota Point on a bearing of 220°/230° from the lighthouse, and will advise the ship's personnel on mooring and unmooring. If the buoy is occupied, or if arriving at night, vessels should anchor at least 1 mile S.W. of the buoy.

4. *Tankers to Have Ready:* (a) 2 nylon or manila messenger lines of not less than 6 in. circumference and at least 300 ft. long, placed at the bow. (b) at ship's manifold there must be equipment capable of lifting the floating hoses. Weight of hose is about 3 tons.

5. *Crew Duties:* The tanker's crew will raise, rig, and operate vessel's derrick and winch for the hoisting of the floating hose. The Terminal crew will connect and disconnect loading hoses.

6. *Tanker's Valves:* Tanker's valves must not be closed against incoming oil stream. At least 1 minute is required to shut down pumps and stop flow of oil from the Terminal storage.

7. *Communication-Emergency:* If ship-to-shore communications fail, a line launch is always alongside and has radio contact with the Terminal Control Centre.

8. *Responsibility:* The Tanker's Master is responsible at all times the safety of all ship's operations. Galeota Terminal rules and regulatio do not contravene International Safety rules such as SOLAS (Safety Life at Sea) or other maritime regulations such as those of appropria classification societies. In case of any conflict, the latter shall apply.

APPROACHES:

Port Limits: Approaching vessels should never anchor to the East N.E. of Galeota Point. A submarine pipeline from a platform Lat. 10° 10′ 24″ N., Long. 60° 39′ 56″ W., enters the Galeota Point a about 0.5 miles Northward of the lighthouse. Vessels should approa from the South-westward and never anchor less than 1 mile from SBM or between the buoy and the coastline.

Navigational Aids: Galeota Point Lighthouse is located in Lat. 10° 08′ Long. 60° 59′ 30″ W., and exhibits a white flashing light every 5 sec and is visible for 16 miles. The lighthouse is unattended and frequen does not operate. The SBM exhibits a quick flashing red light eve second, and is located in Lat. 10° 05′ 47″ N., Long. 61° 00′ 45″ W.

Landmarks: Galeota Point appears as an island when approaching fro seaward, since it is connected to the island of Trinidad by lower lan Situated on this lower land about 0.5 miles Northward of the lighthou is the tank farm and processing area.

There are 5 oil storage tanks and they are painted a grey colour.

A small boat harbour is located 0.5 miles due West of the lighthou in Guayaguayare Bay. The sheet piling type jetty extends seawards, a bearing of 245°, 1,900 ft. from a point at Lat. 10° 08′ 14″ Long. 61° 00′ 00″ W. The seaward 300 ft. of this jetty has a controlli draft of 13 ft. at extreme LW.

Vessels approaching from a North through East direction will obse lighted drilling platforms with following locations:

1. Teak "A"	Lat. 10° 10′ 24″ N.,	Long. 60° 39′ 56″ W.
2. Teak "B"	Lat. 10° 11′ 41″ N.,	Long. 60° 39′ 55″ W.
3. Teak "C"	Lat. 10° 10′ 29″ N.,	Long. 60° 40′ 36″ W.
4. Teak "D"	Lat. 10° 02′ 12″ N.,	Long. 60° 38′ 54″ W.
5. Teak "E"	Lat. 10° 10′ 26″ N.,	Long. 60° 39′ 55″ W.
6. Samaan "A"	Lat. 10° 20′ 30″ N.,	Long. 60° 40′ 47″ W.
7. Samaan "B"	Lat. 10° 19′ 46″ N.,	Long. 60° 41′ 04″ W.
8. Samaan "C"	Lat. 10° 19′ 47″ N.,	Long. 60° 41′ 35″ W.
9. Poui "A"	Lat. 10° 06′ 35″ N.,	Long. 60° 49′ 47″ W.
10. Poui "B"	Lat. 10° 06′ 55″ N.,	Long. 60° 49′ 02″ W.
11. Tesoro "A"	Lat. 10° 11′ 05″ N.,	Long. 60° 54′ 59″ W.
12. Cassia	Lat. 09° 55′ 00″ N.,	Long. 60° 31′ 53″ W.
13. Mora	Lat. 10° 10′ 49″ N.,	Long. 60° 51′ 32.8″ W.
14. Immortelle	Lat. 09° 59′ 08.3″ N.,	Long. 60° 29′ 10.3″ W.
15. Flamboyant	Lat. 10° 02′ 23.7″ N.,	Long. 60° 24′ 46.5″ W.

Vessels should exercise caution and keep well clear of these platfor because of unlighted buoys, small boat operations, submarine pipeline and anchored test barges nearby.

As a safety measure, all vessels proceeding Southbound to Galeo or Northbound from Galeota must pass Southwards of "Poui A", Ea of "Teak D" and "Samaan A" platforms.

The lighthouse 4 miles to the Southwestward of Manzanilla Po situated on Brigand Hill (Lat. 10° 29.4′ N., Long. 60° 51′ 32.8″ W.) is a excellent landmark for vessels approaching from the Northward. Th lighthouse is elevated 712 ft. and exhibits a group flashing (3) white lig every 30 secs. and visible for 20 miles.

PILOTAGE: Vessels arriving should approach to within 3 to 4 miles Galeota Lighthouse on a bearing of 220°/230° and will be met by t Amoco Loading Master and a Trinidad and Tobago Pilot (if requeste through vessel's Agent). The Pilot will be stationed on the bridge a will advise the vessel on the approach to the buoy. The Amo Representative will be positioned in a most advantageous position a will advise the ship's crew on picking up and making fast the floati nylon mooring lines.

Vessels are requested to make a proper lee and to have a pilot ladd safely and securely rigged, ready for immediate use, and long enou to reach the Loading Master's launch. At night, adequate lighting mu be rigged overside for the Loading Master to approach the side of t ship and climb the ladder safely.

Raising, connecting, disconnecting and lowering of floating hoses w be performed by the Terminal's crew with the assistance of the shi crew as advised by the Amoco Loading Master, who will remain board while the ship is secured to the buoy. The Loading Master wil in direct charge of the portable VHF ship-to-shore radiotelepho communications.

All vessels are required to provide meals and suitable accommoda for the Loading Master and his crew, who will remain onboard fro berthing to unberthing at the Mono-Buoy.

If, in the opinion of the Loading Master, the vessel is not equipp with adequate mooring or hose lifting facilities, he will so inform t vessel's Master, and in such event the vessel shall not be brought i the moorings until facilities, lines, or gear are deemed satisfactory.

RESTRICTIONS: The Terminal operates 24 hours per day, 7 days week. Ships are loaded and unmoored at any hour, weather and ot circumstances permitting. Vessels are moored during daylight hou only, however an exception to this rule may be made at the discret of the Terminal. The Terminal will never be closed due to holidays.

MAX. SIZE: 250,000 d.w.t. Depth of water 95 ft.

RADIO: *Long Range and Radio Communications:* Ships may send th cable(s) to the Amoco office through the commercial station, "North P Radio/9YL", which is about 10 miles N.W. of Port of Spain. Upon rece of such cable(s) North Post will immediately relay it to Amoco's off through their Telex system. Messages pertaining to oil liftings should addressed to AMOCOTRI, Trinidad. If it is necessary to send messa through vessels' Agents or Owners via International Telex Service, th they may be sent to Amoco by using the Telex address "WG 2 (Amoco – Port of Spain).

Cable or Telex messages addressed to Galeota Terminal wo undergo the same procedures, but upon receipt in Amoco's radio off in Port of Spain, they will immediately be relayed to Galeota Point HF/SSB radio teletype channel.

Cables from Galeota Terminal to the ships would be given to Amoco, Port of Spain radio office on the SSB, which will be telephoned to North Post Radio Station.

The coast radio station transmits traffic lists at regular intervals listing the call signs of all ships for which they have traffic on hand. At the end of their traffic lists, the coast radio station starts searching for answers on the frequency bands listed below. Thus, any vessel hearing its call sign in the traffic list, will immediately start calling the coast station on its own working frequency in the same band on which the traffic list has been heard. The searching coast station radio operator would eventually pick up the signals from the calling ship and would pass her his traffic.

Listed below is information on "North Post Radio Station" – 9YL:

Station	*Call Sign*		*Frequency*	*Hours*
North Post Radio	9YL	(HF)	17184 kHz	1200 hrs. – 1530 hrs. (GMT)
		(HF)	12885 kHz	1330 hrs. – 2050 hrs. (GMT)
		(HF)	8710 kHz	0100/0600/0900/1300 1500/1730 & 2130 hrs. (GMT)
		(HF)	6470 kHz	2300 hrs.
		(MF)	476 kHz	0300 hrs. and every 4 hours thereafter.

Medium Short Distances: Ships may contact Galeota Terminal within 3 days before arrival on the marine HF frequencies. Galeota Point listens on 2182 kHz and operates with Amoco's marine units on VHF Channel 8.

Ships equipped with FM/VHF radios may call Galeota Point on Channel 16 and/or Channel 8.

Advice of Arrival: It is important that ships establish radio contact with Amoco when 3 days distant from Terminal and maintain this contact until just prior to arrival at the Terminal. All ships should send a 72 hours ETA message to Amoco giving the best estimates of ship's arrival time at the Terminal. This ETA message should also include a definite statement of the details of any equipment required from shore for connecting submarine hoses to ship's manifold. Further ETA messages should be sent to Amoco when the vessel is 24 hours and 12 hours distant from Galeota Point and at any other time any appreciable change occurs in the original ETA or those subsequent thereto. The 12 hours ETA should include a positive statement regarding ship's Readiness to Load on arrival, and the number of hours that will be required to discharge ballast after the ship is berthed in mooring (See "Ballast").

Ship-to-Shore Communication: Ship-to-shore communication, while ships are in moorings, will be by portable VHF radiotelephone units. The Loading Master will advise Masters and Officers regarding the emergency whistle signals set up for use in event VHF radiotelephone units become inoperative. The use of the ship's radio station and/or battery charging equipment is prohibited during cargo transfer operations.

Ship's Radio Stations: The use of ship's radio equipment while ship is on anchorage in Terminal waters is prohibited by law, unless transmission is made through the local commercial station.

BERTHING:

Single Buoy Mooring: Tankers are loaded by means of a 42 in. pipeline from shore to the SBM which is 2.6 miles offshore. The facility for receiving dirty ballast has been permanently terminated. The loading hoses from the buoy to the tanker consist of 2×20 in. floating hoses, 755 ft. and 790 ft. long ending in 3×12 in. hoses of 90 ft. length. Valves are fitted in the buoy connectors so that the flow in one 20 in. diameter floating hose string can be diverted to the 16 in. diameter underbuoy hose string.

The SBM is designed for maximum tanker size of 250,000 d.w.t. and is located in 95 ft. water depth. The buoy is 11 m. in diameter, 4.8 m. high, and equipped with a navigation light and radar reflector.There is a skirt at the bottom of about 15 m. in diameter.

Ship's Gear: Vessels calling at the Galeota Point must be equipped with 2 nylon messenger lines of a minimum 6 in. circumference and at least 300 ft. long. These lines should be laid out free for running at the bow of the vessel. Warping winch or windlass should be in good working order and adequate to handle 12 in. nylon floating rope under heavy strain. Efficient stoppers must be available to transfer floating nylon from winch to bitts.

Vessels must be equipped to fit flanges on floating hoses which are ASA standards.

Ships must be adequately equipped with blocks, tackle and booms to hoist the floating hoses, each weighing about 3 tons, from the sea surface over the ship's port rail to the manifold, in a safe, efficient and expeditious manner. Ships must also have an adequate supply of nuts, bolts, gaskets, and wrenches to connect cargo/deballast hoses.

Ship's Alertness: The Terminal is an open roadstead, therefore, during the time a ship is moored at the Terminal, the ship's engines and gear must be ready with full power for immediate use.

Vessel at the SBM must be able to clear and shall clear immediately upon advice of the Loading Master or as directed by Amoco's Terminal Superintendent.

Ship's personnel should be at their stations and alert at all times during mooring, unmooring and cargo transfer operations.

Mooring Launches: Amoco maintains launches to assist in mooring and unmooring vessels.

BALLAST: It is the Shipmaster's responsibility to see that no oil (crude, diesel, bunker C, or bilge) is pumped or spilled overboard from the ship. All vessels are required to arrive at Galeota with clean ballast only, which will be discharged overside.

All precautions shall be taken to prevent any loss of oil overboard; drip pans must be in place and used when disconnecting oil hoses from manifolds. The waters in and adjacent to the Galeota Terminal, and Amoco's offshore platforms must *never be polluted.*

As soon as practical after arrival, all vessel's tanks will be inspected. If during first inspection or during loading, it is revealed that ship's tanks are not oil-tight, tanker will be rejected and refused further loading. Ship will not be accepted later for loading unless satisfactory evidence, duly certified by Lloyd's, ABS Surveyors, or other authorised survey agency, of effective repair is submitted.

A vessel must have sufficient ballast for safe manoeuvring and usually one-third of its tonnage is adequate. However, by a careful watch of the weather information and berthing instructions and by a knowledge of the behaviour of his own vessel, a Master may desire to come to the Terminal with minimum ballast.

Shipmaster should be aware that at any time deballasting at sea occurs and has been reported or viewed by Amoco Trinidad Oil Company personnel, the offence will be documented, where possible, by Amoco personnel, and a report submitted to the proper Ministry of Trinidad and Tobago.

In addition to the lights usually displayed, vessels discharging ballast or loading cargo during darkness, will illuminate the area around the ship, to the satisfaction of the Loading Master, in order that any oil on the surface of the sea may be readily detected, and appropriate action taken. Vessels unable to illuminate the sea satisfactorily may not discharge ballast during darkness. Vessels should provide explosion proof flood lights for working on deck during night operations.

Loading and Deballasting Simultaneously: Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load oil simultaneously, providing approval is received from the Terminal Superintendent.

LOADING:

Rate of Loading: Maximum crude oil loading rate through 2×12 in. deck hoses is approximately 40,000 bbls.p.h. The flow is by pump and the line pressure will not exceed 100 p.s.i.

In order to save ship's time, it is requested that ballast water be pumped *as fast as possible* and that the tanker receives oil as fast as it can be delivered, both operations having due regard for safety. It is requested that any impediment (such as "Y's", strainers, or mud boxes) to the flow of oil be removed before arrival at the Terminal. Connections should be provided so that 12 in. ASA deck hoses may be used.

Berthing: Tenders to load crude oil cargo will normally be accepted and the berth will be assigned to vessels in order of arrival, provided vessels have nominations for cargo valid at the time and are in all respects equipped and ready to moor. In the event that the berthing is delayed on account of weather, vessels will keep their position in line. Vessels required to leave the port area on account of weather (port closed) should keep in contact with the Terminal via radio in order that they will be available when the weather moderates. Amoco reserves the right to load vessels "out of turn" following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other vessels in line. For example, in the event that weather makes it necessary for vessels awaiting berth to vacate the terminal and put to sea, Amoco may load another vessel which arrives first after the return of good weather, but before the return of the vessels waiting in line ahead of it. And further, Amoco reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring or loading, even though the port may be open to other vessels.

Connecting Hoses: After the tanker is securely moored, the floating loading/deballasting hoses must be lifted to the rail with ship's equipment. The two 12 in. hose lifts weigh about 3 tons each. The flange connection on each hose is for a 12 in. manifold. Hoses are lifted individually by the ship's gear and are connected on the port side. The 12 in. hoses are connected direct to the manifold and tankers should have their manifold fittings available.

The Loading Master and the hose crew will sling and connect the hoses to the vessel's manifold. The ship's personnel are expected to operate the winch and assist where necessary. A deck officer should be present at all times.

Loading Readiness and Arrival Time: The Company will make every effort to load vessels upon arrival or as promptly as berth is available, weather permitting.

Vessels are required to provided suitable accommodation for Loading Master and crew while at the mooring.

Notice of Readiness will not be accepted as at time of arrival, unless the vessel is in all respects ready to load. Arrival time will be considered as the time the Loading Master boards the vessel or the time that vessel anchors, whichever occurs first.

Responsibility: The vessel is responsible for the deballasting and loading. The Company Loading Master will advise the vessel in respect to loading pressures and hazards, but will not direct the loading except as may be necessary to protect the terminal facilities. Manipulation of ship's valves is the direct responsibility of the ship's personnel.

All Masters will ensure that only clean ballast is discharged overside. Periodically, Masters may be requested to flush the floating hose string with sea water to facilitate loading hose replacement.

Oil Valve Control: Caution: The incoming oil stream is controlled onshore, and it is extremely dangerous to close a ship's valve against the incoming stream. Such a procedure creates excessive pressure, which may damage hose, ship's piping, or Terminal facilities. Vessels will be held responsible for damage resulting from failure to observe this precaution.

A reduction in loading rate before topping the final tank or tanks may be arranged through the Loading Master by the ship's officer in charge and a normal standby warning should be given about 15 minutes before the shut down of loading operations per normal tanker practice. Or advice from the ship a minimum of 1 minute is required to stop the flow of crude oil.

Emergency Signal: A battery-operated emergency shut down signal is expected to be installed in the near future.

Code Flag: During loading or deballasting the International Code Flag "B" shall be displayed from a topmost signal halyard during daylight hours. During hours of darkness, a red light shall be displayed. This light should be of a character such as to be visible at a distance of at least 1 mile, and show an unbroken light all round the horizon.

Shore Stops: Requests for the Terminal to stop the flow of cargo at a pre-determined tonnage will be made verbally to the Loading Master, and Amoco will not be responsible for any error, and in the case of overloading excess cargo will not be pumped back ashore.

Some delays are always incurred when such a shore stop request is made.

MEDICAL: Vessels requiring emergency medical assistance should immediately contact the Terminal, by marine VHF radio, and supply the necessary pertinent information which will be passed on to the vessel's Agent.

Neither medical or hospital facilities are available at Galeota or provided by Amoco. Limited facilities are available in Mayaro, which is about 30 minutes drive and unlimited service is available in Port of Spain which is 2 hour's drive.

FRESH WATER: Only available by barge from Port of Spain.

FUEL: Only available by barge from Port of Spain.

CONSULS: There are no consulates at Galeota; however, consular or diplomatic representatives for most nations maintain offices in Port of Spain.

REPAIRS: Masters of vessels loading or discharging at Galeota Terminal are advised that this port is considered an "Open Roadstead", and under no circumstances may engines be shut down for repairs while their ships are moored to the SBM system. There are no facilities at Galeota Terminal for making vessel repairs, but arrangements may be made through vessel's Agent, to utilise the Port of Spain facilities. It is emphasised that all vessels at the SBM must be in readiness to clear immediately on instructions to do so.

SURVEYORS: Amoco maintains an inspection laboratory at Galeota Terminal and will inspect cargo on specific request of off-tanker companies.

Classification agencies are represented in Port of Spain as follows:

American Bureau of Shipping
Grell and Company Ltd.,
60 St. Vincent Street,
Port of Spain

Lloyd's Register of Shipping
Geo. F. Huggins and Co. Ltd.,
72 – 74 South Quay
Port of Spain

CUSTOMS ALLOWANCES: Each Crew member is allowed to retain in his possession 200 cigarettes and 1 bottle of spirits. The balance must be listed and will be sealed in a locker by the Customs.

TIME: GMT minus 4 hours, and daylight saving (Summer time) is not applicable.

SHORE LEAVE: Disembarkation for personnel of vessels loading at the Terminal is arranged through the vessel's Agent. All personnel going ashore must land at the Amoco small boat harbour. Sufficient crew must be aboard at all times for letting go lines in order to clear the mooring immediately if necessary. Passenger launch services are not available.

WEATHER:

Climate: The climate around Trinidad is generally very good, and is strongly influenced by the N.E. trade winds. Visibility is usually excellent except during passing thunderstorms and the percentage of days with less than 1 mile visibility is very small:

Weather Data and Summary:

Average rainfall	60.0 in.
Mean maximum temperature	87°F
Mean minimum temperature	69°F
Extreme maximum temperature	101°F
Extreme minimum temperature	52°F
Average relative humidity (0700 hrs.)	92%
Average relative humidity (1500 hrs.)	67%

Winds: Winds are predominantly from the N.E. and East (about 90% of the time). The mean velocity is about 8 – 12 knots and infrequently 30 knot winds may be experienced.

Tides: A tidal range on the East coast of Trinidad is 4 ft. – 5 ft., and the tides occur 17 minutes later than Port of Spain.

Sea Conditions: As Trinidad is constantly under the influence of the N.E. trade winds, the seas and swells are predominantly from the Eastern quadrant throughout the year. Wave heights average about 6 ft. – 8 ft. and during a 2-year observation period waves of 11 ft. and higher occurred for as many as 20 days per year.

Currents flow to the N.W. 53%, North 24%, and N.N.W. 14% The currents are not seasonable as currents of 2 to 3 knots are experienced during all months of the year. Average current velocity is about 1.5 knots.

Sea Temperatures: The surface temperature over coastal areas average about 75°F to 80°F in the Winter months and 80°F to 85°F in Summer.

General: Trinidad is an area where buildings have been damaged by earthquakes and the S.W. tip has experienced mud volcanoes and disappearing islands. The rainy season occurs in late Summer and Autumn at which time as much as 15 in. per month may be experienced. Hurricanes are seldom felt in Trinidad and Tobago since these islands are to the South of the storm track.

SAFETY: The vessel's personnel are responsible for the safety of the vessel and must take all necessary precautions, whether or not so advised by the Loading Master, having in mind, the hazards of the operation because of the product being handled, weather conditions and any other circumstances requiring special care or caution.

It should be noted that Amoco Trinidad Oil Co. does not maintain any specialised fire-fighting vessel. However, workboats with limited fire-fighting capability may be available in event of such emergencies.

While the vessel is moored or within the vicinity of the moorings, all vessel's personnel and vessel's operations must comply or be in accord with the following safety rules:

1. The ship's engines must remain ready with full power for immediate use.
2. The Loading Master may request the Master to extend the ship's "No Smoking" areas as conditions warrant. Masters are also requested to instruct their crew not to throw lighted cigar or cigarette butts over the side or out of the portholes. All alleyway doors to passage ways leading to deck areas are to be kept closed during cargo transfer operations.
3. Not less than 1 deck officer and 3 seamen shall be available on deck at all times while vessel is in the mooring system.
4. Power must be available at all times on all deck winches and on the anchor windlass while vessel is in the mooring system.
5. Explosion proof deck lighting must be available for night moo and loading. A good floodlight will be required to illuminate area around the cargo hose connections during cargo trans operations. During the discharge of ballast at night, the sea a around the vessel is to be adequately lighted.
6. All deck scuppers must be plugged tight before connecting floating and deck hose and remain plugged until all hoses disconnected.
7. The presence of unauthorised craft alongside is extrem hazardous. Ship's Masters are requested to require all n Amoco craft to clear ship's side as soon as personnel have be embarked or disembarked.
8. No stores may be handled on the weather deck while shi loading cargo, discharging dirty ballast, or while any ulla hatches, loading hose, or tank tops are open.
9. No cargo will be loaded while tank tops or ullage hatches open.
10. During the time a vessel is moored in the Galeota Termina continuous and efficient fire watch must be kept on deck an the engine room. Fire hose (at least 2 pairs) shall be left ou immediate use at all times while in the berth.
11. In the event of fire breaking out in any part of the vessel, howe minor it may be, the fire alarm must be given immediately. T will consist of a succession of long blasts on the ship's whis together with a rapid and continuous ringing on the ship's be
12. A safety check-off list and Terminal rules for safety wil delivered by the Loading Master.

GENERAL:

Government Officials: Trinidad and Tobago Customs Officials wil stationed at Galeota and in most instances the Customs Officer will a handle the duties of the Quarantine and Immigration Officers. Sho Customs Guards be stationed on board vessels while in the moorin it is expected that ships will provide food for these guards and ot officials.

Quarantine Regulations: The rules governing quarantine of vessels the same found in other ports of the world.

Visitors: Visitors must obtain a special pass from the Amoco Term Superintendent and it is strongly recommended they be restricted t minimum due to the hazards involved.

Supplies: Commissary supplies, as well as steward's stores are available at Galeota Point, but a limited amount of fresh fruits a vegetables may be purchased at the market in Mayaro, which 30 minutes' drive from the shore terminal. Unlimited supplies may purchased in Port of Spain and all arrangements must be made throu the ship's Agent.

Bunkers, gas oil, marine lubricants or potable water are not availa at Galeota.

Flag: All vessels are required to fly the Trinidad and Tobago ensign the foremost during daylight hours. TT flags may be obtained from sh Agent.

Contraband: Amoco prohibits unauthorised craft from coming alongs ships while in the moorings.

To avoid the possibility of undesirable items getting aboard vesse it is recommended that Masters discourage "bumboats" or similar cr coming alongside while vessel is in the Terminal vicinity.

Small Boat Harbour: A sheet piling type jetty is used for the harbour of mooring launches and supply vessels. The entrance is defined, b spar topped buoy exhibiting a quick flashing red light located 1,700 Southwestward from the end of the jetty. Controlling draft is 12.5 ft. (L and 15.5 ft. (HW).

Company's Terminal: The Company's Terminal and ma administrative offices, storage tanks and laboratory for testing stock located onshore at Galeota Terminal.

Agency: Amoco does not perform any vessel agency functions. Own of vessels calling at Galeota Terminal must arrange for their own Ag

OPERATOR: Amoco Trinidad Oil Company, P.O.Box 714, Port of Spa Trinidad, Trinidad & Tobago. *Tel:* 622-7331. *Contact:* Captain C Semple, Marine Officer.

AGENT: See "Port of Spain".

POINT FORTIN: 10.12 N. 61.42 W. (See Pla

DOCUMENTS/HEALTH/CONSULS, etc.: Refer to "Port of Spain".

PILOTAGE: Pilotage is compulsory. Pilots board 0.5 miles off main (Lat. 10° 12′ N., Long. 61° 42′ W.).

ANCHORAGE: There is safe anchorage 0.5 miles off the head of jetty.

MAX. SIZE: Jetty 2 miles long with "T" head providing two outer be of 700 ft. length and a depth of 38 ft. 1 inner berth of 300 ft. length a depth of 35 ft. and other inner berths of 300 ft. length with a dept 15 ft. 6 in.

1 conventional buoy mooring (6-buoy mooring) of 850 ft. length a depth of 53 ft. situated 4,819 ft. North off jetty head.

TUGS: Required for berthing at outer berths for vessels of 30,000 d and over and for unberthing vessels with a draft of 36 ft. or deeper. A required for berthing and unberthing at conventional buoy moor Launch assists in berthing and unberthing.

BERTHING: Bottom alongside, mud; back pressure (hose), 10 Current, flood S.W., ebb N.E. 2 to 5 knots; rise and fall tide, 4 ft.

MEDICAL: All facilities available.

FRESH WATER: Not available at CBM.

FUEL: Not available at CBM.

FIRE PRECAUTIONS: Normal oil terminal safety precau applicable.

REPAIRS AND DRY DOCKS: At Chaguaramas.
DIRTY BALLAST: No facilities available. Only small amount (approx. 200 tons) of tank drainings acceptable on jetty and only if fluid at ambient temperature.
GANGWAY/DECK WATCHMEN: Customs guards on duty at ship's side.
CUSTOMS ALLOWANCES: 200 cigarettes, and a moderate amount of spirits.
REPATRIATION: Can be arranged.
AIRPORT: See "Port of Spain".
TIME: GMT minus 4 hours.
TELEPHONES: No facilities for telephones on board.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.

SHIPMASTER'S REPORT: April 1977 (Updated 1990).
The Port of Point Fortin is situated in S.W. Trinidad. The light beacon on the "T" pier head is in position Lat. 10° 12′ 05″ N., Long. 61° 42′ 06″ W. The port is owned and operated by the Trinidad and Tobago Oil Company Ltd. (TRINTOC), to serve the 100,000 bbls. per day refinery at Point Fortin. A 24 hour communications service is provided, telex via international lines (TRINTOC Point Fortin) or VHF 16 (Call sign: Point Fortin Shipping) working on Channel 11.

Pilotage is compulsory with the boarding area 1 mile seaward from the jetty head. There is 1×1,000 h.p. tug normally available for berthing vessels over 30,000 Summer d.w.t.

Tides in the area of Point Fortin vary in strength throughout the year with a max. rate of 3 knots. Masters are advised to check sea water density for corrected loadline readings. Water density varies throughout the year from salt to fresh.

Engine repairs which entail immobilisation of engines are not permitted when moored at the berths.

Vessel must arrive with clean ballast consistent with safe manoeuvring of the ship. A ballast condition of 25% of the vessel's Summer d.w.t. is recommended.

Only clean ballast may be pumped overboard.

Notice of Readiness is accepted when vessels' tanks are ready to receive cargo.

Bunkers and fresh water can be supplied at all berths except No. 5 (C.B.M.) Stores and laundry facilities are available on request. A diver is available. The only way of getting ashore is by means of a liberty launch. Walking the pipeline bridge is strictly forbidden.

Inward Clearance is effected immediately on arrival by the Port Authorities; the following documents should be available for official use:
Clearance from Last Port.
Derat Certificate.
International Health Certificate.
Declaration and Crew Vaccination Certificate.
Cargo Manifest, if any.
Bill of Lading, if applicable.
List of unmanifested packages, if applicable.
3 copies Arrival Report.
7 copies Crew List.
3 copies Stores List.
3 copies Personal Effects.
Licence for Dangerous drugs, if any aboard.

In the interest of reducing tanker port time, vessels' Masters are advised to request Pratique by Radio prior to their arrival.

Berths:
No. 1 – Draft 37 ft. 6 in. (Loading over tide 39 ft.).
Max. length 700 ft. – Max. berthing displacement 45,000 tons.
Grades handled: Crude oil, Fuel oil, Gas oil, Diesel oil, Kero, LDF, JP4, Platformate. All via 10 in. hoses. Napthanic Oil Residue via 4 in. hose.
No. 2 – Draft 36 ft. (Loading over tide 38 ft.).
Max. length 700 ft. Max. berthing displacement 25,000 tons.
Grades handled: Crude oil, Fuel oil, Gas oil, Diesel oil, Platformate, Kero, LDF, JP4, Mogas. All via 10 in. hoses. (Napthanic Oil Residue via 1×4 in. hose).
No. 3 – Draft 34 ft. 6 in.
Max. length 300 ft. max. berthing displacement 5,500 tons.
Grades handled: Fuel oil, Diesel oil, Gas oil, Kero, Mogas, all of them through 6 in. hoses.
No. 4 – Draft 14 ft. 6 in.
Max. length 300 ft. Max. berthing displacement 3,000 tons.
Berth port side to. Berthing at slack water and flood tide, unberthing at slack water tide and flood tide.
Grades handled: Fuel oil, Diesel oil, Gas oil, LPG, Bitumen, Emulsion (COLAS).
No. 5 – C.B.M., 6 buoys, max. draft 51 ft. max. length 850 ft. Berth starboard side alongside. Daylight berthing only.
Grades handled: Crude oil, Fuel Oil via 2×12 in. hoses.

AUTHORITY: Trinidad & Tobago Oil Co. Ltd.
AGENT: See "Port of Spain".

The following should be on Trinidad Forms:
2 copies Crew Stores List – Form C2.
2 copies Ships Stores (Bond) – Form C1.
3 copies Immigration Arrival Report – Form P&I 10.
2 copies Unmanifested Cargo – Form C3.
1 copy Declaration of Health – Form P&I 31.
2 copies Arrival Report – Form P&I 53.
1 copy Stowaway List – Form P&I 12.
Ship's Register.
Derat Certificate
Passports.

PILOTAGE: Pilots ordered through Agent; 48/24/12 hour ETA needed. Pilotage is compulsory. Pilots board at Head of Pt. Lisas Channel (Lat. 10° 22′ 37″ N., Long. 61° 39′ 38″ W.); Pilot ladder conforming to International Safety Regulations to be supplied by vessel.

Launch hire arranged by Dock Master to take out Pilot to vessels on arrival, and again take off Pilots from vessels on departure.

CLEARANCE: Point Lisas being a port of entry is equipped with resident Customs Officer and Guard. Ships arriving from abroad could proceed directly to Point Lisas as Customs Officer acts for Harbour Master/Port Health. Tel. 636-2020. Immigration Officer boards on arrival.
ANCHORAGE: Safe anchorage 0.25 miles off head of channel. On occasions, when port congested, vessels may be requested to anchor Port of Spain Roads (Lat. 10° 41′ N., Long. 61° 33′ W.) before proceeding Pt. Lisas.
RESTRICTIONS: No restrictions on night entry – departure.
MAX. SIZE: See "Berthing".
HEALTH: For quarantine if required, or authentication of vaccination certificate, Honorary Port Health Officer could be in attendance at short notice. Tel. 636-2311.
VHF: Pt. Lisas Dockmaster can be contacted on VHF Channels 16, 14 and 12.
TUGS: Molasses, bulk sugar and LPG carriers use a tug to assist in berthing and unberthing at Pt. Lisas "Liquid Pier". Tug will be ordered by the Agent.
BERTHING: Point Lisas "Liquid Pier" (vessels handling bulk sugar, molasses, caustic soda and Anhydrous Ammonia in Liquid form), Maximum LOA: 550 ft. Maximum draft: 28 ft. LW. Also see "Shipmaster's Reports".

Point Lisas "Solids Pier" (vessels discharging plant equipment, and loading sulphuric acid in drums and bagged and bulk fertiliser). Maximum LOA: 250 ft. Maximum draft: 20 ft. LWOST.
STEVEDORES: If necessary will be ordered by Agents. No ETA to stevedores necessary.
MEDICAL: Advance notice of attention required will assist. Modern hospital facilities available.
FRESH WATER: Only by barge.
FUEL: All grades supplied by barge. At "Solids Pier" gas oil only can be supplied ex shore installation (Monday – Friday from 0800 – 1600 hrs.).
FIRE PRECAUTIONS: When loading LPG. No smoking on pier or on ship's deck.
CONSULS: At Port of Spain.
REPAIRS AND DRY DOCKS: At Chaguaramas 20 miles North of Pt. Lisas.
GANGWAY/DECK WATCHMEN: Customs guards on 24 hours duty at ship's side.
OPENING/CLOSING HATCHES: Normally by crew.
CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits.
REPATRIATION: Crew changes and repatriation can be arranged.
AIRPORT: Piarco International Airport – 30 miles from Point Lisas. Daily flights to world-wide destinations.
TIME: GMT minus 4 hours.
HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Monday; Whit Monday; Corpus Christi; Discovery Day (First Monday in August); Independence Day (August 31st); Diwali Day (late October/early November); Eid-ul-Fitr (December 21st – 22nd, approximately); Christmas Day (December 25th); Boxing Day (December 26th); Labour Day (June 19th); Republic Day (September 19th). Work is possible, except for Labour Day, Union Anniversary Day and Christmas Day, on these holidays.
POLICE/FIRE/AMBULANCE: Accidents – Police – Help, 62999; Fire – First Aid, 62998.
TELEPHONES: No facilities for telephones on board.
SERVICES: Efficient maintenance gang available for normal work, tank cleaning, painting, etc.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Not required.
DELAYS: Due to congestion, sometimes delays are unavoidable, usually not more than 24 hours.
DEVELOPMENTS: Present depth of channel 28 ft. at MLW.
Berth for LPG tankers up to 137 m. LOA under construction.

SHIPMASTER'S REPORT: August 1988.

Vessel loaded ammonia at the Liquids Pier.

Max. draft 28 ft. at LW and if at this draft, vessel can only sail at HW.

Mooring consisted of 2 head/stern lines and 2 breast lines and 2 springs at each end and with very long leads.

One tug used.

Connections made by ship's crew (6 in. 300 ASA). Max. loading rate 700 t.p.h. at a temperature of −31°C. Vessel allowed to purge alongside with shore providing hot ammonia vapours.

Ship's brow gangway used.

SHIPMASTER'S REPORT: September 1990.

Chart: B.A. Chart No. 482.

Approach: Do not confuse Lisas Fedchem Channel with Savonetta Channel. Fedchem Channel has beacons in line 091° which show up well on radar.

Shoreline between the Point Lisas terminals is not as charted, and tends in a Southerly direction more to seaward than charted.

Anchorage: Not within 1 mile of the end of the channel. Vessels generally anchor to the West of both channels, not North or South as indicated on B.A. Chart No. 482, due to the shallower water.

Gulf of Paria is one of the safest anchorages in the Caribbean with no swell, relatively sheltered, fair holding and plenty of room. Watch out for violent wind shifts during rain squalls, especially during the Summer.

Pilot: Pilot for Fedchem only between 0630 hrs. and 1730 hrs. Definitely no night berthing, possible to sail at night if really necessary.

Generally Pilots come from Port of Spain, although recently a Pilot has been stationed at Plipdeco-Point Lisas. There used to be a Pilot stationed at Trintoc-Pointe-A-Pierre, but this has now been discontinued.

Pilot comes out on Fedchem mooring launch, and likes to board 1 mile West of channel, so as to give room for aligning up.

Expertise very good to poor.

VHF: As per ALRS. Fedchem range is very poor.

Tugs: Either from Plipdeco-Point Lisas or Trintop-Pointe-A-Pierre. Tugs from Trintoc cheaper and better, but not always available.

Generally 2 tugs used with tugs lines. They join outside channel.

Entry: Channel is 250 ft. in width. Charted depth is 12.8 m., but minimum 12.5 m., reduced to C.D., found recently between berth and Beacons No. 3 and 4. Current sets North until approximately 1 hour after H.W. at Port of Spain, and sets South until 1 hour after L.W. at Port of Spain.

Around the turn of the tide, eddies are very prevalent, and it is not the safest time to berth.

When entering channel, if course over 6° different from leading marks, abort entry either before Beacons No. 1 and 2, or between Beacons No. 1 and 2 or Beacons No. 2 and 3, where there is still sufficient depth at 13.0 m. Depth fairly consistent.

Berth: Due to channel restrictions and turning basin, maximum size of vessel at Tringen No. 2 is about 50,000 cu.m.

Always port side alongside, swinging in adjacent basin.

Moorings run by launch, only one launch, so mooring can take a while, especially with wires. Moorings good (3, 2, 2) to dolphins and trestle.

Berth is a concrete trestle with good fenders.

Berth for vessels up to about 15,000 cu.m. in lagoon. This is the original berth before Tringen No. 2 was constructed in 1988.

Cargo: Presently only handles the export of refrigerated ammonia.

One Chicksan (12 in. 150 ASA) with 6 in. VRL attached.

Two loading pumps, each 650 t.p.h., and one small circulating pump, are available.

Generally start at minimum rate for one pump at approximately 100 t.p.h. – 200 t.p.h.

Maximum rate with 2 pumps is 1,250 t.p.h. – 1,300 t.p.h.

Product generally warm at around minus 30.5° C. – always make protest.

If vessel arrives to cool down, vapour to flare at ship's expense until ship's tanks around 97%. NH3 purged, then, vessel can use VRL to shore tanks. Loading of ships at Lagoon berth has no effect on ships loading at Tringen No. 2.

The S.G.S. Surveyors were good.

Control House at base of jetty, Loading Master is always in attendance during loading.

Either ship's UHF set or Fedchem set given.

Facilities: Fresh water available on jetty at a low rate of around 15 t.p.h. Also available by barge from Port of Spain at U.S.$ 8.0 per tonne, but only at anchorage during daylight, order well in advance through Agent.

Stores, taxis, etc. can get as far as the Control House, which is about 200 m. from ship.

Local telephone calls can be made from Control House during normal office hours. Otherwise one has to go to main building about 1 mile away. Overseas calls arranged through Agent.

Most facilities available at San Fernando.

Plant has very good machine shop with skilled mechanical and electrical fitters, who are willing to assist in an emergency.

New berth with a depth of approximately 20 ft. is under construction in the Lagoon for export of gas condensate.

Documents: All Trinidad Forms:

2 copies Crew Declaration.
2 copies Unmanifested Cargo.
3 copies Arrival Report.
1 copy Immigration Landing Report.
1 copy Health Declaration.
6 copies Crew List.
3 copies Cargo Manifest.
1 copy Stowaway List.

Curfew: Curfew in operation from 1900 hrs. to 0500 hrs. on this visit.

SHIPMASTER'S REPORT: May 1992.

Berth: Phoenix Park Gas LPG Berth – Norsk Hydro (Fedchem).

Chart: B.A. Chart No. 482.

Location: North side of Point Lisas Fedchem Lagoon. Complex formerly Fedchem/Grace, now owned by Norsk Hydro Ammonia.

Phoenix Park is a joint U.S./Trinidad operation, using Amoco G condensate from the Trinidad East Coast fields, as does adjoining Nor Hydro Plant. Plant and berth situated on land rented from Norsk Hyd Berth and Plant completed in 1991.

Approximate Plant Position: 10° 22.45′ N., 61° 28.8′ W.

Pilot: As per other Fedchem/Hydro berths.

Channel: As charted (old Fedchem Channel), well buoyed and ligh Berthing up to about 100 m. LOA – 24 hours, over about 100 m. LO daylight only. Vessel swung to head out in inner lagoon.

Sailing up to about 8.0 m. draft, virtually 24 hours. Over 8.0 m 2 hours either side of H.W. and daylight only, which means one per in 24 hours.

Berth, Turning Basin and Inner Channel depth quoted as 28 ft. (L.W We actually found minimum of 30 ft.

Tugs: From Point Lisas Industrial Port. Tugs lines used. 6 hours not required for tugs.

If unavailable, tugs can sometimes be obtained from Pointe-A-Pier

Berth: Concrete pier with breasting dolphins and loading platform. B to basic standards in 1991. Pier extends from North Eastern shore lagoon in 271° – 091° direction for about 200 m., just North of and same approximate line as old leading lights. Centred on 10° 22.6′ 61° 29.08′ W.

Maximum size of vessel accommodated: About 200 m. LOA, 25.0 breadth and 8.5 m. draft.

Fendering: Rubber sprung type.

Moorings: For vessels of maximum length, mooring arrangement is very good (2 head/stern, 2 breast, 2 springs each end). Mooring hand by mooring boat and gang from Norsk Hydro Plant.

Loading: Butane and Propane through 8 in. (connection) Chicksan a with 4 in. VRL flexi-hose attached to hard arm.

	Propane		*Butane*	
	(barrels)	(tonnes)	(barrels)	(tonnes
Storage	150,000	1,200	100,000	9,200
Production (per day)	4,500	360	3,600	330
Loading (per hour)	4,200	330	4,200	380

SG Propane: 60. 0.5064 – 97% Propane, 1% Ethane, residue Buta

SG Butane: 60. 0.5725 – 97% I/N Butane, 2% Propane, resid Pentane.

Shore UHF set given, but batteries quickly run down. Shore end up using ship's set.

Terminal personnel are meant to be in shore office on jetty, but rar in attendance. Nevertheless quite good cooperation.

Tel: 809-636 1522. Fax: 809-636 6810. Telex: 31351.

Phoenix Park Gas Processors Ltd., P.O.Box 225, Savonetta, Po Lisas.

Bills of Lading received about 2 hours after completion.

SGS Surveyors in attendance on arrival and departure.

General: Fresh Water: Not available alongside, only by barge from P of Spain and taken at Point Lisas Anchorage.

Telephone: Possible to telephone overseas from Norsk Hydro Do office near berth, but only Monday to Friday from 0800 hrs. to 1600 h

Stores: Friendly talk with Duty Supervisor will allow stores truck o main pier, which is about 10 m. from ship's side. A fair range availab but watch quality and check all foodstuffs. Prices reasonable if paid U.S.$ cash.

Gangway: Very poor situation for landing. No shore gangway. We h to use a pilot ladder (always starboard side to).

Airport: About 50 minutes to Piarco International Airport.

AUTHORITY: Federation Chemicals Ltd., P.O.Box 952, Port of Spa Trinidad, W.I. *Tel:* 636-2020. *Telex:* 3353 Fcl Wg. *Cables:* Fedchem

(B) POINT LISAS INDUSTRIAL PORT DEVELOPME CORP. LTD.

MAX. SIZE: See "Berthing".

HEALTH: Valid Yellow Fever certificates if last Port of call was in an infected area (or country on Cholera Alert). Quarantine on authentication of certificate available at short notice.

VHF: Plipdeco Marine Channel 16, working frequency Channel 9.

RADAR: Not installed at Plipdeco Marine.

TUGS: 4 Resident tugs available. 2×2,250 h.p. and 2×500 h.p. Towage services ordered by Agent.

BERTHING: The Channel is 1.75 nautical miles long and 152 m. wide. Turning basin 700 m. long and 500 m. wide. Both are dredged to 12.8 m. True course 052.15°. The Channel serves the following terminals:

Berth 1A:	Max. LOA:	100 m.
	Draft:	6.6 m.
	Facilities:	General Cargo, Ro-Ro and Lo-Lo.
	Dock Length:	24 m.
Berth 2:	Max. LOA:	130 m.
	Draft:	5.0 m.
	Facilities:	General Cargo and Lo-Lo.
	Dock Length:	170 m.×40 m. Ro-Ro ramp.
Berth 3:	Max. LOA:	120 m.
	Draft:	7.0 m.
	Facilities:	General Cargo, Ro-Ro and Lo-Lo.
	Dock Length:	32.3 m.
Berth 4:	Max. LOA:	110 m.
	Draft:	7.8 m.
	Facilities:	General Cargo and Lo-Lo.
	Dock Length:	160 m.
Savonetta Pier No. 1 (South):	Max. LOA:	220 m.
	Dock Length:	310 m.
	Max. Draft:	11.6 m.
	Facilities:	Specialised installation for loading Anhydrous Ammonia. Maximum rate 1,000 m/t.p.h. Specialised facilities for loading Methanol (700 t.p.h.) and Urea (800 t.p.h.) in bulk.
Savonetta Pier No. 1 (North):	Max. LOA:	110 m.
	Dock Length:	164 m.
	Max. Draft:	6.7 m.
	Facilities:	None, however ideal for bulk liquids.
No. 2:	Max. LOA:	240 m.
	Draft:	11.6 m.
	Dock Length:	220 m.
	Facilities:	Specialised facilities for loading of Ammonia, Methanol and Lube Oil in bulk.
ISCOTT Terminal:	Max. LOA:	407 m.
	Draft:	11.6 m.
	Facilities:	Specialised installation for discharge of bulk Iron Ore – Loading Direct Reduced Iron (DRI). Maximum rate 1,200 t.p.h., connected to conveyor system. Two (2) Level Luffing Cranes – Capacity 25 tons.

STEVEDORES: All stevedoring and longshoring labour ordered through Point Lisas Terminals Limited (PLTL).

CRANES: Mobile and track cranes available up to 185 tonnes SWL. Ordered through Agents.

MEDICAL: Advance notice required. Agent will arrange.

FRESH WATER: Available on all berths and ex-barge.

FUEL: Bunkers available ex-barge or road tanker.

FIRE PRECAUTIONS: No smoking at Savonetta Pier No. 1 and 2 or on the open decks of vessels alongside.

CONSULS: At Port of Spain.

REPAIRS/DRY DOCKS: A repair facility is available at Chaguaramas. However, competent technicians are available for shipboard repairs. Arrangements made through Agents.

SURVEYORS: (1) Cargo Surveyors: Caleb Brett, Saybolt and Redwood available.

(2) Surveyors such as Lloyd's, ABS, Bureau Veritas are available. Arrangements through Agents.

GANGWAY/DECK WATCHMEN: 2 Customs guards on duty for 24 hours aboard all vessels.

OPENING/CLOSING HATCHES: Normally done by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes and a moderate amount of spirits.

HOLIDAYS: Work is possible all year except on Christmas Day and New Year's Day.

POLICE/FIRE/AMBULANCE: Accidents, Police help 62 999. Fire and First Aid 62 998. Fire assistance and ambulances also available on the estate by calling 2211, 2215, 2205/7 and 636-8155.

REPATRIATION: Crew changes and repatriation possible. Agent will arrange.

AIRPORT: Piarco International Airport, 60 km. from Point Lisas. Daily international flights available.

TIME: Local time is GMT minus 4 hours.

TELEPHONES: No facilities for telephone aboard. However international dialling to most countries possible.

BANKS: First Citizens Bank, Point Lisas Industrial Estate, Point Lisas.

STORING: Vessels can be stored by barge or truck.

No storing of vessels while loading at Savonetta Pier No. 1.

All storing must be done with Customs approval.

Local riggers and forklifts are available for storing. These may be ordered through local chandlers.

SHORE LEAVE: No restrictions except, for persons not holding documents which grant entry to Trinidad and Tobago. Prior approval of Ministry of National Security must be arranged through Agents.

IDENTIFICATION CARDS: It is advisable to carry identification when proceeding on shore leave.

GARBAGE DISPOSAL: Presently this service is not available at Point Lisas (12.4.94). However, a service for domestic garbage is under study.

WASTE OIL DISPOSAL: Collection service available. Three tanker trucks, capacity 50 barrels/2250 gallons each. Contact Sirju & Sons. Fax: 653-2217.

SEAMAN'S CLUBS: The Mariners Club, Wrightson Road, P.O.Box 561, Port of Spain, Trinidad, W.I. Tel: 62-54826. Open until 2200 hrs. every day, weekdays from 0900 hrs., Saturday from 1000 hrs. and Sundays from 1400 hrs. Facilities include chapel, TV and video lounge, telephone, shop, postage, bar, games, swimming pool and barbeque.

CURRENCY: Trinidad and Tobago Dollar (TT$).

DEVELOPMENTS: Construction of an Iron Carbide Docking Facility with dimensions as follows:

Dock Length:	407 m.
Max. Draft:	11.67 m.
Max. LOA:	245 m.

AUTHORITY: Point Lisas Industrial Port Development Corporation, P.O.Box 191, Goodrich Bay Road, Point Lisas, Couva. *Tel:* 809-636-2132, 636-4913. *Fax:* 809-636-4061. *Cables:* Plipdeco, Couva. *Contact:* Captain Rawle Baddaloo, Port Manager.

POINTE-A-PIERRE (Oil Terminal and Refinery): 10.19 N. 61.29 W. (See Plan)

DOCUMENTS:

5 copies Crew List.
4 copies Stores List.
1 copy Unmanifested Cargo List.
2 copies Crew Declaration.
1 copy Declaration of Health.
1 copy Arrival Report.
1 copy Firearms & Ammunition List.
Derat Certificate.

Officials require accommodation ladder to be rigged, usually on port side, for boarding and clearance.

PILOTAGE: Compulsory. Pilot boards from tug. Pilot ordered by Agent after receipt of ETA. Pilot ladder conforming to International Safety Regulations to be supplied by vessel.

Pilot boards 1.2 miles S.E. of SPM.

ANCHORAGE: Safe anchorage and good holding ground in the roadstead. On account of Pierre Shoal, a 21 ft. patch about 1.75 cables S.W. of the head of the main viaduct, vessels of moderate draft should approach with the main viaduct bearing more than 075°. The main viaduct consists of pipelines supported by reinforced concrete piling, located at Lat. 10° 20′ N., Long. 61° 30′ W. and extends in a W.S.W. direction for 6,190 ft. from shore.

RESTRICTIONS: Controlling depth in main channel 41 ft. No entry restrictions day or night. However, Free Pratique must be obtained, Crew Lists, Stores Lists, etc., to be presented to local Agents on arrival. Arriving vessels must contact Petrotrin, Pointe-a-Pierre on VHF Channel 16 two hours prior to arrival for berthing instructions, traffic information, cargo nominations, etc.

MAX. SIZE: See "Berthing".

Also see "Shipmaster's Reports".

HEALTH: See "Port-of-Spain".

RADIO: Vessels to send ETA messages 72, 48 and 24 hours prior to arrival to "Petrotrin Marine Pointe-a-Pierre". Messages should be sent through one of the following: Chatham (USA), North Post (Trinidad), Barbados or Curacao.

VHF: The Petroleum Company of Trinidad and Tobago Limited maintains their own radio station (24 hours). Call "Petrotrin Marine Pointe-a-Pierre" on Channel 16, working Channel 13.

TUGS: Petrotrin maintains 3 tugs to assist in berthing and unberthing.

BERTHING:

Berth No.	*Max. Permissible Draft (ft.)*	*LOA (ft.)*	*D.W.T.*	*Remarks*
1	37.5	720	50,000	
2 (North)	37.0	775	63,000	
2 (South)	22.0	350	7,000	Small vessels and barges only
5 (Sea Island)	41.5	900	100,000	
6 (Sea Island)	54.0	950	120,000	
7	36.0	700	35,000	
8 (General Cargo)	28.5	700 (pier length) 70 (pier width)	25,000	

DISCHARGING:

Maximising Cargo Discharge (Squeeze Dry Operations): Due to the current high costs of crude oil the following guidelines should be followed in order to maximise cargo outturn. Special importance should be attached to the discharge immediately preceeding shipyarding. A Representative from the Company will attend vessels periodically in order to advise and assist as required.

General Guidelines for Maximising Cargo Discharge:

1. Inerted vessels capable of Crude Oil Washing must strictly follow the routines set out in their Tank-cleaning Manuals.
2. Stripping operation to be performed twice, first during normal discharge and the second time after all cargo (except partial contents in the aftermost (slop) tank) has been discharged ashore. The Inspector must ensure that vessel is adequately trimmed by the stern during all stripping operations.
3. On completion of normal discharge (except for partial contents in aftermost (slop) tank) and second stripping of all tanks, contents of main deck and drop lines and loading arm connections must be stripped to slop tank. (NB: Air or tank atmosphere must be used to break the vacuum).
4. Line content in all main suction lines must also be dropped into aftermost tanks and all main suction valves in tanks opened to drain suction elbows. On completion of dumping line contents, stripping system to be used to drain cargo remaining in the suction system and pumps back to the slop tank, with tank suction shut.

   This is best achieved by commoning up all main cargo pipelines on the suction side of the main cargo pipelines on the suction side of the main cargo pumps, opening the suction valves to these pumps and cross connecting the suction side of the stripping system to the main cargo line.
5. Where available, open by-pass valves connecting discharge side with suction side of main cargo pumps.

   Note: When vacuum starts building up in the suction system, allow tank atmosphere to enter the pipelines by opening a suction valve in a forward tank.

   It is recommended that one hose or loading arm remains connected to the manifold to which the small diameter deck stripping line (where available) discharges into. This line discharges outboard of the vessel's manifold valve, which of course is left shut during final discharge ashore of slop tank contents using stripping system.
6. The reasons for stripping back line and final tank contents to the aftermost (slop) tank rather than direct to shore are that:
   - (a) Operator has better idea when suction is lost (by seeing no increase in slop tank ullage).
   - (b) Accurate measurements can be made of total quantity of cargo recovered by operation "Squeeze Dry".
7. On completion of final line and tank draining, discharge contents of aftermost (slop) tank ashore via small diameter deck stripping line, where fitted, or via main discharge line where not.

Check List for Line Draining – Operation "Squeeze Dry":

1. Are following design features available to improve line draining:
   - (a) By-pass to connect discharge side with suction side of main cargo pumps?
   - (b) Connections from stripping system to both suction and discharge lines of main cargo pumps?
   - (c) Vent valves in deck lines near manifold?
   - (d) Suction and discharge pressure gauges and stroke counters in stripping pumps?
   - (e) Small diameter deck line, for final draining?
   - (f) Block valves in stripping line system?
2. Is cargo discharge *completely* finished and all cargo tanks checked by dipping to be well drained?
3. Have contents of tank washing line that was used for COW been properly dropped into slop tank?
4. Are all manifold valves with shore connection (except one if no small diameter line available) shut?
5. Are all valves in deck, pumproom and drop lines open?
6. Are all valves (except tank valves during line draining) in suction lines open?
7. Are all lines dropped in aftermost (slop) tanks?
8. Has air/inert gas been allowed to enter to vessel's line system both at forward end of bottom lines and in the manifold area?
9. Are stroke counters (where fitted), suction and delivery pressure gauges of drain pumps working correctly?
10. Has dropping operation been checked by measuring oil level in aftermost holding or slop tank/tanks?
11. Have all manifold valves been shut after dropping operation?
12. Has valve in small diameter deck line been opened, or where not fitted, has "final" manifold valve been opened?
13. Have stripping pumps been set correctly to drain holding or slop tank ashore through small diameter line (or deck line)?
14. Have all lines in cargo tanks, on deck and in pumproom been set correctly for line draining to holding or slop tank?
15. Has holding or slop tank been properly drained ashore and checked to be well drained by dipping?
16. Has vacuum been allowed to build-up before air/inert gas was in and has this been done repeatedly?
17. In addition to checking holding or slop tank ullage, are dr pumps checked to see if actual delivery from line draining ta draining has stopped?
18. Has shore been asked to check delivery of final holding or s tank into shore system?
19. Have all valves been shut after line draining?

Note: During draining of discharge lines to holding or slop tank, op the non-return valves in the discharge lines (if movable from the outsid

TRANSHIPPING: *Instructions to VLCC Masters from Petrotrin Mar*

1. Anchor your vessel in designated anchorage with starboa anchor and rig gangway starboard side. Enter and clear ves in normal manner, co-ordinating all activities via VHF w Petrotrin Marine Superintendent at Shipping Office.
2. Gauge all tanks, determine amount of cargo on board and adv Shipping Office along with A.P.I., temperature and ot particulars. Re-secure all tanks. Advise Lightering Vessel A.P and temperatures.
3. Barge will come alongside, port midships. Receive on boa 6×30 ft. lengths of 12 in. cargo hose along with necess reducers, blanks, bridles, straps, etc. Ship's crew must 2 strings of 90 ft. long hose connected to your manifolds, a supported by your vessel's boom. Hoses will be tended by yo vessel's crew throughout transhipment.
4. A string of 4×11 ft.×21 ft. Yokohama fenders, each separa by 100 ft. length wire will be brought alongside (port). Yo forward and after main deck wire springs will be lowered do and secured to the ends of the fender string to secure sa alongside. Four of the fender positioning wires will then lowered from your deck and one secured to each of the fende The fender string must then be positioned and secured alongsi centred on your manifold.
5. Two additional fenders will then be brought alongside a secured approximately 150 ft. forward and aft of the main fend string to provide additional protection to your vessel in moor and unmooring the lightering vessel.Two positioning wires will passed up to your deck from each of these fenders to sec them in place.
6. When lightering vessel comes alongside, your crew must stationed fore and aft on deck to handle lines. Your bridge sho be manned with engines on standby in the event of emergen During entire transhipment all fire fighting equipment must rigged and ready. Additional fire fighting equipment and a pollution devices will be on harbour tugs and available if need
7. A lightering vessel assisted by tugs will come abeam of yo vessel and send synthetic lines, one forward, one aft, by laun

   Your crew must lower heaving lines or messenger lines launch, then heave lines on board and secure fore and aft your vessel. Lightering vessel will then be brought alongside a positioned with her manifold approximately 10 ft. – 40 ft. af yours. The lightering vessel will then pass her wires (all contain nylon straps) to your vessel and safely secure alongside.
8. After the lightering vessel is safely secured alongside, to yo satisfaction, the two hose strings will be passed to her a secured to her manifolds. The lightering vessel will support hose ends, however, the main support will remain your vess boom. Agreeable handling rates, procedures and signals m be agreed upon between the Masters of the vessels involved a the Petrotrin Co-ordinator of the transhipment. Portable V radios operating on Channels 16 and 10 will be supplied fr ashore. VHF Channel 10 will be used for all ship-to-sh communication.

   Your control room must be manned at all times by a compet individual who must be monitoring Channel 10. Additionally competent individual (Officer) and a full watch must be maintain on deck to tend hoses, fenders, etc. One man must be station at the manifold and in full view of the hoses and other vesse all times.

   The Petrotrin Co-ordinator and Marine Staff will be availa and will assist in all ways possible, however, the responsib for a safe operation rests with you and your vessel.
9. Upon completion of loading the lightering vessel, your tanks m again be gauged and figures passed to Shipping Office. All ta must then be secured prior to unmooring of lightering vessel. T Marine Office will co-ordinate handling of necessary ca documents depending on the destination of the lightering ves
10. Hoses will be drained to the lightering vessel, then disconnec blanked and taken back aboard the VLCC.

    Your crew must again be stationed fore and aft, your bri manned and the lightering vessel unmoored.
11. The procedure will be repeated for the next lightering vesse
12. It is anticipated ballast will be taken after the second lightering as soon as one isolated section is stripped of cargo. Prio ballasting the Petrotrin Co-ordinator should certify tanks to ballasted as dry.

ALTHOUGH IT IS IMPORTANT TO MINIMISE DELAYS Th CONSIDERATION MUST TAKE SECOND PLACE TO PROP SAFETY PRACTICES AND TO ANY STEPS NECESSARY TO AVO POLLUTION.

Also see "Discharging".

DENSITY: 1025, (August to November approximately 1023).

FRESH WATER: Available alongside or by barge (if available i adequate notice given prior arrival). Limited in dry season (Janu June).

FUEL: Fuel oil, diesel and gas oil supplied ex-pipeline or by barge. A see "Shipmaster's Report" dated August 1979.

MEDICAL: Advance notice of medical attention preferred. Mod hospital facilities available.

BALLAST: Vessels to arrive with clean ballast. No dirty ballast faci

REPAIRS: Almost all types of deck and engine repairs can be carried out.

DRY DOCK: Trinidad Foundry and Fabricating Ltd. located at Chaguaramas.

SURVEYORS: Lloyd's, A.B.S. and N.V.

SPECIAL PRECAUTIONS: *Emergency Alarm:* This safety device is conveniently placed on all docks and is under the control of the jetty personnel. This is used only in cases of emergency and has the effect of stopping all shore pumps immediately it is used. Loud-sounding horns are situated on the hose structures and are sounded by the jetty attendant when urgent attention from the ship is required.
Hose Pressure: The max. discharge pressure allowed on the jetty hose is 100 lbs. Pressure of jetty hose for loading shall not exceed 100 lbs.

GANGWAY/DECK WATCHMEN: An efficient watch must be maintained on deck and in the engine room of all ships in port, and a sufficient number of men must be on board at all times to move the vessel either for harbour operations or in emergency situations.

CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or 0.5 lb. tobacco and 1 bottle of spirits.

REPATRIATION: Facilities exist for effecting crew changes and arranging repatriation.

AIRPORT: Piarco International Airport 28 miles (approx.) away from Pointe-a-Pierre, served by international airlines and flights are regular.

TIME: GMT minus 4 hours.

TELEPHONES: On dockside and at all sea berths.

SHORE LEAVE: Regular launch service from ship to Pointe-a-Pierre only, for all crew members.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: No facilities.

WASTE OIL DISPOSAL: Shore facilities can accommodate 2,000 barrels of dirty water ballast (slops) per vessel, or material which does not require heating (low pour point).

SEAMAN'S CLUBS: The Mariner's Club (Missions to Seamen), Wrightson Road, Port of Spain. Tel: 62-5426. The Club is approximately 32 km. from the terminal. Facilities: Chapel, T.V. lounge and video films, telephone service, shop, mail and stamps, bar, darts, pool tables, table tennis and swimming pool. Hours: 0900 hrs. – 2000 hrs. Monday – Friday; 1000 hrs. – 2200 hrs. Saturday, and 1400 hrs. – 2200 hrs. Sunday.

CURRENCY: Trinidad and Tobago Dollar (TT$.). U.S.$ 1.00 = TT$.6.00 (Floating Rate).

GENERAL:
Tidal Variation: Rise and fall is approximately 3 ft. 6 in.
Prevailing Winds: N.E. trade winds.
Flags Required: Republic of Trinidad & Tobago and International Code Flags "B", "G", "H" and "Q".
Launches: Launch service to Pointe-a-Pierre for Officers and crew.
Laundry/Provisions: Available.

SHIPMASTER'S REPORT: August 1979 (Updated 1994).
Bunkering:
Approach: (From Passage Book). Trinidad and Tobago Islands observed on radar at 48 miles, although echo masked by clouds, islands observed visually at over 40 miles. Marked by towering Cumulus clouds. Numerous tide rips and abrupt change of colour of water (green) at the 200 m. sounding line.

Good position obtained at a distance 35 miles from Galera Point and Scarborough using visual bearings of Galera Point and Little Tobago and distance off Granby Point.

North coast Trinidad current approximately 1.5 knots West going.

Chupara Point Light not conspicuous during daylight and not seen at night.

Chacachacare Light (Admiralty List of Lights No. 5846) good, seen at 35 miles.

Gulf of Paria can, with moderate sized vessel, be approached through any of the channels of Bocas Dragon. We used Boca de Huevos which was safe, no problems. Parallel Indexing very useful on Point au Diable, Point Braba and Cape Cola.

Serpents Mouth not recommended at night.

Gulf of Paria not very busy, many vessels anchored off Port of Spain.

An intense white light (Fl. ev. sec.) is located on Chimney just South of South Pier at Pointe-a-Pierre (position: Lat. 10° 18′ 38″ N., Long. 61° 27′ 36″ W.). B.A. Chart No. 482 seen at 12 miles.

No appreciable current in Gulf of Paria.

VHF: Called "Trintoc Shipping Office Pointe-a-Pierre" (now "Petrotrin" on Channel 16 about 5 miles North of Boca de Huevos Strait, contact reasonable. Working on Channel 13, very prompt.

Anchorage: General anchorage along parallel of 10° 19′ North from 3 miles West of Buoy No. 1 (Lat. 10° 19′ 06″ N., Long. 61° 29′ 18″ W.) to 0.5 miles off buoy.

We anchored with Buoy No. 1 - 072°×1.0′, good position in 17 m.

For bunkers, oil company like vessel as close as possible to No. 1 Buoy, but not closer than 0.5 mile.

Immigration/Customs: Came out very promptly. No difficulties, forms as per "Guide to Port Entry". Must have gangway rigged. Pratique message sent, no answer received, given on arrival.

Bunkering: Trintoc (now "Petrotrin"): Dumb barge of 1,500 tonnes capacity. Delays caused by waiting for harbour tug to bring barge alongside vessel, also delay waiting for tug on completion of bunkering. Contact 'Shipping Office' Channel 16 well before barge finishes in order that they may call tug. We waited for tug for one hour before bunkering and 2 hours on completion.

Diesel 6 in. line, 150 ASA, ship's derrick required.

Rate: Up to 200 tonnes p.h. for diesel.

Films: Walport Films and Vidpack can be changed on prior notice to Agents.

SHIPMASTER'S REPORT: September 1979 (Updated 1994).
Approaches: Deep drafted vessels use Boca Grande to enter Gulf of Paria in which is situated the Pointe-a-Pierre Terminal. An area marked by dotted lines on the chart has been surveyed and declared safe for large vessels and this route should be followed up to the anchorage off Pointe-a-Pierre.
Anchorage: Trintoc (now "Petrotrin") Shipping advise vessel where to anchor when making the approach and on this occasion we used two anchorages whilst waiting, first with the "SBM" bearing 083°T×2.4 miles and the second with La Luc Lt. bearing 334° and Radio Mast bearing 110°. At both anchorages vessel used 6 shackles on starboard anchor in about 60 m. of water. Bottom, heavy glutinous mud which gives good holding ground. The deepest draft vessel which arrived in the port was drawing 73 ft. and appeared to have no difficulty anywhere.
Navigational Restriction: VLCCs are required to advise Harbour Master, Trinidad, of their time of arrival off Boca Grande, 24 hours before arrival so that other vessels can be advised to give a clear berth. On approach to Boca Grande vessel can contact North Post Radio on VHF to confirm transit time and receive information of other movements. Our ETA was broadcast 3 hours out.
Port Officials: Customs and Immigration board with Agent and clear vessel inwards. No special requirements. Bond is sealed but Customs will board to make crew issues after each 7 days if requested through Agent. Port Health work is carried out by Agent and we renewed Derat Certificate. Shore Leave Passes are issued by Immigration and are of two types, one for Officers which allows them to use the Pointe-a-Pierre jetty to land and also the Trintoc (now "Petrotrin") Club and one for the crew which only allows them to land at Pointe-a-Pierre jetty.
Shore Leave: (Launch cost TT$11.00 per hour of stay). A fast launch calls at the ship every two hours, day and night, to take personnel to Pointe-a-Pierre. The launch can be contacted on VHF Channel 15 or 16. We found that by advising them of whether we had crew to go ashore before they arrived at the ship we received better service. Officers wishing to go to the club could get a separate launch arranged by Trintoc (now "Petrotrin") Shipping (when available) direct to Pointe-a-Pierre.
Bunkers: Bunkers are supplied by barge of 30,000 bbls. capacity. Pumping rate is very slow, we had 3 separate lifts and the average rate was about 150 t.p.h. The barge also has capacity to supply good fresh water if previously arranged through the Agent, which is more economical and better quality than in the official water barge.
Fresh Water: Normal source of supply is by barge from Port of Spain which requires about 4 days' advance notice. Cost of supply is TT$3,000 no matter what quantity you require and we found the water supplied was heavily polluted with sea water giving a reading of 500 p.p.m. salt and also tasted oily. It is better to take water when bunkering (See "Bunkers").
Ship Chandler: Stores were expensive and many items unobtainable. All stores have to come through Pointe-a-Pierre jetty and the chandler has to make arrangements with the launch supervisors for transport to the ship. If large quantities involved, a barge and tug are used. We tried to get everything at one time but this was impossible. No canned beer or minerals are available and all bottles are returnable which increases the price.
Cargo Handling: We lightened into two vessels and discharged the balance of cargo at the SBM. The discharge plan was changed frequently during the waiting time. Discharge into the ships was via a 12 in. hose and only one pump was required to achieve the required discharge pressure and gave rates of 2,075 t.p.h for the first and 2,933 t.p.h for the second.

Discharge to the SPM was via one 16 in. hose with a second hose connected in case of difficulties with the first, although not actually used, and a rate of 2,224 t.p.h. was achieved. All discharging was carried out using the port side manifold and derrick.

Before lightening, three lengths of hose were placed on board to be connected together and attached to the ship's manifold, then a string of four "Yokohama" type fenders were made fast alongside using the spring wires from forward of No. 1 and from between Nos. 8 and 9 holds. We were instructed to keep the wires slack at all times to prevent the joining wires breaking. All the moorings from the lightening ships have to be fed through "Panama type" fairleads and no open leads used to prevent the rope/wire jumping out of the lead when the lightening ship is completely deballasted. Communications between vessels is via walkie-talkies supplied by Trintoc (now "Petrotrin") and a co-ordinator from Trintoc (now "Petrotrin") attends the vessel for liaising operations. Bunkering cannot be carried out while lightening but is acceptable at the SPM, we managed to complete it before any cargo operations started. No gangways are used between ships.

Mooring at the SPM was carried out with the assistance of one tug made fast on the starboard side of No. 1. A ship's line is sent away to connect with the SPM port line, as usual, this starting line should be two ropes joined together to ensure adequate length. Once the connecting line is brought on board (a 16 in. nylon) in sufficient quantity it is made fast on the bitts and the starboard connecting line picked up and secured. When connecting hoses, we found that our manifold flanges were too thin to accept their patent clamps and we had to fit 12 in. reducers to our manifolds and also to their pipelines to get a good fit. Ship's crew carry out all operations although there are personnel placed on board for mooring to the SPM to advise and assist.

Mooring and unmooring are usually carried out during daylight but for some reason we unmoored during the night, much to the surprise of the Pilot and co-ordinators, being the first vessel to do it for 6 years.
Personnel Changes: We carried out several changes of personnel over the period and in general, the joining people arrived on time without much difficulty but the personnel leaving, unless previously booked in advance, met with delays getting flights. A vessel which arrived the day after us, had eight men delayed ten days before flights were available. Non-crew personnel, such as technicians, who arrived and stated they were coming to do work on the ship were not allowed entry into the country without obtaining a work permit.

SHIPMASTER'S REPORT: February, 1980 (Updated 1994).
Documents: 5 Crew Lists, 2 copies of Crew Personal Effects, 2 Arrival Reports, 1 unmanifested Cargo List, 2 Report of Ship's Stores. All these on local forms except Crew Lists.
Anchorages: Usually given an anchorage position by Trintoc (now "Petrotrin"), Trinidad, and normally use starboard anchor and require starboard accommodation ladder.
Tankers: Advise Agent time of transiting Bocas del Dragon and then North Post Radio will advise all ships. If using SPM, require forward 2 ship's lines to bring aboard 2×16 in. nylon lines which have to be heaved around drum ends. Sometimes have tug to assist.

SHIPMASTER'S REPORT: November 1983 (Updated 1994).
Documents:
Agent: P&I 48 (Arrival Report)
Immigration: P&I 10 (Arrival Report), P&I 53 (Arrival Report form in triplicate)
Quarantine: P&I 31 (Maritime Declaration of Health)
Customs: C-1 (Ship's Stores in duplicate)
C-2 (Crew Declaration)
C-3 (List of Unmanifested Cargo)
5 copies of Crew List.
Anchorages: It is necessary to anchor in position given by Trintoc Marine (now "Petrotrin Marine"),otherwise they request you to shift to correct position but also necessary to check there is not another vessel anchored there already.
Radio: We found it very difficult to communicate with North Post Radio from the bay. 'Shipping' or Trintoc Marine (now "Petrotrin Marine") are very helpful passing messages to agents, etc.
Shore Leave: Apparently the liberty boat rarely goes to San Fernando these days (apparently due to the unsafe state of the jetty).
Currency: Agents require at least 10 days' notice if vessel requires any foreign currency and, apart from this delay, Sterling and U.S. Dollars seemed readily available. 4 days' notice is required for local currency. This 4 days would probably be longer if not using Company Agents.
Mail: Mail took 4 days from arrival at airport to delivery on board.

AUTHORITY: The Petroleum Company Trinidad and Tobago Limited, Pointe-a-Pierre, Trinidad, W.I. *Tel:* (809) 658-4200. *Telex:* 39367 Petrotrin Marine. *FAX:* (809) 658-4636. *Cables:* Petrotrin, Pointe-a-Pierre. *Contact:* P.J. Lyons, Marine Manager. L. Chan Chow, Port Captain.

AGENT: See "Port of Spain".

PORT-OF-SPAIN: 10.39 N. 61.32 W. (See Plan)

DOCUMENTS:
Immigration:
2 Crew Lists.
2 Passenger Lists.
1 Maritime Declaraton of Health.
*1 Stowaways List.
*4 Arrival Report Forms.
*Supplied by the Immigration Department on boarding the vessel and must be completed by the Master of the vessel.
Customs:
2 Crew Lists.
1 Passenger List.
2 Customs Ship's Stores Lists.
1 Crew Stores List.
1 copy of Cargo Manifest (if cargo vessel).
2 Lists of unmanifested cargo.
Quarantine:
1 Cargo Manifest.

PILOTAGE: It is not compulsory to apply for a Pilot into Port-of-Spain anchorage. However, if required notification must be sent to the Pilot Station (Port-of-Spain) at least 1 hour before arrival at the Station on VHF Channel 16.

The Pilot vessel has a black hull and white housing and is 35 ft. long. The word 'Pilot' is written on the housing. It is equipped with VHF radio and carries an international pilot boat light.

Vessels requiring a Pilot can call Pilot by International Code Flag "G" by day and white light and red light at night or by International Code Signal "G" on whistle.

The Pilot Boarding Station is located within 0.5 miles seaward of the Grier Channel Entrance. The vessel awaiting a pilot may anchor anywhere seaward of the Pilot Boarding Station.

International Requirements are applicable for pilots with respect to Boarding and Safety measures. Gangway or standard type pilot ladder with spreaders about 10 ft. apart is required. Ladder must be clean. It is desirable that 1 stanchion be securely fitted in the bulwark at the top of the ladder.

Pilot station is situated at the Western end of the Port-of-Spain Wharf.

ANCHORAGE: Depends entirely on draft but should not be nearer than 0.5 miles from Grier Channel Entrance, except in cases of vessels loaded with explosives; this anchorage is clearly defined on Chart.

Open roadstead in Gulf of Paria but can be considered as sheltered with choppy seas at times. Bottom shelves gradually from shoreline to 7 fathoms at Western end of harbour limits, increasing to 20 fathoms outside harbour limits Westward. Type of bottom, mud. Swinging area unlimited. No mooring buoy. Distance from anchorage to shore 2.25 miles at 5 fathoms to 5 miles at 7 fathoms, vessel will swing to the tide if loaded, and to the wind if light.

Currents 0.5 to 1.5 knots flood and ebb. Rise and fall of tides, variab Minimum 1 ft. 5 in., maximum 4 ft. Rainy season June-December. D season December-June. Rain squalls occur during months of Ju August and September up to 30-40 knots unpredictable hurricane m unusual. Prevailing winds are mostly Easterly, normally stronger dur daylight.

RESTRICTIONS/MAX. SIZE: The Grier Channel, 350 ft. wide, leads a dredged basin in which are the docks. No restrictions on length, t maximum draft in channel, in basin and alongside is 32 ft. MLWOS

RADIO: Advise through North Post wireless or telephone, call sign 9 ETA 48 hours and 24 hours with other requirements.

TUGS: All vessels of over 1,000 n.r.t. are required to use a tu Specifications of the 2 tugs are as follows: g.r.t. 2,961.72 tons, n 75 tons, speed 12 knots, engines 2×1,200 b.h.p. Ship's lines a normally used.

BERTHING:

Berth No.	*Length* (m.)	*Depth* (m.)	*Use*
1	90	8.0	Break Bulk, Multi-Purpose, Ro/Ro, Cruise Vessels.
2	152	7.4	Break Bulk, Multi-Purpose, Cruise Vesse
3	152	8.0	
4	152	8.4	
5	152	8.9	
6	152	9.5	Container vessel using ship's gear or sho crane, cruise ships.
6AE	166	9.9	Container vessel using Portainer crane.
6AW	166	10.0	
*7	182	9.5	Rice, Break Bulk, Multi-Purpose.
8	182	9.5	Rice, Break Bulk, Multi-Purpose, Ro/Ro.
8AW	61	4.0	Rice

*At present this berth is under repair.

In addition to the deep water facilities mentioned above there a shallow draft facilities which are located at the Eastern end of the Po They provide docking facilities for coastal and regional vessels. T Caricom Berth (for regional vessels) is 45 m. long and 4.0 m. deep.

Loading/discharging can be operated by shore equipment supplied the Port Authority or ship's gear or both.

CRANES:

Type	*No.*	*Capac* tons
Portainer–Rail Mounted	2	40
Ferranti rubber tyred gantry	5	40
FMC Linkbelt Mobile Crane	1	200
Demag Mobile Crane	1	100
FMC Linkbelt Mobile Crane	2	75
FMC Linkbelt Mobile Crane	3	50
IMC Linkbelt Mobile Crane	4	30

CARGO HANDLING: One berth on the Eastern side is an open wha without a seafront warehouse. This berth is strictly used for containeris and passenger (cruise) vessels. The Eastern Wharf is 3,300 ft. with fi seafront warehouses. On the Western side the wharf is 1,200 ft. lo with two seafront warehouses for general cargo, but at these two bert there are also facilities for receiving bulk cargo, i.e. grain, liquid oil, ta and molasses. These cargoes are usually discharged by vesse equipment, but grain can be discharged by shore equipment at a slow rate.

In addition to the cranes mentioned above, other cargo handli equipment available is as follows:
5 top lifters × 28 tons capacity.
7 front loaders × 10 tons capacity.
40 Mercury Reliance Haul Majors.
17 Motor trucks.
117 Trailers × 20 ft.
45 Trailers × 40 ft.
79 Forklifts × 5 tons capacity.

STEVEDORES: Integrated longshore and stevedore gangs available request by Agents. Gang sizes vary from 12 men to 18 men, depende on the type of operation.
Hours of Work: Normal Time: 0700 – 2300, Monday to Friday.
Overtime Hours: 2300 – 0100, Monday to Friday necessary to complete operation).
0700 – 1900, Saturday, Sunday a Public Holidays.

MEDICAL: Advance notice of attention required will assist. Mode hospital facilities available.

FRESH WATER: Fresh water is available at Berths No. 1 – 6 fro hydrants alongside the Pier. Alternative arrangements can be made supply truck-borne water if necessary.

FUEL: All grades supplied by barge, contact Agent in advance.

CONSULS:

NOTES

Please also advise Shipping Guides Ltd.

Tristan da Cunha

EDINBURGH (Tristan Island): 37.03 S. 12.18 W.

(See Plan)

DOCUMENTS:

Passenger List.
Crew List.
Passport No./Name/Nationality.
Cargo Manifest (No Customs/Port forms).

APPROACHES: Chart B.A. 1769 Pilot Book Africa Vol. 2 to be used, local knowledge should be sought regarding weather.

Island is good radar target and may be seen visually at 20 miles in good weather.

PILOTAGE: Local Radio Officer will indicate safe anchorage by handheld VHF (Channel 16).

ANCHORAGES: Edinburgh anchorage is on N.W. side of Island. Town is difficult to observe as houses are very low. Leading marks are white triangles in field to right of crayfish factory.

Area most likely for large vessels has depth of 18 fathoms. Vessel to be wary of large amounts of kelp blocking intakes, etc.

In rough weather vessel could shelter to South of Island. Although due to katabatic winds off the mountains it is possible that no shelter will be found around the island.

A quieter anchorage can be found 2 cables East of the 114°T and 213°T transit intersection. Weak tidal currents set East and West through the anchorage, the East going current being the stronger.

HEALTH: Any person suffering a cold will not be allowed ashore; if colds are prevalent aboard then no one will be permitted ashore.

RADIO: Radio contact made via Cape Town who will arrange schedule.

Tristan (ZOE)	Ship
3737 kHz	3737 kHz
8187 kHz	8281 kHz
12325 kHz	12423 kHz

Vessels may also make contact by the following:

Inmarsat Main		*Inmarsat Reserve*	
Sat Telex:	581 1445434 (PR6JX)	Telex:	581 1445412 (PR6SX)
Sat Fax:	871 1445435	Fax:	871 1445413
Sat Tel:	871 1445434	Tel:	871 1445412

BERTHING: Calshott Boat Landing (used for all landings) is small (40 ft. – 50 ft. long). Local knowledge required. 1 motor launch and 2 small powered lighters are used for cargo.

GARBAGE DISPOSAL: No garbage disposal facilities.

WASTE OIL DISPOSAL: No waste oil disposal facilities.

SEAMAN'S CLUBS: No seaman's Club. Anglican church. Very limited sports. No telephone. No shore leave overnight.

CURRENCY: Own currency, pounds on par with UK Sterling.

GENERAL: There is a landing fee of £3.00 for any passenger who wishes to land (No Passenger List required).

SHIPMASTER'S REPORT: February 1986 (Updated 1994).

The navigational marks are as per the Pilot Book. These are made of wooden slats. The beacons on the 203° (T) bearing are in a large field behind the new canning factory, just above the boat harbour. The lower of the beacons on the 114° (T) bearing is on the top of a little hillock and the higher is on the cliff side.

When the sun is shining on these beacons they are easily discernable but when the sun is at right angles or behind them they are not easily seen.

There are no lights on the beacons.

There are lights illuminating the entrance to the boat harbour.

All lights are extinguished at 2400 hrs., including the lights at the entrance to the boat harbour.

The soundings that we obtained were as per the chart.

Whilst we were there, with a Force 7 on the starboard beam, we lay with the bow to the shore. When the wind moderated we then lay with our bow into the wind so it would appear that strong Westerly winds cause an offshore current in the anchorage area.

Radio Communications at Tristan Island: The Station has a daily schedule with Cape Town Radio at 0830 hrs. GMT.

Cape Town Radio will arrange schedules for ships as required.

The frequencies used are as follows (all SSB R/T):

Tristan da Cunha (ZOE)	Ship
3737 kHz	3737 kHz
8187 kHz	8281 kHz
12325 kHz	12423 kHz

Whilst at anchor VHF communication on Channel 16 is provided by a hand held walkie talkie on the island.

The manifest of the cargo for Tristan da Cunha only.

Accommodation ladder not used, pilot ladder and scrambling net preferred.

SHIPMASTER'S REPORT: March 1988 (Updated 1990).

The Report above is correct; but to the East of the settlement, there are a further two small triangular leading marks, which when in transit (114° T), indicate the beam bearing for the safest anchorage. The top mark is part way up the cliff to the left of the land-slip, the lower mark is on top of a small outcrop of rock. There are no lights on these beacons.

AUTHORITY: *Contact:* Curnow Shipping Ltd., The Shipyard, Porthleven, Helston, Cornwall. *Tel:* 0326-563434. *Telex:* 45654. *FAX:* 0326-564347.

Tunisia

ASHTART: 34.17 N. 11.23 E. (See Plan)

DOCUMENTS:
Customs: 1 Crew Declaration, 1 Ship's Stores List.
Immigration: 1 Crew List.
PILOTAGE: Compulsory within 3 miles of any installations. To avoid a delay, Owner must report to SEREPT SFAX 48 hours and 24 hours in advance of ETA.
ANCHORAGE: 3 miles South of the storage barge.
RESTRICTIONS: Mooring in daylight only.
HEALTH: Masters must declare on arrival, condition of health of all on board with details of any sickness.
VHF: Call "Ashtart Terminal" on VHF Channels 9 and 16.
TUGS: One tug required to be in attendance while loading.
BERTHING:
(a) Tanker Berths:

One SBM for tankers up to a max. size of 150,000 d.w.t. Water depth 66 m. Loading Rate 3,000 cu.m.p.h. Max. quantity available 105,000 tons. 1×12 in. hose.

Vessels mooring use one line, and must be able to easily heave on board an anti-chafing chain whose links are 32 cm. wide.
(b) Storage Barge Berths:

Starboard side alongside storage barge, tankers up to a max. size of 100,000 d.w.t. Depth 66 m., loading rate 4,500 cu.m.p.h. Max. quantity available 105,000 tons. 2×12 in. hoses.
(c) Tanker on Storage Barge Berth:

Tankers up to a max. size of 150,000 d.w.t. Depth 66 m. Loading rate 3,000 cu.m.p.h. Max. quantity available 105,000 tons. 1×12 in. hose on starboard side.
MEDICAL: No facilities.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: France and Libya at Sfax.
REPAIRS: No facilities.
REPATRIATION: Not possible.
AIRPORT: At Sfax.
TIME: GMT plus 1 hour.
HOLIDAYS: None.
GENERAL: No dirty ballast facilities. No provisions available. Master supplied with booklet containing special port regulations on arrival.
AUTHORITY: Societe de Recherches et D'exploitation des Petroles en Tunisie – SEREPT, B.P. 246, 3018-SFAX, Tunisia. *Tel:* (04) 235 400. *Telex:* 40859, 40700. Sfax Telex: 13.800 Tn. Tunis Telex: 13.042 Tn. *FAX:* (218) (4) 237102 (Sfax). *Contact:* MM.H. Gharsallan or Mr.R. Hamza.

BIZERTE: 37.17 N. 09.54 E. (See Plan)

PORT LIMITS: Commence 0.5 mile from the Port.
DOCUMENTS:
5 Crew Lists.
5 Passenger Lists.
4 Crew Personal Effects Lists.
4 Ship's Stores List.
3 copies Bill of Lading.
3 copies Manifest.
Health Declaration.
PILOTAGE: Advise Pilot of ETA 48 hours before arrival. Pilot vessel and pilot station may be contacted by VHF Channel 16. The Pilot boat exhibits the letters "P" & "H". The Pilot boards half a mile from the Southern fairway, vessels have to slow down to enable the Pilot to board.
ANCHORAGE: The anchorage for vessels awaiting the Pilot is half a mile from the Southern fairway.

When the wind is blowing from N.W., the best anchorage is off Cap Farina.
RESTRICTIONS: Entry at night is forbidden for tankers.
MAX. SIZE: See "Berthing".
HEALTH: Free Pratique normally given at the quays after mooring. Pratique is automatic for vessels coming from another Tunisian port. In case of suspected disease on board vessel will be ordered to quarantine anchorage.
RADIO: Bizerte Radio, call sign 3VWA. Frequencies: 2182, 1743, 1637, 2321 and 2506 kHz. Range 200 km.
VHF: Channels 16 and 14.
TUGS: The tugs join the vessel at half a mile from the fairway.

Two tugs of 3,600 h.p. are available 24 hours. They are equipped with radar, 2 cables each (48 mm. diameter × 850 m. length) and 2 pumps of 420 cu.m.p.h.
BERTHING:

Berth	*Length* (m.)	*Depth* (m.)

Quai Cimentier	180	9.80
Appt. North Menzel Bourguiba		
North	156	7.60
South		6.30
Quai Sud Menzel Bourguiba	150	8.55

Load and discharge is carried out by ship's own gear.

CRANES: 2 forklifts, capacity 3.5 tons. 1 forklift, capacity 4 tons. 1 forklift, capacity 8 tons. 2 tractors with tipping wagons. 1 floating pontoon crane of 30 tons.
BULK HANDLING FACILITIES: Grain is handled on the Silo Quay.
SPECIAL CARGO HANDLING FACILITIES: None.
BRIDGES: New bridge (mobile) in operation.
STEVEDORES: Minimum of 24 hours' advance notice of ETA to Agent is required.
MEDICAL: Doctor available to board vessel. Hospital, private clinics and all facilities available. 48 hours' notice required for Cholera and Yellow Fever inoculations. Advise Agent of requirements.
TANKERS: Crude oil load/discharge line 20 in. diameter. Fuel oil load/discharge line 14 in. diameter. No slop discharge facilities. Tugs stand-by during cargo operations.
FRESH WATER: Available from quay at most berths.Rate 20 cu.m./hr.
FUEL: Available.
FIRE PRECAUTIONS: The Petroleum Harbour is equipped with fire hydrants. A tug of 3,600 h.p. is required to be permanently standing by when tankers are moored alongside the quay.
CONSULS: Italy Tel: 02.31.747.
REPAIRS: Some types of deck and engine repairs can be effected.
DRY DOCKS: There are 4 dry docks which are located at Menzel Bourguiba.

		(m.)
Dry Dock No. 1 & 4	Length	190.90
	Higher width	30.25
	Lower width	26.50
	Draft	8.80
Dry Dock No. 2	Length	247.50
	Higher width	40.60
	Lower width	36.00
	Draft	12.00
Dry Dock No. 3	Length	84.10
	Higher width	14.78
	Lower width	13.00
	Draft	4.15

SURVEYORS: Bureau Veritas, Norsk Veritas and Lloyd's Register.
GANGWAY/DECK WATCHMEN: It is recommended to employ shore watchmen.
OPENING/CLOSING HATCHES: Carried out by stevedores.
CUSTOMS ALLOWANCES: Each crew member is allowed 1 carton of cigarettes and 1 opened bottle of wine or spirits. In case of a prolonged stay in port, Customs may renew these quantities.
REPATRIATION: Can be arranged.
AIRPORT: Tunis/Carthage Airport is situated 65 km. from Bizerte. Served by international airlines.
TIME: GMT plus 1 hour throughout the year.
HOLIDAYS: There are 17 days official holiday during the year. Work can be carried out on all holidays except 1st May on payment of 100% overtime.
POLICE/FIRE/AMBULANCE: Police Tel: (02)31.200; Fire (02)31.022; Ambulance (02)31.422.
TELEPHONES: No arrangements exist.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Crew Members' Identification Cards will be collected by the Immigration service and exchanged for shore passes while vessel is in port.
GARBAGE DISPOSAL: Nothing organised for garbage disposal. If a ship asks the Port Authority to dispose of her garbage, it must be collected on board and a tractor will go alongside each day and collect it.
WASTE OIL DISPOSAL: The refinery "Stir" can accept only a small quantity of dirty ballast. The organisation "Sotulub" can also receive a small quantity of waste oil. For information contact the Harbour Master.
SEAMAN'S CLUBS: None.
CURRENCY: Dinar Tunisien (Dinar).

SHIPMASTER'S REPORT: January 1982 (Updated 1992).
Restrictions: Due to the lift bridge at the Eastern end of the Quai de Commerce there is no entry during a period in the morning and another in the evening when the main flow of traffic is expedited. Opening hours are 0600 – 0630, 1015 – 1045, 1515 – 1545 and 1930 – 0530. Local authorities will open bridge out of these hours with special permission.
Health: Free Pratique will be granted on application by radio.
Berthing: The Western end of the Quai de Commerce showed depths of 9.14 m. along the 600 ft. to the East.

There is 12.0 m. in the entrance channel and as far as the turning basin, but LESS in the basin hence the operation is difficult.
Fresh Water: Using ship's hoses, some 23 tonnes per hour may be attained overall, but pressure can drop at any time and care must be taken to make sure of a large quantity or if proceeding to La Goulette elevator where there is no water to be shipped.
Gangway/Nightwatchmen: Most helpful and able to get results when Agents not available.
Identification Cards: These are sighted by the Immigration Officer and crew passes issued which are valid for all Tunisian ports but which must be collected before the vessel sails from the last port.

SHIPMASTER'S REPORT: August 1993.
Bulk Handling Facilities: There is a jetty off the cement plant for loading clinker. This jetty (See "Plan") was smaller than the length of the vessel and had reasonably good tyre fenders keeping the vessel away by about 1.0 m.

A fixed loader occupied a position in the middle of the jetty. When berthing, Hold No. 3 was positioned abreast of this loader to start the sequence. On berthing, vessel had an airdraft of about 10.0 m. An airdraft of 8.0 m. minimum would be required, even though the loader has a flexible spout. The spout, if left vertical, would plumb the part of the hold directly underneath it. The spout could be pulled by ropes attached to the end to direct cargo to the part of the hold required, but in any case cargo could be loaded only in peaks.

The plant did not have any loading meter. The loading rate worked out to about 450 tonnes per hour. From the time cargo was requested to be stopped, it took about 8 minutes for the conveyor to stop, meanwhile an addition of about 40 tonnes of cargo on the belt gets cleared. This has to be taken into account if loading to maximum draft.

The only cumbersome process while loading is the warping, as the bollards ashore were not suitably positioned for heaving the vessel to and fro. B1, B2, B3, B4 and B5 (See "Plan") were the only normal mooring bollards which were positioned in such a way that they could not be used for warping the vessel. There were 4 small chain lashing points (C1, C2, C3 and C4) on the jetty, on which the springs were secured to heave the vessel forward and aft.

Vessel experienced strong Easterly winds (Force 5) throughout the stay, which gave anxious moments, especially when proper springs could not be given, forward and stern lines having no proper lead to check the vessel, tending to surge down wind and also chafing the aft loader supports. There was a detached square jetty with a second loader which could be used simultaneously on longer vessels. For our vessel, only Holds No. 1 and 4 could be positioned together under the loaders.

Stevedores were co-operative and at all times about 3 or 4 men were on board to tend to the lines attached to the loading spout, in order to direct the cargo in the hold as required.

Restrictions: We understood from the Agents that the road bridge at the entrance to the harbour opens only between hours of 0615 – 0645, 1015 – 1045, 1515 – 1545 and 1930 – 0545; if at any time between 1015 – 1545 the bridge is required to be opened, it would be considered as special and may not be possible.

Fresh Water: Not available at the cement berth.

Gangway/Deck Watchmen: Compulsory. Risk of stowaways is possible.

Time: GMT plus 1 hour. No changes throughout the year.

Pilotage: No night pilotage after sunset.

Radio: VHF telephone calls can be made through Bizerte Radio.

AUTHORITY: Direction du Port de Bizerte, 6 Rue de Russie, Bizerte, Tunisia. *Tel:* (02) 31741, 31412, 31139. *Telex:* 21007 Bimpor. *FAX:* (02) 33688. *Contact:* Ben Fadhel Sahbene, Harbour Master.

GABES (Ghannouche): 33.57 N. 10.04 E (See Plan)

LOCATION: The port is located in the Gulf of Gabes, 22 miles (approx.) South of the oil port of La Skhirra, 58 miles S.W. of Sfax and 32 miles to the West of Djerba.

APPROACHES: Landfall by day is easy by virtue of the landmarks and oases around the port.

One can distinguish:

To the South of the port: The Oasis of Sidi Abdeslem and a 30 m. high tank.

To the North, the Oasis of Ghannouche and the red and white chimney, 44 m. high, of the power station.

To the West, the mass of buildings and industrial installations with, at the rear, the grey mushroom of the water tower, 36 m. high, and the Oasis of Bouchemma.

Landfall by night is equally easy, the port approaches being indicated, for vessels coming from the:

S.E.: The lighthouse of Ras Turguness (flash white 5 secs., range 24 miles) and then by the lighthouse of the Gabes fishing port (flash white 12 secs., range 11 miles).

N.E.: After coming round the belt of lights of the buoys of the Kerkennah Islands; by the mooring buoy N.W. of the channel of the Port of La Skhirra (flash white 10 secs., range 10 miles) and then by the lighthouse of the fishing port of Gabes.

The Roads:

The roads are indicated by the mooring buoy N.W. of the port channel (isophase white light: on 3 secs. off 3 secs., range 12 miles) and by the lighthouse of the fishing port.

Access Channel:

The port is entered via an access channel 3,220 m. long and 130 m. wide, dredged to 13.5 m.

This channel runs S.W. – N.E. and is joined to the entry passage by a curve 1,200 m. long.

On its 2 banks, there are 4 pairs of fixed light buoys, except Buoy No. 8 located in the curve of the channel.

At the breakwater entrance, there are lights placed on the heads of the North and South breakwaters.

ANCHORAGE: The Roads generally offer anchorage with good holding, and it is advisable to anchor to the South of the channel.

MAX. SIZE: "See Berthing"

TUGS: One tug of 1,200 h.p. and 2 fast pilot launches.

BERTHING:

The Basins:

The water area of the port, covering 80 hectares, is enclosed by 2 breakwaters (North breakwater 2,642 m., South breakwater 1,400 m.) leaving between them a passage 350 m. wide of which 200 m. is dredged to a depth of 13.5 m. This water area is divided into 2 basins:

An outer basin (50 ha.) dredged to 12.5 m., and having a manoeuvring circle 600 m. in diameter.

An inner basin (30 ha.) dredged to 10.5 m.

The Quays:

For berthing of vessels, the port has available:

A quay 375 m. long (Berths No. 3 and 4) running approximately E.N.E./W.S.W. and dredged to 10.5 m. This quay can take vessels up to 25,000 tons.

A quay 600 m. long (Berths No. 5, 6 and 7) running approxima N.N.W./S.S.E. and dredged to 10.5 m. This quay will take vess up to 25,000 tons.

A quay 260 m. long (Berth No. 8) perpendicular to the first, a dredged to 12.5 m. This quay will take vessels up to 50,000 ton

Port access is possible at all times to vessels with 33 ft. (10.06 m max. draft for Berths No. 5, 6 and 7, and 39 ft. (11.86 m.) max. draft fo Berth No. 8.

Open storage areas:

The open areas for the storage of goods transitting through the po include in the public zone – a shed of 4,000 sq.m., open areas whi are properly surfaced 70,000 sq.m., open areas of rolled ear 100,000 sq.m.

CARGO HANDLING EQUIPMENT:

Public:

One gantry crane of 20 tons; Lift trucks from 4 tons – 10 tons; Cra on rails of 20 tons (on order); Crane on rubber tyres of 20 tons.

Private:

Cranes on rubber tyres of 10 tons – 25 tons; Lift trucks from 4 tons 10 tons; Tractors and trailers.

FRESH WATER: Available.

FUEL: Not available.

REPAIRS: Possible.

TIME: GMT plus 1 hour throughout the year.

WINDS/TIDES: The winds in the Gulf of Gabes present a season variation with the character of a monsoon.

During the cold season (October – March) winds come from the lan from the West and North.

During the hot season (April – September) the winds come from th sea, from the East to S.E. The strength is then from Force 3 to Force very infrequently reaching Force 7.

Tidal currents are negligible and have no influence on navigation.

The characteristics of the tides are as follows:

High Spring Tide	2.45 m.
High Neap Tide	1.60 m.
Low Spring Tide	1.10 m.
Low Neap Tide	0.15 m.

DEVELOPMENTS: The Port of Gabes has been essentially created serve the chemical industries in the area which process the natu Tunisian phosphates coming from the S.W. of the country. There is som importation of sulphur for use in the various processes, likewis aluminium for production of aluminium fluoride. As the South of t country develops, traffic in various general cargoes, foodstuffs a capital equipment, is increasing.

The port is currently advanced in its 5th Development Plan. The ne infrastructural works comprise:

1. Transformation of the current Quay No. 8 into a much lengthene version.
2. Construction of a service quay.
3. Surfacing and equipping of 50,000 sq.m. of open area for stora of goods.
4. A second tug of 1,200 h.p. will be acquired.
5. Fertiliser bulk loading unit of 500 t.p.h. capacity will be installed
6. An electric crane, on rails, of 20 tons will be acquired.
7. Cranes on tyres of 15 – 20 tons will be purchased.
8. Fork lifts from 4 – 10 tons will be acquired.

SHIPMASTER'S REPORT: The following reports are from the sa vessel. Vessel discharged ammonia at Gabes – Ghannouche.

May 1980:

Approaches: BA. 3327 and 372.

Approaching from the East good positions were obtained off Ile Djer keeping outside the 9 fathom soundings as the bottom shoals qu steeply.

The 'Fairway' Buoy "O" showed up well on the radar at 8 miles a the channel buoys themselves at 5 – 6 miles. Details of the breakwa were also visible on the radar at this range.

There is a Radio Beacon at Gabes but this is not marked on eit chart. ALRS Vol. 2 refers to this.

Caution: The positions of the outer and channel buoys should not relied upon. New positions as at 22nd/24th May, have been marked Chart 372 and a tracing made. The current sets quite strongly acro the axis of the channel and care is required when rounding the bend the channel immediately before the entrance. The Pilot reported t channel buoys frequently break adrift.

Pilotage: Reportedly there is a 24 hour watch kept on VHF Channel but we did not succeed in making contact until after we had ancho time of arrival 0330 hrs. Even then reception was poor.

Fluency of English fair.

Pilot boards from a black hulled launch of about 10.0 m. length w white upperworks. Pilot ladder about 1 m. from the water. Pilot boa outside the fairway buoy.

Vessels with draft in excess of 10.0 m. must berth head in, port s to, owing to existence of 10.5 m. shoal in the Southern corner of t harbour. No night time pilotage for vessels of this size.

Only 1 tug is available and only of moderate power; on berthing s pushes according to hand signals and whistles from Pilot (no VH When unberthing she takes a ship's line from the stern to swing shi port clear of berth.

Berth: The berth is a concrete quay in the Southern corner of the harb about 250 m. long with depths alongside of 11.3 m. (forward) 13.8 and 14.2 m. taken by ship's leadline. Communication with sh personnel was not very good with conflicting advice as to whether ves was in position or not.

The quay is used for the export of fertiliser products which are load by means of a large travelling chute. Despite fears, the gangway w swung out did not foul the gantry.

Well fendered with round rubber fendering.

Mooring arrangements were reasonable but the bow lines have to taken to the far wall to afford a good lead when in position.

The gangway is landed on the quay without any problems.

The berth is open to swells from the East through S.E and is not very well protected from winds, except from due South. Since the bow is close up to the quay, special care should be paid to backsprings and all moorings. Ensure that watchmen are warned.

Discharge: The shore plant has storage for about 10,000 tonnes and relies on these shipments to keep the fertiliser section in production. Should tanks be empty they will be warm and high back pressures may be expected – 9 bar. The facility uses about 7,500 tonnes per month.

They claim to be able to accept cargo at a maximum rate of 350 t.p.h. but is usually in the region of 200 – 250 t.p.h. Our overall rate this call was 220 t.p.h.

The discharge line consisted of an 8 in. pipe from which there was provision for up to 4×4 in. flexible hoses to be connected. Only 2 hoses were used at this call. The shore flange has 12 holes which do not match the pitch of our manifold and, despite cabling ahead, this was not apparent until berthing and some time was lost. Shore personnel connect and disconnect. Line taken on board using ship's derricks. Shore provided the converting spool piece. Ship blew through lines on completion.

No vapour return line.

No venting to atmosphere.

Surveyor: Redwood's Surveyor in attendance and all figures based on gauging of ship's tanks.

Surveyor used a strange vapour factor which was not familiar in any way and declined to give us copies or explain its origin.

General: Fresh water available. No fuel oil available, if required proceed to oil terminal at Sfax. Repatriation and relieving of personnel possible without difficulties. Good road and rail communication with Tunis, Sousse and Sfax. Good access to Gabes by taxi. Shore passes required – take Discharge Book to Immigration office and a pass will be issued. Collect Discharge Book inward.

Papers: 3 Crew Declarations. 3 Stores Lists, including Bonded Stores. Declarations on the contents of all Bars onboard. (This is most important, Tunisia is largely Moslem).

2 Lists of ports previously visited.

Port Health Form – normal Health Declaration.

The Officials were very fair but very thorough in checking bonded stores. Fresh provisions available.

July 1980:

Discharge: The discharge rate at this call was only in the region of 177 t.p.h. (perhaps due to Ramadan) with a very high back pressure throughout in excess of 9 bar.

Total delays this call amounted to some 28 hours 20 minutes.

General: IMPORTANT: Since our last call the authorities have instituted strict currency control regulations and a number of the crew were caught on arrival during cabin searches. Personnel must therefore be warned before leaving that *ALL* Tunisian currency has to be handed back. The penalty for non-compliance being confiscation of the currency and a fine of at least twice the value of the money discovered. Before arrival personnel should be warned accordingly.

All authorities subjected the ship to a much more thorough scrutiny than at last call.

Repatriating personnel were subjected to baggage searches either on board or ashore.

Fresh stores were taken at this call and were of good quality.

Freon "R22" available in small quantities.

Fresh water taken and treated with "Stabochlor" as a precaution.

November 1980:

Approaches: BA. 3327 and 372.

When rounding Kerkennah Banks the buoys should not be relied upon. On the flood tide the current from Kerkennah to Fairway Buoy sets in a S.S.W. direction. Fairway Buoy shows up at about 8 miles on radar and Channel Buoys at 5 to 6 miles.

A number of oil rigs are found between Kerkennah Banks and Ile Djerbe, these should not be relied on for navigation fixes. Ile Djerbe gives good positions. Approaching the Fairway Buoy a 'Minaret' marked on BA. 3327 to North of port is conspicuous and Beida Mt. (902) to N.W. of port is conspicuous.

Breakwater is visible on radar at 15 miles but difficult to make out visually until very close too on account of haze. A radio beacon not marked on BA. 3327 is listed and operating as per ALRS Vol. 2.

Fairway Buoy is number "O" and named "Ghannouche" it is a tall red pillar buoy, its permanent position as per the alterations on BA. 372.

Channel buoys have been altered and are best seen from the changes to BA. 372. Pilot reports that all have new moorings and should be considered reasonably reliable. They are lifted about every 4 months, one at a time, so the official numbers as changes to BA. 372 do not always correspond to the actual number.

Anchorage: For large vessels about 1.0 – 1.5 miles East of Fairway Buoy and for small vessels to East of No. 2 Buoy. Good holding ground.

Wind: The prevailing wind is from the East and is strongest during Winter months. Due to the harbour being open to the East a swell carries into the harbour making berthing and working of small vessels impossible at times.

V.H.F.: Call 'Gabes Port' on Channel 16, range limited (12 miles). English reasonable.

Berthing: No berthing if wind over Force 4 to 5 and no unberthing over Force 3 to 4. Largest ship to use port 'Galconda' (LPG) gross 34,893 tonnes and deepest draft ship 'Hampshire' (LPG) gross 32,060 tonnes draft 11.2 m.

Channel: Minimum depth Chart Datum found to be 11.0 m. (36 ft.) plus 0.8 m. MHWN and 2.2 m. MHWS.

Liable to silting. Official depth is 41 ft. (12.5 m.) but last dredged 1974.

Pilot reports little current in channel, but reports suggest cross current can be encountered particularly near breakwaters. Channel dredged in box shape.

Pilot: Two Pilots employed by National Port Authority. Only senior Pilot handles large vessels. Good English spoken.

No berthing/unberthing of large vessels at night. Sunrise to Sunset only. Boards from black hulled 10 m. launch with white upperworks. Pilot ladder about 1 m. above water. Prefers gangway if weather suitable. Boards outside Fairway Buoy.

Tugs: Only one Port Authority tug of 1,200 h.p. with suspect towing hook. In November 1980 this tug was under repair and a Greek Construction Co. tug was being hired for port use as necessary. This tug (800 h.p.) would not work on a Sunday. When berthing, tug pushes; when unberthing, tug takes ship's line from starboard quarter. Pilot reports second tug in design stage.

Berthing/Moorings: All berths port side to.

Fertiliser/Ammonia/Phosphoric Acid Berth – Berth head in.

Sulphur and Grain berths – berth head North.

Vessels on all berths moored close together. Three large and 1 small vessel can moor on Sulphur/Grain berths.

Good back springs essential at all berths.

Moorings: 3, 2, 2. Forward head lines go to quay ahead of Ammonia Berth, mooring boat used. On Ammonia Berth our bow was about 3 m. off stern of vessel immediately ahead and at right angles to us.

Berths: Ammonia Berth of concrete trestle construction with bollards and fenders on concrete projections proud of quay face. All other berths solid concrete construction.

Ammonia Berth about 250 m. in length and 13.2 m. C.D. minimum. Other berths reported to be 10.5 m. alongside.

Density: 1029. (3 visits) May, July and November. Good fendering on all berths.

Cargo: Anhydrous Ammonia: Intake for fertiliser plant about 10,000 tonnes per month.

Loading/Discharge: Discharge rate varies but maximum claimed to be 350 t.p.h., in practice this has been 220, 177 and 233 t.p.h. over three visits with back pressure of 8.5 to 9.5 bars. No vapour return line. 2×4 in. flexible pipes join onto common manifold union with 8 in. coupling of odd size. The plant has a spool piece to fit standard 150 ASA connection on ships. Shore labour assists with connection.

For large LPG/NH_3 carriers it is necessary to berth as far up quay face as it is safe to do so in order to be able to connect pipes. On this vessel the after end of gangway must be past travelling shiploader stowage position on quay. Generally 2 ship pumps are required. Shore tank capacity 9,800 tonnes.

Same berth is used for loading Ammonia Phosphate for export at about 30,000 tonnes per year and Phosphoric acid in liquid form at 60,000 tonnes per year.

Travelling shiploader for Ammonia Phosphate loads at 800 t.p.h.

The Sulphur Berths nearest to Ammonia Berth have 2 discharge cranes/gantry. The Grain Berth at the Northern end is worked by ship's gear. Both these are import berths. Sulphur berth direct into fertiliser plant. It is planned to export Nitric acid in the near future.

Gangway: Can be turned out on all berths prior to berthing even though it seems vessel cannot due to shiploaders.

Communications: At Ammonia Berth after connection there is little English spoken by personnel ashore. Two watchmen always onboard.

N.O.R.: Tender on arrival to SAEP GABES, accepted alongside berth.

Surveyor: SGS/Redwood in attendance. Does not always appear on arrival.

General: Fresh water available from quay, but salty. If fuel required go to Sfax. Personnel reliefs quite easy through Djerba. Direct flights to Frankfurt 3 times per week. Baggage may go missing. Road and rail communication with Tunis, Sousse and Djerba. STD International telephones. Holiday resort at Djerba.

Authorities: Immigration board first to check International Health Declaration and Vaccination List. If all in order 'Q' flag is pulled down – Quarantine Pratique granted and Customs and Agent can board. Port Health/Immigration: require all Cholera Certificates up to date, if not Port Health will carry out inoculation on board the ship.

Customs currency control is rigid – all currencies must be declared and all Tunisian currency drawn and not used handed back on departure. Bars are particularly subject to inspection. Customs also very carefully check Bars stocks, if any discrepancies a fine is levied.

Customs conduct cabin searches for undeclared articles. Master's safe is checked together with dangerous drugs which must be properly declared, every single item and amount of each. Personnel going ashore take their Discharge Books to main gate where a shore pass is issued and Discharge Book collected on return.

Papers required:

- 3 Copies Personal Effects Declaration (Make sure Jewellery is declared).
- 3 copies Personal Currency Lists.
- 2 Stores Lists.
- 2 Drugs Lists.
- 2 Bond Lists.
- 2 Vaccination Lists.
- 6 Cargo Declaration Lists.

Chandler: Fresh provisions available and seem good and prices reasonable. Cable ahead for chandler as normally does not work at weekends.

Agent: Societe Tunisiene de Transit d'Agencies et de Transports. Cables: STTAT GABES.

Have office just outside main gate. Good English and generally helpful and obliging. Crew transfers conducted without difficulty. Can telephone STD from office.

Developments: On North side of Harbour general cargo berths are being constructed. The retaining breakwater has been completed and the berth concrete caissons are being placed in position.

SHIPMASTER'S REPORT: February 1985.
Vessel discharged anhydrous ammonia.

Bow-thruster: It is advisable to inform the Agent well in advance whether vessel is equipped with a bow-thruster or not. When negative, a second tug is required for large vessels, as only 1 tug, small and low powered, is available at Ghannouche. The second tug has to be ordered from

Sfax (distance approx. 60 miles). This might cause delay in berthing if Port Control is not aware that the vessel does not have a bow-thruster. *Hoses:* The shore connection now consists of a 10 in. 150 ASA hose. Due to the height of our manifold above the water (41 ft.) at 24 ft. draft, extra lengths of hose had to be provided by shore.

Maximum allowable pressure for hoses: 8 bars.
Discharge: Maximum shore receiving capacity approx. 600 tonnes/hr. Receivers urgently requested us not to go beyond the 8 bars back pressure.

We discharged approx. 550 tonnes/h. at 7.5 bars back pressure, however, a few hours after commencement of the discharge, the plant requested us to reduce the rate to 400 tonnes/h. as they experienced problems with their compressors.

AUTHORITY: Direction du Port de Gabes, Office des Ports Nationaux, Batiment Administratif, C.P. 2060, Port de la Goulette, Tunisia. *Tel:* 275300 (6 lines). *Telex:* 12-386 Oporna-Tunis. *Cables:* Ofpornatu. *Contact:* B. Karra, Harbour Manager, P.O.Box 65, Gabes, Tunisia. Tel: (5) 22.9.22.

LA GOULETTE (Including Tunis): 36.49 N. 10.18 E.

(See Plan)

DOCUMENTS:
Required by Police:
2 Crew Lists.
2 Passenger Lists.
Required by Customs:
1 Crew List.
2 Passenger Lists.
2 Crew Manifests.
Required by Port Health:
1 Crew List.
1 Passenger List.
PILOTAGE: To call Pilot contact Goulette Radio station, call sign 3VW, 24 hour watch on 2182 kHz or VHF Channel 16. Pilot boats are in permanent direct contact with Goulette Radio. International code visual and sound pilot signals may be used on arrival at the Sea Buoy.

Pilot launches are stationed inside the port, and proceed on call to meet vessels about 0.25 miles beyond the sea buoy, i.e. the Buoy No. 1 in the entrance channel to the port.
ANCHORAGE: Anchorages in the port roads are safe except during strong winds and heavy seas from the North or N.E.; good holding ground.

Larger vessels anchor about 0.5 miles N.E. of the sea buoy in depths of 12 m. – 14 m. Small vessels may anchor either North or South of the approach channel in depths of 7 m. – 9 m. in the vicinity of Buoys No. 4 and 5 provided that they do not obstruct navigation in the entrance channel.
RESTRICTIONS: Tankers and ore carriers are not allowed to enter and leave port during the hours of darkness. Depth of water at LW is 32 ft.
MAX. SIZE: *La Goulette:* Up to max. draft 32 ft. Max. length 185 m. *Tunis:* Up to max. draft 20 ft. 6 in.
HEALTH: Master is required to complete Declaration of Health on arrival. Vessels which have previously called at another Tunisian port are given automatic Free Pratique except in time of epidemic.
RADIO: Tunis Radio 24 hour watch on 2182 kHz; radio-telephone from 0600 to 2200 hrs. on 500 kHz. Goulette Radio call sign 3VW. 24 hour watch on 2182 kHz and VHF Channel 16.
TUGS: Available to assist berthing as directed by the Pilot. Tugs join vessels in the vicinity of Buoys No. 4 and 6, that is 400 or 500 m. from the berths. Vessel's lines always used. Vessels over 1,500 g.r.t. not equipped with bow-thrusters must use 2 tugs.
BERTHING: *La Goulette:* one ore berth, unloading rate 2,000 t.p.h.
Also see "Shipmaster's Report" and "Developments".
STEVEDORES: Gangs are ordered before 0600 hrs. for morning work; before 1300 hrs. for the afternoon and before 2000 hrs. for night work.
MEDICAL: Preferable to advise Agent in advance if doctor required on board. Crew members should possess international vaccination certificates.
TANKERS: One berth is reserved for tankers with a max. draft of 27 ft. 6 in.
FRESH WATER: Hydrants are situated on the quays supplying fresh water at a rate of 12 – 15 cu.m.p.h. A water barge "El Ain" of 50 tons capacity can supply vessels berthing in "Basin Sud".
FIRE PRECAUTIONS: A watchman has to be permanently employed on board tankers when alongside. A tug equipped with fire-fighting equipment is required to stand by tankers discharging.
CONSULS: Following countries are represented in Tunisia:
Algeria
Australia
Denmark
France
Great Britain
Greece
Italy
Morocco
Norway
Panama
U.S.A.
Venezuela
REPAIRS: Machinery and boiler repairs can be effected on board. For large repairs it is necessary to send part to the shipyards of Soconema at Menzel Bourguiba 70 miles away.
DRY DOCKS: At Menzel Bourguiba 4 dry docks, the largest of which is 253 m. long, 41 m. wide, 10.5 m. depth.
GANGWAY/DECK WATCHMEN: The employment of gangway watchmen is necessary.
OPENING/CLOSING HATCHES: Performed by ship's crew or by stevedores on payment of special premium.
CUSTOMS ALLOWANCES: Each crewman is allowed 2 packets of cigarettes or 4 cigars or 50 gm. of tobacco and 1 opened bottle of alcohol.
REPATRIATION: Can be arranged.
AIRPORT: Situated 10 km. from the port. Regular daily flights to Europe and North Africa.
TIME: GMT plus 1 hour throughout the year.
HOLIDAYS: 20th March (Independence Day); 1st May (Labour Da 25th July (Republic Day); 15th October (Evacuation Day). In additio there are 13 other holidays on which work is carried out on payment overtime.
POLICE/FIRE/AMBULANCE: Police, Tel: 197. Fire, Tel: 19 Ambulance (express), Tel: 141313. Ambulance (S.O.S.) 341269.
TELEPHONES: Telephones can be connected on board vessels an are compulsory for tankers.
SHORE LEAVE: Crew members are permitted to go ashore aft obtaining a pass from the Port Police.
DEVELOPMENTS: *Port de Rades:* A new commercial port with 7 berth and industrial complex, incorporating container and Ro/Ro facilities Ro/Ro berths in operation), grain silo (discharge rate 1,200 t.p.d.) quay jetties, transit sheds and back-up services, has been built on reclaime land, covering approximately 100 ha., immediately inside the Lake Tunis. Max. draft permissible 9.5 m.

SHIPMASTER'S REPORT: January 1982.
Documents: It is essential to ensure that all arms and ammunition a declared at first port of entry in Tunisia and that the proper authority ha them sealed inside the bond during the entire stay in Tunisia.

When coming from another Tunisian port all cash (Dinars) remainin from sums drawn in the previous port must be declared.
Pilotage: The VHF is the only viable communication for the pilot servic the Sea Buoy being too far for either visual or sound signals.

When required to enter, the vessel will be told to proceed inwar down the approach channel which has been dredged to 12.25 m. fro Sea Buoy to the moles. This was completed on 20th December, 19 as the first part of the work for the new port being constructed on th Southern side of the canal to Tunis and some 3 kilometres inside th present port of La Goulette.
Berths: The elevator/silo berth in Basin Sud has a depth of water of ov 10 m. throughout its whole length and extending some 80 m. to th seaward end as the actual wharf is short (about 135 m.) and vesse have to warp along the face to ensure all hatches are service Discharge rate 1,200 tons per day.

There is *no water* at this berth either drinking or boiler nor can it b taken at the adjacent tanker berth or the iron ore pier.
Developments: The port appears to be concentrating on the Ro/R berths and the new passenger terminal to the exclusion of the mo mundane cargoes. The traffic is such that there is reluctance to allow vessel from the silo that is short of water to take up a berth on th Northern quay. The harbour area is to be dredged in stages so as t give access, eventually, to the new port under active construction.
Telephones: There are no telephones available at the silo berth unle access can be had to the one in the office, while the Oil Berth unit only available if there is a tanker in the berth.

AUTHORITY: Office des Ports Nationaux, Batiment Adminstratif, Po de la Goulette, C.P. 2060, La Goulette, Tunisia. *Tel:* 73030 *Telex:* 15386 Oporna. *Cables:* Of. Pornatu.

LA SKHIRRA (Terminal Platform): 34.18 N. 10.09 E.

(See Pla

DOCUMENTS:
5 Crew Lists.
2 Lists of Crew Personal Effects.
2 Stores Lists.
5 Passenger Lists, if passengers carried.
Manifest of cargo on board.
Manifest of cargo in transit.
PILOTAGE: Compulsory for berthing alongside. Pilot employed b TRAPSA. ETA required 48 hours and 24 hours before arrival. Call Pi by international code signals on arrival, or by VHF Channel 16. TRAPS will advise if vessel required to anchor, or berth immediately. Pilot boar 2 miles off the terminal by black and white motor launch. If it is necess (vessel without chart) Pilot will proceed outside the port limits.
ANCHORAGE: Vessels should anchor outside the prohibited zon which is limited to the South by the parallel of Buoy No. 5 and to th East by bearing 350° from the terminal platform light.
MAX. SIZE: Length 300 m. Draft 47 ft. 6 in. or up to 50 ft. at high wa
HEALTH: International Quarantine signals to be shown on arriv Vessels normally receive Free Pratique at the quay after berthi Suspect vessels must wait at anchor until Pratique is given.
RADIO: TRAPSA operate coastal station La Skhirra Radio (3V vessels to make contact 48 hours before arrival. Messages for TRAPS passed by other stations should be addressed "Rapetrol Laskhirra".
VHF: The harbour office and loading terminal are equipped with V on the following channels: 156.8 MHz (calling), 156.6 MHz, 156.7 M 156.55 MHz Contact with tugs can be made on all 4 channels.
TUGS: 2×3,000 h.p. (32 tons bollard pull) and 2×1,500 h.p. 3 tu required if over 70,000 d.w.t. Lines provided by tugs.
BERTHING: Two loading berths situated one each side of term platform connected by a gangway from the shore. For safe manoeuv tankers are recommended to arrive with ballast up to 30% of Sum deadweight. Mooring may need to be doubled during months December to April, when sudden violent squalls sometimes occ A vessel alongside requiring tug assistance may sound one long bl at frequent short intervals.

Depth alongside loading berths is 15 m. – 16 m. Loading platfo served by 3×30 in. oil pipelines and 1×24 in. and 1×18 in. ballast li Each berth equipped with 4×12 in. flexible hoses. Max. loading 12,000 cu.m./hr.

Paktank: A new tank installation of Paktank Mediterranee S.A. has been constructed for storing fuel oil, gas oil, naphtha and kerosene. 2×12 in. flexible hoses will give a loading/discharging rate of up to about 3,000 t.p.h. Bunker facilities can be expected in the near future.

Phosphoric Acid: New berth for carriers up to 15,000 d.w.t. and max. draft 9.0 m. at H.W. Fresh water available.

MEDICAL: Advance notice required of any medical assistance needed. Hospital facilities available. Crew members require valid vaccination certificates.

BALLAST: All ballast, except permanent, to be pumped to shore installation. Heavy fines for water pollution. Max. rate 6,000 cu.m./hr.

FRESH WATER: Available from shore connection.

FUEL: Not available. See "Berthing – Paktank".

CONSULS: Following countries are represented at Sfax: France, Sweden, Great Britain, Netherlands and Italy.

REPAIRS: There are no facilities for repairs. Nearest at Sfax.

CUSTOMS ALLOWANCES: 2 packets cigarettes allowed each Crew member.

REPATRIATION: Can be arranged.

AIRPORT: Airport at Tunis 350 km. away, or Sfax 80 km. away.

TIME: GMT plus 1 hour throughout the year.

SHORE LEAVE: Not allowed in Trapsa installation. Can be arranged through Agent.

GARBAGE DISPOSAL: Drums will be provided on board.

WASTE OIL DISPOSAL: Dirty ballast pumped ashore.

SEAMAN'S CLUBS: None.

AUTHORITY: Compagnie des Transports par Pipe-line au Sahara (T.R.A.P.S.A.), 3050 La Skhirra, Tunisia. *Tel:* 04-95453, 04-95082. *Telex:* 40811 TN. *Cables:* Rapetrol, La Skhirra. *FAX:* 04-95426. *Contact:* Mr. Maaloul, Port Director.

SFAX: 34.44 N. 10.46 E.

DOCUMENTS: On arrival Masters must submit a written declaration giving the name of ship and of the Master, Owner or Charterer, vessel's tonnage, draft, cargo, port of origin and destination, number of crew on board. Also required:

Customs Manifest.
Crew List for Police.
List of Dangerous Cargo.
Health Declaration.

PILOTAGE: Compulsory for all vessels over 100 gross tons. Pilotage commences at the outer buoys of the entrance channel. Day signals for Pilot, International Code Signal "P.T" or Code flag "S" hoisted alone or below code pennant. Night signals according to International rules. For entry at night, vessels must radio Harbour Master at the latest 1 hour before sunset to confirm their intention. Before boarding, Pilot will check that vessel does not exceed the max. authorised draft. If the "Entry Prohibited" signal is not hoisted at the port signal mast, vessel may await Pilot in the channel axis about 1 mile off the outer buoys. Pilot boards from a launch 11 m. long, displaying international pilot signals. Pilot may be contacted by radio through Radio Port de Sfax. Agent must give advance notice of vessels arrival to Harbour Master 24 hours 48 hours beforehand.

ANCHORAGE: In immediate vicinity of the port, depths up to 15 m., good holding ground.

MAX. SIZE: Length 185 m. and draft 32 ft. – 33 ft. at Petrol Pier and Sulphur Pier and 200 m. at all other berths.

HEALTH: To request Free Pratique, hoist "Q" flag on arrival, or radio to Port Health Service. Pratique normally given at the berth after mooring. Suspect vessels are required to wait at anchor until Pratique is given.

RADIO: Sfax. Port Call – call sign 3VW2, operating 24 hours on 2182 kHz and Channel 16 VHF.

Calling frequency 2182 kHz, working frequency 1743 kHz CR3. Used only for communications with port services. Meteorological information provided on request.

TUGS: Join vessel at outer buoys or according to circumstances in the outer port.

BERTHING: N.E. Quay 820 m. long, phosphate berth.

West Quay 150 m. long, phosphate berth.
Petrol Pier 105 m. long. Max. size: length 185 m., draft 33 ft.
Salicole Pier, salt loading berth.
Sulphur Quay 370 m. long, draft 32 ft.
Also see "Developments".

STEVEDORES: Available, arranged by Agent basis vessel's ETA.

MEDICAL: Advance notice preferred if medical attention required. Hospital facilities available. Vaccination certificates required for all crew.

DENSITY: 1028.

FRESH WATER: Hydrants fitted on all quays. Written request for replenishing water is required by Harbour Master.

FUEL: Available by barge.

CONSULS: Local representatives for Belgium, Denmark, France, Greece, Italy, Netherlands, Norway, Portugal, Spain, Sweden and U.K.

REPAIRS: Small engine repairs can be effected. Floating dock for vessels less than 350 tons.

GANGWAY/DECK WATCHMEN: Normally ship's crew. Available from shore if required.

OPENING/CLOSING HATCHES: Normally performed by crew.

REPATRIATION: Can be arranged.

AIRPORT: 7 km. from the city. Regular services to Tunis, Paris and La Valette.

TIME: GMT plus 1 hour throughout the year.

HOLIDAYS: 1st January; Aid El Kebir; Hegirian New Year; 20th and 21st March; 9th April; 1st May; Mouled; 25th July; 13th August; 15th October; Aid Es Seghir; Aid El Kebir.

POLICE: Tel. 21-700.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Required by all crew.

DEVELOPMENTS: Entrance channel to be widened to 60 m. Dredging to 12.50 m. of channel and principal quays. These projects are under study.

Since April 1985 the port has been equipped with 3 new berths totalling 517 m. in length, depth 33 ft., max. LOA 200 m., max. draft 33 ft. Included is a Ro/Ro berth with length 135 m., depth 33 ft.

SHIPMASTER'S REPORT: 1976 (Updated 1988).

Documents:

1 General Declaration.
2 Stores Lists.
3 Crew Lists.
1 List of Dangerous Cargo.
1 Health Declaration.

Pilotage: To be contacted on VHF Channel 16 throughout 24 hours. Also Harbour Master may be contacted at the same hours on Channel 16. At other times the same Authorities may be contacted by radio 2182 kHz.

My vessel had a draft of 26 ft. By the VHF the Harbour Master ordered me to enter the channel and continue up to the Outer Basin where a Pilot would embark on the Port side.

It was later confirmed both by the Pilot and Agent to be usual for ships up to 10,000 tons to enter the Outer Basin without Pilot. Also upon our departure, the Pilot disembarked at the Outer Harbour Basin (Authority state that this is rare and only if vessel visits port regularly).

The Agent told me the channel was 34 ft. deep, although no measurements have been taken for 10 years. Lately a ship with draft of 33 ft. has passed through the channel without any difficulties.

An unmarked wreck is situated in position Lat. 34° 37.5′ N., Long. 10° 49.5′ E. The best way to approach the outer channel from S.W. or South, would therefore be to navigate to a position 6.5 miles S.E. of Tina's Lt. Tr., then change course for the outer buoys of channel.

The only beacons illuminated around Kerkenah Banks were Beacon No. "1" and No. "8". All other buoys were in correct position, but sometimes extinguished.

Stevedores: Work in shifts from 0700 hrs. till 1300 hrs. and from 1400 hrs. till 2000 hrs. In case of sailing it is possible to arrange overtime up to 2100 hrs. It is also possible to have night gangs from 2100 hrs. till 0300 hrs.

AUTHORITY: Office des Ports Nationaux Tunisiens, Directions du Port de Sfax, Rue Okbaa Ibn Nafaa, 3029 Sfax, Tunisia. *Tel:* (04) 25.644, 25.040 and 25.070. *Telex:* 40847 Porsfa. *Contact:* Mohamed El Mouldi, Port Director. Captain Mokhtar Hedider, Port Captain.

SOUSSE (Soussa): 35.50 N. 10.38 E.

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
4 Crew Personal Effects Lists.
Health Declaration.
Manifest of Provisions on Board.
2 copies Vessel's Particulars Declaration.

PILOTAGE: Contact pilot station on VHF Channel 16 or Tel. 03.24.401 and 03.25.755.

RESTRICTIONS: Entrance to the port coming from the sea is East to West. Channel 820 m. long, dredged to 10.5 m. Depth in port area 8.70 m., height of tide 0.50 m.

MAX. SIZE: Max. LOA. 170 m.

HEALTH: Free Pratique normally given at the quays after mooring. Pratique is automatic for vessels coming from another Tunisian port. In case of suspected disease on board vessel will be ordered to quarantine anchorage.

RADIO: Sousse Control "3VW4" on 2182 kHz and VHF Channel 16.

TUGS: One tug of 1,760 h.p.

BERTHING: One basin for ocean-going ships, yacht basin and fishing vessel harbour.

Length of quays 830 m., 8 berths.
South Basin Quay, length 140 m., dredged to 8.7 m.

CRANES: 1×18 tons and 2×10 tons.

STEVEDORES: Minimum of 24 hours' advance notice of ETA to Agent is required.

MEDICAL: Doctor available to board vessel. Hospital, private clinics and all facilities available.

REPAIRS: No facilities.

GANGWAY/DECK WATCHMEN: It is recommended to employ shore watchmen.

OPENING/CLOSING HATCHES: Carried out by stevedores at the request of Masters.

CUSTOMS ALLOWANCES: Each crew member is allowed 1 carton of cigarettes and 1 opened bottle of wine or spirits. In case of a prolonged stay in port, Customs may renew these quantities.

AIRPORT: Skanes Monastir – 13 km. from the port.

TIME: GMT plus 1 hour throughout the year.

HOLIDAYS: There are 13 days official holiday during the year. Work can be carried out on all holidays except 1st May on payment of 100% overtime.

IDENTIFICATION CARDS: Crew member's Identification Cards will be collected by the Immigration service and exchanged for shore passes while vessel is in port.

AUTHORITY: Office des Ports Nationaux Tunisiens, Rue Abdallah Ibn Zoubair, Sousse 4000, Tunisia. *Tel:* 03.225.755 or 03.24.401. *Telex:* 30960. *FAX:* 03.224923. *Contact:* Kamel Ghenim, Port Director. B. Kalia Mohamed, Harbour Master.

TAZERKA: 36.36 N. 11.41 E. (See Plan)

PORT LIMITS: 5 nautical miles radius from Tazerka FPSU.

DOCUMENTS:

4 Crew Lists.
1 Health Declaration.

APPROACHES: There are clear navigation approaches to and from the Tazerka FPSU. From time to time, special work barges and rigs will operate in the vicinity of the Tazerka FPSU. Information on such rigs will be broadcast through Normal Navigation Warnings and also by Tazerka Operations when visiting tankers first make communications contact.

PILOTAGE: A Berthing Master will board the visiting tanker at a location 2 nautical miles downwind of the Tazerka FPSU. He will remain on board the visiting tanker until after departure and will disembark when the visiting tanker is clear of Tazerka FPSU.

The Berthing Pilot/Loading Master will be familiar with pilot/berthing/unberthing vessels at Tazerka and will advise the Master of the visiting tanker accordingly. Throughout the operation, he will be the liaison between the Master of the visiting tanker and the Tazerka SIS (Senior Installation Supervisor). He will advise the Master of the visiting tanker on documentation procedures and carry out any assistance.

ANCHORAGES: None.

RESTRICTIONS: Daylight mooring only.

Weather operating limits will be decided at the time of operations, but are approximately as follows:

(a) Maximum mean hourly wind speed = 20 knots.
(b) Maximum significant wave height = 2.5 m.
(c) Minimum visibility for berthing = 0.5 nautical miles.

MAX. SIZE: Minimum LOA 170 m. Maximum LOA 275 m. Under special circumstances LOA may be extended to 297 m.

No limit on beam and draft.

Minimum deadweight 20,000 tonnes (approx.). Maximum deadweight 140,000 tonnes (approx.).

Maximum displacement during berthing 150,000 tonnes.

RADIO: Vessels to send an initial ETA message to Agent via Tunis Radio on departure from the previous port and updated 72 hours, 48 hours and 24 hours prior to arrival at Tazerka. Thereafter changes greater than 3 hours should be reported. Where a ship departs from a port which is less than 72/48/24 hours' steaming distance away she shall advise her ETA as soon as possible.

ETA messages should include the following information:

(a) Location of cargo manifold in relation to the length overall of ship.
(b) Type of moorings (synthetic rope, wire, wire with synthetic tails, etc.)

VHF: Tazerka Floating Production Storage Unit is equipped with VHF Channels 16/6. Notice of Readiness may be issued when vessels are within 5 nautical miles radius of the Tazerka FPSU.

TUGS: One supply boat available to assist with mooring/unmooring.

BERTHING:

Tanker's Draft: The tanker must be on a suitable draft and trim for the approach run. No hard and fast rules will be applied but Masters of visiting tankers must bear in mind the need for accurate steering with a minimum of speed coupled with good stern power ability.

As a guideline a suitable draft is provided by applying the following criteria:

(i) Moulded draft amidships (dm) in metres to be not less than: $dm = 2.0 + 0.02L$
(ii) Trim by the stern not greater than 0.015L;
(iii) In any case draft at the after perpendicular not less than that which is necessary to obtain full immersion of the propeller(s).

This is in accordance with the requirements of the "International Conference on Marine Pollution, 1973" Regulation 13. In practice it has been found that ballast required to achieve these criteria typically approximates to 25% of Summer Deadweight.

Vessels berth port side to the starboard side of a Floating Production Storage Unit (a converted VLCC) which is moored to a SPM consisting of a yoke and rigid single anchor leg system. The FPSU is free to rotate through 360°. Vessels will berth against up to 5 inflatable Low Pressure Floating Fenders.

Wire moorings must have synthetic rope tails with a breaking strain at least 5% greater than the minimum breaking load of the wires to which they are attached.

Two long rope messengers to be ready forward and aft. Both anchors home and secured. (If reducers and/or tails are not available on board, advise Tazerka FPSU with initial ETA. Prepare to lift this equipment on board from the pilot boat).

Immobilisation of engines not permitted under any circumstances.

HOSE CONNECTION: Port side midships – 2×12 in. 150 ASA hoses. Port side derricks should be rigged for minimum 5 tonnes SWL.

Cargo manifolds must comply with OCIMF Standards for Tanker Manifolds, 1981 Edition.

LOADING/DISCHARGING: Typical VLCC pipeline system with spec manifold located 225 m. from stem on the starboard side.

2×12 in. hoses for Crude Oil discharge. Maximum loading rate 7,000 cu.m.p.h.

1×8 in. hose for Fuel Oil receiving. Maximum receiving rate 1,000 tonnes/hr.

1×3 in. hose for Diesel Oil receiving. Maximum receiving rate 50 tonnes/hr.

Concurrent receipt of fuel oil and diesel oil with crude oil discharge required.

BALLAST: No dirty ballast facilities. It is a condition of loading th vessel's ballast is clean and suitable for discharge to sea as defined MARPOL 1973, Regulation 13. All other ballast shall be retained o board.

MEDICAL: Emergency cases can be treated.

DENSITY: 1025.

FRESH WATER: Not available.

REPAIRS: Not available.

REPATRIATION: Not possible.

TIME: GMT plus 1 hour throughout the year.

REGULATIONS: Access to FPSU not permitted.

The Authorities of all Arabic Ports subscribe to the Israeli boycott a administer checks on ships. Apart from the usual checks on Log Book etc., store rooms, can be inspected for evidence of Israeli produce found, ships can be fined and/or blacklisted from all countr subscribing to the boycott.

It is recommended that stores be checked to ensure that there a no items which can be interpreted as being of Israeli origin. This includ items which bear trade marks incorporating Hebraic symbols such a the six point star, irrespective of the country of origin.

AUTHORITY: Shell Tunirex, B.P. 349, Tunis, Tunisia. *Tel:* 341.50 341.510, 341.514, 247.411. *Telex:* TREX 13831 TN, TREX 14393 T

ZARZIS: 33.30 N. 11.07 E. (See Pla

APPROACHES: The Approach Channel to the port is 8 miles lo 130 m. wide and is dredged to a depth of 13.0 m. From seaward t channel runs W.S.W. then W.N.W.

Manoeuvring Basin: The basin is marked by channel buoys No. 8 10 and 11 and has a diameter of 450 m. The depth is 12.0 m.

Navigation Aids:

Lighthouse: Lat. 33° 28′ 41″ N., Long. 11° 07′ 50″ E. The lighthou is a masonary structure with red and white horizontal bands. Heig 9.4 m. Light: 3 white ev. 15 secs., range 10 miles.

Fairway Buoy: Lat. 33° 29′ 43″ N., Long. 11° 17′ 44″ E. Colour: R and white vertical stripes. Top Mark: Red sphere. Light: Fl.W.Ev.4 se Buoy has a Radar Reflector (this buoy was missing in August 1991)

Channel Buoys:

No. 1: Lat. 33° 29′ 03″ N., Long. 11° 13′ 19″ E.
No. 2: Lat. 33° 28′ 39″ N., Long. 11° 11′ 22″ E.
No. 3: Lat. 33° 28′ 44″ N., Long. 11° 11′ 21″ E.
No. 4: Lat. 33° 28′ 26″ N., Long. 11° 10′ 04″ E.
No. 5: Lat. 33° 28′ 31″ N., Long. 11° 10′ 02″ E.
No. 6: Lat. 33° 28′ 13″ N., Long. 11° 08′ 44″ E.
No. 7: Lat. 33° 28′ 20″ N., Long. 11° 08′ 45″ E.
No. 8: Lat. 33° 28′ 35″ N., Long. 11° 07′ 29″ E.
No. 9: Lat. 33° 28′ 39″ N., Long. 11° 07′ 33″ E.
No.10: Lat. 33° 28′ 40″ N., Long. 11° 07′ 14″ E.
No.11: Lat. 33° 28′ 49″ N., Long. 11° 07′ 23″ E.

The port hand buoys (even numbers) are painted red and have cylindrical topmarks. Lights are Fl. R. ev. 4 sec., range 6 miles.

The starboard hand buoys (odd numbers) are painted green and ha green conical topmarks. Lights are Fl. 2 green ev. 6 sec., range 6 mi

PILOTAGE: Compulsory.

ANCHORAGE: The anchorage is one mile East of the Fairway Bu (See "Approaches"). The bottom is mud and sand and the hold ground is good.

MAX. SIZE: The maximum permissible draft in the initial stages wil 10.5 m. and max. LOA 185 m.

TUGS: Compulsory for tankers.

BERTHING: The Petroleum Quay is 640 m. long and has a dep 12.0 m. The quay is 2.5 m. above chart datum. Rise of tide at Spri is 1.0 m.

There is a bank to the N.E. of quay marked by yellow and black bu The distance between quay and bank at the N.W. end is 150 m. an the S.E. end 240 m.

TANKERS: The facility has been built for the handling of "Ezzao Crude. The typical cargo size is 20,000 tonnes – 25,000 tonnes, du the LOA and draft restrictions.

IGS, COW and coils are required.

Permanent or segregated ballast vessels only are allowed.

AUTHORITY: Office des Ports Nationaux, Port de la Goulette, P.O 2060, La Goulette, Tunisia. *Tel:* 730.300. *Telex:* 15.386 Opo *FAX:* 730.812. *Contact:* M.Klaa, Chairman.

Turkey

GENERAL: (See Plan)

NOTE: Please read the latest "Shipmaster's Reports" and "Reports" in this section first. Older "Reports" have been retained for general information only.

On arrival off Canakkale coming from the Aegean, or off Buyukdere coming from the Black Sea, ships must stop for sanitary inspection. However, tankers with a d.w.t. over 100,000 tons proceeding to the Gulf of Izmit to discharge or load petroleum products may obtain Pratique there without stopping at Canakkale, provided Agents are notified 96 hours in advance.

In the event of bad weather at Canakkale, vessels may be allowed to continue their voyage to Istanbul and undergo the sanitary inspection there. Permission to do so is notified to vessels by the Canakkale Sanitary Office with the signal "H.M." in daytime and three vertical lights (green, white, green) at night.

Pilotage through the Dardanelles and the Bosphorus is compulsory. Pilot stations, equipped with VHF operating on Channel 16, are located at Canakkale, Istanbul and Telli Tabia (Upper Bosphorus).

Turkish Flag: All foreign ships are required to fly Turkish flag during their stay in Turkish ports or when passing through the Straits (Dardanelles and Bosphorus).

Sanitary and Port Inspections: On arrival at a Turkish port, every ship is boarded by a Sanitary Officer for examination. Nobody may join or leave the ship before this inspection is completed.

The ship must produce the following documents:

Sanitary Declaration Form.
Derat Certificate.
Ship's Register.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment Certificate.
Cargo Ship Safety Construction Certificate.

Police Customs Controls: After obtaining Free Sanitary Pratique, the ship must likewise produce:

(1) 3 Crew Lists together with every member's Passport, Discharge Book or Z-card.
(2) 1 List of Provisions, Stores and Bunkers.
(3) 1 Declaration of all Monies or cheques carried in the ship's safe.
(4) Manifests of all cargo on board, whether for discharge at Turkish or foreign ports.
(5) 1 List of Passengers Landing in Istanbul showing nationality, number, date and source of entrance visa (if such visa is required) together with the Passports.
(6) 1 List of Transit Passengers together with the Passports.

Documents covered by items 1, 2, 3, 4 and 6 as well as a List of Passengers Embarking at Istanbul are also required on departure.

Police and Customs Controls are effected at Istanbul when arriving from the Aegean and at Buyukdere when arriving from the Black Sea. However, vessels under 500 n.r.t. have to undergo control formalities at Canakkale, both inwards and outwards, apart from those to be effected at Istanbul. It is recommended to prepare the accommodation ladder to facilitate the boarding of officials.

Excepting the case of tourist vessels, the Customs Officers will seal stocks of provisions and tobacco, spirits, as well as any other items in bond. Sufficient quantities of the foregoing will be left unsealed for the needs of the ship during the stay in port.

If stores left unsealed are exhausted while a ship is in port, a request to the Customs Officers will ensure further withdrawal.

The seals must not be broken before the ship's exit from territorial waters or if sailing from one Turkish port to another Turkish port.

Special Rules for the Passage of the Bosphorus: During their passage through the Bosphorus, ships must regulate their speed, without exceeding the 10 knot limit over the bottom, so that piers, landing stages, etc., or other craft (sailing and rowing boats, etc.) may not be damaged by their wash. Further, they must take care not to hinder fishing and diving operations or to damage submarine telephone, telegraph or electric cables.

Sound Signals, Wireless Sets: It is forbidden to make use of sirens or steam whistles in the harbour, except for manoeuvring purposes as laid down in the regulations for the avoidance of collisions.

Radio transmitters are not sealed on arrival of a vessel but it is recommended that their use in Turkish territorial waters be restricted to cases of emergency.

Refuse: No refuse such as garbage, ashes, polluted oil and the like can be thrown or pumped overboard, nor any scraping, cleaning of tanks and/or bilges can be effected inside port limits.

RESTRICTIONS:

The Bosphorus – Height of Power Transmission Line: A transmission line with a vertical clearance of 70 m. (B.A. Chart 3930, 229 ft.) has been installed alongside the power transmission line in position 41° 10.4′ N., 29° 04.7′ E. (approx.)

Masters of vessels with a similar masthead height intending to pass beneath this cable must contact the Harbour Authority for permission to pass.

BOSPHORUS BRIDGES:

(1) Bosphorus Bridge (First Bridge):
Height on both shore sides: 58.5 m.
Height in the middle: 64.0 m.
(2) Fatih Sultan Mehmet Bridge (Second/New Bridge):
Height on both shore sides: 58.5 m.
Height in the middle: 64.0 m.

The height represents the distance between sea level upto line beneath the bridges.

NOTICE:

New Traffic Regulations in Conformity with International Regulations for Preventing Collisions at Sea (IMO Colreg of 1972) are being established in the Strait of Istanbul.

A. It is decided that a new traffic regulation conforming to the international rules of navigation be established in the Strait of Istanbul. The new regulation which will be effective in the Strait of Istanbul as of 1st May 1982, 0900 hrs. GMT (1200 hrs. LMT) is as follows:

1. The existing left side navigation regulation in the Strait of Istanbul which is applicable between Kizkulesi-Ortakoy line in the South and Tarabyaburnu-Umuryeri feneri line in the North will be abolished on 1st May 1982, at 0900 hrs. GMT (1200 hrs. LMT) and then the new regulation in conformity with Rule 9 of International Regulations Preventing Collision at Sea of 1972 will come into force.

2. Ships in their transit from the Sea of Marmara to the Black Sea or from the Black Sea to the Sea of Marmara will, in accordance with Rule 9 of IMO Colreg 72, navigate throughout the Strait of Istanbul on the right side of the median line (traffic separation line) and under no circumstances will they pass to the left of the said line.

3. Ships during their transit in the Strait of Istanbul will not overtake other vessels unless they are forced to do so and will navigate inside the designated traffic lane.

B. Pilotage Services:

The pilotage stations are providing pilotage services on 24 hour basis for ships navigating in the Strait of Istanbul. The location of these stations are given in the international pilotage books and marked in the Strait of Istanbul chart (TR.2921).

C. Amendments to Charts:

"Caution I" on Chart TR.2921 will be cancelled with the coming into effect of the new traffic regulation.

D. Navigational Notices:

Explanatory information and navigational warnings regarding the new traffic regulation in the Strait of Istanbul are broadcast in English and Turkish by the following by Weekly Notices to Mariners and also will be mailed.

Istanbul	(TAH)	(Yesilkoy)	: 441 – 2670 kHz
Izmir	(TAN)		: 458 – 516 – 1850 kHz
Mersin	(TAM)		: 524 – 2820 kHz
Samsun	(TAF)		: 416 – 2760 kHz
Bandirma	(TAA4)	(Meteoroloji)	: 478 – 3636 – 6965 kHz

SHIPMASTER'S REPORT: November 1979.

Dardanelles and Bosphorus:

Vessel bound for Odessa with a full cargo of corn. According to Charterer's orders (Sovfracht Moscow), vessel was to encounter 4 to 5 weeks at anchor at Odessa Roads and for this reason had to take sufficient fresh water at Ahirkapi Roads on the West side of the Bosphorus.

The quantity (and quality) had to be ordered 3 days prior to arrival through Charterer's Agent (Bumeran) in Istanbul. 2 days' notice and 24 hour notice were required.

The vessel also wished to make crew changes at the same time as taking water and this was arranged by Husbandry Agent (Rammoc, Istanbul).

Vessel took a Pilot all through the Dardanelles and Bosphorus and he boarded at Mehmetoik (Mehmetcik) Point.

When passing Canakkale, vessel slowed down and an Officer had to go down into the Sanitary Inspector's motorboat.

In addition to the sanitary boat another motorboat arrived, bringing the sub-Agent of the vessel's Istanbul husbandry Agent. The sub-Agent passed a message for Master with the latest information for Ahirkapi Roads to the ship's Officer after vessel having received Free Pratique from the Sanitary Officer. This sub-Agent is acting for several Istanbul Agents, the address is as following:

Denizciler Shipping Agents, Isfendiyar Anafarta & Co., Carsi Cad. 10, Canakkale. P.O.B. 5, Canakkale. Cables: 'Denizciler'. Tel: 1032-1878 after hours – 1055. Telex: 58128 dzck tr.

The information from the sub-Agent also included the kind and number of forms and lists required at Istanbul.

Immediately upon letting go anchor in Ahirkapi Roads, the motor launch with the Turkish Authorities arrived, some minutes later the Agent's boat arrived with the new crew members and some spare parts.

The Authorities required the following forms and lists:

Certificate of Registry.
Tonnage Certificate.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Transit Cargo Manifest.
3 Currency Lists of vessel's safe.
2 Personnel Effects Lists (Not officially required, but taken because at hand).
3 Stores Lists/Provisions.
3 Crew Lists.

There was no report of inspection, etc., given to the vessel by the Authorities and *no* written outgoing clearance was issued. When asking for an outgoing clearance, the Officials stated it was *not* necessary in this case.

No special lists of crew changes were required.

The Pilot left at Ahirkapi Roads because the time for taking fresh water was expected to be 5 to 6 hours (60 m.t.p.h.)

One hour after arrival the waterboat arrived and the vessel took fresh water (drinkable quality) as per order.

Half an hour before finishing pumping, Istanbul Pilots were called on VHF Channel 16. The Pilot arrived on schedule and the vessel continued the voyage to Odessa.

On approaching Ahirkapi Roads from the West, care has to be taken of numerous fishing boats and sand/gravel digging barges.

SHIPMASTER'S REPORT: October 1980 (Updated 1988).
Dardanelles and Bosphorus:
Dardanelles:
Pilotage: Compulsory. Cable: 'Canakkale Pilot Station' 48 hours if possible in advance to be sure of obtaining Pilot. At present Pilots are in short supply due to an increase in traffic.

One Pilot for Dardanelles and Bosphorus.

Pilot boards from grey hulled launch of about 8 knots speed from Sebbulbahir on Northern entrance.

VHF: Call 'Mehmetcik Pilots' on Channels 16 and 71.

Generally starboard side ladder or gangway.

Pilot gives Master form to fill in for Canakkale.

Control: Sanitary Control at Canakkale on Asian side of Strait near narrows about 1 hour after Pilot boarding.

Two launches come out. One Agent, one Immigration.

Require: 2 Crew Lists, sight Ship's Register and Derat Certificate. Officer has to go down to Immigration launch, no one boards.

Immigration Officer gives ship yellow form which is required to be shown next port.

Control only Northbound whether coming from overseas or a Turkish port.*Navigation:* Forecastle manned at Canakkale.

In fine weather, Straits present no problems, but in poor weather and visibility it can be more difficult, especially at Canakkale with other ships around where the vessel is nearly stopped. Also the narrows can be dangerous.

Pilots like maximum sea speed which is not possible.

Vessel passed through the narrows on manoeuvring speed.

Current S.W. flowing at 1 knot – 2 knots.

Transit takes about 3 hours, dependent on weather and delay at Canakkale.

Pilot hands over 'Control' at Inceburun, and takes over Southbound at the same place.

Sea of Marmara: Good positions obtainable. Ship carries out navigation, no Pilot. Very busy but most traffic, apart from ferries and small craft, on straight course from Bosphorus through to Dardanelles and vice versa.

Keeping well to starboard is advisable.

Transit about 6 hours.

Bosphorus:
Pilotage: Compulsory.

If coming from the Dardanelles, Pilot takes over at 'Yesilkoy' or joins by launch at position South of Athirkapi Point. From the North (Black Sea) Pilot boards (and disembarks) at Tellitalya Point just below Kavak (about 4 miles South of Rumeli Point, the Western entrance to the Strait).

Wait North of Rumeli Point until Pilot available.

Cable: 'Kavak' Pilot Station minimum of 6 hours' notice. Generally boards starboard side (and disembarks). Pilot gives Master form to fill in for control.

Control: At Buyukdere North and South about 20 minutes from pilot station.

Control requires: 2 Crew Lists, sights Ship's Register and Derat.

Yellow Immigration form given to Master. An Officer has to go down into launch. Two launches. Agent and Sanitary Inspector.

Navigation: No transit in fog. Forecastle manned for anchoring all transit. As per BA 1198.

Extreme vigilance is required on account of ferries, small boats, ships not under pilotage, strong currents, etc.

Transit time about 2 hours.

Signal Station: At Kavak on Asian bank just North of pilot station. Aldis lamp required.

Currents: Generally a 2 – 5 knot Southerly current, this can be pushed down by strong Southerly wind at Southern entrance at Istanbul.

Pilots advise that in these conditions transit for large bulk type ships is very hazardous on account of steering. Caution must be exercised in picking the Pilot up Southbound at Kavak due to Southerly current building up ship's speed.

SHIPMASTER'S REPORT: December 1983.

Earlier this year a pilot station was established at Gelibolu at the Eastern end of the Dardanelles. It is served by a 60 ft. fishing boat, painted white. The pilotage fee for Mehmetcik-Gelibolu and Harem-Kavak is 50% of the fee for Mehmetcik-Kavak.

If taking stores/spares when passing the Bosphorus, Agents should be instructed to arrange for the delivery at the Istanbul end as it is highly undesirable to have the Agent's launch alongside at Kavak before the Pilot boards.

REPORT: June 1985 (Updated 1988).

The following was received by a Master from his Agent in Istanbul.

For vessels proceeding and destined to Istanbul (not transitting vessels), the Gulf of Izmit or any other port inside Marmara Sea, pilotage is compulsory through the Dardanelles from the Southern entrance (Mehmetcik Point/Cape Hellas Lat. 40° 02′ N., Long. 26° 11′ E. to the Northern exit (Gelibolu Lat. 40° 24′ N., Long. 26° 41′ E.).

The same applies for vessels coming from a Marmara Sea port and proceeding Southwards.

From Gelibolu to the entrance of Izmit Gulf (Darica Lat. 40° 45′ N., Long. 29° 21′ E.) or vice versa, pilotage is not compulsory.

From Darica inside Izmit Gulf pilotage is again compulsory.

All pilot stations can be contacted by VHF Channel 16, working Channel 71.

For vessels passing, in-transit pilotage through Dardanelles-Marmara Sea-Bosphorus or vice versa is not compulsory. It is, however, strongly recommended to employ pilotage services through the Bosphorus.

Dardanelles Pilot can be picked-up at Mehmetcik Point (Lat. 40° 02′ N., Long. 26° 11′ E.) and dropped at new pilot station at Gelibolu (Lat. 40° 24′ N. Long. 26° 41′ E.) respectively picked up there and on outward voyage, thus saving the open Marmara Sea stretch. Another Pilot can then be requested at Istanbul (Harem) for Bosphorus.

Please make sure to enter into Pilot bills the exact times of services given. Please bear in mind that if part of a service falls into overtime, the whole service is charged as overtime. Service hours are as follows:

0800 – 1700 straight time.
1700 – 0800 overtime charged at 50% extra.
0800 – 1200 Saturday straight time.
After 1200 Saturday overtime till Monday morning 0800 hrs.

For vessels with inflammable, dangerous cargoes, etc. 30% extra is charged on all pilotage services, therefore whenever tankers are gas free this must be inscribed on Pilot bills. Also when tankers are loaded with harmless cargoes.

Whenever Pilots remain onboard after completing their service, as guest-passengers, Pilotage bill should be signed for the service part only.

SHIPMASTER'S REPORT: June 1987.
Pilotage through Dardanelles: Compulsory for all foreign vessels bound to and from a Turkish port. Northbound vessels take a pilot at Mehmetcik and Southbound vessels take a pilot at Gelibolu.
VHF: Pilots on Channels 16 and 71.
Notice: 48 hours notice of arrival required.

REPORTS: The following telexes were received by a tanker owner from agent in Istanbul between May 1990 and October 1990.
MAY 1990:
Re: Tankers Exceeding 200 m. LOA and 90,000 g.r.t. Transiting the Dardanelles and Bosphorus:

Kindly note that 10 day's pre-advice of the ETA Dardanelles is now required by the Canakkale and Istanbul Port Authorities so that they can obtain the approval of the Ministry of Communications and close the Straits to all traffic during the passage of such tankers, for which an escort of 2 tugs (for vessel's a/c) and one Coast Guard launch is allocated.

Daylight passage through both Straits is required, which kindly note.
JUNE 1990:
Re: Transit Passage Through the Straits of Dardanelles/Bosphorus:
Re-passage of vessel with g.r.t. in excess of 90,000 tons and LOA more than 200 m. to be reported to Harbour Master. In addition to above, we have been informed that agents for such tonnage have to provide Harbour Master with Letters of Guarantee stating that in case of accident during passage, all damages/losses will be covered by the agent.

Please inform your Clubs accordingly. FYG local P & I Club informed accordingly.
OCTOBER 1990: Telex from owner to agent.
Re-your May telex concerning tankers exceeding 200 m. LOA and 90,000 g.r.t. transiting the Dardanelles and Bosphorus, grateful you advise whether the discrepancy between length and g.r.t. has yet been resolved.
REPLY:
Regulations now apply to tankers of 90,000 g.r.t. or over without any mention of LOA, however should a vessel's g.r.t. be close to 90,000 please advise us so that we can consult the Captain of the Port re any transit restrictions.

REPORT: November 1991.
The following telex was received from an agent in Istanbul.
Quote:
Re: Transiting Vessels Through the Straits.

This is to inform you that as per strict request of Port Harbour Master and Customs Authorities, we are compelled to give them 24 hours notice of vessels ETA Bosphorus North/Southbound passages together with the following additional information:

(1) Port of Registry/flag/g.r.t./n.r.t./d.w.t.
(2) LOA.
(3) Draft.
(4) Port of arrival.
(5) Port of destination.
(6) Quality of cargo on board.
(7) Quantity of cargo on board.

You are kindly requested therefore to instruct your agents at the relevant ports and also your Masters to keep us closely posted in due time about the above, thereby enabling us to comply with the requirements of our authorities in order to avoid any eventual unpleasant consequences or fines.
Unquote.

REPORT: The following was received from our Agent (G.A.C.) in January 1991:
General Information on Passage through the Straits:
Geographical Locations: Dardanelles (Canakkale Bogazi): Is the strait joining the Aegean Sea and the Sea of Marmara, boundaries of which are between the line joining Mehmetcik Lighthouse and Kumkale Lighthouse in the South and the line between Gelibolu Lighthouse and Zincirbozan Lighthouse in the North.

Bosphorus (Istanbul Bogazi): Is the strait joining the Sea of Marmara and the Black Sea, and is located within the boundaries of the Port of Istanbul, boundaries which are described in the relevant regulations as follows:

> The Port of Istanbul is the sea area (including the Golden Horn) between the lines that join Turkeli Feneri and Anadolu Feneri in the North, and Bababurnu and Yelkenkai Feneri in the South.

General Provision: The vessels, passing the waterway that comprise the two straits (i.e. Dardanelles and Bosphorus) as well as the Sea of Marmara, are passing under the following status:

> Transit vessels are those which are coming from a foreign port in Aegean Sea and bound to a foreign port in Black Sea or vice versa, and passing the above waterway without calling at any Turkish Port, and without having any commercial contact or transaction with any Turkish Port, such vessels are granted with Transit Sanitary Pratique.

Non-transit vessels are those which either coming from any Turkish Port, or bound to any Turkish Port, whether between the straits or outside of the above waterways, or stopping for a while for any purpose such as loading and/or discharging cargo, embarkation/disembarkation/city tours of passengers, crew exchange are non-transit vessels and granted with Free Pratique during sanitary controls effected at either Southern entrance to Dardanelles or Northern entrance to Bosphorus.

All ships sailing or lying within the boundaries of Dardanelles and the Port of Istanbul are compelled to comply with international rules, with all rules taking place in the regulations and also with all kind of rules, warnings and controls by the Port Authorities or competent authorities, and comply with rules of legislation as to safety of navigation, life and property. All foreign flag vessels are required to fly the Turkish flag during their stay at Turkish Ports or when passing through the Straits.

Navigation through the Straits: In the Dardanelles, vessels should, in accordance with the Rule No. 9 of the Regulations for Prevention of Collisions at Sea, keep to that side of mid-channel which lies on their starboard side, taking care to make the sound signals in accordance with the rule when approaching the narrows of Canakkale and the bend of Nara.

Vessels should also take every precaution to avoid meeting other vessels in the critical areas between Kilitbahir and Canakkale, between Nara and Kilia, and between Gelibolu and Cardak; and, when the current or weather is in their favour, should, in these critical areas, give way to oncoming vessels by stopping or reducing speed.

In the Bosphorus, the area lying between the line connecting the Turkeli Lighthouse to Anadolu Lighthouse in the North, and the line connecting the Ahirkapi Lighthouse to the Kadikoy Inciburnu Breakwater Light in the South and made of 2 traffic lines, suitable for Northbound and Southbound traffic, and separated by a centre line separating these 2 lines.

The area reserved for crossing the Strait of Bosphorus and lying between the line connecting the Turkeli (ex Rumeli) Lighthouse to Anadolu Lighthouse in the North, and line connecting the Ahirkapi Lighthouse to the Kadikoy Inciburnu Breakwater Light in the South, and made of 2 traffic lanes suitable for Northbound and Southbound traffic, and separated by a centre line separating these 2 lanes is called the Bosphorus Strait Passage Way.

The said centre line which divides the Bosphorus passage into 2 traffic lanes conjunct the below indicated geographical points:

1.	41° 00′ 10″ N., 21° 09′ 45″ E.	2.	41° 01′ 24″ N., 28° 59′ 48″ E.
3.	41° 01′ 33″ N., 28° 59′ 55″ E.	4.	41° 03′ 02″ N., 29° 02′ 23″ E.
5.	41° 04′ 03″ N., 29° 03′ 04″ E.	6.	41° 04′ 03″ N., 29° 03′ 03″ E.
7.	41° 05′ 00″ N., 29° 03′ 44″ E.	8.	41° 06′ 15″ N., 29° 03′ 40″ E.
9.	41° 07′ 13″ N., 29° 05′ 00″ E.	10.	41° 07′ 22″ N., 29° 05′ 00″ E.
11.	41° 08′ 55″ N., 29° 03′ 33″ E.	12.	41° 09′ 23″ N., 29° 03′ 32″ E.
13.	41° 10′ 52″ N., 29° 05′ 02″ E.	14.	41° 12′ 13″ N., 29° 06′ 50″ E.
15.	41° 13′ 36″ N., 29° 07′ 59″ E.		

The area between centre line anad the line that joins the geographical points here below is the Northbound lane:

16.	41° 00′ 00″ N., 29° 00′ 04″ E.	17.	41° 01′ 07″ N., 29° 00′ 04″ E.,
18.	41° 01′ 30″ N., 29° 00′ 12″ E.	19.	41° 03′ 06″ N., 29° 02′ 58″ E.
20.	41° 04′ 00″ N., 29° 03′ 15″ E.	21.	41° 04′ 29″ N., 29° 03′ 15″ E.
22.	41° 04′ 58″ N., 29° 03′ 55″ E.	23.	41° 06′ 15″ N., 29° 03′ 51″ E.
24.	41° 07′ 12″ N., 29° 05′ 22″ E.	25.	41° 07′ 22″ N., 29° 05′ 22″ E.
26.	41° 08′ 51″ N., 29° 03′ 53″ E.	27.	41° 09′ 28″ N., 29° 03′ 50″ E.
28.	41° 10′ 48″ N., 29° 05′ 12″ E.	29.	41° 11′ 40″ N., 29° 06′ 46″ E.
30.	41° 12′ 09″ N., 29° 06′ 59″ E.	31.	41° 31′ 22″ N., 29° 08′ 34″ E.

The area between centre line and the line that joins the geographical points here below in the Southbound lane:

32.	41° 00′ 18″ N., 28° 59′ 25″ E.	33.	41° 01′ 17″ N., 23° 59′ 27″ E.
34.	41° 01′ 44″ N., 28° 59′ 44″ E.	35.	41° 02′ 58″ N., 29° 02′ 06″ E.
36.	41° 04′ 08″ N., 29° 02′ 56″ E.	37.	41° 04′ 34″ N., 29° 02′ 56″ E.
38.	41° 05′ 02″ N., 29° 03′ 33″ E.	39.	41° 06′ 15″ N., 29° 03′ 30″ E.
40.	41° 07′ 23″ N., 29° 04′ 33″ E.	41.	41° 09′ 02″ N., 29° 03′ 16″ E.
42.	41° 09′ 31″ N., 29° 03′ 17″ E.	43.	41° 10′ 30″ N., 29° 04′ 29″ E.
44.	41° 12′ 00″ N., 29° 06′ 00″ E.	45.	41° 12′ 18″ N., 29° 06′ 38″ E.
46.	41° 13′ 45″ N., 29° 07′ 29″ E.		

Speed of Vessels – General: In order to avoid damage to the coast and to small craft, all power-driven vessels must proceed at the slowest speed at which steerage can be maintained, when within the following areas:

(a) In the Dardanelles: Between a line drawn from Mehmetcik Burnu to Kum Burnu, and a line drawn from the town of Gelibolu to Cardak Burnu.

On no account is a speed of 10 knots to be exceeded in the narrows of the Dardanelles between a line joining Nara Burnu and Kilya Lighthouse, and the parallel of latitude passing through Kanlidere Burnu Lighthouse (40° 06′ N., 26° 22′ E.).

(b) In the Bosphorus: Between a line drawn from Ahirkapi Burnu (41° 00′ N., 28° 59′ E.) to Haydarpasa, and a line drawn from Buyukere to Umuryeri Liman.

Unless there are extraordinary or compulsory reasons, a speed of 10 knots is never to be exceeded in the Bosphorus.

Pilotage through Waterway: Pilotage is not compulsory for vessels passing in transit through the straits. However, Turkish Authorities are recommending to take Pilot while passing both straits for a safe passage. Masters of transit vessels have the liberty to take or not to take Pilot while passing the straits.

Pilotage for compulsory non-transit vessels which are bound to any port between the two straits: Such vessels have to take Pilot while passing both straits (i.e. Dardanelles and Bosphorus). Pilotage is also compulsory for vessels calling at any Turkish Port, berthing/unberthing, entering/exiting to/from the harbours, as well as in Gulf of Izmit. Pilotage services are carried out by 7 pilot stations of "Pilot and Towage Services Department", which have been distributed in the area.

Dardanelles:

(a) Mehmetcik (Dardanelles) Pilot Station.
Place: Southern Entrance of Dardanelles (Seddulbahir).
Geographical Position: 40° 02′ 34″ N., 26° 11′ 25″ E.
Telephone: 5 / Canakkale – Seddulbahir.
Cable Address: Canakkale Pilot.

Pilotage services for the ships bound to any port at the Marmara Sea or passing through the Black Sea carried out by that station.

The station continuously effects listening to VHF Channel 16.

(b) Canakkale Pilot Station.
Place: Canakkale.
Geographical Position: 40° 09′ 03″ N., 26° 24′ 03″ E.
Telex: 58187 Plen Tr.
Telephone: 1180 Canakkale.
Cable Address: Canakkale Pilot.

Pilotage at the Canakkale Port and for ships that come alongside and/or depart from quays within Canakkale Port area are carried out by that station. The station continuously effects listening on VHF Channel 16.

In case services at Mehmetcik Station stops, due to bad weather conditions, those are carried out at this station. Ships requiring Pilots from Mehmetcik Station can make their requests through that station.

(c) Istanbul Pilot Station (HAREM).
Place: Southern Entrance of Bosphorus (Harem).
Geographical Position: 41° 00′ 42″ N., 29° 00′ 38″ E.
Telex: 23620 Plhr Tr.
Telephone: 3330533.
Cable Address: Istanbul Pilot.

It carries out the pilotage for ships at the Southern entrance of Bosphorus. The station effects 24 hours listening on VHF Channel 16.

(d) Kavak Pilot Station.
Place: Northern entrance of Bosphorus (Tellitabya).
Geographical Position: 41° 10′ 36″ N., 29° 04′ 24″ E.
Telex: 23711 Plkv Tr.
Telephone: 1420494, 1420374.
Cable Address: Kavak Pilot.

It carries out pilotage for ships at the Northern entrance of Bosphorus. The station continuously listens on VHF Channel 16.

Gulf of Izmit: It is obligatory for Turkish ships of 500 g.r.t. and over, and all foreign ships no matter their tonnage, which come alongside, and up to buoys, at wharves, quays, within the inner, central and outer ports, or leave those places and anchor at and depart from anchorage of the Gulf of Izmit to take Pilots.

(a) Darica Pilot Station.
Place: West entrance of Izmit Bay (Darica).
Geographical Position: 40° 45′ 18″ N., 29° 23′ 20″ E.
Telephone: 2066.
Cable Address: Darica Pilot.

(b) Izmit Pilot Station.
Place: Izmit.
Geographical Position: 40° 45′ 50″ N., 29° 55′ 28″ E.
Telex: 33169 Plkc Tr.
Telephone: 12087.
Cable Address: Izmit Pilot.

Services within the limits of the Izmit Port and demands for ships that will leave the Gulf to be fulfilled by that station. The station continuously listens to VHF Channel 16.

Anchorage of Transit Ships: Article 75, transit ships are allowed to stay 48 hours in order to provide fuel oil, water, provisions, material, to receive documents from and to submit those to agencies without obtaining Free Pratique under the supervision of the Shore Sanitary Organisation at following anchorage areas:

A. The area, lying between 28° 58′ 36″ E. longitude passing from Sultan Ahmet Mosque, and 28° 55′ 00″ E. longitude passing through Yedikule, is the free anchoring place for passenger and dry cargo ships.

B. The area, lying between 28° 55′ 00″ E. longitude passing from Yedikule, and 28° 51′ 00″ E. longitude passing through Bakirkoy, is the anchorage place allocated for tankers and ships carrying dangerous cargo such as explosives, flaring and burning substances.

C. The area, lying between 28° 51′ 30″ E. longitude passing from Bakirkoy, and 28° 50′ 00″ E. longitude passing through Yesilkoy, is the anchoring place for ships subject to quarantine.

REPORT: June 1992.

Agent's Circular to ship's Masters:

Information for Bosphorus:

Please call Bosphorus Pilot Station on VHF Channel 71, when about 6 miles off South entrance (Haydarpasa Breakwater).

Prepare pilot or combination ladder on your starboard side.

Pilot ladder – if freeboard less than 5.0 m.

Combination ladder – if freeboard more than 5.0 m.

Pollution in Turkish Straits:

According to our recent observations, Turkish Port and Environmental Authorities have begun to take stricter measures against occurances of pollution caused by vessels passing Turkish Straits. Regardless of whether pollution is actually caused by any particular vessel, the slightest indication of pollution witnessed by other vessels is immediately reported to the above authorities.

In several cases, some vessels, passing through residue pollution of previous unknown origin, have been accused mistakenly of pollution, whereby, even if vessel is found innocent, it is usually forced to anchor and becomes subject to fines, which must be paid in cash without acceptance of bank or P&I guarantees. Once a vessel has anchored, she will not be permitted to continue voyage, pending P&I procedures or court proceedings. Therefore only the payment of cash will realise the permission of the vessel to sail.

If pollution is found to have been caused due to technical problems of the vessel, a fine of U.S.$ 35,000 (minimum) is charged.

If pollution is found to have been caused by reason of negligence on the part of the vessel, or if ballast/dirty water/slops are discharged, this violation is charged from U.S.$ 40,000 to U.S.$ 160,000.

In light of the above, Owners and Masters are asked to pay special attention, and take precautionary measures when transitting Turkish Straits, as even false occurances beyond the vessel's control may lead to unnecessary delays and fines.

IMPORTANT:

Due to heavy fog, sometimes pilotage at Bosphorus suspended. Please keep close contact with Pilot on VHF Channel 71, and if Bosphorus traffic is closed due to fog, you are free to proceed to Ahirkapi Anchorage for further instructions.

If Pilot will instruct you to anchor due to fog, please listen to VHF Channel 71, and upon receiving instruction that traffic is normal, please heave up anchor and proceed to breakwater, if you order Pilot to come to anchorage, an extra pilotage charge of U.S.$ 750.00 and delays will be incurred.

Anchorage Positions: See "Plan".

Southbound Passage:

Please call Kavak Pilot Station on VHF Channel 71 when about 6 miles off the North Entrance (Rumeli or Anadolu Lighthouse).

Pilot or accommodation ladder to be rigged on starboard side.

Also please have ready following for Sanitary Boat:

Yellow Sanitary Card given to you at Dardanelles.
Tonnage/Derat Register Certificates.
2 copies Crew List.

No other formalities required.

SHIPMASTER'S REPORT: January 1994.

Dardanelles and Bosphorus Pilotage: Vessel bound for port of Eregli from South America.

The Shipmaster's Reports in the Guide to Port Entry 1993/94 for October 1980 (Updated 1988) and June 1987 mention that pilotage is compulsory for Dardanelles/Bosphorus. Also, Admiralty List of Radio Signals Vol. 6, Part I, 1992, Page 434, also says pilotage is compulsory for ships bound for Turkish ports.

As per above, I had advised my Charterers accordingly to arrange for Dardanelles/Bosphorus Pilots; as same when compulsory would be on Charterers' accounts. However, they came back with following reply, which is quoted below and is self-explanatory.

Quote:

Charterers have noted Master's comments on pilotage services for Dardanelles and Bosphorus, with thanks, and we would like to comment/clarify matter as follows:

Master partly correct in stating that 'pilotage is compulsory for ships bound for Turkish port', but with a small mistake.

Compulsory pilotage service for Dardanelles and Bosphorus only in cases where vessels entering Turkish territorial waters from Black Sea and/or Mediterranean Sea and bound to any Turkish port located within Sea of Marmara. Otherwise, in cases where vessels are entering Turkish territorial waters from Black Sea and/or Mediterranean Sea and bound to a Turkish port located at Black Sea or Mediterranean Sea, vessels are not obliged to use pilotage service when transitting both Dardanelles and Bosphorus Straits.

Unquote.

In our case, we entered Turkish territorial waters from Mediterranean Sea and bound to Eregli (Black Sea), and this means vessel will pass both Dardanelles and Bosphorus Straits "in transit", repeat "in transit" and is not obliged to use pilotage service. In other words, pilotage is not compulsory for our vessel.

Therefore, any and all pilotage service to be used by the vessel during transitting Straits of Dardanelles and Bosphorus up and down would be about U.S.$ 10,000 and on Owner's account.

ALANYA: 36.32 N. 32.03 E. (See Plan)

RADIO: Alanya Radio. Call sign TAC4.

BERTHING: Jetty length 277 m., depths alongside 5 m. – 12 m. Can accommodate 4 vessels.

CRANES: No shore cranes available; vessels use their own gear for loading/discharging.

STEVEDORES: Loading/discharging carried out by hired stevedores. Average rate per shift/gang of 150 tons for cotton, bagged and general cargoes.

Working Hours: 0800 hrs – 1630 hrs. Lunch break 1230 hrs.

FRESH WATER: Available.

AIRPORT: At Antalya (150 km.).

CHARGES: Light and sanitary dues.

AUTHORITY: Harbour Master. *Tel:* (0242) 5131097.

Turkiye Denizcilik Isletmeleri, Genel Mudurlugu, Rihtim Caddesi, 80120 Karakoy, Istanbul, Turkey. *Contact:* Head of Port Operations Department or Assistant General Manager.

Turkish Maritime Organisation, Port of Antalya, Antalya, Turkey. *Tel:* (0242) 2481469. *FAX:* (0242) 2483346. *Contact:* Husbyin Seymen, Port Director.

ALIAGA: 38.50 N. 26.57 E. (See Plan

LOCATION: *Northern Point:* Lat. 38° 50′ 10″ N., Long. 26° 56′ 33″ E.
Southern Point: Lat. 38° 50′ N., Long. 26° 57′ 36″ E.

DOCUMENTS:

6 copies Crew List.
4 copies Passenger List.
2 copies Manifest of Transit Cargo.
3 copies Manifest of Inward Cargo, one of which must be legalised before arrival by Turkish Consulate at loading port.
1 set Bills of Lading.
1 set Cargo Stowage Plans.
2 Stores Lists.
Health Documents.
Ship's Certificates.

Ship's Particulars Form is to be filled in by Masters upon arrival a Aliaga and remitted to the Port Authorities.

PILOTAGE: Pilotage is compulsory for all vessels. Pilot boards 2 3 miles West of Tasli Burnu Light.

Notice of ETA must be reported 3 days before arrival, followed b successive notices confirming or amending previous notice.

The ETA message must include the following information:

1. Name and call sign of vessel.
2. Nationality.
3. Agency.
4. Length, draft and gross tonnage.
5. Kind and quantity of dirty ballast.
6. Deballasting time.

ANCHORAGES: The port itself is situated about 40 miles N.N.W. Izmir on the Southern arm of the Gulf of Candarli and the anchorage considered safe for large ships.

information on best location of anchorage, if required, will be give by Aliaga Pilot.

READINESS: Notice of Readiness will be received by the Loadin Master. It should be tendered at the time of anchoring or pilot boarding Lay time will commence 6 hours after receipt of Notice of Readiness.

RESTRICTIONS: Water depth at entrance about 14 fathoms. Wat depth at crude oil wharf 17 m. – 18 m.

MAX. SIZE: Crude Oil Berth designed for up to 100,000 d.w.t. Produc Berth designed for up to 22,000 d.w.t.

HEALTH: *Customs:* Customs post at refinery.

Immigration: None locally. Incoming and outgoing personnel have to b processed at Izmir and escorted under guard to and fro.

Health: No office locally. Officials have to be brought from Izmir.

RADIO: Radio messages to be routed to Agent via Izmir Radio. Ca sign of Izmir Radio Station is "TAN", 2,760 kHz.

Also see "Pilotage".

VHF: Communication with Aliaga Pilot Station is possible within 20 mile – 25 miles by VHF Channel 16, manned 24 hours. Call sign: "Aliag Pilot".

RADAR: No radar facility.

TUGS: A total of 4 tugs (2×2,460 h.p. and 2×2,760 h.p.) and 3 moorin boats are available. All tugs are equipped with fire fighting equipmen

During berthing/unberthing, it is compulsory to take at least:

1 tug – 500 g.r.t. – 4,999 g.r.t.
2 tugs – 5,000 g.r.t. – 24,999 g.r.t.
3 tugs – 25,000 g.r.t. – 49,999 g.r.t.
4 tugs – 50,000 g.r.t. and over.

Depending on weather conditions, or for safety requirement additional tugs may be assigned by TUPRAS, or by Aliaga Pilot or requested by vessel.

BERTHING: There are 3 berths:

(a) Aliaga Refinery Terminal.
(b) Aliaga Refinery New Crude Oil Jetty.
(c) Aliaga Refinery Cargo Pier.

(a) Aliaga Refinery Terminal: A "T" type oil jetty having 4 berth points:

Berth No.	*LOA* (m.)	*Draft* (m.)	*Product*
1	285	16.0	Crude and Fuel
2	180	12.0	White products
3	100	8.0	White products
4	100	6.0	Lube oils

Berthing to No. 1 is possible only during daytime.

(b) Aliaga Refinery New Crude Oil Jetty: VLCC jetty designed tankers up to 250,000 d.w.t., 19.25 m. even-keel draft and LOA 260 m. – 340 m.

It has 4×16 in. FMC loading arms for crude oil discharging a 2×12 in. loading arms for bunker loading. Unberthing and berth is possible only during daytime.

(c) Aliaga Refinery Cargo Pier: LOA 95 m., draft 6.0 m. Pier is loading of asphalt.

CRANES: Fixed cranes are available at all berthing points, capacities up to 1,500 kg.

MEDICAL: Hospital and medical facilities are available at Izmir Aliaga. If doctor is required on board, Master should inform Agent radio or VHF.

TANKERS: See "Berthing".

FIRE PRECAUTIONS: Ship's watchmen to be on duty. All operati involving open fires and sparks are prohibited. Vessel should pro two fire extinguishers and sawdust or sand beside hose connection

BALLAST: Maximum ballast discharge rate 1,500 cu.m./hr. Vess should arrive with sufficient ballast for safe handling of vessel u prevailing weather conditions.

Vessels shall not discharge into the waters of the port any part of content of their cargo, slop or ballast tanks or bilges, which is liab pollute these waters.

DENSITY: 1027 (average).

FRESH WATER: Available at all berths, delivered by hoses at a rate of 20 cu.m./hr. Must be requested by Agent, and Agent must inform the Customs Officer.
FUEL: Available at all berths, delivered by hoses. Gasoil, fuel oil (1,500 sec. or 3,500 sec.). Notice of 48 hours required prior to berthing.
REPAIRS: No facilities available.
DRY DOCKS: None.
SURVEYORS:

SHORE LEAVE: Crew permitted ashore with shore passes. It is forbidden to wander on jetty and in refinery area. Transport vehicle is provided by TUPRAS between jetty and Aliaga.
IDENTIFICATION CARDS: Seamen's Book is needed for crew going ashore.
GARBAGE DISPOSAL: All rubbish must be put in bags and given to gabage collection vessel daily.
Charges: At anchorage – 90×1,000 g.r.t./U.S.$ (subject to change).
In port – 45×1,000 g.r.t./U.S.$ (subject to change).
WASTE OIL DISPOSAL: During berthing, waste oil disposal is taken by refinery to the shore ballast tank.
Charges: At anchorage – 120×1,000 g.r.t./U.S.$ (subject to change).
In port – 60×1,000 g.r.t./U.S.$ (subject to change).
SEAMAN'S CLUBS: None.
CURRENCY: Lira. Currency exchange rates are set by National Central Bank daily, and are subject to change.

SHIPMASTER'S REPORT: October 1990.
First vessel to use the facility.
Vessel: 265,000 tonnes d.w.t. with segregated ballast. LOA 322 m. Summer draft 20.47 m.
Berth: New berth for VLCCs.
General: Vessel needs B.A. Chart No. 1618 (which does not yet show new VLCC berth) and B.A. Pilot Book NP.48. The Terminal management advise that the position of the centre of the jetty (in between the Chicksans) is Lat. 38° 49′ 56″ N., Long. 26° 57′ 01″ E., and the berth lies in a 177°/357° direction. Arrival and berthing draft 19.24 m. even keel.
Approaches: The approaches to the port are hazard-free, and the entrance into the Outer Harbour (between Tavsan Adasi Is. and Ilica Br. Lighthouse) has a navigable width of 1.1 miles for vessels up to 20.0 m. draft.

A slight current setting North was experienced approaching the entrance from about 5 miles out. Pilots (3) boarded from tug when vessel was actually in the entrance to Outer Harbour (3 Pilots used, as this was the port's very first VLCC – normally only one Pilot will be used).
Anchoring: Pilot took ship to anchor, in a position with Tasli Br. Lighthouse bearing 145° × 1.55 miles in a depth of 50.0 m. We used port anchor with 9 shackles on deck. During next 36 hours vessel experienced N.E. winds up to 35 knots, position was maintained without undue strain on the cable. Holding ground very good.
Prior to Berthing: When the Terminal decided weather conditions were satisfactory for berthing (wind N.E. less than 10 knots), the Pilots (again 3) came out to the ship by tug and boarded in the anchorage. Four tugs were made fast *before* weighing anchor.
Proceeding to New Berth: Once anchor aweigh, vessel proceeded inwards at *very* slow speed, using minimal engine movements. The Echo Sounder was run continuously. During this operation, the wind suddenly backed round to N.W. and increased to 15 knots. The Pilots had already stipulated that maximum wind speed for berthing is 10 knots. They were constantly monitoring the ship's wind gauge, but decided (with my agreement) to continue berthing, as we had reached the point where, to abort, would mean towing the ship out stern first, back into Outer Harbour against the wind. The Pilots did not want to use astern engine movements, as the effect of our transverse thrust would swing the bow in towards the berth. In the event the berthing operation proceeded relatively smoothly, and although the N.W. wind increased up to 18 knots, blowing on our starboard quarter, the tugs were well able to counteract it. Vessel was stopped in the water approximately 150 m. abeam of the berth, and 2 tugs began pushing at 90° on our port side, whilst the other 2 tugs began towing at 90° towards the berth.
Berthing: Three mooring boats were available, two small ones and one miniature tug. Only the latter was really capable of carrying our mooring wires to the shore (when still about 70 m. off the berth). The two small mooring boats had great difficulty in carrying our wires, in fact if we had not had the 11.0 m. polyprop tails fitted to the wires, it is doubtful if these two small boats could have carried them at all. First lines were one polyprop stern line to miniature tug, one aft breast wire to small mooring boat, and one polyprop head line to the other small mooring boat forward. The vessel landed on the berth very smoothly and once there, the 4 tugs kept vessel alongside easily, whilst we made fast. The jetty mooring crew were only equipped with light heaving lines instead of sturdy messengers. Their heaving lines parted 3 times whilst trying to heave our mooring wires up from the boat to the quick release hooks on the dolphins (through a height of approximately 10.0 m.). The Pilots assured me this oversight would be rectified before the next VLCC visited the port. Final moorings were as per plan (See "Plan Section").
Berth: A very good shore gangway is installed on the jetty North of the Chicksans (brand new hydraulic variable height 'tower' type). There are 4 × 16 in. Chicksans, only three of which were connected (and this will apparently be standard procedure). VLCCs will always berth starboard side to.
Discharging: The Loading Master advised that the Terminal's maximum receiving rate is 10,500 cu.m./hr. (although they admitted they had never received at this rate before). In the event we actually pumped for a while on bulk at up to 12,000 cu.m./hr., and they were quite happy with this. Full 100% C.O.W. was carried out, and our net discharging time for two grades was 30 hours 40 minutes, totalling 238,000 tonnes. Total time spent on cargo operations (including stoppage for C.O.W. and stripping) was 37 hours 25 minutes.
Unberthing: Our departure drafts were forward 8.60 m. and aft 9.95 m., and due to wind being from the West at 15 knots, the Pilot (only 1) elected to tow the vessel out stern first into Outer Harbour (the alternative is to be towed into Inner Harbour and then turned through 180°, before heading out, but the Pilot said he would only do that in zero wind conditions). Unmooring is done by the shore releasing our lines, under tension, from the quick release hooks on the dolphins, starting from forward and aft and working towards midships. Same 4 tugs secured in same positions then tow vessel stern first using only very short astern engine movements. Once into Outer Harbour, vessel is swung to starboard onto a heading of 275°. Once steady the Pilot departs. Passage out into the Aegean Sea is trouble-free, apart from a few scattered fishing boats in Outer Harbour.
Miscellaneous Information:

(a) Inward Clearance done once alongside, about 12 shore Officials in total, have plenty of chilled soft drinks and beer ready.
(b) Actual papers required: 8 Crew Lists, 7 Vaccination Lists, 2 Crew Declarations, 3 Stores Lists. All other papers supplied by Agent/Officials. Last Port Clearance sighted but not required. Neither Passports or Vaccination Certificates inspected. Only photocopy of Master's Passport required for Agent. (Notary Public purposes).
(c) Agent and Officials come from Izmir (about 45 miles South of Aliaga).
(d) Agent (Boutros Izmir) very helpful and speaks perfect English. Can obtain previous day's British newspapers in Izmir.
(e) Pilots only standby VHF when a vessel is due (Channels 16, 12 and 13).
(f) Pilots and Tug Masters all ex-Turkish Navy and speak excellent English. Pilots very professional and highly competent.
(g) Outward Clearance, after completion of discharge, can take up to 6 hours. Several Port Officials return to ship for this purpose. We were unfortunate that their lunch break occurred 2 hours after finishing cargo, so waited 6 hours.
(h) Had to provide accommodation and meals for 3 surveyors (1 owner's from UK, 1 Charterer's (SGS) from U.K. and 1 local SGS).
(i) Terminal operated by Tupras Aliaga. Notice of Readiness to be made out to this Company. N.O.R. will be signed by Loading Master (speaks excellent English). Acceptance time is that of "All Fast".
(j) Terminal management very friendly and co-operative. We were visited several times by various managers requesting a look at their very first VLCC.
(k) Intention is to berth VLCCs during daylight only. Departure during hours of darkness will only be possible if wind speed less than 10 knots.

AUTHORITY: TUPRAS, Turkiye Petrol Rafinerileri A.S., Aliaga, Izmir, Turkey. *Tel:* (91) (51) 138778. *Telex:* 51704. *FAX:* (91) (543) 62249. *Contact:* Tevfik Alok, Deputy Refinery Manager.

AGENT: See "Izmir".

ANTALYA: 36.50 N. 30.37 E. (See Plan)

PILOTAGE: Compulsory. 1 pilot boat and 1 service boat available.
ANCHORAGE: 925 m. S.E. of Outer breakwater.
MAX. SIZE: Max. draft 9.5 m.
RADIO: Antalya Radio. Call sign TAL.
VHF: Pilot on Channels 16, 12 and 14 throughout 24 hours.
TUGS: 3 tugs (275 h.p. – 750 h.p.) and 1 mooring boat available.
BERTHING: Outer breakwater is 1,440 m. long, inner breakwater is 650 m. long. Port area is 331,600 sq.m.

Vessels can enter port and anchor at any time with a Pilot aboard. Manoeuvring area has 400 m. diameter, depths 8 m. – 11 m.

9 operating quays, 2 passenger quays and a military quay available.

Quay No.	*Length* (m.)	*Depth* (m.)
1	150	10.00
2, 3	165	5.5 – 6.5
4	60	8.00
5, 6	290	10.00
7	170	10.00
8 (Passenger Quay)	170	10.00
9 (Military Quay)	270	5.50
4 Ro/Ro	35	5.50

Storage:

Open warehouse area is 200,000 sq.m. Closed warehouse area is 3,000 sq.m. Closed warehouse (for combustible cargo) is 400 sq.m.

Cold storage plant is 6,900 sq.m. with capacity of about 10,000 tons.

PORT EQUIPMENT:

1 floating crane (60 tons).
6 cranes (1×25 tons (fixed), 5×5 tons).
6 mobile cranes (3×10 tons, 1×25 tons, 1×5 tons, 1×3 tons).
16 forklifts (10×3 tons, 3×5 tons, 2×10 tons, 1×25 tons).
5 tractors.
26 trailers (20×1 ton, 4×6 tons, 2×25 tons).

BULK CARGO FACILITIES: 4 alumina silos each of 4,000 tons capacity which can load into vessel by conveyor belt at a rate of 250 t.p.h.

STEVEDORES: Gangs of 6 – 8 men each, load/discharge cotton at rate of 100 tons per shift, general cargoes 125 tons per shift.

Working Hours: First shift: 0800 hrs. – 1600 hrs. (lunch break from 1200 hrs. – 1230 hrs.). Second shift: 1600 hrs. – 2400 hrs. (meal break from 1900 hrs. – 1930 hrs.).

FRESH WATER: Fresh water supplied from hydrants on quays by watermen. Rate of delivery is 32 t.p.h. – 48 t.p.h.

FUEL: Available by road tanker.

CERTIFICATES: Certificate of Freeboard, Certificate of Registry, Certificate of Pratique, Light Bill, Manifest, AA(1) Certificate.

AIRPORT: Antalya Airport is 22 km. from the port, 12 km. from Antalya city centre.

TIME: GMT plus 2 hours.

HOLIDAYS: Work is possible on Turkish holidays, weekends upon request.

GARBAGE DISPOSAL: Garbage disposal service is available. Drums are provided if required. Charges are as follows:

	Cost (U.S.$)/1,000 g.r.t.		Cost (U.S.$)	
	Flag of Ship			
Method of Service	*Turkey*	*Others*	*Barge*	*Container*
On Quay	16	45	10	1.00
At Anchor	30	90	10	1.00

WASTE OIL DISPOSAL: Waste oil disposal service is available. Charges are as follows:

	Cost (U.S.$)/1,000 g.r.t.	
	Flag of Ship	
Method of Service	*Turkey*	*Others*
On Quay	20	60
At Anchor	40	120

Facilities include two oily water separators of 2 tons per hour capacity and a shore tank of 100 tons capacity.

Contact Tel: 31-181492, Telex: 56186 TRDZ or Fax: 931-183346 for further details.

SEAMAN'S CLUBS: There is no seaman's club operating in the port, but the port is situated near the city, and all shopping, international telephone, some sporting activities, dances, transportation, and postage facilities are available there.

CURRENCY: Turkish Lira (TL).

DEVELOPMENTS: TMO and SEKA quays (3) are still under construction for passenger vessels, grain and lumber.

AUTHORITY: TDI is in charge of loading/ discharging.

Turkiye Denizcilik Isletmeleri, Genel Mudurlugu, Rihtim Caddesi, 80120 Karakoy, Istanbul, Turkey. *Contact:* Head of Port Operations Department or Assistant General Manager.

Local officials: Huseyin Seymen, Port Manager. *Tel:* 9-31-181469, 181494. *Telex:* 56186.

Ali Ozcan, Harbour Master. *Tel:* 181438. *Telex:* 56009 Lmba TR.

Dr.Tugay Aker, Sanitary Authority. *Tel:* 181439. *Telex:* 56035 Asam TR.

AGENT: Gulf Agency Denizcilik A.S., P.O.Box 116, Antalya, Turkey. Telex: 56218, 56250. Fax: (90-242) 3425683. Cables: "Gacship", Antalya.

BANDIRMA (including Bagfas): 40.22 N. 27.58 E.

(See Plan)

LOCATION: Bandirma is situated on Southern side of Marmara Sea about 63 nautical miles from Istanbul. Admiralty Chart No. 294.

PORT LIMITS: The sea area of the Port of Bandirma is an area inside a line joining Latitude 40° 23′ 42″ N., Longitude 27° 54′ 12″ E. and Latitude 40° 22′ 00″ N., Longitude 27° 59′ 30″ E.

DOCUMENTS:

7 copies Crew List.
2 copies Crew Declaration List.
2 copies Ship's Stores List.
4 copies Passenger List.
2 copies Transit Cargo Manifest.
3 copies Inward Cargo Manifest (1 copy must be legalised by Turkish Consulate at loading port. If no Consulate existing same to be certified by Local Customs Officer or the Chamber of Commerce.)

Special Regulations: Special regulations, copies of which should be obtained by vessels proceeding to Bandirma, are in force for anchoring, berthing alongside mole and for vessels carrying inflammable or explosive cargoes. Vessels required to give ETA to Harbour Authorities at least 24 hours in advance, also nationality, cargo and last port of call. Unless prevented by important reasons, Masters of all vessels must present their papers to Harbour Authorities within one hour of arrival.

PILOTAGE: Compulsory in the New Harbour and Bagfas/Iskur Wharf. It is compulsory to employ a pilot and tugs in and out of the harbour. Charges for such services are levied by TCDD (Turkish Railway Administration), as per compulsory zone pilotage, and tug tariff effective in Istanbul. One pilot boat of 2×385 h.p.

APPROACHES: Two long entrance channels lead from Bandirma B to the harbour.

ANCHORAGE: Good anchorage in roads about 370 m. off entrance t harbour in depths up to 12.8 m. There are also suitable anchorage within the breakwater area.

MAX. SIZE: Max. draft 12.0 m.

HEALTH: Arriving vessels are inspected at the Dardanelles and Istanbu (Bosphourus) No other inspections are required.

RADIO: Istanbul Radio – call sign TAH; Bandirma Radio – call sig TAA4; Tekirdag Radio – call sign TAA3.

VHF: Channels 16, 12, 13 and 14.

TUGS: 3 tugs available (up to 1,000 h.p.).

Vessels up to 500 g.r.t. do not require tugs. Vessels over 500 g.r. use one tug, and vessels over 3,000 g.r.t. use 2 tugs. Tugs are provide by the Port Administration.

BERTHING: The port is protected by 2 breakwaters, 1,000 m. an 500 m. long.

Berth No.	*Length* (m.)	*Depth* (m.)	*Remarks*
1	130	8.25	Passenger
2 – 3	284	10.00	General Cargo
4 – 5	324	10.00	General Cargo
6	130	10.00	General Cargo
7 – 8	379	10.00/12.00	Dry Bulk
9	203	10.00	Dry Bulk
10	100	10.00	Dry Bulk
11	190	10.00	Dry Bulk
12	182	10.00	Dry Bulk
13	80	10.00	Dry Bulk
14	180	8.25	Dry Bulk
15 – 16	270	4.00	
17 – 18	335	4.00	For vessels under 300 n.r.t.

Storage: Open storage area of 79,845 sq.m., and covered storage are of 7,000 sq.m. Grain silo: Capacity 20,000 tons.

Bagfas: Bagfas Fertilisers (Private Wharves):

Location: Bagfas Fertilisers Jetty is situated on Southern side of th Marmara Sea about 5 nautical miles from Bandirma. (Admiralty Cha No. 294).

Pilotage: The jetty is private but pilotage/tug boat/mooring boat servic are operated by TCDD (Turkish State Railways).

Anchorage: Port of Bagfas is an open port, but good anchorage in road a few cables off the entrance in depths up to 7 fathoms.

Accommodation: Bagfas have 2 jetties. Old jetty – length 125.6 m depths between 12.3 m. and 9.30 m. New jetty – length 125 m., dep 16.5 m. and 13.5 m.

NOTE: From jetty to each mooring dolphin 61 m.

Port Facilities: One moving crane available on the old jetty with 10 to lifting capacity which loads bulk cargoes into bunker which is connecte to conveyor belt with discharging capacity up to 3,000 tons daily.

Receiving capacity of products is 150/400 tonnes per hour.

Working hours 24 hours per day.

Jetties are used for discharging phosphates, sulphur in bulk, sulphur acid, phosphoric acid, ammonia, fertilisers in bulk and/or bagged an for loading sulphuric acid, phosphoric acid, bulk and/or bagged fertilise

Principal Imports: Bulk phosphate and sulphur, phosphoric aci sulphuric acid, ammonia, bulk and bagged fertilisers.

Principal Exports: Sulphuric acid, bulk and bagged fertilisers.

SPECIALISED CARGO HANDLING FACILITIES:

Containers: Handled by 25 ton shore crane.

Ro-Ro: Ramp available at Passenger Pier (Berth No. 1).

CRANES: There are 15 shore cranes with capacity 3 – 25 tons, 5 mob cranes with capacity 3 – 25 tons and 3 crawler mobile cranes.

Other equipment includes 14 forklifts with capacity 3 – 5 tons, 5 tow tractors, 3 loaders and 8 pneumatic loaders of 50 t.p.h. – 160 t.p.h.

STEVEDORES: *Working Hours:* Service is provided to vessels 24 hou a day. First shift 0800 hrs. – 1630 hrs., second shift 1630 hrs 0030 hrs., third shift 0030 hrs. – 0800 hrs.

Loading Rates: Ore loading capacity 800 tons/shift/gang. Bagged car loading 140 tons/shift/gang. Bulk cargo, 500 tons/hatch/shift. Work c be carried out day and night.

Principal Imports and Exports: Imports: Bulk phosphate and sulph phosphoric acid, ammonia, fertiliser.

Exports: Various ores and acids, marble, grain, canned foods, flo tomato paste and domestic appliances.

MEDICAL: State hospital and private hospital available.

FRESH WATER: Available at berths.

FUEL: Vessels at anchorage can be supplied with fuel. Fuel al available by truck.

With 48 hours notice Petrol Ofisi can supply marine fuels a lubricants (Mobil, Shell, Chevron and B.P.). Telex: 29048 Bunk Tel: (0216) 338 25 09, 337 36 86, 337 88 31, 336 06 36. Mailing addre Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

CONSULS: None.

REPAIRS: Minor repairs are possible.

OPENING/CLOSING HATCHES: May be opened or closed by sh crew, or by stevedores at extra charge.

CUSTOMS ALLOWANCES: 50 cigarettes for each man going asho On board the vessel each man may hold 200 cigarettes and a bottl spirits.

AIRPORT: Local airport not operational. Istanbul Airport 350 km.

TIME: GMT plus 2 hours.

HOLIDAYS: New Year's Day (commences 1200 hrs./December 31 National Sovereignty Day (April 23rd), Sports Day (May 19th), Vic Day (August 30th), October 29th, Sheker Bayram (3 days, movab Kurban Bayram (4 days, movable). However, the port is not working first days of Sheker Bayram and Kurban Bayram, during all other d work carried out.

POLICE/AMBULANCE/FIRE: Police Tel: 155. Fire Tel: 110. Hos (public) Tel: 0266-7142780. Hospital (private) Tel: 0266-7180625

IDENTIFICATION CARDS: Seamen's Book is sufficient.

GARBAGE DISPOSAL: Garbage collection service and equipment is available. This service is given at all berths.
WASTE OIL DISPOSAL: Collection service is available. An oily water separator system of 15,000 cu.m./year is also available.
CURRENCY: Turkish Lira (TL). U.S.$ 1.00 = 26.000 TL (April 1994).
GENERAL: *Security:* Port Security personnel ensure the security of the port 24 hours a day.
Weighing Facilities: There are 2 weighbridges up to 100 tons capacity (one for wagons and the other for trucks).
Weather: North winds prevail in the area and cause high seas. The breakwaters protect harbour from North and West winds.
AUTHORITY: General Directorate of Turkish State Railways (TCDD), Bandirma, Turkey. *Tel:* 0266-7187530, 7134966. *FAX:* 0266-7136011. *Contact:* I. Bulent Ozen, Port Director. Mr.Hasan Karakus, Port Manager. Ibrahim Yalkiri, Harbour Master (Tel: 0266-7181028).
AGENT: See "Istanbul".

BORUSAN: 40.25 N. 29.05 E. (See Plan)

LOCATION: Borusan Jetty is situated West of Gemlik in position Lat. 40° 25′ 03″ N., Long. 29° 05′ 21″ E., on East side of Marmara Sea, about 52 miles from Istanbul.
PORT LIMITS: East of 29° 04′ 00″ E., in Gemlik Bay.
DOCUMENTS:
Customs:
2 copies Crew List.
2 originals Crew Effects Declaration.
2 copies Stores List.
3 copies Cargo Manifest (Originals).
Immigration:
2 copies Crew List.
Seaman's Book.
Harbour Master:
2 copies Crew List.
Vessel's Certificates.
Last Port of Clearance.
Stevedoring Company:
Initial Cargo Plan.
Vessel's Particulars (Stevedores form).
Vessel's Requisition form for Garbage/Bilge Water Disposals (Stevedores form).
Cargo Gear Book.
PILOTAGE: Compulsory. Provided by Gemlik Pilots Association (Tel: 244-5136164), who are located at Gemlik Fishing Port.
24 hours notice before arrival should be given to Pilot through Agent. Pilot comes on board by pilot boat.
ANCHORAGES: If required, can be advised by Pilot. Vessels must be clear of white buoys lying from Long. 29° 09′ 02″ E. (EP) to West for approximately 750 m. in Gemlik Bay when anchoring.
RESTRICTIONS: Berthing in daylight and unberthing 24 hours.
Depths vary from 4.5 m. to 8.5 m. at Mudanya side and 5.00 m. to 9.00 m. at Gemlik side of pier.
MAX. SIZE: Max. LOA 165 m. due to draft restrictions (2 vessels can be berthed).
HEALTH: All arriving vessels are inspected at Dardanelles or Bosphorus and should have Sanitary Clearance.
RADIO: Port has no communications equipment. ETA messages to be routed to addressee via Istanbul Radio (Call sign "TAH"). At anchorage or when berthed on pier, telephone call is possible through Bandirma Coastal Radio Station by VHF Channel 16.
VHF: The calling channel for all stations is Channel 16. Pilots on Channels 16 and 14.
RADAR: Radar assistance is not available.
TUGS: 800 h.p. and 1×1,500 h.p.
Vessels 2,000 g.r.t. – 5,000 g.r.t. – 1 tug.
Vessels 5,000 g.r.t. – 25,000 g.r.t. – 2 tugs.
Vessels over 25,000 g.r.t. – 3 tugs.
BERTHING: The 170 m. jetty offers 2 berths alongside. Depth 4.5 m. – 9.0 m. Vessel may be loaded and discharged while moored stern to the open sea.
CRANES: 3 cranes with lifting capacities of 25 tons, 40 tons and 100 tons operating on the jetty. Mobile cranes available for hire.
BULK CARGO FACILITIES: Bulk cargo storage area is available for alloy type cargo, handling with bulldozers, buckets and grabs for discharging operation.
SPECIALISED CARGO HANDLING FACILITIES: General, bulk cargoes and steel products.
BRIDGES: None.
STEVEDORES: Performed by Bortrans Denizcilik Hizmetleri A.S., Gemlik, part of the Borusan Group.
Working 24 hours with 3 shifts a day.

1st Shift	0800 hrs. – 1600 hrs.
2nd Shift	1600 hrs. – 2400 hrs.
3rd Shift	0000 hrs. – 0800 hrs.

MEDICAL: Emergency hospital and dental facilities are available at Gemlik, approximately 10 km. from the Borusan plant.
Masters to inform Agent if any medical assistance is required in order to make adequate arrangements.
TANKERS: No facilities.
DENSITY: 1018 – 1019.
FRESH WATER: Available by trucks, capacity 6 or 10 tons.
FUEL: Available by trucks.
FIRE PRECAUTIONS: Factory fire brigade available.
CONSULS: None locally.
REPAIRS: Small repairs possible.
DRY DOCKS: None.
SURVEYORS: Marine surveyors representing Lloyd's, A.B.S., N.V., Turkish Lloyd's and Socotec Avrasia's representatives may be ordered from Istanbul with sufficient notice.
GANGWAY/DECK WATCHMAN: Vessel's accommodation ladder or gangway used. Watchmen are not necessary.
OPENING/CLOSING HATCHES: Opening and closing hatches is performed by ship's crew.
CUSTOMS ALLOWANCES: Each crew member is permitted 2 cartons cigarettes and 2 bottles of spirits. Excess is sealed by Customs Officers.
REPATRIATION: Can be arranged by vessel's Agent with necessary documents.
AIRPORT: Nearest airport at Bursa, approximately 32 km. from Borusan. There are daily flights to Istanbul (flight time 30 minutes).
TIME: In Summer, GMT plus 3 hours. In Winter, GMT plus 2 hours.
HOLIDAYS: New Year's Day (1st January); National Sovereignty Day (23rd April); Sports and Youth Day (19th May); Victory Day (30th August); Proclamation of the Republic (29th October); Ramadan (3 days movable); The Moslem Festival of Sacrifices (4 days movable); Weekend holiday (Sunday only).
Please note: Ramadan holiday in 1995 is 3rd, 4th and 5th March, and Moslem Festival in 1995 is 10th, 11th, 12th, 13th and 14th May.
Official weekend holiday from 1700 hrs. on Friday to 0800 hrs. on Monday.
POLICE/AMBULANCE/FIRE: Police Tel: 055. Fire Department Tel: 110. Ambulance/Emergency Health Assistance Tel: 112.
TELEPHONES: Cannot be connected on board. A call-box is available on quay near Bortrans' office building.
BANKS: Only Turkish Banks at Gemlik.
Turkiye Is Bankasi. Tel: 5132455.
T.C.Ziraat Bankasi. Tel: 5130090 or 5130079.
Turkiye Halk Bankasi. Tel: 5131574 or 5132570.
Turkiye Vakiflar Bankasi. Tel: 5131242.
STORING: See "Prelims".
Vessels are loading and discharging from/to trucks.
Trucks can proceed alongside the berth, there is no obstruction or pier construction for free working of trucks and forklifts.
Forklifts can use jetty only for handling cargoes.
Customs regulation not in force regarding storing.
Local riggers are not employed to assist cargo handling. Only Bortrans (official stevedoring company) at Borusan Pier for all cargo handling operations.
SHIP SUPPLY SERVICE: None.
SHORE LEAVE: After completing Customs and Immigration formalities, crew members are allowed ashore.
IDENTIFICATION CARDS: Shore passes issued.
GARBAGE DISPOSAL: Available from stevedoring company.
WASTE OIL DISPOSAL: Available via stevedoring company, if requested through vessel's local Agent.
SEAMAN'S CLUBS: None.
CURRENCY: Turkish Lira (TL). U.S.$ 1.00 = 19,000 TL (2.3.94).
REGULATIONS: Swimming and walking around factory prohibited. Walking only permitted from vessel direct to main entrance of factory.
DELAYS: No delays at Borusan facilities, but bad weather conditions may cause delays.
GENERAL: Borusan Jetty, built in 1984, is located at the entrance of Gemlik Bay and Eastern part of Marmara Sea which is known as Cape Tuzla. Type of pier is reinforced concrete jetty and clear alongside distance is 170 m., width 15 m. Maximum depth at jetty changes from 4.5 m. to 8.5 m. Bottom is sandy and shelving.
Borusan Jetty has been operating since 1984 and about 200/250 Turkish and foreign flag vessels call at pier every year. The deadweight of vessels changes from 1,000 tons up to 10,000 tons and sometimes more than 10,000 tons, depending on arrival draft and cargo quantity on vessel.
Port loads and discharges about 500,000 tons per year, especially steel products.
DEVELOPMENTS: Dredging operations to increase depth of water around pier is scheduled for 1994.
AUTHORITY: Bortrans Denizcilik Hizmetleri A.S., Hisar Mahallesi, Gemsaz Mevkii, 16600 Gemlik/Bursa, Turkey. *Tel:* (224) 5248630, 5248631. *Telex:* 32498 Bsaa Tr. *FAX:* (224) 5248633. *Contact:* Captain Bugrahan Hanagasioglu, General Manager. Captain Erdogan Koseoglu, Chartering Department.

BOTAS (CEYHAN) PORT, including Delta Terminal, Aygaz Terminal, Toros Terminal, Botas Terminal and Dortyol Terminal: 36.53 N. 35.56 E. (See Plan)

(A) BOTAS (CEYHAN) TERMINAL.
(B) TOROS GUBRE.
(C) DELTA TERMINAL.
(D) AYGAZ TERMINAL.
(E) DORTYOL BOTAS TERMINAL.
(F) BAYRAKTAR TERMINAL.

(A) BOTAS (CEYHAN) TERMINAL

PORT LIMITS: The Botas (Ceyhan) Harbour is operated under the Authority of Botas Harbour Master's Office and the harbour area is the sea area North of a line between:

(1) 36° 36′ 00″ N., 35° 47′ 42″ E. (Yumurtalik Lighthouse).
(2) 36° 49′ 06″ N., 36° 10′ 06″ E. (mouth of brook "Deli Cay").

"Botas Terminal", "Toros Terminal", "Delta Terminal", "Dortyol Terminal" and "Aygaz Terminal" are in Botas Port Limits.

Pilotage is compulsory for mooring and unmooring by day or night according to regulations of Botas (Ceyhan) Port, which is in force within Botas Port Limit.

DOCUMENTS:

7 Crew Lists.
7 Passenger Lists.
2 Stores Lists.
2 Crew Declaration Lists.
1 Free Pratique.
Last Port Clearance.

Agent has to take the Certificates to the Port Authority at Botas.

PILOTAGE: Pilotage is compulsory for mooring and unmooring. Pilot will meet the ships 2 miles South from the end of the jetty in the anchorage zone.

It is requested that pilot ladder be of an approved pattern and securely rigged.

After the ship has berthed, the Pilot / Loading Master stays on the ship and requires a separate cabin.

ANCHORAGES: There are 2 "Tanker Anchorage Zones" near the terminals.

Tanker Anchorage Zone (I):

Point (a1) 36° 53′ 02″ N., 36° 00′ 00″ E.
" (b1) 36° 49′ 30″ N., 35° 57′ 04″ E.
" (c1) 36° 49′ 00″ N., 35° 59′ 40″ E.
" (d1) 36° 52′ 36″ N., 36° 02′ 05″ E.

Tanker Anchorage Zone (II):

Point (a2) 36° 51′ 50″ N., 36° 04′ 50″ E.
" (b2) 36° 50′ 00″ N., 36° 05′ 05″ E.
" (c2) 36° 50′ 00″ N., 36° 06′ 52″ E.
" (d2) 36° 51′ 50″ N., 36° 06′ 20″ E.

There are 2 "Prohibited Anchorage Zones".

Prohibited Anchorage Zone(I)

Point (A1) 36° 52′ 12″ N., 35° 55′ 07″ E.
" (B1) 36° 50′ 30″ N., 35° 56′ 05″ E.
" (C1) 36° 51′ 30″ N., 35° 58′ 30″ E.
" (D1) 36° 52′ 25″ N., 35° 58′ 52″ E.
" (E1) 36° 54′ 28″ N., 36° 00′ 48″ E.
" (F1) 36° 55′ 50″ N., 36° 00′ 22″ E.

Prohibited Anchorage Zone (II):

Point (A2) 36° 52′ 24″ N., 36° 07′ 48″ E.
" (B2) 36° 51′ 36″ N., 36° 06′ 30″ E.
" (C2) 36° 49′ 45″ N., 36° 07′ 00″ E.
" (D2) 36° 49′ 48″ N., 36° 10′ 00″ E.

NOTE: There are two shallow water buoys (Fl. 3 ev. 15 sec.) in position 36° 57′ 56″ N., 35° 55′ 39″ E. and 36° 52′ 12″ N., 35° 55′ 52″ E.

RESTRICTIONS: Berthing and unberthing possible at any time day or night, weather conditions permitting. However, vessels over 100,000 d.w.t. are not allowed to berth at Berth No. 4 after sunset.

MAX. SIZE: 300,000 tonnes d.w.t. at outer berths and 150,000 tonnes d.w.t. at inner berths. Maximum displacement is 150,000 tons.

If vessel over 300,00 d.w.t. but under 150,000 tons displacement, vessel could berth at Berth No. 1 during daylight hours, at the discretion of the District Manager of BOTAS and the Marine Department after taking into account LOA, draft, freeboard and weather conditions.

There is no limitation on displacement at Berth No. 2.

Also see "Berthing".

RADIO: It is essential that tankers bound for the Botas Terminal communicate with their Agent with at least 72 hrs., 48 hrs. and 24 hrs. before arrival and state ETA, cargo required, maximum loading rate, S.W.L. of derrick, manifold measurements and quantity of ballast on board, time required for deballasting and whether vessel is gas-free. Vessel should request Agent to forward the information to Botas.

VHF: Botas Terminal Shore Control on VHF Channels 16 and 22.

Arriving vessels should make contact at least 4 hours before arrival at the anchorage in order to avoid delays.

Channels 16 and 22 always watched.

Terminal uses Channels 10, 11 and 12 for cargo handling and manoeuvring. Channel 11 is for manoeuvring and Channels 10 and 12 are for jetty operations and not to be used for other purposes.

When the ship makes contact with Botas, the following information to be given to the Iraqi representative:

Ship's name, nationality, deadweight, cargo required, loading rate required, dirty, clean and permanent ballast quantity and deballasting time.

Iskenderun Radio on Channel 16 for connection with telephone numbers ashore.

RADAR: There is no port Control Radar. The approach from the SW South can be made without difficulty as the coast line provides ve good fixes.

TUGS: There are 7 tugs available to assist in berthing and unberthin 3×2,600 h.p., 2×3,200 h.p. and 2×1,200 h.p. The tugs are provide with fire fighting equipment.

For vessels of 1,000 g.r.t. up to 4,000 g.r.t., which are berthin unberthing at the jetty, it is compulsory to take at least 1 tug, 2 tugs vessels from 4,001 g.r.t. up to 50,000 g.r.t., 3 tugs for vessels fro 50,001 g.r.t. and over.

Depending on weather and having regard for safety condition additional tugs may be assigned by Botas or Port Master's Office requested by vessel.

BERTHING: Four loading berths available. Vessels berth with bo seaward (starboard side alongside at No. 1 and No. 3, and port sid alongside at No. 2 and No. 4):

Berth No.	*Max. size* d.w.t.	*Depth Alongside* (m.)	*Max. Draft* (m.)	*Max. LOA* (m.)
1 (Outer East)	300,000	23.00	21.60	355
2 (Outer West)	300,000	23.00	21.60	355
3 (Inner East)	150,000	18.00	16.70	300
4 (Inner West)	150,000	18.00	16.70	300

Freeboard:	*Maximum*	*Minimum*
Berths No. 1 and 2:	22.0 m.	2.50 m.
Berths No. 3 and 4:	20.0 m.	2.00 m.

Moorings: (All wires to have synthetic tails of 15 m. – 20 m. length).

Forward	Aft
4 Headlines	4 Sternlines
3 Breastlines	3 Breastlines
2 Springs	2 Springs
1 Towing Wire	1 Towing Wire

LOADING:

Berth No.	*Max. Loading* Rate cu.m.p.h	*Loading Arms*	*Ballast Arms*
1	15,000	4×20 in.	20 in.
2	15,000	4×20 in.	20 in.
3	8,500	4×16 in.	16 in.
4	8,500	4×16 in.	16 in.

Two grades of oil are loaded in BOTAS:

(1) Kirkuk Blend Crude Oil (API 36.95-35.98 and temperature 80°F 105°F.).

(2) Basrah Light Crude Oil (API 34.97-33.05 and temperature 80°F 105°F.).

Maximum loading rates are dependent upon availability of loadi lines on the ship.

Pilot / Loading Master is the adviser for all mooring, unmooring, carg operations and communications with shore, etc.

Derricks and Cranes: Derricks and cranes S.W.L. of 0.75 tonnes a recommended.

Loading Operations and Shore Communication: Ship's tanks a inspected by Loading Master and passed as suitable for loading.

Responsible ship's officer must certify to the Loading Master that ship's valves are closed or blanked except those required for loadi and water circulation purposes, and that these Rules and Regulatio are being and will be observed.

The Loading Master will not transmit any loading instructions to t shore until the responsible ship's officer is satisfied that the hoses a connected correctly and that all valves have been set for receiving carg

Loading rates requested by the vessel or quoted by the Terminal w be the peak or maximum rate at any time during the loading period.

The Loading Master will advise the Master of the ship as to sho communication and any signal needed for local requirements.

Ship's crew with an officer in charge will assist in all operations advised by the Loading Master. This includes lifting, connecti disconnecting, lowering of hoses and tending moorings.

Lighting: Manifold and mooring areas should be adequately lit to ena night mooring and loading operations to be carried out with safety. S area around the ship to be illuminated.

Notice of Readiness: Notice of Readiness will be received by t Loading Master. It should be tendered at the time of anchoring or Pi boarding. Lay time will commence 6 hours after receipt of Notice Readiness. Notice of Readiness to be addressed "S.O.M. Representative, Botas Terminal – Ceyhan".

Deck Watch: A responsible ship's officer shall be on watch on board a point near the ship's tanks which are receiving oil during the proce of loading and NOTICE IS HEREBY GIVEN that the Loading Mas has received instructions to stop loading immediately this rule disregarded.

Capable members of the ship's crew shall be stationed by the shi tank valves which are receiving oil during the process of loading.

All pipelines and hoses shall, while rigged for loading crude oil, directly and continuously under supervision. No crude oil shall allowed to escape or overflow.

DENSITY: 1027.

BALLAST: Max. ballast discharge rate 5,000 cu.m.p.h.

Shore ballast tanks capacity – 65,000 cu.m.

Vessels should arrive with sufficient ballast for safe handling of vess under prevailing weather conditions.

Vessels shall not discharge into the waters of the port any part of t content of their cargo, slop, or ballast tanks or bilges which is liable pollute these waters. If the vessel is sure that ballast is extremely cle it is permissible to deballast to sea, but in case of pollution, fine is hea Masters of tankers will be held responsible in cases of wrong declara of clean or dirty ballast. Deballasting during loading (simultaneou especially in Winter season is preferable for safety.

Ballast water must be declared and signed by the Master a delivered to the Terminal to this effect. Vessel's scuppers must effectively plugged and leakage or spillage of oil aboard ship must be swept or washed overboard.

It is an offence to discharge dirty ballast or pump out bilges.

MEDICAL: Master to inform Agent by cable if urgent medical assistance is required upon arrival, also indicating, if possible, seriousness of case in order that adequate steps may be taken. Hospital and doctor are available at Ceyhan 25 km., Adana 75 km., and Iskenderun 65 km., distance from Botas (Ceyhan) Terminal.

FRESH WATER: Available at jetty. Rate 25 t.p.h. Arrangements to be made through Agent.

FUEL: Not available alongside.

With 24 hours notice Anadolu A.S. – Istanbul, can supply marine fuels in Iskenderun Bay by branch of Anadolu A.S. Tel: 1515873 (7 lines). Telex: 38018-38019. Fax: 1437072.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

CONSULS: At Iskenderun.

REPAIRS: Not possible.

SURVEYORS: There are no Classification Societies at the port.

GANGWAY/DECK WATCHMEN: There is no watchmen service.

CERTIFICATES: Load Line, Ship Safety Construction, Safety Radio, Safety Equipment Certificate, Certificate of Registry, Oil Pollution Insurance, Tonnage, Machinery class and minimum manning documents.

CUSTOMS ALLOWANCES: 40 cigarettes for each crew member going ashore. On board the vessel each crew member may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.

AIRPORT: Adana Airport, served only by domestic lines with routes to Istanbul and Ankara. Airport is situated 75 km, from Botas (Ceyhan) Terminal. Twice daily service to international airport at Istanbul.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.

HOLIDAYS: New Year's Day (January 1st); Sports Day, (May 19th); Victory Day, (August 30th); National Holiday from October 28th (1200 hrs.) to October 29th (2400 hrs.); Shakear Bairam (3.5 days, movable); Kurban Bairam (4.5 days, movable).

The terminal works all year round.

POLICE/AMBULANCE/FIRE: All information given after berthing.

TELEPHONES: Cannot be connected on board.

SERVICES: Daily garbage service available to vessels alongside and at anchor.

SHORE LEAVE: Crew permitted to go ashore with shore passes and Seaman's Book.

It is forbidden to walk on jetty and in terminal area. A vehicle is obtained by Botas for the needs (transportation) of ship's personnel on jetty. The vehicle goes only to the gates.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

REGULATIONS: In addition to Harbour Regulations all ship Masters are at all times responsible for the application of all safety precautions as prescribed in the International Oil Tanker and Terminal Safety Guide.

GENERAL: The main engines of all vessels while at the berth shall be kept ready for immediate use. Deck power (steam) is to be maintained at all times and water pressure shall be maintained on the fire fighting system.

Repairs which may prevent the working of the vessel's main engines may only be undertaken in the Port with the written permission of Botas Representative.

The Master shall at all times retain on board sufficient crew to work the vessel.

No craft, other than one having on board the Pilot or Port Health Officer, may approach any vessel entering the Port and no other person may board until Free Pratique has been granted.

Whistle or siren to be available at all times.

Boarding of Vessel: The control of persons boarding vessel is the ship's responsibility. Boarding should be restricted to Botas employees on duty and to persons authorised by the Port Authorities as advised by vessel's Agent.

Stores/Provisions: Vessels may store at the anchorage or while vessel is at the berth with permission from Botas Authority.

Tanker Safety: Masters are at all times responsible for the application of all safety precautions as prescribed in the International Oil Tanker and Terminal Safety Guide.

I.O.T.T.S.G. Safety Check List: The tanker safety check list must be completed after inspection of each item prior to commencement of and during loading. The Loading Master is authorised to stop all loading operations should he consider that the safety of lives and property is endangered by the infringement of safety rules.

Signals: The following signals must be shown when vessel is in the Port.

By day: Flag "B" of the International Code of Signals. At night: 1 clear red light visible all around.

Fire Fighting Equipment: Vessels must be adequately manned for fire-fighting and vacating the berth in case of an emergency.

The following fire-fighting precautions must be taken.

(a) Fire hoses must be run out fore and aft or monitors ready for use.
(b) Fire-mains must be under pressure.
(c) 1 dry chemical extinguisher must be stationed on either side of the ship's manifold.

Fire Fighting Equipment on each Loading Berth: Equipment is provided for fire fighting on the platforms or exposure protection for the platforms, and the tankers being loaded as follows;

(a) 2 elevated foam/water monitors are mounted on each access tower on the platform capable of delivering 3,550 l.p.m. (800 g.p.m.) of water or foam solution, and has a throw of 60 m. Each monitor is remote controlled from the control room and has flexibility of full horizontal rotation and vertical reflection.
(b) 2 deck level manual water spray monitors of 450 l.p.m. and 2 foam branch pipes of a capacity of 450 l.p.m. of foam delivery used to extinguish fires on the manifolds.
(c) A number of portable dry chemical and CO_2 extinguishers are located in various locations.
(d) There are numerous foam pourers and water spray facilities located under the deck for water surface foam blanketing and fire smothering.
(e) Water curtain facilities are provided on the loading towers to prevent fire spread to and from the berths.

Action in Case of Emergency: In the event of a fire, oil spillage or other emergency on the vessel.

Emergency and Fire Signal: One or more blasts of the ship's whistle, each blast of not less than 10 seconds duration supplemented by a continuous sounding of general alarm system.

SHIPMASTER'S REPORT: December 1980.
Botas and Toros Gubre Piers:

Approach: Situated in the Gulf of Iskenderun on the N.W. corner of the Gulf. The oil pier, which is the outlet from the "Kirkuk" oilfield in Iraq, is about 5 miles below the head of the Gulf on the Northern shore with the fertiliser pier 2 miles from the Gulf head.

The approach from the S.W. (Mersin direction) or South (Suez Canal) can be made without difficulty as the coast line provides very good fixes.

The lights marked on the piers do not exist. The oil pier light has been broken for six months and the Pilots say it will probably never be fixed, also the fertiliser pier light is not connected to the supply. The oil pier is visible at 24 miles (radar) and is well lighted at night by arc lamps. Generally there are a few anchored tankers lying off.

BA. 2632 is at present the only British chart available. There is a Turkish chart 334 which is considerably better.

VHF: The Fertiliser Pier has no VHF.

Botas Oil Pier uses Channels 16, 10, 24 (Duplex).

Channel 24 is used for intercommunication between various installations for transfer of figures. It can also be used to plug into the general telephone system to talk to the Toros Fertiliser Pier.

Call "Botas Terminal", 24 hour watch. In the early hours of morning no English spoken.

Anchorage: Toros Fertiliser: 1.0 – 1.5 miles S.E. of pier. Good holding.

Botas Oil Terminal: 1.5 – 2 miles S.E. of pier.

Both open to S.W. winds.

Pilot: Botas Pilot serves both terminals. Priority given to Botas.

A total of 6 Pilots are on 24 hour call.

Pilots board in anchorage area from black hulled and brown superstructure launch of about 10 knots.

They will also travel by car to Toros Berth in about 15 minutes.

Berthing: Botas: 24 hours a day with wind speeds up to 25 knots.

Toros: Wind speeds up to 15 knots and then only if good forecast.

No berthing from 1 hour before sunset to sunrise. Unberthing throughout 24 hours.

Tugs: Botas fire fighting tugs on 24 hour stand-by, 4 available.

Kort nozzles: 3 of 2,600 h.p. and 1 of 1,600 h.p.

When berthing, push with bow line onboard. When unberthing, use ship's line which is doubled up.

Botas:	300,000 d.w.t. – 4 tugs
	150,000 d.w.t. – 3 tugs
Toros:	– 1 or 2 tugs

Pilot reports that they will operate with wind speeds up to 35 knots with large swell to take vessels off piers. Botas Terminal has priority.

Botas Berths: Nos. 1 and 2 at outer end of pier, No. 1 (East) and No. 2 (West), depths 27 m., loading rate up to 20,000 cu.m.p.h.

Nos. 3 and 4 at inner end of pier, No. 3 (East) and No. 4 (West), depths 18 – 19 m., loading rate up to 10,000 cu.m.p.h.

Weather: By observations and Pilots advice a low pressure to the North causes a large S.W. swell which coupled with a S.W. wind makes the Toros berth very dangerous.

N.W. winds up to Force 6 cause no real problems as the berth is in the shelter of the hills and the swell is not apparent. With N.W. winds on the Botas berth, the Pilot says it can cause problems due to the berth not having much shelter.

During the Summer months, often strong S.W. winds are common between 1100 hrs. to 1500 hrs. each day, which in the Pilot's opinion could make the Toros berth untenable.

Forecast: The local television gives a weather report. Rome Nato, if on time, is the only area forecast in English. Watch the barometer.

Toros Berths: Discharge only at present.

Berth head out. Bulk – Port side to on West side. Liquid – Starboard side to on East side.

Extends about 0.5 miles from shore, the berthing section lying in a 194° – 014° direction. Liquid side in position 36° 54.60′ N., 35° 59.04′ E.

Both berths designed for max. of 30,000 d.w.t.

Bulk berth has 5 tonne grab crane. Liquid side Chicksan.

Depths each berth minimum 12.5 m.

Mooring/Fenders: Toros: This can be a problem, and is dependent on length of vessel, particularly aft as the mooring dolphins do not go far enough astern.

As far as possible a 4, 2, 3 arrangement is required. With a swell, expect to part moorings, we parted six lines. Two good mooring boats from Botas Terminal used.

Fenders are 4 large flat plastic/steel faces on sprung rubber compresses. Unfortunately for a long vessel they are set too close together and need to be another 10 m. in each direction to give good coverage.

Jetty Dimensions/Gangways: Toros: Liquid side: Jetty face is 18 m. long and 9 m. above MLW.

Bulk side: 120 m. face and 7.5 m. above MLW.

For gangway purposes this means that on the bulk side the gangway can be used as long as the ship is not small.

On the liquid side a straight "B.O.T." type gangway will be necessary to land on the small pipe platform.

Discharge: Toros: Bulk side: 5 tonne capacity travelling grab crane which discharges into conveyor belt to the plant.

3 shifts of 8 hours worked, total 24 hours.

Liquid Ammonia: 6 in. Chicksan into 6 in. main line and 2 in. cooling line. Connection 6 in. 150 ASA – spool piece 12 in. – 6 in. provided. Shore labour connects/disconnects.

Sulphuric Acid: Connection on jetty of 10 in. 300 ASA.

Phosphoric Acid: Connection on jetty of 8 in. 150 ASA.

Lines South to North: Ammonia, Sulphuric Acid, Phosphoric Acid.

Ammonia is discharged into a refrigerated tank of 7,332 cu.m. equal to about 5,000 tonnes at a rate of 140 t.p.h.

The 6 in. loading line cascades into the top of the tank NOT bottom, therefore pressure problems can result.

Tank served by two Malcon compressors and usual condensers.

Sulphuric Acid tank is 3,420 cu.m.

Phosphoric Acid tanks (2) total 8,500 cu.m.

Air draft Ammonia – about 18 m. maximum.

Air draft Acids length of ship's hoses.

It is proposed to import about 10,000 tonnes Ammonia per month and 12,000 tonnes Phosphoric Acid per month, plus small quantities Sulphuric Acid.

Bulk commodities are Urea and Potassium Chloride.

Water: From metered pipe at about 10 t.p.h. Water hard but potable. Price $3.97 per tonne. Pipe on liquid platform. Ship's hoses.

Agent: Agent comes from Iskenderun about 30 miles away.

Communications: At the time of our visit to Toros Gubre there were no telephones. The nearest centre is the Botas Oil Terminal about 3 miles away.

Chandler: From Iskenderun, very good, low prices, obliging.

Local produce, vegetables, salads and fruit which is wide ranging in Spring. End of Summer, August and September not so good.

All in kg. Stores alongside, chandler provides labour.

December 1980: Vegetables $1 kg., fruit $2 kg., salad $1.50 kg., cheese (good) $3.00 kg. in tins of 25 kg.

To be paid for in cash drawn from Agent.

N.O.R.: Tendered in usual manner on anchoring, accepted at that time unless weather prevents berthing.

Customs: For Botas Terminal, reside in complex.

For Toros Terminal, Customs come from Iskenderun with Agent, which results in delay when clearing vessel outwards on completion.

Two Customs Officials reside on board – cabin required.

Money: If vessel coasting around Turkish ports money drawn at one Agency can not be deposited at another Agency in final port unless Customs clearance given from original port.

Personnel Changes: Nearest airport in Turkey is at Andana about 1 hour from Ceyhan Berths, but if waiting for ship have to stay in Iskenderun about 2 hours from airport.

Personnel travelling are advised to have Istanbul Agent's Office and home telephone numbers.

The Agent says it is easier to fly direct to Damascus about 3 hours taxi ride from Iskenderun but he cannot meet personnel and clearance at Syrian border has to be done on one's own.

Note: (December 1980): It is not expected that the plant will be in full production until mid-1981, the pier being used for material imports and production going to a wide area of S.E. Turkey and Iraq.

SHIPMASTER'S REPORT: April 1988.

Documents: Agent requires the following:

Load Line Certificate.

Safety Equipment Certificate.

Safety Construction Certificate.

Safety Radio Certificate.

Classification Certificate.

Tonnage Certificate.

Restrictions: Unberthing any time.

Berthing at Berths No. 1, 2 and 3 at any time.

Berthing at Berth No. 4 during daylight hours only.

SHIPMASTER'S REPORT: June 1989.

Tugs: Vessels over 50,000 d.w.t. require 3 tugs. A ship's messenger is required for taking tugs lines.

On departure tugs will take ship's ropes.

Berthing: Vessels normally berth with the bow to seaward. Vessel moored with 4 head/stern lines, 3 breast lines and 2 springs fore and aft. The order for sending lines away depends on the pilot, who remains onboard and acts as Loading Master.

Loading: At Berths No. 1 and 2, which are for VLCC's, the minimum loading rate is 3,750 t.p.h.

Gangway: Shore gangways are provided at all four berths.

Shore Leave: Not normally possible from 1700 hrs. – 0900 hrs.

AUTHORITY: Botas Petroleum Pipeline Corporation, P.O.Box 73, 01944 Ceyhan-Adana-Turkey. *Tel:* 6135859. *Telex:* 63838 Btas Tr. *FAX:* 6131657. *Cables:* Botas-Ceyhan-Adana. *Contact:* Esat Can, District Manager. Captain Ali Meral, Manager-Marine Department.

AGENT: See "Iskenderun".

(B) TOROS GUBRE

LOCATION: Lat. 36° 55′ 06″ N., Long. 35° 58′ 54″ E..

PORT LIMITS: Toros Gubre is in the Botas (Ceyhan) port limits.

DOCUMENTS: Similar to Botas (Ceyhan) Terminal.

PILOTAGE: Similar to Botas (Ceyhan) Terminal, but there are no Loading Master's services.

ANCHORAGE: See "Botas (Ceyhan)" port plan.

RESTRICTIONS: Berthing possible by day and unberthing possible at any time.

MAX. SIZE: There are 2 jettys in the Toros Gubre. First is the old jetty and max. size is 30,000 d.w.t. The new jetty has a max. size of 100,000 d.w.t. and is completed. Also see "Berthing".

RADIO: See "Botas (Ceyhan)" Terminal.

VHF: Always standing by on Channel 16.

RADAR: There is no port control radar.

TUGS: Botas (Ceyhan) Terminal's tugs are used.

BERTHING: There are 2 loading berths available on the old jetty.

Berth	*Max. d.w.t.* tonnes	*Max. LOA* (m.)	*Depth Alongside* (m.)	*Max. Dr* (m.)
East Side (Cargo ships and tankers)	30,000	175	12-14	10-12
West Side (For tankers only)	30,000	214	12-14	10.50

Six loading berths will be available on the new jetty. See "Plan".

BALLAST: There is one ballast tank with a capacity of 5,000 cu.m., b not always in use.

MEDICAL: See "Botas (Ceyhan)" Terminal.

DENSITY: Salinity 39 p.p.m.

FRESH WATER: Available at jetty.

FUEL: Not available.

SURVEYORS: There are no classification societies at the Terminal.

GANGWAY/DECK WATCHMAN: There are no watchman services.

CUSTOMS ALLOWANCES: Same as Botas (Ceyhan) Terminal.

AIRPORT: Adana Airport is 82 km. from Toros Gubre.

TIME: GMT plus 2 hours. (Summertime is GMT plus 3 hours.)

HOLIDAYS: Similar to Botas (Ceyhan) Terminal.

POLICE/AMBULANCE/FIRE: All information given after berthing.

TELEPHONES: It is possible to make calls via Iskenderun Radio Statio

SHORE LEAVE: See "Botas (Ceyhan)" Terminal.

IDENTIFICATION CARDS: Seaman's Book is sufficient.

REGULATIONS: All information given after berthing.

DEVELOPMENTS: See "Berthing".

GENERAL: See "Section A" – Shipmaster's Report – dated Decemb 1980.

OPERATOR: Toros Gubre ve Kimya Endustrisi A.S., P.K. 83 0192 Ceyhan-Adana, Turkey. *Tel:* 7321-5001 (4 lines). *Telex:* 63840 Tors T

AGENT: See "Iskenderun".

(C) DELTA TERMINAL: (Dortyol/Yesil).

LOCATION: Lat. 36° 51.05′ N., Long. 36° 09.18′ E.

PORT LIMITS: The Delta Terminal is operated under the authority Botas Harbour Master's Office, where the mooring/unmoorin operations are under the monopoly of Botas (Ceyhan) Terminal.

DOCUMENTS:

7 copies Crew List.

2 copies Stores List.

2 copies Crew Declaration.

1 copy Free Pratique.

Last Port Clearance.

Load Line, Safety Construction, Safety Radio, Safety Equipment a Class Certificates.

Agent has to take the last five certificates to the Harbour Master.

Clearance: For clearance on arrival, the vessel has to call at Iskende first. However, depending on the weather conditions and availability clearance team, the Agent may arrange berthing at Delta Terminal a then arrange clearance. This is why Masters are advised to contact t agent 3 – 4 hours prior to arrival in order to get the final instructions mooring.

Free Pratique is not granted by radio as it might be in some countri but after boarding of the Sanitary Officer.

PILOTAGE: Pilotage is compulsory for mooring and unmooring. Pi will be taken from Botas Terminal. It is requested that the pilot ladd be of an approved pattern and securely rigged.

ANCHORAGE: In the event of berth not being available on arrival, a after the clearance, the vessel is to anchor in the anchorage zone Botas Terminal (1 mile off Botas Terminal).

RESTRICTIONS: Mooring is carried out during daylight only. Unmoorin is carried out around the clock.

Terminal does not accept any vessel not consigned for agency to

Ets. A. Boutros and Fils,
Ataturk Blvd., Unsal Bldg., 1st Floor,
31200 Iskenderun.
Telex: 68123 sail tr/68131 sail tr/68214 imoc tr/68202 eeb tr/ 68203 bson tr.
Telephone: (90) (881) 15170.
Telefax: (90) (881) 12036.
Cables: Boutros – Iskenderun.

MAX. SIZE: The Terminal accepts vessels up to 40,000 d.w.t. or 220 LOA. For vessels over these sizes, special acceptance can be gran depending on the cargo, season, etc.

Depth is 12.6 m. at low tide.

RADIO: It is essential that tankers bound for Delta Termi communicate with the agent at least 72 hours, 48 hours and 24 hou before arrival and state:

ETA.

Quantity of cargo required.

Max. loading rate.

Number and diameter of manifolds.

S.W.L. of derricks.

Quantity of ballast on board and time required for deballasting.

Whether the vessel is gas free or not.

Max. draft after loading.

VHF: Delta Terminal and the agent monitor Channel 16. Masters sho contact the agent 3 – 4 hours prior to arrival in order to get fi instructions for mooring. Once the vessel is moored, operations chan is agreed between the vessel and terminal.

RADAR: There is a Gulf Control Radar at the entrance of the Gulf of Iskenderun, however it is not always on watch. From time to time Control may call a vessel entering or leaving the Gulf, on Channel 16, to ask some questions. The approach to or leaving the Gulf can be made without difficulty as the coast line provides very good fixes.

TUGS: Tugs are supplied by Botas Terminal at the discretion of the Master and Pilot. Generally one tug is used for mooring and unmooring. Botas Terminal has 3 tugs of 2,600 h.p. and 1 tug of 1,200 h.p.

BERTHING: There are 4 berths. Each berth consists of 3 buoys (one portside ahead and 2 aft):

Outer Berth: For clean products only.

Inner Berth: For dirty and clean products. (See "Operator's Report" dated April 1988).

Bunker Berth: For vessels up to 5,000 d.w.t., for dirty products and LPG.

LOADING:

Clean products: 2×8 in. hoses, 1,200 t.p.h.

Dirty products: 2×10 in. hoses, 2,000 t.p.h.

All ship's valves should be closed or blanked, except those required for loading and water circulation purposes.

Ship's crew with an officer in charge will assist in all operations, as advised by the terminal representative. This includes lifting, connecting, disconnecting, lowering of hoses and tending moorings.

Max. loading rate is requested by Master.

Cranes: No cranes available, vessels are required to use their own equipment.

Lighting: Manifolds should be lit to enable night loading operations to be carried out with safety. Sea area around the ship is to be illuminated.

Notice of Readiness: Notice of Readiness should be tendered at the time of arrival, it will be received by the terminal representative after mooring.

Deck Watch: A responsible ship's officer shall be on watch at the point near the ship's tanks which are receiving cargo during the process of loading, with a Loading Master from the terminal.

Capable members of the ship's crew shall be stationed by the ship's tank valves which are receiving oil, during process of loading.

BALLAST: There are no dirty ballast facilities. The vessel must arrive with clean ballast.

MEDICAL: Master to inform agent by cable or telex if urgent medical assistance is required upon arrival, indicating if possible, seriousness of case in order that adequate steps may be taken.

Hospital and doctor are available at Dortyol 10 km., Iskenderun 40 km. and Adana 100 km. distance from the terminal.

DENSITY: Salinity about 39 p.p.m.

FRESH WATER: Fresh water is not available. Tankers to be supplied with fresh water are to call at Iskenderun before or after loading. Fresh water is supplied by the state-owned port company at Iskenderun, by means of a 200 ton capacity barge. The price is U.S.$4.00 per 1,000 kg., including 'petties'. Fresh water is supplied on a round the clock basis. There is an additional charge of U.S.$50.00/100.00 for fresh water supplied between midnight and daybreak. A minimum charge is made for 20 tons.

Arrangements to be made through Agent.

CONSULS: Consuls for Norway, Spain, Germany, U.K., France, Netherlands, Greece and Italy are located in Iskenderun.

REPAIRS: Most radar/radio and engine repairs can be carried out.

SURVEYORS:

SGS. Tel: (90) (881) 11072.
Marine Survey Bureau. Tel: (90) (881) 18729 – 19751.
Atlantic. Tel: (90) (881) 21479.

GANGWAY/DECK WATCHMEN: There is no watchmen service.

CUSTOMS ALLOWANCES: 40 cigarettes for each crew member going ashore. On board the vessel each crew member may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.

AIRPORT: Adana Airport, served only by domestic lines, with routes to Istanbul and Ankara. Airport is situated 100 km. from Delta Terminal. Twice daily services to Istanbul and Ankara for international connections.

TIME: LMT is GMT plus 2 hours in Winter time and GMT plus 3 hours in Summer time.

HOLIDAYS: New Year's Day, 31st December (noon) and 1st January; Commemoration of Ataturk & Children's Holiday, 23rd April; Youth and Sports Day, 19th May; Seker Bayrami (3.5 days), changeable – after Ramadan feast; Kurban Bayrami (4.5 days), changeable – Festival of Sacrifice; Victory Day, 30th August; Independence Day, 28th October (noon) and 29th October.

POLICE/AMBULANCE: Can be contacted through the local agent (Boutros).

TELEPHONES: Cannot be connected on board.

SHORE LEAVE: Crew permitted to go ashore with shore passes which can be arranged through the local agent.

IDENTIFICATION CARDS: Seaman's Book is sufficient for shore leave. Embarking or disembarking crew members must hold a valid Passport (and depending on citizenship, a visa).

SAFETY: *Tanker Safety:* Masters are at all times responsible for the application of all safety precautions. One boat of the terminal is at all times alongside the vessel for safety.

Safety Check List: The tanker Safety Check List must be completed after inspection of each item, prior to commencement of loading. The berth operator is authorised to stop all loading operations should he consider safety and property to be endangered.

Signals: The following signals must be shown when vessel is in port.

By day: Flag "B" of the International Code of Signals. At night: 1 clear red light visible all around.

Fire Fighting Equipment: Vessels must be adequately manned for fire fighting and vacating the berth in case of emergency.

The following fire-fighting precautions must be taken.

(a) Fire hoses must be run out fore and aft or monitors be ready.
(b) Fire mains must be under pressure.
(c) 1 dry chemical extinguisher must be stationed on either side of the ship's manifold.

Fire Fighting Equipment at Buoys: One boat available alongside the vessel for fire-fighting when vessel is loading.

Action in Case of Emergency: In the event of a fire, oil spillage or other emergency on the vessel.

The emergency and fire signal is: 1 or more blasts of the ship's whistle, each blast of not less than 10 seconds duration, supplemented by a continuous sounding of the general alarm system.

GENERAL: The main engines of all vessels while tied up to the buoys shall be ready for immediate use. Deck power (steam) is to be maintained on deck at all times and water pressure shall be maintained on the fire fighting system.

The Master shall at all times retain on board sufficient crew to work the vessel.

No craft, other than one having on board the pilot or Port Health Officer, may approach any vessel entering the port and no other person until Free Pratique has been granted.

Whistle or siren to be available at all times.

Stores/Provisions: Vessels may store at the anchorage or while they are at berth with permission of the terminal and the Customs authorities.

OPERATOR'S REPORT: April 1988.

Location: Lat. 36° 50.65′ N., Long. 36° 08.71′ E.

Documents: Vessels are to call at Iskenderun for Customs Clearance, after which they will sail to the Terminal.

Pilotage: Compulsory. Pilot boards off Botas Oil Terminal.

Restrictions: Normally mooring is not undertaken after sunset. However, without any commitment from the owners of the Terminal, mooring after sunset is left entirely at the discretion of the pilot who might decide to moor the tanker after sunset, weather permitting.

Unmooring is carried out day and night.

Max. Size: Maximum draft 12.6 m.

Radio: Masters to advise agent of vessel's ETA 72 hours, 48 hours and 24 hours prior to arrival.

Cable to include the following information:

ETA Iskenderun.
Quantity of cargo required.
Max. loading rate.
Number and diameter of manifolds.
Quantity of ballast on board and time required for deballasting.
Whether vessel is gas-free or not.

Berthing: Vessel will moor at sea buoys. One buoy is located on the port bow and two buoys are located aft.

Loading: 2×10 in. hoses are available for dirty products and 2×8 in. hoses are available for clean products. Hose connection is amidships.

Loading is carried out at an average rate of 1,700 t.p.h. – 1,800 t.p.h. for dirty products and 1,200 t.p.h. – 1,500 t.p.h. for clean products.

Ballast: There are no facilities for receiving ballast. Vessels must arrive with clean ballast.

Fines for pollution are approximately U.S.$50,000.

Fresh Water: Not available locally.

Tankers requiring fresh water should call at Iskenderun before or after loading. Fresh water is supplied by the state owned port company at Iskenderun by a 200 ton capacity barge. Cost of fresh water is U.S.$4.0 per 1,000 kg. A charge of U.S.$50 – U.S.$100 is to be paid for supply between midnight and daybreak. Minimum supply 20 tons.

Fuel: Available.

General: Stores: A ship chandler is available for supply stores.

Agent: ETS. A. Boutros and Fils, Ataturk Bulvari, Unsal Han Kat 1, 31200 Iskenderun, Turkey; P.O.Box 11, 32101 Iskenderun. Telephone: (90) (881) 15170/74 (5 lines), (90) (881) 13684/85. Telex: 68123 Sail Tr/68131 Sail Tr. Fax: (90) (881) 12036. Cables: Boutros – Iskenderun. After Hours Contacts: Mr. Ferit Uyar, telephone (90) (881) 12893.Mr. Taner Carpar, telephone (90) (881) 13846.

Office hours during which Master can contact Agent on VHF Channel 16: 0830 – 1230 and 1430 – 1830 every day (including Saturday/Sunday/holidays during which one person on duty).

Telephone contact possible through Iskenderun Radio, VHF Channel 16.

(D) AYGAZ TERMINAL

PORT LIMITS: Aygaz Terminal is operated under the Authority of Botas Harbour Master's Office, where the mooring/unmooring operations are under the monopoly of Botas Terminal.

LOCATION: Lat. 36° 45′ 05″ N., Long. 36° 10′ 10″ E.

DOCUMENTS:

7 copies Crew List.
2 copies Stores List.
2 copies Crew Declaration.
1 copy Free Pratique.
Last Port Clearance.
Load Line, Safety Construction, Safety Radio, Safety Equipment and Class Certificates.

PILOTAGE: See "Delta Terminal".

ANCHORAGE: See "Delta Terminal".

RESTRICTIONS: See "Delta Terminal".

MAX. SIZE: 80,000 d.w.t. Depth at LW 16.0 m.

RADIO: See "Delta Terminal".

VHF: See "Delta Terminal".

RADAR: See "Delta Terminal".

TUGS: Tugs are supplied by Botas Terminal at the discretion of the Master and Pilot. Tugs are used for berthing, but are not necessary for sailing.

BERTHING: There are 2 berths. Each berth consists of 2 buoys aft. Ships use both anchors from their bow.
Outer Berth: Max. size 80,000 d.w.t. for LPG.
Inner Berth: Max. size 8,000 d.w.t. for LPG.
MEDICAL: See "Delta Terminal".
DENSITY: 1027.
FRESH WATER: Not available. See "Delta Terminal".

(E) DORTYOL BOTAS TERMINAL

LOCATION: Lat. 36° 51′ 42″ N., Long. 36° 08′ 28″ E.
PORT LIMITS: In the Botas (Ceyhan) Port limits.
DOCUMENTS: Same as Botas Terminal.
PILOTAGE: Similar to Botas Terminal.
ANCHORAGE: See "Botas (Ceyhan)" Port plan.
RESTRICTIONS: None.
MAX. SIZE: Max. size 60,000 d.w.t. tons tanker.
RADIO: See "Botas (Ceyhan) Terminal".
VHF: Terminal stands by on Channels 16 and 22.
RADAR: There is no radar control.
TUGS: Botas (Ceyhan) Terminal's tugs are used.
BERTHING: There is one berth for tankers. Vessels moor with anchors forward and lines aft.
BALLAST: Capacity 15,000 tonnes maximum.
FRESH WATER: Available at jetty.
FUEL: Not available. For more details see "Botas (Ceyhan) Terminal".

(F) BAYRAKTAR TERMINAL

The Terminal is under construction and is located at Lat. 36° 54′ 24″ N., Long. 35° 58′ 18″ E., in the Botas (Ceyhan) Port limits.

CANAKKALE: 40.08 N. 26.24 E.

DOCUMENTS: Vessels in transit through the Dardanelles must stop at Canakkale and produce following documents to Boarding Officer.
Certificate of Registry.
Derat Certificate.
Crew List.
Name of Agent in Istanbul.
Vessels proceeding to a Turkish port will require in addition:
4 Crew Lists.
2 Personal Effects Lists.
2 Currency Lists.
2 Stores Lists.
PILOTAGE: Not compulsory for vessels proceeding to Istanbul. Compulsory for vessels over 1,500 g.r.t. proceeding to Canakkale. Vessels requiring a Pilot use International Code signals, or signal "G" by light or whistle. No advance notice required. Telegraphic address of pilot station, Kilavuzluk Canakkale, via radio station TAT. Pilot boards off Khepez lighthouse, where vessel should slow down but no need to anchor. In bad weather pilot boat will anchor in Gulf of Kilya.
Also see "Shipmaster's Report".
ANCHORAGES: Vessels may anchor in depths of 12 to 16 fathoms.
MAX. SIZE: Vessels of any size may navigate Canakkale Strait.
HEALTH: All vessels bound for a Turkish port must stop for Sanitary Clearance at Canakkale. Any suspected disease on board must be declared. Sick crew members may be landed for hospitalisation.
Also see "Shipmaster's Report".
RADIO: Radio station TAT situated at local Post Office.
TUGS: One tug available, belonging to pilot station. Ship's tow lines always used.
BERTHING: Agents require at least 24 hours' notice to arrange berthing at Canakkale Pier. Vessel may be required to shift anchorage to give place to Turkish passenger vessels which have priority.
STEVEDORES: Arranged by Agent on basis of Master's ETA.
MEDICAL: 12 hours' notice required to arrange medical assistance. Hospital facilities available.
DENSITY: Salt water. No tide.
FRESH WATER: Only available from the pier, rate approx. 10 t.p.h.
FUEL: Marine grades not available.
CONSULS: Italy, tel. 1008.
REPAIRS: Minor repairs can be effected.
GANGWAY/DECK WATCHMEN: Customs guard compulsory for vessels at the pier.
OPENING/CLOSING HATCHES: May be operated by crew or stevedores according to Charter Party.
CUSTOMS ALLOWANCES: Crew allowed to retain only quantities for personal consumption.
REPATRIATION: Can be arranged if visa requirements are satisfactory.
AIRPORT: Situated 2 km. from Canakkale, internal services only.
TIME: GMT plus 3 hours.
HOLIDAYS: Cargo work can be arranged on all holidays by agreement.
POLICE/FIRE/AMBULANCE: Police Tel. 1181; Fire 00; Ambulance 1098.
SHORE LEAVE: Allowed at all times.
IDENTIFICATION CARDS: Required for crew members going ashore.
GARBAGE DISPOSAL: Not available.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None. Local facilities include internationa telephone, football, dances, shops and postage facilities.
CURRENCY: Turkish Lira (TL).
DEVELOPMENTS: New installations and berths under construction.

SHIPMASTER'S REPORT: *Dardanelles and Bosphorus:* A pilot statio has been established at Mehmetcik Point (Cape Hellas); if the weathe is too bad to embark the Pilot here, vessels should proceed t Canakkale. If a Pilot is required for both Dardanelles and Bosphorus give 24 hours' notice through Istanbul Agent. Same Pilot remains o board for full transit, Sea of Marmara included, and this applies for bo North and Southbound traffic. Pilots at Dardanelles and Bosphorus wo VHF Channel 16.
Sanitary Control: White launch. Officers do not board but require Ch or 2nd Officer to go down into boat. Canakkale required Ship's Regist Derat, Crew List and Quarantine Declaration of Health. It is also requir to fill in a form giving details of ship, cargo, last port, number of cre and passengers, etc., also name of ship's Agent in Turkey.

AUTHORITY: Canakkale Liman Baskanligi. *Tel:* 196-11123/2117 *Telex:* 58209.
AGENT: See "Istanbul".

DERINCE: 40.45 N. 29.50 E. (See Plan

PORT LIMITS: A vessel that has arrived in Izmit Anchorage is considered an "arrived ship".
DOCUMENTS:
Quarantine:
Declaration of Health.
Valid Derat Certificate.
International Vaccination Certificates.
Free Pratique Received from Canakkale or Buyukdere.
Customs:
Crew Declaration.
Ship's Stores List.
Cargo Manifest.
Customs Clearance from last port.
Immigration:
Crew List.
Passenger List.
Shore leave passes arranged by Agent. Passenger embarkation disembarkation not possible.
PILOTAGE: Compulsory. Pilot service carried out in harbour by stevedore administration, which is under the monopoly of Turkish State Railways. One pilot boat of 2×385 h.p. is available.
ANCHORAGES: Forbidden near the port. Waiting anchorage is at Izmit, 4 miles East of Derince. It is compulsory for vessels with explosives to anchor in Yarimca Anchorage.
MAX. SIZE: Max. draft 12.0 m.
VHF: Pilot on Channel 16.
TUGS: Compulsory for vessels over 500 g.r.t.

500 g.r.t. – 5,000 g.r.t.	One tug.
5,000 g.r.t. – 25,000 g.r.t.	Two tugs.
25,000 g.r.t. – 50,000 g.r.t.	Three tugs.
Over 50,000 g.r.t.	Four tugs.

4 tugs (up to 2,500 h.p.) are available. Mooring boat arranged by Pilot
BERTHING:

Berth No.	*Length* (m.)	*Depth at LW* (m.)	*Remarks*
2	82	7.0	
3 & 4 *	400	15.0	All
6	220	12.0	General Cargo
7	160	10.0	Berths
8	120	6.0	

* The construction of the berth, which will enable the berthing of Panamax type vessels, is being continued. The construction is nearing completion, and 90% of the construction has already been completed.
Storage: The quay is rail connected, and provided with 10,500 sq.m. of closed storage, and 122,120 sq.m. of open storage. Also, 90% of the new silo construction of 95,000 tons capacity has been completed.
Equipment: For handling of grain, one 1,200 ton/hour pneumatic loader for loading, and 2×600 ton/hour capacity pneumatic unloaders for unloading, together with 2×1,200 ton/hour capacity conveyors will be in place, and they will have connection with the quay.
Also available are 32 forklifts, 2 trailers of 40 tons capacity, 2 tugmasters, 1 loader and 5 towing tractors.
Ro/Ro Facilities: Available (Berth No. 6).
Ore and Bulk Cargo Facilities: Bulk cargoes loaded and discharged by grabs.
Principal Imports and Exports: Imports: Aluminium, logs, rubber, scrap paper, steel and iron products, timber and woodpulp.
Exports: Magnesite, steel and iron products and general cargo.
CRANES: 12 shore cranes of 3 tons to 35 tons capacity, one special mobile container crane of 40 tons capacity, 12 mobile cranes of 5 tons to 25 tons capacity and 3 crawler mobile cranes of 6 tons to 30 tons capacity.
STEVEDORES: *Working Hours:* Service is provided to vessels 24 hours a day. First shift 0800 hrs. – 1630 hrs., second shift 1630 hrs. – 0030 hrs. and third shift 0030 hrs. – 0800 hrs.
Working Rates: General cargo discharging rate 100 to 125 tons/gang shift and iron products, 200 to 250 tons/gang/shift.
MEDICAL: Facilities available.

FRESH WATER: Available at all berths.
FUEL: Available from private suppliers by road tanker, arranged through ship's Agent.
REPAIRS: Most deck and engine repairs can be carried out.
SURVEYORS: Available from Istanbul through Agent.
OPENING/CLOSING HATCHES: Stevedores or ship's crew, whichever is to the vessel's advantage.
CERTIFICATES:
Safety Construction.
Safety Equipment.
Safety Radio.
Load Line.
Tonnage.
CUSTOMS ALLOWANCES: 200 cigarettes and one bottle of spirits per week per crew member.
REPATRIATION: Crew changes and repatriation can be carried out.
AIRPORT: 130 km. to Istanbul International Airport.
TIME: GMT plus 3 hours.
POLICE/AMBULANCE/FIRE: Emergency services available in the port.
SERVICES: Arranged by Agent, from Istanbul.
SHORE LEAVE: No restrictions. Also see "Documents".
HOLIDAYS: New Year's Day (commencing 1200 hrs. December 31st); National Sovereignty Day (April 23rd); Sports Day (May 19th); Victory Day (August 30th); October 29th; Sheker Bayram (3 days, movable), Kurban Bayram (4 days, movable). However, the port is not working the first days of Sheker Bayram and Kurban Bayram, during all other days, work carried out.
GENERAL: *Security:* Port Security personnel ensure the security of the port 24 hours a day.
Weighing Facilities: There are 2 weighbridges up to 100 tons capacity (one for wagons and the other for trucks).
Reception Facilities: An oily water separator system is available at the capacity of 4,500 cu.m./year.
Prevailing Winds: South-West and South.
DEVELOPMENTS: There are plans for container facilities (980 m. × 15.0 m. depth), a new Ro/Ro ramp and a slipway.
AUTHORITY: General Directorate of Turkish State Railways (TCDD), Derince, Turkey. *Tel:* (90-262) 2231540. *FAX:* (90-262) 2234278. *Contact:* Gurol Toykan, Port Manager. Haydar Dogan, Harbour Master (Tel: 183754).

DILISKELESI: 40.46 N. 29.32 E.

(A) ALEMDAR HOLDINGS
(B) COLAKOGLU METALURGI
(C) SOLVENTAS

(A) ALEMDAR HOLDINGS PIER

LOCATION: Lat. 40° 46′ 15″ N., Long. 29° 32′ 15″ E.
PILOTAGE: Pilotage is compulsory in the Gulf of Izmit from Darica to Diliskelesi and vice versa and also for berthing and unberthing.
BERTHING: *Jetty No. 1:* Length 210 m. Depth varies from 5.5 m – 14.0 m. *Jetty No. 2:* Length 200 m. Depth varies from 7.8 m. – 12.0 m. (Jetty No. 2 still under construction).

Jetties are used for loading sinter magnesite and for loading and unloading other dry cargoes and discharging chemicals.

No shore cranes available on the jetties. Magnesite is loaded by conveyor system at a rate of 2,000 tons per day.

The installation works around the clock.
TANKERS: Discharging rate for tankers is 200 t.p.h. – 250 t.p.h. There are storage tanks for tallow and vegetable oil.
FRESH WATER: Not available at the jetty. Fresh water can be supplied by barge from Izmit.
FUEL: Not available.
CUSTOMS: The port is under control of Gebze and Derince Customs Authorities.
AUTHORITY: Alemdar Holdings, Istanbul, Turkey.

(B) COLAKOGLU METALURGI PIER

LOCATION: Approximate location of the pier is Lat. 40° 46′ 05″ N., Long. 29° 32′ 10″ E.
PILOTAGE: Pilotage is compulsory in the Gulf of Izmit from Darica to Diliskelesi and vice versa and also for berthing and unberthing.
BERTHING: Length of Pier No. 1 is 119 m. and depth 11.0 m. Length of Pier No. 2 is 100 m. and depth varies between 7.40 m. and 9.0 m. No shore crane available at either pier. Imports are steel and iron scrap and sometimes ferro manganese and ferro silicone. Exports are iron and steel products. Discharging rate of scrap iron and steel products is 3,000 – 4,000 tons a day. Installation works around the clock.
FRESH WATER: Available.
FUEL: Not available.
CUSTOMS: The port is under the control of Izmit and Derince Customs Authorities.
AUTHORITY: Colakoglu Metalurgi AS. *Telex:* 34125 Cmg Tr.

(C) SOLVENTAS

LOCATION: Approximate location of the pier is Lat. 40° 41′ 30″ N., Long. 29° 32′ 12″ E.
PILOTAGE: Pilotage is compulsory in the Gulf of Izmit from Darica to Diliskelesi and vice versa and also for berthing and unberthing.
BERTHING: Length of pier is 39 m. and depth 8.5 m. Capacity of installation is approximately 200 t.p.h. – 250 t.p.h.
FRESH WATER: Not available.
FUEL: Not available.
CUSTOMS: The port is under control of Derince and Izmit Customs Authorities.
AUTHORITY: Solvent A.S., Gebze.

EDINCIK: 40.21 N. 27.51 E.

LOCATION: In the South of Erdek and on the West coast of Kapidag Peninsula. See B.A. Chart No. 884.
PILOTAGE: Pilotage compulsory. Pilot comes from Bandirma.
MAX. SIZE: 5,000 d.w.t.
BERTHING: This is a colemanite loading berth of Etibank, where loading is effected by conveyor.

Five dolphins exist in front of the conveyor house and in enough deep water for mooring and shifting of vessels. As there is little movement of the conveyor, vessels have to shift in order to load bulk cargo in all hatches.
DENSITY: 1025.
FRESH WATER: Available.
TIME: GMT plus 3 hours.
GENERAL: Formalities with the Harbour Master are carried out in Erdek but all others in Bandirma. All services to be supplied from Bandirma.
AUTHORITY: Erdek Liman Baskanligi, Erdek, Turkey. *Tel:* 90-1989-1044. *Telex:* 58-214. *Contact:* Nezih Onal.

EREGLI (Karadeniz Eregli), including Usunkum: 41.18 N. 31.27 E. **(See Plan)**

PORT LIMITS: Line joining Lat. 41° 17′ 23″ N., Long. 31° 23′ 43″ E. and Lat. 41° 14′ 46″ N., Long. 31° 23′ 43″ E.
DOCUMENTS:
5 copies Crew List.
5 copies Passenger List.
3 copies Provisions List.
3 copies Bonded Stores List.
5 copies Crew Effects List.
3 copies Cargo Manifest.
3 copies Bills of Lading.
1 copy Health Declaration.
PILOTAGE: Pilotage is compulsory and available day and night. Vessels bound for the old port of Eregli should send their ETA to their local Agent. Vessels bound for Usunkum should send their ETA to the factory in accordance with the Charter Party terms.

Pilot will board vessels at a reasonable distance off the North Breakwater (red light). The pilot boat has a steel hull and is painted grey. Pilot may be contacted on VHF Channel 16.
ANCHORAGE: Anchorage for the deep draft vessels is about 0.5 miles – 1 mile West of the North Breakwater (red light). However, smaller vessels may anchor 0.5 miles West of the South Breakwater (green light). The bottom is muddy and sandy.
RESTRICTIONS: Vessels over 500 g.r.t. have to take a pilot and vessels over 1,000 g.r.t. have to use tugs. Number of tugs required increases in accordance with the vessel's gross registered tonnage.

Vessels of large deadweight are not permitted to berth at night.
MAX. SIZE: *Eregli:* Port maximum draft is 28 ft.
Usunkum: Oil and Coal Discharge Berth: Maximum LOA 240 m., maximum beam 36 m., maximum draft 36 ft.

Cargo Berth: Maximum LOA 240 m., maximum beam 32 m., maximum draft 35 ft.
HEALTH: Pratique is granted after the Quarantine Officer has visited the vessel on arrival.
RADIO: Eregli Radio (TAD 5). The Marine Operator is on VHF Channel 16 throughout 24 hours.
VHF: The calling channel for all stations is Channel 16.
RADAR: Not available.
TUGS: 2×2,650 h.p. and 2×800 h.p. Tugs normally join the vessel outside the harbour and tug's lines are always used.
BERTHING: *Eregli Old Harbour:* Length of quay 400 m. Depth alongside 28 ft. There is also a small wharf of 80 m. in length and 14 ft. depth.
Usunkum: Ore and Coaling Unloading Dock: Length of berth 408 m. Depth alongside 36 ft.

Cargo Dock: Length of wharf 280 m. Depth alongside 35 ft.
CRANES: *Eregli Old Harbour:* Heavy lift derrick with a capacity of 147 tonnes and a fixed coal loading conveyor with a rate of 220 tonnes per hour.
Usunkum Cargo Dock: 1×25 tonnes and 3×15 tonnes capacity shore cranes.

BULK CARGO FACILITIES: In Usunkum Harbour there are 3 grabs (1×10 tonnes, 2×15 tonnes) for unloading ore and coal. Maximum air draft 14 m.
STEVEDORES: *Eregli Old Harbour:* Working hours are from 0800 hrs. – 1600 hrs. for coal loading and from 0800 hrs. – 2200 hrs. for loading and discharging of general cargo.
Usunkum: Work is carried out continuously throughout 24 hours.
MEDICAL: All types of medical assistance are available.
TANKERS: No facilities available.
DENSITY: Average density 1012 – 1014.
FRESH WATER: Fresh water is available at Usunkum at a rate of approximately 15 t.p.h.
FUEL: Diesel oil can be supplied by tank trucks.
CONSULS: None locally.
REPAIRS: Minor repairs can be carried out.
DRY DOCKS: None available.
SURVEYORS: Available locally.
GANGWAY/DECK WATCHMEN: Usually ship's crew, ship's gangway used.
OPENING/CLOSING HATCHES: Normally carried out by ship's crew.
CERTIFICATES: Cargo Gear Certificates required.
CUSTOMS ALLOWANCES: Each crew member is permitted 200 cigarettes and 1 bottle of spirit.
REPATRIATION: Crew changes and repatriation are possible.
AIRPORT: The nearest airports are at Istanbul and Ankara, about 300 km. by road.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summer.
HOLIDAYS: Work is carried out on all holidays at Usunkum Harbour.
TELEPHONES: There are no facilities for placing telephones on board vessels.
SERVICES: None available locally.
BANKS: There are no foreign banks in the city.
SHORE LEAVE: No restrictions.
DEVELOPMENTS: The following are planned:
1×150,000 d.w.t. bulk berth.
Bulk storage area.
AUTHORITY: Karadeniz Eregli Liman Baskanligi. *Tel:* (0372) 3161007. *Telex:* 48541 KRDL. *FAX:* (0372) 3231169. *Contact:* Turgut Ege, Harbour Master.

FERCOM TERMINAL: 40.46 N. 29.33 E.

LOCATION: The terminal is located in the Gulf of Izmit in position Lat. 40° 46′ 24″N., Long. 29° 33′ 03″ E.
The terminal is called Fercom or Upet and is for the import of gasoline.
PILOTAGE: Compulsory for berthing and through the Dardanelles.
MAX. SIZE:
Outer Berth: Max. LOA 210 m. Max. draft 16.0 m.
Inner Berth: Max. LOA 100 m. Max. draft 10.0 m.
BERTHING: The jetty is parallel to the shore and has 3 dolphins.

FINIKE: 36.16 N. 30.13 E.

RADIO: Finike Radio. Call sign TAC3.
BERTHING: Jetty 80 m. long, depths alongside 4.5 m. – 5.5 m. Vessels of more than 3,000 g.r.t. cannot berth alongside, but anchor outside the port.
CARGO HANDLING: Vessels at anchor are worked by 4 lighters towed by a motor boat. Only 200 tonnes of cargo worked per day by lighters.
At the jetty, 300 – 500 tonnes of cargo are handled per day.
AIRPORT: At Antalya (280 km.).
GENERAL: Port is dangerous in Winter.
OFFICIALS: Halil Tarhan, Port Master.

GEMLIK: 40.25 N. 29.07 E. (See Plan)

LOCATION: The port (Gemport) is located on the Southern shore of the Gulf of Gemlik, between the "Tugsas" and "BP Petroleum" establishments.
The new and main general cargo port in the gulf is connected to the hinterland by high standard roads.
PORT LIMITS: East of Long. 29° 05.8′, at entrance of the bay (See "Plan").
DOCUMENTS: Basic Customs documents required. Master of the vessel should sign an Oil Pollution Prevention Declaration which is issued by local Government Office.
PILOTAGE: Compulsory. Provided by "Turkish Maritime Organisation, Gemlik Pilot Association".
24 hours and 4 hours notice should be given to the Pilot through ship's Agent and VHF Channels 16 and 14.
ANCHORAGE: If required, anchorage can be advised by Pilot.
MAX. SIZE: Vessels up to 180 m. in length with draft of 12.0 m. have used the facilities.
RESTRICTIONS: Variable strong winds and currents can effect berthin operation for a short period.
HEALTH: All vessels are inspected at the Dardanelles or Bosphoru and should have the Sanitary Clearance.
RADIO: Port has no radio equipment. ETA messages are to be route via Istanbul Radio (call sign "TAH"). When at anchorage or berthed pier, telephone calls are possible through Bandirma Coastal Rad Station by VHF Channel 16.
TUGS: Available to assist berthing.
2 tugs of 800 h.p. and 1,500 h.p. and a pilot boat are availab throughout 24 hours. Tel: (224) 5136164.
BERTHING:

Berth	*Length* (m.)	*Depth* (m.)	*Remarks*
No. 1	185.5	12.0	General cargo/Containers.
No. 2	140	12.0 – 9.0	General cargo/Containers.
No. 3	110	7.0	General cargo/Ro-Ro.

CRANES: One mobile harbour crane of 40 tons capacity for contain handling.
One mobile harbour crane of 10 tons capacity for general carg handling.
Mobile cranes up to 300 tons capacity available for hire.
BULK CARGO FACILITIES: 3 mechanical rehandling grabs of 4 cu. capacity each and one motor clamshell grap of 5 cu.m. are availab Handling rate up to 250 t.p.h.
SPECIALISED CARGO HANDLING FACILITIES: The port specialise in container and banana handling.
1×40 ton capacity mobile harbour crane, 1×40 ton superstack toplifter for 4 high full container stacking. 1×30 ton capacity forklift wi 2 high stacking capacity.
2 banana conveyors with 6,000 boxes/hr. discharging capacity.
64×380 V. reefer plugs for reefer containers.
1 ramp for Ro-Ro cargoes (width 20 m., height 1.40 m.).
BRIDGES: None.
STEVEDORES: The recognised working hours of port are 24 hours.
1st shift: 0800 hrs. – 1600 hrs.
2nd shift: 1600 hrs. – 2400 hrs.
3rd shift: 0000 hrs. – 0800 hrs.
MEDICAL: One state hospital, private doctor and dental facilities a available for medical treatment and minor surgical operations in Gemli
TANKERS: No tanker facilities.
DENSITY: 1018 – 1019.
FRESH WATER: Fresh water delivered to vessel at wharves by pipelin Hoses should be supplied by vessel.
FUEL: Supplied by private firms with trucks by prior arrangeme through vessel's Agent.
FIRE PRECAUTIONS: Smoking is strictly prohibited in warehouse on apron of wharves and on vessels during handling of dangerou hazardous, or inflammable cargoes and around port's refin establishment.
DRY DOCKS/REPAIRS: No major facilities at the port. Minor st repairs and container repairs can be effected.
SURVEYORS: Marine surveyors representing Lloyd's, A.B.S. N Turkish Lloyd and Avrasia can be arranged.
DECK WATCHMEN: No requirement for watchmen.
HATCHES: Opening/closing is normally carried out by crew.
CUSTOMS ALLOWANCES: Usual allowances.
REPATRIATION: Can be arranged by vessel's Agent with necessa documents.
AIRPORT: Bursa Airport is 36 km. from Gemport. International flig could be organised via Istanbul or Ankara.
TIME: In Summer, GMT plus 3 hours. In Winter, GMT plus 2 hours.
POLICE/AMBULANCE/FIRE: Police Tel: 055. Fire Tel: 110. Ambulan Tel: 112.
TELEPHONES: Port can arrange placing of telephones on board p tariff charges. International telephone boxes are available in Gempo
SERVICES: Arranged by ship's Agent.
BANKS: Local Turkish Banks in Gemlik.
Turkiye Is Bank. Tel: 224-5132455.
T.C.Ziraat Bank. Tel: 224-5130090, 5130079.
Turkiye Vakif Bank. Tel: 224-5131242.
STORING: Vessels load and discharge from/to trucks. Trucks c proceed alongside the berth (there is no obstruction on pier). Forkl can be used on jetty only for handling cargoes.
SHIP SUPPLY SERVICE: Arranged through Agent.
SHORE LEAVE: Possible after completing Customs and Immigra formalities.
IDENTIFICATION CARDS: Seamen's Book is sufficient.
GARBAGE DISPOSAL: Garbage bags should be provided on board ship's Agent. Full and secured bags are collected when required by Port Organisation.
WASTE OIL DISPOSAL: Gemport has a 4,500 cu.m./year capacity oily water, and household waste separator. Oily waters are collect Port Organisation per tariff charges.
CURRENCY: Turkish Lira (TL).
REGULATIONS: No unusual regulations.
DELAYS: No delays for berthing.
DEVELOPMENTS: The port administration is planning to increase ca handling facilities by purchasing new shore cranes and a toplifter sophisticated computer programme will be operational by the en 1994 for controlling all sequences of container movements and p operation.

SHIPMASTER'S REPORT: July 1980.
Vessel: L.P.G. Carrier – 32,000 g.r.t. Vessel discharged ammonia
Formalities: Formalities were dealt with quickly. Bonded stores sealed and remain sealed until clearing outward from last Turkish p Application may be made to open under Customs control and th applications were granted.

Travelling manifests of cargo and ship's stores are made up and accompany the vessel from port to port.

Papers required:
2 Stores Lists.
6 Cargo Manifests.
6 Crew Lists.
2 Vaccination Lists.
1 List of Monies in ship's safe.
2 Lists of Ports of Call.
2 Health Declarations
(including clearance from Canakkale).
2 Crew Declarations.
3 Crew Currency Declarations.
2 Ships Particulars.

Approaches: Chart BA. 1005.

The inset on Chart BA. 844 does not quite cover the area in which the berth is situated. (Position of Ammonia section of quay Lat. 40° 25′ N., Long. 29° 06.5′ E.).

The approach itself presents no difficulty since good fixes are available both by radar and visually. Similarly, although care is needed, an approach may be made in poor visibility with complete confidence.

Fishing vessels, inter-island ferries and local trading craft must be expected through the island passages and fishing vessels will be met within Gemlik Liman. Some of these craft are very small although sea conditions are invariably smooth and they should show up well on the radar. Not all carry lights.

An anchorage position as near as 4 cables from the berth may be used although this should be chosen to Eastwards of the berth to keep the departure path clear for any vessels leaving.

The Pilot obtained for the Dardanelles passage, who will leave here however short a stay, will be able to give advice on choosing a suitable anchorage, should this be necessary.

Pilotage: The Pilot may be summoned by whistle and will board from a small, open fishing craft. Gangway or pilot ladder must be lowered to the water's edge.

No night time berthing. Unberthing may be carried out at night at the Master's discretion and presents no difficulty. The starboard anchor may be used for berthing (not on this call) and is used to heave the vessel off when leaving.

Unberthing is a long manoeuvre; 2 forward back-springs are lead as far astern as possible, the vessel hove astern about 30 m. (to ensure that the bow does not fall inside the line of the quay and foul the 'bridge' to the forward mooring dolphin), everything let go aft, hard to port and dead slow ahead on the engine until the vessel is at an angle of 45°. The vessel is then backed out, after which the Pilot leaves.

VHF: Not available.

Tugs: None available.

Berthing: Vessel always berths port side alongside.

Repairs: No facilities.

Surveyors: With sufficient notice, Lloyd's Surveyor may be ordered from Istanbul.

SHIPMASTER'S REPORT: September 1980.

Formalities: Customs Officer stays on board whilst vessel is in port.

Travelling manifests of cargo and ship's stores to be made up and accompany the vessel from port to port. For Cargo Manifests I used the U.S. Customs Declaration of Cargo Form with the U.S. Seal blanked out, Authorities had no objection.

Pilotage: If vessel requires an outward Pilot through the Dardanelles remember to order in good time, 12 hours minimum order time is required, especially when the vessel's stay in port is short.

There is 1 Pilot who is also the 'Lloyds' sub-Agent in Gemlik and is generally a useful person to know.

When unberthing make sure the Port anchor is home otherwise it will foul the quay.

Berthing: Gangway may be turned out prior to berthing.

The quay consists of 2 berths, the Eastern Berth for loading bulk or bagged fertiliser has 2 loading booms. This berth, if it has another vessel on it, may well cause some problems on leaving the Western Berth which is the liquid ammonia facility. When the vessel is in position with the liquid Chicksan, the bow overshoots the jetty and provision is made for the forward mooring ropes to be taken to a large dolphin, connected to the main quay by a catwalk with a *wooden* walkway.

Berths are very good being of large, substantial concrete structure with good fendering.

Minimum depth alongside 12.6 m.

There is an 8 m. patch at the Eastern end of the Fertiliser Berth which causes the Pilot problems.

Density varies: 1020 – December 1979, 1016 – July 1980, 1019 – September 1980.

Discharging: 2 Chicksans, liquid line 10 in., vapour line 10 in., both 150 ASA, both can be used for either liquid or vapour so be careful when connecting.

Discharge rates vary: December 1979 – 640 t.p.h.; July 1980 – 502 t.p.h.; September 1980 – 800 t.p.h., they can take it at over 1,000 t.p.h. depending on shore tank ullages.

Fertiliser plant usage of raw ammonia presently 400 tonnes per day increasing in January 1981 to 600 tonnes per day. The actual production of ammonia is expected to commence in about five years' time.

Shore surveyor attended and his figures taken as quantity discharged. Attends the vessel at subsequent Turkish ports by flying between ports, not allowed to stay with vessel. Very helpful. No gauging of shore tanks.

General: No fuel. Available at great expense if brought from Istanbul or Izmit by barge or tank lorry.

All communications are dealt with by head office in Istanbul and then passed to Izmit thence by car to Gemlik which has no Telex.

Telephone to U.K. about 2 hour wait for connection, line clear.

Cables: Watship Izmit or sub-Agent: 'Kinay' Gemlik. For urgent messages cable address should be prefixed by the Turkish word 'Yildirim' – all ports.

Personnel repatriation is a problem due to the distance from Istanbul and the fact that the Immigration post is not in Gemlik.

Chandler: Agent does the chandlering, good vegetables available September 1980, payment in cash only.

Doctor: Available at Bursa about 30 km. (30 minutes).

Dentist: In Gemlik, near Agent's office.

Shopping: Best in Bursa about 30 minutes South of Gemlik along new dual carriageway. Agent will arrange transport. An hourly bus service runs from the plant into Gemlik.

SHIPMASTER'S REPORT: November 1980.

Berthing: If weather suitable berthing now undertaken at night. We eventually berthed at night in calm conditions with small coaster on fertiliser berth without any difficulties, proceed slowly. Unberthing at night.

Discharge: Very keen on correct discharge temperature. Use forward liquid line, aft vapour line. Shore tanks hold 40,000 tonnes total (20,000 tonnes each).

Fresh Water: Available but not potable. At L.400 per tonne (1.90 pounds). A fire tender is used as a pump at Chicksan. I believe itis well water.

Fuel: With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

AUTHORITY: Gemlik Directorate, Port of Gemlik, Liman Baskanligi, Gemlik, Turkey. *Tel:* 1133. Gemlik Customs House: *Tel:* 1411; Gemlik Police Station: *Tel:* 1628; Gemlik Hospital: *Tel:* 2329.

Operator: Gemport, Gemlik Port and Warehousing Administration Co.Inc., Kocacukur Mevkii P.K.101, Gemlik/Bursa, Turkey. *Tel:* (224) 5248831 (6 lines). *Fax:* (224) 5248830. *Contact:* Captain Y. Ziya Alkan, General Manager.

GIRESUN (Kerasunda): 40.56 N. 38.24 E. **(See Plan)**

PORT LIMITS: The Port of Giresun is the sea area contained in the inner part of the imaginary lines which joins Lat. 40° 56′ 40″ N., Long. 38° 19′ 40″ E. and Lat. 40° 54′ 51″ N., Long. 38° 26′ 10″ E., Aksu River mouth and the point 2,778 m. (1.5 miles) away from this mouth in an 019° true direction with Lat. 40° 56′ 15″ N., Long. 38° 27′ 00″ E. and Lat. 40° 55′ 10″ N., Long. 38° 19′ 40″ E. Gure River mouth and the point 2,778 m. (1.5 miles) away in true North direction.

PILOTAGE: Pilot ordered by Agent who requires 24 hours' notice in advance of vessel's arrival. Compulsory for all foreign flag vessels.

Pilot service operates 24 hours a day and vessels may enter and leave at any hour on request.

ANCHORAGES: Good anchorage in Outer Harbour. Vessels should keep the entrance channel clear.

MAX. SIZE: Max. draft 10.0 m.

RADIO: Giresun Radio. Call sign TAB4.

TUGS: 1×750 h.p. Compulsory for all foreign flag vessels.

BERTHING: The Port of Giresun is composed of 2 parts. These are the inner harbour and the outer harbour.

(a) The inner harbour is the sea area contained in the inner side of the line which joins the light at the end of the main breakwater with the light at the end of the auxiliary breakwater.

(b) The outer harbour is that part of the sea which remains between the port boundary and the inner harbour boundary.

The Inner Harbour

The berthing, tying-up and stern to shore anchoring places for the ships are given below:

A – The passenger berth has been converted to a general cargo berth and is equipped with a shore crane of 3 tons capacity. This quay is 150 m. long and the water depth is 9.0 m. – 10.0 m.

B – The cargo wharf: This is reserved for cargo ships. It is 275 m. long and the water depth is 8.0 m. – 9.0 m. The cargo wharf is equipped with shore cranes of 3 tons capacity.

C – The small craft quay is 135 m. long and the water depth is 3 m. Small tonnage ships are berthed here.

D – Service wharf: This is 88 m. long and the depth of the water is 4 m. The service craft of the Harbour Authority berth here.

E – Providing that they obtain the Harbour Authority's permission, ships waiting their turn to berth may tie-up stern to shore, at the bollards on the main breakwater in such a way as not to impede the traffic.

F – The outer harbour is an unrestricted anchoring area but it is strictly forbidden to anchor or wait at the mouth of the breakwater. Anchoring is unrestricted 315° true North of and 2.5 cables away from the centre of the main breakwater, North of the normal anchoring area.

STEVEDORES: Working hours normally 0800 to 1200 and from 1300 to 1630. Four gangs available.

CRANES: 4 cranes available, 3 – 10 tonnes. 5 mobile cranes, 5 – 25 tonnes.

FRESH WATER: Available.

FUEL: Available by road tanker.

REPAIRS: No repair facilities.

GARBAGE DISPOSAL: Garbage disposal service is available. Drums are provided if required. Charges are as follows:

	Cost (U.S.$)/1,000 g.r.t.			
	Flag of Ship		*Cost (U.S.$)*	
Method of Service	*Turkey*	*Others*	*Barge*	*Container*
On Quay	16	45	6	0.70
At Anchor	30	90	6	0.70

WASTE OIL DISPOSAL: Waste oil disposal service is available. Charges are as follows:

	Cost (U.S.$)/1,000 g.r.t.	
	Flag of Ship	
Method of Service	*Turkey*	*Others*
On Quay	20	60
At Anchor	40	12

Facilities include two oily water separators of 2 tons per hour capacity and a shore tank of 100 tons capacity.
Contact: Tel: 051-11490. Telex: 82468 TRDZ. Fax: 051-21734.
SEAMAN'S CLUBS: There is no seaman's club operating in the port, but the port is situated near the city, and all shopping, international telephone, some sporting activities, dances, transportation, and postage facilities are available there.
CURRENCY: Turkish Lira (TL).
AUTHORITY: Giresun Port Authority, Giresun Liman Isletmesi Mudurlugu, Giresun. *Tel:* (90) (051) 12447. *Telex:* 82468 Giresun. *Contact:* Port Manager.

GOCEK: 36.45 N. 29.55 E. (See Plan)

SHIPMASTER'S REPORT: February 1990.

LOCATION: Port of Gocek is located in the N.W. part of Fethiye Korfezi (Fethiye Bay). Position of the Berth 36° 45.2′ N., 29° 55.5′ E.
DOCUMENTS:
6 Crew Lists.
2 Lists of Crew's Personal Effects.
2 Lists of Ship's Stores.
2 Lists of Medical Narcotics.
2 Lists of Arms and Ammunition (if any).
All Passports/Seaman's Books taken ashore by Immigration and numbered landing cards issued. Passports returned on departure in exchange for landing cards.
PILOTAGE: Pilotage is optional. Request for the Pilot should be made through local Agents at least 48 hours in advance (on this particular vessel the Pilot had been hired from Izmir). However, pilot service is recommended, so as to assure good communications and cooperation with mooring boat. Pilot boards about 1 mile S.E. of Gocek Island (in good weather conditions) from the same boat, which is later used as a mooring boat.
Before proceeding, sufficient time should be allowed for the boat to return to port (distance about 3 miles).
APPROACHES: Approach to Gocek Port leads through a deep channel between Gocek Island and the mainland, about 3 cables wide and 1 mile long. Rounding the protruding point on Akmaden Peninsula (Southern part of Gocek Bay), the speed should be at the minimum, because vessel is already approaching the berth. There are 2 flat unlit buoys, painted white and red, about 80 m. from shore, N.W. and N.E. from Akmaden Lighthouse. Both buoys marked "MY HALAS" on sides. In addition there are 2 small white buoys close to S.W. part of the berth, apparently marking entrance to yacht harbour.
In berthing port side alongside (which is recommended because of departure), during the manoeuvre vessel's stern will at times be quite close to mentioned buoys (this vessel is 135 m. LOA, 12,000 d.w.t.). Starboard anchor should be used well in advance in order to swing the vessel to starboard and to facilitate the departure (at least 4 shackles). Swinging area is quite restricted and manouvre should be done without any haste and carefully.
VHF: Communications through Fethiye Radio.
TUGS: Tugs not available. Mooring boat is usually hired from local fishermen.
BERTHING: The port is perfectly sheltered from all winds and swell. There are numerous berths for pleasure and fishing craft in whole bay area, which is considered a tourist resort. Some of those berths have piers, protruding 20 m. – 30 m. from the shore, but none obstruct navigation or manouvres. Maximum tide range is only 10 cm. – 15 cm. throughout the year, with the exception of persistent Southerly wind periods, when slightly higher. At present the port is handling export of chrome ore and import of waste paper for nearby paper factory. Ships with cargo for the paper factory have priority to berth.
Port of Gocek consists of a main berth, total length 157 m. At a slight angle to the main berth is the berth (92.5 m. length) for small tankers of up to 1,000 d.w.t.
Depths alongside the main berth are as follows: At the extreme S.W. part 10.4 m., in the middle 11.5 m., and at the extreme N.E. part 10.0 m.
CARGO: Cargo is delivered to the quay by trucks. Chrome ore is already loaded in square iron boxes, each truck 5 – 6 boxes, each box about 2.5 tons of ore. The boxes are hooked directly from trucks and emptied into holds. Daily rate with 3 gangs during consecutive 24 hours might reach over 1,500 tons. Weighing of cargo done on shore under Customs' control, and draft survey not required. The cargo declared as lumpy chrome ore, stowage factor 16 cu.ft./ton, actually consists of about 50% medium size rocks and the rest is crushed/rubble.
Cargo Handling: No shore or mobile cranes available, all cargo handling by ship's gear.
MEDICAL: Fethiye Hospital.
FRESH WATER: Not available from quay.
FUEL: Not available.
CUSTOMS ALLOWANCES: 200 cigarettes per crew member.
REPATRIATION: Possible.
TIME: GMT plus 2 hours. GMT plus 3 hours in Summertime from late March.
SERVICES: Ship chandler and laundry available in Fethiye, 35 km. by road.

GOLLUK: 37.14 N. 27.38 E.

DOCUMENTS: The following documents have to be prepared
Masters before arrival:
4 copies of Crew Lists.
2 copies of Stores Lists.
1 copy Health Document.
4 copies of Passenger Lists.
3 copies of Customs Documents.
3 copies of Manifests for cargo destined to port.
1 copy of Manifest for all transit cargo aboard.
N.B. Ship's particulars form is to be filled by Masters upon arrival a
remitted to the Port Authorities.
PILOTAGE: Pilot not available.
RESTRICTIONS: Golluk is a well-protected natural harbour, not affec
by winds from any direction. Deep water approaches to pier.
HEALTH: Vessels to show their Sanitary Certificate if available abo
and also their Registry. Presentation also of Vaccination Certificate
all the crew, if required by Sanitary Officials. Pratique is necessary
arrival even if vessel has called at another port in the same coun
Sanitary Certificate is required for live animals aboard.
RADIO: Izmir Radio Station, call letters TAN2. Istanbul Radio Statio
call letters TAH.
TUGS: Not available.
BERTHING: One pier 170 m. long used for handling emery ore in bu
Depths alongside 39 ft. shelving to 20 ft. at 90 m. from seaward end
CUSTOMS ALLOWANCES: 50 cigarettes for each member of cr
going ashore. Aboard the vessel each member of the crew is permit
to have one carton out of Bond. One litre wine/spirits for each memb
of the crew in opened bottle is permitted out of Bond. However, t
allowance is to be kept aboard the vessel.
TIME: GMT plus 3 hours.
HOLIDAYS: New Year's Day (from December 31st 1200 hrs. to Janua
1st 2400 hrs.); National Sovereignty Day (from April 22nd 1200 hrs.
April 23rd 2400 hrs.); Spring Day (1st May), Constitution Day (27th Ma
Sports Day (19th May); Victory Day (30th August); National Holiday (2
October 1200 hrs. to 30th October 2400 hrs.); Sheker Bayram (3 da
movable); Kurban Bayram (4 days, movable).

HEREKE: 40.42 N. 29.37 E.

DOCUMENTS: 5 Crew Lists, 2 Stores Lists, 2 Crew Declarations
Cargo Manifests, 2 copies Bills of Lading, 2 Stowage Plans, Clearan
from Last Turkish Port, Bill of Health, 2 Lists of Money in Ship's Sa
Tonnage Certificate, Safety Equipment Certificate, Safety Ra
Certificate, Safety Construction Certificate, Load Line Certificate, De
Certificate.
PILOTAGE: Compulsory pilotage from Darica to Hereke and vice-ver
also for berthing and unberthing. (For all movements in Izmit Gulf P
is compulsory).
Vessels proceeding to Hereke port have to take Pilot when enter
Izmit Gulf at Darica pilot station, located:
Approx. Lat. 40° 45′ 18″ N., Long. 29° 23′ 18″ E.
ANCHORAGES: Anchoring places at Izmit Gulf are as follows:
For Dry Cargo Vessels:
Darica/Eskihisar Anchorage: Approx. Lat. 40° 46′ 05″ N., Lo
29° 32′ 10″ E.
Izmit Anchorage: Approx. Lat. 40° 44′ 00″ N., Long. 29° 52′ 48″ E
For Tankers:
Yarimca Anchorage: Approx. Lat. 40° 44′ 50″ N., Long. 29′ 44′ 30
RESTRICTIONS: Berthing at jetties at night time is at Pilot's discret
MAX. SIZE: No restrictions if vessel suitable to load/unload at Here
berth where jetty length 249.5 m. and depth varying between 11.5
and 17.00 m.
HEALTH: For vessels proceeding to Hereke Free Pratique obtained
Canakkale-Dardanelles or at Buyukdere/Bosphorus. Crew List a
Derat Certificate required.
RADIO: Istanbul Radio Station. Call sign TAH.
VHF: Available only at Darica and Yarimca pilot stations, Channel
TUGS: Compulsory towage for berthing and unberthing. The follow
number of tugs must be used during operations in Izmit Gulf:
500 to 5,000 g.r.t. – 1 tug
5,000 to 25,000 g.r.t. – 2 tugs
25,000 to 50,000 g.r.t. – 3 tugs
over 50,000 g.r.t. – 4 tugs
BERTHING: Only one jetty available at Hereke which belongs to N
Cement Factory where more than one vessel can berth at a time.
CRANES: No shore cranes available on jetty.
BULK CARGO FACILITIES: As pier belongs to cement factory
cement cargo loaded. For bulk cement loading rate is 3,000/4
tonnes per day. 24 hours continuous work.
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: Private.
MEDICAL: Hospital and dental facilities are available at Izmit app
30 km. from Hereke.
TANKERS: No tanker facilities.
DENSITY: 1020-1022.
FRESH WATER: Available by barge and small quantities available
the jetty.
FUEL: Not available at Hereke, can be supplied by barge or coa
from Istanbul.

FIRE PRECAUTIONS: None.
CONSULS: None.
REPAIRS: No repair facilities.
DRY DOCKS: None.
SURVEYORS: (1) Cargo Inspectors available at Istanbul.
(2) Surveyors available at Istanbul.

Cargo Inspectors and Surveyors can be ordered from Istanbul to attend vessels at Hereke.

GANGWAY/DECK WATCHMEN: Not necessary. Ship's gangway used.
HATCHES: Opening/Closing hatches carried out by the crew.
CUSTOMS ALLOWANCES: Tobacco: 1 carton of cigarettes per week, each man. Spirits: 1 bottle of spirits per week, each man.
CARGO GEAR: Load/discharge effected by ship's gear as no cranes available on the jetty.
REPATRIATION: Main embarkation/disembarkation Customs and Immigration formalities done at Istanbul but permission/formalities also required from Izmit Immigration and Izmit/Derince Customs to assist repatriations.
AIRPORT: Nearest airport at Istanbul, approx. 100 km. from Hereke.
TIME: Local time GMT plus 3 hours.
HOLIDAYS: New Year's Day, Sugar Bayram for 3 days, Kurban Bayram for 4 days (both religious holidays and dates are changeable every year), 23rd April, 19th May, 30th August, 29th October are National Holidays. Saturdays and Sundays official holidays.
POLICE/AMBULANCE/FIRE: Police: 055 or 211-111224, Ambulance: 077 or 211-111030, Fire: 000.
EMERGENCY CO-ORDINATION CENTRE: Police Headquarters: 211-111224.
TELEPHONES: No arrangements exist.
SERVICES: None.
BANKS: Only local banks.
STORING: See "Prelims".

1. Vessel can be stored by barge and truck.
2. Vessels can be stored by barges during loading or discharging.
3. Trucks can proceed alongside at berth.
4. Fork lift trucks not available.
5. Customs formalities required for storing, Agent assists.

SHORE LEAVE: Crew members allowed ashore, no shore pass required.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
REGULATIONS: Nil. No visitors allowed aboard without permission.
DELAYS: No delays expected.
AUTHORITY: NUH Cement Factory of Hereke, Akyar Mevkii Hereke, Kocaeli, Turkey. *Tel:* (2161) 1051 (3 lines). *FAX:* (2161) 1121. Telex: 33227, 33288. *Cables:* Nuh-Hereke. *Contact:* The Commercial Manager.

HOPA: 41.28 N. 41.27 E. (See Plan)

DOCUMENTS:
Quarantine:
Declaration of Health.
Valid Derat Certificate.
International Vaccination Certificates.
Free Pratique (received from Canakkale or Istanbul).
Customs:
2 Crew Lists.
2 Crew Declarations.
2 Stores Lists, including bonded store.
2 Cargo Manifests.
2 Customs Clearance from last port.
Immigration:
2 Crew Lists.
2 Passenger Lists.

PILOTAGE: Compulsory for vessels berthing and unberthing.
2 Pilots available, ordered by Agent on basis of Master's ETA.
International code signals used to call Pilot, who boards at harbour entrance. Vessel may enter and leave at any hour on request.
ANCHORAGES: In the outer harbour, off the entrance.
HEALTH: Pratique granted after Sanitary Officer's visit on vessel's arrival.
RADIO: Hopa Radio. Call sign TAB-2. (41° 23′ 50″ N., 41° 25′ 19″ E.)
VHF: Hopa Radio on Channels 16, 12 and 74. Pilot on Channel 12.
TUGS: 2 tugs of 900 h.p. and 1 mooring boat available.
BERTHING: 1,146 m. of berthing space.

Quay No.	*Name*	*Length* (m.)	*Depth* (m.)
1	Ore Quay	215	10.0
2	Passenger Quay	198	10.0
3	General Cargo	190	10.0
4	General Cargo	100	10.0
5	Naval Quay	100	5.5
6	Motor Boat Quay	185	4.5
7	Fisherman's Quay	120	4.5
8	Ro-Ro Quay	38	9.0

CRANES: Shore cranes: 1×25 tons, 2×5 tons and 2×10 tons.
Mobile crane: 1×10 tons.
STEVEDORES: Gangs of stevedores secured by the Agent through the port monopoly 24 hours prior to arrival. Working hours of first shift 0800 – 1200 and 1300 – 1630. Second shift: 1630 – 2030 and 2130 – 0030.
MEDICAL: A Doctor and hospital facilities are available.
DENSITY: 1024.
FRESH WATER: Fresh water available at all berths, order through Agent. Rate 60 t.p.h. (approx.).
FUEL: Available by road tanker.
CONSULS: None.
REPAIRS: Small repairs possible.
DRY DOCK: None.
GANGWAY/DECK WATCHMEN: Recommended.
SURVEYORS: Available from Istanbul. Order through Agent.
HATCHES: Opening/closing hatches to be carried out by ship's crew.
REPATRIATION: All facilities available for crew changes and repatriation.
AIRPORT: At Trabzon. Approximately 185 km. from the port.
HOLIDAY: New Year's Day; Seker Bayrami (3 days), Kurban Bayrami (4 days), (Both are religious holidays and dates are changeable every year). 23rd April, 19th May and 29th October are National Holidays. Saturday and Sunday are official holidays.
POLICE/AMBULANCE/FIRE: Police Tel: 1624. Ambulance Tel: 1068. Fire Tel: 3625.
BANKS: Ziraat Bankasi, Is Bankasi, Ak Bank, Halk Bank.
SHORE LEAVE: Crew members allowed ashore.
GARBAGE: Trucks will remove garbage from vessel at berth on request.
IDENTIFICATION CARDS: Required.
GARBAGE DISPOSAL: Garbage disposal service is available. Drums are provided if required. Charges are as follows:

	Cost (U.S.$)/1,000 g.r.t.		Cost (U.S.$)	
	Flag of Ship			
Method of Service	*Turkey*	*Others*	*Barge*	*Container*
On Quay	16	45	6	0.70
At Anchor	30	90	6	0.70

WASTE OIL DISPOSAL: Waste oil disposal service is available. Charges are as follows:

	Cost (U.S.$)/1,000 g.r.t.	
	Flag of Ship	
Method of Service	*Turkey*	*Others*
On Quay	20	60
At Anchor	40	12

Facilities include two oily water separators of 2 tons per hour and two of 10 tons per hour capacity and shore tanks of 100 tons and 600 tons capacity.
Contact: Tel: 0571-2259. Telex: 83338 TRDZ. Fax: 0571-1791.
SEAMAN'S CLUBS: There is no seaman's club operating in the port, but the port is situated near the city, and all shopping, international telephone, some sporting activities, dances, transportation, and postage facilities are available there.
CURRENCY: Turkish Lira (TL).

ISDEMIR: 36.43 N. 36.11 E. (See Plan)

LOCATION: The port is located inside the Western Breakwater within Lat. 36° 43′ 30″ N., Long. 36° 11′ 06″ E. and the South Breakwater within Lat. 36° 43′ 35″ N., Long. 36° 11′ 15″ E.
DOCUMENTS: Same as other Turkish ports.
PILOTAGE: Compulsory for all foreign vessels. Working hours are 0800 hrs. – 2400 hrs. (Also see "Restrictions"). Pilot boards 0.5 miles to 1.5 miles from the main breakwater. Call on Channel 16, working on Channel 12.
ANCHORAGES: Safe anchorage South of a line due West of the South breakwater light (green light) and at least one mile from the breakwater.
RESTRICTION: Large vessels (over 100,000 d.w.t.) and tankers are not allowed to enter during hours of darkness.
MAX. SIZE: No limitation at the anchorage.

	Max. Length (m.)	*Max. Draft* (m.)
AI (1)	300	16.0
AB (2)	200	11.0
CD (3)	150	7.8
DE (4)	200	9.2
EF (5)	185	9.5
FG (6)	90	5.5
Service Berth	140	5.5
Fuel Wharf	No limit	13.0

HEALTH: See "Iskenderun".
RADIO: See "Iskenderun".
VHF: Channel 16, working Channel 12.
RADAR: There is a Radar Control Station on the South side of Iskenderun Gulf Entrance, near Akinci Point. Operator asks vessels on entering and departure for their name and call sign by VHF Channel 16. The station is on duty 24 hours.
TUGS: 3 tugs available, 2×2,480 h.p. and 1×1,200 h.p. Tug compulsory for vessels over 500 g.r.t.
1 Tug for over 500 to 4,000 g.r.t. vessels.
2 Tugs for over 4,001 to 15,000 g.r.t. vessels.
3 Tugs for over 15,001 g.r.t. vessels.
If a vessel arrives with over 100,000 tonnes cargo or 16.0 m. draft, a fourth tug is provided from Botas/Ceyhan or Iskenderun Port.

BERTHING:

Berth No.	Length (m.)	Depth (m.)	Cranes Capacity tons	Remarks
1	500	16.0 - 18.5	2 × 25	2,000 t.p.h (ore), 1,250 t.p.h (coal), outreach 28.0 m., air draft 19.0 m.
2	240	11.5 - 12.0	5 × 15	400 t.p.h. (ore), 300 t.p.h. (coal). Berth can also be used for general cargo.
3	220	8.0 - 8.5	2 × 10	General cargo
4	200	9.5 - 10.0	1 ×140	Heavy lifts
5	185	9.5 - 10.0	2 × 10	General cargo
6	90	6.0 7.5		The cranes on Pier 5 are used.
Service Berth	140	6.0		Load-discharge only for the Turkish vessels.
Fuel Wharf	–	14.0	–	Vessels are moored by stern and drop both anchors.

CRANES: 2 Portal cranes on Pier 1 for ore and coal discharging operations. 5×15 ton cranes on Pier 2 for bulk and other purposes. On Piers 3, 5 and 6, 10 ton capacity cranes can be used with hydraulic grabs for bulk and general cargoes. Fixed heavy lift crane on Pier 4 for special purposes which can be used for heavy cargoes up to 140 tons. *Mobile Cranes:* Capacity 6 tons – 90 tons.

SPECIALISED CARGO HANDLING FACILITIES: Tar and benzol are produced by the factory. The tar loading can be carried out by 30 ton trucks. A 4 in. hose is available on the Fuel Wharf, and benzol can be loaded by pipeline at a rate of 1,000 tonnes per day.

Fuel oil, gas oil and diesel oil can be loaded by 8 in. hoses from the existing 8 storage tanks (total capacity 30,000 tonnes). Vessels have to have clean ballast on their arrival. There are no storage facilities for dirty ballast.

STEVEDORES Available 24 hours. Written ETA advices to the Port Management required 8 hours before berthing.

Handling Rates:	*Tons per 24 hours*
Pig Iron	1,500
Iron Ore	20,000
Pipes	800 – 1,000
Timber	4,000
Coal	16,000
General Cargo	800 – 1,000
Wheat	1,500
Sugar	100
Rice	600
Cement	1,500
Fertiliser	1,500
Fuel-oil	3,500 – 5,000

TANKERS: Facilities owned by the Port. Depth alongside 14.0 m. Discharge rate for fuel and oil (1×10 in.) 350 t.p.h. – 400 t.p.h. Benzol (1×6 in.). Handling rate 70 t.p.h. – 80 t.p.h. Distance between dolphins 106 m. Also see "Specialised Cargo Handling Facilities".

FRESH WATER: Good quality water available from shore connection, rate 15 t.p.h. maximum.

REPAIRS: No facilities.

CONSULS: See "Iskenderun".

DRY DOCKS: None.

GARBAGE DISPOSAL: The port is integrated with Iskenderun Steel Works and garbage facilities are provided by the Social and Internal Services Department, which provide garbage collection trucks and teams. Contact Tel: 9-8895-6270-1101/1501.

WASTE OIL DISPOSAL: A waste oil refining station has been installed near the fuel tanks of the Steel Works and trucks are used to transport waste oil from ships to the oil cleaning station.

SEAMAN'S CLUBS: None.

CURRENCY: Turkish Lira (TL).

SHIPMASTER'S REPORT: June 1981.

Location: 8 miles North of Iskenderun.

Pilotage: Pilotage is compulsory, but we arrived and sailed without Pilot. Permission must first be obtained via VHF Channel 16 through Iskenderun, usually the Agents. On no account must vessels enter and leave without permission.

Anchorages: Good holding ground inside breakwaters, protected from all directions except Southwesterly swell. Permission must first be obtained before anchoring inside.

Navigation: Good navigational entrance marks. No difficulties encountered on entering or leaving, plenty of water.

Tugs: Not available.

Berthing: Longest wharf appears to be "D", which at present is being extended (See "Plan"), the smallest being "C". All wharves appear to have plenty of water, (See "Plan"). All wharves have good access, wharves B, C and D being serviced with rail. Berth "A" has a heavy lift crane of 100 tonnes, no rail. Berth "D" has a conveyor for bulk cargoes. Most cargo being discharged into road transport.

Cargo Handling: Wharf "D" Bulk, "B" and "C" general cargo, Wharf "A" heavy lifts.

Cranes:

Wharf A – 1 × 100 tonnes for heavy lifts
B – 2 × 10 tonnes
C – 2 × 10 tonnes
D – 4 × 10 tonnes

Small mobile cranes also available.

Stevedores: Working hours – 24 hours continuous. Shifts change at 1600 hrs. Meal breaks at 1200 hrs. – 1300 hrs., 1700 – 1800 hrs. and 2000 – 2100 hrs.

Rate of discharge good, labour force good. Majority of port handling equipment is new, cranes, rail, etc. No warehousing available.

Fresh Water: Fresh water obtained by road tanker only, in quantities 40 tonnes. Usually supplied at night as they supply the steel town dur the day.

Fuel: No facilities observed.

Medical: Facilities at Iskenderun.

Consuls: At Iskenderun.

Repairs: No facilities observed.

General: Communications: Rail and road to Iskenderun, no local airfie All instructions and information available through Iskenderun on VH Channel 16, calling "Demicargo" which is local control, usually operat 0900 hrs. to 1700 hrs. and available only during working hours (Not me hours).

Tonnage Handled: By observation only, it appears that relatively lar vessels can be handied at the iron ore berth, up to 30,000 tonnes. A ne berth is under construction (See "Plan") which will be able to hand vessels up to 100,000 tonnes. Other berths are for smaller vesse (A, B and C), the largest being "B".

Principal activities, steel, iron ores, general cargo.

Services: Tank cleaning services and ship chandlers available fro Iskenderun.

SHIPMASTER'S REPORT: October 1986.

Clearance Inward: Vessel ordered to Iskenderun, anchored on arriv cleared inward. All certificates and Seaman's I.D. Cards landed. Sho passes issued. 7 copies of Crew List required.

Radio: Istanbul for long distance messages. Iskenderun for messag when close by, port has VHF but uncertain if international connectio possible.

Iskenderun Pilot has VHF Channel 16, opening watch at 0630 hrs

Most Agents appear to be on VHF in office hours.

Fuel: Available with appropriate arrangements.

Isdemir: Vessels shifted up to wait for Pilot off Harbour Entrance o instructions of Agency. Pilotage available from 0830 hrs., VHF Chann 12. Tug channel monitored, 2 tugs on station, a third can be ordered

The port imports coal and iron ore for the steel mill, using the new completed portal grab cranes on Berth A-I. Berths A-B, C-D, E-F appe to be mainly used for exports of steel bars, coils, steel rods, pig iro some coal and other minerals. Berth D-E mostly used for import of gra for direct delivery into lorries, and yard cargo for import or transhipme overland.

Working Hours: (3×8 hours) 0800, 1600, 2400 hrs. Though tally cler may work (2×12 hours) 0800, 2000 hrs.

Vessel loaded 27,000 tonnes steel bars in 21 days after waiting days for berth, with one shift to a deeper berth across harbour with tug

Facilities: Industrial grade or non-potable water piped to a few poi in the harbour. Drinking water supplied in road tankers (ship's ho used). Agencies, communications, medical, ship chandlers, etc., al Iskenderun. Agency charged by tariff for all services, rather than by t amount of work done.

International telephone system appears limited, and congestio occured soon after 0900 hrs. Agency telex machines only domes models, head office relayed international messages.

Provisions, especially vegetables, limited choice in hot weather. N bonded stores, only duty paid beer, etc. available. Ship chandle required Owners approve the cost of the order before arranging supp also that only one delivery be made owing to the high costs involve Bill made out in U.S. dollars.

The public highway is a walk of 1.5 hours in very hot weather, befo taxis or mini buses can be obtained. The bus system at shift chang time, with a transfer at the factory bus terminal was useful a economical. There are some small general stores in the 'Fabrik Tow about 1 hour's walk. Hourly bus service to Iskenderun until early evenin

Clearance Outward: Vessel returned to Iskenderun on a Sunday t outward clearance, where the certificates and Seaman's I.D. Cards we returned. It is possible to sometimes arrange clearance at Isdemir o weekdays.

PILOTAGE: Compulsory and provided by Port Administration. One p boat available.

ANCHORAGES: Anchorage should not be less than 600 m. to 800 m. from the breakwater, where quarantine control is performed, and where depth ranges from 15.0 m. to 25.0 m.
RESTRICTIONS: Depth at port entrance 12.0 m.
MAX. SIZE: Max. draft 12.0 m.
Also see "Tankers".
HEALTH: Pratique obtained on arrival. Master required to show vessel's Health Declaration and Certificate of Registry. Crew Vaccination Certificates to be produced if required. Sanitary Certificate required if live animals on board.
RADIO: Istanbul Radio, call sign TAH. Izmir Radio, call sign TAN. Iskenderun Radio, call sign TAI.
VHF: Port Authority and Pilots on Channels 16 and 13.
TUGS: 6 tugs up to 2,500 h.p. available.
One tug compulsory for the vessels of up to 4,000 g.r.t. and 2 tugs compulsory for the vessels of more than 4,000 g.r.t. Tugs are provided by the Port Administration.
BERTHING: The port has a breakwater 1,400 m. long, and is protected from North and South winds.

Berth	*Length* (m.)	*Depth* (m.)	*Remarks*
No. 1	170	10.0	General Cargo
No. 2	170	10.0	General Cargo
Nos. 3 & 4	353	10.0	General Cargo
No. 7	200	10.0	Dry Bulk and Ro/Ro
No. 8	167	12.0	Dry Bulk
No. 9	167	12.0	Dry Bulk
No. 10	200	10.0	Dry Bulk and Ro-Ro

CARGO HANDLING FACILITIES: The port is connected to the national railway system. The overall length of railway line within the port is 22,500 m., and railway connection exists to every quay. Dangerous cargo is discharged into lighters and stored in special areas. Vessels with dangerous cargoes can only be worked during daylight hours.
Container and Ro/Ro Facilities: The port does not have specific container equipment. However, mixed container operations are carried out at the port by a fixed shore crane of 25 tons lifting capacity and 2 container forklifts of 10 tons – 42 tons lifting capacity. Reefer points for refrigerated containers are available on a 75,000 sq.m. concrete yard. Ro/Ro operations are carried out at Berths No. 7 and 10.
Ore and Bulk Cargo Facilities: Conveyors are available for ore, grain and coal handling, operating at a rate of 250 tons/hr., 300 tons/hr. and 100 tons/hr. respectively. The construction of a grain silo of 60,000 tons capacity has been completed, and has a conveyor connection with the quay.
Liquified Gas Terminal: Available at Sariseki Chemical Works, 3.5 miles North of the main port.
Cranes: 21 shore and yard gantry cranes of 3 tons – 25 tons capacity, 11 mobile cranes of 3 tons – 25 tons capacity, one floating crane of 90 tons capacity and 12 crawler cranes.
Equipment: Two container forklifts of 10 tons – 42 tons capacity, 35 forklifts of 3 tons – 5 tons capacity, 8 trailers of 20 tons capacity, 6 trailers of 40 tons capacity, 4 tugmasters, 3 loaders and 7 towing tractors.
Storage: Open storage area of 374,630 sq.m., and covered storage area of 18,395 sq.m.
STEVEDORES: 3 shifts (0800 – 1630, 1630 – 0030 and 0030 – 0800). For bulk cargoes, 3 consecutive shifts of 8 hours can be worked.
Cargo Handling Rates: Average daily rates/shift/gang: General cargo 100 tons to 125 tons; bagged 125 tons – 150 tons; cotton 100 tons.
Gangs secured by Agent through the Port Monopoly, 24 hours prior arrival.
MEDICAL: Facilities available. Master to inform Agent by cable if urgent medical assistance required on arrival, also indicating, if possible, seriousness of case in order to take adequate steps.
TANKERS: Three berths operated by Mobil Oil, Petrol Ofisi and Shell. Max. draft 12.19 m. Mooring not allowed after sunset. Anchorage for ships carrying inflammable and dangerous cargoes is N.W. off the breakwater head, where the cargoes are pumped from submarine pipelines to the shore installations.
Also see "Botas".
FRESH WATER: Available alongside at 40 t.p.h. and from 2 barges of 240 tons capacity.
FUEL: Available locally from Baytur Trading S.A., Telex: 68068 AUTT TR/68022 AUIS TR. Tel: (881) 14400/18958/11104. Fax: (881) 15737, Iskenderun, Turkey.
With 48 hours notice Petrol Ofisi can supply Marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 BUNK TR. Tel: (1) 338 25 09 / 337 36 86 / 337 88 31 / 336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.
CONSULS: Vice-consulates of France, Germany, Greece, Italy, Norway, Spain and U.K.
REPAIRS: Welding and other minor types of repairs are possible.
GANGWAY/DECK WATCHMEN: Services of watchmen recommended. 3 shifts of 8 hours each. Extra tariff for Sundays and holidays.
OPENING/CLOSING HATCHES: May be opened/closed by ship's crew. May be performed by stevedores at tariff rates.
CUSTOMS ALLOWANCES: 50 cigarettes for each man going ashore. On board the vessel each man may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.
REPATRIATION: Can be arranged but Passport compulsory.
AIRPORT: Adana Airport, situated 147 km. from Iskenderun.
POLICE/AMBULANCE/FIRE: Police 11007; Ambulance 11057; Fire 11000.
TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer.
HOLIDAYS: New Year's Day (commencing 1200 hrs. Dec. 31st); National Sovereignty Day (April 23rd); Sports Day (May 19th); Victory Day (August 30th); October 29th; Sheker Bayram (3 days, movable); Kurban Bayram (4 days, movable).
Iskenderun Port is not working only on first days during Sheker Bayram and 2 days during Kurban Bayram, during all other days work carried out.
IDENTIFICATION CARDS: Seamen's Book is sufficient. For repatriation and joining vessels, passport compulsory.
GARBAGE DISPOSAL: Garbage collection service and equipment is available. This service is given at all berths.
WASTE OIL DISPOSAL: Collection service is available. The waste oil is collected by 10 cu.m. mobile tanks. There is another tank of 80 cu.m. capacity inside the port. An oily water separator system of 7,500 cu.m./year is also available.
SEAMAN'S CLUBS: There is no seaman's club. However some facilities are available both within the port and in the city.
CURRENCY: Turkish Lira (TL).
GENERAL: *Weighing Facilities:* There are 4 weighbridges up to 100 tons capacity.
Weather: Sudden and very strong winds called "Yarikkaya" blow from North and East during Winter season.
Security: Port Security personnel ensure the security of the port 24 hours a day.
Provisions: Available.
DEVELOPMENTS: There are plans for container facilities in order to meet the container handling requirements, which will arise from Southeast Anatolia Project (GAP). The feasiblity study for a container terminal has already been completed.

SHIPMASTER'S REPORT: Customs and Health Clearance is performed both at anchor and at the berth. Vessels should anchor about 0.5 miles North of the landing stage in the main part of the town. All Officials and Agents arrive by boat and when clearance is given the Pilot comes out. For vessels with cargo for the chemical works at Sariseki (3.5 miles North of the main port), the procedure is the same except that a Pilot is not required.
Customs, Immigration, and Health Officials require 4 Crew Lists on arrival. The Agent will require 2 more Crew Lists prior to the vessel's departure for clearance with the Harbour Master.

(A) ISTANBUL (EUROPE)

DOCUMENTS: *Vessels bound for Istanbul:*
5 Crew Lists.
6 Passenger Lists.
3 Stores Lists.
1 Transit Cargo Manifest.
2 Inward Manifests of all cargo onboard.
Copies of relevant Bills of Lading for Inward Manifests.
3 Lists of Money in the Ship's Safes (if there is no money on board, please issue 3 "Nil" lists).
Harbour Master's Sailing Permit (which must be exchanged at each Turkish Port and kept on board).
Ship's Certificates (Derat, Ship Safety, Safety Radio, Class or Freeboard).
Transit Vessels: Master to present only Tonnage and Derat Certificates during Sanitary Control at both Straits (Canakkale and Buyukdere).
PILOTAGE: For both vessels bound for Istanbul and transit vessels, Pilot secured by the Agent through the Port Monopoly Administration. Master to wire ETA notices 48 and 24 hours prior to arrival. ETAs must be confirmed or corrected not less than 2 hours prior to ETA. Pilot boarding vessel, using service boat hoisting red and white flag, off Haydarpasa and Sarayburnu (entrance from Marmara Sea) or off Kavak (entrance from Black Sea). Pilotage for entering and berthing in harbour areas is compulsory. Pilotage through Bosphorus is optional. All Pilots can be contacted by VHF Channel 16.
Also see "Shipmaster's Report".
ANCHORAGES: Free and safe anchorage in roads off Marmara coast approach to Istanbul. It is however recommended to anchor as near as possible to the harbour. Anchoring at other anchorage areas is subject to special permission via Harbour Master. Good anchorage off Haydarpasa and off Yenikapi, Ahirkapi for large vessels. For smaller vessels there is a good anchorage between Dolmabahce and Kurucesme.
MAX. SIZE: No limitation of draft in open roadstead at anchor. Max. draft in port alongside quay: 10 m. for dry cargo ships. Tankers up to 48 ft. draft can berth at Haramidere Oil Port.

RESTRICTIONS: Ships carrying hazardous cargoes (flammable, explosives, corrosives, etc.) are not allowed to enter the harbours. Ships can anchor in roads outside the harbour at any time without Pilot. Ships to operate upon arrival at night can enter the harbours with Pilot and with special permission through the Port Monopoly Administration. 48 hours' notice has to be given to the Harbour Master of Istanbul for vessels calling at Istanbul and/or passing in transit through Bosphorus.

HEALTH: Sanitary control of both transiting and operating vessels performed at the Straits entrance (Canakkale and Buyukdere). Ships entering from South must slow down at Canakkale and ships arriving from North must slow down at Buyukdere for Sanitary Control. In case of non-performance of such control due to bad weather, Master has to inform Agent in time and have to stop and wait at South Entrance of the Bosphorus until Sanitary Control is performed otherwise heavy fine would be levied.

Also see "Shipmaster's Report".

RADIO: Wireless messages to be routed to Agent via Istanbul Radio. Call sign of Istanbul Radio Station is TAH. Frequency MW 500 kHz. Ships can also communicate with Agent by radio telephone on frequency 2182 KHz. It is recommended that ships keep watch for any radio telephone call by Agent detailing any berthing and operation arrangement.

TUGS: Arranged by Agent. Vessels of 1,500 g.r.t. and over berthing at the quays or mooring to the buoys are compelled to take the services of at least one tug and vessels of 5,000 g.r.t. and over require at least two tugs. Charged per hour or fraction of each operation.

21 tugs ranging from 110 hp to 2,500 hp are available.

BERTHING: Priority to food and passenger ships. If no berth available then ships to wait for turn in roads at anchor.

Turkish Maritime Corporation Facilities:

Wharves:	*Length* (m.)	*Depth of Water* (m.)
Karakoy (ex Galata) exclusively for passenger vessels	520	7 – 10
Salipazari for cargo handling	600	10
Sarayburnu for passenger handling	240	6
Camialti and Haskoy (Golden Horn)	68	3 – 4
Kurucesme for coal handling	370	10

Equipment:

Electric Cranes along the quays:
- 2 of 5 tons
- 7 of 3 tons
- 3 of 4 tons (coal transporter)

Rubber wheeled mobile cranes:
- 1 of 25 tons
- 7 of 10 tons
- 8 of 5 tons
- 5 of 3.5 tons

Floating Cranes: 5 tons – 60 tons.

BULK HANDLING: See "Section B" – Haydarpasa.

BRIDGES: There are 2 bridges: Galata Bridge is between Eminonu and Karakoy: Ataturk Bridge is between Unkapani and Azapkapi. Both bridges are opened in the morning for vessels entering the Inner Harbour (Golden Horn). Vessels wanting to pass through the bridges have to give notice in due time to the Harbour Master of Istanbul.

STEVEDORES: Gangs of stevedores secured by the Agent through the Port Monopoly, 24 hours prior arrival. Average loading and discharging rates of about 150 – 200 tons per gang per shift depending also on the kind of goods. Discharging operations are generally performed alongside the wharves and loading operations at buoys; however, as stated above, can also be effected alongside simultaneously with discharging. Working hours: Monday to Friday 0800/1200 and 1300/1700 hrs; Saturday 0800/1200 hrs.

MEDICAL: Master to inform Agent by cable if urgent medical assistance is required upon arrival, also indicating, if possible, seriousness of case in order to take adequate steps.

TANKERS: The oil port called Haramidere is a small bay open to Southern winds and 60 km. distant from Istanbul in the Sea of Marmara. There are buoys and an oil pumping platform in this bay. Tankers can berth by dropping 2 anchors and mooring by stern at these buoys or at platform. Average sea depth is 48 ft.

Ambarli: Position Lat. 40° 58′ N., Long. 28° 42′ E. Max. size 250,000 d.w.t. Vessels moor by the stern to a dolphin platform (offshore).

DENSITY: Always variable due to strong currents, however, can be reckoned as 1015.

FRESH WATER: Supplied by barge and shore installation at the rate of 30 t.p.h. – 60 t.p.h.

FUEL: Diesel oil, gas oil and bunker fuel can be supplied by barge at transit cost, subject 48 hours' pre-advice. Fuel supplied only against advance payment in foreign exchange (dollars, sterling or Swiss francs).

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.) Telex: 29048 Bunk Tr. Tel: (1) 338 25 09 / 337 36 86 / 337 88 31 / 336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

21	50	6.0	General cargo

There is also a silo of 70,580 tons capacity at the harbour.

CRANES/EQUIPMENT: 1 floating crane of 250 tons capacity; 2 container quayside gantry cranes of 40 tons capacity; 21 shore and yard cranes of 3 to 35 tons capacity; 4 reach stackers of 40 tons capacity; 9 transtainers of 40 tons capacity; 18 mobile cranes 5 to 25 tons capacity; 6 container forklifts of 10 to 42 tons capacity; 54 general cargo forklifts of 2 to 5 tons capacity; 19 tugmasters; 1 loader; 6 tractors; 25 trailers of 40 tons capacity; 10 trailers of 20 tons capacity.

CONTAINER FACILITIES: The space of the container terminal is nearly 100,000 sq.m. The holding capacity of the container terminal is 6,000 TEU (both full and empty). The annual capacity, on the other hand, is 144,000 TEU/year. In addition, there are 2 areas hired outside the port for stacking the empty containers. A container freight station of 3,600 sq.m. is available behind the container quay. Another facility available at the port is the provision of reefer facilities for refrigerated containers.

RO-RO FACILITIES: A newly built Ro-Ro terminal is now in service. The Ro-Ro berth, which has 160 m. length with an alongside depth of 8.0 m., can accommodate 360 ships per year, and can handle 410,000 tons of Ro-Ro cargo, 65,000 trucks (incoming and outgoing), and 60,000 cars a year.

BULK HANDLING FACILITIES: Berth No. 3 serves the dry bulk traffic. The length of the berth is 190 m. with an alongside depth of 8.2 m. A grain silo of 34,000 tons capacity is available and has a conveyor connection with the quay.

STEVEDORES: Working hours: 3 shifts, 7 days a week.
1st shift: 0800 hrs. – 1630 hrs.
2nd shift: 1630 hrs. – 0030 hrs.
3rd shift: 0030 hrs. – 0800 hrs.
Gangs ordered by Agent through the Port Monopoly 24 hours prior to arrival.

MEDICAL: Master to inform Agent by cable if urgent medical assistance required on arrival, also indicating, if possible, seriousness of case in order to take adequate steps.

FRESH WATER: Supplied from hydrants on the berths.

FUEL: Available.
With 48 hours notice Petrol Ofisi can supply marine fuels, see "Section A".

CONSULS: 42 countries have Consulates in Istanbul.

REPAIRS: Welding and other minor types of repairs are possible under the Haydarpasa Port Directorate's control.

GANGWAY/DECK WATCHMEN: Watchmen services recommended. 3 shifts of 8 hours each.

OPENING/CLOSING HATCHES: May be opened/closed by ship's crew or by stevedores at tariff rates.

CUSTOMS ALLOWANCES: 50 cigarettes for each man going ashore. On board the vessel each man may hold 200 cigarettes and 1 open bottle wine/spirits out of bond.

REPATRIATION: Can be arranged.

AIRPORT: Istanbul Ataturk Airport served by international and domestic lines. Airport situated 20 km. from Haydarpasa Port.

HOLIDAYS:
Official Holidays: New Year's Day (from December 31st at 1200 hrs. and January 1st); National Sovereignty Day (April 23rd); Youth and Sports Day (May 19th); Seker Bayram (3.5 days), movable; Kurban Bayram (4.5 days), movable; Victory Day (August 30th); Proclamation of the Republic (from October 28th at 1200 hrs. to October 29th).

POLICE/AMBULANCE/FIRE: Police Control Office: 144 94 03; Ambulance: 354-383 (internal phone numbers of Haydarpasa Port), 338 10 10; Fire Brigades: Haydarpasa Port: 393-354-583 (internal phone numbers of Haydarpasa Port), 163 60 20.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

WASTE OIL DISPOSAL: An oily water separator system is available with a capacity of 10,500 cu.m./year to clean bilge water in conformity with the IMO regulations.

SHIPMASTER'S REPORT: Customs and Health Clearance is performed at anchoring areas Kumkapi (if coming from Marmara Sea) and Buyukdere (if coming from Black Sea). All officials and agents arrive by boat and when clearance is given, the Pilot comes out. For vessels with cargo for the chemical works at Meda (2 miles S.S.E. of the main port) the procedure is the same except that a pilot is not required.

AUTHORITY: Turkiye Cumhuriyeti Devlet Demiryollari Isletmesi Genel Mudurlugu – Talatpasa Bulvari, Ankara, Turkey. *Telex:* 42571.
TCDD Liman Isletmesi Mudurlugu Haydarpasa, Istanbul, Turkey. *Tel:* 90-216-337-99-88, 336-94-45. *Telex:* 29705. *FAX:* 90-216-345-1705. *Contact:* Lami Teksoz, Port Director.

AGENT: Gulf Agency Denizcilik A.S., P.O.Box Karakoy 1230, Istanbul 80008, Turkey. Tel: (90-212) 2430708. After hours 2572898. Telex: 25517 ("GACU"). Fax: 2450107. Cables: "Gacshipping" – Istanbul.

IZMIR: 38.25 N. 27.09 E.

DOCUMENTS:
6 Crew Lists.
4 Passenger Lists.
2 Manifests of Transit Cargo.
3 Manifests of Inward Cargo, 1 of which must be legalised before arrival by Turkish Consulate at loading port.
1 set Bills of Lading.
1 set Cargo Stowage Plans.
2 Stores Lists.
Health Documents.
Ship's Certificates.

N.B. Ship's particulars form is to be filled in by Masters upon arrival at Izmir, and remitted to the Port Authorities.

PILOTAGE: Pilotage is compulsory and is provided by the Turkish Maritime Organisation (TDI). Masters must notify their Agents at least 12 hours in advance giving their ETA at Pelican Spit and ask for a Pilot.
Pilot can be contacted on VHF Channel 16.

ANCHORAGE: In the Outer Harbour, 300 m. outside Old Port breakwater, ample space for vessels to anchor. Cargo operations cannot be performed at anchor unless vessels have red label cargoes aboard for Izmir or in transit.

RESTRICTIONS: Docking of ships at the old port is not permitted during night, but ships can sail any time during night. At the new port, docking is permitted during night (weather permitting) also ships can sail any time during night. There are no tides at Izmir.

MAX. SIZE: Vessels of any size with a max. of 38 ft. draft can operate at Izmir. There is a pipeline for oil-carriers in the Gulf of Izmir where tankers with a max. draft of 33 ft. can operate.
In Old Port, length restricted to 165 m., max. draft 8 m.

HEALTH: Vessels to show their Sanitary Certificate – if available aboard – also their Registry. Presentation also of Vaccination Certificate of all the crew, if required by sanitary officials. Pratique is necessary on arrival even if the vessel has called at another port in the same country. Sanitary Certificate is required for live animals aboard. If quarantine (fumigation) of the vessel is necessary, very considerable time is lost, and expense incurred because vessel must proceed to Fumigation Station at Klazomene, located at about 20 miles from Izmir (in the Gulf of Izmir) where fumigation can be effected and bad cases hospitalised.

RADIO: Izmir Radio Station, call sign TAN. Istanbul Radio Station: call letters TAH.

VHF: Ship-to-shore communication is by Channels 16 and 12.

TUGS: Tugs are compulsory for vessels of more than 2,000 g.r.t. At Harbour Master's estimation, 2 tugs will be used for vessels over 4,000 g.r.t. in case of bad weather. Dues will be collected for each tug. 3×2,500 h.p. tugs available.

BERTHING:

Berth No.	*Length* (m.)	*Depth* (m.)	*Cargo Handled*
1	140	8.0	Passenger Vessels
2	190	10.5	Passenger Vessels
3 *	150	10.5	Dry Bulk/Ro-Ro
4-5	270	10.5	General Cargo
6	75	10.5	General Cargo
7-8-9	372	10.5	General Cargo
10-11-12	348	7.0	General Cargo
13-14-15-16 *	600	13.0	Containers/Ro-Ro
17 * -18-19	450	13.0	Containers/Ro-Ro
20-21-22	364	13.0	General Cargo

* Ro-Ro facilities available.

CRANES/EQUIPMENT: 1 floating crane with 100 tons capacity, 2 container quayside gantry cranes of 40 tons capacity (2 additional gantry cranes are under construction and scheduled for completion by mid-1994), 9 shore cranes of 3 – 15 tons capacity, 14 mobile cranes of 6 – 30 tons capacity, 7 rubber tyred transtainers of 40 tons capacity, 4 reach stackers of 40 tons capacity, 12 container forklifts of 10 – 42 tons capacity, 25 general cargo forklifts of 2 – 8 tons capacity, 17 tugmasters, 15 tractors, 1 loader, 22 trailers of 40 tons capacity, 5 trailers of 20 tons capacity, 1 towing tractor.

CONTAINER HANDLING FACILITIES: The container terminal has 7 berths which have an alongside depth of 13.0 m. The total length of the berths is 1,050 m. The terminal covers an area of 152,000 sq.m. and the holding capacity is 7,047 TEU. Container operations at the quays are carried out by 2 gantry cranes of 40 tons capacity. The operations at the container yard are carried out by 6 rubber tyred transtainers and 4 reach stackers of 40 tons capacity, together with 12 container forklifts of up to 42 tons capacity. Reefer facilities for refrigerated containers are also available.

BULK HANDLING FACILITIES: Grain silo has capacity 76,000 tons. The conveyor can deliver between 2,500 and 3,000 tons in 24 hours.

Bulk ore loaded by grabs. Daily loading capacity per shift of 8 hours is between 750 to 1,000 tons.

STEVEDORES: *Working Hours:* 24 hours, 7 days a week.

1st shift: 0800 hrs. – 1630 hrs.
2nd shift: 1630 hrs. – 0030 hrs.
3rd shift: 0030 hrs. – 0800 hrs.

MEDICAL: Advance notice optional. There is a local English-speaking doctor for service on board vessels.

Hospitals: U.S. Military Hospital, French Hospital, Government Hospital (Memleket). Doctors available to board ships or patient to proceed to their clinics.

U.S. Military Hospital for emergency cases only.

TANKERS: Izmir is a discharge port for tankers. Socony Mobil Oil receives petroleum products in bulk through a pipeline at a distance of about 1 mile from their shore installations. Depth at the end of the pipeline is 33 ft. The pipeline is of 12 in. and the pumping is effected through a flexible hose of 10 in. at an average of about 450/500 t.p.h.

British Petroleum receives petroleum products at jetty where the tankers berth stern to with a max. draft of 23 ft. Pumping is effected by the vessel from her stern with a 6 in. flexible hose.

Petrol Ofisi receives petroleum products at their jetty. Vessels berthed stern to with a draft of 17 ft. Same procedure for pumping as for British Petroleum. The above three installations are located in the Gulf of Izmir opposite the new port of Alsancak.

FRESH WATER: Fresh water is available for drinking. The water is given both from dock or by barges (2×150 tons). Water is supplied by Port Monopoly. Delivery at the dock about 20 t.p.h. By barge about 40 t.p.h.

Two barges each of 200 tons capacity available.

FUEL: All kinds of fuel available subject to 24 hours' advance notice. Fuel supplied only against advance payment in free foreign exchange direct to Agent of the vessel.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

1. Vessels can be stored by barge and truck.
2. Vessels can be stored by barges during loading or discharging.
3. Trucks can proceed alongside at berth.
4. Fork lift trucks not available.
5. Customs facilities required for storing. Agents assist.

SHORE LEAVE: Crew members allowed ashore, no shore pass required.
IDENTIFICATION CARDS: Seaman's Book is sufficient.
REGULATIONS: Nil. No visitors allowed aboard without permission.
DELAYS: No delays expected.
AUTHORITY: Izmit Seka Paper Mills. *Tel:* 211-31630. *Telex:* 33124. *FAX:* 23235, 20074.

MERSIN: 36.47 N. 34.38 E. (See Plan)

PORT LIMITS: Inside the lines drawn from 36° 48′ 00″ N., 34° 37′ 00″ E., first 2 miles S.E., then N.E. to the land.
DOCUMENTS:
5 Crew Lists.
4 Passenger Lists.
2 Stores Lists.
2 Transit Cargo Manifests.
3 Inward Cargo Manifests, one of which must be legalised prior arrival by Turkish Consulate at loading port; if no Turkish Consulate, same to be certified by local Chamber of Commerce.
3 Outward Cargo Manifest.
1 each of the Bills of Lading accompanying Manifests.
2 Cargo Stowage Plans.
Ship's Certificates:
(a) Load Line Certificate.
(b) Passenger Ship Safety Certificate (g.r.t. over 150).
Cargo Ship Safety Construction Certificate (g.r.t. over 500).
Cargo Ship Safety Equipment Certificate (g.r.t. over 500).
Cargo Ship Safety Radio-Telegraphy Certificate (g.r.t. over 1,600).
Cargo Ship Safety Radio-Telephony Certificate (g.r.t. over 300).
Exemption Certificate.
(c) Tonnage Certificate.
(d) Health Certificate.
(e) Derat Certificate.
(f) (According to MARPOL 73/78):
Oil Record Book I (g.r.t. over 150 for tankers, g.r.t. over 400 for others).
Oil Record Book II (g.r.t. over 150 for tankers).
Certificate of Complience.
PILOTAGE: Compulsory for all vessels and available 24 hours. Agent orders Pilot through Port Monopoly Administration. Master to cable ETA notices 48 and 24 hours prior to arrival. Pilot boards vessel with service boat hoisting red and white flag. Pilot boards vessel outside main breakwater. Shipmaster can use VHF station according to existing international frequencies. Usual international signals for requesting Pilot.
ANCHORAGES: Safe anchorage in open roads outside main breakwater.
Prohibited Anchorage:

1. Within the entrance canal of 14 m. depth marked by buoys.
2. Inside the circle of radius 2.5 cables length, with centre, red lighthouse at 36° 40′ 45″ N., 34° 38′ 45″ E.
3. North East open roads outside the line at 80° from green lighthouse towards the outside line of East breakwater.

RESTRICTIONS: Ships can anchor in open roads outside main breakwater at any time without Pilot. No night time restrictions for entry. Ships carrying more than 50 tons of explosives are not permitted to berth alongside.

The following are not permitted to enter Port:
Vessels over 9.0 m. draft between 16th December and 15th March.
Vessels over 9.5 m. draft between 16th March and 15th December.
Tankers over 12.0 m. draft between 16th December and 15th March.
Tankers over 12.5 m. draft between 16th March and 15th December.

Within main breakwater, ships exceeding 7.0 m. draft, and within the entrance channel, ships exceeding 9.0 m. draft, are not to operate engines. Ships below above mentioned drafts can only sail at low speed, unless force majeure. Ships over 1,000 g.r.t. cannot operate propeller within 50 m. of berths.
HEALTH: Clearance is effected on arrival. Vaccination Certificates to be presented if required. If suspected disease on board, radio Agents full details before arrival. Upon arrival, yellow flag on foremast during daytime, and one red light at top/one white light at bottom during night-time.
RADIO/VHF: Istanbul Radio, call sign TAH, Izmir Radio, call sign TAN, Mersin Radio TAM.

VHF Radio Telephone Channels 24 and 28, call Channel 16. Position of station: 36° 49′ 00″ N., 34° 36′ 00″ E.
M/F-R/T frequency: 2,820 kHz, call 2,182 kHz.
M/F-W/T frequency: 516 kHz, call 500 kHz.
Telephone: 9 741 13456, 9 741 23654, 9 741 26765 and 9 741 26766.

Radio messages to be routed to Agent, preferably via Istanbul Radio.
Telex communication always possible with Agent.
VHF communication possible with Agent through Channels 16, 68, 71, 74.
TUGS: 7 tugs available up to 3,200 h.p.
Tug Requirements:
Vessels 500 – 3,999 g.r.t.: One tug.
Vessels 4,000 – 14,999 g.r.t.: Two tugs.
Vessels over 15,000 g.r.t.: Three tugs.
Ship's lines are used.
BERTHING: Priority to Army, food relief and passenger ships. Second priority to Ro-Ro and Container vessels. If no berth available then ships to wait for turn in roads at anchor.

No. 24 (Free Zone)	200	8.0

CRANES/EQUIPMENT: The equipment at the port includes 1 floating crane of 60 tons capacity; 5 quayside container gantry cranes of 40 tons capacity; 17 shore cranes of 3 to 35 tons capacity; 3 reach stackers of 40 tons capacity; 13 rubber tyred transtainers of 40 tons capacity; 18 mobile cranes of 5 to 25 tons capacity; 5 container forklifts of 10 to 42 tons capacity; 46 general cargo forklifts of 2 to 5 tons capacity; 32 tugmasters; 1 loader; 10 tractors; 43 trailers of 40 tons capacity; 9 trailers of 15 tons capacity; 10 trailers of 20 tons capacity and 2 pneumatics of 50 tons/hour capacity.
CONTAINER FACILITIES: The container terminal has 3 berths which have an alongside depth of 12.0 m. The total length of the berths is 710 m. The container terminal covers an area of 251,350 sq.m. The holding capacity at the container yard is 8,474 TEU (full and empty).

Container handling operations at the terminal are carried out by 5 quayside container gantry cranes of 40 tons capacity; 13 transtainers of 40 tons capacity; 3 reach stackers of 40 tons capacity and 5 container forklifts of 10 to 42 tons capacity. There are 2 container freight stations of 9,000 and 1,309 sq.m. Another facility available at the terminal is the provision of reefer facilities for refrigerated containers.

Also see "Developments".
BULK CARGO FACILITIES: Conveyor system available.
Loading rate: 1,200×2 = 2,400 t.p.h.
Discharging rate: 600×2 = 1,200 t.p.h.
Silo capacity: 100,000 tons.
STEVEDORES: Gangs of stevedores secured by the Agent through the Port Monopoly, to be ordered 24 hours prior to arrival, 7 days a week, 24 hours a day service.

Average discharging/loading rates:
100 tons per shift general cargo.
200 tons per shift bagged cargo.
150 tons per shift baled cargo
175 tons per shift bulk ore
Max. rate for ore 400 tons per shift if grab loading.
3 shifts per day (0800 hrs. – 1630 hrs., 1630 hrs. – 0030 hrs. and 0030 hrs. – 0800 hrs.).

Above are ideal rates, and may vary according to kind and stowage of cargo.
MEDICAL: Agent to receive advance notice if urgent medical aid is required on arrival. Hospitals, dental facilities and all other medical facilities are available.

TANKERS: *ATAS Refinery Terminal:* Depth in harbour channel and pier is 14.0 m. Max. LOA 299 m.

Tankers in ballast up to 15,000 d.w.t. may berth/unberth at any time, day or night. Other vessels manoeuvre in daylight hours only.

One finger pier, berths for 2 tankers at one time, 10 in. hose connections to 26 in. shore line. Loading rate 1,000 cu.m.p.h., discharge rate 1,500 cu.m.p.h.

DENSITY: Salt water 1025.

FRESH WATER: Fresh water supplied by barge (100 tons capacity), but otherwise by shore installation at the rate of 15 t.p.h.

FUEL: Most types of marine fuel and lubricants available for delivery to ships.

With 48 hours notice, Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron and B.P.). Telex: 29048 Bunk TR. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy Istanbul, Turkey.

CONSULS: Belgium, Denmark, Italy, Sweden, United Kingdom.

REPAIRS: Small craft repairs possible.

SURVEYORS: Cargo Inspectors such as Lloyd's, SGS, etc., available.

GANGWAY/DECK WATCHMEN: Available and recommended.

OPENING/CLOSING HATCHES: Owners or Masters to decide whether this work should be undertaken by the stevedores or by the crew.

CUSTOMS ALLOWANCES: 600 cigarettes and 7 bottles wine/spirits per crew member.

CARGO GEAR: Generally shore cranes operated. However, ship uses her own means when such cranes are not available. Full lights to be supplied by ship.

REPATRIATION: Repatriation arranged by Agent.

AIRPORT: Adana Airport, 60 km. from the port, served only by domestic line THY-Turkish Airlines, with routes to Northern Cyprus (Ercan), Ankara and Istanbul, twice a day.

TIME: GMT plus 3 hours.

HOLIDAYS: Republic Day (October 28th afternoon, October 29th); New Year's Day (January 1st); Independence Day (April 23rd); Youth and Sports Day (May 19th); Victory Day (August 30th); Ramazan Bayram (Religious Holiday – 3 days); Kurban Bayram (Religious Holiday – 4 days).

Discharging/loading effected on all holidays except the first two days of Religious Holidays.

Piers in the Free Zone work on holidays.

POLICE/AMBULANCE/FIRE: Telephone numbers: Police 055; Ambulance 13555, 26770, 077; Fire 000.

TELEPHONES: No installation for connection on board.

SERVICES: Special services available through Agents and/or ship chandlers.

STORING: Vessels can be stored by trucks. Trucks can proceed alongside at the berths. Forklifts can be used on the jetty if needed.

SHORE LEAVE: Crew allowed shore leave. Shore passes are issued.

IDENTIFICATION CARDS: Seamen's Book is sufficient.

GARBAGE DISPOSAL: Collection service is available and drums or skips are provided on board. Contact Mesbas Mersin Free Zone Corp. Tel: 90-741-39575.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: Turkish Lira (TL).

BANKS: Local/National/International Banks are available.

DEVELOPMENTS: In order to develop the port into a container distribution and collection centre, Berths No. 9 and 10 will be extended by about 270 m. with an alongside depth of 14.0 m. The construction works have already commenced. Berths No. 3 and 6 will be extended by about 175 m. in their own direction with an alongside depth of 12.0 m., and Berths No. 17, 18 and 19 will be expanded with an alongside depth of 12.0 m.

SHIPMASTER'S REPORT: February 1992.

Documentation: The vessel was cleared very quickly whilst at anchor by the Agent and one Customs Officer.

The Ship's Register and all certificates have to be presented to the Harbour Master.

Documents required were: IMO Crew List, Stores Declaration, Personal Effects Declaration, Inward Manifest and Transit Manifest.

Pilotage: The Pilot boards to seawards of the channel buoys, depending on weather, and on departure he leaves at the breakwaters. The pilot cutter has a black hull with white superstructure. There is one pilot on duty at all times and the shifts are from 0000 hrs. – 0800 hrs., 0800 hrs. – 1600 hrs. and 1600 hrs. – 2400 hrs. There are likely to be delays at change-over times.

The pilot is available on VHF Channel 12 throughout 24 hours.

Anchorages: Anchorage is to the S.W. of the breakwaters in position Lat. 36° 46′ N., Long. 34° 39′ E. This location is clear of the entrance channel. The anchorage is exposed to most winds and the holding ground is poor.

Vessel should be aware of the SPM gantry and storage tanker in position Lat. 36° 45.97′ N., Long. 34° 41.35′ E. At night, it looks like a normal vessel at anchor with normal decklights and no special navigation lights.

Depth: There is a table indicating drafts in the sailing direction, but this is a guide only and is not rigidly enforced.

The entrance channel inside the breakwaters, the turning area and the channel to the ATAS Oil Jetty is being dredged to 15.0 m. and the channel to the container berths and the Grain Silo Jetty is being dredged to 11.0 m.

When we were alongside Commercial Quay (Berths No.6 and 7), the sounding ranged from 8.4 m. – 10.6 m. (See "Plan").

Tugs: There are 3 modern tugs available, 2×3,500 h.p. and 1×2,000 h.p. Ship's lines are used with the long drift.

When berthing we used 1 tug, and when departing we used 2 tugs. In each case, the centre fairleads were used.

Restrictions: Vessels of less than 15,000 g.r.t. not carrying dangerous IMO rated cargoes can berth and unberth throughout 24 hours. Vessels over 15,000 g.r.t. and all vessels carrying dangerous goods can be and unberth in daylight hours only (0700 hrs. – 1700 hrs.).

Berths: The container berths are now completed and are dredged 11.0 m. There are 5 container cranes, 3 on the West Quay and 2 the East Quay.

The Commercial Quay was very busy. Discharge of vegetable from parcel tankers is undertaken at this quay.

On Berth No.4, at the South end of the Commercial Quay, a dep 10.0 m. is quoted. Vegetable oil tankers can berth at any berth on Commercial Quay as portable gantries are used, depending on dra

Cargo: The discharge of vegetable oil is slow.

On our visit, the discharge rate averaged 20 t.p.h. due to the vegeta oil in the road tankers freezing up on the journey to the plant in Anda which is 70 km. away.

Discharge is through 1×4 in. diameter rubber shore hose and sh reducers, to portable gantry which covers 2 trucks. Each loading ho is 2.5 in. diameter.

If no other ship is discharging vegetable oil, 2 gantries can be provi with individual hoses, joined at the ship's side into 1×4 in. hose.

There are generally long stoppages waiting for trucks.

The maximum discharge rate with 2 gantries and no stops is ab 100 t.p.h.

It was difficult to obtain information from the shore as to when tru would be available.

Medical: Good medical facilities available.

Fresh Water: Fresh water is available at the quay at a rate of 10 t. Loading is through ship's hoses and no meter is available. The cos U.S.$ 4.00/tonne.

The cost of water by barge is U.S.$ 5.00/tonne and supply is sub to a 3 mile limit outside the breakwaters. The service by barge unreliable.

Surveyors: Lloyd's exclusive surveyor available.

Repatriation: Outward visas are required and must be obtained du normal office hours (not Saturday afternoon, Sunday or public holida Airport tax is to be paid in the currency of the passport holder (U.K.£ 5 or U.S.$ 10.00, German DM, etc.). Most third world countries pa U.S.$.

Airport: The nearest airport is at Andana, which is the regional cap and is 70 km. to the N.E. There are many flights to Istanbul and Ank

Weather: During Winter, the weather can be poor and there are o high winds from the North and East. Also temperature can drop be freezing at night. During the Summer, the weather is very hot and th are a lot of flies and insects about.

General: The standard of English spoken was fairly good.

The Commercial Quay is within easy walking distance of the c Leather goods and gold jewelry of good quality are available.

Ship Chandler: Fresh produce is good and cheap when in season.

Waste Oil Disposal/Slops: The Harbour Authority has available a 5 road tanker for collection of slops. The charge for the use of this ser is U.S.$ 480 for 1 tonne or 20 tonnes. Engine room bilge water accepted.

NEMRUT BAY (including Foca): 38.46 N. 26.55 E.

(See Pl

PORT LIMITS: Nemrut Bay is situated on the South side of the po Aliaga (See "Aliaga"). It is the area between the mainland and a stra line drawn True North from Kizilburun which is situated in pos Lat. 38° 45′ 00″ N., Long. 26° 53′ 50″ E.

The Bay is divided into two areas, the inner port and outer port.

Inner Port: Is the area remaining between the imaginary line conne the South end of the Petkim Petrochemical Complex's breakwater Karacadogan Penisula situated in position: Lat. 38° 46′ 10 Long. 26° 54′ 22″ E.

Outer Port: Is the area between interior port and Nemrut Bay bound

DOCUMENTS: See "Izmir".

PILOTAGE: Pilotage is compulsory for all vessels arriving at Ne Harbour. There are 2 pilot stations at Nemrut Harbour.

(A) Petkim Pilot for Petkim Quays and Petrol Ofisi Quay.

Notice of ETA must be reported 72 hours, 48 hours and 24 h before arrival to the Harbour Master's office at Petkim – Aliaga (No. 51706, 51707, 51709. Fax. No. 0232-6161248, 6162490, 616 VHF Channel 16). Time must be in GMT.

VHF Channel 16 is continuously watched at Nemrut Pilot Station ETA may be confirmed on this frequency.

The address of pilot station is as follows:

Petkim Petrokimya Holding A.S.
Aliaga Kompleksi,
Dis Alim Mudurlugu,

Aliaga – Izmir – Turkey
Tel: 0232-6163240 (8 lines), 6161240 (8 lines)
Telex: 51706, 51707, 51709
Cables: Petkim – Aliaga – Izmir.

In the ETA message, the following information must be indicated:

1. Name/call sign of vessel.
2. Nationality.
3. Agency.
4. Length overall, max. draft, gross tonnage, sailing draft and after loading draft.
5. Nature of Cargo (In IMO).

Rendezvous point with Pilot is: Lat. 38° 47′ N., Long. 26° 54′ E., in outer port. In the event of bad weather Pilot joins the vessel in inner port. Two pilot boats of 210 h.p. are available. Call sign of the boat is "TCZJ".

(B) Nemrut Pilot for berths in Nemrut Bay (See "Berthing").

The address of the pilot station is as follows:

Uzmanlar Denizcilik Tic. Ltd., STI.
Ali Getinkaya Bulvari No. 2/2,
Alsancak,
Izmir.
Tel: 0232-6251274, 6251275.
Fax: 0232-4637644.

ANCHORAGES: Anchorage in the inner and outer ports is possible. However, anchorage within the area of 5 cables diameter of middle of interior port boundary is prohibited for safety of sea traffic (See "Plan").

RESTRICTIONS: Mooring to or sailing from the Petkim's Tanker Quay and Ege Gubre's Pier from sunset to sunrise time needs the permission of Port Administration.

MAX. SIZE: See "Berthing".

HEALTH: See "Izmir".

RADIO: Complete MF/SSB type radio, 1.6 – 4.2 MHz International Navigation Code with 31 Channels capacity, radio transmitter 150-350, 300-535, 700-1650, 1650-4250 kHz, and a 4 band SSB/AM receiver.

VHF: Communication within 20-25 miles with VHF radio operating in 156 – 162 MHz band is possible. International navigational bands are used. Station listens on Channel 16. Call sign: "TAB".

RADAR: No radar facility.

TUGS: 2 tugs of 1,225 h.p. and 2,500 h.p. are available. Tugs normally join the vessel in the outer port. 2 additional tugs of 1,200 h.p. and 2,500 h.p. available in near future.

BERTHING: Quays at port of Petkim Petrochemical Complex situated on the Northern side of Nemrut Bay (See "Plan").

Berth No.	*Name*	*Length (m.)*	*Depth (m.)*	*Remarks*
1	Tanker Quay	163	7	Load/discharge lines: 6 in., 8 in., 10 in., 12 in. Constructed for loading/discharging various chemicals such as ammonia, benzene, fuel oil, ethylene oxide, ethylene glycols, chloric hydrocarbons, wash oil.
2	Tanker Quay	175	10	
3	Caustic Quay	60	6	Loading lines: 8 in. for caustic, 4 in. for hypochloride.
4	Naphtha Quay	90	14	Out of service.
	Salt Quay	190	6	Constructed for discharge of salt to be used at Chlorine Alkali Plant.
5	Tanker Quay	285	13	Load/discharge of naphtha, benzene, ammonia, caustic, fuel oil.
6	General Cargo Quay	338 (175+163)	10 – 7	Constructed for loading/discharging various petrochemical raw materials, products and equipment.
	Petrol Ofisi Quay			Loading petroleum products.

Quays on the Eastern and Southern side of Nemrut Bay (See "Plan").

Name	Length	Depth	Remarks
Ege Gubre Pier	122.90	12 – 14	Private jetty constructed for discharging/loading raw materials and products of fertiliser facility. Rate 1,000 tons/day.
Limas Pier	154	12	Private jetty constructed for discharging/loading iron scrap and iron products of Ironworks in Izmir.
Cukurova Pier	167	15	Private jetty constructed for discharging/loading iron scrap/iron products of Ironworks in the site. Also see "Shipmaster's Report" dated October 1992.
Nemtas Pier	210	7-21	Private jetty constructed for loading/discharging iron and steel products of Ironworks at site.
Habas Pier	220	10-20	Private jetty for loading/discharging iron and steel products.

CRANES: Fixed/mobile cranes are available at Petkim Petrochemical Complex.

Lifting capacity of 2 cranes at Salt Quay is 3 tonnes each. Salt is transferred by conveyor belt to the plant. One mobile crane of 270 tonnes lifting capacity, 2 mobile cranes of 150 tonnes, 2 mobile cranes of 110 tonnes and 55 mobile cranes of 12 – 30 tonnes lifting capacity are available.

Nemtas and Cukurova have mobile crane facilities. Limas has 2 fixed cranes each with 10 tonnes lifting capacity. Ege Gubre has 1 × 10 ton crane.

BULK CARGO FACILITIES: See "Berthing" – Salt Quay and General Cargo Quay.

SPECIALISED CARGO HANDLING FACILITIES: Loading and discharging lines of liquid chemicals available at Port of Petrochemical Complex (See "Berthing").

MEDICAL: Hospital near Petrochemical Complex.

TANKERS: See "Berthing".

FRESH WATER: Available at Petkim's Quays, Ege Gubre and Limas.

FUEL: Available at Petrol Ofisi Quay.

CARGO GEAR: Load/discharge can be effected by mobile cranes at General Cargo Quay (See "Cranes").

AIRPORT: Izmir Adnan Menderes Airport is approximately 75 km. from Petkim Petrochemical Complex.

TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer.

HOLIDAYS: *Official:* January 1st, April 23rd, May 19th, August 30th, October 29th.

Religious: "Bayram" days (Id-al-Fitr: 3 day, Id-al-Adha: 4 days) of Muslims (These dates are subject to visibility of new moon at Mecca).

POLICE/AMBULANCE/FIRE: Petkim has its own protection and medical units.

TELEPHONES: Available for national and international calls at Petkim.

BANKS: T. C. Ziraat Bankasi, Turkiye Is Bankasi, Akbank, Emlak Kredi Bankasi and Vakifar Bankasi in Petkim site.

SHORE LEAVE: Petkim's permission is needed at Petkim Quays.

IDENTIFICATION CARDS: The list of personnel leaving/joining the vessel should be announced to Petkim.

GARBAGE DISPOSAL: *Petkim:* Service can be ordered through Port Authority. Call "Nemrut Pilot" on VHF Channel 16. Service is free of charge provided vessel has Garbage Disposal Certificate, otherwise U.S.$ 45 per 1,000 g.r.t.

WASTE OIL DISPOSAL: *Petkim:* Ballast line available to waste treatment plant for ballast and slop disposal. Service is free of charge provided vessel has Disposal Certificate, otherwise U.S.$ 60 per 1,000 g.r.t.

SEAMAN'S CLUBS: None. Usual local facilities.

GENERAL: Piers and facilities at Nemrut Bay are owned by industrial companies located in this area.

SHIPMASTER'S REPORT: July 1980 (Updated 1992).
Port of Foca: Vessel discharged ammonia.

Approach: Charts: BA 1087, 1618.

The approach presents no real difficulties since good positions may be obtained from the coast either by radar or visual bearings. There was some haze on our approach but it did not pose a serious problem.

Berth: Consists of an "L" shape with the jetty being 125 m. in length. Distance to the foot of the jetty being about 300 m. The jetty is of concrete construction, standing on pilings and is fendered throughout with large tractor tyres. Ample mooring posts, although arrangements are not good for a vessel of this size.

There is a conveyor belt running the length of the jetty and to the shore plant. Two loading hoppers on the jetty. The Chicksan consists of a tall crane-like structure which is swung into position.

Connection: 6 in. 300 ASA. Shore provides 10 in./6 in. 150/300 reducer. The gangway may be swung out prior to arrival.

Density: 1028.

Discharge: Co-operation with the shore personnel very good, especially with the senior operators and managers. At a lower level language is the only problem. Shore personnel connect lines.

General: Fresh Water: Not available. (A vessel that visited at a later date reported that fresh water of good quality was available (metered) from a line amidships).

Fuel: Not available.

Officials: Officials are located in Nemrut Bay.

The same cargo surveyor attends the vessel at Gemlik, Foca and Mersin.

Since this was the second port of call in Turkey the vessel is issued with a travelling manifest to cover cargo and a carrier for ship's stores. The procedure differs from port to port but ship's bonded stores are sealed from arrival Turkey to departure, although visiting Customs enter on arrival at a port. We did not have any trouble requesting the bond to be opened prior to departure.

Doctor: Available at 20 minutes notice.

Repairs: Not possible.

Surveyor: Available.

Chandler: Available.

SHIPMASTER'S REPORT: September 1980.
Port of Foca:

To be read in conjunction with the previous report.

Approach: From the North (Dardanelles). 10 miles can be saved by going down 'Muslim Kanali' and 'Stenon Mitilimis' to the East of Nicos Lesvos (BA 1665) instead of going to the West of Lesvos.

There is one narrow spot but in two transits during September 1980 presented no problems at full speed. There is little traffic.

Southbound: Keep to North side of Muslim Kanali about 0.5 miles off Turkish coast to avoid Muslim Kaya shoals (beware of Southerly set).

Northbound: Once past Muslim Kaya shoals, turn W.S.W. to avoid any Eastbound traffic round Baba Burnu then 3 miles off Baba Burnu as required.

A further 8 miles can be saved from Dardanelles to Foca by using the channel to the East of Boscadda Island (BA 1608). The problem here is the shallow bank which may require a speed reduction. Not yet tried but the Pilots say quite safe. Approaching Nemrut Liman plenty of fixes can be obtained. With a Northerly or North Easterly wind the bay acts as a funnel and a considerable indraught occurs so care should be exercised so that the vessel does not get set in.

B.A. Chart No. 1618 should be held.

Approaching Nemrut Liman the construction work and breakwater at 'Petkim' refinery on the North side of the bay is soon apparent although at present the earthworks and tanks tend to blend in with the rather barren landscape.

The whole peninsula between Nemrut Liman and Aliaga Liman is in the course of development for a very large Petrochemical complex.

On the South side of the bay is a general cargo berth to seawards and the fertiliser/ammonia facility at the head of the bay. This facility is marked by a silver-pressure vessel. The Ammonia facility remains hidden by high ground until near the berth.

The vessel can be turned round inside the bay with ease in winds up to N.E. Force 4.

Pilots: Available on 24 hour basis from Aliaga Refinery. Boards either from tug or mooring boat. Gangway/pilot ladder should be 2 m. above water. Side depends on wind.

Pilot boards 1 mile N.W. of Karacadogan Burnu. He either drives across the peninsula to the new chemical berth and boards his boat there or comes by tug around the peninsula from Aliaga Refinery. On VHF Channel 16 when vessel expected. Reasonable English spoken. Pilotage one hour.

Tugs: Three tugs available. Two of 2,400 h.p. from Aliaga Refinery and one of 1,200 h.p. at the new chemical berth.

If there is any wind at all in the bay, two tugs are required both for berthing and unberthing. These should be ordered well beforehand through the Agent.

In my opinion two tugs are required at all times. Ship's lines used.

Berthing: Although on a 24 hour basis, I would not be keen to berth at night especially in Winter months due to the strong Northerly wind pushing vessel onto the berth.

Can berth port or starboard side alongside. For this size vessel (32,000 g.r.t.) port side to is the most suitable as leaving the berth is not hazardous as possibly starboard side to would be.

Vessel headed into berth at 90° with bow onto the N.W. corner. When about 2 cables off starboard anchor let go and the stern pulled round by tug.

Make sure stern tug (when vessel parallel with quay) pulls on starboard side otherwise stern will strike quay (September 1980).

Moorings: (See "Plan"). Back spring first forward, starboard buoy line first aft. Mooring boat available.

Berth: The fendering arrangements are poor. Consisting of large tractor tyres. The main problem is at the corners or knuckles where the tyres are strung too low to stop the bow or counter flare hitting the concrete (September 1980).

Protest noted in September 1980 about fenders. Operators say they will raise fenders and offer protection at corners.

Maximum air draft 14 m. in September 1980 call, we used the low loader, which was very beneficial.

Discharge: A discharge rate of 150 t.p.h quoted. Around the 200 t.p.h. is normal. July and September 1980.

On completion the shore personnel drain their line direct into the sea. All personnel engaged in uncoupling must wear full breathing sets. Cargo Engineer and Officer of the Watch went through three bottles each. (September 1980).

The facility has a storage capacity of 2,800 tonnes and a monthly consumption of about 1,500 tonnes.

Phosphoric and Sulphuric acids are also handled.

General: If second or third port, vessel issued with travelling manifest from previous port to cover cargo and ship's stores.

Be careful to retain Turkish Light Dues Certificate, if last port, for next Turkish call.

In addition to travelling manifests other papers required:

2 Crew Currency Lists.
2 Crew Declarations.
6 Crew Lists.
1 Vaccination List.
1 List of Cash in Ship's Safe.
1 Health Declaration.
2 Lists of Ship's Particulars (Turkish Form).
2 Lists of Previous Ports.
6 Copies of Cargo Manifests (to be stamped at previous port if Foca second or subsequent port).

SHIPMASTER'S REPORT: October 1987.

Chart: B.A. Chart No. 1618.

Documents:

8 copies Crew List.
2 copies Crew Declaration.
2 copies Manifest.
1 copy Health Declaration.
8 copies Cargo Manifest.

Approaches: Good positions are obtained on approach. Crude carriers generally berth in Aliaga Bay and product and gas vessels in Nemrut Bay.

Pilotage: Pilot is based at the Dock Office of the Petkim Refinery in Nemrut Bay. Pilots also undertake berthing at other Nemrut Bay berths.

Pilotage is available 24 hours but in general pilotage not available between the hours of midnight and 0600 hrs. for berthing.

Pilot boards from a small black hulled cutter. Excessive use of the tug and anchor was made.

The Pilot boards 0.5 miles west of FL.R. light on Petkim Breakwater.

Prior to arrival Pilot may be contacted by Telex No. 607 53950 PETE TR and on approaching may be contacted on VHF Channel 16.

Anchorage: There is a prohibited anchor circle on BA. Chart No. 1618 but this does not seem to be observed. We found a good anchoragecables west of the FL.R. light of Petkim Breakwater. In October 1987 there were many ships at anchor.

Tugs: There are two tugs on standby (1 x 1500 h.p. and 1 x 2,500 h.p.) at Petkim Dock and they require 15 minutes notice. Ship's lines used.

Berthing: At Petkim Refinery in Nemrut Bay there are 6 berths. There are 3 berths for product and gas ships. 1 berth for Naphtha (vessels berth stern to), 1 berth for caustic soda and 1 general cargo berth. The two product berths are on the N.W. side of Petkim Dock and the general cargo berth is on the S.E. side.

The water depth in the dock is about 30 ft. although there is more water at the outer end.

The product berth which is on the outer side of the N.W. breakwater was damaged by Winter storms and was out of use.

We berthed head in port side to at the product/gas berth and used the offshore anchor. Moorings consisted of 2 head/stern lines, 1 breast line and 2 springs at each end. The berth was well fendered. Ship's gangway used.

Cargo: A full range of gases are handled for import and export, includ ethylene. Also many chemicals and products are handled.

We discharged propylene with back pressure of 12 Bar (Maxim back pressure allowed 20 Bar) at 50 t.p.h., heater discharge to +5 We used a 6 in. Chicksan arm for liquid and a 4 in. hose for vap return line.

We believe 4 x 4,000 cu.m. spheres used for storage of press gases. The Terminal and Surveyor were very helpful. Hot vap pumped ashore on completion. The English spoken was fair.

Fresh Water: Fresh water is available from Petkim Dock and at a go rate. Shore hoses used.

General: Nearest airport is at Izmir with flights to Istanbul and Anka

Ship chandler available locally.

There are 4 berths on the West side of Nemrut Bay. One berth be for ammonia (Foca) and 3 for steel, scrap and finished exports.

SHIPMASTER'S REPORT: October 1992.

Berth: Cukurova Jetty.

Cargo: 46,000 tons of scrap steel.

Documents: Copies of all the ship's main classification certifica including the IOPP Certificate. All certificates must be valid.

6 Crew Lists.
2 Crew Declarations.
2 Bonded Stores Lists.
2 General Declarations.
1 Cargo Plan.
1 List of Medical Drugs and Narcotics.
Photostat of the Master's Passport.

General: On arrival, no berth was available for our 60,000 t displacement vessel, which was the largest to enter here. In orde offset harbour dues, which for our ship was $ 17,000, we dropped and in position outside of port limits in 38° 45.8′ N., 27° 53.2′ E. (B.A. Ch No. 1618). Northwest winds were strong at times, up to Beaufort Force but even with 8 shackles of chain out the ship held well. The sea b was found to be light grey ooze/mud.

Density of the water was found to be 1028.

Berthing at Berth No. 4 was done with the assistance of 2 tugs 1,200 h.p. and 2,200 h.p. All vessels drop the outboard anchor prio coming alongside.

The jetty is well fendered, and as our vessel was 213 m. LOA, a the berth being 185 m. in length, quite a considerable overhang had be made to allow vessel alongside. Mooring is assisted with the aid a lineboat.

The depth of water was sounded after berthing and found to 30.0 m., forward and aft.

Cargo operations were very fast. Shore labour drove the vess 6 cranes, and daily discharge was rated at 5,000 tonnes per day. T cargo is dropped into adjacent hold hoppers on the jetty and into awai trucks. Damage to the ship was minimal, but whatever was noted, w repaired by Cukurova's own welders prior to departure.

The grabs for the crane of approximately 4.0 cu.m. are also suppl by Cukurova, and these are electro-hydraulic type, the power sou being derived from the ship's power supply of 440 V., to junction box at each hold. Care must be taken with the run of electric cables be subject to rupturing by falling scrap metal.

NOTE: The vessel must sail within 2 hours of the completion of the f draft survey, otherwise the ship will be charged with a further day's p dues.

Fuel is available by barge from either the Petkim Jetty or from Istan but plenty of notice is to be given.

Fresh water is available at the anchorage, at $ 20.00 per ton. At berth, it is available by truck at prices ranging from $ 3.00 – $ 10.00 ton, depending upon the chandler.

Provisions are plentiful, especially local fruits, vegetables, etc., imports are expensive.

In our case, we had to have hydraulic hoses made up for the cra at 300 Bar pressure, and these were very expensive.

There are no medical facilities at Nemrut Bay, the nearest bein Aliaga, 20 minutes drive from the berth.

Nemrut Bay is strictly a steel work jetty/works. There is nothing here, nor is there any connected telephone lines, but Agents equipped with mobile telephones for communications. Other than there is always Aliaga Radio on VHF, which is quite good.

FINAL NOTE: There is no limitation as to how much liquor or toba the crew have. Customs Officers will seal the bond on arrival, and not open the same until the vessel is about to sail, when they ascertain that the declared contents have remained in tact.

AUTHORITY: Petkim Petrokimya Holding A.S., Genel Mudurlu Aliaga, Izmir, Turkey. *Tel:* 0232-6163653 (Port Director's pers telephone). *Telex:* 51706, 51707, 51709. *Cables:* Petkim, Aliaga, Turkey. *FAX:* 0232-6161248, 6162490. *Contact:* Mr. Semih Timo Port Director/Harbour Master.

SAMSUN: 41.21 N. 36.34 E. **(See Plan)**

DOCUMENTS:
6 copies Crew List.
6 copies Passenger List (if any onboard).
Customs:
2 copies Crew List.
2 copies Stores List.
2 copies Personal Effects List.
Health:
Valid Derat Certificate.
Maritime Declaration of Health.
1 copy Crew List.
Immigration:
2 copies Crew List.

PILOTAGE: Harbour Pilot compulsory for all foreign vessels. Ordered by Agent subject to vessel's advance notice of ETA.

ANCHORAGE: Good anchorage in the Outer Harbour.

VHF: Samsun Radio (TAF) on Channel 16.

TUGS: 4 tugs abvailable. 1×970 h.p., 1×450 h.p., 1×1,500 h.p. and 1×2,480 h.p.

Vessels over 500 g.r.t. are required to use 1 tug.

Vessels over 4,000 g.r.t. are required to use 2 tugs.

BERTHING: Harbour protected by two breakwaters, entrance width 200 m., depth 11.9 m.

Berth No.	*Length* (m.)	*Depth* (m.)	*Remarks*
1, 2	326	10.5	Dry Bulk
3	150	10.5	General Cargo
4, 5	300	10.5	General Cargo, Passenger, Ro-Ro
6, 7	400	12.0	General Cargo
9	400	6.5	General Cargo
10	180	6.0	General Cargo

CRANES/EQUIPMENT: 17 shore cranes of 3 – 35 tons capacity; 2 yard cranes of 10 tons capacity; 8 mobile cranes of 5 – 25 tons capacity; 20 general cargo forklifts of 2 – 5 tons capacity; 2 tugmasters; 1 loader; 4 crawler cranes of 8 – 10 tons capacity; 5 tractors; 3 trailers of 40 tons capacity; 6 trailers of 20 tons capacity and 1 pneumatic of 50 tons/hr. capacity.

CONTAINER FACILITIES: The port has ample storage areas for containerised cargo. Containers are loaded and discharged by a general purpose shore crane of 35 tons capacity.

BULK HANDLING FACILITIES: There are berths serving dry bulk cargoes with a length of 326 m. and with alongside depths of 10.5 m. An ore conveyor system at the port operating at a rate of 700 t.p.h. is available for vessel loading.

STEVEDORES: Available 24 hours, 7 days a week in 3 shifts:
1st shift: 0800 hrs. – 1630 hrs.
2nd shift: 1630 hrs. – 0030 hrs.
3rd shift: 0030 hrs. – 0800 hrs.

DENSITY: 1013, but changes according to season.

FRESH WATER: Available from the quay.

FUEL: Available.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron and B.P.). Telex: 29048 Bunk TR. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

REPAIRS: Minor repairs possible.

SURVEYORS: Available.

GANGWAY/DECK WATCHMEN: Usually ship's crew and ship's gangway.

OPENING/CLOSING HATCHES: Usually by ship. Can be carried out by shore personnel is required by Master.

CERTIFICATES: Safety Construction, Safety Equipment, Load Line, Safety Radio, Hull Class, I.O.P.P. and International Tonnage Certificates are required. Garbage Pollution Prevention Certificate, if vessel has one.

CUSTOMS ALLOWANCES: 10 packets of cigarettes per man, per week and 1 bottle per man per week.

POLICE/AMBULANCE/FIRE: Available in the port.

AIRPORT: Distance 5 km.

IDENTIFICATION CARDS: All Passports (except Master's) are collected by immigration in exchange for shore pass during vessel's stay in the Port.

WASTE OIL DISPOSAL: An oily water separator system is available with a capacity of 6,700 cu.m./year.

DEVELOPMENTS: New bulk cargo quay under construction. Length 500 m., depth 12 m.

SHIPMASTER'S REPORT: October 1993.

Agents: The Agents (located in Istanbul) were found to be helpful and make all arrangements for Pilots for Dardanelles, Bosphorus and port entry.

A representative from Istanbul remains in the port for the duration of the vessel's stay.

Agents maintain VHF watch on Channel 16 throughout the vessel's stay during working hours and at other times when vessels are expected or by arrangement.

Communications: Arrival Notices were sent through the Agents, who made arrangements for Pilots and berthing.

VHF contact was attempted about 2 hours before arrival at the anchorage, but no reply was received until about 6 miles (30 minutes) off, when contact was made with the Agents.

Pilots for transit of the Dardanelles and Bosphorus were requested through the Agents and pilot stations.

Approaches: B.A. Chart No. 1274.

Found to be as charted, the breakwaters are a good radar target.

Anchorage: The bottom on approaching is steep to, and anchorage East and North of the inner harbour entrance would be on a steep rising bank.

This vessel anchored about 7 cables from Kuzey Menderik (Fl.G.) bearing 310°(T) and lay comfortably overnight in calm weather. The Pilot recommended that large vessels anchor about 6 cables S.E. of the harbour entrance.

Small local vessels anchor within 1 cable of the Dogu Menirek, so close in fact that it was considered from their radar echoes at night that they were wrecks.

Pilotage: The Pilot boards at the anchorage and will check the draft of deep draft vessels before boarding.

For large vessels, tugs are made fast forward and aft using ship's lines, immediately after weighing anchor.

Large vessels are handled carefully and it is likely that both or either anchors will be used to stop the bow swinging at some time during the approach to the berth.

On departure, 2 tugs are also used with ship's lines, the stern tug being let go after turning round in the harbour and the forward tug being let go between the breakwaters.

This vessel berthed port side to the Industrial Quay (See "Plan").

Depths: Maximum draft for the port is 10.5 m., checked by the Pilot before boarding.

The echo sounder showed 0.7 m. under the keel at a draft of 10.42 m. at a point between the breakwaters, off Dogu Mendirek Head.

Depths in the harbour were not recorded due to very poor echo sounder trace, but would appear to be not much more than 11.0 m. at any point.

The depths alongside the Industrial Quay were checked by hand sounding line and showed 10.0 m. at a point about 300 m. from the North end of the quay (See "Plan").

The density of water at draft survey alongside was 1011, but the surveyor gave his opinion that outside it was closer to 1025.

Clearance: Mainly carried out by the Agent. Only Customs and Immigration officials boarded and clearance given with the minimum of fuss.

Shore passes are issued for each crew member and passports are taken by Immigration, and are returned before departure when the shore passes are handed in.

Bonded stores are sealed.

The Agent requests photocopies of certificates after arrival, to complete the clearance ashore:
1 copy Tonnage Certificate.
1 copy Safety Equipment Certificate.
1 copy Safety Construction Certificate.
1 copy Load Line Certificate.
1 copy Safety Radio Certificate.
Minimum Safe Manning and Class.
4 copies of I.O.P.P.

Clearance Outward is similarly civilised, the bond stores remain sealed until the vessel clears the Dardanelles, unless calling at other countries in the Black Sea.

Berth: Industrial Quay: The quay is equipped with one crane of 35 tonnes SWL, one crane of 5 tonnes SWL and 3 cranes of 10 tonnes SWL. The 10 tonne cranes are fitted for grab discharge and single lift and the others are single lift.

Cargoes handled on this quay are bulk, containers and scrap.

Containers are stored on the North end of the quay and are removed either by road or rail and are loaded using the 35 tonne crane.

Grabs are available for handling bulk and scrap with the shore cranes, and grabs are available for use on ship's gear provided they are not in use elsewhere.

The face of the quay is protected by tyre fenders around a wooden core at about 50 m. intervals, some of which are missing, the spaces between by single tyres.

Height of the quay above the water is 1.8 m.

The cranes are close to the dock side and all overside projections should be brought inboard before berthing.

A rail-ferry ramp has been constructed at the North end of the Industrial Quay with an associated berth on steel piles, extending about 200 m. Northwards (See "Plan"). The ramp can be raised and lowered over approximately 5.0 m. range to a height of about 5.0 m. above water level with hyraulic rams, and is connected to the railway system by a single track. It can also be used for road transport. Depths alongside this berth were not checked.

Works in progress (1990), marked on the chart at the Southern end of the Inner Harbour, have not progressed and the Agent reported that nothing was proposed for the area in the near future.

Ship Chandler: There is no official chandler in the port, but fresh provisions can be arranged locally through the Agent. Istanbul chandlers will supply at Samsun, generally through local suppliers for available produce, but prefer to supply when passing through the Bosphorus, which avoids transport charges. Local supplies are limited and if possible it is better to take stores passing Istanbul.

Fresh Water: Available from the berths, the reported price being U.S.$ 7.50/tonne.

Ship's Spares and Mail: Shipped in by airfreight to Istanbul and took a week to clear Customs and arrive on the vessel. It was expected that the vessel was to load at another Black Sea port, otherwise this consignment would have been left at Istanbul for delivery on passing through the Bosphorus. Mail could have been sent to Samsun, but in this case it was covered by the same manifest as the spares.

Surveyors: Lloyd's and other class surveyors are available from Istanbul.

Draft surveyor for cargo also comes from Istanbul.

Cargo Work: Discharge of 38,600 tonnes of coal in bulk was carried out using grabs on shore cranes, initially landing direct to trucks, but later landing on the quay to be loaded into trucks by payloader.

A daily rate of about 4,000 tonnes was achieved using all 3 bulk cranes for most of the time, except for about 2 days when another vessel was discharging.

Best day's work with 3 cranes was 5,618 tonnes and worst day was 3,221 tonnes. There were numerous delays for grab and crane breakdowns and a short delay for fog.

Cargo working is 24 hours in three shifts.

Payloaders for use on board and on the quay were provided by the receivers.

It was reported that this was an exceptionally good out-turn rate, the receivers spending a good deal of time and effort in persuading the stevedores to work as hard as possible.

Discharging rates are quoted by the Agent as U.S.$ 6.00 per tonne for bulk cargo and U.S.$ 8.00 per tonne for general cargo, with no difference for overtime or weekend working.

Discharge was delayed due to Customs problems as the cargo was to be removed from the Industrial Quay bonded area for storage in another bonded area and documentation had to be arranged.

All trucks were passed over a weighbridge before leaving the Industrial Quay area, the shore figure arrived at from this weighing was about 100 tonnes short of the draft survey figure. However, at a rough estimate, about this amount remained on the dock side on the vessel's departure.
Departure: Vessels are allowed 3 hours alongside after completion of cargo before penalty charges are imposed. This will be extended if the Pilots will not take the vessel out in darkness.

Generally arrival and departure is in daylight only, but it is at the Pilot's discretion if vessel movements are undertaken during darkness.
Time: GMT plus 2 hours. GMT plus 3 hours from last Sunday in March until Saturday before last Sunday in September.

7	Fisherman's Quay	200	3.0

BULK HANDLING FACILITIES: Grain handled at the Main Quay us 2 rail mounted loaders. One grain silo with capacity of 10,000 ton and one grain silo with capacity of 20,000 tonnes.
CRANES:
Shore cranes:
6 × 3 tons
1 × 5 tons
2 × 10 tons
1 × 30 tons
Container crane:
1 × 35 tons
Mobile cranes:
1 × 25 tons
8 × 10 tons
2 × 3 tons.
STEVEDORES: Working hours: First shift 0800 – 1600 1600 – 2400. Meal break 1200 – 1300.
TANKERS: *Shipmaster's Report:* August 1992.

Tanker Berths: The mooring buoys are located to the East of the (See "Plan").

Products Handled: Berth No. 1 – Fuel oil. Berth No. 2 – Keros gasoline and gas oil. If discharging to Shell, only 2 grades of c products are handled.

Depth: Reported to be 31.0 m.

Mooring: Two anchors with 6/7 shackles on each and 6 mooring to buoys on each quarter, 100 m. off when in position.

Discharging: 1×8 in. stern discharge for kerosene.

Rate: 350/400 cu.m./hr.

Pressure: 4 kg./N.

Distance to Shore: 800 m.

Vessel: 20,000 d.w.t., LOA 161 m.

Pilot: Not available. A small fishing boat indicates position for drop anchors.

Tugs: Not available.

Communications: Difficult. Trabzon Radio only replies to Tu vessels.

Provisions: Available.

Fresh Water: Not available.
FRESH WATER: Obtainable from the quay, rate 20 t.p.h. – 30 t.p

FUEL: Fuel oil obtainable in limited quantities.

With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

REPAIRS: There are no repair facilities.

GARBAGE DISPOSAL: Garbage disposal service is available. Drums are provided if required. Charges are as follows:

	Cost (U.S.$)/1,000 g.r.t.			
	Flag of Ship		*Cost (US$)*	
Method of Service	*Turkey*	*Others*	*Barge*	*Container*
On Quay	16	45	6	0.70

	Cost (US$)/1000 g.r.t.	
	Flag of Ship	
Method of Service	*Turkey*	*Others*
On Quay	20	60

Facilities include two oily water separators of 2 tons per hour capacity and shore tank of 100 tons capacity.

Contact: Tel: 031-11156. Telex: 82150 TRDZ. Fax: 031-21004.

SEAMAN'S CLUBS: There is no seaman's club operating in the port, but the port is situated near the city, and all shopping, international telephone, some sporting activities, dances, transportation, and postage facilities are available there.

CURRENCY: Turkish Lira (TL). U.S.$ 1.00 = 18,958 TL (8.3.94).

DEVELOPMENTS: One quay of 400 m. length near completion. Depth alongside 10 m.

AUTHORITY: Ports Management, Trabzon Liman Isletmesi Mudurlugu, Trabzon, Turkey. *Tel:* (462) 3211156, 3211157, 3262367. *Telex:* 83150. *FAX:* (462) 3211013. *Contact:* Muhsin Yavuz, Harbour Master. Tel: (462) 2133073. Fax: (462) 3262782.

TUTUNCIFILIK: 40.45 N. 29.47 E. (See Plan)

SHIPMASTER'S REPORT: July 1981.

LOCATION: TUPRAS berths are situated just South of the 'Petkim' chemical complex at Yarimca (See "Yarimca"), as before the railway seems to be the dividing line between TUPRAS and PETKIM.

PILOTAGE/APPROACHES: See "Yarimca".

TUGS: Three tugs generally used. 1 Government and 2 TUPRAS. All large and powerful but rarely use their full power.

As a rule tug's lines used for berthing and ship's lines departing.

BERTHING: For LPG carriers, 2 berths are used. Also refined product carriers use same berths. Crude is imported to a sea island for VLCC's and on the original old jetty for smaller tankers.

The original jetty for all tankers is at the Southern corner of the refinery at Kilier Bar. This is not now used for LPG.

A new berth constructed in 1979/80 is now open 0.5 miles North of the old jetty. At present only the North side of the new jetty is used (No. 2) but soon the Southern side will be in use for all larger vessels for all grades.

The new berth is of modern concrete pile construction with a roadway out from the shore taking the pipes, with the berths leading off at 45° with 4 mooring/fender dolphins to seaward, connected by catwalks.

Draft alongside both berths is 18 m. with 3 m. clearance. Fenders and mooring arrangements are good.

Vessels generally berth head in, so can go either side alongside.

A small tug jetty is at the root of the main jetty.

See "Plans" for dimensions and general layout of all berths.

Mooring: Mooring boat used. 3, 2, 2, each end with line up very precise. Bow comes near the end of the jetty where it bends at 45° to a roadway.

CARGO HANDLING: *Discharge:* Valves shut against ship without warning, high back pressure – 7.5 to 8 bar., and line draining at completion non-existent. 8 in. rubber discharge hose 150 ASA.

No vapour return line as yet, and cannot see one on jetty, but one on old jetty suddenly appeared with TUPRAS wanting to return benzene to the ship.

5×10 in. Chicksans for refined products on North side.

5×12 in. Chicksans plus 2×16 in. Chicksans on South side.

Control hut at seaward end of roadway with telephone and a couple of operators.

Rate 250 – 300 t.p.h. when all shore valves open.

FRESH WATER: Available.

DENSITY: 1017.

SURVEYORS: Employed by Turkish Survey Bureau.

GENERAL:

Gangway: Can be a problem due to dolphins. We used accommodation ladder with half BOT gangway section between bottom platform and dolphin.

Customs/Immigration: Customs Officer on board requires room continuously.

Facilities: Agent very helpful. Personnel change through Istanbul Airport without too much difficulty.

Curfew in force from 2400 hrs. to 0500 hrs. for ship's crew, 0200 hrs. to 0500 hrs. for local population.

Overseas telephone calls delayed about 2 hours during weekdays and 30 minutes at weekends.

Lloyd's Surveyor from Istanbul – to be arranged 24 hours in advance.

Medical facilities from TUPRAS or local doctor through Agent. Izmit about 30 minutes by taxi/car.

General stores, apart from some fresh provisions, are difficult to obtain.

SHIPMASTER'S REPORT: January 1986.

DOCUMENTS:

6 Crew Lists together with passports for all persons onboard.
2 Lists of Provisions, Stores and Bunkers.
2 Manifests of all cargo onboard.
2 Crew Effects Declarations.
2 Declaration of all Money and Cheques carried in ship's safe.
2 Maritime Declarations of Health, one form supplied on arrival, one form supplied at Canakkale or Buyukdere when passing inwards.

PILOTAGE: Compulsory Pilot inwards at Darica Burnu. VHF contact possible. Call Darica Pilots on VHF Channel 16 normally working Channel 14.

Pilot boards from small tug, ladder should be about 1 m. above the water. Tug equipped with VHF but personnel only Turkish-speaking.

The Pilot berths all vessels at all Gulf of Izmit ports.

Pilots depart either off Darica or off berth depending on other employments and vessel's size.

Pilotage operates 24 hours.

APPROACHES: See B.A. Chart 497.

ANCHORAGE: The anchorage is situated to the Northwest of the berths, off Yarimca. Pilots consider it safe for any size of vessel.

MAX. SIZE: Max. draft 18 m. (59 ft. 00 in.) permitted at the new berth according to the Pilots.

TUGS: Up to 5 tugs used when berthing at Sea Island. 3 government and 2 TUPRAS. (TUPRAS tugs 2,500 h.p. each).

All tugs are large and powerful but rarely use their full power.

At the other berths three tugs generally used.

BERTHING: For LPG carriers 2 berths are used, also refined products carriers use the same berths.

Crude is imported to a Sea Island for VLCCs and to the original old jetty for the smaller tankers.

The original jetty is at the Southern corner of the refinery at Kilier Bar.

A new berth has been constructed some 0.5 mile North of the old jetty. The new berth is a modern concrete pile construction with a roadway out from the shore taking the pipes, with the berths leading of at 45° with 4 mooring/fender dolphins to seaward, connected with a catwalk.

Vessels berth on both sides of this jetty, generally head in. Fender and mooring arrangement is good. This jetty is used for LPG and refined products.

The Sea Island consists of a platform with three dolphins on each side. There are no connections between the platform and the dolphins. Fendering and mooring arrangements acceptable for tankers of 150,000 d.w.t.

Vessels normally berth port side to at the Sea Island.

2 mooring boats are used for rope handling.

CARGO HANDLING: *Discharge at New Berth:*

Valves shut against ship without warning, high back pressure – 7.5 to 8 Bars. Line draining at completion non-existent.

8 in. rubber discharge hose, (150 ASA).

No vapour return line.

5×10 in. Chicksans for refined products on North side.

5×12 in. Chicksans and 2×16 in. Chicksans on the South side.

Control hut at seaward end of roadway with telephones and operators.

Rate 250-300 t.p.h. when all shore valves opened.

Discharge at Sea Island:

4×16 in. Chicksans for crude. 3 normally connected. Generally low back pressure, but at times, when topping up of shore tanks, discharging rates reduced considerably.

Loading Masters have Control Room at platform. Communication with them by VHF. Communications sometimes difficult due to language problems. One representative of TUPRAS stays onboard throughout discharge.

DENSITY: 1017.

FRESH WATER: Available at all berths.

FUEL: With 48 hours notice Petrol Ofisi can supply marine fuels and lubricants (Mobil, Shell, Chevron & B.P.). Telex: 29048 Bunk Tr. Tel: (1) 338 25 09/337 36 86/337 88 31/336 06 36. Mailing address: Petrol Ofisi – Haydarpasa, Mehmet Ince, Kadikoy, Istanbul, Turkey.

SURVEYORS: Employed by Turkish Survey Bureau, Katoni Persa or other local Turkish companies.

GENERAL:

Gangways: Can be a problem at the new berth, due to dolphins. At Sea Island, gangway from the platform.

Telephone: Overseas calls delayed about 2 hours during weekdays and about 30 minutes at weekends.

Lloyd's Surveyor: Comes from Istanbul. Has to be arranged 24 hours in advance.

General Stores: Apart from fresh provisions, difficult to obtain locally. Can be arranged from Istanbul but transportation costs are high.

Fuel: Available by barge only. It is more economical to anchor off Istanbul for fuel. All fuel supplied from Istanbul.

Airfreighted Stores: No difficulty with getting items onboard. If spare parts are to be taken onboard, items that cannot be carried will be put on a barge. Transportation costs are high.

Pollution: Strict anti-pollution laws in operation.

Facilities: Curfew has been in force earlier for ship's crew. In January 1986 no restrictions in force.

AUTHORITY: TUPRAS-Izmit Rafinerisi Bolge Mudurlugu, P.O.Box 43, Izmit, Turkey. *Tel:* 31660-31665, 20330-20333. *Telex:* 22285, 33152, 33153, 33154. *Cables:* Umipras, Izmit.

Izmit Liman Baskanligi, Yarimca, Turkey. *Tel:* 90-211-73754. *Telex:* 33292. *Contact:* Atilla Gorgunler.

YARIMCA: 40.45 N. 29.45 E. (See Plan)

SHIPMASTER'S REPORT: November 1980 (Updated 1994).

Petkim is an Industrial complex at the entrance to the Gulf of Izmit, near Yarimca. It includes the factories of Petkim to the North and TUPRAS to the South (See "Tutuncifilik"). As far as can be gathered the railway line is the dividing line.

A wide range of oils, chemicals, gases, bulk fertilisers and chemicals are handled. The Products Pier which handles ammonia is in position Lat. 40° 45.4′ N., Long. 29° 45.1′ E., close by is a bulk handling berth with a solid quay face.

The area in general is one of the main trading areas for overseas shipping in Turkey.

To the North West of the Refinery at Yarimca is Hereke, another important shipping complex.

PILOTAGE: Compulsory Pilot inwards at Darica Point. VHF contact may be possible. Izmit Pilot Office which is the control centre works on Channels 14 and 12.

Proceed to position off Darica Point and sound 'G'. Pilot boards from small tug and the ladder should be about 1 m. from the water.

The Pilot berths all vessels at all Gulf of Izmit ports.

Pilot departs either off berth or at Darica, depending on other pilotage requirements and curfew. Pilotage operates 24 hours.

APPROACHES: See B.A. Chart 467.

TUGS: Two Government tugs available, 1×2,000 h.p. and 1×2,500 h.p. If additional tugs are required they come from Istanbul. For IPRAS refinery only, there are 2 tugs of 2,500 h.p. Tugs generally use ship's line. Tugs rarely use all their power.

BERTHING: Berthing and unberthing throughout 24 hours. The berth is the usual type of tanker berth consisting of a 'T' shaped jetty at the end of a pipeline roadway. There are dolphins connected by catwalk to main pier, plus further isolated mooring dolphins about 50 m. off inner dolphins.

Mooring Arrangements: Hydraulic hook release system in use.

Dolphins have good fenders and ship's centre section stands off jetty face. After dolphin (if port side to) comes on counter. Generally port side to due to anchored vessels, making starboard approach difficult. But possible for starboard side alongside.

It is safe to swing gangway out before berthing. It should be on the end of a derrick as it has to be swung clear of lamp post on quay and landed at an angle of 45°.

DISCHARGE: There are lines for naphtha, benzene, butadiene vapour and liquid, ethylene vapour and liquid and ammonia vapour and liquid. Butadiene 8 in., ammonia 10 in., both sets Chicksans, others use hoses. The ammonia connections are the Southerly set, ammonia coupling 10 in. 300 ASA to spool piece 12 in. 150 ASA. The ethylene connections are Connex set with 8 in. and 300 lb. coupling made with cold materials. The Shore personnel effect the connection. In total there are 15 lines for loading and unloading of various chemicals such as Naphtha, Benzene, Butadiene vapour and liquid, Ammonia vapour and liquid, Aromatic oil, Naphtenic oil, Heavy Extract Oil, Styrene, DDB, Propylene Tetramer, EDC, Propylene Liquid and Gas, VCM Liquid and gas, Ethylene Liquid and Gas.

Vapour return line can be used if required.

Samples taken before discharge.

Petkim's surveyor speaks English. Hut on quay with telephone.

Line capacities are given to the ship's Master by the surveyor before discharge. The back pressure varies from 2.5 to 5 Bar.

Surveyors as normal, travel around Turkey following ships, so can be late in boarding if ship early, then Petkim's Representative notes temperatures and ullages.

GENERAL: Fresh water available from quay at 40 t.p.h. metered at U.S.$ 3.64 per tonne.

Fuel by barge. Istanbul is fairly close so may be cheaper to go to anchorage there for fuel as available locally by barge but costly.

Over many voyages to this port and Gemlik, air freight items from North Europe always get through.

Lloyd's/Agent: Lloyd's Surveyor from Istanbul also covers all Turkey but travel is expensive.

AUTHORITY: Petkim Petrokimya Holding A.S., Yarimca Petrokimya Kompleksi, P.O. Box 46-47, Kocaeli, Turkey. *Tel:* 0262-5281450 (20 lines). *Telex:* 33113 Ypet TR, 33109 Ptkm TR. *Cables:* Petkim Izmit. *FAX:* 0262-5281738, 0262-5281400.

ZONGULDAK: 41.28 N. 31.49 E.

PILOTAGE: Refer to "Canakkale" and "Istanbul".

Harbour Pilots obtainable from Coaling Company, Pilot boards off port entrance by launch. Ordered by Agent subject to vessel's ETA given at least 24 hours before arrival.

ANCHORAGES: Good anchorage off the harbour in a depth of 13 fathoms, sand and mud bottom.

Anchorage prohibited South of a line drawn in direction 292.5° distance 7.5 cables from head of the Northern breakwater. The Southern limit of this area is a line drawn in direction 262° from the head of the Northern breakwater to the shore.

RESTRICTIONS: Harbour entrance between breakwaters. Entr width 600 ft.

Traffic signals displayed from signal mast on Northern Breakw as follows:

2 black balls or 2 red lights, meaning "Harbour closed".

2 black cones or 2 green lights, meaning "Harbour open".

A black ball over black cone or red light over green light, mea "Do not attempt to enter".

A black cone over a black ball or green light over a red light, mea "No tug available".

A black ball between 2 black cones or red light between 2 green lig meaning "Wait. You will be piloted into the harbour".

3 black balls, or 3 red lights, meaning "Because of unfavou weather you cannot be piloted into the harbour".

RADIO: Zonguldak Radio. Call sign TAR.

TUGS: 5 tugs available.

BERTHING: Coal quays length 1,650 ft. depth alongside 10 m.

Cargo quay length 500 ft. depth alongside 10 m. Loading rate 3 450 t.p.h.

Northern Breakwater, 2 berths, at inner end with depth of alongside.

CRANES: Shore cranes up to 15 tons capacity and floating c 60 tons capacity.

FRESH WATER: Available from the quays.

FUEL: Only coal bunkers available.

Turks and Caicos Islands

GRAND TURK: 21.28 N. 71.08 W. (See Plan)

DOCUMENTS: *Customs:* Clearance from last port, Inward Report, Crew List and Declaration, Ship's Stores List, Manifest of all goods to be discharged at each Port.
Immigration: Passengers Manifest, Immigration control cards.
PILOTAGE: Compulsory. The Owner, Master, or Agent of a ship bound for any Port in the Turks and Caicos Islands must report via Harbour Master on VHF Channel 16, 4 hours in advance of the ETA of the ship.
The following information is required.
1. Name/Call Sign of Vessel.
2. Nationality.
3. Length, Draft, and Gross and Net Registered Tonnage.
Pilot Office on VHF Channel 16. Berth arranged by Harbour Master through Local agent making request 24 hours in advance for use of dock and facilities.
ANCHORAGE: Available.
MAX. SIZE: No restrictions.
HEALTH: Pratique, given by Customs Boarding Officer.
RADIO/VHF: Radio Turks and Caicos on 94.9 MHz. Also see "Pilotage".
TUGS: Only available at the Port of Providenciales.
BERTHING: See "Plan".
CRANES: Arranged by Agent, if ship's own is out of order.
STEVEDORES: Arranged by Agent.
MEDICAL: No advance notice except in case of emergency, hospital facilities available on Grand Turk and Providenciales.
TANKERS: Refined petroleum products are imported through the Bahamas by Shell, Texaco and Esso at all ports. There is no special bunkering port, but bunkering services are available.
DENSITY: 1025.
FRESH WATER: Available, ordered through Agent at approximately 0.03 cents (U.S.) per imperial gallon.
FUEL: Delivered by tank trucks at all berths, diesel as well as marine lubricants can be obtained through suppliers (Shell, Texaco and Esso Agents).
CONSULS: None.
REPAIRS: Most deck and engine repairs can be carried out.
DRY DOCKS: Caicos Marina & Shipyard, Providenciales. Tel: (809) 946-4600. Telex: TWX 3158440 TRUMPRO. Max. lifting capacity 85 tons.
SURVEYORS: Registrar of Shipping, Natural Resources Branch, Iron Building, Front Street, Grand Turk. Tel: 2550.
GANGWAY/DECK WATCHMEN: Usually ship's crew. Ship's gangway.
OPENING/CLOSING HATCHES: Stevedores or ship's crew, which ever to ship's advantage.
CERTIFICATES:
Safety Construction Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Load Line Certificate.
Cargo Gear Certificate.
CUSTOMS ALLOWANCES: Tobacco. Each man 200 cigarettes, or 100 cigarillos (cigars with a maximum weight of 3 grammes) or 50 cigars or 12.5 grammes of smoking tobacco, and one reputed quart of normally potable spirits or not more than 2 litres of wine containing less than 42% of proof spirit.
REPATRIATION: Crew changes and repatriation possible.
AIRPORT: In Grand Turk the airport is about 1 mile from the port and is served by Carnival Airlines twice weekly (Friday and Monday) to and from Miami, and various charter operators. In South Caicos the airport is about 2 miles from the port and is served by Turks and Caicos Airways with connections to the various islands. In Providenciales the airport is about 7 miles from the port and is served by American Airlines daily, Turks and Caicos Airways 6 days a week (except Tuesdays), and Carnival Airlines twice (Monday and Friday) a week to and from Miami. There are charter flights available on request.
TIME: E.S.T. Daylight savings time starts the last Sunday in April when clocks are advanced 1 hour and ends last Sunday in October when clocks retarded 1 hour, returning to Eastern Standard Time.
POLICE/AMBULANCE/FIRE: Grand Turk Police 2299; Ambulance 2333; Fire 2233. Emergency No. 2570. Port Officer 2325. South Caicos Police 3299
Providenciales Police 4259, Ambulance 4201, Fire 4378.
EMERGENCY CO-ORDINATION CENTRE: Police Headquarters (Grand Turk) 2299, (South Caicos) 3299, Providenciales 4259.
TELEPHONES: No arrangements exist for placing telephones on board ships.
SERVICES: Divers available for underwater surveys and repairs.
BANKS: Barclays Bank, Tel: 2831. Bank of Nova Scotia,Tel: 2506/7.
HOLIDAYS: New Year's Day; Good Friday; Easter Monday, Commonwealth Day, Queen's Birthday, Emancipation Day, Columbus Day, International Human Rights Day, Christmas Day, Boxing Day, Jags McCartney Memorial Day, National Youth Day.
CREW IDENTIFICATION CARDS: Not required.
SHIP SUPPLY SERVICE: Arranged through Agents.
GARBAGE DISPOSAL: Garbage from ships is usually taken off under agent's supervision and disposed of at dump site.
WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: U.S.Dollar.
DELAYS: Normal delays if berth is in use or docks under repair.
DEVELOPMENTS: New dock completed and now in use at Grand Turk. Specified area in dock storage yard provided for construction of a Rice Milling Plant.
AUTHORITY: Department of Customs, Custom's Office, Grand Turk, Turks and Caicos Islands. *Tel:* (809) 946-2993, 946-2994. *FAX:* (809) 946-2887. *Contact:* Collector of Customs.

Tuvalu

FUNAFUTI: 08.31 S. 179.13 W. (See Plan)

DOCUMENTS:
Customs: Boarding of ships after Radio Pratique granted.
Clearance from the Last Port.
Crew List.
List of Passengers.
Stores' Lists.
Ship's Inward Report.
List of Unmanifested Cargo.
Crews' Stores.
Manifest and Bill of Lading with invoice.
Health: Radio Pratique to be granted within 24 hours before arrival.
Vaccinations against Cholera.
Immigration:
Crew List.
Passenger List.
Next Port of Call.
Final Destination.
Passports.

PILOTAGE: Local Master available on 1 month's prior notice.
Chart: See Chart BA. 2983. Fongafale Anchorage – main anchorage.

RESTRICTIONS: None.

MAX. SIZE: See "Te Puapua Passage". Max. depth 15 m. 250 ft. wide at low water.

HEALTH: Radio Pratique available.

RADIO: Funafuti Radio (T2U) on 6215.5 kHz.

VHF: Funafuti Radio equipped with 80 channel VHF radio. Vessels to call on Channel 16.
VHF in operation when vessels approaching, arriving, manoeuvring and sailing.

TUGS: None.

BERTHS: Concrete on pile wharf. 2 berths, lengths are 50 m. and 40 m. respectively. LW depths of 8 m. and 5.5 m.

CRANE: None.

STEVEDORES: Available on 24 hours' notice, discharge rate high.

MEDICAL: Hospital radio advice available.

TANKERS: Must provide own discharge lines. No residue discharge facilities. Light diesel only available. No tanker berth.

DENSITY: Sea Water.

FRESH WATER: Max. 60,000 gallons in wet season, little or none in dry season, by pipeline on wharf to vessel.

FUEL: Light diesel only. Max. 5,000 gallons from 500 gallon tanks (hand pump).

FIRE PRECAUTIONS: No special precautions other than normal for tankers.

CONSULS: None.

REPAIRS: None.

SURVEYORS: None.

WATCHMEN: Not required.

HATCHES: By stevedores or crew.

CUSTOMS ALLOWANCES: Passengers only, allowed 200 cigarettes and 1 bottle of spirit.

REPATRIATION: Air service to Fiji and Tarawa.

AIRPORT: 1.25 miles from jetty, fortnightly service. Special charters by arrangement.

TIME: GMT plus 12 hours.

HOLIDAYS: New Year (1st January); Public Holiday (3rd January); Good Friday; Easter Friday; Easter Monday; Commonwealth Day(12th March); Gospel Day (4th May); Queen's Birthday (18th June); Public Holiday (13th June); Bank Holiday (1st August); National Children's Day (6th August); Tuvalu Day (1st and 2nd October); Public Holiday (3rd October); Prince of Wales Birthday (12th November); Christmas Day (25th December); Boxing Day (26th December); Public Holiday (27th December).

POLICE/AMBULANCE/FIRE: Police 728 or 726. Ambulance 751 or 749. Fire – send messenger for fire engine.

TELEPHONE: Ship can use marine office telephone ashore.

SERVICES: None.

SHORE LEAVE: Allowed after clearance.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: 44 gallon drums available for garbage not affecting environment.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: None.

CURRENCY: Australian Dollar (A$). Currency restrictions equivalent of A$ 1,000.

REGULATIONS: No sullage, ballast, tank residue, etc., to be discharged in lagoon.

DELAYS: Unpredictable, depending on whether other ships in port.

AUTHORITY: Ministry of Works and Communications, Tuvalu Government, Vaiaku, Funafuti, Tuvalu. *Tel:* 725. *Telex:* TV 4800. *Cables:* Wocom, Funafuti. *FAX:* 688800. *Contact:* Soo Patiale, Transport Systems Manager.

NOTES

Please also advise Shipping Guides Ltd.

Ukraine

BELGOROD-DNESTROVSKY:

46.12 N. 30.21 E. **(See Plan)**

GENERAL: The commercial sea port of Belgorod-Dnestrovsky is situated on the North-Western part of the Black Sea coast, on the right side of the Dnestrovsky Estuary (the Southern Basin), at a distance of 80-90 km. to the S.W. of the port of Odessa. Navigational season lasts all the year round, with powerful (600 h.p. – 1,200 h.p.) tug assistance during severe Winters. The Tsaregradsky Lighthouse and the Tsaregradsky Leading Line should be used as guiding points when approaching the port.

Vessels should approach the port along the channel of the Dnestrovsky Estuary which is provided with a good navigational marks system.

DOCUMENTS:

7 General Declarations, IMO FAL Form 1
7 Crew Lists, IMO FAL Form 5
2 Crew's Effects Declarations IMO Form 4
2 Money Lists.
2 Cargo Declarations IMO Form 2
Safety Certificates.

PILOTAGE: Pilotage compulsory for all vessels. A Pilot usually boards vessel at Reception Buoy No. 1 (Lat. 46° 04′ N. Long. 30° 30′ E.) situated 1.2 miles to the S.E. of the Tsaregradsky Lighthouse.

ANCHORAGE: The port outer roads with depths of up to 14 m. are situated 0.5 mile to the S.E. of the Reception Buoy. The holding ground is good. There is an inner roadstead situated within the port area where usually two vessels can be anchored pending berthing.

RESTRICTIONS: Vessels are allowed to navigate along the channel during daytime only. The port can be entered by vessels with draft of up to 4.5 m. and the maximum height (from the water level) of 28.0 m. Vessels should follow the channel at a speed not more than 5 knots.

According to dredging project, which is to be effected, the depths of the Approach Channel and at the berths are to be increased to 6.0 m.

During bad visibility vessels which are not equipped with radar are not allowed to navigate along the channel. Vessels are piloted under the bridge 2-3 times daily (during daytime only).

RADIO: Communication is effected through the port radio station "Belgorod-Dnestrovsky-Radio"

Call sign	*Frequencies (MHz) working*	*calling*	*Kind of transmission*	*Time of work*
"Belgorod-Dnestrovsky-Radio"	156.8	156.8	F3	H24

Harbour Master on VHF Channel 10.

Notice of Arrival: When approaching the port of Belgorod-Dnestrovsky Masters of vessels should not later than 48 hours prior to arrival advise the Harbour Master of ETA, draft, maximum height of a vessel in ballast (from the water level up to the top of a mast), kind and quantity of cargo, services required to the vessel. 24 and 4 hours prior to arrival the Master should advise more precise ETA.

TUGS: If necessary, are ordered by the Master after having consulted the Pilot.

BERTHING: The berths of the port have depths alongside of up to 5.3 m. and are equipped to handle timber, containers, generals (rubber, non-ferrous metals, pipes, tinned products, fresh vegetables, fruit and citrus fruit) and other cargoes. There are covered warehouses and open concrete floor sheds in the port.

A port area Bugas is situated 14 km. to the South of the port, at the mouth of the Estuary.

Vessels fully laden with ballast water are as a rule allowed to moor at berths if winds do not exceed Force 6. A vessel of a smaller size may be turned broadside to a loaded vessel of a bigger size but not vice versa. It is strictly prohibited to turn a third vessel broadside on to another 2 vessels having been turned broadside earlier.

Opening and closing of mechanised hatches is usually performed by the vessel's crew. Opening and closing of ordinary hatches is carried out by the crew on arrival and departure of a vessel and by the dockers during cargo handling operations. On the berths and on the port territory there are cranes of 20 tons lifting capacity.

FRESH WATER: Available at berths.

FUEL: Diesel oil available.

CONSULS: None.

REPAIRS: Only minor repairs possible.

TIME: GMT plus 3 hours October to March. GMT plus 4 hours April–September.

DEVELOPMENTS: See "Restrictions".

AUTHORITY: The Port of Belgorod-Dnestrovsky Authority, 81 Shabskaya Street, 272300 Belgorod-Dnestrovsky, Odessa Region, Ukraine, C.I.S. *Tel:* 2-25-51. *Cables:* Morport Belgorod-Dnestrovsky

AGENT: Shipping Agency "Inflot" in the Port of Belgorod-Dnestrovsky. Postal address: 81, Shabskaya Street, 272300 – Belgorod-Dnestrovsky, Odessa Region, Ukraine. Cables: Inflot Belgorod-Dnestrovsky. Telephone: 2-22-01; 2-56-73. Telex: 232217.

BERDYANSK: 46.37 N. 36.36 E. (See Plan)

DOCUMENTS:

5 Crew Lists.
5 General Declarations.
4 Cargo Declarations.
2 Crew's Effects Declarations.
1 Master's Declaration.
1 Master's Declaration about arrival at a Commercial Port of the Ukraine.
2 Stores Lists.
1 Maritime Declaration of Health.

For discharging vessels also: Manifests, Bills of Lading and Cargo Plan.

For all vessels, necessary to have all Ship's Papers and Ship's Certificates.

APPROACHES: The Port of Berdyansk is situated in the N.E. part of Berdyansk Bay, on the Northern coast of the Azov Sea.

Inner roads and port facilities are protected from Southern and S.E. winds by a mole and a breakwater.

Navigation in the port is all year round, but in Winter ice-breaker assistance is necessary for about two months.

Vessels should proceed to the harbour through the approach channel, with a least depth of 8.2 m.

PILOTAGE: Pilotage is compulsory in Azov Sea. Kerch Pilot meets vessel near the entrance to the Kerch Strait and takes vessel to Berdyansk. Berdyansk Pilot meets vessels within draft 6.0 m. and more at Reception Buoy No. 2 (Lat. 46° 36.75′ N., Long. 36° 36′ E.), and vessels with draft less than 6.0 m. at Reception Buoy No. 10 (Lat. 46° 40′ N., Long. 36° 40′ E.). Telegraphic address of pilot station is: "Harbour Master Berdyansk". Vessels bound for Berdyansk should cable "Inflot Berdyansk Ukraine"/Ship's Agents/advance notice of ETA: ETA Berdyansk (date shown in group of four figures and if possible GMT of arrival); draft, beam, depth to upper deck, flag, b.r.t., n.r.t., length, if for discharging, kind of cargo should also be advised. After which Inflot arranges pilotage through Kerch Channel. First notice of ETA to be sent after leaving last port and then 72, 48 and 24 hours' notice of ETA.

For contacting pilot station use VHF Channel 16. Pilot boat has a white hull with black writing on her side: "Pilot-29". Vessels wait for the Pilot at the outer road anchorage.

ANCHORAGES: Vessels may obtain good anchorage with depths up to 8.0 m. in the Port of Berdyansk outer roads situated on both sides of the approach channel leading into the harbour.

The outer roads are well protected from Northerly winds, but during Southern and S.W. winds the anchorage is troublesome.

At time of strong S.W. swell ships in the outer roads are usually effected by heavy pitching and rolling, and plenty of cable should be paid out on both anchors. Holding ground in outer roads is shell and mud.

RESTRICTIONS: Vessels over 170 m. LOA can enter, leave and shift berth when the wind speed is less than 8 m./sec. The possibility of manoeuvring such ships when wind speed is over 8 m./sec. is determined by the Pilot.

MAX. SIZE: The max. permitted draft for entry to the port is 7.9 m., if max. draft then even keel. The max. permitted length for entry into the port is 205 m. Sometimes with the Harbour Master's permission, vessels with max. length 225 m. may be allowed to berth at Piers No. 7 and 8.

HEALTH: To obtain Pratique it is necessary to complete 1 Maritime Declaration of Health and hand it in for doctor. In the event of any disease or fever contact Agents.

Vessels, which are not equipped by special collecting tank for fecal (domestic) waters with standard international connection on the upper deck, are prohibited entry into Ukrainian ports.

RADIO: *Notice of Arrival:* 96 hours and then 12 hours prior to arrival at the port, Masters should advise the Port Administration via the local Inflot Agency, time of arrival and the maximum draft of a vessel. Not later than 2 hours prior to approaching Reception Buoy No. 2, placed at the beginning of the approaching channel, Masters should advise more precise ETA to the Harbour Master.

Vessels should establish radio contact through "Berdyansk Radio" Port Radio Station operating 24 hours daily on the following frequencies:

Call Sign	*Frequencies (kHz) Working*	*Calling*	*Type of trans-mission*	*Time*
UBX	500/418	500	A1A	H24
"Berdyansk-Radio-2"	2182	2182	H3E	H24
"Berdyansk-Radio-1" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24
"Berdyansk-Radio-5"	156.8*(16)	156.8*(16)	F3E	H24

*Frequencies are given in MHz.
**Central Port Radio Station.

RADAR/VHF: There is no port radar service in Berdyansk.

Use VHF Channel 16 initally and further communication on another Channel on agreement.

TUGS: Join vessels abreast of breakwater. Vessel's lines usually used. No extra charge for tug lines. Vessels under 1,500 g.r.t. require 1 tug and vessels over 1,500 g.r.t. require 2 tugs.

BERTHING: Berths No. 1 – 2: Length 380 m. These berths are for general cargo. Berths No. 3 – 4: Length 270 m. These berths are for bulk cargoes (ores, minerals). Berth No. 5: Length 232 m. This berth for scrap iron. Max. permissible draft 7.9 m. Berth No. 6: Length 132 m. Berths No. 7 – 8: Length 351 m. Berth No. 9: Length 140 m. Load/discharge is by shore equipment. Depths alongside Berths No. 1 – 8 up to 7.9 m.

CRANES: All quays are equipped with electric cranes. Berths No. 1 – 2 are equipped with SOKOL type crane, of up to 32 tons capacity. Berths No. 3 – 4 – 5 are equipped with Albatros type crane, of up to 20 tons capacity. Berth No. 8 crane type SOKOL.

SPECIALISED CARGO-HANDLING FACILITIES: None.

BRIDGES: None.

STEVEDORES: Provided by the Port of Berdyansk. Tel. Manager: 62-565.
MEDICAL: Medical attendance possible. All members of the crew must have sanitary (yellow) book indicating vaccinations, fever, etc. One hospital available.
TANKERS: No facilities available.
DENSITY: Approximately 1008. Salinity is 11.9.
FRESH WATER: Supplied at berths.
FUEL: Available in limited quantities. Supplied by special tanker.
CONSULS: No consuls in Berdyansk.
REPAIRS: Only minor hull and machine repairs.
DRY DOCKS: No dry dock in Berdyansk.
SURVEYORS: Inspection of the Registry of the Ukraine Branch Office; Tel. 62-452. Independent Surveyors available for Draft Survey and checking quantity of bunkers onboard.

Contact Maritime Agency "Inflot" (See "Agent").
GANGWAY/DECK WATCHMEN: Not compulsory or necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco, wine, spirits are free of Bond.
CARGO GEAR: There are cargo-handling equipment and intraport transport facilities. No heavy lift crane.
REPATRIATION: Possible.
AIRPORT: Distance 15 km. Internal Soviet airlines only.
TIME: GMT plus 2 hours October to April. GMT plus 3 hours April to October.
HOLIDAYS: New Year's Day (1st January); Christmas (7th January); International Woman's Day (8th March); Easter; World Labour Days (1st – 2nd May); Victory Day (9th May); Independence Day (24th August); Anniversary of the Great October Socialist Revolution (7th – 8th November). Cargo work can be arranged on above days.
POLICE/AMBULANCE/FIRE: Police 02; Ambulance 03; Fire 01.
TELEPHONES: Not possible to place telephones onboard.
EMERGENCY CO-ORDINATION CENTRE: Contact Harbour Master's Office. Tel: 62-731, 62-449, 3-63-03. VHF: Channel 16.
BANKS: State Bank of the Ukraine only.
STORING: See "Prelims".

1. Barge or truck.
2. Vessels can be stored by barges during cargo operations.
3. Trucks can proceed alongside at the berth.
4. Fork lift trucks can be used.
5. Storing under Customs permission and control.
6. Local riggers can be employed.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.
IDENTIFICATION CARDS: Not required. Only Seaman's Passport.
GARBAGE DISPOSAL: Special metallic containers are installed on the pier alongside the ship by port's garbage service, and exchanged when full by the same service. To reserve garbage disposal, Master should send information by radio to Agency Inflot, simultaneously with arrival information.
WASTE OIL DISPOSAL: The port is equipped by a special ship which can collect separately 340 tonnes of oily mixture waters and 86 tonnes fecal waters. For pumping out of these waters, hoses from special boat only should be used. Strictly prohibited to mix oily waters with fecal or any sanitary waters. To reserve special ship, radio message should be sent before arriving to Agency Inflot. Before leaving port, all vessels must discharge all fecal waters into special ship, without additional payment.

Also see "Health".
SEAMAN'S CLUBS: There is a Seamen's Club at the port at Ul. Frunze 1, 332440 Berdyansk, Ukraine. Tel: 62-543. Facilities: No international telephone, church service or postage facilities are available at Seamen's Club. All other services are possible.
CURRENCY: Ukrainian Coupon.
AUTHORITY: The Port of Berdyansk Authority, 13/7 Gorky Street, Berdyansk 332440, Ukraine. *Tel:* 3-63-63, 62-731. *Telex:* 127441 Su Okean. *Cables:* Harbour Master Berdyansk. *FAX:* 3-63-03. *Contact:* Port Director (Tel: 3-22-10). Harbour Master (Tel: 62-731).

AGENT: Maritime Agency "Inflot" at the Port of Berdyansk. Postal address: 13/7 Gorky Street, Berdyansk 332440, Ukraine. Tel: 62-539, 62-639, 3-34-42. Telex: 127564 Sudak. Cables: Inflot Berdyansk.

CHERNOMORSK: 45.30 N. 32.40 E. (See Plan)

Chernomorsk is a sea port, situated on the coast of Yarylgach Bay of the Black Sea, on the North-Western part of Crimea Peninsula, safe and well protected against rough seas. Vessels should proceed to the port through the 980 m. long channel. Depth in the channel is 9.0 m. Navigation in the port is all year round.
PILOTAGE: Pilotage is compulsory for all vessels of or over 100 g.r.t. Pilotage effected at daytime only. Embarkation and disembarkation of the pilot is performed near the Reception Buoy of approach channel.
ANCHORAGE: Anchorage with depths up to 14.0 m. is available within the outer port roadstead and marked by Anchorage Light Buoy (Lat. 45° 34′ 12″ N., Long. 32° 48′ 42″ E.). The holding ground is good.
RESTRICTIONS: Vessels to proceed through the channel only with Harbour Master's permission.

Entry into the port is allowed for vessels with draft up to 6.0 m. and maximum height (from water level) of 20 m. Vessels should proceed through the channel at a speed of not more than 3 knots.
RADIO/VHF: Communication is effected through the port radio sta UJB-2:

Call Sign	*Frequency (kHz)*	*Time of Work*
"Chernomorsk-1"	500 and 4184	
"Yarylgach 92"	VHF Channel 6	H24

Telephone: (06558) 91390. Fax: (06558) 91849. Teletype: 187 Yakor. Telex: 187125 Ptb Su.
Notice of Arrival: When approaching the port of Chernomorsk, Mas should advise, with 48 hours notice, the Harbour Master of ETA, dr maximum height of vessel in ballast (from water level to the top of mast), type and quantity of cargo, services required by the ves 12 hours prior to arrival, a more precise ETA notice is required.

C.I.S. vessels should not later than 24 hours prior to arrival adv the Harbour Master of ETA, and 4 hours prior to arrival more pre ETA.
TUGS: If necessary, tugs can be ordered by the Master after consu with pilot. The tugs are compulsory for the vessels with drafts of m 5.5 m. Tugs with power of 150 h.p. and 1,600 h.p. are available.
BERTHING: Total length of berths 1,600 m. Depth alongside 5.5 m 6.5 m.

The berths are equipped to handle timber, containers, general other cargoes. Open storage and a floating crane of 100 tons li capacity are available.
FRESH WATER: Available from tug.
FUEL: Bunkering is not guaranteed.
REPAIRS: Only minor repairs may be effected. Underwater surv could be performed.
DRY DOCKS: Floating dock of 5,000 tons capacity available.
GENERAL: *Transport:* The port is linked with the towns of Sympherop Sevastopol and Yevpatoria by bus, provided with main road of 37 m as far as Yevpatoria. Nearest major sea ports: 90 miles – Sevasto and 100 miles – Odessa.
AUTHORITY: The Port of Chernomorsk Authority, Chernomorsk, Chernomorskoe 334360, Crimea, Ukraine.

AGENT: General Agent: Inflot Odessa. Telex: 232124 Inf Fax: 221264.

Local Agent: Inflot Sevastopol. Telex: 197316 Inf Su.

DNEPROBUGSKY: 46.35 N. 31.57 E.

SHIPMASTER'S REPORT: October 1991.

VESSEL: Bulk carrier. Cargo: 22,530 tonnes of bulk bauxite.

Arrival draft: 9.73 m. (F.W.).
GENERAL: The port is open for navigation all year round.

When proceeding to Dneprobugsky the following message mus sent to "Morflot Odessa Traffic Centre".

(a) Vessel's name.
(b) Flag.
(c) Owners.
(d) N.R.T.
(e) LOA.
(f) Beam.
(g) Moulded depth.
(h) Draft.
(i) Last port of call.
(j) Destination.
(k) Technical condition of main engine and steering gear.
(l) Course when approaching the area.
(m) Reason for call.
(n) ETA area.

Subsequent messages should contain only item (n).
APPROACHES: Compulsory reporting to "Ilichevsk Traffic Con prior to reaching the Sea Buoy and when entering separation sche off Ilichevsk port.

When berth or pilot are not available vessel should ancho Anchorage No. 351, S.E. of Ilichevsk port. Otherwise according to control instructions.
PILOTAGE: Compulsory. When proceeding to Dneprobugsky, Sea is embarked in the area East of the Ilichevsk port entrance, close to Fairway Buoy. Otherwise N.E. of the "T T S" Turning Buoy.

Port Pilot is embarked in the channel, approximately 1 mile to 2 m South of the port (Dneprobugsky).

The Brusko Dneprovsko Limanski Kannal is very narrow and marked but from Buoy No. 48 up to Dneprobugsky no navigation are shown on B.A. Chart No. 2200. Shore based traffic control co the area and advises pilots whenever necessary.
ANCHORAGE: Area West of the approach channel nearly u Dneprobugsky port is considered as a local anchorage (waiting a it is open to North winds.
RESTRICTIONS: Navigation through the channel restricted during time and in poor visibility, in such cases vessels anchor at Anchor No. 360.

Permitted draft for passing the channel is 9.75 m. and safe spe about 8 knots.

Great care to be taken when turning in the narrow areas of the cha due to shallow waters.
HEALTH: Free Pratique normally granted after mooring.
TUGS: Three tugs used for mooring, ship's lines used. Charges fo of tugs is high.

BERTHING: Port has an effective berthing length of about 400 m. – 500 m. accommodating tugs, barges, small and large vessels.

The berth is equipped with 3 large bridge cranes with grabs.

Large stock of bauxite stowed on the open wharf.

No serious damage sustained during discharging.

MEDICAL: Hospital facilities available, mainly in Nikolayev area. Cases of cholera in the area reported by port authorities.

CUSTOMS ALLOWANCES: No limits on quantities, but nothing to be taken ashore.

FRESH WATER: Available, but not suitable for drinking.

FUEL: Supply not guaranteed.

DENSITY: Fresh water in the area around the port.

REPAIRS: Minor repairs can be carried out.

DRY DOCK: Small floating dry dock situated in the port.

OPENING/CLOSING HATCHES: Normally by crew.

TIME: GMT plus 2 hours.

SHORE LEAVE: Allowed. No extra permission required for Nikolayev area which is about 35 km. North of Dneprobugsky.

AGENT: Main Agent: Inflot Odessa. Local Agent: Inflot Nikolayev.

EVPATORIA: 45.11 N. 33.23 E.

GENERAL: The port of Evpatoria is situated on the Northern Coast of Evpatoriyskaya Bay of Kalamitskiy Bay (Western part of the Crimean Peninsula).

PILOTAGE: Compulsory for the vessels over 200 g.r.t. The embarkation and disembarkation of the Pilot is carried out near the Reception Buoy in the vicinity of Karantinniy Cape. Pilot requires 12 hours notice.

APPROACHES: The port has an open roadstead that covers the area of Evpatoriyskaya Bay. Depths in the roads are up to 10.0 m.

ANCHORAGE: Anchorage No. 382 is situated 1.1 miles S.E. of Karantinniy Cape. Available depths are 11.4 m. – 12.4 m. Ground is sand and shells.

RESTRICTIONS: When wind speed from a Southern direction is more than 9.0 m./sec., vessels in the roads may be delayed.

MAX. SIZE: Maximum draft for dry cargo vessels is up to 6.0 m. and max. length 100 m. The restrictions for passenger vessels are 7.0 m. and 200 m. respectively.

RADIO/VHF: VHF communication through Channel 16.

RADAR: No shore based radar stations available.

TUGS: Number of the tugs depends on g.r.t. For vessels up to 500 g.r.t., one tug with 1,200 h.p. capacity and for vessels over 500 g.r.t., 2 tugs are required.

BERTHING: 4 berths are available in the port. 3 berths for passenger vessels (No. 2, 3 and 4), and one berth for cargo vessels (No. 5). Port is equipped with cranes for handling general and bulk cargo, steel products, etc. Warehouses and open storage facilities are available.

MEDICAL: Medical assistance rendered immediately when required. Hospital facilities available.

FRESH WATER: Available.

AIRPORT: Nearest airport is located in Simpheropol, a distance of 80 km.

TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer.

HOLIDAYS: January 1st; January 7th; March 8th; May 1st; May 2nd; May 9th; August 24th; November 7th; November 8th; Easter (one day); St.Trinity (one day).

POLICE/AMBULANCE/FIRE: Ordered through Agent.

IDENTIFICATION CARDS: Required.

AGENT: *General Agent:* Inflot Odessa. Telex: 232124 Inf Su. *Local Agent:* Sevastopol Inflot Maritime Agency, 5 Pl. Nakhimlva, 335054 Sevastopol, Crimea, Ukraine. Tel: (0690) 524411. Telex: 197316 Inf Su. Cables: Inflot Sevastopol.

ILICHEVSK: 46.19 N. 30.40 E. (See Plan)

GENERAL: The Port of Ilichevsk is situated on the N.W. coast of Black Sea, on the right bank of the Sukhoi Liman, about 15 miles S.W. from Odessa City.

The Sukhoi Liman is divided by dams into 3 parts called Basin No. 1, Basin No. 2 and Basin No. 3.

A part of Basin No. 1 bounded by the leading line of the Port of Ilichevsk leading lights, thence by the S.W. coast of the Liman, thence by the Southern Sand Headland, is called the Inner Roads of the port.

The berths for large sea-going vessels are along the Western side of the Southern Sand Headland, thence along Southern and S.W. sides of Basin No. 1.

The berths of the Western side of Basin No. 1 are used by fishing trawlers.

Navigation in the port is year round. Ice usually begins to form in the second half of December and finally disappears in February. Ice-breaker assistance is required in severe Winters for about a 30 day period.

APPROACHES: The approach channel leads from seaward into Basin No. 1. Depths in mid-channel are 13.5 m. Strong Easterly and Southerly winds may cause heavy surge in the channel influencing a vessel's manoeuvrability.

PILOTAGE: A Pilot usually boards a vessel in the outer roads at the approach light mid-channel buoy. (Lat. 46° 18′ N., Long. 30° 44′ E.). In the event of bad weather the place of embarkation or disembarkation of a Pilot can be changed with a Master's approval.

Vessels proceeding to ports of Kherson and Yuzhnyy take Pilot in the Outer Roads of Ilyichevsk (Lat. 46° 15′ 06″ N., Long. 30° 56′ 01″ E.).

ANCHORAGES: Good anchorages can be obtained in the outer roads situated at a distance of 1 to 5 miles off the coast between the parallels of 46° 12′ N. and 46° 18′ N. The outer roads are open to all winds blowing from N.E. via S. up to S.W.

The anchorage (on charts marked as No. 352 and 351) are situated about 1.2 to 7 miles to the S.E. of the port entrance.

The holding ground is grey mud and clay. Depths in the roads are 19.2 m. – 25.5 m.

RESTRICTIONS: Entry to the port can be effected day and night.

In the night time movement of the vessels with length more than 200 m. is subject to special permission of the Harbour Master.

Vessel's speed should not exceed 6 knots when navigating along the channel.

MAX. SIZE: The maximum permitted draft is 11.8 m., length 280 m.

Vessels drawing over 11.8 m. must obtain the Harbour Master's permit for entry to the port.

HEALTH: Foreign vessels granted Free Pratique when berthed alongside and all arrival formalities accomplished by the boarding officials, irrespective whether day or night. If berthing delayed, under certain circumstances vessel may be granted Free Pratique at roads where anchored. Event suspected disease Master shall inform Agent by radio. When arriving from another Black Sea port, Free Pratique automatic.

RADIO: Channel 16 (156.80 MHz) for radio-telephone used for calling only, with subsequent switch to any other Channel. All information addressed to ship's Agent, Cable address "Inflot Ilichevsk", Telex No. 232448. Port Radio UEH.2.

Radio contact can be established through the port radio station "Ilichevsk Radio" operating 24 hours daily on the following frequencies:

Call sign	*Frequencies (MHz) Working*	*Calling*	*Type of trans-mission*	*Time of Work*
"Ilichevsk Port control"	156.6(12) Main	156.6(12)	F3E	H24
"Ilichevsk Traffic control"	156.950(19) Spare	156.950(19)	F3E	H24
	156.50(10)	156.50(10)	F3E	H24

The port radar station gives all possible information to all vessels navigating in restricted visibility and in the absence of floating marks, from the point of a Pilot's embarkation up to the port.

Radar navigation is controlled by a Pilot.

A signal post for regulating the movement of vessels is situated at the Northern side of the entrance to the port.

TUGS: Normally join vessel when approaching mooring berth. Ship's lines used. Number of tugs required for berthing shall be ordered by the Pilot with the Master's consent. Tugs compulsory for vessels over 1,500 g.r.t.

In case Harbour Master grants permission for vessel to stay at anchorage in the Inner Roads to get bunkers, provisions, or for any other purpose a tug should be ordered by ship's Master for the whole period of stay in the Inner Roads to ensure safety of manoeuvring of the other vessels in the port. All expenses on ship's account.

BERTHING: Quays with depths alongside of up to 14.0 m. are equipped to handle oil, general, 20 ft. and 40 ft. containers bulk and other cargoes. There are mechanised warehouses and open concrete floor sheds.

Electric cranes of up to 45 tons capacity are operated on the quays and by the warehouses. There are floating cranes with lifting capacity of up to 300 tons, other cargo-handling equipment and inter-port transport means.

Opening and closing of mechanised hatches is always done by the ship's crew.

In case vessel is moored at the Inner Road buoys the following requirements should be complied with:

1. Two towing ropes to be kept ready at bow and stern lowered 2 m. over the water surface.
2. To avoid picking up of mooring anchors ropes should be slacked with free board increase whilst discharging.
3. Vessel must be equipped with good pudding fenders to protect her boards and floating facilities alongside.

TIDE: The range of the water level caused by strong winds may reach 1 m. The rise of the water level is due to Northerly winds and the fall of the water level to Southerly winds.

The changes of the water level caused by variation in atmospheric pressure ("Seish" phenomena) are observed periodically. This phenomena can last from a few minutes up to several days and the range of the water level may reach 0.6 m.

RADAR: Port Radar Station gives all possible technical information to any vessel navigating within Station's broadcast zone, if requested. Navigation in channel controlled by Port Radar Station. Communication between Station and vessels established by radio-telephone on international frequencies.

STEVEDORES: 12 days' notice is required.

MEDICAL: Medical assistance rendered immediately when requested. Hospital facilities available. Particular inoculations required prescribed by International Sanitary Regulations.

DENSITY: Average density 1010.

FRESH WATER: Available at quays and by barge.

FUEL: Bunkers available.

CONSULS: None.

REPAIRS: Good facilities. All kinds of repairs for vessels of up to 60,000 d.w.t. can be carried out.

DRY DOCKS: Docking arrangements settled with Black Sea Steamship Co. of Odessa, Lastochkina 1 Street. A floating dock, 250 m. length, 18 m. depth. There are new floating docks with a lifting capacity of 15,000 tons.

GANGWAY/DECK WATCHMEN: Watch carried out by crew.
OPENING/CLOSING HATCHES: Mechanical hatches by crew.
CUSTOMS ALLOWANCES: No restrictions. Free use on board.
CARGO GEAR: No additional requirements. Cargo work usually carried out by means of shore cranes.
AIRPORT: The distance from Odessa Airport about 30 km.
TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.
HOLIDAYS: Official Holidays are Sundays and following Calendar dates: January 1st, March 8th, May 1st, 2nd, 9th, October 7th, November 7th, 8th.
POLICE/AMBULANCE/FIRE: All mentioned services easily obtained through Agent.
SERVICES: Ship chandler's supplies, technical equipment supplies, laundry, car hire.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Required.
DELAYS: Vessels berthed at specialised berths depending upon cargo. Delays if berths occupied. Normally no delays in bunkering.
GENERAL: Shipowners should deposit funds for disbursements prior to arrival. All banking operations carried out by Vnesheconombank of Moscow.
DEVELOPMENTS: At present port only partially constructed. Work of further development being carried out.
AUTHORITY: Port of Ilichevsk Authority, 2 Korabelnaya Street, 270901, Ilichevsk. Odessa Region, Ukraine. *Tel:* 691-605, 691-634, 691-758. *Telex:* 232815. *Cables:* Morport Ilichevsk.

AGENT: Ilichevsk Inflot Shipping Agency, 4 Trouda Square (P.O. Box 539), Ilichevsk 270901, Odessa Region, Ukraine. Cables: "Inflot Ilichevsk". Tel. (048-68) 3-18-53. Telex: 232202 Inf Ux. Fax: (0482) 69-37-78. Satellite: 1-212-248-7482-218.

IZMAIL: 45.20 N. 28.51 E. (See Plan)

GENERAL: The sea and river port of Izmail is situated on the left bank of the Kiliiskoe Ghirlo (Kilia Mouth) of the Danube River, between the 82nd and 96th km.
PILOTAGE: All foreign flag vessels coming to or leaving the port of Izmail are allowed to navigate by the Kilia Mouth with the port of Izmail Pilot on board only. Masters of the vessels proceeding by the Sulina Channel from seaward shall order Pilots 24 hours in advance and confirm the order 4 hours prior to approaching the Chatal of Izmail, to the Harbour Master's office via Inflot Shipping Agency.

Vessels proceeding by the Prorva Canal from seaward should advise agent "Inflot Izmail" about the time of approaching the Reception Buoy 24 hours prior to arrival. Pilot shall board/disembark vessels at the Reception Buoy of the Prorva Channel (Lat. 45° 30′ 07″ N., Long. 29° 46′ 04″ E.) and the Izmail Chatal (116th km. of Kilia Mouth of the Danube River).
ANCHORAGE: Vessels can obtain anchorage in the roads situated in the area between 95.7 km. – 96.2 km. of the Kilia Mouth 50 m. from the left bank, 86.7 km. – 87.7 km. of the Kilia Mouth 100 m. from the left bank and between 85.0 km. – 85.6 km. of the Kilia Mouth 200 km. from the left bank.

Depth at the places of anchorage is 7.0 m., the holding ground is soft mud.
RESTRICTIONS: Draft and length of vessels entering the port of Izmail should be the same as for vessels navigating through the Sulina Channel (7.0 m.) or Prorva Canal (4.0 m. – 4.8 m.). There are no restrictions for day or night entry to the port.

All navigation within the port area is controlled. Zone of regulation begins at the 80th km. up to the 100th km.

Masters of the vessels entering the port area should make contact with the Vessels' Traffic Management Service and inform them of the name of the vessel, draft and place of destination. The Vessels' Movement Control Post will advise the place to anchor. Entry into the port area, shifting and any other movement of the vessel can be arranged with permission of the Vessels' Movement Control Post only. No passing allowed within the port area.

Permissible speed of movement should not exceed 8 km./hr. while navigating upstream and 12 km./hr. while navigating downstream.
HEALTH: International code quarantine signals are to be shown on arrival and Free Pratique is given by the quarantine doctor who will board the vessel to examine Master's Health Declaration.
RADIO/VHF: Radio communication can be established through the port radio station "Izmail Radio", some data of which is given below:
Safety Channel – Channel 16
Central Port Radio Station – Channels 16, 27.
call sign "Izmail Radio-1"
Inspection of the Port Control – Channel 9,
call sign "Izmail Radio-2"
Vessels' Movement Control Post – Channel 14,
call sign "Radio-17"
Inflot Shipping Agency – Channel 16, 69,
call sign "Inflot Izmail"
While navigating between 80th and 100th km. of the Kilia Mouth all vessels are to keep watch on Channel 16.
RADAR: There is no Port Radar Service.
TUGS: Tugs shall be ordered by the Master as directed by the Pilot.
BERTHING: Vessels drawing up to 7 m. can moor at berths with same depths alongside.

Quays are equipped to handle general cargoes (equipment, steel, cars, etc., containers including), bulk (coal, ore, minerals, building materials), timber and perishable goods (butter, vegetables, fruit).

There are enclosed warehouses, open concrete floor sheds and a grain elevator.
CRANES: On the quays there are portal cranes of 5 tons – 40 ton capacity. There are also floating cranes of 16 tons capacity and othe cargo handling equipment and machinery. Mobile cranes of up to 25 ton capacity available.
SPECIALISED CARGO-HANDLING FACILITIES: There a specialised berths for handling ISO containers. There are no berths handling liquid chemicals or LPG carriers.
BRIDGES: No bridges within the port area.
STEVEDORES: The port works round-the-clock, including holidays Usual ETA advice required.
MEDICAL: No advance notice except in case of serious illness. Hospi and Dental facilities are available.
TANKERS: No tanker berths available.
FRESH WATER: Fresh water can be supplied from the quays o delivered by barges
FUEL: Bunkers available.
REPAIRS: Hull and machine repairs can be effected.
GANGWAY/DECK WATCHMEN: Gangway watchmen compulsory carried out by ship's crew. Ship's gangway used.
OPENING/CLOSING HATCHES: According to the customs of the po opening and closing of hatches is usually by ship's crew but it can als be done by stevedores if requested by Master in advance.
CUSTOMS ALLOWANCES: No restrictions on crew consumption o tobacco and alcohol on board. It is prohibited to take these items ashore
REPATRIATION: Can be arranged.
AIRPORT: Regular connections with internal services.
TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.
TIDE: Changes of water level in the river are due to effects of the win and seasonal increase and decrease of the amount of water brough down from the shore. In Winter; rise of water level is due to the ice pilin up. Max. range of the water level is about 4.0 m. – 6.0 m.

Max. rise of water level is in April, May and June, usually caused b Easterly winds. The least water level is observed in August, Septembe and October, due to Westerly winds.
HOLIDAYS: New Year's Day (1st January), International Women's Da (8th March); Days of International Workers' Solidarity (1st and 2nd May World War II Victory Day (9th May).
POLICE/AMBULANCE/FIRE: Police, Tel: 9-03-16; Ambulance, Tel: 9-06-00; Fire, Tel: 9-05-24.
SHORE LEAVE: Allowed up to midnight.
IDENTIFICATION CARDS: Required for crewmen going ashore.
AUTHORITY: The Port of Izmail Authority, 7 Port Street, 272630 - Izmail, Ukraine. *Tel:* (04841) 25601. *Telex:* 232133. *FAX:* (04841) 9013 *Cables:* Morport Izmail. *Contact:* Valentin F. Kotelny, Port Director.

AGENT: JV "Inflot Izmail". Postal address: 14 Port Street, 272630 - Izmail, Ukraine. Cables: "Inflot Izmail". Tel: 9-01-81, 9-05-59, 2-04-6 Telex: 232136.

KHERSON: 46.37 N. 32.37 E. (See Plan

GENERAL: The sea and river commercial port of Kherson is situate on the right bank of the Dnieper River and on the left bank of th Koshevaya River.

The port is open for navigation all the year round but in severe Winter ice-breaker assistance is required.

Ice at the estuary of the Dnieper finally disappears in the first half o March.
PORT LIMITS: A vessel is considered to be an "arrived ship" and la time will commence on arrival to the inner roadstead of the port.
DOCUMENTS: *Quarantine:*
Maritime Declaration of Health.
Valid Derat Certificate.
International Vaccination Certificates.
Customs:
Money List.
Complete copy of each Manifest for goods onboard.
Immigration:
Crew List – 5 copies.
Passenger List – 5 copies.
Seaman's Book or Passport for each person.
General Declaration – 5 copies.
APPROACHES: The port is accessible for sea-going vessels. Th approaching channel is very well marked by navigation marks; therefore there are no difficulties in navigating a vessel along it when entering o leaving the port.
PILOTAGE: Compulsory. Navigational range marks, leading marks o Stanislov, Adjigolsky beacons, Verbchansky and Maliy Kasperovsk leading light buoys, and spar buoys. Master advises Port Controller an Inflot Agency ETA minimum of 96 hours prior notice.

Masters of vessels proceeding to the port of Kherson must advise ETA to the Harbour Master through Inflot Agency 48 hours, 24 hou and 6 hours prior to arrival at the point of Lat. 46° 15′ 06″ N. Long. 30° 56′ 01″ E.

Master shall order a Pilot via the Inflot Shipping Agency 8 hours an confirm the order 2 hours prior to leaving the port of Kherson.

Masters of vessels proceeding to the Port of Kherson must advise ETA both to Inflot Ilychevsk and pilot station Ilychevsk 48, 24 and 6 hou prior to arrival at point Lat. 46° 15′ 16″ N., Long. 30° 56′ 01″ E. On arri at the point Masters must call Inflot Ilychevsk or pilot station on VHF Channel 16.

ANCHORAGES: A part of the Dneiper River from the Northern border of the town of Kherson, nearly up to the Maly Potemkin Island, is considered as the Port of Kherson Roads.

The anchorage for foreign flag dry cargo vessels is situated in the area restricted by 2 imaginary lines of the leading marks located on the left bank of the Dnieper River, upwards from the mouth of the Konka River and lower of basin (creek) No. 2.

The recommended anchorage for foreign flag tankers is situated in the area stretching down the river from the oil piers towards leading line No. 7, S.W. of the upper leading marks clearing the place where a submarine cable is laid.

RESTRICTIONS: The permitted draft for passing through the channel is 7.6 m. but it may vary depending on weather conditions.

In the Summer the channel is open for navigation 24 hours a day.

Speed of vessels having draft over 5 m. should not exceed 10 knots whilst navigating through the channel.

The port receives vessels with length up to 200 m.

Navigation through the channel in restricted visibility is strictly prohibited.

It is prohibited by local quarantine authorities to discharge sea-water ballast into the harbour.

HEALTH: No automatic Pratique. Cable to Inflot, name and nationality of the ship, ports of call during last month, nature of cargo, number of crew and passengers, condition of health of all onboard with details of any sickness.

RADIO: Ship-shore radio link can be established through the port radio station operating 24 hours on the following frequencies:

Call sign	Frequencies (kHz) Working	Calling	Type of trans-mission	Time of work
UHZ	500/487	500/468	A1A	H24
"Kherson Radio"	2182	2182	P3E	H24
"Mesyats" (CPR)**	156.8*(16)	156.8*(16)	F3E	H24
"Mesyats-2" (Harbour Master)	156.45*(9)	156.45*(9)	F3E	HX

*Frequencies are given in MHz.

**CPR – Central Port Radio Station.

TUGS: Compulsory for mooring and unmooring or shifting. Number as required by Pilot but the charge depends on n.r.t. of the ship and not on the number of tugs used.

Tugs available: 2×1,412 b.h.p., 2×706 b.h.p., 1×352 b.h.p. and 1×65 b.h.p.

BERTHING: 9 berths, depths up to 8.25 m.

Mooring is effected with port Pilot assistance. Number of tugs required for mooring is determined by Pilot with Master's consent, ship's lines used.

Cranes of up to 10 tons capacity are operated on the quays and by the warehouses. There are floating cranes with lifting capacity of up to 100 tons and other cargo handling equipment, intra-port transport included.

Berths of the port, with depths of up to 8.25 m. alongside are equipped to handle general and bulk cargoes (ore, chemicals, building materials), metals, grain, timber, cotton, cement, food products, etc., as well as passenger traffic. There are enclosed warehouses, a grain elevator and open concrete floor storing spaces without roofs. There is a refrigerated warehouse at Berth No. 4. Cargo is generally loaded/unloaded by shore cranes but ship's derricks are always to be ready for use.

TIDE: Changes in the water level observed in the port are due to the effect of the wind and variation in atmospheric pressure. The maximum range of the water level caused by winds may reach 2 m.

The changes of the water level due to variation in atmospheric pressure ("Seish" effect) are observed at times. They may last from a few minutes up to several days and may reach 0.58 m.

MEDICAL: Hospital facilities available.

DENSITY: 1000.

TANKERS: Max. draft 7.5 m. Loading rate for gas oil 300 tonnes/hr.

FRESH WATER: Available by barge. Rate 50 t.p.h.

FUEL: Not available. Bunkering takes place at Odessa.

REPAIRS: Only minor repairs can be carried out. There are no dry docks.

SURVEYORS: Saybolt at Odessa.

CERTIFICATES:

Construction Certificate.

Safety Equipment Certificate.

Radio Safety Certificate.

Load Line Certificate.

OPENING/CLOSING HATCHES: Opening and closing of hatches is usually done by the ship's crew. It may also be done by port workers for vessel's account.

REPATRIATION: Crew changes and repatriation possible.

TIME: GMT plus 3 hours. Daylight saving time, GMT plus 4 hours from last Sunday in March to last Sunday in September.

SHORE LEAVE: Possible from 0800 hrs. – 0000 hrs. No restrictions for Masters.

AUTHORITY: Port of Kherson Authority, 4 Ushakov Av., 325025 Kherson, Ukraine. *Tel:* 29-14-02, 2-38-48. *Cables:* Morport Kherson.

AGENT: Kherson Shipping Agency "Inflot". Postal address: 11 Petrenko Street, 325004, Kherson, Ukraine. Tel: 29-13-51, 2-35-961. Telex: 273114 Inf Su. Cables: "Inflot Kherson".

KILIA: 45.26 N. 29.17 E. (See Plan)

GENERAL: The Port of Kilia is situated on the left bank of the Kilia inlet of the Danube River, 47 km. from the estuary. The depths of the water within the port area vary from 3 m. up to 22 m. The holding ground is clay and mud. The season of navigation in the port area lasts from March till December depending on time when the Danube River is frozen over.

PILOTAGE: Carried out by the Pilot service of the port of Izmail.

ANCHORAGES: Allowed in the port area, in 5 m. depths according to the Pilot's instructions.

RESTRICTIONS: Vessels can enter or leave the port at any time of day or night. Movement of vessels during fog is not allowed.

RADIO: Communication can be effected via the port radio station viz. "Kilia-Radio".

Call Sign	Frequencies (MHz) Working	Calling	Type of trans-mission	Time of work
Kilia-1 (CPR)*	156.8(16) 157.25(25)	156.8(16) 157.25(25)	F3E F3E	H24 H24
Kilia-2 (Harbour Master)	156.6(12) 156.45(9)	156.6(12) 156.45(9)	F3E F3E	H24 H24

*Central Port Radio Station.

Notice of Arrival: Masters of vessels going to the port from seaward via Kilia Inlet should advise "Inflot Izmail" their ETA 24 hours prior to arrival at the Reception Buoy area. More precise time of arrival should be advised at a later time.

TUGS: Approaching and shifting berth is performed without tug assistance.

BERTHING: Cargo vessels drawing up to 7 m. are handled with the use of buffer barges. Berths of the port are equipped to handle general cargoes, metals, timber, coal. Embarking/disembarking of passengers is also performed. There are portal cranes of up to 6 tons capacity, a warehouse and open storage areas covered with concrete. There are also floating cranes of up to 5 tons capacity which are used for handling cargo in the Outer Roads. The loading of grain is carried out at the grain elevator berth by its own equipment.

FRESH WATER: Available from Izmail with sufficient notice.

FUEL: Available from Izmail with sufficient notice.

CONSULS: None.

REPAIRS: Not possible.

TIME: GMT plus 3 hours. GMT plus 4 hours in summer.

AUTHORITY: Port of Kilia Authority. 4, Zheleznyakov Street, 272610 Port of Kilia, Odessa Region, Ukraine. *Tel:* 2-37-03. *Telex:* 232103 UST D SU. *Cables:* Morport Kilia. *Contact:* Port Director.

AGENT: JV "Inflot Izmail". Telex: 232136 TNI SU. Cables: "Inflot Izmail".

MARIUPOL (Zhdanov): 47.06 N. 37.35 E. (See Plan)

GENERAL: A sea port in the Azov Sea, Mariupol is situated 14 miles Northward of the entry into the Taganrog Gulf, at the Western end of it.

All-year round navigation is possible but during 30 – 90 days period of ice conditions with ice-breaker assistance for ice-strengthened vessels only.

Ice usually begins to form at the end of November or the beginning of December, and 3 – 4 weeks later the Gulf becomes completely frozen over. The increase of fast ice usually lasts up to the first half of February. As a rule the ice usually breaks up in the middle of March. It finally disappears at the end of March or, as an exception, in the first half of April.

The port of Mariupol consists of the Outer and Inner Roads, the Western Harbour, the Ugolnaya (or the Coal) Harbour, the Grain Harbour and the Ship-repairing Basin.

PILOTAGE: Compulsory. Inform Kerch Harbour Master ETA 24 hours and 6 hours, off Kerch Strait. On arrival Kerch Pilot Buoy No. 21 (Lat. 45° 13′ N., Long. 36° 27′ E.), drop anchor and await Pilot; also keep continuous radio watch.

Not later than 4 hours prior to arrival at the mouth of the Coal Harbour Approach Channel, Buoy No. 1, a Master should order a Harbour Pilot.

ANCHORAGES: A good anchorage can be obtained in the Outer Roads of the port of Mariupol situated opposite the port entrance. The depths in the roads are from 5 m. – 9 m. the holding ground is mud mixed with sand and shell.

RESTRICTIONS: Vessels can enter or leave the port at any time of day and night. All vessels entering or leaving the port should have keel clearance not less than 0.5 ft. (15 cm.).

The max. allowed speed in the approach channels is 8 knots and in the part of the Coal Harbour Approach Channel, protected by a wooden dam, only 3 knots.

The speed of a vessel may be increased in case of necessity to keep her course along the leading line or prevent her drifting off the channel due to the effect of current or wind.

MAX. SIZE: Draft 8 m., length 200 m.

HEALTH: After presenting Vaccination Certificates, Free Pratique obtained. After proceeding from one port of the Ukraine to another, Free Pratique obtained automatically.

Vessels calling at any port in the Sea of Azov are to be equipped with either a sewage treatment plant or a sewage tank. Before entering Kerch Strait, all valves for discharging non-purified bilge and sewage water to be closed and sealed by the ship. Date and ship's coordinates to be entered in Log Book.

RADAR: The port of Mariupol radar station gives all possible information to any vessel navigating along the Coal Harbour approach channels in the restricted visibility and during the absence of the floating navigation marks.

Radar navigation is controlled by a Pilot in charge.

RADIO: Vessels approaching the port of Mariupol should establish radio contact through Mariupol Radio port radio station operating 24 hours daily on the following frequencies:

Call Sign	*Frequencies (kHz) Working*	*Calling*	*Type of trans- mission*	*Time of work*
UTW	500/473	500/416	A1A	H24
“Mariupol-Radio”	2182	2182	N3E	H24
“Mariupol Radio-1”	156.8*(16)	156.8*(16)	F3E	H24
“Mariupol Radio-2” (Port Controller)	156.7*(14)	156.7*(14)		
“Mariupol Radio-5” (Harbour Master and Pilot Station)	156.45*(9)	156.45*(9)	F3E	H24
“Mariupol Radio-9” (Movement Control)	156.375(67)	156.375(67)	F3E	H24
“Mariupol Inflot”	156.875(77)	156.875(77)	F3E	H24

*Frequencies are given in MHz.

TUGS: Available. Use ship’s lines. Tug assistance for shifting berths is compulsory. Number of tugs to be ordered shall be advised by Pilot.

BERTHING: The berths of the port with depths of up to 9.0 m. are equipped to handle general, containers, bulk and liquid cargoes, timber, metals, food stuff, fruit, vegetables, etc., and passenger shipping as well. There are enclosed warehouses, open concrete floor sheds and a grain elevator.

On the quays there are electric cranes of up to 40 tons capacity, coal and grain loaders. There are floating cranes with lifting capacity of up to 100 tons and other cargo handling equipment.

The Grain Harbour is bounded by two piers – by the Dividing Pier from S.W. and by the Eastern Pier from N.E.

The depths in the central part of the Grain Harbour are from 8.7 m. to 9.1 m.

The Coal Harbour is protected on its S.E. side by the Eastern Mole, extending the length of the harbour. The berths have depths alongside of up to 9.0 m.

The Western Harbour is situated adjacent to Coal Harbour. It is protected from the East by the Dike Dam and from the S.W. by the Western Mole. The general depth in the harbour is 9.0 m.

When proceeding to the Inner Roads through the shoal water vessels should use approaching channels leading to the Coal Harbour and the Avant-port.

The Coal Harbour approach channel is the main fairway for entry to the port of Mariupol. It passes through a coastal shoal then enters the Southern part of the West Harbour.

Navigation along the Avant-port and the Coal Harbour approach channels is also ensured by leading lights, light buoys and spar buoys.

The access to the port of Azovstal is by a channel branching off N.E. of the Coal Harbour approach channel.

MEDICAL: Masters to advise by radio prior arrival of medical attendance required on board. Hospital facilities available. Vaccination Certificates to be presented.

DENSITY: About 1005.

FRESH WATER: Delivered at berth. Also delivered by lighters.

Vessels are advised to arrive with sufficient fresh water for their stay in port.

FUEL: Delivered by lighters. Supply of fuel to be arranged well in advance of vessel’s arrival.

CONSULS: None.

REPAIRS: The ship-repairing Basin is situated in the Northern part of the Inner Roads. It is bounded on the S.W. by the Eastern Pier and on the East by the Eastern Dam. The entrance to the Basin is situated between the heads of the Eastern Pier and the Eastern Dam. The depths in the Basin are from 6.1 m. to 7.4 m.

All kinds of repairs for vessels of up to 22,000 d.w.t. can be carried out.

DRY DOCKS: Floating docks of 15,000 and 5,000 tons.

OPENING/CLOSING HATCHES: Crew allowed open and close, stevedores placing beams.

CERTIFICATES: Registered Tonnage Certificate and all international certificates are required.

CUSTOMS ALLOWANCES: No quantity restrictions. Nothing to be taken ashore.

REPATRIATION: All facilities for repatriation subject to visa formalities.

AIRPORT: 15 km. from port with regular airlines.

TIME: Local time GMT plus 2 hours, GMT plus 3 hours in Summer.

HOLIDAYS: 1st January; 7th January; 8th March; 1st, 2nd, 9th May; 24th August; 7th, 8th November.

AMBULANCE/FIRE: Ambulance 9-03; Fire 9-01.

TELEPHONES: Telephones cannot be placed aboard. Long distance calls are difficult to make.

IDENTIFICATION CARDS: Not required.

WEATHER: The changes in the water level is mainly caused by effects of the wind observed here all the year round. The fall of the water level is usually caused by Northerly and N.E’ly winds but rises of the water level are due to S.W’ly winds.

The range of the water level observed in the Gulf is about 1 m.

Changes of the water level can also be caused by variation in the atmospheric pressure, so called “Seish” effect. The “Seish” usually starts during calm weather and can last, on average, for about 24 hours.

The maximum range of the water level due to the “Seish” effect observed in August is about 0.6 m.

AUTHORITY: The Port of Mariupol Authority, 99 Admiral Lunin Avenue, 341010 Mariupol, Ukraine. *Tel:* (06292) 51039, 58508. *Telex:* 115215 More Su. *Cables:* Morport Mariupol. *FAX:* (06292) 58415. *Contact:* Y.I. Markin, Harbour Master. A.V. Shtepa, Port Director.

AGENT: Azoz Main Maritime Agency “Inflot”, 1 Admiral Lunin Prospect, 341010 Mariupol, Donetsk Region, Ukraine. Tel: 377415, 58198, 58579. Cables: Inflot Mariupol. Telex: 115124. Fax: Via No. 873-1402223 (Azov Shipping Co.).

NIKOLAEV: 46.56 N. 31.57 E. (See Pla

GENERAL: The commercial sea port of Nikolaev is situated in the mou of the Yuzhny Bug River (the Southern Bug), in the Northern part of t Dnieper (the Bug estuary).

The port is open for navigation all the year round, but in Winter announcement of Ice Compaign, traffic through the approach chan is permitted in convoy when escorted by ice-breakers. Ice first beg to form in the second half of December, and in the channel and t estuary it finally disappears in the first half of March.

PORT LIMITS: A vessel is considered to be an “arrived ship” on arri at the inner roadstead of the port. Laytime will commence in accordan with the Code of Customs of Nikolaev Commercial Sea Port.

DOCUMENTS:

Quarantine:
  Maritime Declaration of Health.
  Valid Derat Certificate.
Customs:
  2 copies General Declaration.
  2 copies Cargo Declaration.
  3 copies Crew List.
  3 copies Passenger List.
  2 copies Currency Declaration.
  2 copies Crew Personal Effects Declaration.
  2 copies Stores List.
Immigration:
  1 copy General Declaration.
  3 copies Crew List.
  3 copies Passenger List.
  Seaman’s Book or Passport for each person.

APPROACHES: The port is linked with the Black Sea by an approa channel of 44 miles length, up to the port of Ochakov. It is well mark by navigation marks, therefore there are no difficulties in navigating vessel along it when entering the port.

PILOTAGE: Pilotage in the port and in the channel is compulsory t all vessels. Notice of Arrival and ordering of a Pilot should be advise via Inflot Shipping Agency, Illyichevsk, 48 hours, 24 hours and 6 hou prior to the expected time of arrival at the Reception Buoy. Also i necessary to specify length overall and draft. Pilots normally emba and disembark from foreign vessels in the area of traffic circle center at Lat. 46° 16.3′ N., Long. 30° 57′ E., or at any other point designa by the Traffic Co-ordination Centre. Vessels bound for the port Nikolaev should proceed there with a Pilot aboard up to the roads the port of Nikolaev (Buoy No. 230), where a Port Pilot is picked-up.

When leaving, Pilots must be requested via the Inflot Shipping Agen 8 hours in advance, and the request to be confirmed 2 hours prior leaving the port of Nikolaev.

ANCHORAGES: There are 2 anchorages in the inner road of the p

RESTRICTIONS: Navigation through the channel is allowed in dayli only. The least depth of the channel is 10.4 m. and width of channe 100 m.

Tug assistance for passing through the channel is compulsory for t vessels with length of more than 187 m.

Entering the channel during fog, mist, snow-fall, sea evaporation a under bad weather conditions, causing restricted visibility of lead beacons and lights, is prohibited.

On announcement of Ice Compaign, traffic through the channe permitted for vessels having Ice Class Certificate. In case a vessel h no such Certificate, a Special Guarantee Form signed by the Master to be submitted before entering ice.

The port receives vessels having in operation an approved Sewa Treatment Plant. It is prohibited to discharge sea ballast without spe permission of Sanitary Authorities.

MAX. SIZE: Nikolaev, Dnieprobugsky and Octyabrsk: The permiss fresh water draft is 9.8 m., and the permissible length of a vesse 215 m.

HEALTH: No automatic Pratique. Cable “Inflot” the name and nationa of the ship, ports of call during last month, nature of cargo, numbe crew and passengers, condition of health of all onboard with detai sickness, if any.

RADIO: Ship-shore radio connection can be established throug port radio station operating 24 hours on the following frequencies:

Call Sign	*VHF Channel/ kHz*	*Calling Channel/ kHz*	*Type of Transmission*	*Time Wor*
1“Ochakov-Radio-2”	2182 kHz	2182 kHz	H3E	H2
“Ochakov-Radio-4”*	12	16	H3E	H2
“Ochakov-Radio-17”	12	16	H3E	H2
2“Nikolaev-Radio-1” *	1	16	H3E	H2
“Nikolaev-Radio-52” (Harbour Master)	73	16	H3E	H2
“Nikolaev-Radio-2” (Port Control)	68	16	H3E	H2

* CPR – Central Port Radio Station.

TUGS: Compulsory for mooring or shifting.

Tug assistance for passing through the channel is compulsory for vessels with length of more than 187 m. The number is as requir the Pilot, but the charge depends on the size of a vessel, and no the number of tugs used.

Tugs available: 3×1,200 h.p., 2×2,500 h.p., 1×400 h.p. 1×200 h.p.

BERTHING: There are 12 berths with depths up to 9.5 m. Moori effected with Port Pilot’s assistance. The number of tugs requir mooring is decided by Pilot and agreed with Master. Ships’ lines used.

CRANES: Cranes of up to 40 tons capacity are operated on the q and by the warehouses. One floating crane of 100 tons capacity other transhipment facilities also available.

MEDICAL: Hospital facilities available.

DENSITY: 1005 – 1012.

BULK CARGO FACILITIES: There are modern installations used for handling grain, ore, etc. Total silo storage capacity at present is 62,000 tons. Port handles general and bulk cargoes. All berths have railroads, and are in close proximity to storage warehouses, both cold and dry, which facilitate transfer of cargo from vessel to warehouse or to open concrete floor sheds, which are also available.

Cargo is normally loaded/unloaded by shore cranes, but ship's derricks are always to be ready for use.

FRESH WATER: Available from barge. Rate 50 t.p.h.

FUEL: Available.

REPAIRS: Any kind of repair is possible.

DRY DOCKS: There are dry docks in the port.

HATCHES: Opening/closing of hatches is usually carried out by the ship's crew. It may also be done by the port workers for the vessel's account.

CERTIFICATES: Construction Certificate, Safety Equipment Certificate and Load Line Certificate.

REPATRIATION: Crew changes and repatriation are possible.

TIME: GMT plus 2 hours.

SHORE LEAVE: Crew members allowed ashore throughout 24 hours. Shore passes are provided.

GARBAGE DISPOSAL: Collected in special containers, which are provided alongside, ordered via Inflot. Charges depend on the time of vessel's stay in the port.

WASTE OIL DISPOSAL: Collected by special barges.

CURRENCY: Karbovanets.

AUTHORITY: Nikolaev Port Authority, 23 Zavodskaya Street, Nikolaev 327004, Ukraine. *Tel:* 373140, 298555. *Telex:* 272121 PORT SU. *FAX:* 246364. *Cables:* Morflot Nikolaev.

AGENT: Nikolaev Shipping Agency "Inflot", 11 Zavodskaya Street, Nikolaev 327004, Ukraine. Tel: 369192, 298770. Telex: 272115 INF SU. Cables: Inflot Nikolaev.

Vessels that are bound for the ports of Dnieprobugsky and Octyabrsk should give information to "Inflot" Nikolaev.

ODESSA: 46.30 N. 30.46 E. (See Plan)

GENERAL: The Port of Odessa is situated on the N.W. coast of the Black Sea in the S.W. part of Odessa Bay.

The port is open for navigation all the year round, but with ice-breaker assistance in severe Winters about 30 days of the year. Ice first begins to form in the second half of December and finally disappears in February. After ice has formed it is often broken up by strong winds and stormy weather. In mild Winters ice has not been observed in Odessa Bay.

Range of water level caused by winds depends on force and periods they blow, and may reach 0.6 m. – 1.0 m.

Atmospheric pressure has also a direct influence on the water level ("Seish" effect), but is weaker than effects of the wind. The "Seish" may last from a few minutes up to several days causing change of water level up to 0.58 m.

PORT LIMITS: The Odessa port waters are bound in the South by Lat. 46° 25′ 00″ N. from the shoreline as far as its intersection with Long. 30° 54′ 00″ E.; in the East by Long. 30° 54′ 00″ E.; in the North by Lat. 46° 32′ 00″ N. to its intersection with the shoreline and on the West by the shoreline itself.

PILOTAGE: Compulsory. Arranged through Inflot, but vessel to give 12 days', 96, 24 hours' and 6 hours' notice through Odessa Radio. Pilot boat recognised by international pilot flag. Vessel requiring Pilot shows International flag "G". Request for Pilot to shift a vessel within the port or to Pilot her into or out of port should be made by the Master through the Inflot Agency at least 4 hours prior to service requirement.

The Pilot is brought on board and returned on shore by pilot launch 1.7 miles E.S.E. of the Vorontsovsky Lighthouse (Lat. 46° 29′ 00″ N., Long. 30° 48′ 00″ E.).

The ship's Master is responsible for the safety of the pilot launch and the Pilot when he boards and disembarks from the vessel as well as during his stay thereon.

The boarding Pilot shall be informed by the ship's Master of the vessel's draft, length, breadth and other particulars required for her safe pilotage and mooring.

Specialised vessels (LASH vessels, barge carriers, container ships, Ro/Ro vessels and the like) shall be piloted through port waters only by a Pilot authorised by the local Port Pilotage Service. The Pilot may be taken on board in advance in the swinging area in the port of Ilichevsk (Lat. 46° 10.2′ N., Long. 30° 56.2′ E.).

Pilotage for all specialised vessels is compulsory.

Masters of vessels proceeding from the port of Odessa to Kherson shall make request for a Pilot through the Inflot Agency from the Maritime Pilot Service based in Ilichevsk. Vessels approaching zone from the sea must communicate with "Odessa Port Control" on VHF, Channel 14 (156.7 MHz) and act in accordance with its instructions.

ANCHORAGES: Two anchorages are available at the Odessa Roadstead. They are Anchorage No. 354 and Anchorage No. 355.

Anchorage No. 354 is for large-tonnage vessels as well as tankers or others carrying dangerous cargoes.

Anchorage No. 355 is used by vessels clearing in or out of port and by those that are to take on water, supplies or fuel or are to undergo minor repairs, etc.

The boundaries of these anchorages are duly charted.

Vessels shall proceed to, and anchor at, Anchorage No. 354 without assistance. Upon anchoring, the vessel shall communicate to the Traffic Control Station her bearings and distance from the Vorontsovsky Lighthouse.

In case of unforeseen circumstances which may endanger navigation (sudden deterioration of visibility, failure of the main engine or steering gear, non-readiness of berth to receive vessel, etc.), vessels entering or leaving port shall, if possible, anchor at points 8 or 12 of Anchorage No. 355.

Anchoring in the Oil Harbour Channel, in the prescribed routes and harbour approaches as well as in the harbour gateway should be avoided.

RESTRICTIONS: Vessels enter only with Pilot and should have lights according to Pilot's instructions. Vessels berthed depending on kind of cargo carrying or loading.

Vessels can enter and leave the port at any time of day or night.

Medium size vessels when entering or leaving port must have keel clearance not less than 1 ft.; large vessels not less than 2 ft.

Vessels are allowed to moor at berth only after having obtained Harbour Master's permission.

The speed of a vessel shall not exceed 4 knots when passing through the channel and/or in the port water areas marked by navigational marks.

Large vessels laden with ballast water only, are allowed to moor to berth if winds do not exceed Force 6. A vessel of smaller size may be turned broadside on to a loaded vessel of a larger size, but not vice versa.

Entry prohibited to all ports of Odessa Region for all vessels not complying with MARPOL 73/78 and tankers, gas carriers, chemical product carriers over 15 years old.

MAX. SIZE: *Inner Harbour:* LOA 240 m., beam 40 m. and draft 12 m.

HEALTH: Free Pratique given on berthing or at the anchorage. In case of suspected disease Master must inform Inflot by cable. Free Pratique cannot be granted automatically.

RADIO: Vessels can establish radio contact through the port radio station Odessa Radio operating 24 hours a day on the following frequencies:

	Channels and Frequencies (kHz)		*Type of trans-mission*	*Time of work*
Call Sign	*Working*	*Calling*		
UDE	500/447	500/454	A1A	H24
"Odessa-Radio"	2182	2182	H3E	H24
"Odessa-1" (CPR)*	16,7,27 and 62		F3E	H24
"Odessa-Radio-5" (Harbour Master)	16,9	16,9	F3E	H24
"Odessa Pilot"	14,16	14,16	F3E	H24
"Odessa-Radio-8" (Inflot Shipping Agency)	16,13	16,13	F3E	H24
"Odessa Port Control"	16,14,31	16,14,31	F3E	H24
(Vessels' movement control post)	67,14	67,14	F3E	H24

*CPR – Central Port Radio Station.

Traffic and storm signals are given by "Odessa Port Control" on VHF Channels 14 and 16.

VHF: Traffic in the harbour is controlled by the Traffic Control Station round the clock. The Traffic Control Station and the Signal Mast are situated on the roof of a building at Berth No. 1. The station telephone number is 37-30, its VHF call signal is "Odessa Port Control", and the operating Channels are 14, 20 and 67.

All vessels proceeding to the port of Odessa shall establish VHF communication on Channel 14 (156.7 MHz) with the Traffic Control Station 20 minutes prior to entering control zone (8 miles from Vorontsovsky Lighthouse), when entering port waters and after berthing or anchoring.

The vessel shall give the following particulars to the Pilot-Operator on duty:

(a) Ship's name, owner, length, breadth, draft.
(b) Name of local Agent.
(c) Last port of call and purpose of calling at the port of Odessa.
(d) Specialised vessels (LASH vessels, barge carriers, Ro/Ro and such like) and others concerned, also indicate the number of propellers, their pitch (variable or constant), engine power, availability of thruster and its power.

Thereafter, the ship will proceed according to the instructions of the Traffic Control Station.

Prior to moving any ship within the Traffic Control Zone, her Master shall request permission from the duty Pilot-Operator of the Traffic Control Station by VHF Channel 14, by telephone (37-30) or by visual communication means.

Such permission is valid only for 30 minutes after which it is automatically cancelled.

A special watch should be posted on all vessels and other craft navigating within Traffic Control Zone to listen in on VHF Channel 14 until they are berthed or anchored. Ships underway may change their VHF Channel only on instructions from the Traffic Control Station or the Pilot Service.

All vessels sailing in port waters shall have their VHF stations in good order and shall keep them operative on one of the channels used for communication in the port.

Vessels in port waters, at berth or anchorage, are strictly prohibited to use the VHF for private communication on Channels 16, 9, 14, 20, 22 and 67.

Failure to comply with this regulation will be regarded as a violation of safety rules prescribed for sailing in the Odessa port waters and all violators will be punished accordingly.

Also see "Radio."

RADAR: When visibility is less than 2 miles in the roadstead or 0.5 miles in the port, vessels may be navigated only by shore-based radar.

The necessity for Radar-Assisted Pilotage is determined by the Pilot-Operator on duty at the Traffic Control Station.

The decision to put a vessel into or out of port shall be taken jointly by her Master, the Port Pilot and the duty Pilot-Operator of the shore-based radar station. Ship-to-radar station communication shall be effected by the boarding Pilot.

The shore-based radar station provides:

(a) Pilotage of vessels from the limits of the Traffic Control Zone to the Karantinaya, Novaya and Kabotazhnay Harbours of the dry-cargo port through the Vorontsov Gateway.

(b) Pilotage of vessels from the limits of the Traffic Control Zone to Anchorage No. 355.

(c) Pilotage of vessels from the port through the Vorontsov Gateway and from Anchorage No. 355 to points beyond the Traffic Control Zone Limits.

(d) Remote pilotage of vessels with no Pilot on board by furnishing them with information on their position, with other data to help them orientate and to pass clear of other ships. Such information is supplied by the shore-based radar station at the Master's request.

Vessels may be brought to Anchorage No. 355 only with the assistance of shore-based radar pilotage whatever the visibility conditions may be.

Radar Assisted Pilotage and Remote Pilotage are effected throughout the 24 hours of the day, only 1 vessel being piloted at a time.

A ship to be piloted with the assistance of or by shore-based radar shall have her main engine, steering gear, anchor handling gear, communication facilities and sound signalling in good working conidtion and her radar shall be operative. Failure of any of above equipment is to be immediately reported by the ship's Master to the shore-based radar station through the Pilot.

In the event of failure of the shore-based radar or other means of ship-to-shore communication, the Master, whose ship is being assisted by such radar or is on remote pilotage, must take all the necessary measures to ensure the ship's safety.

The use of the shore-based radar does not relieve the Shipmaster of responsibility for ship control.

Radar Assisted or Remote Pilotage dues are recovered according to established procedure on the basis of the extract from the log of the Odessa Port Traffic Control Station.

TUGS: A ship's tugboat requirements are made known, subsequent to the Pilot's approval, to the Traffic Manager on VHF Channel 14, call signal "Odessa Port Control", at least 2 hours prior to the ship's approaching the port gateway. Tugs are compulsory for vessels over 100 m. LOA.

BERTHING: 38 berths available with depths alongside from 8 m. up to 12.0 m.

STEVEDORES: Portal electric cranes of up to 45 tons capacity are operated on the quays by the warehouses. There are grain-loaders and floating cranes with lifting capacity of up to 100 tons, other cargo handling equipment and intraport transport.

Opening and closing of mechanised hatches is always done by the ship's crew.

Opening of hatches on arrival and closing of non-mechanical hatches after loading of cargo has been completed, is done by ship's crew.

Opening and closing of non-mechanised hatches in the course of loading or unloading is done by port workers.

MEDICAL: Advance notice for medical attendance required. Notice should be given to Inflot. Hospital facilities available in case of emergency.

TANKERS: No reducing pieces necessary. Oil slop facilities available. The Oil Harbour is situated in the Northern part of the port (the inner roads), Northward of Rabochaya Harbour which is formed by a "T"-shaped mole extending E.S.E. off-shore.

Berths No. 1 and 5: Max. LOA 240 m., max. draft 11.5 m.
Berths No. 2, 3 and 4: Max. draft 8.0 m.
Loading Rates:
Berths No. 1 and 5: Fuel oil 2,000 tonnes/hr.
Gas oil 500 tonnes/hr.

DENSITY: Average density 1012 varying with season.

FRESH WATER: Fresh water may be supplied ex-shore or ex-water barge. Minimum quantity ex-barge 15 tons.

FUEL: Bunkers can be supplied by barge, and to be ordered 72 hours before arrival.

CONSULS:

Bulgarian Consulate General	Tel: 66-60-92.
Indian Consulate General	Tel: 22-43-33.
Cuban Consulate General	Tel: 25-14-69.

REPAIRS: All types of deck and engine repairs can be carried out.

DRY DOCKS: Available.

GANGWAY/DECK WATCHMEN: Not necessary.

OPENING/CLOSING HATCHES: See "Stevedores".

CUSTOMS ALLOWANCES: Tobacco. No limits on board vessel, but when going ashore not more than 1 or 2 packs. Wine and/or spirits not to be taken ashore.

CARGO GEAR: All cargo gear must have certificates for maximum weight capacity.

REPATRIATION: Can be arranged.

AIRPORT: Distance to airport 10 miles. Direct flights with several socialist countries and with the rest of the world through Moscow. Aircraft fly to Moscow 4 times a day.

TIME: GMT plus 2 hours. GMT plus 3 hour in Summer (Last Sunday in March to Last Sunday in September).

HOLIDAYS: Work can be arranged on below mentioned holidays through Sovfracht, Moscow, at special rates. Holidays: 1st January, 8th March, 1st and 2nd May, 9th May, 7th October, 7th and 8th November.

POLICE/AMBULANCE/FIRE: Police (Militia), 02 from town; 902 from port. Ambulance: 03 from town, 903 from port. Fire: 01 from town, 901 from port.

TELEPHONES: Telephones may be installed on board.

SERVICES: Tank-cleaning equipment available.

SHORE LEAVE: Crew members allowed to stay ashore until midnight. Master without limitation.

IDENTIFICATION CARDS: Necessary.

GARBAGE DISPOSAL: Collection service is available, drums and s are provided alongside. Food waste and garbage should be pre-bagg bags of up to 100 kg. or containers of 0.75 cu.m. are available, and a provided via Port Agents:

Inflot, Tel: 22.39.02, 29.49.03.
Sovmortrans, Tel: 26.98.75, 26.98.78.

WASTE OIL DISPOSAL: Waste oil collection service is availab provided by barges and shore tanks, located in Oil Harbour. T 25.15.72 or 29.33.48. A ballast water treatment station recei 42,000 cu.m. daily.

SEAMAM'S CLUBS: Seaman's Club located at 15 Rosa Luxemb Street, Odessa. Tel: 22.28.51. Facilities: Shop and internatio telephone services.

CURRENCY: Rouble.

DELAYS: Vessels berthed in turn.

REGULATIONS: The following is a copy of Odessa Sea P Regulations (dated 1990) received from a Shipmaster in October 19

SECTION I

GENERAL REGULATIONS:

1.1 The Regulations in force in the Port of Odessa, issued in accordan with Article 66 of the Commercial Shipping Code and Order No. 15 June 7th, 1978 of the Ministry of Merchant Marine, supplement t General Rules for all maritime commercial and fishing ports.

1.2 The Odessa Port Regulations are applicable to all state and fore ships as well as to all organisations, enterprises, individuals that happ to be within the port area both on land or at sea. Lack of knowledge the General Rules and the present Regulations does not exempt a organisation, enterprise or individual from responsibility for violat them. Failure to coincide the Traffic Regulations with the present P Regulations shall result in implementation of the latter.

1.3 The present Odessa Port Regulations come into force as of Octo 31st, 1989. The former Regulations issued in 1984 are herew cancelled.

1.4 Masters of all foreign vessels may acquaint themselves with the Regulations and all other port rules in force through the Inflot Age or boarding pilot.

1.5 The Odessa port waters include inner water area and ou roadstead. Two anchorages are available at the Odessa roadste They are Anchorage No. 354 and Anchorage No. 355.

Anchorage No. 355 is accessible with the permission of the duty Pi Operator of the Traffic Control Station and used by vessels clearing or out of port and by those that are to replenish water, fuel, supplies are to undergo minor repairs, etc.

Anchorage No. 354 is for large tonnage vessels as well as tankers others carrying dangerous cargoes.

The boundaries of these anchorages are duly charted.

1.6 Declared draft in the port is 11.5 m. Permissible draft is coun with regard for soundings at berth within three-metre limits and for 30 c clearance under the keel but regardless of low/high level of the tide

Permissible draft limits for entry into port and soundings at berths i made known on the Harbour Master's orders and are brought to t notice of all concerned.

In each particular case the Pilot together with the Port Control se the matter of berthing a vessel by taking into account the type subsequent cargo operations (whether discharging or loading) with regard for permissible draft and low/high level of the tide.

1.7 In Odessa Port, control over all vessels operating on internatio lines is exercised by a special department of the Harbour Con Inspection established in accordance with the 1978 Report on t SOLAS International Convention of 1974 and with the 1978 repor the MARPOL International Convention of 1973.

1.8 The Shipping Control Centre is located in the Odessa Por exercises control over shipping in the Northwestern part of the Bl Sea, dispatches traffic stream, provides pilot and bunker supplying The Shipping Control Centre charges fees for the service rendere accordance with the existing tariffs.

SECTION 2

ENTERING AND LEAVING PORT:

2.1 The Odessa Port receives vessels round the clock.

2.2 The arrival of a foreign vessel is registered by the Inflot agen the Harbour Master's office and that of a Ukrainian ship at any Har Control Station.

2.3 Vessels may leave the port at any time of day or night.

2.4 A vessel's readiness to put to sea is checked by a control par a rule 3 – 4 hours prior to leaving, in agreement with the vess administration after which the Statement of Instructions is drawn u duplicate, one copy remaining on board the vessel.

2.5 In case of a delay of the vessel's departure for more than 30 min after the time specified in the request for leaving the port, the pilot tug boats sent in good faith to pilot her out of the port may be discha Another request for them shall be made, the charges for first call o pilot and tug boats are collected according to the tariffs.

2.6 No vessel may leave the port without obtaining the Ou Clearance from the Harbour Control. The Outward Clearance o vessel is made by the Harbour Control Master onboard the vesse

2.7 If a vessel lying in the outer roadstead urgently has to get unde towards one of the following ports: Yuzniy, Ochakov, Dniepro-Bu Nickolayev, Kherson, Scadoysk, Ilichevsk or Belgorod-Dniestro but due to meteorological conditions is unable to obtain the Ou Clearance in due order, such a vessel as an exception may obta same through the Inflot agency with the Harbour Control Inspectio radio.

The Master of the vessel shall submit to the Harbour Co Inspection through Inflot the following information: The number of members on board, composition of the staff; quantity and nature of cargo on board; the vessel's draft, metacentric height; period of va of conventional documents.

2.8 Ships' Masters arriving in the port for loading or partial discharging of grain or other bulk cargoes shall, prior to commencing cargo operations, submit to the Harbour Control a preliminary cargo plan for the full load or partial discharge which shall be drawn up corresponding to one of the stowage variants specified in the ship's "General Information for Ship's Stability during Transportation of Grain or other Bulk Cargoes".

The said "General Information" shall be endorsed by and bear the signature and seal of the Register of Shipping, the Register of Fishing or of some foreign Classification Society.

2.9 Should the said "General Information" be unavailable onboard the ship or should it not be signed or stamped by the corresponding Classification Society, such a vessel may be cleared out only subject to the Register's approval of the cargo plan and its appropriate endorsement.

The ship may leave the port or proceed to the outer roadstead only after the actual loading has been found to correspond to the cargo plan previously submitted.

2.10 Before the ship's departure from the port her Master shall submit to the Harbour Control Inspection the ship's stability calculations, a diagram of her static stability indicating the corrected and allowed metacentric heights.

2.11 Masters of all vessels sailing within the port waters shall strictly observe the present General Regulations as well as the Sailing Instructions currently in force within the Traffic Control Zone of the Northwestern part of the Black Sea.

2.12 Vessels shall enter or leave the Odessa Port by way of the Eastern, Western and Northern gateways, the Main Oil Harbour Channel consisting of the first and second bends and the Second Approach Oil Harbour Channel.

2.13 Cargo and passenger vessels not exceeding 140 m. in length shall be put into the Odessa Port through the Vorontsovsky gateway. Vessels shall pass/receive towlines to/from tugs off the zone within a range of 12 cables from the Vorontsovsky Lighthouse.

It is also necessary to take into account the wind and swell limitations established for tugs by the Register.

2.14 The decision to bring such vessels into the port without passing towlines (due to some extraordinary circumstances) may be taken by both the ship's Master and the pilot on their own responsibility.

2.15 On approaching the Vorontsovsky gateway Masters of all vessels shall sail on the course close to 180°.

2.16 Pilotage in the Odessa Port is compulsory.

Entering port, departing therefrom and shifting within the harbour are permissible round the clock only with a pilot on board.

2.17 Request for a pilot and tugs to shift a vessel within the harbour or to pilot her into or out of port should be made by the Master through the duty Pilot-Operator of the Traffic Control Station (its VHF call sign is "Odessa Port Control", the operating Channel is 14, the station telephone number is 37-30) at least 45 minutes prior to service requirement.

2.18 The pilot is taken onboard vessels arriving from the open sea and proceeding to berth, at the point with bearing 090° and distance of 2 miles off the Vorontsovsky Lighthouse.

On ship's departing from the berth out to sea the pilot is dropped at the point with bearing 120° and distance of 1.5 miles off the Vorontsovsky Lighthouse.

On vessels proceeding from the anchorage into the harbour the pilot boards the vessel at the anchorage.

Under unfavourable weather conditions the point of taking or dropping the pilot may be changed in agreement with the ship's Master and the duty Pilot-Operator. During a storm and in ice conditions the pilot may be delivered on board or taken off by a port seagoing tug at the shipowners's expense.

2.19 On piloting specialised vessels (LASH vessels, barge carriers, container ships, Ro-Ro vessels and the like, exceeding 200 m. in length) the pilot is taken on board/disembarked within the corresponding traffic lanes of Part 5 of Traffic Separation Scheme No. 2 (Traffic Control Zone) and the line located 0.5 miles South of it.

Pilotage for such vessels is compulsory while entering the control zone (port waters) or changing the anchorage position.

2.20 Masters of all ships shall take a pilot on board if any changes occur in the port waters situation (on the Pilot-Operator's instructions).

2.21 Masters of vessels proceeding from the port of Odessa to Dnieprо-Bugskiy, Nickolayev or Kherson may make request for a pilot from the Maritime Pilot Service based in Ilichevsk through the Inflot agency.

Pilot is taken on board in the roadstead in the Ochakov port area or at the Master's request in the port of Odessa.

2.22 When visibility is poor the decision to take a vessel into or out of port shall be taken jointly by her Master and the Port Pilot. Ship-to-Radar Station communication shall be effected by the boarding pilot.

2.23 Shifting vessels with their main engines, steering gear or anchor gear immobilised shall be paid with 50% rise in charges for the service rendered (tug and pilot fees).

SECTION 3

NAVIGATING IN PORT WATERS:

3.1 Control over safe navigation of all vessels and floating facilities in the traffic control zone (port waters) is exercised by the Traffic Control Radar Station through the Traffic Control Station.

3.2 Before mooring at Berths No. 1-33 all anchors shall be hove into their hawse pipes, however they shall be kept ready to be let go immediately after any emergency situation arises.

3.3 No vessels underway in the port waters or lying alongside berths (sea board) may have their derricks, cranes, accommodation ladders, boats and other equipment swung out until they are berthed or anchored. Exception is made only for pilot ladders.

3.4 All vessels carrying explosives, inflammable and/or poisonous cargoes shall lie at Anchorage No. 354 until in receipt of further instructions from the Port Authority and Fire Station.

While entering or leaving port or lying therein, such vessels shall hoist the 'B' flag (explosives flag) in a conspicuous place by day and exhibit a red light visible all round the horizon with a range of at least 3 miles at night. Navigators of other craft shall exercise special care when approaching such vessels.

3.5 No sound or light signals, not specified in the International Regulations for Preventing Collisions at Sea, 1972, in the General Rules for Maritime Commercial and Fishing Ports of Ukraine as well as the present Odessa Port Regulations, may be given within the port limits.

3.6 A vessel may be steered within the port waters only with highly experienced men at the helm. Any transfer of the helm to other persons while the vessel is passing through areas where special care in steering should be exercised is strictly prohibited.

3.7 The loss or discovery of an anchor or any other object dangerous to navigation within the port waters shall be immediately reported by the ship's Master to the Harbour Master.

3.8 No ships may take soundings when proceeding into port, along fairways and passages, when navigating in the harbour or lying at berth.

3.9 The inner port waters may be entered by ships not exceeding 12.0 m. draft, 240 m. length and 40 m. breadth.

Gas carriers are prohibited in the Odessa port waters.

3.10 The vessels exceeding 11.0 m. draft navigating in port waters shall exhibit lights and signals specified in Article 28 of the International Regulations for Preventing Collisions at Sea, 1972.

3.11 The ship's speed shall not exceed:

(a) In the inner port waters and the Oil Harbour channels – 4 knots;
(b) in other port areas – 10 knots.

In any case main engines shall operate to ensure the ship's manoeuvrability.

3.12 Traffic in control zone and within the harbour is controlled by the Traffic Control Radar Station located at the head of Berth No. 1 (Lat. 46° 29.5′ N., Long. 30° 45.6′ E.).

3.13 The Pilot-Operator of the Traffic Control Radar Station using the high-tech Shore-to-Ship Station provides:

(a) Pilotage of vessels from the limits of the traffic control zone to Karantinya, Novaya and Kabotaghnaya harbours of the dry cargo port through the Eastern gateway;
(b) Pilotage of vessels from the limits of the traffic control zone to Anchorage No. 355;
(c) Pilotage of vessels from the port through the Eastern gateway and from Anchorage No. 355 to points beyond the traffic control zone limits;
(d) Pilotage of vessels to/from the Oil Harbour and Berths No. 32 and 33 through the Main and Second Northern approach channels of the Oil Harbour;
(e) Remote pilotage of vessels with no pilot on board by furnishing them with information on their position, with other data to help them orient an pass clear of other ships.

3.14 The Traffic Control Zone includes the water area bound by bearing 161° from the Vorontsovsky Lighthouse as far as its intersection with parallel 46° 22′ N.; by this parallel to its intersection with meridian 31° 03′ E.; by this meridian to its intersection with parallel 46° 29′ N.; by this parallel to its intersection with meridian 30° 55′ E.; by this meridian to its intersection with the shoreline.

3.15 The zone bound by the shoreline, bearing 161° from the Vorontsovsky Lighthouse and bearing 042° from Ilichevsky Lighthouse cannot be seen from the Shore Based Radar Station (blind sector), and therefore is regarded as dangerous. Great caution is required to navigate in this zone.

3.16 At the Traffic Control Radar Station the Computer Complex was introduced to supply vessels proceeding to the Northwestern part of the Black Sea with necessary information.

All vessels proceeding to the port of Odessa shall forward Notices of Approach to the Traffic Separation Zone 72, 48, 24 and 4 hours in advance (call sign is "Odessa – BLASCO – Traffic Control Centre"). Failure to do so shall result in increase in the rate of information dues by 100% (Order No. 186 of the Ministry of the Merchant Marine of the state of November 30th, 1987).

3.17 Radar assistance is rendered throughout 24 hours of the day whatever the visibility may be. Radar assisted pilotage charges are based on the Pilot-Operator's receipts and collected according to the existing tariffs (Order No. 186 of the Ministry of the Merchant Marine of November 30th, 1987).

All vessels navigating within the Traffic Control Zone shall use service rendered by the Traffic Control Station.

Naval vessels may get service free of charge.

3.18 Radar assisted pilotage within the traffic control zone is compulsory whatever the visibility conditions may be:

(a) For all passenger liners, gas carriers, chemical carriers, ferries, tankers and specialised vessels (barge carriers, LASH carriers, container vessels, Ro-Ro vessels and the like exceeding 200 m. in length);
(b) for all vessels moving to/from Anchorage No. 355.

3.19 A special watch should be effected on all vessels within the traffic control zone to listen in on VHF Channel 14 until they are berthed or anchored.

3.20 Navigating vessels in the Odessa port waters and traffic control zone is effected mainly along the fairways and narrows.

3.21 One-way traffic is a standard practice in the Oil Harbour when sailing through the Eastern, Western and Northern gateways.

3.22 Auxilliary craft and small tonnage ships pass through the Western and Northern gateways.

3.23 Prior to entering the traffic control zone, coming to or weighing anchor, moving to/from anchorages or berthing, shifting, etc., the vessel shall request permission from the Traffic Control Station. The permission is valid only for 30 minutes after which it is automatically cancelled.

Failure to do so may subject the vessel to 100% additional charges for radar assisted pilotage.

3.24 Entering the traffic control zone and shifting of all vessels and other craft without the Traffic Control Station's permission is prohibited.

3.25 Vessels when navigating in traffic control zone shall strictly observe the Sailing instructions of the Traffic Control System of the Northwestern part of the Black Sea and the International Regulations for Preventing Collisions at Sea, 1972.

3.26 All vessels shall repeat recommendations and instructions received from the Traffic Control Station. If they are unable to follow these instructions they shall report the reason and further intentions.

3.27 All navigators and radio operators shall strictly observe "Operating Instructions on VHF Communications at Sea No. 9044".

3.28 On establishing VHF communication with the Traffic Control Station the vessel shall give the following particulars to the Pilot-Operator on duty:

(a) Ship's name and type.
(b) Time of approach to traffic control zone or departure from berth.
(c) Speed.
(d) Ship's nationality and owner.
(e) Port of destination.
(f) Gross and nett registered tonnage.
(g) Nature and quantity of cargo on board.
(h) Ship's forward and aft drafts, length and breadth.
(i) Other data at the duty Pilot-Operator's request.

Master is responsible for the authenticity of the information transmitted.

3.29 At the request of the Traffic Control Station in order to identify her, the ship shall report the bearing and distance from Vorontsov Lighthouse and carry out the identifying manoeuvre.

3.30 The Traffic Control Station gives the identified ship the permission to enter the traffic control zone, indicates the direction of movement, anchorage and supplies her with other information, including warnings and limitations.

3.31 Only one vessel not exceeding 180 m. in length with a compass adjuster on board may carry out deviation operation in port waters with the permission of the Traffic Control Station.

3.32 Under favourable conditions in port waters, the duty Pilot-Operator may give permission to 2 vessels not exceeding 180 m. in length with a compass adjuster on board to carry out deviation operation simultaneously.

3.33 Radar assisted pilotage into the port may be effected at the Master's request.

When visibility is less than 3 miles, radar assisted pilotage is compulsory.

3.34 In restricted visibility no more than 2 vessels may be piloted by the Traffic Control Station simultaneously.

Possibility of simultaneous pilotage of 2 vessels is decided by the Chief Pilot-Operator of the Traffic Control Station in each particular case.

3.35 A ship to be piloted with the assistance of or by shore-based radar shall have her main engine, steering gear, anchor handling gear, communication facilities, gyro compass and sound signalling equipment in good working condition and her radar shall be operative.

3.36 In the event of failure of the shore based radar or other means of ship-to-shore communication, the Master, whose ship is being assisted by such radar or is on remote pilotage, must take all the necessary measures to ensure the ship's safety and inform the duty Pilot-Operator immediately.

3.37 The use of the shore based radar does not relieve the Shipmaster of responsibility for the ship's control and safety.

3.38 Anchoring in the Oil Harbour channels, port gateways and within the inner port area is prohibited.

3.39 In case the vessel has to anchor in traffic control zone outside Anchorages No. 354 and 355, the Master shall inform the duty Pilot-Operator of the reason.

3.40 Vessels moving in the Oil Harbour channels have priority over those crossing the channel.

3.41 Two-way traffic and overtaking are prohibited in the Oil Harbour channels and port gateways. Overtaking is also prohibited in the inner port water area.

SECTION 4

SPECIAL CASES OF NAVIGATION IN PORT WATERS:

4.1 Tugs towing sea-going vessels, lighters and other craft of 500 g.r.t. and more shall be under the command of the Master of the ship in tow.

4.2 All vessels exceeding 100 m. in length shall be towed by tugs in mooring operations.

4.3 During discharging of grain in the outer roadstead, tugs are forbidden to leave floating cranes and pneumatic loaders alongside the vessel unless it is agreed with the vessel's Master and the Pilot-Operator of the Traffic Control Station.

4.4 Towing operations shall be directed by the Master of the vessel being towed, who is responsible for the safety of the tug lying alongside the vessel.

4.5 Tugs meet and escort vessels entering or leaving the port in the range of 12 cables to the East of the Vorontsovsky Lighthouse.

4.6 The Master makes a request for tugs through the Inflot Agency at least 2 hours prior to the ship's readiness for departure or shifting.

4.7 The Master shall call out a tug 45 minutes prior to the ship's departure, shifting or approaching the port gateway through the duty Pilot-Operator.

4.8 Tugs carrying out towing and pushing operations are united into one group which is at the disposal of the Traffic Control Radar Station.

4.9 A bulbous bow vessel underway shall, when engaging a docking tug, pass the tow rope by means of a hauling line.

4.10 A vessel exceeding 150 m. in length with her main engine or steering gear immobilised shall exhibit the lights specified in Paragraph 27B in addition to the signs and lights specified in Paragraph 24E of the International Rules for Prevention of Collisions at Sea, 1972.

4.11 Self-propelled vessels shall be towed with the aid of the shortest possible tow lines.

4.12 The Harbour Master in accordance with the actual ice conditions in the port waters declares the beginning and completion of ice campaign in port waters, whereof he informs all concerned.

4.13 Forming convoys, establishing priorities of vessel's putting in o of the port, providing ice breakers in port waters are exercised by th Harbour Master.

4.14 Vessels' Masters possessing the permission for self-operating ice shall inform the Harbour Master of the Port of destination, of the position, ice conditions and operational speed every 4 hours.

4.15 Vessels bound to/from Nickolayev, Dniepro-Bugskiy or Kherso are rendered ice breaker assistance by forming convoys off the Biereza Island or in ports.

4.16 Masters not possessing the license to operate in ice are prohibite to enter and navigate in ice.

Exception is made only for urgent necessity if the shipowner allow a non-ice class vessel to pass through ice and it is agreed with th Harbour Master who provides necessary ice breaker assistance.

4.17 Foreign vessels having on board no documents certifying their rig to operate in ice, are taken under ice breaker escort, only after the Maste submitting in writing his agreement to be so escorted and to pa expenses over possible ice damage to the vessel.

Responsibility for possible damage to such vessels navigating in ic rests with their shipowners.

4.18 Requests for ice breaker assistance in putting a vessel into po shall be forwarded 48 hours prior to service requirement and confirme 24, 12 and 4 hours prior to approaching the traffic control zone or ic edge.

Requests for ice breaker assistance in putting a vessel out of po shall be made 24 hours in advance.

4.19 The following information shall be given on request: ship's nam overall dimensions, draft, main engine power, fuel and wat consumption per day, pure water speed, propeller material, total quanti of cargo, availability of documents confirming the right to operate in ic ship's seaworthiness by the time of approach.

SECTION 5

SHIP'S STAY IN PORT:

5.1 Steam and water outlets in the hulls of all vessels shall be thorough covered with wooden boards or canvas.

5.2 To avoid casualties no outboard work may be done on the off-sid of vessels lying at Berths No. 3, 11, 17, 25, 32 and 33.

5.3 Ships may anchor at Points 1 – 11 of Anchorage No. 355, which bound by lines having points with coordinates:

Latitude	46° 31.08′ N.	Longitude	30° 45.97′ E.
	46° 31.50′ N.		30° 46.03′ E.
	46° 31.80′ N.		30° 47.29′ E.
	46° 30.61′ N.		30° 48.28′ E.
	46° 30.41′ N.		30° 47.50′ E.
	46° 30.44′ N.		30° 46.50′ E.

The Points in area of Anchorage No. 355 have the followin coordinates:

Point N 1	Latitude	46° 31.40′ N.	Longitude	30° 46.20′ E.
N 2		46° 31.44′ N.		30° 46.60′ E.
N 3		46° 31.55′ N.		30° 47.07′ E.
N 4		46° 31.00′ N.		30° 46.38′ E.
N 5		46° 31.14′ N.		30° 46.85′ E.
N 6		46° 31.26′ N.		30° 47.32′ E.
N 7		46° 30.70′ N.		30° 46.62′ E.
N 8		46° 30.84′ N.		30° 47.11′ E.
N 9		46° 30.97′ N.		30° 47.56′ E.
N 10		46° 30.52′ N.		30° 47.23′ E.
N 11		46° 30.68′ N.		30° 47.81′ E.

The following order of anchoring should be observed at th Anchorage:

(a) Point No. 7 is used for vessels not exceeding 10 m. draft an 260 m. length. When anchoring a vessel exceeding 200 m. length Point No. 7, neighbouring Points No. 4, 8 and 10 must be free of an craft.

(b) Points No. 1, 2, 3, 4, 5, 8 and 10 are used for vessels not exceedin 8.0 m. draft and 200 m. length.

(c) Points No. 3, 6, 9 and 11 are used for vessels not exceeding 6.5 draft and 170 m. length. These points are for anchoring passeng training, research and river vessels.

(d) Points No. 1, 9 and 11 are used for transport vessels waiting entering/departing clearance, bunkering, water and food supply, cr replacement and minor repairs.

The request shall be forwarded to the Inflot Agency and followed b making a note in the daily shift plan of ships' traffic (mooring operation in port on agreement with the Traffic Control Station.

(e) Point No. 12 (Lat. 46° 30.18′ N., Long. 30° 47.81′ E.) is at th Harbour Master's disposal in case of urgent and unforeseen anchor

(f) Anchorage No. 355 is used for state ships only. For foreign vess it is necessary to obtain the Immigration Authority's permission to anch there.

5.4 Anchorage No. 354 is used for large tonnage vessels, tankers, sh with dangerous cargo on board and all other vessels waiting for th permission to enter Odessa port.

Vessels shall proceed to, and anchor at, Anchorage No. 354 witho assistance. Upon anchoring, the vessel shall communicate to the Tra Control Station her bearing and distance from the Vorontsov Lighthouse.

5.5 Anchoring of floating cranes, lighters, barges, floating grain loade and other floating facilities alongside the vessels at Anchorages No. 35 and 355 for carrying out cargo and other operations, shall be agre with the Traffic Control Station.

5.6 Specialised and large tonnage vessels shall anchor at Point N only. The length of the vessel and that of the anchor chain paid should be taken into account in order to work out the radius of the tur circle and not to exceed the boundaries of the anchorage.

To ensure his ship's safety at anchorage the Master may reques powerful tug at the shipowners' expense. At wind speeds excee 18 m./secs., 2 tugs may be provided. Two reliable polypropelene tow lines shall be passed from the vessel's stern to the tug.

During time at anchor such vessels shall arrange for continuous bridge watch and communication through VHF Channel 14 with the Traffic Control Station.

At the time of anchoring specialised and large tonnage vessels to Point No.7 and for all periods of their lying at anchor Points No. 4, 8 and 10 shall be free of any floating facilities.

5.7 The following order is established for mooring vessels at berths:

No. 12, 13, 25, 26 and 33 – By portside for large tonnage vessels with the draft permissible for these berths.
No. 8 – By portside.
No. 32 – By starboard side.
No. 4 of Oil Harbour – By starboard side.
No. 1 of Oil Harbour – By starboard side for large tonnage tankers.
Other berths – By the side indicated by the duty Pilot-Operator and agreed with the vessel's Master and the Pilot on board.

In case of necessity, it is possible to change the berthing side by obtaining the Harbour Master's permission and including it into the daily plan of ships' traffic (mooring operations). Exception is made for Berths No. 25, 26, 32 and 33 for which changing the side of berthing is prohibited.

5.8 The Odessa Oil Harbour has 7 berths which can accommodate tankers of the following dimensions:

No. 1 – Not exceeding 240 m. length, 40 m. breadth and 12.0 m. draft.
No. 2, 3, 4 and 7 – Up to 145 m. length, 20 m. breadth and 8.7 m. draft.
No. 5 – Not exceeding 240 m. length, 40 m. breadth and 11.5 m. draft.
No. 6 – Up to 125 m. length, 16 m. breadth and 4.0 m. draft.

Due to territory limits of the Oil Harbour water area no vessels exceeding 132 m. length may moor at Berth No. 2 during handling of tankers of 240 m. length and 40 m. breadth alongside Berth No. 1.

5.9 To ensure safe berthing and provide emergency departure from the Oil Harbour, the following berthing instructions shall be observed:

(a) Mooring vessels over 240 m. length and 40 m. breadth to Berth No. 1 may be carried on provided there are no vessels at Berth No. 2.

(b) If a tanker is lying at Berth No. 2 her stem should not extend more than 60 m. from the line of Berth No. 1 (orange mark between guns No. 4 and 5). During mooring operations alongside Berth No. 1, all cargo operations on the tanker lying at Berth No. 2 shall be stopped.

(c) If there is a vessel at Berth No. 1, the tanker mooring at Berth No.2 should be of such a length that after berthing and taking of hoses her stem shall extend at least 5.0 m. from the imaginary sea board plane of the vessel lying at Berth No.1, and the distance from the stern of the tanker to the stern of the vessel lying at Berth No.3 shall extend at least 15 m.

5.10 During mooring to/from a berth or shifting the vessel, it is obligatory to have in attendance representatives of the Cargo Handling Complex and Harbour Control with hand VHF station for communication between the Traffic Control Station and the Pilot on board.

5.11 During mooring to/from or shifting passenger liners alongside Berths No.15, 16, 18 and 19 due to constructive peculiarities of the passenger pier, it it desirable to have in attendance:

(1) A representative of the Harbour Control Inspection – on the quayside in way of the vessel's berthing place.

(2) A shift assistant of the Sea Terminal Master – on the territory of the Sea Terminal in way of the gangway providing for its proper installation on the vessel as well as for embarkation/disembarkation of passengers.

5.12 The receiving/letting go of the ship's tow ropes during berthing operations, regardless of the purpose of mooring at berths (whether cargo operations, taking supplies, staying at berth, crew replacement, etc.) should be done by shoremen of those departments (Cargo Handling Complex, Sea Terminal, Oil Harbour) under whose charge these berths are.

5.13 Low-freeboard tankers laden with 3rd category cargoes of the International Maritime Dangerous Goods Code mooring at the Oil Harbour berths shall use the starboard anchor so as not to sink the deck below the berth fenders.

The anchor may be heaved only when the tanker's deck is at least on the level with the upper edge of the berth.

5.14 To ensure safe mooring of tankers at the Oil Harbour berths under unfavourable weather conditions, the anchor may be let go but shall be raised and hove into its hawse on the completion of mooring and prior to commencement of cargo operations.

5.15 Only one vessel not exceeding 240 m. in length may be moored to the corner of Berths No. 16 and 17 from partial discharging of grain or to the corner of Berths No. 23 and 24 for the same purpose (ship's length shall not exceed 200 m.).

Mooring is carried out by letting go both anchors so as to ensure safe passage for vessels proceeding to/from the Karantinaya, Novaya and Kabotazhnaya Harbours. It is possible to moor at these berths only at day time.

Mooring at Berth No.2 by stern is prohibited in any case.

5.16 All claims for damage to the vessel during mooring or cargo operations shall be made by the Master and forwarded to the Port Authority no later than 8 hours after the incident, or if the ship is to leave the port earlier – before the departure. Otherwise the port will not accept any claims and will not bear responsibility for the damage.

5.17 In the port it is prohibited:

(a) To moor a vessel alongside a smaller ship.

(b) To moor a vessel in ballast alongside a sister ship of the same dimensions with cargo on board.

(c) To moor passenger, research and training vessels alongside each other.

(d) To moor vessels with their main engines, steering or anchoring gear immobilised at Berths No. 13, 15, 19, 21, 25, 26, 32 and 33 and alongside each other.

(e) To moor vessels at the berths put out of operation.

(f) To moor large tonnage vessels exceeding 200 m. length at Berths No. 25 and 26.

(g) To leave Berths No. 25 and 26 by stern for large tonnage vessels exceeding 10 m. draft.

(h) To moor vessels exceeding 150 m. in length at Berth No. 21.

(i) To moor large vessels at Berth No. 32 in case there are floating facilities at Berth No. 31.

(j) To moor more than one vessel at Berths No. 3, 8, 11B, 17, 23B and 25.

If necessary a floating crane may be moored alongside vessel lying at Berth No. 8 for a short period of time on agreement with the Traffic Control Station.

5.18 Vessels moored with their sterns extending beyond the berth shall be tied up securely.

During cargo operations the following signals shall be exhibited on such vessels: by day – flags "Romeo" and "Yankee" ("You must slow down when passing me"); at night – one red light visible round the horizon.

Regardless and for whatever the purpose of her stay, a red light shall be exhibited over the stern of such a vessel at night to show her extent beyond the berth.

5.19 On the authorisation of the Traffic Control Station and with their Masters' consent large tonnage ships may be moored at Berths No.32 and 33 with their sterns extending 30 m. or more beyond the berth, depending on the ship's length.

When two such ships are moored at Berths No. 32 and 33, at least 2 breast lines shall be passed from the stern of each vessel to that of the other.

To ensure his ship's safety at berth in an off-shore wind which is affecting the position of her stern, the Master has the right to request the Port Authority for tug assistance.

A tug shall be directed to such a vessel by the duty Pilot-Operator at her Master's request. A reliable towing line shall be passed from this vessel to the tug at the Tug Master's request.

5.20 To ensure safe access to the vessels moored at Berths No.32 and 33 with their sterns extending beyond the berths, a floating jetty (lighter) should be installed at the ship's stern and securely tied up to the berth, a shore-to-ship gangway should be provided. The floating jetty (lighter) should be installed under the ship's gangway suspended by the ship's administration.

The responsibility for installation of the floating jetty as well as of the shore-to-ship gangway rests with the administration of Cargo Complex No. 6.

5.21 The owners of vessels carrying passengers and those of passenger terminals, floating jetties and other installations designed for embarkation/disembarkation of passengers shall provide for the safe working condition of terminals, floating jetties, etc. and safe embarkation/disembarkation to avoid any accidents with passengers.

5.22 The control over safe embarkation and disembarkation of passengers at sea terminals is exercised by the duty assistant of the Sea Terminal Master.

5.23 The shifting of vessels is allowed only with a pilot on board.

The pilot takes charge of shifting a foreign vessel along the berth. During shifting operations the following limitations should be observed within the harbour water area:

(a) Vessels in ballast and those having cargo of no more than 20% of the ship's deadweight (except for large tonnage vessels) may be shifted at the wind speed not exceeding 15 m./sec.

(b) Large tonnage vessels in ballast and Ro-Ro ships, Ro-flow ships, LASH carriers, tankers, container carriers and the like with cargo of no more than 20% of their deadweight due to the large windage are shifted at the windspeed not exceeding 12 m./sec.

(c) Shifting of vessels with faulty main engines, steering or anchoring gear is carried on only at daytime when the wind speed does not exceed 10 m./sec.

(d) Vessels are moored broadside if the wind speed does not exceed 10 m./sec. and visibility is no less than 500 m. on agreement with both Masters.

5.24 On completion of cargo handling or other operations, each vessel shall, at the first duty Pilot-Operator's request, leave her berth and the inner port waters at her own expense. Failing to do so, such a vessel, should there be immediate need to vacate the berth, shall be removed therefrom by Port facilities at her Owner's expense and he will be held fully responsible for any losses brought about by his ship's failure to vacate the berth on time.

5.25 Receiving/throwing of ship's towlines during shifting of a vessel along all berths should be made by means of those port departments (Cargo Handling Complex, Sea Terminal, etc.) at whose request it is carried on.

5.26 On receiving a storm warning of wind increasing from the Eastern directions (000° – 090° – 180°) up to 22 m./sec. and more, vessels lying at Anchorage No. 355 and in Areas "A" and "B" shall, at the duty Pilot-Operator's request, change their place of anchoring as follows:

(a) Auxiliary and small ships shall be put into the port and securely moored at berths.

(b) All other vessels shall go into anchor at Anchorage No. 354 or put to sea to ride out the storm.

The shifting of vessels lying on the roadstead shall be done on authorisation and under control of the Traffic Control Station.

5.27 In case of emergency oil spillage, on entering the oil stained field, the vessel must not commence sailing before obtaining a special permission from the Head of purifying operations.

5.28 Vessels and other floating facilities are strictly prohibited to pass through the polluted area. When navigating in the vicinity of the area where collection of oil is being carried out, vessels shall slow down to the minimum speed.

5.29 Deballasting shall only be done with pipelines designed for this particular purpose, by day, and with the permission of the Sanitary Inspection of the Environment Protection Head Office.

5.30 Water polluted with petroleum products is collected by the Purifying Station situated on the territory of the Oil Harbour or by special harbour craft. This service shall be paid for on the basis of existing tariffs.

5.31 Removing garbage and rubbish from ships and dumping of them on port territory is prohibited. Garbage and rubbish is removed from ships by the port at the request of their administration, the charges collected according to current tariffs.

5.32 Rubbish and garbage is removed from ships in polythene bags (containers) delivered on board by the Port at their request through the Inflot Agency. The contents of the polythene bags and containers are disinfected and removed to a special dump by the Port. Charges for this service are paid by the shipowners according to current port tariffs.

5.33 Tankers carrying out cargo operations and all vessels bunkering shall be boomed in accordance with the instructions on booming vessels in port.

5.34 The vessel shall pay port charges for collecting petroleum products in the amount of 3 roubles per kilo of the petroleum products collected regardless of the request made.

5.35 It is prohibited to sweep dust, rubbish and snow from berths and the ship into the water or ice.

5.36 If any pollution in the port waters is detected from the ship this shall be immediately reported to the Harbour Control Inspection (Telephone No. 36-66) and Special Inspection of Environment Protection of the Black Sea (Telephone No. 25-14-47).

SECTION 6

USE OF RADIO COMMUNICATION FACILITIES IN PORT WATERS:

6.1 All vessels sailing in port waters shall have their VHF stations in working order and shall keep them operative on one of the channels used for communication in port.

In case of lack or failure of ship's VHF station it is possible to communicate with the Traffic Control Station through the "BLASCO" Radio Centre on marine calling and distress radiotelephony frequency 2182 kHz. (call signal is "Odessa-Radio-1").

6.2 The following VHF radiotelephony stations are available in the Odessa port zone:

No.	*Telephone Subscriber*	*Call Signal*	*VHF Channels*		
			Calling	*Working*	*Reserve*
1.	BLASCO Radio Centre	"Odessa-Radio-1"	16	7,27,62	–
2.	Traffic Control Station	"Odessa-Port-Control"	16	14	67
3.	Pilot boats	Name of the pilot boat	14	14	–
4.	Harbour Control Inspection	"Odessa-Radio-5"	16	9	–
5.	Harbour Control boat	Name: "Pilot boat-86"	16	9	–
6.	Harbour Craft Centre	"Odessa-Radio-6"	33	33	–
7.	Inflot Agency	"Odessa-Radio-8", for foreign vessels: "Inflot-Odessa"	16	67	–

6.3 Vessels within the Traffic Control Zone, at berth or anchorage, are strictly prohibited to use the VHF for private communication on Channels 3, 6, 8, 9, 14, 16, 26, 31 and 67.

Failure to comply with this regulation will be regarded as a violation of safety rules prescribed for sailing in the Odessa port waters (traffic control zone) and all violators will be subject to liability.

SECTION 7

ORDER AND SAFETY IN HARBOUR WATERS – PROTECTION OF HARBOUR FACILITIES:

7.1 Fishing in port waters off quays or any craft is strictly prohibited.

7.2 Any objects found floating in the port waters which may be a hazard to navigation shall be immediately reported to the duty Pilot-Operator of the Traffic Control Station.

7.3 If a vessel happens to damage or run down any navigational marking, the Master shall immediately report the accident to the duty Pilot-Operator who is urgently to warn seafarers and to take measures to recover it.

7.4 Vessels at berth shall not turn their propellers. Exception is made for:

(a) Diesel driven vessels at dead slow before leaving berth.

(b) Steamships for heating engines, at dead slow, before sailing, provided special permission has been obtained from the Harbour Master and the distance between the propellers and the berth is at least 10.0 m.

7.5 Harbour structures damaged by a vessel are repaired at her owner's expense provided the documents confirming the ship's guilt are available.

7.6 The areas in which it is prohibited to drop anchors and drag different objects or anchors along the ground are shown on the charts.

7.7 Diving work in port waters may be performed only with special permission of the Harbour Master, Traffic Control Station or Harbour Control Inspection.

Request for such permission shall be applied for by the ship's Master or the enterprise concerned through the Harbour Master's Head Office. The diving boat's skipper shall obtain permission to commence diving work from the Traffic Control Station.

SECTION 8

ORDER AND SECURITY ON PORT PREMISES:

8.1 The Odessa Port premises and waters within the established boundaries are controlled by the Harbour Watching Station and Immigration Authorities.

8.2 While on the Odessa Port premises, all persons shall carry pas permits or other documents allowing their admission to port territory shall present them at the first request of any Immigration or Har Security Officer.

8.3 Vessels lying at berth shall station their own personnel as watchm to guard the ship and her cargo.

8.4 Passenger liners lying at berth shall obtain permission from Harbour Watching Station before installing their gangway on the regime territory.

8.5 When the ship's gangway and ladder are used on the port reg territory simultaneously, the responsibility for prevention of movem of people and goods from the controlled to the non-controlled terri rests with the ship's administration.

8.6 All foreign citizens who pass through the control post shall pres the Immigration Authority's permit.

8.7 Telephone communication with Port Services is effected throu the Automatic Telephone Exchange, both of the port and of the city

Harbour Master Head Office:	Telephone No.
Harbour Master	36-61, 22-63-25
Secretary	32-95
Traffic Control Station	37-30
Chief Harbour Pilot	34-57
Harbour Control Inspection (Central Post)	36-66
Harbour Control Post at Sea Terminal	38-84
Harbour Control Post in Oil Harbour	33-96
Harbour Control Post at Berth No.20	43-52
Passport Department (Chicherin St.,4)	48-22, 25-34-49
Fire Department	32-32, 39-35
Fire Fighting Team	33-54
Inflot Agency	37-81, 49-03

8.8 The following is strictly prohibited on port premises:

(a) Firing any type of firearms.

(b) Turning on fire hydrants and faucets.

(c) Selling, carrying, drinking alcoholic beverages and gambling.

(d) Damaging trees.

SECTION 9

FIRE SAFETY CONTROL:

9.1 Vessels lying at berth or on the roadstead shall take bunker fue from the floating bunkering barges.

9.2 Passenger liners shall only take bunkers from self-propelled barg (if for some reasons it it impossible then a tug shall lie alongside bunkering barge for the total period of bunkering) with obliga confirmation of the vessel's Master in writing that there are passengers on board.

9.3 While inflammable or explosive cargo is being handled in the c cargo harbour, a specially equipped fire crew shall be stationed on boa ship or a fireboat shall lie alongside.

Request for such a crew or boat shall be made by the ship's Mas the ensuing service charges to be paid by him according to exis tariffs.

Unless these requirements have been complied with, no danger cargo may be handled.

9.4 Before towing non-self-propelled vessels with inflammable cargo board and before all operations in the Oil Harbour, both bunker barges and vessels to be towed shall obtain the permission from Register and the Fire Department of the Harbour Watching Station shall have not less than 2 steel fire wires (one forward and one aft) exhaust channels of the internal combustion engine equipped with sp traps.

9.5 No work or maintenance operations unrelated to loading discharging of cargo may be performed on vessels lying at berth in Oil Harbour.

9.6 Immobilising a tanker's main engine, anchor or steering gear repair purposes while the vessel is in the Oil Harbour is strictly prohib

In exceptional cases emergency repairs to the main engine, and or steering gear may be carried out only with the Harbour Mas permission and agreement of the Fire Department. When repair wor necessary and has been permitted, at least 2 tugs, with towing li paid out to the tanker, shall lie alongside, tug charges to be collec from the owners of the tanker.

9.7 On carrying out cargo operations on tankers with the IMO Class 3 oil cargo on board lying at berth in the Oil Harbour, a firebo or tug shall lie alongside the tanker, boat or tug charges to be collec from the owners of the tanker.

SECTION 10

SANITARY AND QUARANTINE REGULATIONS:

10.1 Masters of vessels arriving from foreign ports shall make kno to the Boarding Pilot the sanitary and epidemiological condition of t ships as well as report any case of illness among the crew member passengers. Only those ships will be allowed to approach berth an moor whose sanitary and epidemiological condition and absence of cases on board has been confirmed by the Pilot.

In case the sanitary and epidemiological condition on board prov be unsatisfactory and/or there happen to be sick cases among the c members or passengers, such a ship shall drop anchor at one of port anchorages indicated by the Traffic Control Station and await fur instructions.

No person except the Pilot may leave or board the vessel until it undergone sanitary inspection. The Pilot shall obtain the permission the Sanitary and Quarantine Inspection.

10.2 The Sanitary Inspector may require of the ship's surgeon or Ma a written statement to the effect that no cases of plague, cholera, ye fever, typhus or smallpox have been recorded on board since the s departure from a certain port with unfavourable sanitary epidemiologcal conditions or for the period specified by the exis rules.

10.3 Gas deratisation on board ship is carried out at the requirement of the Sanitary and Quarantine Inspection. To have the vessel fumigated for rats or otherwise, the Master shall make arrangement for the purpose through Inflot.

10.4 While a ship is being fumigated or degassed she shall carry all the requisite signals.

10.5 Due to lack of appropriate equipment, the Port does not handle such cargoes as raw hides and other goods of animal origin as they constitute a sanitation hazard.

10.6 Biological treatment systems, if available on vessels, shall be operated in strict compliance with the instructions for the particular system.

The ship's Master is responsible for the purity of the water thus treated.

During the ship's stay at berth or on the roadstead, the water treated by the ship's biological treatment system is tested for purity at the Sanitary Inspection's Laboratories.

10.7 The Port provides the Sanitary and Quarantine Inspectors with boats in established order to carry out sanitary inspection of vessels lying on the roadstead, to give entry clearance as well as to carry out necessary anti-epidemiological operations on board vessels.

10.8 The following paragraphs of the present Port Regulations also correspond to this section: 5.29, 5.30, 5.31, 5.32, 5.33.

10.9 The Sanitary Inspection enforces strict supervision over the compliance of all vessels with the Sanitary Regulations.

Violators of these Regulations are held responsible and punished in accordance with the Council of Ministers Resolution No. 118 of February 14th, 1977.

The following additions to the General Regulations were received in August 1994.

2. ENTERING AND LEAVING PORT.

2.2.1. The services rendered by the Harbour Control Inspection regarding formalities in connection with arrival and departure of vessels, and checking their compliance with the respective International Conventions, followed by making the statement, shall be paid in accordance with the rate in force in the Port.

5. SHIP'S STAY IN PORT.

Anchorage of vessels in the designated points of roadstead shall be paid in accordance with the rate (anchor dues) in force in the Port which was introduced on 1st July 1993, for all vessels that use the anchorage points.

5.6. On Prevention of Port Water Area Pollution with oil products, harmful substances and sewage.

5.37. All vessels located in the water area and roadsteads of the port as well as all enterprises, organisations and institutions located in its territory (or emptying their effluents in the port water area) shall have to observe the requirements of the legislation of the Ukraine pertaining to protection of the environment and to agree with the Port Management all measures connected with the aspects of environmental protection in the territory and water area of the port.

Those quilty (Shipowner, Master, etc.) of violation of the requirements of the environmental protection legislation shall be called to criminal, administrative and property liability.

5.38. All vessels, irrespective of their departmental affiliation and flag, shall on arrival to the Port of Odessa, undertake to prove their compliance with the requirements of the International Convention MARPOL 73/78 by producing International Certificates on Prevention of Pollution by Oil, Sewage and Garbage to the Harbour Master.

Those vessels that do not comply with the International Convention MARPOL 73/78 shall not be accepted by the Port.

5.39. All vessels, other floating craft when they are within the port water area and in the roadstead of the Odessa port, as well as the enterprises and organisations located in its territory (or emptying their effluents in the port water area), shall be prohibited to discharge in water the substances harmful for human health or living resources of the sea, namely:

(i) Oil, oil products, oil residues and the mixtures containing the above substances in any concentration, including those treated in shipboard arrangement; ballast water from oil/ballast and oil tanks.

(ii) Raw chemicals and products of oil processing remaining after cleaning and washing decks, cargo holds and tanks.

(iii) Untreated drains from the spaces where animals are kept. In the absence of treatment facilities, the sewage disposal system is diverted to surge tanks which outlet valves are to be sealed by the ship administration.

(iv) Any other discharges if they result in a change of colour, odour and transparency of water or if their discharge leads to appearance of noticeable floating particles.

(v) Garbage and food remains, remnants of any cargoes and dunnage that have been used during carriage.

5.40. To preclude pollution of port water area, the administration of the vessel shall have:

(i) To close and seal the valves and other arrangements through which harmful substances may be discharged prior to entering the territorial waters.

(ii) To tightly close deck scuppers, to install pans under connections of hoses and air pipes and ensure reliable control over them during performance of any operations with oil, oil products, oily water and other harmful substances.

(iii) To make entries in the Oil Record Log and in ship's Log Book regarding all operations with oil, oil products, oil residues, oily water and other harmful substances, as well as regarding the actions aimed at pollution prevention.

5.41. It shall be prohibited for all vessels to clean the port water area by using preparations that sunk oil to bottom or dissolve it in water.

5.42. In case of a discharge outboard of any harmful substance, the administration of the vessel shall have to immediately inform the Harbour Master and the Inspection for Protection of the Black Sea by the quickest way possible (radio, telephone, courier). Similarly, it is necessary to inform on all pollution slicks detected from the vessel within the port water area, indicating their exact position, nature and direction of drift.

5.43. Sealing of all valves (through which a discharge of harmful substances is possible) on board of all vessels lying at berths of the port shall be performed by an authorised representative of the Port only, and is charged in accordance with an established rate.

5.44. During emergency oil spills, the vessel that has been caught by the oil spill shall not start movement until a special permission of the Oil Recovery Operations Manager is obtained.

5.45. It shall be prohibited for vessels and all floating craft to cross the polluted port water area. When passing near the area where oil recovery operations are in progress, speed of the vessel should be reduced to a minimum.

5.46. Administration of the vessel shall have to produce the ship's documents regarding environmental protection following a request by the authorities.

5.47. Collection and removal of oily water and domestic and feces water from all vessels shall be performed by the port following vessel's applications in accordance with established rates.

5.48. Pumping out clean segregated ballast should be performed via specially dedicated pipelines and pumps of the vessel only. Pumping segregated ballast overboard within the Odessa Port area may be performed only after making its laboratory analysis for content of oil products, iron and suspended solids, and obtaining permission for pumping out from the State Inspection for Protection of the Black Sea.

Pumping out shall be performed under supervision of a representative of the Harbour Control Inspection.

5.49. The vessels shall be prohibited to remove and pile garbage and industrial and domestic wastes on their own. The removal shall be performed by the port following vessel's applications with a subsequent payment in accordance with the existing rates.

5.50. Removal of food wastes and garbage shall be performed in polyethylene bags (containers) to be delivered by the Port to vessels following applications to the agency bodies. The contents of the polyethylene bags (containers) shall, after disinfection, be removed to a special dumping site by the Port's means and labour. The rendered services shall be paid for according to Port rates.

5.51. All vessels, while staying at Port's berths, shall be charged at the established rates for the exhaust of harmful substances from the shipboard diesel generators and boilers to atmosphere.

5.52. Vessels proceeding to Odessa shall, on entering the Black Sea, change their segregated ballast taken from other areas of the world oceans for the Black Sea water ballast and make a respective entry in the vessel's Log Book.

5.53. Vessels arriving for cargo handling operations to the oil harbour, as well as those receiving bunkers in the port water area and in the Port's roadstead, shall pay insurance ecological dues.

In case of an emergency oil spill, the Port shall collect oil products free of charge if a collection period does not exceed 6 hours of use of all port means on duty. If a period of oil spill liquidation (collection of oil products, washing of quaywalls and sides of the vessels lying nearby, washing of booms, etc.) exceeds 6 hours, the vessel shall reimburse the Port the expenses in connection with the said works.

5.54. The "Port Regulations for Tankers Arriving at Odessa Port Regarding Provision of Safety and Sea Pollution Protection" shall be effective in the port as of 1st February 1993.

5.55. Shipowners and Managers of the enterprises that violated Compulsory Port Regulations regarding Protection of Environment shall reimburse all port expenses for liquidation of pollution and its consequences at established rates, as well as port expenses in connecton with leasing of equipment, floating craft and staff of the other enterprises.

5.56. Pollution of the atmosphere by emission of dense smoke and noxious gases shall be prohibited.

5.57. Dumping of garbage or snow from berths and vessels on ice or in water shall be prohibited.

Signed: Manager of Odessa, Commercial Sea Port.

AGENT: Odessa Inflot Shipping Agency, Postal address: 1 Vakulenchica Pl., Morskoy Port, Odessa, 270004 Ukraine. Cables: "Inflot Odessa". Tel: 22-39-02, 29-37-81, 29-49-03. Telex: 232124 Inf Su.

RENI: 45.26 N. 28.18 E. (See Plan)

GENERAL: The Port of Reni is situated 164 km. from the coast of the Black Sea, and is 25 miles up from the Izmail Chatal Point on the left bank of the Danube River.

The port is open for navigation all year round. In severe winters ice-breaker assistance is required.

The port is connected with the sea via the Sulina Channel.

Changes of the water level are due to effects of the wind and Spring floods.

Maximum rises of the water level are usually observed in April, May and June, maximum falls August, September and October.

Maximum range of the water level observed in the river is 4 m. – 6 m.

DOCUMENTS:

Immigration:

Crew List.

Passenger List.

Customs:

Complete copy of each Manifest for goods onboard.

List of personal belongings of crew members.

Quarantine:

Valid Derat Certificate.

Safety:

Valid Load Lines Certificate.

Valid Safety Equipment Certificate.

Others:

Free Trade Certificate.

PILOTAGE: Compulsory. All ships navigating from the Port of Izmail through the Ismail Chatal to the Port of Reni and vice-versa, should be assisted by a duly authorised State Pilot.

The port is provided with a Vessel Traffic Management Service (Ship's Traffic Control Station), equipped with modern radar installation (Decca-2), television and computer systems enabling reliable navigation and safe pilotage under any conditions of restricted visibility. The above facilities also reduce ships' stoppages (delays) and provide Masters of vessels with necessary relevant information on the conditions of navigation.

Arrival Advice: Masters of the vessels are required to send a 24-hour notice informing the Port Authorities of the expected time of arrival, general description and quantity of cargo onboard, numbers of passengers, ship's length and draft, and request for services to be rendered.

ANCHORAGES: Ships can obtain anchorage and arrange port formalities at the upper (Mile 69 – km. 128) and lower (Mile 64 – km. 119) Roads. Depths in the above roads are sufficient for all types of ships.

RESTRICTIONS: There are no time restrictions for the entry to the port. Both draft and length of vessels are limited by depth and width of the Sulina channel.

RADIO/VHF: The Central Port Radio Station provides vessels anchored at the Roads with connections to the port services, and intercity.

The following VHF radio stations serve the roads and function 24 hours a day:

Station	*VHF Channel*	*Call Sign*
Central Port Radio Station	16	Reni-Radio 1
Central Port Radio Station	26	Reni-Radio 1
Central Port Radio Station	2	Reni-Radio 1
Port Controller	12	Reni-Radio 2
Port Control Inspectorate	12	Reni-Radio 5
Inflot Shipping Agency	9	Reni-Radio 8
Transflot Ships' Service	9	Reni-Radio 7
Reserve Crew	9	Reni-Radio 14
Port's Auxiliary Vessel Controller	12	Reni-Radio 6
Bunkering Service	12	Reni-Radio 15
Vessels' Movement Control Post	73	Reni-Radio 17

Non-business calls over the VHF radio are prohibited. Telephone/shore connections are available at the berth for connection to ships.

Operation Frequencies, Call Signs & Schedule:

Transmission frequency	*Reception frequency*	*Operation time (Moscow)*	*Call sign*
3225 kHz	4210 kHz	0800–0900	UJN-3
4260 kHz	4210 kHz	0900–1100	UJN-3
6421.5 kHz	6275.5 kHz	1100–2000	UJN-3
3225 kHz	4210 kHz	2000–2400	UJN-3
156.800 (Channel 16)	156.800 MHz (VHF Channel 16)	Round the clock	Reni-Radio-1
161.900 (Channel 26)	157.300 MHz (VHF Channel 26)	Round the clock	Reni-Radio-1
156,100 (Channel 2)	160.700 MHz (VHF Channel 2)	Round the clock	Reni-Radio-1

RADAR: See "Pilotage".

TUGS: 34 tugs, up to 2,000 h.p. Tug assistance is not compulsory. Tugs are available if requested by Master. Tugs shall be ordered by VHF at least 1 hour before required.

Service boats are available for transportation of crew and personnel to and from the anchorage.

BERTHING: The port is accessible to large vessels. The berths with depths alongside of up to 7.5 m. are equipped to handle general and bulk cargoes, crude oil and oil products, grain and food products.

The port comprises four cargo areas.

The first area has 10 berths including 2 facilities, which can accommodate large sea-going vessels under any Danube water stage. Export and import cargoes of various trades are handled there. One of the berths specialises in transhipment of imported grain and has the capability of operating in any weather.

The second area also comprises 15 berths to handle small and medium diameter pipes and tubes, steel exports and imports, equipment, containers, export timber and transit cargoes.

The third area has a quay of 200 m. for handling vehicles, and the fourth area is specially for bulk cargoes.

Four berths, storage facilities, railway sidings, communicatio service space and other facilities were put to use. Quayage gained mo than 500 m. The new capacity made it possible to handle 800,000 to of cargo additionally.

Berths No. 1, 2 and 28 handle steel; Nos. 3 and 4 packages a pieces; Nos. 5 and 26 equipment; No. 6 heavy lifts; Nos. 7 and 8 cann goods and vegetables; Nos. 9 and 9a grain; Nos. 15, 16, 27 and 2 general cargo; Nos. 17 and 18 exports and imports; No. 31 vehicle No. 34 coal and Nos. 35, 36 and 37 laminate and ores.

Cranes of up to 32 tons capacity are operated on the quays. Al there are floating cranes with lifting capacity of up to 100 tons, fork trucks up to 10 tons capacity and other cargo handling equipment.

FRESH WATER: Can be supplied ex-shore and by barges at 12 hou notice.

FUEL: Available at 12 hours notice.

CONSULS: None.

REPAIRS: Hull, deck and pipeline repairs possible. One repair qu with length 165 m.

SURVEYORS:

1. Cargo Inspector of the Chamber of Commerce and Indus available.
2. Register of Shipping Surveyor available.

OPENING/CLOSING HATCHES: According to the custom of the po opening and closing of hatches is carried out by the crew. But it can b carried out by the port workers for vessel's account, if required by th Master.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

POLICE/AMBULANCE/FIRE: A Fire Guard of the port provides for th safety of ships and can be summoned, via the "Inflot" Agency, to rend services in order to extinguish fire or to pump water from holds.

If a fire occurs in the port territory or on board it shall be reported t the Fire Squad by telephoning 2-01, or to the fire boat "Smeliy" dialli 2-02. The fire boat can also be summoned over VHF Channel 16.

STORING: See "Prelims".

1. Vessel can be stored by barge and truck.
2. Vessel can store from barges after loading/discharging or duri operations if nothing interferes with cargo handling.
3. Trucks can proceed alongside at the berth.
4. Fork lift trucks can be used on the jetty to handle stores.
5. Vessel can be stored with various stores except prohibited item
6. Local riggers can be employed to assist with storing.

NOTICES: Masters of vessels proceeding to the Port of Reni shall advance but latest 24 hours prior to arrival at the port, advise Port Contr and "Inflot" Agency: time of arrival, description and quantity of cargo t the port, heavy lifts, if any, their stowage and weight, number passengers, ship's draft and length, as well as services required of th port.

Abstracts from Compulsory Rules of the Commercial Sea Port of Ren

Article 1: Two hours prior to arrival at the Commercial Sea Port of Ren Master shall advise accurate time of arrival to Port Control Inspectio

Article 2: Ships may call at or leave the port, round the clock, aft obtaining permission of the Port Control.

Article 3: Upon anchoring in the inner or outer roads, a radio watch sha be kept on VHF Channel 12.

Article 4: Berthed ships are provided with electric power, telephone an fresh water.

Article 5: Prior to commencement of loading, ship's cargo spaces sha be completely cleaned and provided with all the necessary equipme

Article 6: Ships may discharge oil-contaminated water, garbage and foo waste at the port. Master shall take every step to prevent a spill of products.

Article 7: Orders for any port services are placed by Masters of forei vessels through the "Inflot" Agency.

DEVELOPMENTS: A Ro-Ro Terminal will be in operation in the ne future.

SHIPMASTER'S REPORT: January 1994.

1. The Port of Reni is on the River Danube on the delta and can b found on B.A. Chart No. 2835.
2. The max. arrival draft for Sulina Pilot Station and for crossing th bar is 6.5 m. in fresh water, but also depends on the season (ra ice, spring tide, etc.). The Pilot can be contacted on VH Channels 16/12.
3. Vessels take Romanian Pilots from the outer anchorage to insi the breakwater up to a distance of 2 – 3 miles before Sulina. Th vessel anchored for Free Pratique and was assisted by a Romani Pilot.

   The following documentation was required:

   6 copies Crew List.
   1 copy Stores List.
   1 copy Crew Declaration.
   1 copy Cargo Manifest.
   1 copy Narcotics List.
   Ship's Register.
   Classification Certificate.
   Derat Certificate.
   IOPP Certificate.

   The Suez Canal and Panama Canal Certificates were requ for calculation of the tax for the River Danube.
4. Night-time navigation is forbidden when visibility is reduced (fog snow). We anchored immediately when we encountered redu visibility.
5. The official language of the Danube River is Russian.
6. Each nautical mile on the river is indicated by a signpost on t starboard bank when proceeding inward.

7. After obtaining Free Pratique at Sulina Anchorage (1200 hrs.), we anchored at Mile Post 26 (See "Plan") to await passage the next day. The current runs outward at 2 – 3 knots, so vessel heads up-river at all times whilst at anchor. The holding ground is good and we anchored with 3 shackles on the port anchor and 2 shackles on the starboard anchor.
8. At Mile Post 35 (See "Plan"), a vessel has capsized 90° to the river bank, so the passage is very narrow at this point.
9. When passing Tulcea, the current is very strong and tankers are assisted by a tug.
10. On arrival at Mile Post 68, the vessel again anchored and Pratique formalities were undertaken by Ukrainian authorities. They required the following documents:

    7 copies Crew List.
    1 copy Stores List.
    1 copy Crew Declaration.
    1 copy Narcotics List.
    Ship's documents, etc.

    At this point, the Romanian Pilot disembarks and the Ukrainian Pilot boards and takes the vessel to Reni.
11. On arrival at Reni, we berthed starboard side alongside, head up-river, for loading of chemicals. No mooring boats were available, so lines were sent ashore fore and aft via the tug, using strong messengers.
12. At Reni, we normally discharge into barges of 1,000 tonnes – 1,500 tonnes each. They come alongside our port side and take the cargoes to Czech Rep., Yugoslavia, Austria and Germany.

    On this voyage, we discharged 4,000 tonnes of gasoline and 1,000 tonnes of gas oil in 5 days.
13. On sailing, we turned near Mile Post 70 (just above the berth) (See "Plan") with the assistance of 1 river tug (2,500 h.p.). At other times, when the current has been very strong (4 knots – 5 knots), we have turned near Mile Post 84 (Passet Galleti).
14. After sailing at 1100 hrs. local time from Reni, we again anchored near Ceatal (Mile Post 44) (See "Plan"), as there was not sufficient time to reach Sulina in daylight.

    At Ceatal Anchorage, the Ukrainian Pilot disembarked and the Romanian Pilot embarked to take the vessel as far as Sulina Pilot Station.

    At this anchorage, we anchored towards the port side (heading up-river) with 3 shackles on the port anchor and 4 shackles on the starboard anchor.
15. The maximum draft up to Reni is 23 ft.
16. Reni:

    There are no shore leave restrictions.
    Fresh water is available.
    A few vegetables are available.
    Doctor available.
    Derat Certificate can be renewed.
    Sewerage treatment compulsory.

WARNING: The crew should take great care when proceeding ashore as some personnel have arrived back onboard with very little clothing and only their Seaman's Book or Discharge Book (shoes and all clothing were stolen).

AUTHORITY: The Port of Reni Authority, 188 Dunayskaya Street, 272840 Reni, Odessa Region, Ukraine. *Tel:* 2-14-84, 2-10-57. *Telex:* 732414. *Cables:* Reni Port.

AGENT: The Port of Reni Maritime Agency "Inflot". Postal address: 192 Dunayskaya Street, 272840 Reni, Odessa Region, Ukraine. Cables: "Inflot Reni". Tel: 21895, 26593. Telex: 232713.

SEVASTOPOL: 44.37 N. 33.32 E. (See Plan)

The port of Sevastopol is situated on the South-Western coast of the Crimea Peninsula. The port occupies Sevastopol, Yuzhnay, Qurantine, Streletskaya, Kruglay, Kamishovaya and Kazachia Bays, where there is located commercial and fishing ports and a Navy Base. All bays (excluding Sevastopol Bay) are opened to Northern winds. Navigation in the port is all year round.

PILOTAGE: Compulsory. The pilot usually boards vessels in the outer roads 2 miles before the entrance (Lat. 44° 37′ 05″ N., Long. 33° 27′ 08″ E.). During bad weather, the place of embarkation and disembarkation of the pilot may be changed, subject to Master's approval.

APPROACHES: The 0.6 miles long approach channel leads from Sea Buoy No. 2 (Lat. 44° 36′ 05″ N., Long. 33° 35′ E.) to the Cargo Quay.

ANCHORAGE: Anchorage is in the outer roads from 1.0 miles to 4.0 miles off the coast between parallels of 44° 36′ N. and 44° 40′ N. Permitted anchorages are marked on the chart as No. 384 (depths 13.0 m. – 33.0 m.), No. 386 (depths 70 m. – 82 m.) and No. 389 (depths 50.0 m. – 64.0 m.).

RESTRICTIONS: Entry into the port is allowed on a 24 hour basis. During night-time, approach to the port by vessels with length of more than 120 m. may be effected with Harbour Master's permission. Vessels should proceed through the channel at a speed not exceeding 5 knots, and within the inner roads at a speed not exceeding 9 knots.

MAX. SIZE: Max. draft 9.1 m. and length 200 m. for Passenger Quay, max. draft 8.6 m. and length 185 m. for Cargo Quay, and max. draft 9.1 m. and length 185 m. for tanker berth. Larger vessels shall obtain the Harbour Master's permission for berthing.

For Kamishovaya Bay, draft of no more than 8.5 m. permitted.

Tide: Range of water level due to Spring River flow may be up to 0.9 m.

HEALTH: Health Declaration required to obtain Pratique. When arriving from another Black Sea, Pratique is available. In the event of any disease on board, contact Agent.

RADIO/VHF: VHF communication on Channel 16 for Pilots. All messages via Agent (cable address "Inflot Sevastopol", Telex 197316 Inf Su) through port radio UXO.

Radio contact through port radio station "Sevastopol Radio", operating on following frequencies:

Call Sign	*Frequency* *Working* (kHz)	*Frequency* *Calling* (kHz)	*Type of Transmission*	*Time of Operation*
"Sevastopol Radio-3" Port Control	2,264	2,525	J3E	H24
"Sevastopol Radio-4" Port Control	2,464	2,464	J3E	H24
Port Radio "UXO"	500	500	AIA	H24
	422	468	AIA	H24
	4,325	4,182.3	AIA	H24
	6,483	6,277.3	AIA	H24
	8,685	8,366.3	AIA	H24
	12,845	12,550.3	AIA	H24

RADAR: Shore based radar not available.

TUGS: 1×900 h.p., 1×1,600 h.p., 1×1,200 h.p. and 1×2,540 h.p. Tugs normally join vessels at the entrance. Ship's lines used. Tugs are compulsory for vessels over 500 g.r.t. In case of anchorage within inner roads, for any reasons, a tug should be ordered by Master to ensure safe manoeuvring. Expenses on ship's account.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)
Fishing Port		
No. 10	200	8.6
No. 11 (Cargo)	162	8.6
No. 5	150	8.0
No. 19 (Tankers)	185	9.1
Sea Port		
No. 2	150	4.0
Cargo Quay	112	8.0
Quay No. 11a	290	6.0
Passenger Quay No. 1	200	9.1

CRANES: Cargo Quay equipped with electric cranes up to 5 tons for handling of general, bulk and other cargoes. Open storage available.

STEVEDORES: 12 days notice required. Working hours: 0800-1700.

MEDICAL: Medical assistance rendered immediately when required. Hospital facilities available.

FRESH WATER: Available by pipelines at quays. Cost U.S.$ 5.00 per ton (1994).

FUEL: Bunkers available from private companies by prior arrangement with Agent.

REPAIRS: All types of repairs for vessels up to 40,000 d.w.t. possible.

DRY DOCKS: Dry docks for vessels up to 280 m. LOA.

SURVEYORS: Marine Surveyors representing Lloyd's, Maritime Register of Shipping. Fax: 0692-44-48-19. Tel: 0692-52-09-40.

GANGWAY/DECK WATCHMEN: Carried out by crew.

OPENING/CLOSING HATCHES: Carried out by crew.

CUSTOMS ALLOWANCES: No restrictions.

CARGO GEAR: Load/discharge usually effected by shore cranes.

AIRPORT: Nearest airport is located in Simpheropol, 55 miles.

TIME: GMT plus 2 hours. GMT plus 3 hours in Summer time.

HOLIDAYS: January 1st; January 7th; March 8th; May 1st; May 2nd; May 9th; August 24th; November 7th and 8th.

POLICE/AMBULANCE/FIRE: Ordered through Agent.

SERVICES: Chandler, laundry and car hire, arranged by Agent.

SHORE LEAVE: Permitted.

IDENTIFICATION CARDS: Required.

AUTHORITY: Port of Sevastopol Authority, 5 Nahimova Sq., 335054 Sevastopol, Crimea, Ukraine. *Tel:* 522979, 522079, 525812. *Telex:* 197316 Inf Su. *Cables:* Morport Sevastopol.

AGENT: General Agent: Inflot Odessa. Telex: 232124 Inf Su.

Local Agent: Sevastopol Inflot Shipping Agency, 5 Nahimova Sq., 335054 Sevastopol, Crimea, Ukraine. Tel: 524411, 525571. Telex: 197316 Inf Su. Cables: Inflot Sevastopol. *FAX:* (0690) 52-44-11.

THEODOSIA: 45.01 N. 35.24 E. (See Plan)

GENERAL: The port of Theodosia is situated on the Southern coast of Theodosiyskaya Bay (South Eastern part of the Crimean Peninsula).

PILOTAGE: Compulsory for foreign vessels irrespective of type and tonnage. The embarkation and disembarkation point for the Pilot is near the Reception Buoy (Lat. 45° 04.95′ N., Long. 35° 30.75′ E.).

The Pilot requires 4 hours notice of arrival.

APPROACHES: A few submerged obstacles are situated in the harbour and near the entrance with depths from 6.4 m. to 13.0 m. over them.

ANCHORAGE: Anchorage with good holding ground is available in Theodosiyskaya Bay.

RESTRICTIONS: Entry to the port is allowed throughout 24 hours, but during restricted visibility only with Harbour Master's permission. Vessels entering the port should proceed at a speed not exceeding 8.0 knots.

MAX. SIZE: Maximum permitted draft for dry cargo vessels is up to 6.5 m. and max. LOA 150 m. Maximum draft for tanker is up to 12.3 m.

RADIO/VHF: The Port Authority requires 72 hours and 12 hours notice of arrival. VHF communication is through Channel 16. Communication with Harbour Master is through Channel 10.

RADAR: Shore based radar station not available.

TUGS: Number and capacity of the tugs is to be decided by ship's Master and Pilot. Tugs compulsory for vessels over 500 g.r.t. 1×1,600 h.p. and 1×250 h.p. tugs available.
BERTHING: Three wharves with available depths of 5.3 m. – 6.5 m. Berths are equipped with electric cranes up to 20 tons lifting capacity for handling general and bulk cargo, steel products and timber. Two offshore berths with mooring buoys are available for loading/discharging tankers up to 35,000 d.w.t. The Northern berth has depth of about 12.3 m. and the Southern berth has depth up to 11.3 m. Warehouses and open storage facilities are available.
MEDICAL: Medical assistance rendered immediately when required. Hospital facilities available.
TANKERS: See "Berthing".
FRESH WATER: Available from barges. In Summer time, vessels may be supplied through pipeline at the wharf.
FUEL: Bunkering generally possible by barge or truck.
REPAIRS: No facilities.
GANGWAY/DECK WATCHMEN: Carried out by crew.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCES: No restrictions.
CARGO GEAR: Load/discharge usually effected by shore cranes.
AIRPORT: Nearest airport is located in Simpheropol, 100 km.
TIME: GMT plus 2 hours in Winter. GMT plus 3 hours in Summer.
HOLIDAYS: January 1st; January 7th; March 8th; May 1st; May 2nd; May 9th; August 24th; November 7th; November 8th; Easter (one day); St.Trinity (one day).
POLICE/AMBULANCE/FIRE: Ordered through Agent.
SERVICES: Chandler, laundry, car hire, bunkering.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Required.

SHIPMASTER'S REPORT: April 1993.

The port of Theodosia is situated on the N.E. coast of Crimea Peninsula, in the N.W. part of Kaffa Bay.

The port, formerly in a prohibited area, is now open for trade.
Vessel: Tanker of 30,000 d.w.t.
Chart: B.A. Chart No. 2233.
Port Limits: The port waters are bound by a line bearing 026° from Ily Lighthouse to the shore.
Documents:
5 copies General Declaration (IMO form).
2 copies Cargo Declaration (IMO form).
1 copy Health Declaration.
7 copies Crew List.
1 copy Passenger List.
1 copy Stores List.
1 copy Crew's Effects and Currency Declaration.

All crew's passports are taken ashore by Immigration Officer for formalities and returned next day.

Tonnage and Safety Certificates are taken ashore by Agent and returned before sailing, together with Sailing Clearance.
Pilotage: Compulsory for berthing and unberthing. Call Port Control for instructions.
Anchorages: There are 4 areas for tankers, about 2.5 miles N.N.E. from Ily Lighthouse in a depth of 18.0 m. – 20.0 m., good holding. Contact Port Control on arrival for anchorage position.
Restrictions: Mooring and unmooring at sea berths only during daytime. Max. wind: 6 m./sec. for mooring and 12 m./sec. for staying at sea berths.
Health: Free Pratique granted on arrival at the anchorage, before mooring. Derat Exemption Certificate issued on request (Cost U.S.$ 90.00).
Radio: Cables to be send preferably through Odessa Radio "UDE/UFB".
VHF:
Port Control: Channel 10 for instructions, information and pilot.
Oil Terminal: Channel 12 for cargo information.
Pilot, Tugs, Service Boats: Channel 6 during manoeuvring only.
Tugs: 1×1,600 h.p. and 1×225 h.p., ship's lines used.
Tankers: Two sea berths, in the Northern part of the bay.
North Sea Berth for 35,000 d.w.t. tankers with max. draft 12.50 m.
South Sea Berth for 23,000 d.w.t. tankers with max. draft 11.30 m.

Tankers are moored on heading 120°, using both anchors forward with about 8 shackles in the water, and 2 mooring buoys aft with 2 ship's ropes to each buoy. The buoys are equipped with 60 mm. wires, with very large thimbles at the end, where the ropes are doubled through.

Two 10 in. hoses are used, one on the starboard side for ballast and the other on the port side for cargo. The ballast, clean or dirty, must be pumped ashore, rate about 700 cu.m./hr., cost U.S.$ 2.00/cu.m. The exact quantity will be gauged ashore and Ballast Declarations issued. Loading rate 900 cu.m./hr. for gas oil. Unpredictable stoppages may be experienced.
Density: About 1010 (April).
Fresh Water: Small quantities available by barge, but expensive.
Surveyors: Cargo inspectors available from Odessa.
Customs: No restrictions, but nothing allowed to be taken ashore. Bonded stores are not sealed.
Repatriation: No facilities available.
Time: Winter: GMT plus 2 hours. Summer: GMT plus 3 hours.
Shore Leave: Granted for 24 hours only. Permission granted by Immigration Officer on arrival.
Garbage: Irregular collection service available by barge.
General: Communications very difficult due to few English speaking people being available.

Imperative that gangway is lowered down for Boarding Authorities, Pilot and Inspectors.

Fire boat service compulsory during loading operations only, cost U.S.$ 20.00 per hour.

Unlit Buoys (not charted): One buoy 2.5 miles S.E. and the other 5 miles East of Ily Lighthouse.

SHIPMASTER'S REPORT: March 1994.

The Port of Theodosia, popularly known as Fredosia, is situated the Northern part of the Black Sea in Lat. 45° 01′ N., Long. 35° 25 This port has been opened to merchant vessels for 2 years.

Normally Pilot boards at anchorage or pilot boarding area by tug

Mooring/unmooring is carried out in daylight only, but with spe request, arrangements can be made during darkness.

Quality of pilotage was not found very good. Most of the P understand English, but they can not express themselves. They a lack co-ordination between tug and Mooring Master.

Only 2 tugs are available, but with special request, one military can be arranged.

After berthing, Immigration, Customs and Port Health come on bo with Agent for inward clearance. Same people also come on departu

One large room with capacity for 8 to 10 persons to be arranged. O one recognised Agent, Inflot, works in port area. They handle all ta with efficiency.

Following documents are required:
4 copies Crew List.
All Passport or CDC.
Vaccination List.
Narcotics Drug List.
Personal Effect List.
Stores List.
Bonded Stores List (Bond is sealed after inspection).
Currency Declaration List.

One guard is posted at gangway at all times.

Shore leave granted after Immigration Clearance, but have to ret back to vessel at least once in 24 hours.

All shore cranes are operational. They are not mobile, hence ship h to shift as required. No floating cranes available.

No repair facilities available.

Fresh water is available.

No recognised ship's chandler in dock, so provision can not arranged. Small quantity of provision can be arranged through Ag with sufficient notice.

No bunkers available.

Mainly hot rolled steel cargo is exported.

Mooring buoy was observed for small product tanker.

AUTHORITY: Port of Theodosia Authority, 14 Gorkogo Street, 3348 Theodosia, Crimea, Ukraine. *Tel:* (0652) 31268, 393307. *Telex:* 2221 Pilot Su. *Contact:* Harbour Master.

Local Agent: Theodosia Inflot Maritime Agency, 14 Gorkogo Stre 334800 Theodosia, Crimea, Ukraine. Tel: (0652) 31258. Telex: 2221 Pilot Su. Cables: Inflot Theodosia.

UST DUNAYSK (Ust-Dunaisk): 45.28 N. 29.42 E.

(See Pla

LOCATION: The commercial sea port of Ust-Dunaisk is situated on t left bank of the Kilia Inlet of the Danube in the Northern part of its de at the artificial basin and is approached by a buoyed channel 100 wide and 3.5 miles long.

A vessel is considered to be an "Arrived Ship" after she is piloted a Port Pilot to Anchorage 'C' (No. 397) being a circle within a radius 3 cables from a point with co-ordinates Lat. 45° 31.8′ N., Lo 29° 44.4′ E.
PILOTAGE: Compulsory. Pilotage inward is carried out during dayti only. Pilotage outward is around-the-clock (after mutual agreem between Master's and Port Control).

Pilot waiting area (Pilot's boarding pontoon) for large sea-go vessels is within a radius of 2.5 miles from a point with co-ordina Lat. 45° 28′ N, Long. 30° 01′ E. (Anchorage No. 367 or A).

Pilot boat has orange hull and white superstructure and the w "Pilot" in black on the hull. The boat is used to deliver Pilots on boa Tugs of the port can be also used for delivering Pilot.

24 hours prior to arrival Master orders a Pilot via Harbour Mas (indicating g.r.t./n.r.t., LOA and arrival draft).

4 hours prior to arrival at Anchorage No. 367 (A) Master has to "Port Control" on VHF Channel 11 and correct time of arrival. At s time Master receives information about pilotage, formalities, bert prospects, etc.
ANCHORAGE: There are 3 anchorages with good holding groun soft mud and sand. They are:

No. 367 (A) - Circle within a radius of 2.5 miles from the point w co-ordinates Lat. 45° 28′ N., Long. 30° 01′ E.

No. 368 (B) - A square with co-ordinates:

Lat. 45° 30′ N.	Long. 29° 53.2′ E.
Lat. 45° 33.1′ N.	Long. 29° 53.6′ E.
Lat. 45° 33.1′ N.	Long. 29° 56.8′ E.
Lat. 45° 30′ N.	Long. 29° 56.8′ E.

No. 397 (C) - Within a radius of 3 cables from the point with ordinates: Lat. 45° 31.8′ N., Long. 29° 44.4′ E.

In good weather the Anchorage No. 397 (C) is used for effec formalities and also for lighting of the vessels.
RESTRICTIONS/MAX. SIZE: Entry to the port is allowed day and ni Max. LOA 220 m. Max. arrival draft 11.5 m. in fresh water. If vess arrival draft is greater than that permissible, the lightening of vess effected at Anchorage 'C' up to the draft of 11.5 m. Lightening is effec prior to entering the port.

RADIO: Notice of Arrival can be sent via "Odessa-Radio" call sign UDE, calling frequencies 500/454 kHz working - 447 kHz. Address "Inflot Izmail" for "Inflot Ust-Dunaisk".

VHF communication can be effected via port radio station some details of which are given in the table below:

Call Sign	Frequencies (MHz) Working	Calling	Type of transmission	Time of work
Ust-Dunaisk Dispatcher	156.55 (11)	156.55 (11)	F3E	H24
Ust-Dunaisk Port-Control	156.55 (11)	156.55 (11)	F3E	H24
"Inflot" Ust-Dunaisk	156.55 (11)	156.55 (11)	F3E	H24

TUGS: Mooring and unmooring of the vessels at the port of Ust-Dunaisk is effected with tugs of total capacity not less than 5,000 h.p. (Pilot's option). Ship's lines to be used for all operations with tugs.

BERTHING: All cargo handling operations are effected on 3 berths:

(a) South Berth, where vessel lies at 2 anchors (about 8 shackles) and 3 ropes from each quarter to mooring buoys about 80 m. away;

(b) West Berth, where the vessel lies to 2 anchors (about 9 shackles) and 3 ropes from each quarter to floating buoys 80 m. from the vessel.

(c) Lighter Carrier Berth (see "Plan") can be used for mooring of bulk carriers if lighter carrier is absent.

At the port of Ust-Dunaisk the transhipment of bulk cargoes is effected direct from ship-to-ship" from large sea-going vessels into Danube barges. Cargo handling operations of LASH-carriers is also undertaken.

For discharging/loading of bulk cargoes there are 2 floating cranes with capacity of 16 tons and max. height of 15 m. above water level and 2 well fendered floating transhippers with integral hopper/belt system and max. height of 21.5 m. above water level (cargo capacity 50 tons).

MEDICAL: Treatment effected at Izmail. In an emergency Agent can arrange medical treatment at Vilkovo.

DENSITY: Changeable, depends on wind direction. Average – 1005.

REPAIRS: No facilities.

FRESH WATER/FUEL: In first ETA Master has to order quantity of bunkers and water required. Bunkering possible during formalities or late. Bunkers and water are delivered from Izmail.

CONSULS: None.

DRY DOCKS: None.

SURVEYORS: Available.

OPENING/CLOSING HATCHES: Effected by ship's crew.

REPATRIATION: Possible, but taking into account that nearest Diplomatic Agency is too far away it takes at least one week to finish with all formalities and to effect it.

TIME: GMT plus 3 hours in Winter, GMT plus 4 hours in Summer.

SERVICES: Supply services from Izmail in small quantities.

Additional Services: Discharge of dirty ballast and sanitary water, bunkering, supplying of fresh water, draft survey, unsealing survey, Register of C.I.S., Declaration of Sea Protests, all possible.

SHORE LEAVE: Permitted to town of Vilkovo, 18 km from port. Agent can arrange organised trips for crew members to the town of Izmail.

IDENTIFICATION CARDS: Seaman's Book.

GENERAL: *Chart:* Soviet Chart No. 971.

SHIPMASTER'S REPORT: May 1983 (Updated 1988).

General: Situated on the Northern arm of the Danube Delta, the port consists of a basin in the marshes, and is approached by a buoyed channel 100 m. wide, approx. 3.5 miles long, dredged to a depth of 13 m. There are berths for 3 vessels lying to two anchors and with three lines to each quarter mooring buoy. There is a strong outflow from the river, and the port is open to all winds. LASH ships appear to have preference at one berth. All business, including protests, is transacted at Izmail, some 40 miles inland, and the Inflot Agent and Port Officials are based there.

Documents: 4 Crew Lists and separate Money List (attached to Crew Declaration) required.

Pilotage: Compulsory, but not for departure from Inner Roads. Pilot launch with orange hull and white superstructure with the word PILOT in black on the hull. This launch is used for all transport operations in the port.

Anchorage: There are 3 anchorages marked on B.A. Chart 2213. Vessel instructed to anchor in "A", and Pilot boarded there. Vessels lightening are anchored in the Inner Roads close by the outer fairway buoys. Good holding ground in mud and sand at all anchorages.

Restrictions: Least depth in channel 11.5 m.

Radio/VHF: Pre-arrival notices to Inflot Izmail. Agent boards with Officials and Grain Inspectors either at Inner Roads Anchorage or at berths.

Pilot Channel 11; Inflot Agent Channel 11 – call "Inflot". Use of main transmitter prohibited at Inner Roads and in the port.

Tugs: One conventional and 2 pusher tugs with adequate power assist with berthing. There is a mooring boat for running buoy lines.

Bulk Cargo Facilities: There are 2 floating cranes, well fendered and with integral hopper/belt system for loading coasters. They also carry a wheeled digger/dumper, use of which is not allowed at the anchorage. Each crane capable of about 600 t.p.h.; average about 400 t.p.h. Coasters have a capacity of 3,000 tons; lighters 1,000 tons. Lightening at anchorage carried out by 1 crane towed out by tug; operation liable to interruption with wind force 4 – 5 when crane returns to port.

Medical: In emergency Agent can arrange medical treatment at Izmail.

Density: 1013.

Surveyors/Grain Inspection: Inspectors required *all* main hatches opened and two crew to assist with sampling, even for lightening two holds.

Hatches: Opened/closed by crew.

Customs Allowances: No restrictions. Bond not sealed.

Services: None.

Shore Leave: Permitted.

Agent: Inflot Agent usually spends Monday to Friday on "Uritsky", or if traffic expected.

AUTHORITY: Management of the Port of Ust-Dunaisk., 2 Pridunayskaya Street, Vilkovo, Ukraine. *Telex:* 232103 UST D SU.

AGENT: "Inflot" Ust-Dunaisk, 2, Pridunayskaya str., Vilkovo, Ukraine. Telex: See "Authority". Cables: "Inflot Ust-Dunaisk, Vilkovo, Ukraine."

YALTA: 44.30 N. 34.12 E. (See Plan)

GENERAL: An ice-free Black Sea passenger and commercial port, Yalta is situated at the head of Yalta Bay and on the Southern coast of the Crimea Peninsula.

The port is open for navigation all the year round.

The port is formed by a harbour protected by a mole. Depths in the harbour are up to 10 m.

Yalta is a passenger port.

PILOTAGE: Pilot meets vessel in the Outer Roads, at a distance of 2 miles S.E. of Yalta Lighthouse.

Pilotage is available 24 hours. Vessels must send ETA at pilot boarding place, when crossing the parallel of Mys Aytodor or the meridian of Mys Nikitin.

A continuous listening watch should be kept on VHF Channel 16 or 2464 kHz whilst within the area.

ANCHORAGES: The port Outer Roads are situated in Yalta Bay:

E.S.E. 7 cables off the head of the mole with depth of about 30 m.

They are open to winds blowing between E.N.E. and S.W. At times vessels may be turned broadside to waves caused by Southerly winds.

The bottom is mud and sand.

RESTRICTIONS: Vessels may enter or leave the port at any time of day or night. Vessels entering or leaving the port must have keel clearance of not less than 0.6 m.

MAX. SIZE: Permissible draft is 8.5 m., length 215 m.

RADIO/VHF: Ship-shore radio contact can be established through the port radio station Yalta Radio operating 24 hours a day on the following frequencies:

Station	*VHF Channel*
Port Controller	16, 26
Port Director	14
Dispatcher	6
Tugs	14

TUGS: Tug assistance for mooring and unmooring is compulsory.

BERTHING: Handling of cargo at the passenger terminal is usually done by ship's cargo gear.

FUEL: Not available.

FRESH WATER: Can be supplied by pipelines at all berths.

REPAIRS: Not available.

TIME: GMT plus 3 hours. GMT plus 4 hours in Summer.

AUTHORITY: The Port of Yalta Authority, 5 President F.D. Roosevelt Street, Yalta 334200, Crimea, Ukraine. *Tel:* (0654) 324242, 326909. *Telex:* 187128 Yasco Su. *Cables:* Port Yalta. *FAX:* (0654) 323926. *Contact:* E.V. Likhachov, General Manager.

AGENT: Yalta Marine Agency – Yalmara, at the Port of Yalta, 5 President F.D.Roosevelt Street, 334200 Yalta, Ukraine. Tel: 328289. Telex: 187125. Cables: Port Yalmara. Fax: 323926.

YUZHNY (Grigorevsky): 46.39 N. 30.55 E. (See Plan)

PORT LIMITS: The water area of the port is the waters of Adzhalykskiy Liman and the sea area bounded by the arc of a circle with a radius of 2 miles from the coast radar station (46° 36.04′ N., 31° 01.4′ E.) and Anchorages No. 356, 357 and 358 on the Charts.

PILOTAGE: In order to reach the Port of Yuzhny vessel first has to proceed to position Lat. 46° 08′ N., Long. 31° 06′ E. (near port Ilyichevsk), one hour before arrival at abovementioned position Master should communicate with "Port Control Ilyichevsk, on Channel 16 or on R/T 2535 kHz and then follow the instructions of "Port Control" as further navigation is controlled by shore radar.

Gas-carriers and chemical-carriers shall follow a pilot boat when proceeding to and from the port. Master shall order a Pilot through the Port of Ilichevsk 72 hours and 24 hours before and confirm the order 12 hours prior to approaching the Port of Yuzhny.

The port is equipped by an automated Vessels' Movement Control System (VMCS).

ANCHORAGES: It is prohibited for ships to anchor in the inner roadstead.

Anchorages: No. 356 for gas carrying ships and is 3.4 miles S.S.W. and No. 357 and 358 are for other vessels, 1.7 miles South of the West entrance point of Adzhalykskiy Liman. The depth in Anchorage No. 356 is 14 m. to 21 m., Anchorage No. 357, 15 m. to 22 m. and No. 358, 16 m. to 18 m. The seabed is sand, mud and shells.

The limits of the anchorages are shown on the charts.

RESTRICTIONS: The following vessels are allowed to enter port when conditions are as stated:

Gas and chemical carriers over 10,000 d.w.t. and cargo vessels over 20,000 d.w.t. are not allowed to enter and leave the port in conditions of visibility of less than 1.0 miles.

Cargo vessels up to 180 m. in length – enter when conditions of visibility are not less than 3 miles, leave – not less than 2 miles.

Gas and chemical vessels having length over 180 m. – when the port's leading marks are visible from the crossing of the RR-1 and the imaginary line of the entering leading marks (bearing 013° – 193°).

MAX. SIZE: Ships up to 280 m. LOA. Draft limitation: No. 1 – 11.5 m.; No. 2 – 12.0 m.; No. 3 – 12.5 m.; No. 4 – 13.0 m.; Nos. 5 & 6 – 12.8 m. and Nos. 16 & 17 – 13.0 m.

HEALTH: The legislation of the Ukraine on protection of the surroundings and "Compulsory Rules of the port of Yuzhny" to apply.

Prior to arrival Master should send cable to INFLOT Yuzhny advising last port of call, place drinking/ballast water taken, whether vessel is equipped with sewage tanks or sewage purifying system. Any infectious diseases among the crew during the voyage.

RADIO: All cables to be sent through Odessa Radio.

VHF: Channel 16 used for calling vessels, call sign "Yuzhny Radio 17". Inflot Agency keeps watch on the same channel.

RADAR: Vessels are piloted by Shore Radio in and out.

TUGS: The use of tugs is compulsory when mooring/unmooring. The number of tugs and their horse-power is determined by the Pilot with Master's consent, depending on weather conditions, tonnage and type of vessel. 3 tug-boats must be used during gas-carrier's mooring/unmooring if over 35,000 d.w.t.

BERTHING: On the West coast of Adzhalykskiy Liman Quays No. 1, 2, 3 and 4. The general length of the quays are about 600 m. Quay No. 3 is for loading liquid ammonia and pumping super-phosphorous acid.

A quay for auxiliary ships has been built on the North side of the East entrance point of the inlet. The length of the quay is 155 m. and the depth alongside it is 6.4 m.

Berth No.	*Length* (m.)	*Depth* (m.)
1	224	11.5
2	264	12.0
3	103	12.5
4	110	13.0
5, 6	350	12.8
16, 17	283	13.0
MCC-65	280	14.2

MEDICAL: Port surgery is open round the clock for emergency cases, otherwise all medical treatment and vaccinations are done at Odessa.

FRESH WATER: Potable water available from berth and by barge.

FUEL: Delivered by barge. Longest possible notice is desirable. Stem through Bominflot in London. Telex: 23830.

REPATRIATION: Possible.

AIRPORT: At Odessa.

TIME: Local time is GMT plus 3 hours. Summertime (GMT plus 4 hours) is used from the 1st April to 30th September.

HOLIDAYS: 1st January, 8th March, 1st, 2nd, 9th May, 7th October, 7th November and 8th November.

POLICE/AMBULANCE/FIRE: Through Agent.

TELEPHONES: For gas-carriers only.

SHORE LEAVE: Restricted for all crew members (except Master) till midnight. Shore passes are valid for Port Yuzhny area only. For trips to Odessa special permission is required.

NOTICES: *Instructions for Gas and Chemical Tankers:* Vessel to proceed to position: Lat. 46° 08′ N., Long. 31° 06′ E. and from there to follow the leading pilot boat. Master to give directly to Ilyichevsk pilot station 48, 24 and 6 hours notice. One hour before arrival at the above position to contact "Port Control Ilyichevsk" by VHF or radio/telephone on 2535 kHz.

Pilotage having been accomplished, Master to cable the actual distance the vessel was piloted by the leader to Harbour Master Ilyichevsk, copy to Inflot to exclude errors in charges.

Instructions for Dry Cargo Vessels: Vessel to proceed to position: Lat. 46° 08′ N., Long. 31° 06′ E. 1 hour before arrival, vessel to contact Port Control Ilyichevsk by VHF or radio/telephone 2535 kHz and follow their instructions as they pilot by radar.

Please inform Ilyichevsk sea pilot station ETA at above position 48, 24 and 6 hours before arrival.

General requirements for ships loading bagged urea:

Max. beam 26 m.

Min. d.w.t. 5,170 tonnes. Max. d.w.t. 32,500 tonnes.

Max. distance from hatch opening to ship's side – 6.0 m.

Max. height from hold bottom to hatch covers – 17.0 m.

Min. height of cargo compartments – 3.0 m.

Min. size hatch openings – 7.0 m. × 10.0 m.

Vessel to be equipped with gear for loading spare bags and dunnage.

No cargo is loaded into deep tanks, lockers or other compartments where the loading machine cannot operate normally.

Ship's holds must be free from any obstacles such as shaft tunnels, pillars, etc.

Draft limitation – 11.5 m.

Cargo tallied automatically at the loading plant.

In the holds delivery very fast. No tallymen available.

The figures can be checked by the Chamber of Commerce. We suggest you should contact them directly.

VERY IMPORTANT:

All holds must be dry, clean and free from remnants of previous cargo.

Failure to comply with the above may cause significant losses and/or non-acceptance of the ship.

It is customary for shippers to accept Notice of Readiness retrospectively on berthing from date and time the vessel was granted Free Pratique if she has to wait at anchorage, provided she complies with the above requirements.

General requirements for ships loading bulk urea:

Min. d.w.t. 5,170 tonnes. Max. d.w.t. 32,500 tonnes.

Max. beam 26 m.

Max. distance from ship's side to hatch coamings – 20.0 m.

As there are no trimming facilities, wing tanks with the slip angle of not less than 30° relative to deck line should be available to provide self-trimming in the holds as cargo delivered in a vertical flow.

Draft limitation – 12.0 m.

Vessel must be fit for grain transportation. The stability informa
booklet should provide an approved cargo plan for the quanti
actually be loaded.

All holds must be dry and clean and free from rust and/or rem
of previous cargo. Failure to comply with the above may cause signi
losses and/or non-acceptance of the ship.

It is customary for shippers to accept Notice of Readiness on ber
retrospectively from date/time vessel was granted Free Pratique i
has to wait at anchorage, provided the ship complies with a
requirements.

IMPORTANT: To obtain Harbour Master's clearance outwards
maximum estimated expenses of a seaworthy ship should be pre
and further reimbursed when the accounts are fixed after s
departure, hence it is essential that sufficient funds be received by
Agent as soon as possible and imperative prior to completion.

REGULATIONS: The following are some of the Port Regulations.
numerals have no significant meaning.

1. Gas carrying ships proceed into port and leave it in company
a fire tug, which goes ahead of the gas carrying ship at 8 – 10 ca
and will notify on VHF radio all ships of the necessary measures
precautions to be taken.

2. In the port there is a control office for regulating ship moveme
Ships entering the port, request permission for entry 2 hours be
and ships leaving the port, 30 minutes before.

3. Pilotage for all ships is obligatory.

4. Pilotage for ships into Port Yuzhny begins at position:
46° 31′ N., Long. 30° 57′ E.

5. When a gas carrying ship is entering or leaving the port the e
or exit of other ships is prohibited.

The mooring of any kind of floating object to the side of a gas ca
while it is at Quay No. 3 is prohibited.

6. The max. draft for ships proceeding into Port Yuzhny is 14.2

7. The max. speed for ships in the channel is 6 knots, but in the r
roadstead it is 4 knots.

8. The movement of ships in the channel is only in one directio

9. The mooring of gas carrying vessels and vessels car
chemicals is carried out with the aid of not less than 3 tugs, the po
of 2 of which must be 882 kV (1,200 l.s.) and one 1,692 kV (2,300
Leaving the mooring is carried out with the aid of not less than 2
of which one has a power of 1,692 kV (2,300 l.s.) and the other 88
(1,200 l.s.) The wind speed when mooring and leaving moorings
not exceed 7.0 m./sec.

The mooring of gas carriers of more than 20,000 d.w.t. is carried
with the aid of 3 tugs; the power of each of them must not be less
882 kV (1,200 l.s.). Unberthing will be carried out with not less
3 tugs with the same power. The speed of the wind during mooring
leaving moorings must not exceed 10.0 m./sec.

10. Communication between tugs and ships will be carried out on
radio on Channel 6.

11. Communication with ships is carried out on VHF radio on Cha
11, call on Channel 16. The VHF call sign for Port Yuzhny is Port Co

12. During the mooring and un-mooring of gas carriers from the qu
a representative of the Odessa Port Factory, military guard, office of
Harbour Master and also an inspector of the port will be present.

13. Mooring at the quay, moving on a quay or leaving the quay a
be carried out under the directions of a Pilot.

14 When the speed of the wind is above 12 m./sec., the movin
gas carriers along the quay is prohibited.

15. Navigation of ships along the channel, of not more
20,000 tons displacement is permitted without tugs when the wind sp
is less than 12 m./sec. and the cross current has a speed not more
0.5 m./sec.

Entry to the channel when visibility is less than 0.5 miles is prohib

When there is a strong cross current or current along the cha
tugs will lead ships into the approach channel.

The mooring of ships at the quay will be carried out in the follo
manner, after the tugs have turned the bows towards the exit and pa
to the quay at a distance of 80 m. – 100 m. from the quay, the
maintained the plane of the ship parallel to the quay, and will move
ship towards the quay. The speed of approach must not ex
10 cm./sec.

The ship moorings will be carried ashore by launches. From the b
and stern 2 nylon mooring ropes of not less than 200
(8 in. circumference) are to be used.

16. The main engines of gas carriers must be in constant readi
to move the ship during the whole period in the port.

When gas carriers are entering the port and also when leaving
other ships must observe precautions and not hinder its moveme
its chosen route. These ships must not close a gas carrier wi
distance of 10 cables.

The fire fighting tug on duty keeps a round the clock watch on
radio Channel 16.

The use of steel moorings on gas carriers is prohibited.

The Harbour Master of Port Yuzhny has the right to depart fro
present position on questions connected with the safety of marin

Lack of knowledge of the requirements of the present temp
obligatory regulations established for the port will not absolve the M
of a vessel from responsibility for non-observance of these regula

GENERAL: Port Yuzhny is found in Adzhalykskiy Liman, and
miles E.N.E. of Mys. Dofinovskiy. Berths No. 1 and 2 for Urea; B
No. 3 for liquid ammonia and superphosphorous acid and Berths N
and 6 for minerals and coal.

From seaward an approach channel, 1.6 miles long has bee
through. Leading light beacons lead along it. The least depth i
channel is 15.0 m.

The entrance to the port is protected by 2 moles: The Western, a
400 m. long and the Eastern, about 540 m. long. The moles are 6 m.

Areas with special navigation systems: Off the coast there are areas in which navigation is temporarily prohibited; an area dangerous for navigation; Area No. 185, prohibited for anchoring and fishing, and Area No. 14 for bombing.

The limits of the areas are shown on charts.

Mys. Dofinovskiy: (Lat. 46° 34′ N., Long. 30° 55′ E.) lies 4.3 miles E.N.E. of Mys. Severnyy Odesskiy. Mys. Dofinovskiy protrudes insignificantly into the sea. Four cables West of the headland stretches the village of Novodofinovka, in which there are conspicuous white buildings.

Spoil Grounds: 1.7 and 2.5 miles East of Mys. Dofinovskiy a former spoil ground and a spoil ground are situated respectively. In these areas depths may be less than shown on charts.

A wreck with a depth 9.8 m. over it is situated 2.7 miles E.S.E. of Mys. Dofinovskiy. A light buoy marks the wreck with a depth of 9.6 m. over it.

Banks with depths of 7.6, 7.2, 8.4 and 9.4 m. are situated respectively 3.5, 3.8, 3.6, and 3.7 miles E.S.E. of Mys. Dofinovskiy. They are marked by light buoys.

A bank with a depth of 9 m. is situated 3.3 miles E.S.E. of Mys. Dofinovskiy.

Conspicuous Points: On the West coast of the entrance to the inlet in the village of Grigor'yevka is a conspicuous smoke chimney, and on the West coast of the inlet opposite the quays can be seen large metal reservoirs and towers.

Navigational Aids: The entrance to the channel and its edges are marked by light buoys. On the moles stand lights and beacons; on the East coast of the inlet there are leading light beacons.

Station: On the East entrance point to Adzhalykskiy Liman stands a coastal radar station. Radar pilotage is carried out under the direction of a Pilot. The pilotage is of a consultative nature. Responsibility for manoeuvres, fulfilling requirements of MPPSS-72 (International Regulations for Prevention of Collisions at Sea) and the navigational regulations of the port, rests with the Master of the vessel.

There is a signal post on the building of the coastal radar station.

Caution: Bearing in mind the possibility of the destruction of the edges of the approach channel, depths in it may be less than shown on charts.

Underwater Pipe-line: Runs in a S.W. direction from the village of Grigor'yevska. The position of the pipe-line is shown on charts.

Roadsteads: There are 2 roadsteads in Port Yuzhny: outer and inner. The outer roadstead is situated in the approaches to Adzhalykskiy Liman. The seaward limits of the roadstead are coincidental with the outer limits of the port. The depths in the South part of the outer roadstead are up to 22 m. The inner roadstead occupies the water area of the South part of Adzhalykskiy Liman opposite the quays.

Grigor'yevska Light Beacon: Stands 3.8 miles E.N.E. of Mys. Dofinovskiy. Appearance of the beacon: white round concrete tower on the upper part of which stands a black cylinder, the lower part of the cylinder becomes a truncated cone. Height of the beacon is 14.8 m.: height of the light is 60.1 m.

Vkhodnoy Leading Light Beacons: Stands on the East coast of Adzhalykskiy Liman and lead along the approach channel to Port Yuzhny. Its direction is 193° – 013°.

The front beacon stands 2.7 miles N.N.E. of the entrance to the inlet. Appearance of the beacon: 4-sided metal framework tower on which has been erected a black rectangular target with a white vertical stripe in the centre. The height of the beacon is 17 m.; height of the light is 47 m.

The rear beacon stands 6 cables from the front one. Appearance of the beacon: 4-sided metal framework tower, on which has been erected a black rectangular target with a white vertical stripe in the middle. The height of the beacon is 29 m.; height of the light is 69 m.

SHIPMASTER'S REPORT: September 1979 (Updated 1988).

Vessel: 32,000 g.r.t. LPG Carrier.

General: This port is situated on the Western bank of what was once Lake Ajalik, about 0.5 miles from the entrance to the bay. The port has been created by dredging the barrier that separated the lake from Odessa Bay. On BA. chart 2212 this entrance is situated about Lat. 46° 35.6′ N., Long. 31° 00.4′ E. Breakwaters of prefabricated concrete sections extend about 500 m. into the bay, and the approach channel is marked by conical buoys and pillar buoys for a distance of about 2.5 miles beyond this. The approach channel lies on an axis of about 010°T – 190°T. Depth in this channel were not less than 16 m. by ship's echo sounder, both on entering and leaving.

The small town of Grigor'yevska is marked on BA. 2212. Lake Ajalik is not marked on this chart.

The port has been created to serve the massive and newly constructed chemical plant on the Western shore of the lake. At the time of this visit it consisted of dry bulk handling berths of about 700 m. in length, and a liquid handling facility for the discharge of superphosphoric acid and the export of anhydrous ammonia. The liquid handling berth lies to the North of the dry berths, about 0.8 miles from the breakwaters.

There are plans to create dry cargo berths on the Eastern shores of the lake, immediately inside the entrance. Some work is already in progress.

Vessels of up to 12 m. draft can be handled and there are 3 medium sized tugs available.

The chemical plant is not yet fully completed, a second stage has only been operating since the beginning of this year. In 1980 there were plans to export 2 million tons of ammonia.

Agents: "Inflot" may be reached on Channel 16, with a working Channel 8 available.

Berthing: Vessel berthed starboard side alongside, swinging immediately South of the berth with the aid of 2 tugs (the third was late in arriving) moored fore and aft, port side.

The berth itself consists of a concrete jetty projecting from the main jetty, some 110 m. in length and about 40 m. proud of the main jetty.

There are 5 Chicksans, 2 for the discharge of acid, and a group of 3, 2 liquid 1 vapour return, for the loading of ammonia. The Chicksans have hydraulic couplings and appear to be of an awkward size, about 325 to 330 mm.

On this visit there was only 1 liquid line available for use together with the vapour return line. Claimed loading rate is said to be some 2,000 tonnes p.h. With the 2 liquid lines in use, this would indeed be possible. Our overall load rate was 1,115 t.p.h., including initial and final slow rates. During loading hourly rates in excess of 1,500 t.p.h. were maintained.

Communications with the plant operators was quite good but obviously hampered by language. There were no problems with slowing down for topping off.

Samples: Were taken on arrival and at several times throughout the loading, sample cock on Chicksans.

Fresh Water: Available from the jetty.

Fuel: May be supplied and arrives by barge. Bunkering cannot be undertaken whilst loading cargo and on this call the bunkering had to be completed before being allowed to load, despite this leading to a big delay.

Moorings: Three lines, 2 breast and 2 springs, fore and aft. Rat guards must be fitted. Mooring boat in attendance.

No problems with landing gangway on the quay and it may be turned out quite safely before arrival alongside.

Guards: On the quay, 1 at the gangway (Discharge Books required before being allowed to read drafts, etc.) and 1 each end. At night there was a 'guard' boat lying off our port side.

Officials: Polite and quite firm.

Documents required:

5 copies General Declaration. (ship's particulars, etc.).
4 copies Cargo Declaration.
2 copies Crew Effects.
4 copies Crew Lists.
4 copies Passenger List.
2 copies Crew Currency Declaration.
1 copy 'Clean' Ballast Declaration.
1 copy Sanitary Declaration.
No certificates were sighted.

Shore Leave: Granted until 2400 hrs. Masters allowed unlimited shore leave.

Toilets/Pollution: Vessels not fitted with sewage treatment plants must seal their toilets and use the shore facilities at the end of the quay. A statement to this effect must be signed.

A very strict control of pollution of all types is maintained and this includes ALL drainings from the main deck. Scuppers must remain plugged right up to the moment of departure. Hoses used to de-ice the liquid line must NOT be allowed to drain overside.

Papers: Allow at least 3 hours for paperwork before and after working cargo.

Cargo Lines: Were blown through by the shore plant on completion of loading. Vapour return lines was used throughout and there is no charge for its use, vapour apparently being returned to the shore tanks.

Cargo loaded was at about −32°C.

SHIPMASTER'S REPORT: October 1980 (Updated 1988).

The following is an update of the September 1979 report above.

General: The port has been developed East of Odessa to handle overspill from Odessa and to develop bulk handling facilities.

In about 10 years in terms of tonnage handled, it is expected to be the largest of the southern ports open to overseas vessels.

It has been in operation for 2 years and is 0.6 miles East of Grigoryeko light.

The port has been constructed from a fresh water lake. West Breakwater Head is in position Lat. 46° 35.80′ N., Long. 31° 00.70′ E. East breakwater head is in position Lat. 46° 35.80′ N., Long. 31° 01.03′ E. The port extends at present to the bulk liquid ammonia berth in position Lat. 46° 37.08′ N., Long. 31° 00.80′ E.

Port regulations are at present in Russian only, and English text should be available shortly (October 1980).

Approaching the coast soundings once the 100 fathom bank has been crossed tend to be flat and give little indication of position.

The outer separation scheme buoy was observed on radar at 9 miles and visually at 7 miles.

The coast is identifiable on radar at 30 miles.

D/F beacons are generally reliable and as ALRS, out of 12 checked in September 1980, 3 were not operating on the West coast of the Black Sea.

Port:			*	*

Note: All through Odessa Radio.

*Denotes repeat message where indicated.

"Vneshtrans" is cable address for 'Sojuznestrans' shippers.

Pilot: Order Sea Pilot Ilyichevsk as notices.

Contact by VHF Channels 16 and 14 about 15 miles away from turning buoy.

Pilotage compulsory from port. Pilot speaks reasonable English and requires about 13 knots.

If anchoring at Yuzhny anchorage, he positions vessel under control from Yuzhny Radar Station position Lat. 46° 36.05′ N., Long. 31° 01.3′ E.

On departure the Harbour Pilot leaves the vessel in the anchorage area and the sea pilot cutter 'Bravvy' guides vessel down channel to 'Ilyichevsk' turning buoy, his speed is 11 knots.

Anchorage: For large LPG ships Anchorage No. 356 is used, centred on Lat. 46° 32.5′ N., Long. 30° 58.25′ E. with a radius of approximately 0.6 mile.

Depth 20 m., bottom mud and sand. Density 1024.

All anchoring is under control of Yuzhny Radar Station which gives the Pilot directions.

Berthing: There is no night berthing or unberthing, for gas carriers although the buoyage and leading lights are lighted, this seems to be for dredgers working. It would seem the hours are 0800 to 1700 hrs. (with possible extension in Summer months) with no vessels in the harbour or channel underway before or after these times. (We made it outwards in 12 minutes (October 1980)).

Visibility must be over 4 miles before berthing or unberthing operations take place. It may seem clear out at the anchorage but the weather in the harbour can be very different. This has been borne out from observations. We noted a temperature rise of 8° Celsius in 1 hour whilst moving out of port to anchorage.

Channel: The channel width is 118 m. and least depth of 14 m. (Checked by echo sounder). Pilots advise that there is a patch of 13.5 m. but this was not found. Bottom sand and mud. The shape is in the form of a 'V' so it is necessary to keep to centre of channel.

Buoys commencing seawards at Nos. 13 (starboard) and 14 (port) terminate in the harbour itself at Nos. 3 and 2.

The leading line is 013° to 193°.

Buoys (entering), black to starboard and red to port with Fl. W. & R. lights respectively. Channel length 1.3 miles from breakwater heads.

South of the channel are two shoals one 1.6 miles S.S.W. marked by 2 white pillar buoys Fl. W. and isolated by 1 white pillar buoy about 1.5 miles S.W.

Confused cross currents from wind and the rivers emptying out nearby are apparent. Generally the surface current is Westward and sub-surface Eastward. Apart from causing navigation problems these currents cause much silting up.

Vessels enter the channel from the anchorage between the 2 shoal areas on an approximate course of 080° then turn hard to port when in line with the channel to bring leading lights in line before entering channel. On leaving much the same is done, except a more Easterly course is resulted.

In the harbour itself in calm conditions there is a noticeable Southerly current of 0.5 knots.

The dredged channel at present terminates just astern of the ammonia berth marked by 2 buoys.

Leading marks, white and orange in colour are situated on raised ground N.E. of the harbour, and at night exhibit fixed white lights under which are neon-like strip green lights.

Vessel is swung short round to port off ammonia berth, berthing starboard side to head out. On fertiliser berths there seems to be no accepted side to.

The breakwaters consist of concrete blocks piled haphazardly on top of one another. Immediately to the East are the ruins of 2 other small breakwaters. At the foot of the Eastern breakwater there is a large concrete radar and Port Radio Control Tower. This is conspicuous in good visibility but would benefit from being painted white or orange to assist identification in conditions of haze which seem to be prevalent.

Just below this tower on the harbour side is a small boat pier for use of Port Authority craft.

The harbour offices themselves are in a large concrete building at the Southern end of the fertiliser quay where Customs, Agents, police, doctor, chandler, etc., reside.

Tugs: Four tugs are available. All ship's lines. 2 of 5,000 h.p., 1 of 2,500 h.p. (Tigris) and 1 of 1,200 h.p.

All tugs have icebreaking capability.

It is essential that the larger tugs have double lines. They use the lines out of the centre lead bow and stern with the 1,200 h.p. tugs pushing.

Outwards (October 1980) we dispensed with 4,500 h.p. tug's services and used 1,200 h.p. tug to tow us.

Tugs accompany vessel down channel to anchorage area.

Berths: Gangway can be turned out beforehand.

The ammonia berth is 125 m. long and 43 m. (measured) proud of the main dock face, it leads in a 171° – 351° direction. The other berths are offset and leading in approximate 005° – 185° direction.

The fendering is excellent with long rubber tubes and corners well protected on all berths.

Bollards are plentiful.

Moorings: Ammonia Berth 3, 2, 2, each end with bow/stern and breast lines leading to main dock face and springs to 'T' section.

Springs first out and last in.

As usual aft have to compromise. We put breast lines from main deck and springs from aft, both to 'T' section. Mooring boat in attendance, bow first docking and undocking.

Unberthing, vessel pulled laterally clear of berth, about 100 m., by tugs before moving ahead down harbour.

Loading: Ammonia: 2 loading and 1 Vapour Chicksan. Max. rate about 2,000 t.p.h. total (2×1,000 t.p.h.).

No charge for Vapour Return Line (VRL).

Shore personnel connect and disconnect.

Hydraulic couplings.

VRL ships 8 – 12 to shore 12 – 12 150ASA/300ASA.

Liquid shore spools 150ASA/300ASA.

No emergency stop except by watchmen in hut under Chicksans, who speaks little to no English. Essential whistle signal agreed.

On visit (Sept./Oct. 1980) shore tanks were low on product with max. rate at 700 t.p.h. Sometimes down to 200 t.p.h.

Samples frequently taken from cock on Chicksan.

Temperature warm at −32° Celcius on all visits. Note protest.

Loading programme to be agreed before commencement.

Surveyor with interpreter, takes about 2 hours for figures. Plant has to be off whilst readings taken.

Acid: Forward (South) of ammonia Chicksans – 2 arms.

Shippers: 'Sojuznestrans'.

Statement of Fact is compiled by the Master during loading on of form which is an advantage.

Tank atmosphere tested prior to commencement.

Purging or cooling alongside.

Plant: Total storage capacity 100,000 tonnes with about 18 tank 5,500 tonnes each. Four tanks can be seen from the ship, the remain are behind.

The anhydrous ammonia plant was built by the Pullman Ke company of U.S.A. and fertiliser section by PHB of Germany.

The tank pumps 'Carter' lose suction with 1,000 tonnes heel in ta Approx. 2,000 tons per day of ammonia is produced at the plant w about 7,000 tons per day being pumped in by pipe-line from the Vo Region.

Pollution: VERY strict. Be VERY careful.

Scuppers to be plugged. Make sure decks washed down prio arrival and that no lube oil is washed overside.

Make sure ballast and pumps clean.

Ships not fitted with sanitary tank system must have their toilets loc up and all crew use toilets astern of vessel. The sanitary syste checked.

No pumping of ballast in anchorage or in harbour without P Authority permission. (A Greek ship was fined for pumping ballas anchor).

Do not have fire hoses draining overside, we had them draining ballast tanks.

Be very careful when disconnecting that no hose water dra overside.

Agent: State Agent 'Inflot'. Yuzhny office telephone 59-38-75. Yuz office has been in operation for about a year. Telex: 232 722.

Main office in Odessa.

Office is in port building at end (South) of fertiliser quay. Good Eng and very co-operative.

Night staff, 2000 hrs. – 0800 hrs., good.

Can be contacted by VHF at anchorage or alongside by Channe and then talk direct on Channel 8.

Order money (which all unused must be handed back on depar 24 hours beforehand. If shorter notice given Agent will give you w he has in office safe.

Accepts Notes of Protest on behalf of receiver.

Cable address: 'Inflot Yuzhny'.

Medical: Through Agent.

Every day except Sunday a doctor attends the clinic in the p building, 0900 hrs. to 1300 hrs. We had 1 crew member with a fractu hand who was checked by doctor and taken immediately to Odessa X-Ray, then brought back to the ship plastered up, all in 3 hours, w full English report.

Outside these hours a nurse is on duty.

Water: Fresh water available from quay. Agent will send waterm Metered. Ship hoses international connection flange.

Chandler: Two. Technical and produce.

Some local produce available, basically vegetables. No salads.

The produce chandler in port building deals in curios, champag vodka and caviar. Payment can be made by the Agent.

We obtained from Technical chandler, a Russian chart of Odess 2 days' wait.

Suggest any requirements ordered well in advance.

Films: Walport films can be changed with suitable ships in port. Ag very co-operative in this respect, finding out for us if a Greek ship h Walport films which she did and like ourselves wanted a change. Age and customs officer with one of our seamen changed the boxes - difficulties encountered.

Fuel: In short supply and long waits. By barge to Odessa wai anchorage. October 1980 – 3 day wait for diesel at $358 per tonne

Repairs: Very difficult.

Radar/Wireless: Not sealed or checked. Bridge and radio room inspected. Radar use seems to depend on Pilot and guards. Fr anchor to berth we had to turn off radar. On last visit guards made s turn off before sailing.

This visit no problem, radars tested prior to sailing and left on.

There is a tug anchored off vessel at all times but this is for fire du

Formalities: Very good and quick, as long as procedure follow Everyone has to muster in front of Immigration Officer on arrival a departure, and is checked against Discharge Book.

Required:

1 copy Personal Effects Declaration Form (very strict on this, req all jewellery to be declared).
1 copy Currency List – crew. (Again very strict and check frequently in port on amount drawn by individuals).
2 copies Health Form.
2 copies Vaccination List.
6 copies Crew List.
5 copies General Declaration (IMO Standard Form).
2 copies List of Drugs in Master's care.
1 copy Clean Ballast Declaration and request to pump in port.
3 copies Loading Instructions.
2 copies Cargo Requirements.
1 copy Statement to Port Captain, all Safety Equipment in good or
1 copy Statement of type of Sanitary System and in use.

No Stores List required.

Bond not sealed.

Port Captain boards vessel soon after arrival and fills in long sa questionnaire with Master. If certificates dates in doubt will want to s

Agent says Port Captain will allow ship to sail with Safety Certi up to 2 days before expiry with clearance for Bosphorus.

Allow 2 hours for papers before cargo commences and completion.

Seamen's Facilities: A Seamen's Club has been established just ou main gate. Roubles only taken.

SHIPMASTER'S REPORT: May 1989.
Vessel: Acid carrier, 45,000 d.w.t.
Charts: Chart No. 508, approaches to Odessa.
Chart No. 913, approaches to Yuzhny.
B.A. Chart No. 2204, Port Yuzhny.

Time: Summer GMT minus 4 hours (last Sunday in March). Winter GMT minus 3 hours (first Sunday in October).

Cable/Telex Addresses:
Inflot Odessa Telex: 232824. Cable: Inflot Odessa.
Inflot Yuzhny Telex: 232722. Cable: Inflot Yuzhny.
Black Sea Shipping
Control Centre: Telex 232711. Cable: Morflot Odessa.
Il'ychevsk Sea
Pilot: 232825.

Approaches: (Ref: USCG NM 1/88, Black Sea, 010100Z Jan. 1988). From 1st January 1988, vessels entering or leaving Odessa, Ilichevsk, Yuzhny or Kherson are requested to give notice to Odessa Black Sea Shipping Control Centre 72, 48, 24 and 4 hours before entering traffic separation system. If vessels do not contact the Shipping Control Centre before entering mentioned area, service fees increase by 100%.

A black and yellow banded spar, which is a poor radar reflector, with a faint flashing white light (Lat. 46° 08.3′ N., Long. 31° 06.1 E.) marks the entrance to the Odessa traffic lanes. The inbound lane begins 1.5 miles N.W. of this buoy and proceeds on a course of 317° for 7 miles before entering the traffic roundabout scheme. The centre of the roundabout is marked by a spar buoy (Lat. 46° 15.6′ N., Long. 30° 56.0′ E.) and traffic proceeds in a counter-clockwise direction 2.25 miles off this buoy to the Yuzhny, Odessa and Il'ychevsk traffic lanes respectively.

Il'ychevsk Traffic Control (VHF 16/10, R/T 2535 kHz) must be contacted 1 hour prior to arrival at the Entrance Buoy and will assume radar pilotage 3.5 miles from the roundabout buoy on VHF 10/12. All positions given by the Traffic Control Station are in relation to Il'ychevsk Lighthouse (Lat. 46° 19.0′ N., Long. 30° 40.8′ E.).

The centre of the traffic lane to Yuzhny is marked by a spar buoy (Lat. 46° 19.0′ N., Long. 30° 56.8′ E.), and the inbound lane proceeds on a course of 002° until 1 mile off this buoy for approximately 12 miles to Anchorage Area No. 356.

If the vessel is a gas carrier (LPG) or acid carrier it will also be under the pilotage of a leader boat which will meet the ship at the roundabout and hold position approximately 10 cables ahead at 11 knots and act as Pilot to the South of the anchorage area, working VHF 10/12 in conjunction with Il'ychevsk Traffic Control.

The leader boat and traffic control pilotage end at Lat. 46° 29.0′ N., Long. 30° 57.0′ E., 7 miles from the port of Yuzhny, off the West end of Odessa Bank. At this point Yuzhny Port Control assumes radar pilotage (VHF 11) to the anchorage position or pilot station (Lat. 46° 32.2′ N., 30° 59.6′ E.). The pilot boat has an orange hull with large black letters. Yuzhny Port Control tower is a 45 m. high cement structure, located at the North end of the East Breakwater (Lat. 46° 36.08′ N., Long. 31° 01.4′ E.).

The entrance channel, 180 m. wide and 14.2 m. deep, begins in position Lat. 46° 33.2′ N., Long 31° 00.00′ E. and proceeds on course 193°T for 1.25 miles, before entering the marked channel. The channel buoys are red or green and are dimly lit spar buoys.

From the first set of buoys it is 1.6 miles until inside the harbour abeam of the control tower. The channel also has a set of white range lights. The channel is bordered by 2 breakwaters, the East one extends 300 m. out from shore and the West one 160 m., each are 6 m. wide and the ends are marked with a steel light structure 2 m. high. Immediately alongside the channel on the East side is a shoal area (Lat. 46° 36.07′ N., Long. 31° 01.2′ E.) which remains partially uncovered. Speed in the channel is 7 knots and inside the harbour 4 knots. There is no marked channel inside the harbour itself.

There may often be a wind driven current in the channel approach, setting East or West at up to 2.5 knots. There are no appreciable current or tide effects in the harbour itself.

Once inside the port, abeam of the control tower, there are 3 tug boats to meet the vessel. Two boats (Mogouchiy, Bazalt) are Finnish built (1981) with icebreaking capacity of 5,000 h.p. each, and one smaller boat (Tigris) of 2,800 h.p. All use ship's lines for docking or undocking. These are the only tugs to service the port on a regular basis.

Anchorage: Anchorage Area No. 356 is bounded by positions:

	Lat.	*Long.*
1.	46° 29.9 N.	30° 57.3′ E.
2.	46° 31.8′ N.	30° 57.3′ E.
3.	46° 32.8′ N.	31° 00.0′ E.
4.	46° 30.9′ N.	31° 00.0′ E.

There is a small section recently added on the S.W. corner of the area that runs Southeasterly 1.2 miles and is 0.75 miles wide. Area No. 356 is used exclusively with LPG ships and phosphoric acid carriers. The depth is 17 m. – 19 m., with excellent holding ground. The vessel is piloted in and out of the anchorage by Yuzhny Port Control.

Anchorage Area No. 357 is bounded by positions:

	Lat.	*Long.*
1.	46° 33.9′ N.	31° 01.1′ E.
2.	46° 34.5′ N.	31° 00.8′ E.
3.	46° 35.7′ N.	31° 05.8′ E.
4.	46° 35.1′ N.	31° 06.0′ E.

This area is used exclusively by bulk carriers. A third area, No. 358, is located East of Area No. 357 and is anticipated to be used by grain carriers. No grain carriers serve the port as yet.

When requested through the Agent, "Inflot Yuzhny", garbage collection is available at the anchorage, usually within one day's notice, weather permitting. The rubbish must be in sealed bags and there is no charge as it is included in the Sanitary Dues.

Fuel (IFO/MGO) is also available at the anchorage, but must be requested well beforehand (1 – 2 weeks), as there are only 2 bunker barges to serve Odessa and Yuzhny. All fuel comes out of Odessa and the barge capacity is around 1,500 tonnes, supplier is Bominflot.

If a vessel is cleared while at anchor, there is an additional charge of $700 – $800. Launch service is controlled by the Port Authorities and only available if the vessel is cleared. No fresh water is available at the anchorage.

Port: The dredged depth in the port is at 13.6 m. On the West side of the harbour, one mile in from the breakwater, are Berths No. 1 and No. 2, 600 m. long and used for the handling of dry fertiliser by conveyor. In position Lat. 46° 37.1′ N., Long. 31° 00.8′ E. is Berth No. 3 for ammonia/phosphoric acid carriers. Further to the North at Lat. 46° 37.4′ N., Long. 31° 00.8′ E., is the newly constructed Berth No. 4, 140 m. long and designed for the handling of methanol. This berth is not in service yet. Diagonally across from Berth No. 3 on the East shore at Lat. 46° 36.9′ N., Long. 31° 01.7′ E., is another new dock, Berth No. 5, 500 m. long, in operation since January 1988, and used for handling bauxite/coal and served by rail and 4 cranes. 0.4 miles inside the Entrance past the control tower on the East side of the harbour are 3 mooring buoys for handling vessels with grain cargoes.

Dredging continues North of a line at Lat. 46° 37.5′ N., and no deep draft/cargo vessels proceed beyond this point or Buoy No. 14. The only other traffic in the port is small passenger/ferry boats for transporting workers across the harbour.

Traffic in the port may be handled day or night unless restricted visibility (under 2 miles) or strong winds. Five pilots currently serve the port.

Berth No. 3: Berth No. 3 is part of the chemical complex called Yuzhny Port Plant, which occupies a large section of the Western shore of the harbour. As shown in the port plans there are 2 × 12 in. Chicksan arms available for the discharge of super phosphoric acid. These join into 1 × 16 in. line ashore which runs to 6 storage tanks at the base of the hill, close by the dock. The capacity of the tanks is approximately 8,000 tonnes each. The usual discharge rate is up to 2,000 tonnes/hr. and if the tank capacity is available this rate can be maintained throughout the discharge. There is fresh water on the dock using 2 ship's hoses from a 'Y' connection with the load rate around 30 tonnes/hr. No fuel is available from the dock. The working depth at the dock is 14 m. and the face of the dock has a fairly good rubber fendering system.

Aside from handling super phosphoric acid, the dock is equipped with 2 Chicksan arms for the loading of ammonia with a third arm for vapour recovery. The dock handles on average 2 ammonia ships per week.

A line boat is used for head and stern lines (4 each), and 2 springs fore and aft are run to the dock. Vessels always dock starboard side to and because of the dock arrangement there is no problem having good leads on all lines. Fire stations are positioned along the dock at regular intervals and in towers 40 m. high.

The ship's accommodation ladder works quite well alongside and a guard (military man) will be stationed on the dock the whole time the vessel is alongside. No vehicles are allowed on the dock and the walk to the agency office by Berth No. 1 is about 0.75 miles.

Clearance: Entering the vessel will occur within one hour of being all fast.

The following documents are required:
6 Crew Lists. (We were also required to supply a visaed Crew List).
3 Stores Lists. (Include firearms, ammunition and narcotics).
5 General Declarations (Include owner's name and address. Expiry date of certificates.).
1 Crew Effects Declaration. (Include foreign currency).
2 Manifests.
2 Cargo Declarations.
Maritime Declaration of Health. (They will have their own form for this.)
Derat Certificate.

The slop chest usually remains unsealed, but the firearms and ammunition must be locked and sealed.

The Steward's provisions and store rooms will be inspected, but not sealed.

The sewage treatment plant will be inspected, if inadequate or inoperational, facilities must be used on the dock. Usually a sample of the water is taken.

Immigration will want to see each man with his passport (both inwards and outwards). The passports are taken ashore and after 2-3 hours are returned on board. For shore leave, the passport is turned over to the gangway guard who will issue a numbered pass.

A Port Authority representative will board some time during the stay to site the vessel's documents and go through the SOLAS list for bridge equipment. They will occasionally request that rat guards be installed. This is usually a brief but efficient visit.

We have had the Derat Certificate renewed here several times in a matter of minutes at a charge of 45 roubles.

The Entry and Clearance is very straight forward and we have never encountered any problems.

General: The harbour of Yuzhny (the name meaning Southern) was originally a lake that was broached into the sea to allow the port to be constructed. The overall plan is for Yuzhny to surpass Odessa as being the largest port on the Black Sea as far as tonnage and shipping traffic. Its position is such that all traffic using the Northwestern Black Sea ports must pass its entrance and use the Odessa traffic lanes due to the shallow areas of the Odessa Bank.

The dredging of the port is a continuing project and the sludge boats are constantly seen running in and out to the spill grounds on the Odessa Bank.

The town of Yuzhny, all high rise buildings, was and is being constructed about 8 km. to the North of the port to handle the growing population of people working in the port area. The town is serviced by bus from the main road. Yuzhny is located approximately 40 km. North of Odessa and is serviced by bus (5 kopeks) and taxi (20 roubles) into the city. The curfew for seamen is 2400 hrs., with Odessa being officially off-limits. There is no curfew for the Master.

In the port itself there is only a Seamen's Interclub with a lounge and bar. Roubles only are accepted at the club and with prior notification the Interclub staff can organise tours to Odessa or tickets to the Odessa Opera House, a main attraction of the city.

The port is also serviced by a chandler and duty free shop where foreign currency only is accepted. Basic staples can also be purchased through the chandler with prior notification for items such as sugar, flour, potatoes, onions, etc., in limited quantities; other provisions cannot always be supplied.

Any local currency taken from the Agent at the legal exchange rate must be accounted for and returned at sailing with receipts issued. No roubles are allowed to leave the country. Although the rouble is not recognised on the international market, the approximate exchange rate at this time is $1.64/rouble.

AUTHORITY: The Port of Yuzhny Authority, 1 Grigoryevka, Port of Yuzhny, Kominternovskiy Rajon, Odessa Region, Ukraine. *Tel:* 55-10-27. *Local Exchange:* 5-50, 5-52. *Telex:* 232722. *Cables:* Morflot Yuzhny. *Contact:* Captain G.A. Koksharov, Harbour Master.

AGENT: Yuzhny "Inflot" Shipping Agency, Grigorievka-1, Kominternovsky Rayon, Odesskaya Obl., Port Yuzhny, Ukraine. Tel: 593780, 593777, 593875. Telex: 232222. Cables: "Inflot Yuzhny".

NOTES

Please also advise Shipping Guides Ltd.

United Arab Emirates

GENERAL:

EMIRATES RADIO: The Emirates Telecommunications Corporation operate a Coastal Radio Telephone Service (Etisalat) to provide connections via a manual operator between ships at sea and the public telephone network. The service is available continuously 24 hours a day.

There are 8 shore stations set up around the coast of the U.A.E. These transmit and receive on the VHF channels shown in the table below. The control and operation of all shore stations is at a central point in Dubai.

	Frequencies		
Channel	Ship Transmitter (MHz)	Ship Receiver (MHz)	Use
16	156.800	156.800	Simplex for distress and safety for all areas
3	156.150	160.750	Duplex working, first channel for Khor Fakkan area
4	156.200	160.800	Duplex working, first channel for Abu Dhabi area
7	156.350	160.950	Duplex working, second channel for Jebel Ali and Khor Fakkan areas
28	157.400	162.000	Duplex calling channel for all areas
60	156.025	160.625	Duplex working channel for Jebel Dhanna area
62	156.125	160.725	Duplex working channel for Zirku area
63	156.175	160.775	Duplex working, third channel for Jebel Ali area
83	157.175	161.775	Duplex working, second channel for Abu Dhabi area and channel for Fujairah area
84	157.225	161.825	Duplex working channel for Umm al Quwain area
85	157.275	161.875	Duplex working, second channel for Jebel Ali area
87	157.375	161.975	Duplex working channel for Ras al Khaimah area

For all areas a common calling frequency on Channel 28 is used both for ship-to-shore calls and for shore-to-ship. After contact is established the Etisalat Coast Station Operator will assign a working channel taking into account the ship's position and existing calls in progress.

To establish a ship-to-shore call the ship should switch the equipment to Channel 28, ensure the channel is not already in use by listening and then call "Emirates Radio", identify itself and give the coastal area in which it is sailing e.g. "off Jebel Dhanna". The Coast Station Operator will then assign a working channel, e.g. in the case of Jebel Dhanna area working will be established normally on Channel 60. After recontacting on the working channel the called number and calling ship details will be established and the call connected. If there is traffic congestion the Operator may assign a free working channel from another area.

For calls to the ship, the Operator will set up the called ship's code number which will be sent on Channel 28. This will operate an alarm on the equipment. In the case of there being no selective calling equipment installed or contact cannot be established by this means the Operator will also call the ship by voice using its call sign and name on Channel 28. Following establishment of contact the ship will give the area it is in and the operator will then assign a working channel. On re-establishment on the working channel the call will be connected.

It follows therefore that all ships must keep one of their receivers switched to Channel 28 when idle in order to be able to receive a shore-based call.

Traffic lists, that is calls on hand for ships in the area, will be broadcast at 0603, 0803, 1203, 1403, 1603 and 1803 hrs. GMT on Channel 28. This is in addition to calls made on first receipt of the call booking. Ships should avoid using Channel 28 to call during the broadcast of traffic lists.

Distress and Safety: Simplex Channel 16 (156.8 MHz) is received continuously by the Coast Station and is monitored by the Border Guard in Abu Dhabi who will handle all matters relating to distress, urgency and Safety of Life at Sea (SOLAS).

Ship-to-Ship Traffic: Ship-to-ship calling and working frequencies are different from those used by the Coast Station. Such calls are not normally the concern of the Coast Station and should be conducted in accordance with international and local regulations.

Exceptionally however if a ship desires to call another ship out of direct range the Coast Station facilities may be used in which case the procedure and use of calling channels is the same as for calling a shore number.

Shore-Based Subscribers: Subscribers wishing to contact a ship should dial number 158, from any location within the Emirates in order to contact the Coast Station Operator.

They should give the Operator their town location and telephone number, the name of the ship, if known its call sign and code number and the name of the person to whom they wish to speak. The Operator will call the shore-based party back after the call with the ship is established.

Categories of Calls Available: Paid calls only are accepted. Collect calls are not admitted from or to ships.

The following categories are accepted:
- Calls from ships within range to parties anywhere within the United Arab Emirates.
- Calls from any party within the U.A.E. to any ship within range.
- Calls from ships within range to parties in any country in the international telephone network.
- Calls from any party in the international telephone network to any ship within range. These will only be accepted via the operator in the network of origin.
- Calls from any ship within range of the Coast Station to any other ship within range.

All calls to ships are treated as personal calls. Calls from ships are station calls at the normal charge. Personal calls are available subject to an additional personal call charge.

U.A.E. ships or boats using this service must ensure that:
1. They have a valid licence which is issued by the Ministry of Communications who will also issue a call sign and, where applicable, a code number.
2. The vessel is equipped with a Maritime Mobile Radio Telephone which conforms with international requirements and any supplementary regulations issued by the Ministry of Communications.
3. That proper operating procedures are followed.

Technical Characteristics for Maritime Mobile Radio Telephone (VHF): The technical characteristics should be in accordance with CCIR Recommendation 489-1 except for transmitter power which must not exceed 10 watts (U.A.E. Regulation).

The recommendations as modified in the U.A.E. are summarised below:

General Characteristics:
1. The frequency band is 156 – 174 MHz.
2. The Channel spacing is at 25 kHz intervals.
3. The class of emission is F3 (frequency modulation telephony).
4. The bandwidth is 16 kHz.
5. Frequency modulation has a pre-emphasis of 6 db/octave.
6. Apart from specially designated Simplex Channel, for SOLAS, only ships with full duplex facilities can work with the public telecommunications system. Ships with only semi-duplex cannot work with the public telecommunications system.
7. It must be possible to make changes between Channels within 5 seconds.
8. The emission is vertically polarised.
9. The selective calling system is as per CCIR Recommendation 257-2.

The tone frequencies for this system are as follows:

Figure:	1	2	3	4	5	6	7
Audio Frequency:	1124	1197	1275	1358	1446	1540	1640
Figure:	8	9	0	Figure Repetition			
Audio Frequency:	1747	1860	1981	2110			

Transmitter:
1. The transmitter carrier power shall not exceed 10W and shall incorporate facilities to readily reduce this to 1W or less for use at short ranges. (Note: The normal 25W power permissible internationally is reduced to 10W in the U.A.E.).
2. The frequency deviation should not exceed ±5 kHz.
3. Frequency tolerance should not exceed 10 parts per million.
4. Spurious emissions should not exceed 25 μW or 40 db below normal power whichever is the lower.
5. The upper limit of the audio band should not exceed 3 kHz.
6. Cabinet radiated power should not exceed 25 microwatts.

Receiver:
1. Sensitivity should be equal or less than 2 microvolts e.m.f. for a given reference signal to noise ratio at the output.
2. Adjacent Channel selectivity should be at least 70 db.
3. Spurious response rejection should be at least 70 db.
4. Radio frequency intermodulation rejection ratio should be at least 65 db.
5. The power of any conducted spurious emission measured at the antenna terminal should not exceed 2 nanowatts.
6. The effective radiated power of any cabinet radiated spurious emission on any frequency up to 70 MHz should not exceed 10 nanowatts. Above 70 MHz, the spurious emissions should not exceed 10 nanowatts by more than 6 db/octave in frequency up to 1000 MHz.

General Guide to Operating Procedure:

Ships wishing to make a call via the Emirates Coast Station should use the following procedure:
1. Switch their receiver to Channel 28.
2. Listen to establish there is no traffic on the channel.
3. Transmit the following call: Emirates Radio this is . . . (call sign, ships name or other identification). Location . . . (nearest Emirates main coastal town).

In the case of difficult conditions this procedure can be modified as follows: Emirates Radio (repeated not more than 3 times) this is . . . (call sign, ships name or other identification, repeated not more than 3 times). Location . . . (nearest Emirates main coastal town).

If the Coast Station does not reply to the first call the call may be repeated at 3 minute intervals. However, before renewing the call, the calling station must first ascertain that further calling is unlikely to cause interference to other communications in progress and that the station called is not in communication with another station.

For replying to a call from the Coast Station a similar procedure is followed; the following is transmitted on Channel 28: Emirates Radio (repeated not more than 3 times) this is . . . (call sign, ships name or other identification, repeated not more than 3 times). Location . . . (nearest Emirates main coastal town).

After contact has been established on Channel 28, the Coast Station will assign a working channel. Coast and ship stations then change to the working Channel and proceed with the call.

Example: A Ship the 'Al Said' located off Jebel Dhanna wishes to make a telephone call. This is the procedure:

1. The 'Al Said' listens on Channel 28 to ensure there is no communication it may interfere with.
2. Transmits the following call on Channel 28: Emirates Radio, this is . . . (call sign) . . . 'Al Said' off Jebel Dhanna.
3. The Coast Station will reply: (Call sign) . . . 'Al Said', This is Emirates Radio, Channel 86.
4. 'Al Said' now switches to Channel 86 and calls: Emirates Radio, this is 'Al Said', how are you receiving me?
5. The Coast Station replies: 'Al Said', this is Emirates Radio, receiving you well, go ahead with your traffic.
6. The ship then gives details of the telephone call required.

Inmarsat Service:

Scope of Service: This service provides for the exchange of telephone/telex calls between suitably equipped ships in the U.A.E. coastal waters or in international waters, and any subscriber connected to Etisalat's telephone network.

The declared purpose of the INMARSAT System is to establish and operate a worldwide satellite communications system to provide improved maritime communications that will lead to greater efficiencies in the management and operation of ships at sea as well as contribute to improvements in distress and safety of life at sea.

Inmarsat Network – Global Coverage: The Inmarsat network consists of satellite circuits and their associated control systems providing national telecommunication carriers of member countries access to ships at sea via the maritime coast stations owned and operated by those countries who choose to provide such facility. Global coverage of accessing ships in each ocean area.

The implications of this network are that such access to ships having suitably equipped terminals, and located anywhere in the world can be had via extremely reliable and high quality circuits at reasonable costs.

In the operation of the service, Etisalat has the freedom to route its maritime telecommunications traffic via any of several coast earth stations having coverage to that particular ocean area. Elisalat's routing arrangements provide service to Inmarsat satellite coverage areas in Atlantic, Indian and Pacific Ocean regions.

Facilities Offered: Telephone: In the direction from shore-to-ship, IDD service and Operator Assisted call facilities are available.

For IDD Calls the telephone country code to dial are:

Ocean Region	*Code*
Atlantic East	871
Atlantic West	874
Indian	873
Pacific	872

Operator Assisted Calls have to be booked with the Etisalat International Telephone Operator. Calls can be either station-to-station or person-to-person, subject to a personal call surcharge in the latter case. When booking a call, callers in the U.A.E. should give the operator the ship telephone number and the ocean region where the ship is located.

In the direction of ship-to-shore, calls will be received on an automatic basis, but if necessary such calls will also be connected via the operator in the coast earth station country.

Telex: U.A.E. subscribers have the facility to dial telex calls in the shore-to-ship direction, and to receive calls from ships on a fully automatic basis. However, if necessary the Etisalat Operator or the operator in the coast earth station country will be able to establish telex calls.

Automatic telex calls can be made by keying the destination code and the ship telex number.

Area	*Destination Code*
Atlantic Ocean – East	0581
Atlantic Ocean – West	0584
Indian Ocean	0583
Pacific Ocean	0582

Collection Charges: Telephone calls from shore-to-ship via Etisalat are charged on the basis of 3 minute minimum plus each additional minute. For person-to-person calls a surcharge equivalent to a 1 minutes charge will apply. The charges applicable are:

First 3 minutes via operator	Dh.120
Each additional minute	Dh. 40
Personal surcharge	Dh. 18
Per minute telex call from shore-to-ship via Etisalat is	Dh. 30

Telex calls are charged on the basis of 1+1 charging, i.e. the minimum charge is for 1 minute with the additional time charged per minute, with fractions of a minute charged as a full minute.

Accounting Services for Inmarsat/Radio Maritime Communications: Etisalat also provides accounting service to ocean going and mobile vessels registered by the Federal Ministry of Communications, U.A.E., in accordance with the international telecommunications rules (CCITT) and International Maritime Laws. Under the terms of this service, Etisalat will provide such accounting and settlement facilities for the ships thus registered in U.A.E. for all their radio communication traffic via Inmarsat and other communication channels anywhere in the world.

Charges payable to Etisalat by the mobile station operator are:

(i) Deposit: A refundable security deposit of Dh 5,000/– is payable at the time of application for service. The deposit will be returned at the time of termination of the service, subject to the satisfactory settlement of all outstanding matters, including the payment of all charges and dues payable to the Corporation.

(ii) Service Fee: An annual service fee of Dh 2,000/– is payable in advance for calculation and verification of charges, allocation of charges to interested parties, adjustment and payment of accounts received from Administrations and other accounting authorities and related incidental correspondence. This charge will accrue day to day from the date of commencement of service.

Etisalat branch offices in Abu Dhabi and Dubai will provide on request details of terms and conditions governing this service to interested mobile station operators. Applications for such service should also b made to the appropriate Etisalat branch office.

Other Marine Services: If ships are outside U.A.E. coastal water calls may be made via marine communication facilities available in othe countries.

These are: Ship/shore telephone/telex/telegram services via radi (VHF, MF or HF).

Charges for ship/shore services by radio consist of the appropria international rate to the country in which the coast station is situate plus the coast station and ship station charges.

OPERATOR: The Emirates Telecommunications Corporation, P.O.Bo 3838, Abu Dhabi, U.A.E. *Tel:* 283333. *Telex:* 22115 Etcho Em *FAX:* 772930. *Contact:* Manager Operations.

ABU AL BUKHOOSH: 25.26 N. 53.08 E. (See Pla

LOCATION: The terminal is bounded by the following co-ordinat South of Sassan Oil Field.

(a) Lat. 25° 31′ N., Long. 53° 05′ E.
(b) Lat. 25° 29′ N., Long. 53° 12′ E.
(c) Lat. 25° 26′ N., Long. 53° 12′ E.
(d) Lat. 25° 26′ N., Long. 53° 05′ E.

Anchoring is prohibited within this area.

DOCUMENTS:

Early Departure Procedure: The Master must, in order to expedite th turn-round of vessels and avoid undue delays caused by weather o other circumstances, use the Early Departure Procedure. In this cas Masters are requested to sign blank cargo documents.

Normally completed cargo documents required by the Master will b placed on board prior to sailing.

In the event of a dispute, the receipt of a letter of protest will b acknowledged by the Mooring Master.

Any protests by the Master concerning the quality of cargo should b made before departure and any resulting investigation should be mad before the vessel sails.

Outward Clearance: A tanker will be considered clear to depart Tot ABK Terminal when the crude oil loading documents have bee delivered to the Master, or in the case of E.D.P.

Mail: Official ship's mail and the crew's personal mail may be hande to an Abu Dhabi agent by Total ABK.

PILOTAGE: Compulsory within the Terminal limits. Vessels to b moored at Total ABK Terminal will be boarded by a Total ABK Moorin Master in the Anchorage Area. The Mooring Master will advise the ship Master on approaches to the storage tanker, mooring and unmoorin connecting and disconnecting hoses and all other operations within th Terminal area including all manoeuvring of the vessel. A qualified Dec Officer must be on watch at all times while the vessel is alongside th storage tanker.

RESTRICTIONS: See "Readiness".

MAX. SIZE: Max. 270,000 d.w.t. Max. draft 22.5 m. Depth of water 27 m

RADIO: Initial communication between vessels and Total ABK shou be via Bahrain Radio or Inmarsat, which operates on a 24 hour basi ETA in GMT to be sent 72, 48 and 24 hours prior arrival, through Bahra Radio or Inmarsat.

Communications within 60 Miles of Terminal: Once ships are with 60 miles of ABK Terminal, communication may be established by radi telephone on International Marine VHF Channel 15. This frequency i monitored continuously.

Once contact has been made on Channel 15, further conversatio should be conducted on either Channel 14 (156.7 MHz), Channel 1 (156.60 MHz) or Channel 15 or 17.

Communications after Total ABK Mooring Master has Boarded: A Tot ABK Mooring Master will board incoming tankers in the Anchorage Are and will bring with him portable VHF radio telephone units. From th time onwards, all and any communications between ship and the stora vessel will be conducted by the Mooring Master.

Usual advice of tankers arrival:

Quote

Please advise your ETA in GMT 72, 48 and 24 hours before arrival t Total ABK Abu Dhabi, Telex AH 22347, via Bahrain Radio or Inmars stop Cargo requirements stop Deballasting time if any stop Maximu loading rate acceptable stop Distance in metres from bow to manifo stop 50 miles before arrival please contact terminal by VHF Channel to receive berthing instructions stop Total ABK.

Unquote

Mooring Instructions: If vessels are obliged or instructed to anchor, th should do so in the recommended area about 3 nautical miles from th storage vessel.

ANCHORAGES: An area immediately S.W. of Terminal limits designated as the Anchorage Area, centred on position: L 25° 27′ 54″ N., Long. 53° 05′ E. This co-ordinate represents the cen of a circle with a radius of 0.5 miles which must be used by vess requiring to wait at anchor. Anchoring within the Terminal limits is stri prohibited.

Check with Harbour Master before anchoring as pipe-lay operations may be in progress.

READINESS: After arrival at the Anchorage Area and when the tan is ready in every respect to load, the Master may tender his Notic Readiness.

Notices of Readiness will be received provided the Master shall ha received the Mooring Master on board.

Port Closed: Notices of Readiness will not be accepted during peri when the port is closed. The port is closed when the weather is s that it is too rough for incoming tankers to berth. The decision regar the opening and closing of the port will rest with the ABK Term Superintendent or his deputy.

The port is also closed from 1600 hrs. (L.T.) to sunrise from Marc October and from 1500 hrs. (L.T.) to sunrise from November to Febru

(c) RADIO BEACON/FOG SIGNALS

Radio Beacon	Bridge PP LP-Flare	Aeronautical	Code R.P. 248 kHz – 25 W.

TUGS: Two tugs, each with 80 tons bollard pull are employed by the export tanker when berthing alongside the storage tanker.

MOORING: Weather permitting, Total Abu Al Bu Khoosh Terminal operates only from sunrise to sunset, 7 days a week. Vessels moor port side to the storage tanker "World Trader" equipped with 5 Yokohama fenders on her starboard side, which is moored to the S.P.M. Launch may assist in berthing vessels under the direct control and supervision of the Mooring Master.

Preparation for Mooring: Vessels are requested to have, on their starboard side, a pilot ladder and/or accommodation ladder safely and securely rigged for immediate use and long enough to reach the Mooring Master's tug. Vessel's platform is not more than 10 ft. from the water level and a short pilot ladder, rigged to cover the access to the platform.

Hoses: The hoses are hoisted by flow boom system, connection (16 in.) by storage tanker crew.

MEDICAL: Medical and dental services are not available at the Terminal. In emergencies requiring hospitalisation, the patient will be flown by helicopter to Abu Dhabi.

LOADING: All communications relative to the loading of the vessel shall be routed through the Mooring Master who will remain in contact with the storage tanker constantly via portable VHF units. In case of temporary breakdown of the portable VHF circuit, contact may be continued on International Marine Channels 15 or 17.

Failure of Communications: Should all communications with the storage tanker fail, loading will cease immediately.

Emergency Shut Down: An emergency cessation of loading may be effected by use of the ship's VHF Channel 15.

Loading Rates: Maximum loading rate will be 64,000 bbl./hr.

Gases: ABK crude oil contains H_2S (hydrogen sulphide). This gas quickly deadens the sense of smell so that a dangerous concentration cannot be detected by odour. During loading, gas should be vented off through the tanker's normal venting system. Personnel engaged in ullaging tanks should keep to windward and avoid breathing fumes as much as possible. Resuscitators, breathing apparatus and life-lines should be readily available.

Valve Closure Against High-Speed Loading: No valve which will stop or seriously impair or reduce the flow rate of oil from the storage tanker are to be operated without prior agreement with the Mooring Master. The practice of throttling back on the ship's cargo valves is to be avoided. If a lower rate is required, the storage tanker is to be advised and the pumping rate will be reduced to the required level. The Master will be held liable for any damage arising from the sudden cessation of flow caused by default of the ship. It cannot be over emphasised that to do so can be extremely dangerous and cause extensive damage to equipment.

BALLAST: Due to the exposed location of the crude oil loading berth, vessels are required to carry 40% of their deadweight in ballast and/or cargo for safe handling, having due regard to existing weather and sea conditions. Total deballasting of tanker prior to loading is not acceptable. A vessel found by the Mooring Master to be not adequately ballasted will be rejected.

Clean Ballast: As there are no ballast discharging facilities, vessels must arrive at the Terminal with clean ballast, ensuring that all pipelines, pumps and strainers have been flushed out prior to arriving. The Mooring Master will inspect ship's ballast on boarding and has the power to reject any vessel that he thinks would cause pollution of the sea area, in which case vessel must proceed to sea and return only when ballast is completely free of oil. Any vessel rejected because of dirty ballast will automatically nullify its Notice of Readiness and will lose any priority of position for loading. Ballast discharge should not be commenced without the prior agreement of the Mooring Master.

Inspection During Loading: At night the sea around the vessel shall be adequately lit, as frequent inspection by the Mooring Master will be made during the discharge of ballast. Any pollution whatsoever will be cause for rejection. Similarly, any hull leaks causing pollution during loading will be cause for rejection and the vessel will not be re-accepted unless satisfactory evidence of repairs has been certified by a qualified surveyor.

FRESH WATER, FUEL, ETC.: Bunkers, fresh water, stores, boats for hire, repair facilities, facilities for changing ship's crew are NOT available at the Terminal.

SHORE LEAVE: Not possible.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

CURRENCY: U.A.E. Dirhams (Drhs).

GENERAL:

Radio Equipment: Radio, radar or other electric equipment must not be energised while the vessel is alongside the storage tanker except VHF radios, telephone and communications equipment approved by the Terminal.

Repairs: While berthed at the Terminal, the ship's boilers, main engine, steering machinery and other equipment essential for manoeuvring shall be maintained in a condition to permit the ship to move away from storage vessel at short notice. Repairs or other work which may immobilise the ship should not be undertaken without prior arrangement with the Terminal.

Port Charges: Every vessel loading in the Abu Dhabi areas has to pay Abu Dhabi Government Port Dues. These are calculated according to Abu Dhabi Law.

Agency: Total ABK do not act as Agents. Vessels must have an Agent in Abu Dhabi in case of injuries or illness.

SHIPMASTER'S REPORT: June 1992.

Vessel: 96,000 tonnes d.w.t. (OBO). LOA 243 m. Beam 38.0 m.

Upon arrival, the vessel was asked to anchor in position Lat. 25° 23′ N., Long. 53° 08′ E.

Storage tanker "World Trader" has 5 Yokohama fenders on her starboard side. Pilot boards from an offshore supply vessel, while vessel is at anchor. During berthing, 2 offshore supply vessels are fast, one forward and one aft. Berthing depends upon weather conditions, which are assessed by the Pilot. Understood from Pilot, that if wind speed is in excess of 25 knots, berthing is not carried out.

Storage vessel's distance from flow-boom to stern is about 128 m. Our vessel's stern was almost in line with the storage tanker's stern. Own vessel moored with 4 headlines and 1 back spring forward and 3 sternlines and 1 back spring aft, from own vessel. Additionally, 1 breast line and 1 back spring (forward and aft) is passed by the storage tanker to own vessel.

It is very important to plan loading/deballasting in such a way, so as to maintain at least 40% of deadweight on board at all times.

Cargo surveyors (SGS, Caleb Brett, etc.) require special permits to come on board the vessel, as per local oilfield regulations. Hence sufficient notice must be given, if surveyor is required to attend to the vessel.

No documents are required for Inward Clearance of the vessel, as there are no Customs or Immigration Authorities. At the time of departure, only Bill of Lading copy and other normal cargo documents are handed over to the Master by the outward Pilot.

No Port Clearance is issued by the Terminal.

AUTHORITY: Total – Abu Al Bukhoosh, P.O.Box 4058, Abu Dhabi, U.A.E. *Tel:* 33.55.66. *Telex:* 22347 Totabk Em. *FAX:* 322948. *Cables:* Totabk. *Contact:* Captain G. Le Dez, Head of Terminal and Marine.

AHMED BIN RASHID, Umm Al Qiwain: 25.35 N. 55.35 E. **(See Plan)**

LOCATION: Ahmed Bin Rashid Port is located on the West Coast of the United Arab Emirates some 30 miles North East of Dubai, in the Emirate of Umm Al Qiwain.

DOCUMENTS:
Crew Declaration (2 copies).
Cargo Declaration (Manifest).
Clearance from last Port.
Dangerous Cargo List.

APPROACHES: The entrance channel has a minimum depth of 10 m. and has a width of 100 m. which connects with a swinging basin of 500 m., the whole channel being marked by standard buoys and beacons in accordance with International Regulations.

PILOTAGE: Not available at present.

ANCHORAGES: Anchorages can be obtained off the harbour in depths ranging from 11 m. to 13 m.

RESTRICTIONS: Entry restricted at night time.

MAX. SIZE: Length 210 m., draft 9.8 m.

HEALTH: Usual International Health Regulations to be observed. Any vessel which is suspect should inform Port Authority.

RADIO: All communications on VHF Channels 16 and 69.

BERTHING: *Deep Water Berth:*
Wharf No. 1. 130 m. long, dredged depth 5.5 m.
Wharf No. 2. 115 m. long, dredged depth 7.5 m.
Wharf No. 3. 200 m. long, dredged depth 9.5 m.
Wharf No. 4. 400 m. long, dredged depth 10.0 m.

Bollards are located at 22 m. intervals and fitted with rubber fendering.

Town Wharf: 800 m. long, max. draft 4.0 m. Berth for coasters and small vessels up to 60 m. LOA.

CRANES: Not available. Shore cranes can be hired locally.

STEVEDORES: Services provided wholly by Port Authority. Advice of labour requirements must be received in advance.

MEDICAL: Can be obtained at short notice. Hospital facilities available in Umm Al Qiwain.

FRESH WATER: Limited supplies available at deep water berths, can be provided by road tanker or barges (to be arranged by Agent).

FUEL: Various grades of gas oil and diesel oil can be supplied by barges or road vehicles (to be arranged by Agent).

REPAIRS: All types of deck and engineering repairs are allowed (to be arranged by Agent).

SURVEYORS: Inspector available locally (to be arranged by Agent).

GANGWAY/DECK WATCHMEN: Under Port Regulations there shall always be on board sufficient men to move or take care of vessel.

OPENING/CLOSING HATCHES: Normally carried out by ship's crew.

CERTIFICATES: Safety Construction, Load Line, Cargo Gear, Safety Radio and Safety Equipment.

CARGO GEAR: Load/Discharge effected by ship's gear, shore cranes can be arranged locally.

REPATRIATION: Arrangements can be made.

AIRPORT: Dubai, Sharjah and Ras Al Khaimah Airports, all within 100 km., handling regular scheduled flights.

TIME: Local time is GMT plus 4 hours.

HOLIDAYS: 1st January (New Year's Day) and 2nd December (National Day). Other holidays dependant upon Lunar Calendar (i.e. Idd Ul Adha, Idd Ul Haj).

POLICE/AMBULANCE/FIRE: Call 999 and ask for service required.

EMERGENCY CO-ORDINATION CENTRE: U.A.E. Coast Guards, Tel: 666435.

BANKS: National Bank of Umm Al Qiwain, Tel: 665225/665441.
National Bank of Dubai, Tel: 666151/666154.

STORING: See "Prelims".
1. Yes.
2. Yes, if it does not hinder cargo operations.
3. Yes.
4. Yes.
5. —
6. Yes.

SHORE LEAVE: Possible.

IDENTIFICATION CARDS: Shore passes issued (1 Passport size photo required).

GARBAGE DISPOSAL: Drums provided alongside by Port Authority.

WASTE OIL DISPOSAL: Can be arranged through local agents.

SEAMAN'S CLUBS: None.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.67 (Fixed).

AUTHORITY: Ahmed Bin Rashid Port Authority, P.O.Box 279, Umm Al Qiwain, U.A.E. *Tel:* 06-665882. *Telex:* 69717 ABRPA EM. *FAX:* 06-651552, 665444. *Contact:* M.K.Moosajee, Port Manager.

AGENT: See "Sharjah",

AJMAN, Ajman: 25.25 N. 55.28 E.

PILOTAGE: Pilot boards 3 miles N.W. of breakwater. 48 hours Notice of Arrival required.

RESTRICTIONS: Dredging is taking place between the breakwaters. Work will commence at the S.E. corner of the Eastern Breakwater and proceed to the outer end Roundheads. The dredger will then move to the Western side. The 100 m. cut will then be completed to a depth of 7.2 m. below Chart Datum.

The following restrictions are imposed during operations:
(a) The port will be closed to all navigation during the hours darkness – sunset to 30 minutes before sunrise.
(b) Transit priority will be given to vessels sailing outward from th port up to 0630 hrs. local time.
(c) Between 0630 hrs. and 0730 hrs. local time, priority will be give to incoming vessels.
(d) At all other times during daylight hours, vessels may arrive or sa as required but all must exercise extreme caution while passin the dredger.

The dredger will carry lights and shapes as prescribed for vessels this class.

MAX. SIZE: Max. draft available 5 m. Approach Channel width 100 m

RADIO/VHF: Call Harbour Control on VHF Channel 16, 2 hours prior arrival.

BERTHING: Total quay space 5,000 m.
4 transit sheds of 60 m. × 120 m. available alongside.

Before sailing, all vessels must obtain a Port Clearance Certifica issued by the Department of Port and Customs.

REPAIRS: A "gas-free" and "hot-work" certificate is required fro vessels undergoing repairs to oil-tanks within port limits.

A surcharge may be imposed on vessels undergoing repairs modifications where welding equipment, compressors, etc., are operate from the wharf. Permission to commence this work must be obtaine beforehand from the Port Authority.

GENERAL: *Charts:* BA 2887, 3711. USHO 62390.

AUTHORITY: Department of Port and Customs. *Tel:* 423081, 4464 *Telex:* 69552.

AGENT: See "Sharjah".

ARZANAH ISLAND: 24.47 N. 52.33 E. SBM: 24.46 N. 52.31 E. **(See Pla**

PORT LIMITS: *Port Area:* Contained within the following co-ordinates

"A"	Lat. 24° 50′ 12″ N., Long. 52° 29′ 24″ E.
"B"	Lat. 24° 50′ 12″ N., Long. 52° 37′ 12″ E.
"C"	Lat. 24° 43′ 48″ N., Long. 52° 37′ 12″ E.
"D"	Lat. 24° 36′ 48″ N., Long. 52° 34′ 36″ E.
"E"	Lat. 24° 37′ 00″ N., Long. 52° 29′ 24″ E.

LOCATION:
Port Area and Terminal: Arzanah Island is located at Lat. 24° 47′ N Long. 52° 33′ E. and is the base for export of crude oil. The Port Arzanah is the area defined above.

A tanker terminal and another berth on Arzanah Island for vesse destined to other than the tanker terminal, are located within the po area.

PILOTAGE: Conduct and movement of vessels within the port area a controlled by the Marine Operations Department. A Compa designated Mooring Master is required for the berthing and unberthi of vessels at the Storage Tanker.

Mooring Master: Pilotage is compulsory within the "Port Area" and vessel may enter or depart the port area, berth or unberth at the Stora Tanker or conduct any other manoeuvres of the vessel without pri notification to the Marine Operations Department and without th assistance of a Company designated Mooring Master unless otherwis ordered by the Marine Operations Department. The Compa designated Mooring Master for vessels bound for the Storage Tank will board the vessel at Dalma (Lat. 24° 32.5′ N., Long. 52° 27.5′ E.)

The Mooring Master's function will be to advise the Master of th vessel for the above stated purposes. The Master of the vessel alwa remains responsible on behalf of the vessel's owner for the safety an proper navigation of the vessel.

ANCHORAGES: Anchoring of vessels is prohibited within the port are and terminal area. An area 3.5 miles West of the Storage Tanker in th vicinity of Lat. 24° 46′ N., Long. 52° 27′ E. is designated as th anchorage area.

RESTRICTIONS: See "Berthing".

MAX. SIZE: *S.B.M.:* Max. d.w.t. 280,000 (export tanker). Max. draft 43 Depth of water at SBM 107 ft. Least depth in approaches 48 ft.

Sailing Draft: The draft of loaded vessels leaving the Storage Tanker controlled by the water depth between Dalma Light Float and the No. Buoy in the outer channel.

Minimum under keel clearances recommended by the Mooring Mas are as follows:

D.W.T.	*Minimum Keel Clearance*
Up to 100,000	3 ft.
100,000 to 220,000	4 ft.
220,000 and over	5 ft.

Sailing drafts should always be agreed upon with the Mooring Mas prior to starting to load.

RADIO: The Company cable address is "Zadco – Abu Dhabi" and tel number is 22948 ZDC AUH EM. The Company also maintains ra watch on International Marine VHF Channels 16, 8 and 5, while Arzan Radio maintains VHF watch on Channels 16, 61 and 77.

Notice of Arrival:
Vessels bound for the *STORAGE TANKER* must advise the Compa as follows:

72 HOURS: Not less than 72 hours prior to arrival, the vessel shall se a cable or telex to the Company providing the following informatio
(a) Estimated time of arrival.
(b) Estimated fore and aft draft upon arrival at the port area.
(c) Quantity of oil to be loaded.
(d) Distance from the bow to the cargo manifolds.
(e) Size, number and type of cargo connections.

48 HOURS: Not less than 48 hours prior to arrival, vessels shall send a cable or telex to the Company, reconfirming or giving any changes in the 72 hour notice.

24 HOURS: Not less than 24 hours prior to arrival, vessels shall send a cable or telex to the Company, reconfirming or giving any changes in the 48 hour notice. The 24 hour notice must be as accurate as possible and thereafter should there be any change in the ETA by more than 2 hours notice of such change must be given promptly to the Company.

Not less than 24 hours prior to the vessel's ETA at Dalma, the vessel must maintain a radio watch on R/T frequency 2182 kHz and at least 12 hours prior to arrival at Dalma must maintain a radio watch on VHF Channel 16.

Other frequencies available are:

HF: 2638, 3270, 3710, 3875 and 4136.3 kHz.

VHF: Channels 1 to 28, 60 to 74 and 77 to 88.

Call sign for Arzanah is "Arzanah Radio".

TUGS: *Tugs and Launches:* The Company will have available one or two tugs for berthing or unberthing and for standing by a vessel at the Storage Tanker as may be required by the Master of the vessel or the Mooring Master for which a charge will be made by the Company, whether or not used.

A line handling boat under the direct control and supervision of the Mooring Master will assist in berthing or unberthing of vessels.

BERTHING:

Berthing-Unberthing: Berthing will normally take place only during daylight hours, weather permitting. Unberthing will take place at anytime (day or night), weather permitting. Manoeuvring power must be available on the main engine during berthing and unberthing operations. Mooring Masters will not berth vessels if not properly equipped with satisfactory mooring lines, or if deck equipment is inoperable or if steering gear, telegraphs or whistles are not in efficient condition or if insufficiently or improperly ballasted in the opinion of the Mooring Master. The vessel's Master is required to advise the Mooring Master if any such defects exist or of any peculiarities of the vessel. The vessel will be responsible for the handling of lines and the connection and disconnection of the loading arms with the vessel's crew.

Mooring: Mooring arrangements shall be to the satisfaction of the Mooring Master. Vessels must at all times remain properly secured alongside the Storage Tanker. Moorings must at all times be attended by the vessel's crew, avoiding slack lines or varying tensions on the lines. The use of constant tension winches for automatic self-tensioning to attend mooring lines is prohibited. The Mooring/Loading Master may suspend loading or unloading should there be any failure by the vessel's crew to attend mooring lines as above stated.

Ballast Drafts: Vessels destined for the Storage Tanker should arrive with propeller completely submerged and 8 ft. to 10 ft. trim by the stern. The Mooring Master may refuse to permit berthing of vessels not in compliance with this requirement until the vessel takes on sufficient ballast or changes ballast to meet the requirement.

BALLAST: There are no facilities available for the off-loading of dirty ballast. Only clean or segregated ballast will be permitted to be discharged overboard. The vessel must keep a constant watch on the side of the vessel from which clean or segregated ballast is being discharged. Discharge of ballast must be immediately suspended should there be any indication of discoloration or sheen and immediately reported to the Marine Operations Department. An investigation shall be carried out by the vessel and the findings immediately reported to the Marine Operations Department. Deballasting shall not recommence without the permission of the Mooring/Loading Master.

LOADING: *Crude Oil Cargo Loading:* Loading operations cannot commence until permission has been granted by the Mooring/Loading Master. All operations after such permission is granted in connection with the starting of loading, switching of tanks and topping-off on the vessel will be the responsibility of the vessel. At all times while the vessel is alongside the Storage Tanker there shall be a responsible licenced deck officer of the vessel on deck in charge of all operations on deck.

Prior to loading a pre-transfer conference will be conducted by the Mooring/Loading Master and a responsible deck officer of the vessel who will be in charge of the loading of the vessel. The purpose of the pre-transfer conference is to formulate a transfer plan and ensure that the Storage Tanker and the Export Tanker are ready for safe transfer and handling of the cargo.

The Mooring/Loading Master or Company representative may suspend cargo operations if any of the applicable laws and safety regulations set forth herein are not complied with, the pre-transfer plan is not complied with or if the Company representative/Mooring/Loading Master believes or becomes aware of the existence of any other danger which in his opinion requires suspension of loading.

The vessel's crew will be responsible for handling the loading arms on board the vessel, furnishing and making adaptor connections, removing blind flanges and guiding the loading arms (Chicksans) to the appropriate manifold connections. As a convenience to the vessel the Mooring/Loading Master will furnish advice and guidance in connecting the loading arms to the ship's manifolds.

Crude Oil Cargo: The crude oil to be loaded contains hydrogen sulphide. Breathing the vapours vented from this cargo could be hazardous. Vessel's crew should review the instructions issued by the vessel's Owner regarding this subject. The Company assumes no liability, with respect to loading crude oil bearing hydrogen sulphide.

Pumping Rate: Max. pumping rate using 2 arms. 60,000 b.p.h. Average pumping rate 55,000 b.p.h.

Storage tanker capacity: 1,400,000 bbls. Cargo Arzanah Stabilized Crude, API 43.0. Specific Gravity 0.8109. Reducers: In limited supply.

General Cargo Loading–Unloading: Loading or unloading operations cannot commence until permission has been granted by the Mooring/Loading Master. All operations after such permission is granted in connection with the loading and unloading of the vessel will be the responsibility of the vessel. At all times while the vessel is alongside, there shall be a responsible licenced deck officer of the vessel on deck in charge of all operations on deck.

POLLUTION: The Petroleum Ports Law prohibits the discharge into the water of oily water, garbage, waste or other objectionable materials. The Petroleum Ports Law also requires immediate reporting to the Harbour Master of any leakage or spillage by the vessel. The Law is strictly enforced and violators may be subject to fine and imprisonment.

The vessel's Master is responsible that no oil is pumped or spilled overboard from his vessel in the vicinity of the Port Area. In the event of any spillage or loss of oil from the vessel as the result of any act or omission of the vessel, such as, but not limited to, the pumping of oily water overside from ballast or bilges, or oil spilt during loading. The vessel shall be responsible for all costs and expenses of clean up, and for any damages to property or injury to persons resulting from such spillage or oil loss.

The Company reserves the right to take all reasonable measures to clean up any resulting pollution or contamination on land or sea, but only as a contractor acting on behalf of the vessel or its owner, and will charge the vessel for all costs and expenses incurred thereby.

SAFETY REGULATIONS:

Safety: The Petroleum Ports Law, recommendations contained in the I.C.S. International Safety Guide for Oil Tankers and Terminals covering the loading and discharging of tankers and the safety regulations set forth herein will be strictly enforced while the vessel is in the Port area.

Smoking: Smoking is strictly prohibited on the vessel or the Storage Tanker and Shore Berth except in places specified by the Master which shall not be outside of any of the accommodation areas. The Master is responsible for ensuring that all on board are informed of the selected areas for smoking and for posting suitable notices. Matches and lighters for personal use shall not be carried while outside designated smoking areas and personnel shall be so instructed.

Fire Fighting Equipment: The vessel's fire fighting equipment must be ready for instant use while the vessel is moored. Fire hoses of sufficient length to reach all parts of the vessel must be strung out and connected to hydrants. If the vessel's fire fighting equipment is rendered inoperative for any reason this must be reported to the Loading/Mooring Master immediately.

Fires: The only open flames allowed while the vessel is moored at the Storage Tanker are those in the vessel's boilers and galley equipment. All other open flames are prohibited. Sufficient fire extinguishers must always be provided near the galley.

Engine Room/Boiler Room Precautions:

(a) Combustion equipment – burners, tubes, uptakes, exhaust manifolds, and spark arresters shall be maintained in good working order and kept clean.

(b) Blowing tubes – funnel uptakes and boiler tubes will not be blown while a vessel is moored at the Storage Tanker.

(c) Cleaning solvents – highly volatile cleaning solvents shall not be used in the engine room for any purpose whatsoever.

Doors, Ports: All doors and ports opening on to decks must be kept closed while the vessel is moored. Any doors open for access other than the pumproom doors must be closed immediately after use.

Air-Conditioning: Central air-conditioning working in re-cycling mode and providing positive pressure inside the accommodation is only authorised.

Cargo Tank Openings: All cargo tank hatch covers and ullage port covers are to be kept closed. If tanks must be hand sampled or ullaged the ullage openings must be kept closed except while sampling or ullaging cargo.

Sea Valves: All sea and overboard discharge valves are to be closed and sealed shut prior to the start of any cargo loading operation.

Inerting Tanker Cargo Tanks: All empty cargo tanks or tanks carrying cargo must be pressured and fully inerted with gas having an oxygen content of less than 8% prior to the commencement of loading. The oxygen content of the tank blanket will be checked throughout the loading and loading will be stopped anytime the oxygen level rises above 8%.

Insurance (Towing) Wires: Towing wires of at least 50 m. long are to be secured to mooring fittings and run out at the bow and stern on the vessel's outboard side and held in place on short stoppers with the eye about 1.5 m. above the water so they are readily available to a tug in an emergency.

Bonding Cable: The bonding cable from the Storage Tanker must be attached to the vessel before the loading arms are connected and removed only after the loading arms are disconnected from the vessel.

Electrical Storms: All cargo or ballasting operations shall be suspended during electrical storms in the vicinity of the vessel.

Engine Status: The vessel's main engine, steering machinery and other essential manoeuvring equipment must be kept in readiness at all times to permit the vessel to unberth on short notice. No engine or propulsion machinery repairs may be carried out while the vessel is moored alongside the Storage Tanker. At all times while the vessel is alongside the Storage Tanker there shall be a responsible licensed engineer of the vessel on duty in charge of all operations in the engine room.

Radio-Radar: The vessel's main radio and radar equipment must not be energised while the vessel is handling cargo or ballast alongside the Storage Tanker. The use of intrinsically safe VHF radios for cargo handling and safety operations is permitted.

Scuppers and Drains: All main deck scuppers must be sealed shut and adequate drip pans provided where necessary on deck prior to the start of any cargo operations.

Tug and Small Craft: No tug or small craft are permitted to be alongside the vessel during cargo or ballasting operations without the express permission of the Mooring/Loading Master.

Portable Lamps Electrical Equipment: The use of portable lamps, naked lights or electrical equipment on extension cords is prohibited. Only approved intrinsically safe self-contained flash lights are permitted on deck.

Communications and Deck Watch: A deck watch under the direction of a responsible deck officer equipped with a VHF radio is to be on duty at the cargo manifold of the vessel at all times during the cargo and deballasting operations.

Fire and Emergency Signal: In case of fire or emergency on the Storage Tanker or the vessel, the vessel shall immediately suspend all cargo operations and blow a series of short, rapid blasts on the ship's whistle until aid arrives.

Rat Guards: Rat guards are required only if a vessel is coming from a plague infected area.

Safety Check List: A Safety Check List shall be completed and signed by the Master or Senior Deck Officer on duty on both the vessel and the Storage Tanker before deballasting and starting the transfer of cargo.

Responsibility for Safe Operations: While a vessel is berthed at the Storage Tanker the Master will ensure and be responsible for adherence to all safety regulations generally followed in the Marine Industry as well as those contained herein. It is the responsibility of the Master to maintain safe and efficient conditions aboard his vessel and to ensure that there is at all times on duty an adequate and proper crew under the supervision of licenced officers for the safe and effective operation of the vessel and compliance with these instructions and regulations.

FACILITIES: There are no facilities at Arzanah Island or the Storage Tanker for receiving or storing supplies for vessels, bunker or fresh water supply, launch service, etc.

TIME: GMT plus 4 hours.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

GENERAL: *Regulations:* Shipping operations at Arzanah are governed by the Abu Dhabi Petroleum Ports Law No. 12 of 1973 (Petroleum Ports Law).

Agency: The Company does not provide any ship agency services and there are no ship agencies within the port area. Such services must be separately arranged for by the vessel.

AUTHORITY: Zakum Development Company, P.O.Box 46808, Abu Dhabi, U.A.E. *Tel:* 661700. *Telex:* 22948 ZDC AUH EM. *FAX:* 669448. *Cables:* Zadco. *Contact:* R. Foeillet, Head of Marine Operations.

AGENT: See "Mina Zayed".

DAS ISLAND, Abu Dhabi: 25.09 N. 52.52 E. (See Plan)

Conduct and movement of vessels within the port are controlled by the Port Officer, Das Island.

DESCRIPTION: Das Island lies some 100 miles N.W. of Abu Dhabi City, in the State of Abu Dhabi, largest of the United Arab Emirates. The Island is the base for the export of crude oil by Abu Dhabi Marine Operating Company (ADMA-OPCO), and liquefied gas and by-products by Abu Dhabi Gas Liquefaction Company Ltd. (ADGAS).

PORT LIMITS: The area of authority is encompassed by a line joining the following positions:

From (a) Lat. 25° 14.0′ N., Long. 52° 48′ E., due East
to (b) Lat. 25° 14.0′ N., Long. 52° 57′ E., then due South
to (c) Lat. 25° 07.7′ N., Long. 52° 57′ E., then S.E.
to (d) Lat. 25° 07.2′ N., Long. 52° 58.8′ E., then due South
to (e) Lat. 25° 04.5′ N., Long. 52° 58.8′ E., then due West
to (f) Lat. 25° 04.5′ N., Long. 52° 48′ E., then finally due North to position (a).

All marine orientated activities within this area, all waters, installations, facilities and structures which are, or may be, erected therein are governed by ADNOC – Petroleum Ports Authority (ADNOC – P.P.A.).

DOCUMENTS:

Bills of Health for Ports visited on voyage.
3 Crew Lists.
3 Manifests (1 original and 2 copies).
1 International Maritime Declaration of Health.

Documents and Specimen Forms: Before the P.P.A. appointed Berthing Master commences any berthing operations certain initial documents must be tendered duly signed, timed and dated as applicable, by the Master. The Berthing Master will acknowledge receipt as necessary. These initial documents are in a booklet form and contain:

1. Clean Ballast Declaration.
2. Ship's Particulars.
3. Conditions of Use of Terminal facilities.
4. Safety requirements.

019-MAR-4 Pre-Berthing Declaration.

Additionally vessels loading Condensate Blend Cargoes:

019-MAR-19 H_2S Content in Condensate Cargo.

A supply of these initial documents will be provided at the vessel's first visit to Das Island. On second and subsequent visits the Berthing Master will receive the documents, duly completed, on boarding thereby avoiding any delays to the vessel.

Also see "General".

PRE-ARRIVAL INFORMATION: All vessels calling at Das Island must telex the Pre-Arrival Information below, at least 72 hours in advance, so as to avoid any unnecessary delays.

All Vessels Except Liquified Gas Carriers:

Pre-Arrival Information Required by Port Authority:

Please provide the following information to Petroleum Ports Authority, Das Island, Care ADMA-OPCO, in the same sequential format, at least 72 hours in advance, and update ETA 48 hours and 24 hours prior to arrival.

1. Vessel's name, Port of Registry and Nationality.
2. NRT, GRT and SDWT (please specify SDWT in long tons).
3. ETA Das Island.
4. Arrival and Departure Drafts.
5. Amount of cargo to load.
6. Inerting System operational and in use.
7. Accommodation air-conditioning/ventillating systems operatio with positive pressure.
8. Ballast to be discharged at this port:
   (a) Segregated ballast amount.
   (b) Dedicated ballast amount.
   (c) Clean ballast amount.
   (d) Total time for deballasting before loading or concurrent.
9. Expiry dates of the following certificates:
   (a) Load line.
   (b) Safety Ship Construction.
   (c) Safety Ship Equipment.
   (d) Safety Radio Telegraphy.
   (e) Safety Radio Telephony.
   (f) TOVALOP.
   (g) Civil Liability Certificate (CLC).
   (h) International Oil Pollution Prevention (I.O.P.P.).
   (i) Derating/Derating Exemption.
   (j) Class Certificate.
   Note: Uncomplied conditions on any of the certifica automatically cancel the validity of the certificate.
10. Last port, next port and destination.
11. Master's Name.

Pre-Arrival Information Required by Terminal:

Please advise the following information to ADMA-OPCO separate

1. Confirm suitability of ship's manifold for connecting 16 in. cru hoses.
2. Please indicate and confirm:
   (a) Size and type of ship's forward Panama Lead/Fairlead vertic and horizontal dimensions.
   (b) Internal dimensions and SWL of ship's chain compress stopper – suitable for 3 in. chafing chain.
   (c) SWL of your port hose handling derrick.
   (d) Maximum freeboard – berthing or during deballasting.
   (e) Distance from ship's manifold to bow, to ship's side and heig of manifold over deck.
3. Please rig on the lee side a combination pilot/accommodat ladder for Berthing Master boarding.
4. Confirm acceptance of signing Boycott Declaration to be submitt to Abu Dhabi Supreme Petroleum Council stating that cargo load at Das Island will not be discharged at any port in Israel, Sou Africa or any other boycotted countries.
5. Last loading port in U.A.E. and date.
6. Confirm you accept Early Departure Procedure.
7. Arrival displacement and maximum loading rate required.
8. Voyage number.

Liquified Gas Carriers:

Pre-Arrival Information Required by Port Authority:

Please provide the following information to Petroleum Ports Authori Das Island, Care ADMA-OPCO, in the same sequential format, at lea 72 hours in advance and update ETA 48 hours and 24 hours prior t arrival.

1. Vessel's name, Port of Registry and Nationality.
2. NRT, GRT and SDWT.
3. ETA Das Island.
4. Arrival and Departure Drafts.
5. Amount of cargo to load.
6. Inerting system operational and in use.
7. Accommodation air-conditioning/ventillating systems operatio with positive pressure.
8. Ballast to be discharged at this port:
   (a) Segregated ballast amount.
   (b) Total time for deballasting.
9. Expiry dates of the following certificates:
   (a) Load line.
   (b) Safety Ship Construction.
   (c) Safety Ship Equipment.
   (d) Safety Radio Telegraphy.
   (e) Safety Radio Telephony.
   (f) TOVALOP.
   (g) Civil Liability Certificate (CLC).
   (h) International Oil Pollution Prevention (I.O.P.P.).
   (i) Derating/Derating Exemption.
   (j) Class Certificate.
   (k) IGC/IMO Certificate of Fitness for Bulk Gas Carriers.
   Note: Uncomplied conditions on any of the certifica automatically cancel the validity of the certificate.
10. Last port, next port and destination.
11. Master's Name.

Vessels Loading Condensate:

Pre-Arrival Information Required by Port Authority:

Please indicate and confirm:

(a) All aft accommodation.
(b) Type of venting system – height above deck, location of risers centralised venting system is required, if not advise type a operations of the existing system. Multiple simultaneous vent not permitted.
(c) Operable Inert Gas Automatic Ullage System and closed load systems. Tanks must be inerted on arrival and cargo ta atmosphere should be less than 8% oxygen.
(d) Number of self contained breathing apparatus.
(e) You will load, topping and measure condensate with dip hatch closed.

No deviation from this procedure will be permitted while your ves is within the port limits.

FLARE COMPLEX: A series of 6 flares are located in an arc approximately 4,500 ft. (1,370 m.) North of Das Island. The unlit flares may be brought into service without warning. The Northern perimeter of the Flare Zone is marked by a green conical light buoy, Fl. G. 5 secs., in position: Lat. 25° 11.5′ N., Long. 52° 52.2′ E.

An additional flare is situated on a small jetty extending approximately 400 ft. (120 m.) from shore approximately 2,500 ft. (760 m.) from LNG/LPG Berth No. 4.

Numerous flares are situated onshore on the North and N.W. coasts of Das Island.

All of the flares previously referred to are situated within the Restricted Area No. 1.

APPROACHES: *Entering and Navigation within the Port:* Navigation/movement within the port area is permitted subject to prior permission being granted by the Port Officer. Vessels visiting the port area must have on board a sufficient range of current hydrographic charts relevant to the area. These charts must be kept up-to-date with regard to Notices to Mariners and other notices promulgated for the area through MENAS.

CAUTION:

The Umm Shaif Oil Field is approximately 20 miles East of Das Island.

The Zakum Oil Field is approximately 48 miles S.E. of Das Island.

The Bunduq Oil Field is approximately 15 miles West of Das Island.

The Fields, together with their associated submarine oil and gas pipelines to Das Island are marked upon hydrographic charts pertaining to the area.

It is essential that vessels/craft approaching Das Island do not enter the Oil Field areas or anchor in the vicinity of submarine pipelines.

NOTE: Masters of vessels/craft are advised that actual depths over submarine pipelines are generally less than those charted and vessels passing over these pipelines may have the under-keel clearance substantially reduced.

Use of anchors in the vicinity of these pipelines is strictly prohibited. (See Note: "Pipe-lines" on BA and USHO Charts.)

Approaches to Das Island: Vessels approaching Das Island must navigate with due caution on account of numerous oil platforms and associated submarine pipelines within the waters of Abu Dhabi and neighbouring states. (See Cautions on BA and USHO Charts.)

Vessels passing to the East of Das Island must not pass closer than 2 miles from the Island, and then only with prior permission of the Port Officer and giving due care and attention to vessel movements within the port.

SOUTHERN ROUTE:

Vessels approaching from the South must pass not closer than 3 miles South of oil installations etc., in the Umm Shaif Field, thence towards the pilot/anchorage areas S.E. of Das Island (See "Pilotage" and "Anchorage").

Special attention shall be paid to the traffic routing system which passes between the Umm Shaif and Zakum Oil Fields, and vessels/craft shall navigate in accordance with the requirements of the International Rules and Regulations for the Prevention of Collisions at Sea.

NORTHERN ROUTE:

Vessels approaching from the North should normally pass down the West side of Das Island and keep at least 4 miles to the West and at least 5 miles to the South of the Island. However, vessels may pass to the East of Das Island with permission of the Port Officer but see note above.

DEEP DRAFT VESSELS:

Deep drafted vessels may approach the port via the Deep Water Buoyed Channel (See "Navigation Aids"). The channel is intended primarily for the use of deep drafted vessels sailing from Das Island, but vessels intending to enter the port via this channel should advise 'Das Marine' by radio, of their intentions. Masters are advised that this channel is not for the exclusive use of Das Island traffic and are cautioned to proceed accordingly.

PILOTAGE: P.P.A.-appointed Berthing Masters are the designated representatives of the Port Authority and, as such, are responsible to the Port Authority for the observance and implementation of Standing Instructions for Marine Operations.

The Berthing Master will normally board the vessel approximately 2 miles E.S.E. from Tanker Berth No. 2. The pilot station is at Lat. 25° 08′ N., Long. 52° 55.4′ E.

For vessels entering from the North the Berthing Master may board in a different location. If so, he will advise the Master accordingly via VHF radio.

The Berthing Master will undertake the pilotage, berthing and unberthing of the vessel save that the Master of the vessel shall remain solely responsible on behalf of the Owners for the safety and safe navigation of the vessel at all times.

Tankers and Gas Carriers: Tankers and gas carriers are not permitted to berth at or unberth from any of the berths in Das Island without a P.P.A.-appointed Berthing Master on board.

General Cargo Vessels: General cargo vessels are required to employ a Berthing Master. Vessels are required to use the anchorage area designated for cargo operations (See "Anchorage"), but may anchor in the main anchorage while awaiting weather conditions to improve, availability of lighters or if the designated anchorage is congested.

Small Craft: Craft entering the boat harbour are not required to hire pilotage services, but may do so by prior application to the Port Authority.

Movements of all craft into, within or out of the boat harbour is at the discretion of the Port Officer. Allocation of berths is the sole responsibility of the Port Officer. No craft are allowed to enter, manoeuvre within or sail from the boat harbour during the hours of darkness without the prior permission of the Port Officer.

ANCHORAGES: Designated anchorages are established for use by vessels/craft visiting the Port of Das Island. The use of anchors outside these areas must only be undertaken after obtaining permission from the Port Authority.

Main Anchorage Area: This anchorage area lies to the S.E. of Das Island and is for tankers, gas carriers and other large vessels. The area is encompassed by lines joining the following positions:

(a) Lat. 25° 08.0′ N., Long. 52° 55.4′ E. to
(b) Lat. 25° 07.2′ N., Long. 52° 58.8′ E. to
(c) Lat. 25° 04.5′ N., Long. 52° 58.8′ E. to
(d) Lat. 25° 04.5′ N., Long. 52° 55.4′ E. and finally to (a).

Optional Anchorage Area: An optional anchorage for deep draft vessels is located approximately 1 mile to 1.5 miles N.W. from No. 12 Deep Water Channel Buoy.

General Cargo Vessels: The offloading anchorage for general cargo vessels is situated approximately 6 cables South of Tanker Berth No. 2 in an area encompassed by a line joining the following positions:

(a) Lat. 25° 07.5′ N., Long. 52° 53.00′ E. to
(b) Lat. 25° 08.0′ N., Long. 52° 53.00′ E. to
(c) Lat. 25° 08.0′ N., Long. 52° 53.41′ E. to
(d) Lat. 25° 07.5′ N., Long. 52° 53.63′ E. and finally to (a).

Small Craft and Barges: This anchorage lies to the S.W. of Tanker Berth No. 2, in an area encompassed by a line joining the following positions:

(a) Lat. 25° 08.0′ N., Long. 52° 53.00′ E. to
(b) Lat. 25° 08.4′ N., Long. 52° 53.00′ E. to
(c) Lat. 25° 08.4′ N., Long. 52° 53.23′ E. to
(d) Lat. 25° 08.0′ N., Long. 52° 53.41′ E. and finally to (a).

CAUTION:

(a) Pipe-lines connecting the tanker berths to the shore lie close to the Northern boundary of this anchorage.

(b) Within the small craft anchorage area are mooring buoys, installed by the Company for their own usage. The number of buoys installed and their position are liable to be changed without promulgation of any notices.

The use of these buoys by any craft is subject to permission being granted by the Port Authority. Unauthorised occupancy of these buoys could result in strong action being taken against the craft, and any consequential damage/loss of earnings/incidental expenses etc. incurred by the Company will be for the account of the offending craft.

Holding Ground (Sea Bed): The sea bed around Das Island is rock, covered by a few inches of loose sand. Holding is poor and vessels are urged to exercise due care and pay out extra chain.

Wind and Tide: Prevailing winds are from the N.W. Rise of tide can be up to 2 m. but the usual variation is 1 m.

Also see "VHF".

PROHIBITED ANCHORAGES: Prohibited anchorage areas have been established at Das Island. The use of anchors within these areas is strictly prohibited.

Prohibited Anchorage – South of Das Island: A prohibited anchorage area is established to the South of Das Island in an area encompassed by a line joining the following position:

(a) Lat. 25° 08.38′ N., Long. 52° 52.50′ E. to
(b) Lat. 25° 08.00′ N., Long. 52° 52.50′ E. to
(c) Lat. 25° 08.00′ N., Long. 52° 53.00′ E. to
(d) Lat. 25° 08.50′ N., Long. 52° 53.00′ E. then to shore in
(e) Lat. 25° 08.50′ N., Long. 52° 52.78′ E.

Prohibited Anchorage – Tanker Berth No. 3: A prohibited anchorage area exists within a circular area of radius 1,500 ft. (460 m.) centred on Tanker Berth No. 3 in Lat. 25° 08′ 53″ N., Long. 52° 54′ 07″ E. This is also a RESTRICTED AREA.

RESTRICTED AREAS: Restricted areas have been established at Das Island. Vessels/craft are only allowed to enter these areas for duly authorised operational purposes.

Restricted Area No. 1 and 2: Enclosed by a line joining the following positions:

(a) Lat. 25° 08.83′ N., Long. 52° 52.68′ E. to
(b) Lat. 25° 08.80′ N., Long. 52° 53.10′ E. to
(c) Lat. 25° 08.25′ N., Long. 52° 53.30′ E. to
(d) Lat. 25° 08.30′ N., Long. 52° 53.50′ E. to
(e) Lat. 25° 08.86′ N., Long. 52° 53.30′ E. to
(f) Lat. 25° 09.20′ N., Long. 52° 53.30′ E. to
(g) Lat. 25° 09.55′ N., Long. 52° 53.20′ E. to
(h) Lat. 25° 09.55′ N., Long. 52° 53.00′ E. to
(i) Lat. 25° 10.54′ N., Long. 52° 53.00′ E. to
(j) Lat. 25° 10.54′ N., Long. 52° 52.20′ E. to
(k) Lat. 25° 09.80′ N., Long. 52° 52.20′ E. to
(l) Lat. 25° 09.80′ N., Long. 52° 51.85′ E. to
(m) Lat. 25° 09.00′ N., Long. 52° 51.85′ E. then East to shore.

Restricted Area No. 3: A circular area of radius 1,500 ft. (460 m.) centred on Tanker Berth No. 3 in position: Lat. 25° 08′ 53″ N., Long. 52° 54′ 07″ E. This is also a prohibited anchorage area.

MAX. SIZE: See "Berthing".

HEALTH: Vessels arriving at Das must carry the usual Bills of Health for ports visited on the voyage. Masters of vessels are required to inform the Company if there is any sick person on board or if there has been sickness on board within the week prior to arrival. Pratique is granted by the Port Medical Officer normally through the Berthing Master.

Health Certificate with valid cholera inoculation (if coming from cholera-infected areas) is compulsory.

RADIO: *Arrival Messages:* All vessels calling at Das Island Petroleum Port must adopt the following ETA procedures:

1. ETA and updates are to be sent 72 hours, 48 hours and 24 hours before arrival at Das. Telexes to be directed to Port Officer, Das.

2. The initial ETA message should normally contain, in addition to the ETA Das Island:

(a) Vessels name, port of registry, g.r.t., n.r.t., s.d.w.t. and arrival displacement.
(b) Drafts on arrival and sailing Das Island.
(c) Cargo requirements – loading/discharging plus fuel requirements.
(d) Type of ballast on board on arrival (segregated, dedicated and/or clean ballast, amount) and total time of discharging.
(e) Whether IGS is operational and that vessel already inerted on arrival.
(f) Validity of all applicable certification.
(g) Last port, next port and destination.
(h) Master's name.

In order to expedite Pilot attendance Masters should endeavour to confirm their final ETA to Das Island Port Control on VHF Radio Channel 12, six hours prior to arrival at the anchorage.

Also see "Berthing" – Tanker Berth No. 3.

VHF: Das Marine maintains a 24 hour listening watch on VHF Channel 16 and works Channels 12 and 74.

All communications other than Terminal VHF should be sent through "Bahrain Radio" (A9M).

Das Island radio mast is installed in position: Lat. 25° 08′ 30.396″ N., Long. 52° 52′ 43.903″ E. Red lights visible all round the horizon are established at the top of the mast, 81.8 m. above chart datum.

Vessels Anchoring: Vessels anchoring to await berthing instructions must advise "Das Marine" via VHF Radio of:

(a) Anchoring time (Local Time is GMT plus 4 hours)
(b) Anchoring position (bearing and distance from Tanker Berth No. 2).

All vessels at anchor must keep a listening watch on VHF Channel 16.

When a vessel leaves the anchorage it must advise "Das Marine" via VHF Radio of:

(a) Time departed anchorage.
(b) Reason for departing.

Also see "Pre-Arrival Information".

RADAR: Not available.

TUGS: *Tugs and Mooring Launches:* Three Fire Fighting, Pollution Control and Salvage Tugs are generally available at Das Island to assist in berthing/unberthing vessels at the bulk petroleum and LNG/LPG facilities.

Minimum of 2 tugs used for berthing at Berths No. 2 and 4 and minimum of 1 tug used for berthing at Berth No. 3 (SPM).

NOTE: Only tug's towing equipment shall be used for these operations and only in an emergency situation and in order to avert a potential disaster may ship's equipment be considered for use.

Mooring launches are available for berthing/unberthing operations and for the transportation of personnel.

BERTHING: Tanker Berth No. 1 has been demolished and no longer exists. All structures to this berth have been cleared to sea bed and no obstructions remain. The pipelines still exist to the original berth platform location.

Tanker Berth No. 2:

Platform position: Lat. 25° 08′ 39″ N., Long. 52° 53′ 14″ E.

General: This is a fixed platform berth situated approx. 2,400 ft. (750 East of Das Island. Vessels berth alongside 4 flexible dolphins, a 6 mooring dolphins are provided to receive moorings.

Berthing limitations: Capable of accepting vessels over 16,000 L S.D.W. subject to the following limitations as to berthing:

(a) Ballasted or partially loaded tankers up to a maximum of 165,0 L/T displacement.

(b) Fully loaded tankers up to 130,000 L/T S.D.W. provided t displacement does not exceed 165,000 L/T.

(c) Vessels with a max. draft not exceeding 56 ft. (17 m.).

Minimum depth of water alongside is 67 ft. (20.4 m.) at datum a the maximum permissible sailing draft is 64 ft. (19.5 m.) at datum.

Moorings: A minimum of 8 mooring lines must be available at each e of the vessel.

General mooring pattern for vessels up to 130,000 L/T S.D.W.:
Forward: 3 head lines, 2 breast lines, 1 spring.
Aft: 3 stern lines, 2 breast lines, 1 spring.

General mooring pattern for vessels in excess of 130,000 L/T S.D.
Forward: 3 head lines, 3 breast lines, 1 spring.
Aft: 3 stern lines, 2 breast lines, 2 springs.

Loading/Discharge Rates: Maximum cargo loading rate 32,000 bbls. per 16 in. hose (4,200 t.p.h.), 4×16 in. hoses are available. Maximu fuel oil loading rate is 5,000 bbls./hr. per 10 in. hose (750 t.p.h.), 2×10 i hoses are available. For fuel oil discharge the maximum pressure 100 p.s.i. at ship's manifold (7.03 kg/sq.cm.). (Bunker operations cease in 1989, situation being reviewed).

Control of Loading/Discharge and Safety: Loading/discharge mu proceed to a pre-declared plan. Co-ordination of loading/discharge w be undertaken by the Duty Berthing Master, who will also conduct th necessary safety checks at frequent intervals.

Tanker Berth No. 3 (SPM):

Buoy position: Lat. 25° 08′ 53″ N., Long. 52° 54′ 07″ E.

Additional pre-arrival message: The following message will b transmitted to vessels which are nominated to berth at Tanker Berth No.

Quote:

Present indications that vessel will berth at No. 3 SPM. Ship's derri crane should be rigged on port side.

Ship's manifold suitable for connection of up to 2×16 in. crude a 1×10 in. bunker hoses. Mooring and hose connection by ship's cre Mooring and hose connection equipment shipped on board aft Berthing Masters board. Request accommodation be provided t 2 Berthing Masters whilst on board. Please confirm soonest SWL o hose handling crane/derrick and that suitable forward Panama/fairlea aperture is minimum 24 in. horizontally and 18 in. vertically.

Unquote.

General: Tanker Berth No. 3 is a Single Point Mooring (SPM) situate approx. 7,500 ft. (2,285 m.) East of Das Island. The buoy is moored i 94 ft. (28.65 m.) of water at datum, and is served by a 48 in. crude o submarine pipeline and a 22 in. fuel oil (bunker) submarine pipeline.

Vessels will be required to be fitted with a hose handling crane/derr capable of plumbing at least 2 ft. outboard of the ship's side over th entire length of the portside manifold (including the bunker connectio Minimum SWL of the crane/derrick to be in accordance with the followi requirements.

Less than 100,000 L/T S.D.W. 8 tons.
100,000 – 300,000 L/T S.D.W. 10 tons.
Over 300,000 L/T S.D.W. 12 tons.

Berthing Limitations: Capable of accepting vessels up to 410,000 L S.D.W. subject to the following limitations: Maximum berthing draft o 72 ft. (22 m.). Maximum berthing displacement 410,000 long ton Maximum sailing draft of 79 ft. (24 m.).

(See "Approaches" "Cautions" – Note: Actual depths over submari pipelines).

Mooring at SPM: The fixed mooring at Tanker Berth No. 3 is a 21 i circumference nylon braidline rope, 160 ft. (50 m.) long, terminating a 3 in. diameter stud link chafing chain.

The vessel must have a suitable bow fairlead (24 in.×18 in.) to perm direct connection of the 3 in. diameter stud link chafing chain to a Sm or similar O.C.I.M.F. approved bracket.

Loading Rates: The crude oil loading installation comprises 2×20 i floating hose strings each terminating in 16 in. tail hoses. The fuel o (bunker) loading installation consists of 1×16 in. floating hose str terminating in a 10 in. tail hose. Flanges are to BS 1560.

Various reducers/spool pieces are available, with prior knowledge vessel connections if different from shore fittings. Adequate ship cre and tools must be provided for the safe and efficient connection of hose There is no shore assistance for connecting/disconnecting of hoses.

Maximum cargo loading rate is 46,000 bbls./hr. per 16 in. hose (6,00 t.p.h.), 2×16 in. hoses are available. Maximum fuel oil loading rate 7,000 bbls./hr. per 10 in. hose (1,000 t.p.h.), 1×10 in. hose availab (Bunker operations ceased in 1989, situation being reviewed).

Control of Loading and Safety: Loading must proceed to a pre-declar plan. Co-ordination of loading will be undertaken by the Duty Berthi Master, who will also conduct the necessary safety checks at freque intervals.

LNG/LPG Berth No. 4:

Platform position: Lat. 25° 09′ 22″ N., Long. 52° 53′ 08″ E.

General: This is an ADGAS installation for the transfer of LNG/LPG a related products. Movement of vessels to and from the berth i governed by the Port Authority.

The berth is a fixed platform type and is situated approx. 4,300 (1,300 m.) N.N.W. from Tanker Berth No. 2 Platform. Vessels be alongside flexible dolphins and 7 mooring dolphins are provided receive moorings.

Berthing Limitations: Capable of accepting vessels up to 100,000 L displacement subject to a maximum draft alongside of 46 ft. (14 m Minimum depth of water alongside is 49 ft. (14.95 m.) at datum.

Moorings: A minimum of 8 mooring lines must be available at each end of the vessel.

General Mooring pattern is:

Forward: 3 head lines, 3 breast lines, 2 springs.

Aft: 3 stern lines, 3 breast lines, 2 springs.

Loading Rates: Loading LNG/LPG and associated products is the responsibility of ADGAS. Maximum LNG loading rate is 10,500 cu.m.p.h. Maximum LPG loading rate is 4,000 cu.m.p.h. Maximum Pentane Plus loading rate is 10,000 bbls./hr. (1,200 t.p.h.). Maximum fuel oil loading rate is 4,500 bbls./hr. per 8 in. flexible hose (650 t.p.h.).

Vessels must have crane/derrick rigged on port side to assist with connection of Fuel Oil (bunker) hose.

Control of Loading: Co-ordination of loading is the responsibility of ADGAS. Fuel Oil (Bunker) loading will be co-ordinated by ADGAS. (Bunker operations ceased in 1989, situation under review). After the initial safety check by the Berthing Master, ADGAS Representative will conduct the necessary safety checks at frequent intervals. Please note however that the Master can request the services of the Berthing Master in an emergency to take his vessel off the berth.

Sulphur Berth No. 5: This is a fixed platform berth situated in Lat. 25° 08.9′ N., Long. 52° 53.2′ E.

Vessels berth alongside two flexible dolphins provided with suitable fendering and 4 mooring dolphins, all provided to accept moorings of up to 60 tonnes breaking strain.

Limitations:

(a) Max. arrival displacement 8,500 tonnes.
(b) Max. LOA 130 m.
(c) Max. draft 10.0 m.
(d) Range of manifold – minimum 1.6 m, maximum 6.8 m.
(e) Max. bow to manifold 57 m.
(f) Minimum depth alongside 16.0 m.

Mooring Arrangements:

2 each of headlines and stern lines.
2 each of breasts.
2 each of springs.

Loading: 1×8 in. loading arm fitted with Camlock coupling is provided, heat traced and fully insulated. Maximum loading rate is 700 cu.m./hr.

Small Boat Harbour : Das Island Small Boat Harbour is situated at the South of Das Island. There are a total of 14 berths available at this time, usage of which is governed by the Port Authority/ADMA-OPCO.

Eastern Extension: Consists of 2 berths (No. 1 and 2) which are reserved for use by ADMA – OPCO and direct hire deep sea tugs, also for the importation of petroleum products. Maximum draft permitted is 15.5 ft. (4.7 m.).

Inner Harbour: Consists of 12 berths (No. 3 through No. 14). The facilities are reserved for ADMA – OPCO small craft, Government craft and contracted craft for the loading/discharge of materials and supplies. The maximum permissible draft is 9 ft. (2.7 m.).

GENERAL CARGO OPERATIONS: No loading/unloading facilities exist in the port area for cargo vessels and such vessels must provide all equipment and machinery to facilitate transfer of cargo to/from barges, lighters etc., at the designated anchorage area.

Cargo Manifests: One original and two copies of General Cargo Manifests are required to be supplied by the vessel.

Discharging/Loading: Vessels should arrive with all derricks etc., rigged and ready for cargo handling. Barges and associated craft must satisfy the mandatory requirements of the Port Authority, the Consignee being responsible for the provision and control of barges and associated craft. Cargo transfer will normally be carried out continuously dependent on weather conditions.

Dangerous Cargo: The Port Authority must be informed of any dangerous cargo carried in any vessel arriving within the port area whether it is intended for discharge at Das Island or not. Masters of vessels are requested to confirm that any dangerous cargo being carried is stored in accordance with the "Recommendations for the Carriage of Dangerous Goods in Ships" by the United Kingdom Department of Transport or other recognised authority.

CRUDE OIL LOADING: 2 grades of crude are available on each berth. Zakum Crude average API 40° (approx.), and Umm Shaif Crude of 37° (approx.).

Associated product available at this time is Condensate Blend of API 60° (approx.).

All tankers of 70,000 long tons s.d.w.t. must comply with the IMO 1978 protocol and must employ inert gas system.

Masters of vessels arriving to load Condensate Blend cargoes must sign a Declaration (019-MAR-19) to signify that they realise they are loading a highly volatile cargo which contains dangerous quantities of Hydrogen Sulphide (H_2S) in the gas evolved from the cargo.

BALLAST: There are no facilities for receiving vessel's ballast ashore for treatment. All vessels must have clean ballast for over-board discharge. Clean ballast implies oil-in-water content of not more than 15 p.p.m.

Masters of vessels arriving at Das Island will make a pre-berthing declaration regarding ballast (019-MAR-3).

MEDICAL: A Company Medical Officer and small hospital are available, subject to the Company's discretion, to vessel's crews. Charges for attention, treatment and associated facilities are for the vessel's account.

Masters of vessels must take precautions against heat exhaustion and heat stroke.

Requests for medical attention must be made to the Agency, or through the Duty Berthing Master. Port Authority consent must be obtained.

Personnel allowed ashore for medical attention must carry with them Passports/Seaman's Card and Health Documents and, if necessary, be accompanied by an interpreter (English or Arabic). An Agency representative will accompany them to the Hospital, but they will not be permitted to visit other Das Island facilities.

DENSITY: 1025.

FRESH WATER: Not available.

FUEL: Fuel oil bunkers are not available at all tanker and liquid gas berths.

Small craft on charter to ADMA-OPCO are able to obtain limited supplies of diesel oil, the facility is only available through prior contractual agreement and must be loaded at the small boat harbour.

FIRE PRECAUTIONS: Three fire-fighting tugs available.

REPAIRS: No repair facilities are available at Das Island. No repairs are permitted within port limits without prior written permission of the Port Authority.

DRY DOCKS: None.

SURVEYORS: Not available.

GANGWAYS: Shore gangways are provided at Berths No. 2 and 4, vessel to provide access steps from gangway at ship's rail. At Berth No. 3 vessel must provide accommodation ladder on both sides of the vessel for access.

CUSTOMS ALLOWANCES: No restrictions for tobacco or liquor onboard. Conveyance of alcoholic liquor from any vessel to the shore or from the shore to any vessel, or from one vessel to another, is strictly prohibited.

REPATRIATION: There are no facilities for crews of visiting vessels to join or leave vessels at Das Island. Repatriation for medical reasons may be arranged at Master's request with the recommendation of the Das Island Resident Medical Officer, and the consent of the Port Officer and the Chief of Police.

AIRPORT: ADMA operate a private airport.

TIME: GMT plus 4 hours.

POLICE/AMBULANCE/FIRE: All emergencies: No. 2 Tanker Berth, Tel: 63333. No. 4 LNG/LPG Berth, Tel: 62222.

TELEPHONES: No onboard facilities – fixed berths are linked to Island telephone system. On LNG/LPG Berth No. 4 a ship/shore telephone connection is available.

BANKS: National Bank of Abu Dhabi, Das Island, Abu Dhabi, U.A.E.

STORING: Not available.

SHORE LEAVE: No shore leave is permitted at Das Island. Any crew member who comes ashore unauthorised will be considered as having entered the UAE illegally and as such will be liable to a heavy fine and/or imprisonment.

Shore visit for medical reasons, and in exceptional circumstances as required by the Petroleum Ports Regulations, may be permitted with prior arrangement. The Port Authority must give express consent.

GARBAGE DISPOSAL: No service available.

WASTE OIL DISPOSAL: No service available.

SEAMAN'S CLUBS: None.

REGULATIONS: No cameras allowed on the Island – high security area.

GENERAL: All vessels entering the port of Das Island must comply with the International Agreement on Safety of Life at Sea (SOLAS) and its amendments and all tankers with the IMO 1978 Protocol.

The Masters of tankers/gas carriers must comply with the following:

Pre-Berthing Declaration and Inspection: All vessels arriving at the Port of Das Island must be suitably ballasted and/or trimmed for berthing with regard to weather and existing circumstances.

All vessel's personnel must be familiar with the Das Island Safety Requirements and other applicable Standing Instructions.

Safe and adequate access to the vessel must be provided for the Berthing Master. If the Berthing Master considers the means of access unsafe or unsuitable, the vessel will be delayed until such time as proper access is provided. Any loss will be to the vessel's account.

The requisite initial documents must be completed in full, signed and handed to the Berthing Master prior to commencement of berthing operations.

Permission to berth will not be granted unless the Berthing Master is satisfied that the vessel can safely complete all parts of the operation, including but not limited to, berthing, ballasting, deballasting, cargo transfer and sailing. If for any reason it is deemed necessary to refuse permission to berth, the Port Authority will be informed and a detailed inspection of the vessel will be undertaken. Shortcomings, etc. will be noted and the Master informed of them. If the vessel is unable to rectify the identified faults, it will be removed from the Port Area. Owners/Charterers will be notified accordingly.

Fire Wires (Emergency Towing Wires): Emergency towing/fire wires of sufficient strength and construction are to be provided and secured forward and aft, on the offshore side of the vessel, with the towing eye maintained at 6 ft. (2 m.) above the water level.

Access to Vessel: While at the loading berths all vessels must provide an accommodation/pilot ladder suitably positioned and maintained at 6 ft. (2 m.) above the water level on the offshore side of the vessel.

M.E.N.A.S.: ADMA-OPCO Agency Section is a collection agency for Middle East Navigation Aids Service (M.E.N.A.S.) dues and, on the authority of the Master, dues payable to M.E.N.A.S. are collected and remitted on behalf of the vessel.

Courtesy Flag: The correct courtesy flag for vessels visiting Das Island is the flag of the United Arab Emirates. This flag may be obtained from the Agents.

Notice of Readiness: Prior to commencement of any transfer operation within the Port of Das Island, the Master shall tender, to the Company, a written Notice of Readiness to load/discharge, duly timed, dated and signed by the Master. Receipt of such notice does not necessarily imply acceptance.

Early Departure Procedure: E.D.P. is available to all tankers at Das Island. Tankers not accepting E.D.P. are generally unberthed after completion of transfer and must proceed to the Anchorage Area to complete documentation, where an agent will board under safe access; a boat/tug will be used by agent for transportation with a hire rate based upon the hourly rate.

Note: Vessels loading fuel oil (bunkers) are required to accept E.D.P. to minimise delays to other vessels.

OIL POLLUTION: Any incident of pollution, no matter how small it may be, from a vessel within the Port of Das Island is a contravention of Part VI of the Abu Dhabi Petroleum Ports Law No. 12 of 1973.

In the event of the escape of oil or oily water from any source, operations must be suspended immediately, and every effort made to identify, stop, contain and clean up the pollution. The Port Authority must be informed immediately via the Duty Berthing Master, in order that the Pollution Contingency Plan can be initiated.

Transfer operations will not be resumed until such time as the Berthing Master and the Port Authority are satisfied that the cause of pollution no longer exists and that the affected area is sufficiently cleaned and safe. Oil Pollution incidents that occur within the Port of Das Island will be fully documented and the necessary documents (019-MAR-41) signed by the Master before transfer is resumed.

Masters of vessels/craft are warned that any breach of the provisions of Part VI of the Abu Dhabi Petroleum Ports Law No. 12 of 1973 will render themselves liable to prosecution.

Pollution: The dumping of waste, dangerous, toxic or other hazardous material within the Port of Das Island is strictly prohibited.

AUTHORITY: Abu Dhabi National Oil Company – Petroleum Ports Authority (ADNOC – P.P.A.) Das Island, P.O. Box 898, Abu Dhabi, U.A.E. *Tel:* (02) 6068376. *Telex:* 22284 ADMA EM, 22215 ADNOC EM. *Cables:* ADNOC. *FAX:* Abu Dhabi (02) 660106. *Contact:* Captain I. Kazi, Port Officer, Das Island.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., see "Mina Zayed".

DUBAI (Including Khor Dubai and Hamriya Port): 25.16 N. 55.18 E.

ALSO SEE "PORT RASHID".

COURTESY FLAG: U.A.E. and Dubai.

DOCUMENTS: Following should be airmailed to Agent prior ship's arrival: 2 copies Dangerous Cargo List, Stowage Plan in duplicate, Hatch List in duplicate, 7 copies of Cargo Manifests, 1 copy of each Bill of Lading. On arrival, 4 Crew Lists required.

Immigration: Vessels of less than 3.0 m. draft are expected to berth and report at the Immigration Station on the Customs Wharf to report In and Out. Larger and deeper draft vessels are cleared In and Out by Agents.

APPROACHES: Dubai Beacon Fl. 3 Sec. Port Rashid Lee Breakwater 25° 16.77′ N., 55° E., thence by 5.5 metre channel parallel to the breakwater, entry dolphins lit. Channel depth maintained centre line though opening spans of Al Maktoum and Al Garhud Bridges beyond Al Jadaf Ship Lift in Khor Dubai Lagoon.

PILOTAGE: No organised Pilot service, but Pilot can be arranged by Agents.

ANCHORAGE: Marked by lightbuoy in position 310°, 1.06 miles from Nayif Tower. Recommended anchor to N.E. of lightbuoy in approx. position Lat. 25° 17′ 4″ N., Long. 55° 16′ 16″ E. Depth 36 ft. to 40 ft., holding ground considered poor, bottom sand and coral. The closer ships are able to anchor to the buoy, the faster turn-around on barges will be attained. *Warning:* Occasional strong N.W. winds, known as "Shamal" will make discharging impossible and *it is very important* that ships have engines on "stand-by" during such times. Ships allowed enter and leave anchorage at any time of day or night. Launch service through Agent's ship to shore from anchorage, and ship's own boats can also be used without Authorities' permission.

RESTRICTIONS: All cargo discharged into barges at anchorage. Coasters with drafts of 11 ft. 6 in. or less can enter creek and discharge alongside. Such vessels usually require a tug boat to pilot them into the creek. Tugs available through Agent. Importation of artificial pearls is prohibited. Purchase of liquor forbidden except by permit.

HEALTH: Prior arrival, Masters are required to send a cable to the Port Health Dept. addressed "Quarantine-Municipality-Dubai" on the following lines:

(Vessel's name). . . ETA . . . Hour . . . Date . . .
Crew all healthy request Free Pratique
Master

Normally all vessels declared healthy by the Master are automatically allowed to berth immediately on arrival, and Health Dept. personnel will board vessels after berthing.

Arrival: Ships boarded immediately upon arrival weather permitting, and Masters then have to complete a short Arrival Report. No formalities of any kind with Port Authorities and ships allowed to arrive/sail at any time.

Departure: No Port Clearance is issued in Dubai. A letter will be issued by Agent which may be produced at next port of call instead of usual departure clearance.

RADIO: "Khor Dubai" R/T (VHF MF/SSB) near entrance, 24 hour watch on 2182 kHz (MF/SSB), Channel 16/14 VHF. Controls movements and berthing, broadcasting navigation warnings and weather forecasts.

TUGS: Required, on basis of overall length, for Northern reaches and bridges, details available from Khor Dubai Radio and Agents.

MEDICAL: Qualified doctors available ashore and also a hospital. Most medicines available at fairly low prices. Dentist also available. Walking cases should be brought ashore *in the morning* for treatment, but in emergency, a doctor will board the ship.

BERTHING:

Khor Dubai: 2,300 m. of unnumbered berthing exists on the West Bank of the Khor and 3,300 m. on the East Bank. Depth between 3.0 m. and 5.5 m. Details from "Khor Dubai" Radio. Whereabouts of vessel to be reported on berthing.

Hamriya Port: Main Breakwater Light 25° 18′ N., 55° 20′ E.

Flag: UAE and Dubai.

Documents: The following should be airmailed to Agent prior to shi arrival.

2 Dangerous Cargo Lists.
2 Stowage Plans.
2 Hatch Lists.
2 Freight Manifests.
7 Cargo Manifests.
1 Copy of Bill of Lading.
4 Crew Lists required (on arriva

Approaches: Approach channel and entrance dredged to 6.0 Breakwaters are lit.

Pilotage: No organised Pilot Service, but Pilots can be arranged Agents.

Restrictions: Vessels will not be allowed to remain alongside the qu when not working cargo if other vessels are waiting.

Draft at Berths: There are no berth numbers. However, there a 3 quays. One measuring 450 m. in length with a draft of 4.5 1 – 160 m. and 1 – 900 m., the last 2 with draft of 6 m.

Tugs: Required on basis overall length as instructed by "Khor Dub Radio and arranged by Agents.

Radio: "Khor Dubai" Radio (VHF MF/SSB) near Khor mouth, the stat controls movements, etc. in Mina Hamriya. 24 hours watch on 2182 kH and Channels 16 and 14. Navigation Warnings, weather forecasts, e are also broadcast.

The Port Signal Station (call sign: "Khor Dubai") equipped with VHF a M/F SSB is situated near the entry to Dubai Creek. Vessels shou contact the station by VHF Channel 16 or 12 or on RT 2182 kHz. Sig station is manned 24 hours.

Pratique: Not applicable.

Berthing: Berthing is reported to Khor Dubai Report Station.

Fresh Water: Presently available at one point only. The supply is ma by Port & Customs Office and vessels may directly order th requirement or through Agents.

Fuel: E.G.P.C. supply fuel at bunker point opposite entrance.

Cargo Handling: Port is not involved in the cargo discharge operatio

There is no equipment available in the port such as cranes, fork etc. and if required, to be arranged by Agent.

Neither shed nor yard is available and therefore cargo is accepted direct delivery basis only.

Stevedores: No stevedoring company in the port, labour is arranged Agent.

Telephones: No connections at the quays. However, there a telephones in the adjacent Customs Office.

Lighterage: Available.

Shore Pass: After berthing, all Passports and Seaman's Books shou be surrendered to the Customs Office situated in the port area w 3 copies of Crew List against which shore passes issued. Before sailin of the vessel, a clearance should be obtained from the Port & Custom Office (Launch Section) and produced to the Customs Office releasing the Seaman's Books/Passports.

Lay-By/Laying-Up Berth: 16 bollards available on Lee Breakwater Mediterranean Moor of Lay-by/Lay-up vessels.

Port Authority: Department of Ports & Customs, Government of Dub

DISCHARGE TURN: Priority of discharge given to ships carrying m and/or passengers for Dubai. Ships carrying less than 100 weight measurement tons have priority and are supplied with one barge discharge of cargo immediately on arrival, whether turn is in force not. Should there be congestion, Agents require Stowage Plan show clearly that all Dubai cargo is freely available and Master's signature a request for discharge turn. Based on this, vessels will be registe for turn. Registration can only be performed during office hours.

After confirmed registration, at which will be given a deadline for tu ships may proceed to other ports for discharge, but must return Dub prior time and date given, otherwise turn is lost. Particular cargoes H.H. The Ruler have priority, This should be evidenced by Manifes which will be produced to Customs Authorities in Dubai for approv The cargoes must be accessible for immediate discharge, which shou be verified by stowage plan.

STEVEDORES: Loading/Discharging Rates: Stevedores, tally cler supervisors, etc., will be supplied from shore at the same time as sh are supplied with barges. These people working under vesse supervision and responsibility.

First Shift: from 0800 hrs. to 1800 hrs. Second shift: from 1800 h to 2400 hrs. Third Shift: from 0000 hrs. to 0800 hrs. Very difficult to stevedores to work third shift unless ship will complete within reasonable time into the third shift. First 2 shifts always worked.

Drinking water must be supplied by ship free of charge to all men fr shore but food only to supervisors, tally clerks, watchmen and foreme

Expected outturn working three hooks:

Bagged cargo	400 – 500 tons
Cased cargo	150 – 200 tons
Timber on deck	300 – 350 tons
Timber in hatches	200 – 250 tons

Usually 5 ships can work at one time.

TANKERS: See "Port Rashid".

FRESH WATER: Supplied at the Bunker Berth, otherwise supply is road tanker.

FUEL: 3 small vessel bunker berths by Al Shindaga Fish mark otherwise refuelling carried out by road tanker.

FIRE FIGHTING: No facilities available at anchorage.

CONSULS:

Egypt
Great Britain
India
Iran
Italy
Kuwait
Netherlands
Norway
Pakistan
Qatar
Saudi Arabia
Sweden
Switzerland
U.S.A.

Additional Embassies/Consulates in Abu Dhabi.

REPAIRS: Fully equipped engineering workshops, radar and ra technicians capable of carrying out extensive repairs availa Underwater cleaning, repairs and other works connected with this a available. See also Dubai Dry Dock under "Port Rashid".

DRY DOCK: Two ship-lifts of 450 tons and 2,850 tons (Nominal lift) respectively, plus adjacent berthing, side travellers, etc., are installed at Al Jadaf in Khor Dubai Lagoon on the North West Bank. Over five ship and engine repair companies have workshops in this compound. *Bridge transits* through opening span regulated by time and tide, are arranged with Police/Ship Docking Yard by Agents.

SURVEYORS: Lloyd's.

CUSTOMS ALLOWANCES: *Tobacco:* 1,000 cigarettes or 200 cigars or 1 kilo of tobacco. *Perfumes:* 1 litre of toilet water (Eau de Cologne) and not more than 150 grams of perfume. *Currency:* Unlimited.

REPATRIATION: Visa is required for non-UAE citizens visiting Dubai for a period exceeding 7 days. Agent can assist provided complete Passport details given well in advance. Excepted are British Subjects with right of abode in the U.K. who are permitted to remain in U.A.E. without visas for a period of 1 month. For temporary visitors of other nationalities the Agent can arrange under its sponsorship transit visa valid for 7 days provided the person holds a ticket showing a confirmed flight out of U.A.E. However, person must leave U.A.E. via airport through which he entered.

When advise arrival flight details also advise Seaman's Book number and nationality.

Seven days' transit visa:

From 1st February, 1985 a new form will be used by the Immigration Authorities in Dubai for persons entering Dubai on Transit Visa.

As the form has to be typed out in both English and Arabic it is essential that full details of arriving persons are in hand at least 48 hours prior to arrival.

The information required is as follows:

1. I, the undersigned wish to sponsor the undermentioned who wishes to enter the country for ....
2. Name of the sponsored............ Father's Name ....
3. Nationality .... Passport No....................

Category: Normal/Diplomatic Service.

4. Place and Date of Issue ....Expiry Date ....
5. Place and Date of Birth ....Profession ....

AIRPORT: Regular international scheduled flights. Also domestic flights within Gulf area.

TIME: GMT plus 4 hours.

HOLIDAYS: 1st January; 10th February; 23rd June*; 6th August*; 25th August*; End of Ramadan 3 – 5 days holidays, End August. 1st November*; 21st November*; 2nd December; 25th December.

*Not fixed.

SHORE LEAVE: Officers and crew may come ashore during daylight hours for shopping and recreation. They shall then carry a valid Passport, ID-card or Seaman Book, which will be placed at the Immigration Office when landing. The Passport, ID-card or Seaman Book will be returned upon returning to ship. No alcoholic beverages allowed to be brought ashore.

LAUNDRY: Available but about 2 – 3 days required.

PROVISIONS: Fresh vegetables, frozen stuff, bonded stores, etc., available. Requirements should be given immediately on arrival. (The liquor and beer prices are high.).

GENERAL: Dunnage – not available. Heavy lifts – not available at anchorage. Shore cranes have lifting capacity up to 30 tons.

Weather: Summer months in the 40's Centigrade and humid. Winter months in the 20's Centigrade and dry.

Alcoholic Beverages: Allowed to be stored and consumed on board also in port, while sale of this and pornographic materials is strictly forbidden.

Accommodation: Construction of many hotels completed and rooms in all price ranges are now readily available in Dubai on both the Deira and Dubai side.

Business Office Hours: Normally 0800 to 1300 hrs. 1600 to 1800 hrs. Government offices: 0800 – 1200 hrs. Banks: 0800 – 1200 hrs.

Ship Spares in Transit: Agents in Dubai advise that spares arriving in Dubai even with valid invoice, certificates of origin and packing lists attached are now opened by the Dubai Airport Customs. All Owners and operators are thus warned not to include any items which are banned in boxes containing spare parts as if detected they will be confiscated.

Further to the above, Agents give below a list of prohibited articles:

(a) All pornographic literature, videos, films, pictures.
(b) Alcohol.
(c) Narcotic drugs.
(d) Wireless transmitters.
(e) Firearms and ammunition.
(f) Products of Israeli – blacklisted manufacturers.
(g) Exposed cinematographic (movie) films.
(h) Political and religious literature.

– need prior approval from the Ministry of Information. The Customs are particularly sensitive about video tapes and when found in luggage they are subject to check. The checking is taking time and passengers are kept waiting sometimes for hours. To avoid trouble and irritation strongly recommend that crew arriving Dubai should be advised by principals not to carry any video tapes.

AUTHORITY: Government of Dubai, Department of Ports and Customs, Marine Adviser's Office, P.O.Box 2001, Dubai, United Arab Emirates. *Tel:* 457772. *Telex:* 49787 Khord Em. *FAX:* 00971-4-450810. *Contact:* Captain W. Nelson, Marine Adviser.

AGENT: Gulf Agency Company (Dubai) L.L.C., P.O.B. 2404, Dubai, U.A.E. Tel: 457555 (24 hours service). After office hours 480424, 440193. Telex: 45448, 45809 "Gacdb Em". Cables: "Confidence" Dubai. Fax: 457202, 450644. Radio: Marine VHF radio, stand-by on Channels 16 and 23 and SSB 2182 kHz. Call sing "Confidence Dubai".

Operators of ships' supply service and shipping agency: Crew changes, mail, spares and/or delivery of provisions, fresh water and lube oil, as well as arranging of bunkers.

Owners, Operators and Masters are welcome to contact G.A.C. Dubai by cable or telex regarding requirements and for coordination of rendezvous positions off Dubai, Fujairah and Mina Saqr (Ras Al Khaimah).

FATEH TERMINAL (offshore Dubai): 25.35 N. 54.25 E.

(See Plan)

Oil Loading Terminal of the Dubai Petroleum Company (DPC).

Note: All tankers loading Fateh Terminal cleared by Dubai Petroleum Company, taking care of all necessary documentation concerning cargo. DPC does not charge owners/operators for this service (at the present time). However, for all other agency services DPC refers owners/operators to regular shipping Agents in Dubai.

According present oil company regulations vessels not allowed receive any deliveries or any launch alongside while loading at Terminal. Deliveries of mail, spare parts and performance of crew changes will, therefore, take place at Terminal anchorage, Dubai anchorage, or at a rendezvous point.

Weather permitting, Fateh Terminal operates 24 hours a day, 7 days a week. Weather permitting, and providing berth available, tankers arriving within their laydays will normally be berthed on arrival.

LOCATION: Fateh Terminal consists of the crude oil production and export facilities of the Fateh, S.W. Fateh, Falah and Rashid Fields. The terminal limits are bounded by the following co-ordinates:

(i)	Lat. 25° 38′ 00″ N.	Long. 54° 05′ 16″ E.
(ii)	Lat. 25° 40′ 00″ N.	Long. 54° 30′ 00″ E.
(iii)	Lat. 25° 15′ 00″ N.	Long. 54° 30′ 00″ E.

Within this area the anchoring of vessels is prohibited and the Terminal Safety Regulations have effect.

NAVIGATIONAL AIDS: All platforms, structures, SBMs and floating storage vessels are fitted with a white light Fl. "U" ev. 30 secs. vis. 5 miles and horn every 30 secs. sounding "U" in Morse.

Numerous working lights are also fitted on platforms, etc.

Six flares in position:

(1)	Lat. 25° 35′ 50″ N.	Long. 54° 25′ 50″ E.
(2)	Lat. 25° 35′ 56″ N.	Long. 54° 25′ 20″ E.
(3)	Lat. 25° 35′ 48″ N.	Long. 54° 25′ 18″ E.
(4)	Lat. 25° 29′ 44″ N.	Long. 54° 18′ 29″ E.
(5)	Lat. 25° 33′ 30″ N.	Long. 54° 11′ 30″ E.
(6)	Lat. 25° 21′ 00″ N.	Long. 54° 29′ 00″ E.

The flares give an orange light which may be visible from the Terminal, depending on atmospheric conditions, in addition the flare structures show a white light flashing "U" in Morse every 30 seconds visible for 5 miles.

Numerous small unlit buoys for the use of working craft may be encountered within the Terminal area.

APPROACHES: On approaching Terminal, Masters of incoming tankers should head for Anchorage Area (See "Anchorage") where, under normal conditions, their vessel will be boarded by a DPC Mooring Master.

ANCHORAGE: An area immediately East of Terminal Limits is designated as the Anchorage Area, centred on position as follows:

Lat. 25° 36′ N. Long. 54° 31′ E.

This co-ordinate represents the centre of a circle with a radius of approximately 1 mile which must be used by vessels requiring to wait at anchor. Anchoring within the Terminal limits is strictly prohibited. For reference purposes, the anchorage area bearing from Dubai Trade Centre Light is 298° true, distance 47.8 miles and from Jazirat Sirri Light 185.5° true, distance 18.2 miles.

If a tanker is not scheduled to berth on arrival (e.g. another vessel is in the berth, or the port is closed on account of adverse weather conditions, etc.) Masters will be advised by radio and requested to anchor.

FACILITIES: For the export of crude oil 2 single point mooring buoys have been installed in positions:

SBM No. 1	Lat. 25° 34′ 37″ N.	Long. 54° 28′ 18″ E.
	Bearing 242° true 2.83 miles from anchorage.	
SBM No. 2	Lat. 25° 35′ 12.6″ N.	Long. 54° 24′ 36.6″ E.
	Bearing 262° true, 5.85 miles from anchorage.	

READINESS: After arrival at the Anchorage Area and when the tanker is ready in every respect to load, the Master may tender his Notice of Readiness.

Notices of Readiness will be accepted provided one or other of the following events shall have transpired:

(a) The Master shall have received the Mooring Master on board or;
(b) The Master shall have dropped the anchor in the Anchorage Area.
(c) The tanker is arriving within her accepted laydays.

Port Closed: Notices of Readiness will not be accepted during periods when the port is closed. The port is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with the Fateh Terminal Superintendent or his Deputy.

Order of Berthing: Vessels will normally berth in order of arrival.

DOCUMENTATION: *Documentation and Ship's Agency:* In the normal course of events, DPC acts as tanker Agent and prepares all crude oil loading documents. For these services no charge is made.

Early Departure Procedure: At the Master's discretion. In order to expedite turn-round of vessels in this port and avoid undue delays caused by weather or other circumstances, Masters of vessels on arrival are requested to sign blank cargo documents.

Normally, completed cargo documents required by the Master will be placed on board prior to sailing. If this is not possible without incurring undue delays, the relevant documents will be airmailed to the Master to await the vessel's arrival at her discharge port.

The official cargo, i.e. quantity loaded, will be transmitted by radio whilst unmooring. In the event of a dispute, the receipt of a Letter of Protest will be acknowledged by the Mooring Master. Any protests by the Master concerning the quality of cargo should be made before departure and any resulting investigation should be made before the vessel sails.

Outward Clearance: A tanker will be considered clear to depart Fateh Terminal when the crude oil loading documents have been delivered to the Master, or in the case of early departure, clearance will be given through the Mooring Master.

Mail: Official ship's mail and crew's personal mail will be handled and shipowners debited accordingly.

PILOTAGE: Pilotage is compulsory within the Terminal limits. Vessels to be moored at Fateh Terminal will be boarded by a DPC Mooring Master in the Anchorage Area. The Mooring Master will advise the ship's Master on approaches to the SBM, mooring and unmooring, connecting and disconnecting hoses and all other operations within the Terminal area including all manoeuvring of the vessel. The Master or one of his qualified deck officers must be on the bridge at all times while the tanker is being manoeuvred.

The services of a Mooring Master are provided without charge, upon the express understanding and condition that when any Mooring Master furnished by DPC goes aboard a vessel for the purpose of assisting such a vessel, he becomes for such purposes the servant of the owners of the vessel and DPC shall not be liable for any damage or injury resulting from the advice or assistance given or made by such Mooring Master while aboard or in the vicinity of the assisted vessel.

MAX. SIZE: For SBM-1 and SBM-2, max. size of tanker is 300,000 d.w.t. During Summer months, tankers of up to 350,000 d.w.t. may be accepted at the sole discretion of the Marine Superintendent or his deputy. Max. draft, no restriction. Depth of water 150 ft.

RADIO: *Communications with DPC:* Cable Address: Dupetco, Dubai. Telex: 45557 or 45423 DPC EM.

Initial Communication: Initial communication between ships and DPC should be via Bahrain Radio (call sign "A9M") which operates on a 24 hour basis.

Communications Within 60 miles of Terminal: Once ships are within about 60 miles of Fateh Terminal communication may be established by radio telephone on International Marine VHF Channel 16 (156.8 MHz). This frequency is monitored continuously. Once contact has been made on Channel 16, further conversation should be conducted on Channel 12.

Communications after DPC Mooring Master has Boarded: A DPC Mooring Master will board incoming tankers in the anchorage area and will bring with him portable UHF radio telephone units. From that time onwards all communications between ship and platform will be conducted by the Mooring Master via the portable UHF units, unless owing to failure of portables it is necessary to revert to mains VHF Channels.

Advice of Tanker Arrivals:

Initial Estimated Time of Arrival (ETA): When a tanker bound for Fateh Terminal is within 72 hours of arrival at Fateh Terminal, the Master should notify DPC by cable via Bahrain Radio giving the following information:

- *(a)* Name of tanker.
- *(b)* ETA in GMT (Dubai time is GMT plus 4 throughout the year).
- *(c)* Quantity of cargo required.
- *(d)* Maximum loading rate.
- *(e)* If the ship's hose connections are different from 16 in. or 12 in. standard ASA 150 lb. type, the size should be stated.
- *(f)* Deballasting time (if any).
- *(g)* If vessel proceeding to any port(s) prior to Fateh, and if so, any anticipated delays.
- *(h)* If AKD stopper or Smit towing bracket is fitted, and if so, distance from centre bow fairlead.
- *(i)* Confirm inert gas system is in use and operational.
- *(j)* Indicate if vessel is in possession of an International Oil Pollution Prevention (I.O.P.P.) Certificate.
- *(k)* Sailing draft and corresponding sea water displacement tonnage.

Subsequent ETAs: Sections *(a)* and *(b)* of the above message should be repeated via Bahrain Radio when the tanker is within 24 hours and again when within 12 hours of arrival at the Fateh Terminal.

Unreasonably insufficient or inaccurate ETA messages may alter the order of berthing of ships to the disadvantage of those ships giving sufficient and accurate ETA messages.

Radio Telephone Communication when Approaching Fateh Terminal: When about 60 miles off the Terminal contact may be made by radio telephone on International Marine VHF Channel 16, and communications should continue via this method until a DPC Mooring Master boards.

MOORING: *Preparation for Mooring:* Vessels are requested to have pilot ladder, hoist and/or accommodation ladder safely and securely rigged for immediate use and long enough to meet the Mooring Master's launch. Vessels will provide a lee for the Mooring Master on the port side both when boarding and leaving.

For vessels with a freeboard of 40 ft. or more, the accommodation ladder shall be rigged and lowered down so the platform is not more than 10 ft. from the water and a short pilot ladder rigged to facilitate access to the platform.

Tankers are requested to have ready on the forecastle head the following:

- *(a)* 2 towing ropes, polypropylene or other man-made fibre.
- *(b)* 2 messenger ropes, minimum lengths of 300 ft.
- *(c)* Selection of shackles, wirestrops and tools.

When the approach to the terminal commences, the berthing tug will be available to assist in berthing. The method and position in which the tug will be utilised will be dependent upon the weather and tidal conditions prevailing. At this time, the mooring launch will prepare the mooring and standby at the SBM.

Approach to the SBMs necessarily involves passing, in close proximity, various platforms and other structures. It is therefore imperative that all measures are taken to ensure that there is no loss of power or steering during these manoeuvres.

The mooring launch will be situated about 600 ft. from the SBM with a 10 in. circumference polypropylene pick-up rope secured to the main mooring, which consists of 2×18 in. circumference nylon ropes, connected to a standard O.C.I.M.F. chafing chain and a 40 ft.×3.5 in. circumference pick-up wire rope.

During the approach of the tanker towards the SBM, ship's crew, with the advice of the Mooring Master's Assistant (MMA) will prepare the forecastle for the mooring operation. This will include passin messenger rope through the centre bow fairlead (or other fair designated by the MMA) taking the end to the after port corner of forecastle and, from this point, lowering the end to the waters edge. T mooring attachment will also be prepared, and will be, in order preference:

(a) Bow stopper (AKD).
(b) Towing bracket or futtoch (Smit).
(c) Bitts.

Vessels which, in the Mooring Master's opinion, do not have a suita method of attaching the mooring, will be refused permission to be Should bitts have to be utilised, or should the towing bracket be loca at a substantial distance from the fairlead, wire snotters of 2 in. diame and various lengths are available from the berthing tug.

Upon the close approach of the tankers bow, the mooring launch manoeuvre alongside the port shoulder and attach the mooring pick rope to the ship's messenger line. The tanker will then heave up messenger and pick-up rope, carefully picking up the slack as the tan approaches the SBM. The mooring launch will now be stationed at end of the floating hose string in order to tow the hoses clear of ship's side should this become necessary.

The pick-up rope should be continually hove in as the tanker ne the SBM. The distance between the bow and the SBM wil continuously relayed to the Mooring Master on the bridge by the M from the forecastle and by the berthing tug. When the pick-up wire h been brought inboard through the fairlead, it may be necessary to ad the direction of pull and assist the chain through the fairlead. Ac required by the tanker's crew in this respect will be advised by Mooring Masters Assistant.

When the chain is inboard, depending upon the method of attachm available, the connection will be made. It should be noted that shou Smit Bracket or bitts be utilised, the first triangular plate on the ch must only be connected on tankers of less than 100,000 d.w.t. and vessels of greater size, the chain must be hove in and the connect made on the second, larger, triangular plate.

After the connection to the mooring is made, it may be necessar run the engines astern to ensure the tanker does not contact the SB The Mooring Master will then advise "Finished with Engines", but at time during the tankers stay in port shall the engines be immobilise

Shortly after the mooring operation is completed, the berthing tug be secured from the stern of the tanker on a long ships ro polypropylene if possible.

LOADING: *Lifting Hoses:*

SBM 1: Two 16 in. diameter hoses will be lifted by ship's gear on port side. Each lift is 9 tons.

SBM 2: Two 16 in. diameter hoses will be lifted by ship's gear on port side. Each lift will be 9 tons.

The hoses shall be hoisted and connected by ship's crew. T Mooring Master will advise the ship's officer in charge concerning lif techniques.

Sundry Hose Connecting Equipment: Tankers shall be equipped w the necessary blocks, tackle, wrenches, gaskets, bolts, nuts, etc. efficiently effect the hose connection.

Flange Sizes: 16 in. – 12 in. reducers will come on board the tan with the mooring gear thus enabling tankers with either 16 in. or 12 ASA 150 lb. flanges to connect directly to the Terminal hoses. Fla size 16 in. – 12 in., 16 in. – 10 in. reducers with ASA 150 lb. flang are available if required to enable tankers with 12 in. – 10 in. mani connections to connect to the Terminal hoses.

Communications During Loading: (See "Radio"). All communicatio relative to the loading of the vessel shall be routed through the Moor Master who will remain in contact with the Production Platform constan via portable UHF units. In case of temporary breakdown of the porta UHF circuit, contact may be continued on International Marine Chann 16 or 12 if the vessel is so fitted.

Failure of Communications: Should communication with the Produc Platform fail, loading will cease.

Emergency Shut-Down: An emergency cessation of loading may effected by the ship's VHF Channel 16.

Cargo: Oil loaded at Fateh is Dubai Stabilised Crude with an avera API of 31.7. Loading temperature varies between 90°F in the Winter 100°F in the Summer months. The oil is relatively free of sediment a low in wax and asphaltenes.

Loading Rate: At SBM No. 1 the maximum loading rate is 60,0 bbls.p.h. At SBM No. 2 the maximum loading rate is 70,000 bbls.p.

BALLAST: *Precautions Regarding Pollution:* It is the responsibility the ship's Master to see that no crude (or bunkers', diesel or bilge or dirty ballast is pumped or spilled overboard from his ship whilst in area. Drip pans should be used, especially when disconnecting hos in order to prevent spillage overboard.

Scuppers to be Plugged: Before loading commences, all overs scuppers shall be made oil-tight.

No facilities for Receiving Dirty Ballast: At Fateh Terminal there are slop tanks or facilities for receiving dirty ballast. Tankers must ar with clean ballast. In the event a tanker does have dirty ballast it wil be allowed to be pumped overboard. The dirty ballast will be colle into one tank, measured and left aboard.

Discharging Ballast at Night: During the discharge of ballast in darkne the sea shall be adequately lighted in the area of discharge.

MEDICAL: At Fateh Terminal medical and dental services are available. In emergencies requiring hospitalisation, the patient wil taken by boat from the tanker to the Production Platform, hoisted to upper deck of the platform and flown by helicopter to Dubai. T shipowner will be charged for all expenses incurred.

DENSITY: 1030.

FUEL: Bunker supply not available at Fateh.

Fuel oil (IFO 180 cSt) can be arranged at Jebel Ali. Gas oil can be arranged.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None, offshore terminal.

CURRENCY: U.A.E. Dirhams (Drhs).

GENERAL: The following are not available at Fateh Terminal: Fresh water, stores, boats for hire; repair facilities; facilities for changing ship's crew.

There is no shore leave.

Charts: Charts covering the approach to and the area of Fateh Marine Terminal are:

British Admiralty Nos. 2837, 2887, 2888, 2889.
U.S. Hydrographic Office No. 3647.

AUTHORITY: Dubai Petroleum Company, P.O.Box 2222, Dubai, U.A.E. *Tel:* Dubai 442990. *Telex:* 45423 or 45557 Dpc EM. *Cables:* Dupetco, Dubai. *FAX:* 4062200. *Contact:* Captain F. Maclennan, Marine Superintendent. Captain J.A. Petty, Mooring Master.

AGENT: Gulf Agency Co. (Dubai) L.L.C., P.O.B. 2404, Dubai, U.A.E. Cables: "Confidence", Dubai. Tel: 457555 (24 hours service). After hours 480424, 440193. Telex: 45448, 45809 (Gacdb Em). Radio: Marine VHF radio, stand-by on Channels 16 and 23 and SSB 2182 kHz. Call sign "Confidence Dubai". Fax: 457202, 450644.

Operators of ships' supply service and shipping agency; crew changes, mail, spares and/or delivery of provisions, fresh water and lube oil as well as arranging of bunkers.

Owners, Operators and Masters are welcome to contact GAC Dubai by cable or telex regarding requirements and for coordination of rendezvous positions off Dubai, Fujairah and Mina Saqr (Ras Al Khaimah).

FUJAIRAH: 25.10 N. 56.21 E. (See Plan)

LOCATION: Lat. 25° 10.5′ N., 56° 21′ E., 3 km. North of Fujairah town and 20 km. South of Khor Fakkan.

PORT LIMITS: Within area bounded by a line drawn:– Lat. 25° 09′ 35″ N., Long. 56° 21′ 00″ E. due North to Lat. 25° 10′ 05″ N., 56° 21′ 00″ E., thence due West for 65 m. to the West side of the old road and following the West side of the old road to Lat. 25° 11′ 30″ N., thence due East to Lat. 25° 11′ 30″ N., Long. 56° 22′ 30″ E., thence South to Lat. 25° 09′ 00″ N., Long. 56° 22′ 30″ E., thence due West to Lat. 25° 09′ 00″ N., Long. 56° 21′ 30″ E, thence due West to Lat. 25° 09′ 00″ N., Long. 56° 21′ 00″ E. and include all waters, land and installations contained within that area.

DOCUMENTS: The provisional requirements are:–

Immigration:	Crew List	3 copies
	Passenger List	3 copies
Customs:	Crew List	2 copies
	Passenger List	2 copies
	Cargo Manifests	2 copies
	Alcoholic Beverages/ Bonded Stores List	2 copies
Port Operations:	Cargo Manifests	2 copies
	Stow Plan/Hatch List	2 copies
	Dangerous Cargo List	2 copies
	Transhipment Cargo	2 copies
	Heavy Lift List	2 copies
	Ro/Ro Discharge List	2 copies
For Inspection:	Last Port Clearance, Ship's Log.	
Certificates:	Safety Equipment, Construction, Load Line, Radio, Oil Record Book.	

All documents relating to cargo should be forwarded prior to vessels' arrival.

PILOTAGE: Compulsory, except for 'Country Craft' and M.E.N.A.S. tender.

Notice of ETA and request for a Pilot must be made not less than 24 hours before ETA at Fairway Buoy via vessels' Agents. Pilot launch will keep listening watch on VHF Channel 16, 2 hours prior to ETA. Pilots work on VHF Channel 12.

The Pilot boarding point is 1 mile S.E. of the Fairway Buoy. Pilot boarding arrangements must be according to IMO Rules. Vessels awaiting a Pilot must anchor East of Long. 56° 25′ E. approx. 3 miles offshore. There is good holding ground in 40 m. to 59 m. of water.

RESTRICTIONS: *Draft Restrictions – Main Quay:*

1. Vessels with a draft of less than 11.5 m. can be moved at any state of the tide.
2. Vessels with a draft of between 11.5 m. and 12.0 m. can only be moved from 5 hours before to 4 hours after predicted HW.
3. Vessels with a draft in excess of 12.0 m. can be moved only at a time agreed by the Harbour Master.

Any variances to the above restrictions will be agreed by the Harbour Master, Port of Fujairah.

ANCHORAGE:

Notice to Mariners No. 042 – Amendment to Fujairah Offshore Anchorage Area:

The Fujairah Ports Authority has made amendments to the geographical co-ordinates of Fujairah Offshore Anchorage due to reasons given below:

(1) Directive has been received from the U.A.E. Coast Guard, which advise us to prohibit vessels anchoring within the Coastal Clear Zone that extends 4 nautical miles seawards from the shore line.
(2) To reduce congestion experienced currently at the 'B' Anchorage area and problems of manoeuvring reported by the Shipmasters, particularly of VLCC and ULCC vessels.

Listed below are the revised geographical co-ordinates of the anchorage area, designated for vessels to anchor according to their nature of calls.

(1) "A" Anchorage: For vessels awaiting orders or long term expected stay. There will be a minimum manning scale for these vessels: 1 qualified Master, 1 experienced Deck Officer, 1 qualified Engineer, 1 Motorman, 2 A.B's and 1 Cook.
Total (13) anchorages.

Co-ordinates:	Lat. 25° 18′ N.,	Long. 56° 26′ E.
	Lat. 25° 14.5′ N.,	Long. 56° 26′ E.
	Lat. 25° 14.5′ N.,	Long. 56° 27.5′ E.
	Lat. 25° 15′ N.,	Long. 56° 27.5′ E.
	Lat. 25° 15′ N.,	Long. 56° 28′ E.
	Lat. 25° 18′ N.,	Long. 56° 28′ E.

(2) "B" Anchorage: For vessels that require bunkering services and S.T.S. operations.
Total (30) anchorages.

Co-ordinates:	Lat. 25° 15′ N.,	Long. 56° 27.5′ E.
	Lat. 25° 10.5′ N.,	Long. 56° 27.5′ E.
	Lat. 25° 15′ N.,	Long. 56° 32′ E.
	Lat. 25° 10.5′ N.,	Long. 56° 32′ E.

(3) "C" Anchorage: For vessels that require offshore services such as crew changes, stores, water, underwater hull clearing, etc.
Total (13) anchorages.

Co-ordinates:	Lat. 25° 14.5′ N.,	Long. 56° 25.5′ E.
	Lat. 25° 10.5′ N.,	Long. 56° 25.5′ E.
	Lat. 25° 14.5′ N.,	Long. 56° 27.5′ E.
	Lat. 25° 10.5′ N.,	Long. 56° 27.5′ E.

(4) "D" Anchorage: For vessels carrying hazardous cargoes and explosives.
Total (6) anchorages.

Co-ordinates:	Lat. 25° 18′ N.,	Long. 56° 28.5′ E.
	Lat. 25° 15.5′ N.,	Long. 56° 28.5′ E.
	Lat. 25° 15.5′ N.,	Long. 56° 30.5′ E.
	Lat. 25° 18′ N.,	Long. 56° 30.5′ E.

(5) "W" Anchorage: For vessels waiting for inbound berth space within Fujairah Port.
Total (6) anchorages.

Co-ordinates:	Lat. 25° 10.5′ N.,	Long. 56° 23.5′ E.
	Lat. 25° 09.5′ N.,	Long. 56° 23.5′ E.
	Lat. 25° 09.5′ N.,	Long. 56° 26.5′ E.
	Lat. 25° 10.5′ N.,	Long. 56° 26.5′ E.

Vessels arriving to anchor will be allocated their respective anchorage area, and geographical position plus bearing and distance from the North Breakwater Light.

Vessels arriving at the anchorage must have to inform, by VHF, the Fujairah Port Control, 2 hours before their arrival and provide following information: Vessel name, vessel type, vessel condition, anchorage position and time, vessel agency, nature of call, last port, next port and ETD. Also, when sailing from the anchorage area, the vessel has to report the departure time and destination.

MAX. SIZE: Ships up to 280 m. LOA and 12.5 m. draft can be accepted.

HEALTH: Normal quarantine regulations apply. Radio Pratique can be obtained, via the vessel's Agent, providing the Master can state that no serious illness has occurred on board during the preceding 30 days.

RADIO: *Notice of Arrival:* Vessels should advise their ETA, Fujairah, at least 72 hours prior to arrival, giving draft, LOA and details of cargo operations. Agents should re-confirm 24 hours prior to vessels' arrival.

Also see "Health".

VHF: Fujairah Port Authorities, call sign "Fujairah Port Control" equipped with Marine Band VHF Radio Telephone Transceiver maintains continuous watch on Channels 16 and 12.

Vessels should establish radio contact with Fujairah Port Control Station if they intend anchoring in Fujairah Waters or are proceeding to Fujairah Port.

Following Channels are used by the Fujairah Port Authorities:

Station	*Hours of Watch*	*Channel*	*Function*
Fujairah Port Control	24	16	Distress, Safety and
		10	Calling Frequency
Fujairah Port Operations	24	9	Pilot Services
Tugs	24	8	Berthing/Unberthing
Working Channels	24	10&11	

Vessels in the Fujairah area are reminded not to use the above Channels except for the purposes specified.

RADAR: Port Control is equipped with radar. The pilot launch is equipped. However, fog is almost unknown though visibility is restricted by dust mainly – July and August.

TUGS: The use of tugs will be compulsory except at discretion of the Harbour Master. 2 tugs of 16 tonnes bollard pull are in operation fitted with foam monitors. A third tug of 31 tonnes bollard pull is also in service.

BERTHING: There are 4 berths on the Main Quay 780 m. long with a least depth of 12.5 m. for 600 m. and 10.6 m. for 180 m. This is a concrete capped and concrete blockwork constructed quay with rubber fendering.

There is a further 290 m. of quay with a least depth of 7 m. suitable for country craft and shallow draft vessels. This is a concrete capped sheet piled quay with continuous timber fendering.

There are 2 jetties for rock and aggregate cargoes.

There is a transit shed with 12,000 sq.m. of floor space with LCL facility.

PORT EQUIPMENT:

Equipment	*No.*	*Capacity*
Quay Cranes	3	40.0 tons
Quay Cranes	1	40.6 tons
R.T.G.	7	40.6 tons
Mobile Cranes	2	25 tons
Toploader	6	35/40 tons
Empty Handlers	5	12 tons
Forklifts	7	5 tons
Forklifts	5	2.5 tons
Ro-Trucks	27	50 tons
Trailers	25	1×45, 1×40 or 2×20 tons
Low Bed/Goose Neck Trailers	32	Different capacities.

Quay Crane Limits:

Maximum SWL:	3×40 tons	1×40.6 tons
Outreach from face of fenders:	2×34.5 m., 1×40 m.	1×40 m.
Height from Quay to U/Side of Spreader:	2×26.2 m., 1×29.3 m.	1×30 m.

Reefer Storage: 160 points × 200 volts. 80 points × 38 volts.

Open Storage (container or general cargo): 54,000 sq.m. paved storage area.

STEVEDORES: The port will work on a 24 hour 7 day week basis. Requirements for port labour must be submitted to Operations Department by 1200 hrs. prior to to day required.

MEDICAL: Hospital facilities are available.

FRESH WATER: Good potable water is available and supplied by road tanker or water barge by prior arrangement through agents.

FUEL: Gas oil available ex-jetty. Fuel oil by prior arrangement through local Agent – supplied by bunker barge.

REPAIRS: Routine maintenance of medium engineering type is available. Offshore hull cleaning and repairs available.

SURVEYORS: Classification Societies and Surveyors can be brought from Dubai at short notice.

HATCHES: Rigging ship's gear, opening and closing of hatches, are the responsibility of the vessel.

REPATRIATION: This is permissible via Dubai and Sharjah International Airports, about 1.5 hours by road. Valid Seaman's Book and Passport required.

AIRPORT: Fujairah International Airport is a few minutes drive from City Centre. Gulf Air operate a flight on Thursday to and from Bahrain.

DRY DOCKS: None.

TIME: GMT plus 4 hours permanent.

SHORE LEAVE: Shore leave is permitted.

HOLIDAYS: 1st day of Id Al Fitr, 1st day of Id Al Adha.

TELEPHONES: This service will be available aboard ships at the quay by prior arrangement through Agents.

SHIP SERVICING: Gulf Agency Co. operate ship servicing along Lat. 25° 10′ N. See "Agent".

Barwil Shipping Services, Fujairah. Tel: 224800/224801. Telex: 89040.

Fujairah Maritime & Mercantile International, Tel: 228238/228239. Telex: 89017 Gray Fu Em.

Fujairah National Shipping Agency. Tel: 228151. Telex: 89040.

BANKS: Abu Dhabi Commercial Bank. Tel: 223052.
National Bank of Abu Dhabi. Tel: 222633.
National Bank of Fujairah. Tel: 224513.
Bank of Oman. Tel: 222493.
Bank Melli Iran. Tel: 222551.
Bank Saderat Iran. Tel: 222241.
Bank of Baroda. Tel: 222730.
Union National Bank. Tel: 222747.
British Bank of Middle East (BBME). Tel: 222221.
Arab Bank. Tel: 222802.

GARBAGE DISPOSAL: Garbage service is compulsory. Skips are provided alongside at Drhs 35 per collection, which is made upon request from ship. Arrangements can be made through Port Operations Dept. Tel: 09-228800, Extension 220.

WASTE OIL DISPOSAL: Service available from local agents.

SEAMAN'S CLUBS: A duty free shop selling wines, spirits, beers, cigarettes, cigars, electrical goods, cameras, luxury goods, gift items, and providing refreshments, snacks, darts and pool is available.

CURRENCY: U.A.E. Dirhams (Drhs).

GENERAL: Derat Exemption Inspectors are available.

Ship Chandlers: Complete chandlering facilities will be available.

SHIPMASTER'S REPORT: March 1985.

Called for bunkers (ex-barge) also crew changes.

Anchorage: Instructed by bunker barge to anchor 3 miles East of breakwater entrance in 25 fathoms of water, good holding ground, 6 shackles of cable used.

Stores: Fresh provisions are available by prior arrangement with Agent.

Repatriation: Any crew joining/leaving are landed by fast launch and then taken by minibus to/from Dubai (about 2 hours drive).

Time: GMT plus 4 hours – permanent.

VHF: Agency (Gulf Agency), Port Control and bunker barge all have VHF, contact initially Channel 16 then shift to working frequency.

AUTHORITY: The Fujairah Ports Authority, P.O.Box 787, Fujairah, U.A.E. *Tel:* Fujairah 228800. *Telex:* 89085 Fport Em. *Fax:* 228811 (Administration), 228555 (Operations), 228022 (Marine). *Contact:* Captain R.M. Saunders, General Manager. Captain Tamer Masoud, Harbour Master.

AGENT: Gulf Agency Co. (Fujairah) PVT. W.L.L., P.O.Box 590, Fujairah, U.A.E. Cables: "Confidence", Fujairah. Telex: 89046 ("Gacfuj EM"). Tel: 228300, 228301 (24 hour service). After hours 222597. Fax: 228269.

Operators of ships' supply service and shipping agency: Crew changes, mail, spares and/or delivery of provisions, fresh water and lube oil, as well as arranging of bunkers.

Owners, Operators and Masters are welcome to contact G.A.C. Dubai by cable or telex regarding requirements and for coordination of rendezvous positions off Dubai or off Fujairah.

HAMRIYAH, Sharjah: 25.35 N. 55.24 E. (See Pla

LOCATION: Hamriyah Oil Terminal is located in the Emirate of Sharj United Arab Emirates, and consists of a shore tank with related onsh facilities, an offshore loading berth composed primarily of one sin point mooring buoy and a 30 in. submarine pipeline which runs from shore tank to the loading berth. The shore tank is located outside village of Hamriyah on the coastline between Umm Al Qaiwain a Ajman in approximate position Lat. 25° 29.5′ N., Long. 55° 30.7′ E. T loading berth is located in 71 ft. of water and is situated in an open a unsheltered roadstead approximately 7.6 miles offshore on a bearin approximately 308° (T) from the shore tank and in approximate posi Lat. 25° 34′ 31.68″ N., Long. 55° 24′ 5.8″ E.

Hamriyah Oil Terminal is owned by Amoco Sharjah Oil Company a is operated 24 hours a day, 7 days a week, weather and oth circumstances permitting. Vessels are loaded and unmoored at a hour, weather and other circumstances permitting. Vessels are moo during daylight hours only, weather and other circumstances permitt *Company's Facilities:* The Company's administrative offices are loca in the town of Sharjah and the Company's terminal offices, storage ta and laboratory for testing stock are located onshore near the village Hamriyah.

FLAG: Vessels are required to fly the flag of the United Arab Emira on the foremast during daylight hours while in Sharjah waters. T Sharjah territorial waters extend 12 nautical miles seaward from t Sharjah coastline.

DOCUMENTS: The following documents are required when calling Hamriyah Oil Terminal:
Health Declaration.
Crew List.

PILOTAGE: *Mooring Masters:* Vessels to be moored at the load berth will be boarded by 2 Mooring Masters about 3 miles due North the loading berth in approximate position Lat. 25° 37.5′ Long. 55° 24.1′ E. The Mooring Masters will be provided by t Company and vessels will not be allowed to approach or depart fr the loading berth without the Company designated Mooring Maste being on board. The Mooring Masters will advise vessel personnel the approaches to the loading berth; the operations of mooring a unmooring; the raising, connecting, disconnecting and lowering of t floating cargo hose and in all other operations within the loading be area. All manoeuvring of vessels within the loading berth area shall performed by vessel personnel as directed by the vessel's Officer charge and in accordance with the procedure advised by the Moor Masters.

Vessels are required to have a clean and efficient pilot ladder fi with spreaders and manropes, safely and securely rigged, ready for t Mooring Masters to immediately embark and disembark on the port s of the vessel and of sufficient length to reach the Mooring Maste launch. At night, adequate lighting must be rigged overside for t Mooring Masters to approach or depart from the port side of the ves and to use the pilot ladder safely. A lifebuoy with safety line and se igniting light together with a rope messenger for the Mooring Maste bag shall also be available at the pilot ladder head. Vessels shall aff a "Good Weather Lee" and shall reduce speed as directed by t Mooring Masters in order to effect the safe embarking or disembark of the Mooring Masters.

Whenever, as in the case of large vessels in light condition, the hei of the deck above the water exceeds 30 ft., the accommodation lad shall also be used in conjunction with the pilot ladder and shall lowered to about 12 ft. above the water with the pilot ladder rigg immediately adjacent to the bottom platform of the accommoda ladder. A mechanical hoist of an approved pattern shall be conside an acceptable alternative to a conventional pilot ladder for use conjunction with the accommodation ladder, but a mechanical ho whose operation relies upon a single wire shall not be considered of approved pattern. The rigging of the pilot ladder for the embarkation a disembarkation of the Mooring Masters shall be supervised by responsible vessel Officer and shall be effected so that the ladder well clear of any overboard discharge and so that each step of the lad rests securely against the vessel's side. If, in the opinion of the Moor Masters, the pilot ladder is not safe, the Mooring Masters may refu to board the vessel and any delay caused by such refusal shall be the vessel's account.

Vessels shall provide food for the Mooring Masters while on boa the vessel and shall accommodate the Mooring Masters in cab equivalent to that required for an officer of the vessel. The Moor Masters shall have access to the bridge and/or central area of the ves and such areas shall not be locked or otherwise arranged to prev immediate entry at any time by the Mooring Masters.

Vessels shall also provide accommodation and food for the Ca Inspector.

ANCHORAGES: The customary anchorage area for vessels awa the loading berth at Hamriyah Oil Terminal is a circle 2.0 miles diameter and with its centre located 3 miles due North of the load berth in approximate position Lat. 25° 37.5′ N., Long. 55° 24.1′ Anchorage within 2 miles of the loading berth or of the 30 in. subma pipeline which runs from the shore tank to the loading berth is prohib unless otherwise designated by the Company or the Mooring Mas

HEALTH: The rules governing the quarantine of vessels are the sa as those found in other parts of the world.

MAX. SIZE: Max. draft 16.0 m. Maximum displacement at any tim 150,000 tonnes.

Also see "Berthing".

RADIO/VHF: *Initial Radio Communications:* The radio station at Ba will handle the initial radio communications between vessels and Company. The station call sign is "A9M" and the station operates o 24 hour basis.

Advice of Arrival: It is important that vessels establish radio contact the Company and with Lamnalco (Sharjah) Ltd. when 3 days dis from Hamriyah Oil Terminal and maintain such contact until just prior to arrival at Hamriyah Oil Terminal. Vessels should send an ETA telex to the Company (Telex: 68685 Amcosh EM) and Lamnalco (Sharjah) Ltd. (Telex: 68433 Lamshj EM) not less than 72 hours prior to arrival at Hamriyah Oil Terminal, providing the following information:

1. The ETA;
2. The estimated draft, fore and aft, upon arrival;
3. The quantity of crude oil to be loaded and the grade of such;
4. The estimated sailing draft and displacement;
5. The last port of call;
6. Whether the vessel has a clean Bill of Health;
7. The distance from the bow to the centre of the vessel's manifold.

This first ETA message should also include a definite statement of the details of any equipment required from shore for connecting the floating cargo hose to the vessel's manifold. Further ETA telexes should be sent to the Company and Lamnalco (Sharjah) Ltd. when the vessel is 48 hours and 24 hours distant from Hamriyah Oil Terminal confirming or giving notice of any change in the 72 hour ETA and at any other time after the 24 hour ETA telex when a change by more than 2 hours occurs in the ETA. The 24 hour ETA telex should include a positive statement regarding the vessel's readiness to load on arrival and the number of hours that will be required by the vessel to discharge clean ballast. Local time is GMT plus 4 hours and Daylight Saving Time (Summer time) is not applicable.

Ship-To-Shore Communications: The Company and Lamnalco (Sharjah) Ltd. are equipped with VHF radiotelephone using international frequencies and maintain a radio watch on the international VHF Marine Channel 16 and on Channel 74. Not less than 12 hours prior to the vessel's ETA at Hamriyah Oil Terminal, the vessel is required to maintain a radio watch on R/T frequency 2182 kHz and on VHF Channel 16. Masters are recommended to use this facility as soon as the vessel is within range since such communications are the best means of avoiding delay in the mooring of the vessel. While a vessel is at the loading berth, the Mooring Masters will be in direct charge of the portable VHF ship-to-shore radiotelephone and all ship-to-shore communications will be by portable VHF radiotelephone. The use of the vessel's radio station and/or battery charging equipment is prohibited during cargo loading operations.

Radio Watches: While at the anchorage awaiting the loading berth, vessels should maintain a listening watch on R/T frequency 2182 kHz and on VHF Channel 16 with the Company and Lamnalco (Sharjah) Ltd.

TUGS: *Mooring Launch:* The Company will provide a mooring launch which is owned by Lamnalco (Sharjah) Ltd. to assist in the mooring and unmooring of the vessel. The mooring launch will be harboured in the town of Sharjah at the boat pier used by Lamnalco (Sharjah) Ltd. and will operate under the direct control of the Mooring Masters.

BERTHING: Tenders to load crude oil will normally be accepted and the loading berth will be assigned to a vessel in the order of its arrival, provided the vessel has a nomination for crude oil valid at the time and is in all respects equipped and ready to moor. In the event that mooring is delayed on account of weather, the vessel will keep its position in line. Should the vessel be required to leave the area on account of weather, the vessel should keep in radio contact with Hamriyah Oil Terminal in order to make the vessel available as soon as the weather moderates. The Company reserves the right to load vessels "Out of turn" following the return of good weather, to the extent that such loading "Out of turn" does not materially delay the loading of other vessels in line. For example, should weather make it necessary for a specific vessel waiting at the loading berth or at the anchorage to vacate the area, the Company may load another vessel which arrived at the anchorage after the specific vessel but before the return of the specific vessel which was waiting in line ahead of the the other vessel.

When the vessel proceeds to within a reasonable distance from the loading berth and upon advice from the Mooring Masters, the mooring lines of the vessel will be carried by the launch to the floating buoy lines, secured thereto, and brought on board the vessel. On the vessel's end of the mooring lines there is a steel chafing chain which can be observed when the floating buoy lines come out of the water. This chafing chain will be secured to the vessel's bitts by way of Company-supplied mooring strops in such a manner that the floating buoy lines shall remain outside the vessel, thereby allowing the chafing effect at the fairleads to be taken by the chafing chain. All mooring details and the sequence of movements shall be directed by the vessel's Officer-in-charge, following consultation with the Mooring Masters. When the mooring operations have been completed, fire wires of at least 150 ft. in length will be secured to the vessel's bitts and run out at the bow and stern of the vessel's starboard side and held in place on short stoppers with the eyes approximately 6 ft. above the surface of the water, so that they can be readily available to a tug in case of an emergency.

Loading Berth: Vessels are loaded by means of a 30 in. submarine pipeline which runs from the shore tank to the loading berth and by means of a floating cargo hose which runs from the loading berth to the moored vessel.

Vessels meeting the following requirements will be accepted at the loading berth:

(1) Maximum draft is 16.0 m., at any time.
(2) Maximum displacement of the vessel is 150,000 metric tons, at any time.
(3) If deballasting is required by the vessel, the vessel must either deballast and load cargo simultaneously or after completion of loading.

In exceptional cases, vessel in excess of these requirements may be allowed to berth at the facility, provided written permission has first been obtained from the operators.

Mooring Facilities: The Single Point Mooring Buoy moors vessels from the bow and consists primarily of a cylindrical buoy which is secured to the seabed by 6 catenary anchor legs each of which are tethered to the seabed by a heavy duty anchor system. The cylindrical buoy is 5.3 m. in height, fitted with a skirt 16 m. in diameter, and equipped with a radar reflector and a racon beacon coded "Zulu", frequency 48 seconds. The cylindrical buoy is also equipped with a navigational light, white flashing code "U", which has a range of 5.7 miles with transmission factor of 0.85 and is visible through 360°.

Vessel's Alertness: The loading berth is on an open and unsheltered roadstead; therefore, from the time the Mooring Masters board the vessel until the vessel has loaded her cargo and the Mooring Masters have disembarked, full power must be available at all times on all deck winches and windlass and other gear of the vessel and the vessel's engines, steering machinery and other efficient manoeuvring equipment must likewise be maintained in constant readiness with full power for immediate use so as to allow the vessel to depart from the loading berth at any time following a request by the Mooring Masters or the Company to do so.

The vessel's personnel should be at their stations and alert at all times during mooring, unmooring, hose handling and cargo loading operations. Where vessels are equipped with an electric clutch control to the propeller shaft, such vessels must disconnect the electrical clutch control and the manual clutch control so that there will be no possibility of the engine engaging the propeller shaft while the vessel is moored. Constant observation in the engine room, control room and deck control room shall be provided at all times while vessels are at or in the vicinity of the loading berth.

Whilst a vessel is moored to the SBM a crew member must be stationed on the forecastle at all times (24 hours) and will report immediately to the officer in charge if the vessel approaches within 10 m. of the buoy.

READINESS: *Loading Readiness and Arrival Time:* Upon arrival of the vessel at the customary anchorage for the loading berth, the Master or his Agent shall give the Company notice by letter, telegraph, wireless, or telephone that the vessel is ready to load. Laytime shall commence upon the expiration of 6 hours following the acceptance of such notice by the Company provided that the vessel has been nominated to load cargo and the terminal holds such cargo nomination and further provided that the Mooring Masters have deemed the vessel to be in all respects ready to moor and load. As no berthing may be undertaken during hours of darkness, the Notice of Readiness will be accepted only between the hours of 0600 hrs. and 3 hours before sunset, provided that the vessel is apparently in all respects ready to moor and receive the cargo. The time of sunset will be determined by the current nautical almanac. Notice of Readiness will not be accepted during a period when the port is closed, on account of adverse weather, and may not be accepted, if the vessel arrives prior to the date upon which it is nominated to load.

If, however, the vessel is moved to the loading berth without delay after having arrived at any time and the vessel is in all respects ready to moor and load in the opinion of the Mooring Masters, the Notice of Readiness will be accepted at the time the Mooring Masters board the vessel. Laytime shall continue until the floating cargo hose has been disconnected from the vessel's manifold.

LOADING: *Vessel's Gear:* Prior to the arrival of any vessel at the Mooring Masters Boarding Area, the port derrick of the vessel should be up and ready to lift the mooring and hose connection gear on board the vessel from the mooring launch, and the vessel must be equipped on the forecastle head with at least 2 good quality mooring lines, each not less than 120 fathoms in length and of buoyant material if possible, together with an adequate supply of lashing ropes and shackles. The mooring lines should be laid out free for running adjacent to bitts and warping winches. The warping winches or windlass should be in good working order and must be adequate to handle mooring lines under heavy strain.

On the port side, opposite to the vessel's manifold, there must be equipment capable of lifting the floating cargo hose, a 7.5 ton lift, safely and efficiently from the sea surface over the port rail to the vessel's manifold. Vessels must also have adequate mooring or loading facilities or lines or gear, the Mooring Masters must so inform the vessel's Master and in such event the vessel will not be brought into the loading berth until the facilities or lines or gear are deemed satisfactory by the Mooring Masters.

Connecting Hose: After the vessel has been securely moored, the floating cargo hose will be hoisted to the vessel's port side rail amidship by vessel's equipment. The floating cargo hose is a 20 in. (reducing to 16 in.) diameter floating hose, 920 ft. in length, fitted with a 150 ASA flat face flange for connection to the vessel's manifold. The vessel should have adapters and fittings on board so as to enable such floating cargo hose to be connected to the vessel's manifold. The raising, connecting, disconnecting and lowering of the floating cargo hose will be performed by the vessel's crew as directed by the vessel's Officer-in-charge who must be present at all times during such operation and in accordance with the procedure advised by the Mooring Masters, who will remain on board the entire time the vessel is at the loading berth. Particular care should be taken during all such hose operations to avoid damage to the floating cargo hose and its fittings.

Rate of Loading: The crude oil flow is by pump and the maximum crude oil loading rate for vessels using one 16 in. deck hose and 150 p.s.i. at vessel's rail is approximately 23,000 barrels per hour. In order to save vessel time and make the loading berth available for other vessels, it is requested that ballast be pumped as fast as possible and that vessels receive oil as fast as it can be delivered, with both operations having due regard for safety. It is requested that any impediment (such as "Y's", strainers or mud boxes) to the flow of crude oil into the vessel, be removed before the arrival of the vessel at the loading berth.

Responsibility: Prior to the commencement of any cargo loading operation, the Mooring Masters and the Officer-in-charge of the loading operations for the vessel shall engage in a pre-loading conference to formulate a loading plan and to ensure that the vessel is in all respects ready to load. No cargo loading shall take place without the permission of the Mooring Masters, which permission shall not be given until the pre-loading conference has been completed. The vessel's Master shall remain responsible for the safety of the vessel and all operations on board the vessel at all times. The Mooring Masters will advise the Officer-in-charge of the loading operations for the vessel with respect to the loading pressures and hazards but the Mooring Masters will not direct any aspect of the loading except as may be necessary to protect the loading berth and related facilities and equipment. The manipulation of the vessel's valves is the direct responsibility of vessel's personnel. The Mooring Masters shall have the right to suspend cargo loading operations or to require the vessel to unmoor and depart from the loading berth at any time when the mooring plan, pre-loading plan or the safety requirements and regulations set forth herein are not being followed by the vessel, or at anytime the Mooring Masters believe or become aware of the existence of any other reason which in his opinion shall require the suspension of the mooring or the loading of the vessel.

Oil Valve Control: The incoming oil stream is controlled onshore and the vessel's valves must not be closed against the incoming oil stream. Such a procedure creates an excessive pressure which may damage the hose or other terminal facilities and could result in a pollution incident. Vessels will be held legally responsible for any damage resulting from the vessel's failure to observe this precaution. Frequent checks of the cargo loading must be made by vessel personnel during the loading operation so that a reduction in the loading rate, before topping of the final tank or tanks, may be arranged through the Mooring Masters by the Officer-in-charge of the loading operations for the vessel. A normal standby warning should be given about 15 minutes before the shutdown of the loading operations. Upon the request from a vessel to shut down the loading operations, a minimum of 5 minutes will be normally required to stop the flow of crude oil. Vessel's personnel shall be responsible for the call to stop the loading of the vessel. When cargo has ceased to flow, the valves on the shore will be closed and the vessel's manifold valves may then be closed.

Emergency Signal: Emergency signals and messages will be relayed by VHF/UHF radios and radio telephone links available with the Mooring Masters.

Code Flag: During all cargo loading operations, the International Code Flag "B" shall be displayed from a topmast signal halyard during daylight hours and a red light shall be displayed during the hours of darkness. The red light should be of a character as to be visible at a distance of at least 1 mile and show an unbroken light around the horizon.

Shore Stops: Request for the terminal to stop the flow of crude oil at a predetermined tonnage must be made in writing to the Company and will be deemed to include the statement and understanding that the Company will not be responsible for (1) any errors, costs or claims arising from such request and (2) any crude oil loaded in excess of that requested will not be pumped back ashore. Some delays in stopping the flow of crude oil are always incurred when such a shore stop request is made.

BALLAST: There are no facilities for the off-loading of dirty ballast but clean oil-free ballast may be discharged overboard from the vessel. It is the Master's responsibility to see that no oil (crude, bunker, diesel, bunker C, or oily bilge water) is pumped or spilled overboard from the vessel. All deck scuppers must be plugged tight and adequate drip pans and sand must be provided where necessary on deck for use at all times, especially when disconnecting hoses, in order to prevent any such loss of oil overboard. The waters in and adjacent to the loading berth must not be polluted and only clean oil-free ballast may be discharged.

The discharge of oil mixtures from vessels while en-route to Hamriyah Oil Terminal is prohibited.

Masters are warned that when disposing of dirty ballast or bilge water, all pipelines, sea suctions, strainers and pumps which are later to be used to discharge clean ballast, must be flushed clean, so that there will be no chance of even a small amount of pollution when the clean ballast is pumped overboard.

Vessels must have sufficient ballast for safe manoeuvring and, where practicable, should arrive at the loading berth with the propeller completely submerged and trimmed 8 ft. to 10 ft. by the stern.

Due to the sudden and often unexpected onset of high winds in this area, it is essential that this condition is maintained, and the vessel is fully manoeuverable at all times, and also that the vessel is able to commence loading without delay as soon as the hose is connected. Therefore, vessels, arriving with clean ballast to discharge, must arrange this ballast in such a way that either it can be discharged concurrently with loading or after departure, while maintaining satisfactory segregation from the cargo.

The Mooring Masters may refuse to permit the mooring of any vessel not in compliance with these requirements until the vessel takes on sufficient ballast and/or alters her trim to meet these requirements.

As soon as practicable after arrival, vessel's tanks will be inspected for evidence of oil in ballast and during the discharge of ballast a similar inspection will take place.

Vessels must keep a constant watch on the side of the vessel from which clean ballast is being discharged for any indication of water discolouration or oil sheen. Discharge of ballast must be immediately suspended should there be any indication of discolouration or sheen and the Mooring Masters shall be immediately informed of such. An investigation of any such discolouration or sheen shall be carried out by the vessel and the findings reported to the Mooring Masters. Discharging shall not resume without permission of the Mooring Masters.

If, during any inspection or during the process of loading, it is revealed that a vessel's tank is not oil-tight, the vessel will be rejected by the Mooring Masters and refused further loading until satisfactory evidence of effective repairs is submitted and the vessel is duly certified by Lloyd's Register of Shipping, American Bureau of Shipping or another similarly recognised classification society.

In addition to the lights usually displayed, vessels are required to illuminate the vessel and the waters around the vessel with all available and suitable searchlights and floodlights during the discharge of clean ballast and the loading of crude oil during the hours of darkness. Such illumination must be to the satisfaction of the Mooring Masters and must be undertaken so as to assist in the loading operations and in order that any oil on the surface of the sea may be readily detected and appropriate action taken. Vessels unable to illuminate the sea satisfactorily may not discharge ballast or engage in the loading of crude oil during the ho of darkness and any such delay shall be for the account of the ves

MEDICAL: Vessels requiring emergency medical assistance sho contact Hamriyah Oil Terminal by VHF radio and supply the necess pertinent information which will be passed on to the vessel's Ag Neither medical or hospital facilities are available at Hamriyah Termi but private doctors and hospital facilities are available in the tow Sharjah.

CONSULS: There are no consulates in the village of Hamriy however, consular or diplomatic representatives for many natio maintain offices in the cities of Abu Dhabi and Dubai.

REPAIRS: The Masters of vessels loading at the loading berth a advised that the loading berth is considered an "open and unshelte roadstead" and under no circumstances may engines be shut down repairs while the vessel is at the loading berth. There are no facili for making vessel repairs at Hamriyah Oil Terminal and no repairs be allowed at the loading berth. However, arrangements can be ma through the vessel's agent to utilise the repair facilities at other por

SURVEYORS: No cargo inspectors or marine surveyors are based the village of Hamriyah but inspectors and surveyors who reside at ot ports can be arranged through the vessel's Agent.

SHORE LEAVE/REPATRIATION: Vessel personnel (other th medical emergency cases) are not allowed to embark or disembark fr the vessel at the loading berth. There are no facilities for crew chan at the loading berth.

WEATHER: *Climate:* The climate along the coastline of Sharjah characterised by cool Winters and very hot Summers. The annual me rainfall is 4.2 in. and the relative humidity varies considerably accord to the time of day with the highest relative humidity generally in the ea morning and the lowest relative humidity generally in the early afterno The air temperature is generally moderate in the Winter, but is hig the Summer and can be extremely high in the interior on Summ afternoons.

Weather Data Summary:

Annual mean rainfall	4.2 in.
Lowest mean daily minimum air temperature	55°F.
Highest mean daily maximum air temperature	102°F.
Lowest average monthly sea surface temperature	72°F.
Highest average monthly sea surface temperature	90°F.

Winds: The winds in the Southern part of the Gulf are usually light a generally blow from the Western quadrant most of the year but o occasionally interrupted by winds from varying directions. The visib along the Sharjah coastline is generally good but from June September the Shamal blows over the Gulf area and frequently produ rough seas and stirs up dust clouds which can affect visibility at se The cold fronts which move down the Gulf from November to A frequently cause a North or N.W. wind of 20 knots or more along t Sharjah coastline with accompanying swells.

Tides: The tide for Sharjah can be predicted with reasonable accura through use of the tide tables for Shatt Al Arab with the appropri correction factor for Sharjah applied.

Currents: The current along the Sharjah coastline has a predominan counter-clockwise circulation throughout the year. The maximum curr is up to 3 knots.

Seas: High waves generally do not occur along the Sharjah coast since the winds are usually light in the vicinity of the coastline. On th occasions when the wind does become strong, the wave heig generally remain somewhat limited since the distance over which t wind can blow to generate waves is somewhat short from most directi due to the bend in the Gulf which tends to reduce the fetch of No winds at Sharjah (e.g., waves over 8 ft. occur 0.2 per cent of the tim

SAFETY: The vessel's personnel are responsible for the safety of t vessel and themselves and shall take all necessary precautions, whet or not so advised by the Company or the Mooring Masters, having mind the hazards of the loading operation, the cargo being handled t weather condition and any other circumstances requiring special ca or caution. The vessel's personnel shall also adhere to all saf precautions generally followed in the marine industry as well as requirements and regulations imposed by the Company. Any saf precautions, requirements and regulations imposed by the Compa and disregarded by the vessel's Master, Officers or crew will considered a just cause for rejection of the vessel and all expens related thereto shall be for the vessel's account. While the vesse moored or within the vicinity of the loading berth, the vessel's person and the vessel's operations must comply or be in accordance with t following safety requirements:

(a) All ports opening onto the decks of the vessel are to be k closed during cargo loading operations and all doors opened access other than the pumproom doors must be clo immediately after use.

(b) Smoking is strictly prohibited on board the vessel and on t loading berth except in those areas designated by the Master smoking areas. No areas outside of the accommodation ar shall be so designated. The Master is responsible for ensu that all vessel personnel are informed of the designated smok areas and shall post suitable notices regarding same. T Mooring Masters may request the Master to further limit t vessel's "No Smoking" areas as conditions warrant. Matches lighters for personal use shall not be carried while outside designated smoking areas and personnel shall be so instruc The Master shall instruct the Officers and crew of the vessel to throw lighted cigars or cigarettes overside or out of port ho There may be occasions when smoking will be entirely prohib

(c) The use of portable lamps, naked lights or electrical equip on extension cords is prohibited and only approved intrinsi safe self-contained flashlights are permitted on deck.

(d) Ventilators must be so trimmed as to exclude flammable ga entering the area and if this cannot be done the ventilators be completely closed.

(e) The vessel's engines, steering gear and other essential manoeuvring equipment and deck machinery must remain ready with full power for immediate use to permit the vessel to clear the area upon instruction from the Company or the Mooring Masters to do so.

(f) Window type air conditioners must be disconnected from their power source and not used unless a certificate can be produced from a recognised authority to show that the unit is safe to operate in flammable gas areas.

(g) The vessel's main radio and radar equipment must not be energised while the vessel is handling cargo or ballast. The use of intrinsically safe VHF radios for cargo handling and safety operations are permitted.

(h) A continuous and efficient fire watch must be maintained on deck and in the engine room at all times. The vessel's fire fighting equipment shall be ready for instant use at all times throughout the vessel. Fire hoses of sufficient length to reach all parts of the vessel must be laid out and connected to hydrants and there must be full pressure on the deck line.

(i) Recommendations contained in the I.C.S. International Safety Guide for oil tankers and terminals covering the loading and discharge of tankers shall be strictly followed at all times.

(j) The only open flames allowed while the vessel is at the loading berth are those in the vessel's boilers and galley equipment. Sufficient fire extinguishers must always be provided near the galley and boilers.

(k) Burners, tubes, uptakes, exhaust manifolds and spark arrestors shall be maintained in good working order and kept clean. Funnel uptakes and boiler tubes shall not be blown while the vessel is at the loading berth. Highly volatile cleaning solvents shall not be used in the engine room for any purpose whatsoever while the vessel is at the loading berth.

(l) In the event of fire breaking out on any part of the vessel, however minor the fire may be, the fire alarm must be given immediately. The fire alarm will consist of a succession of long blasts on the vessel's whistle together with a rapid and continuous ringing of the vessel's bell.

(m) Not less than 1 Deck Officer and 3 seamen shall be on duty, alert, available and in charge of the operations on deck at all times while the vessel is at the loading berth.

(n) Not less than 1 engineer shall be on duty, alert, available and in charge of the engine room at all times while the vessel is at the loading berth.

(o) A member of the vessel's crew, not one involved in any way with the loading operation, must be stationed on the bow of the vessel while the vessel is at the loading berth and a constant watch must be maintained on the moorings.

(p) During the discharge of clean ballast and the loading of crude oil, the vessel and the waters around the vessel must be illuminated during the hours of darkness with all available and suitable searchlights and floodlights.

(q) Before the floating cargo hose is brought on board the vessel, all deck scuppers must be plugged tight and adequate drip pans and sand must be provided where necessary on deck for use at all times. The deck scuppers must remain plugged until the floating cargo hose has been disconnected. All other materials necessary to clean up any oil spillage on deck must be on hand for immediate use.

(r) All unused bunker connections, cargo connections and vessel manifolds must be fitted with blank flanges including the stern discharge line if fitted.

(s) All cargo tank hatch covers and ullage port covers are to be kept closed except where tanks are to be hand sampled or hand ullaged in which case the ullage openings may be opened to sample or ullage the cargo.

(t) All cargo and ballasting operations shall be suspended during electrical storms in the vicinity of the vessel.

(u) Prior to the commencement of any loading operations, all empty vessel cargo tanks and tanks carrying cargo must be under positive pressure and fully inerted with gas having an oxygen content of less than 8 per cent.

(v) THE COMPANY DOES NOT HAVE A TUG OR VESSEL IN THE AREA EQUIPPED WITH FIRE FIGHTING APPARATUS.

GENERAL: *Government Officials:* Sharjah Officials such as the Customs Officer, Quarantine Officer, Immigration Officer, Captain of the Port and Police, are stationed in the town of Sharjah. Should Customs Guards be stationed on board the vessel while at the loading berth, it is expected that the vessel will provide food for these guards and other Sharjah Officials. Vessels calling at the loading berth must provide an accommodation ladder rigged on the port side for such Sharjah Officials.

Visitors: Visitors are not allowed to embark or disembark from the vessel at the loading berth.

Supplies: Commissary supplies, steward's stores, laundry services, fresh water, marine lubricants and bunkers are not available through the Company and may not be loaded at the loading berth. Any questions concerning the availability of such items from other sources and the loading of such items elsewhere should be handled through the vessel's Agent.

Contraband: The Company prohibits unauthorised craft from coming alongside vessels while at the loading berth without the permission of the Mooring Masters. To avoid the possibility of undesirable items getting aboard vessels, it is recommended that Masters discourage any such craft from coming alongside while vessels are at or in the vicinity of the loading berth.

Garbage: The dumping of garbage and refuse overside is prohibited.

Agency: The Company does not perform any vessel Agency functions. Vessels calling at Hamriyah must arrange for their own Agents.

SHIPMASTER'S REPORT: July 1983 (Updated 1986).

Location: Hamriyah Oil Terminal is owned by Amoco Sharjah Oil Company. The terminal is located in the Emirate of Sharjah, United Arab Emirates. A 30 in. pipeline runs from the shore tank to a S.P.M. located in position Lat. 25° 34′ 31.68″ N., Long.55° 24′ 05.8″ E. and is operated by Lamnalco.

Documents: Health Declaration and Crew Lists. Customs, Immigration and Quarantine Officers have an office in Sharjah but usually do not come on board.

Pilotage: A pilot ladder to be prepared on vessel's Port side and lowered to about 12 ft. above the waterline. If the height of the deck exceeds 30 ft. a pilot ladder in conjunction with the accommodation ladder must be rigged.

Anchorages: The customary anchorage for vessels awaiting the loading berth of Hamriyah Oil Terminal is 3 miles North of the S.P.M. Anchorage within 3 miles is strictly prohibited unless instructed by the Mooring Masters.

Max. Size: Vessels up to 250,000 tons have been accepted, subject to weather conditions.

Health: Rules are the same as found all over the world.

Radio/VHF: Amoco Sharjah and Lamnalco should be contacted by radio 3 days prior arrival via Bahrain Radio and maintain contact until prior arrival.

Telex: 68685 Amcosh EM and 68433 Lamshj EM.

Following information is required by both parties:

1. ETA.
2. Arrival Draft.
3. Quantity to be loaded.
4. Estimated sailing draft.
5. Last port of call.
6. Whether vessel has clean bill of health.
7. Distance bow to manifold.
8. Confirm vessels ability to load/deballast concurrently or alternatively to deballast after loading.

Both companies keep watch on international VHF Marine Channel 16.

Berthing: This cylindrical buoy is equipped with a navigational white flashing light code "U", range 5.7 miles, a radar reflector and a racon beacon coded "Zulu".

On forecastle, vessel should have 4 good quality mooring lines, minimum length of 120 fathoms and preferably of the floating type. Vessel's lines to be used to pick up the mooring lines of the buoy. The end of the buoy's mooring line consists of a steel chafing chain and will be secured onto vessel's bitts by mooring strops supplied by Lamnalco.

Port derrick should be up and ready for lifting moorings and cargo hose connecting gear and capable of lifting 7.5 tons safely.

Mooring Masters and Cargo Oil Surveyor stay on board while vessel is on the berth and both to be accommodated in an officer's cabin and meals served in officer's messroom.

Notice of Readiness: Will only be accepted between 0600 and 1800 hrs. but will not be accepted at times when the Hamriyah Oil Terminal is closed on a public holiday or Friday (Moslem Sabbath). However, if the vessel is moved to the berth without delay after having arrived at any time and vessel is ready for mooring and loading the Mooring Masters will accept the N.O.R. at the boarding time. Laytime shall commence upon expiration of 6 hours after accepting the N.O.R. and shall continue until hose has been disconnected from vessel's manifold.

Loading: The floating hose is 20 in. diameter with a 16 in. hose for connecting to the vessel's manifold. Loading rate approximately 23,000 bbls.p.h. Only one type of oil available, being crude oil condensate approximate API 50/60° and loading temperature approximately 95°F.

Ballast: There are no dirty ballast reception facilities and all vessels must arrive with sufficient clean ballast for manoeuvring with the propeller submerged and a trim of 8 ft. – 10 ft. by the stern. Non-permanent clean ballast to be discharged prior to commencing of loading.

Medical: Neither medical nor hospital facilities are available at Hamriyah Oil Terminal. Requests for emergency medical assistance should be passed to Hamriyah Oil Terminal by VHF and the information will be passed to vessel's Agent. Private doctors and hospital are available in the town of Sharjah.

Supplies: Stores, fresh water, laundry services, bunkers and lubricant not available via Amoco and may not be loaded at the berth. Availability of items should be handled through vessel's Agent and loading carried out elsewhere.

Consuls: No consulates in Sharjah; however, many nations have consular or diplomatic representatives in Abu Dhabi and Dubai.

Repatriation/Shore Leave: Not permitted while at loading berth.

Currents: Predominantly counter-clockwise circulation throughout the year along the Sharjah coastline and is generally not strong. Strongest in January (0.4 – 0.8 knots) and in April (0.6 – 1.7 knots).

Weather: Winds are usually light from Western quadrant, except during June to September when the Shamal blows and from November to April during passing of cold fronts with winds up to 20 knots producing rough seas.

SHIPMASTER'S REPORT: August 1994.

The SPM Buoy is owned by Amoco, but on their behalf operated and maintained by Lamnalco. ETA's and N.O.R. are to be telexed to Amoco Sharjah (Telex: 68685 Amcosh Em).

Vessel is usually not accepted for loading before Laydays specified in Charter Party, even if the loading berth is vacant. On an average, 4-5 ships are loading at this buoy in a month.

There are no formalities for Health Clearance, Free Pratique and Immigration, etc., for vessels calling to load at Hamriyah Off-shore Terminal.

While vessel is at the SBM, no operations, such as receiving stores or crew changes, can be carried out. These operations should be undertaken while at anchorage. Provisions and bonded stores are available through local ship chandlers. Crew shore leave is not allowed.

Vessel is moored to SPM Buoy using 2 chains. If vessel is equipped with only one bow chain stopper, the other chain is made fast to bitts, using additional snotters and shackles, etc. Loading Master advised that for insurance purposes, 2 chains have to be fastened, even though OCIMF recommends one chain sufficient for vessels of less than 100,000 d.w.t. Terminal should be informed in advance if vessel is equipped with only one bow chain stopper, so that additional gear can be supplied.

Two Loading Masters and one surveyor board the vessel North of SPM Buoy from a service vessel, which also brings the required gear (shackles/snotters/plates, etc., for mooring and ship/shore connection). Mooring, unmooring, hose connection, disconnection is handled by ship's crew under Loading Master's supervision. While mooring/unmooring (as is usual), one Loading Master stays on forecastle with Chief Officer and the other on bridge. Mooring is done during daytime only, unmooring any time. Mooring procedure/sequence is given in "Guide to Port Entry" in detail.

Loading Masters require "Officers" accommodation and separate cabins. They refuse to accept ship's hospital or crew's accommodation (vessel had to move one Officer out of his cabin to provide room for Loading Master).

Floating hose has a 16 in. connection flange and is always connected on port side. Max. loading rate is 24,000 bbls./hr. Only crude condensate is handled at this SBM. Loading Master advised that A.P.I. of this condensate never varies beyond 59.8 to 60.1.

Vessel can request either "Ship stop" or "Shore stop". However, if "Shore stop" is requested at a certain cargo quantity, specified by ship, ship-shore difference should be taken into account, which can be quite large at times. Ship-shore difference in quantity pumped by shore and quantity received onboard can be checked every hour by asking Terminal by radio for quantity pumped.

After completion of loading, vessel is immediately unmoored and moved slightly closer to breakwater, towards Fairway Buoy. Vessel then drifts and awaits documents, which usually takes 2 hours. Amoco representative comes by launch and brings all documents, Bill of Lading and Port Clearance. All Protest Letters by vessel are signed by Loading Master. Agents do not board the vessel, and if Crew List is to be sent for Visa Endorsement (if vessel proceeding to U.S.A.), it should be sent to Agents through Loading Master.

AUTHORITY: *Operator:* Amoco Sharjah Oil Company, P.O.Box 1191, Sharjah, United Arab Emirates. *Tel:* (9716) 355100. *Telex:* 68685 Amcosh EM. *FAX:* 355142. *Contact:* B. G. Bramley, General Manager.

AGENT: See "Sharjah".

HAMRIYAH LPG TERMINAL: 25.28 N. 55.29 E.

(See Plan)

LOCATION: The Terminal is located in position Lat. 25° 27′ 37.3″ N., Long. 55° 29′ 12″ E. outside the village of Hamriyah on the coastline between Umm Al Qaiwain and Ajman.

The Hamriyah LPG Terminal is owned by Sharjah LPG Company Limited ("Shalco") and operated by Amoco Sharjah Oil Company and is operated 24 hours a day, 7 days a week, weather and other circumstances permitting.

The Terminal consists of 2 storage tanks for propane and butane, and a marine loading facility capable of loading vessels ranging in size from 30,000 cu.m. to 83,000 cu.m. 2 liquid loading lines and 2 vapour return lines are mounted on the trestle connecting the breakwater and the loading platform.

DOCUMENTS: The following documents are required when calling at the Hamriyah LPG Terminal:

Health Declaration.
Crew List.
Clearance from last port of call.

Officials: No immigration, Customs or Health Officials stationed at the Terminal.

APPROACHES: *Approach Channel:* The approach channel's entrance is located in an approximate position of Lat. 25° 30′ 45″ N., Long. 55° 27′ 23″ E. The Fairway Buoy (Fl. "A" ev. 15 sec.) is located in position Lat. 25° 32′ 05″ N., Long. 55° 25′ 59″ E. The channel's length is 4,000 m. The width is 180 m. in the seaward channel, 250 m. in the intermediate channel and 180 m. in the near harbour channel. the channel depth has been dredged to 15 m.

Buoys:

PILOTAGE: Pilotage is compulsory from the seaward entrance of dredged channel. The Pilot will board at or near the designa anchorage. The Pilot will be provided by the Operator and vessels not be allowed to approach or depart from the port without the Operato designated Pilot being on board. The Pilot will advise vessel's personn on the approach through the channel to the jetty and all operations mooring and unmooring. All manoeuvring of vessels within the loadi berth area shall be performed by vessel's personnel as directed by vessel's Master in accordance with the procedure advised by the Pi The vessel's Master must be on the bridge at all times while the vess is manoeuvring.

Vessels shall provide food for the Pilot and Terminal Supervisor wh on board the vessels and shall accommodate the Pilot and Termi Supervisor in suitable accommodation equipped with private to facilities. The Pilot and Terminal Supervisor shall have access to t bridge and/or central area of the vessel and such areas shall not locked or otherwise arranged to prevent immediate entry at any time the Pilot and Terminal Supervisor.

Vessels are required to have a clean and efficient pilot ladder, fit with spreaders and manropes, safely and securely rigged ready for t Pilot to immediately embark and disembark and of sufficient length reach the Pilot's launch. A lifebuoy with safety line and self-igniting lig together with a rope messenger for the Pilot's bag shall also be availab at the pilot ladder head. Vessels shall afford a "Good Weather Lee" a shall reduce speed as directed by the Pilot in order to effect the sa embarking or disembarking of the Pilot.

Whenever, as in the case of large vessels in light condition, the heig of the deck above the water exceeds 30 ft., the accommodation ladd shall also be used in conjunction with the pilot ladder and shall lowered to about 12 ft. above the water with the pilot ladder rigg immediately adjacent to the bottom platform of the accommoda ladder. The rigging of the pilot ladder for the embarkation a disembarkation of the Pilot shall be supervised by a responsible offic and shall be positioned so that the ladder is well clear of any overboa discharge and such that each step of the ladder rests securely again the vessel's side.

If, in the sole opinion of the Pilot, the pilot ladder is not safe, the Pi may refuse to board the vessel and any delay caused by such refus shall be for the vessel's account.

Pilotage Radio Contact: Pilot/Vessel contact will be maintained on VH Channel 16 or other frequency as mutually agreed by Operator's Mari Representative and vessel's Master.

Arrival at Anchorage/Pilot Boarding Area: Means of access to the vess by the Pilot shall be provided by the vessel in accordance with t requirements of SOLAS. At night, the access area shall be adequat illuminated to provide a safe approach and boarding by the Pi Government Officials and Terminal Representatives.

The Conditions of Use of Shalco's Terminal Facilities will be present to the Master for acceptance and signature on behalf of himself and t Owners prior to departures from the Anchorage/Pilot Boarding Area.

As no berthing may be undertaken during hours of darkness, t Notice of Readiness will be accepted by the Terminal only between t hours of 0600 and 1500, provided that the vessel is apparently in a respects ready to moor and accept the cargo. Notice of Readiness w not be accepted during a period when the port is closed on account adverse weather, and may not be accepted if the vessel arrives prior the date upon which it is nominated to load. Berthing is not allow during winds from Northeast.

ANCHORAGE: The customary anchorage area for vessels awai loading at the Hamriyah LPG Terminal is a circle 1 mile in diameter w its centre in an approximate position of Lat. 25° 30′ N., Long. 55° 25′ There is an existing SBM located at approximately Lat. 25° 34′ N., Lon 55° 24′ E. for the Hamriyah Oil Terminal. the SBM is fitted with a flashi light and racon. This existing SBM may be used as a reference to t LPG Terminal anchorage which is 3 miles W.S.W. of the LPG entran channel.

When within VHF communication range, Masters of vessels sho ascertain berthing prospects from the terminal. In all cases whe tankers are instructed to anchor, Masters should obtain clearance their intended anchorage position from the Operator.

Radio Watches: While at the anchorage awaiting the loading ber vessels should maintain a listening watch on VHF Channel 16 with t Terminal Operator.

Caution: Masters are cautioned that a 30 in. submarine pipeline ru 7.6 miles from the Hamriyah Oil Terminal to an offshore SBM facili

RESTRICTIONS: Vessels will be moored/unmoored in daylight only. t the loading will be performed at any hour, weather and circumstan permitting.

Also see "Pilotage".

MAX. SIZE: The harbour has been dredged to a depth of 14 Maximum draft for vessels calling at the Hamriyah LPG Termina 12.6 m.

Max. Size: 83,000 cu.m. Max. LOA 230 m.

Minimum LOA 186 m. Minimum flat side 80 m.

HEALTH: No officials stationed at the terminal.

RADIO: *Initial Radio Communications:* The radio station at Bahrain handle the initial radio communications between vessels and t Operator. The station call sign is "A9M" and the station operates o 24 hour basis.

Advice of Arrival: It is important that vessels establish radio contact with the Operator and with the Operator's designated marine service when 3 days distant from Hamriyah LPG Terminal and maintain such contact until just prior to arrival at Hamriyah LPG Terminal. Vessels should send an ETA telex to the Operator (Telex No. 68685 a/b Amcosh EM) and to the Operator's designated marine service (Telex: 68433, a/b Lamshj EM) not less than 72 hours prior to arrival at Hamriyah LPG Terminal, providing the following information:

1. ETA.
2. Estimated arrival draft, fore and aft.
3. Estimated sailing draft, fore and aft.
4. Whether part-loaded or in ballast. If part-loaded, nature and quantity of cargo.
5. Last port of call.
6. Last 3 cargoes carried.

Further ETA telexes should be sent to the Operator and the Operator's designated marine service when the vessel is 48 hours and 24 hours distant from Hamriyah LPG Terminal confirming or giving notice of any change in the 72 hour ETA and at any other time after the 24 hour ETA telex when a change by more than 2 hours occurs in the ETA. The 24 hour ETA telex should include a positive statement regarding the vessel's Readiness to Load on arrival. Local time is Greenwich Mean Time plus 4 hours and Daylight Saving Time (Summer time) is not applicable.

VHF: *Ship-to-Shore Communications:* The Company and its designated agents are equipped with VHF radios using international frequencies and maintain a radio watch on the international VHF marine Channel 16.

On approach to Hamriyah LPG Terminal, the vessel is required to maintain a radio watch on VHF Channel 16. Masters are recommended to use this facility as soon as the vessel is within range since such communications are the best means of avoiding delay in the mooring of the vessel. While a vessel is at the loading berth, the Pilot may be replaced by a Mooring Master (Safety Officer) who will be in direct charge of the portable VHF ship-to-shore radio and all ship-to-shore communications will be by portable VHF radio. The use of the vessel's radio station and/or radar is prohibited during cargo loading operations.

The following are terminal call signs in use during loading:

LPG Terminal UHF Channel 1, Monitor VHF Channel 3:

Amoco 410 – LPG Terminal Control Room.
Amoco 411 – LPG Terminal Operator.
Amoco 412 – LPG Terminal Spare Operator.
Amoco 415 – LPG Jetty Control Operator.
Amoco 416 – LPG Jetty Mooring Crew.
Amoco 417 – Lead Tug.
Amoco 418 – Second Tug.
Amoco 419 – LPG Tanker.
Amoco 420 – Amoco Terminal Supervisor.

TUGS: Tugs will be provided by the Terminal Operator. Due to the infrequency of LPG liftings, tugs will vary as to individual specifications. However, 2 tugs will normally attend each lifting and each will have a minimum of 1,500 h.p. and a bollard pull of 15 tons.

BERTHING: *Due to equipment limitations, it is not possible to purge inert gas from arriving vessels. Only vessels arriving in an LPG purged and cooled down condition will be accepted at Hamriyah LPG Terminal. Checks made with an oxygen analyser must read at 2 per cent oxygen or lower.*

Berthing: The berth is fitted with 2 shock absorbing fenders, 70 m. apart. Design is based on a 57,000 d.w.t. LPG vessel. Dredged depth alongside the jetty face is 14.8 m. at mean lowest low water level. The vessel turning diameter in the harbour is 600 m.

Vessel Specifications: Based on the above, vessel specifications *must be:*

Length: Maximum 230 m., minimum 186 m.
Draft: Maximum 12.60 m.

Mooring: The berth is equipped with 2 breasting dolphins which have 2 quick-release hooks along with powered capstans. The 4 mooring dolphins are each equipped with 3 quick-release hooks. All quick-release hook units are provided with attached powered capstans. All quick-release hooks have a capacity of 60 tonnes, and can be manually operated. The capstan capacity is 2 tonnes with a rope speed of 30 m. per minute. Bollards, bitts and cleats are also provided.

For safety reasons, vessels will be moored with their portside only to the jetty.

Ships should remain adequately secured in their moorings. Ranging of the ship is to be prevented by the vessel's personnel keeping all mooring lines taut. Attention is to be given by vessel's personnel to the movement caused by passing ships, wind, currents, tides, and the cargo operation in progress. Adequate mooring of the vessel is the Master's responsibility and the vessel and its Owner shall be responsible for all damage to the loading berth and related facilities in any way attributable to the failure of the vessel's personnel to keep all mooring lines taut. Operator may suspend cargo operations and have the vessel put off the berth for any failure to comply with this provision with all resulting delay to be for the account of the vessel.

Vessel's personnel should be at their duty stations and alert at all times during mooring, unmooring, hose handling and cargo operations. Ships fitted with automatic tension winches should not use such winches in the automatic mode as they may not always hold the vessel in position at the berth.

LOADING: *Tanker/Jetty Manifold Connections:* The jetty has a basic configuration of VLLV. Butane and propane can be loaded down either liquid line, and concurrently. However, the Terminal's preferred configuration is butane forward and propane aft, and ships should endeavour to comply with this if possible. Complete vessel's particulars shall be supplied for Company's approval at the nomination stages. Vessels are required to load both products concurrently when lifting both products. Therefore, manifold configuration must be adhered to stringently. The vessel manifold arrangement must be VLLV.

The maximum loading rate for one product at a time is 1,300 metric tonnes per hour, and the minimum 600 metric tonnes per hour. For concurrent loading, the maximum loading rate is 1,000 metric tonnes per hour per product, and the minimum acceptable loading rate 600 metric tonnes per hour per product, apart from commencement and completion.

It is emphasised that venting of vapour to atmosphere is not allowed. Vapour should be returned to the Terminal via the vapour return lines provided or reliquified and returned to the cargo tanks.

The propane and butane loading arms are 12 in. in diameter. The return vapour arms are 8 in. in diameter. Each arm is fitted with a hydraulic coupler which can be adapted to fit different sizes. The loading arms can be adapted to fit 16 in., 12 in. and 10 in. standard 150 lbs ANSI flanges. The vapour return lines can be adapted to fit 10 in. and 8 in. standard 150 lbs ANSI flanges.

Any other flange size or ratings other than the above stated will require special fabricated spool pieces to meet the foregoing flange specification. Spool pieces must be furnished and installed by the vessel. Terminal personnel will connect the hydraulic couplers to the proper ship's flange. Vessels without proper spool pieces will be rejected.

Ship's manifold connections must meet loading arm envelope configuration and must provide space and support on which to place loading arm support legs.

Distance of ship's manifold from ship's side:	*Min.*	*Max.*
12 in. Loading Arm	2.0 m.	6.0 m.
Distance centre to centre for 12 in. ship's manifold	1.5 m.	3.5 m.
Height of centre point of manifold above deck	0.85 m.	2.1 m.

Jetty Emergency Shutdown Systems and Purge Systems: The jetty is equipped with an Emergency Shutdown (ESD) system to stop loading operations. The system is activated by pushing an electronic stop button in the jetty control room or on the pendant which will be placed on board the vessel. The pendant with the ESD button placed aboard the vessel is to be used only in an emergency, and is used in preference to the ship's systems. On activating the ESD system, all loading pumps and loading arms will be shut down.

Documentation: Before and after completion of loading operations the vessel shall be ullaged. A Bill of Lading, Cargo Manifest, Ullage Report, Time Sheet, Certificate of Quality, Certificate of Quantity and Certificate of Origin will be completed. All such documents will be signed by the Master of the vessel prior to the vessel's departure and by the Operator's Terminal Supervisor, as appropriate. If required or requested by the Master of the vessel, the Agent of the vessel may sign the documents on behalf of the vessel's Master. The official quantity of the LPG delivered to the vessel shall be determined by the use of vessel gauges applied to cargo tank volume calibrations. Tests for quality determinations shall be carried out by the Licensed Inspector.

The vessel may depart after receipt of the Port Clearance document duly signed by the appointed Government Official and the Operator's Terminal Supervisor.

Cargo Information: The vessel's Master will be informed of the approximate gravity and loading temperature of the LPG prior to commencement of loading. An official and final figure for specific gravity will be provided as soon as practical after completion of loading.

BALLAST: There are no facilities for off-loading ballast at Hamriyah LPG Terminal. Oil-free ballast suitable for pumping directly to the sea may be discharged overboard from the vessel. Export vessels arriving with ballast unsuitable for pumping to the sea may be rejected for loading, or made to keep such unsuitable ballast segregated on board. It is strictly against the law to pollute the waters of the United Arab Emirates, and any Master, his vessel and Owners, shall be subject to prosecution by the United Arab Emirates authorities if such pollution does occur.

FIRE PRECAUTIONS: The vessel's fire fighting appliances, including its main and emergency fire pumps shall be kept on standby and ready for immediate use. Before berthing operations comence, fire hoses shall be uncoiled and connected to the fire main which should be kept pressurised. Fire monitors should be elevated and maintained for immediate use. The water spray system of the vessel must be tested and maintained ready for use. The dry powder system or portable units shall be ready for use and in close proximity to the vessel's manifold.

The vessel is solely responsible for, and presumed capable of, fighting any fire on the vessel without assistance from terminal sources.

Should fire break out on either the vessel or the berth, the vessel's Master or deputy must immediately report the fire by the quickest means possible (VHF/UHF/telephone contact, sounding ship's siren, etc.) to the Terminal. The vessel's Master or deputy must also notify the Jetty Supervisor by means of VHF Channel 16. All cargo and ballast operations will be stopped immediately and then all valves closed. As the vessel's Master or deputy assisted by the crew is responsible for fighting the fire on board the vessel, he should stand-by to disconnect hoses or metal arms.

The jetty supervisor will be responsible for initiating the terminal fire alarm system and actuating the terminal emergency plan. He shall contact the senior deck officer on board the vessel to ascertain what assistance can be rendered by Terminal equipment and personnel.

In the event of an emergency, an alarm signal (continuous siren) will be sounded.

The loading platform fire fighting system has one main motor driven fire water pump and one stand-by diesel engine driven fire water pump. Both pumps are capable of handling 1,500 g.p.m. at 150 p.s.i.g. pressure, and are located on the jetty trestle.

The vessel's Master or his deputy will alert ship's personnel to stand-by for special instructions from the Terminal Supervisor. These instructions may require immediate departure of the vessel from the berth.

MEDICAL: Vessels requiring emergency medical assistance should contact Hamriyah LPG Terminal by UHF Radio (Amoco 210) or the Terminal Supervisor by UHF Radio (Amoco 420). Private doctors and hospital facilities are available in the town of Sharjah.

DENSITY: 1029.
FRESH WATER: Not available.
FUEL: Not available.
CONSULS: There are no Consulates in the village of Hamriyah; however, the Consular or Diplomatic Representatives for many nations maintain offices in the towns of Abu Dhabi and Dubai.
REPAIRS: There are no facilities for making vessel repairs at Hamriyah LPG Terminal and no repairs will be allowed at the jetty. However, arrangements can be made through the vessel's Agent to utilise the repair facilities at other ports.
SURVEYORS: No Cargo Inspectors or Marine Surveyors are based at the village of Hamriyah but inspectors and surveyors who reside at other ports can be arranged through the vessel's Agent.
CUSTOMS: Masters are advised that drinking or sale of alcoholic beverages is strictly forbidden to U.A.E. national citizens and is controlled for other nationals. Masters are warned of the serious consequences of offering such drinks to the Terminal staff or other officials who may board the vessel.
REPATRIATION: Not possible as no officials based at the terminal.
POLICE/AMBULANCE/FIRE: Contact terminal operator.
WEATHER/TIDES: *General:* The Company can advise of the following general environmental characteristics for the Sharjah coastline area but the navigator is referred to the published sailing instructions and directions for the area for more detailed information on the climate, weather, wind, tide, current and sea.
Climate: The climate along the coastline of Sharjah is characterised by cool Winters and very hot Summers. The annual mean rainfall is 4.2 in. and the relative humidity varies considerably according to the time of day with the highest relative humidity generally in the early morning and the lowest relative humidity generally in the early afternoon. The air temperature is generally moderate in the Winter, but is high in the Summer and can be extremely high in the interior on Summer afternoons.
Weather:

Annual mean rainfall	4.2 in.
Lowest mean daily minimum air temperature	55° F.
Highest mean daily maximum air temperature	102° F.
Lowest average monthly sea surface temperature	72° F.
Highest average monthly sea surface temperature	90° F.

Winds: The winds in the Southern part of the Gulf are usually light and generally blow from the Western quadrant most of the year but are occasionally interrupted by winds from varying directions. The visibility along the Sharjah coastline is generally good but from June to September the Shamal blows over the Gulf area and frequently produces rough seas and stirs up dust clouds which can affect visibility at sea. The cold fronts which move down the Gulf from November to April frequently cause a North or N.W. wind of 20 knots or more along the Sharjah coastline with accompanying swells.
Tides: The tide for Sharjah can be predicted with reasonable accuracy through use of the tide tables for Shatt Al Arab with the appropriate correction factor for Sharjah applied.
Currents: The current along the Sharjah coastline has a predominantly counter-clockwise circulation throughout the year and is not generally strong. The strongest current is usually during the month of January (0.46 to 0.8 knots) and during the month of April (0.6 to 1.7 knots).
Seas: High waves generally do not occur along the Sharjah coastline since the winds are usually light in the vicinity of the coastline. On those occasions when the wind does become strong, the wave heights generally remain somewhat limited since the distance over which the wind can blow to generate waves is somewhat short from most directions due to the bend in the Gulf which tends to reduce the fetch of North winds at Sharjah (e.g. waves over 8 ft. occur 0.2 per cent of the time).
GENERAL: *Flag:* Vessels are required to fly the flag of the United Arab Emirates on the foremast during daylight hours while in Sharjah waters. The Sharjah territorial waters extend 12 nautical miles seaward from the Sharjah coastline.
Government Officials: Sharjah officials such as the Customs Officer, Quarantine Officer, Immigration Officer, Port Authorities and Police are stationed in the town of Sharjah. Should Customs Guards be stationed on board the vessel while at the jetty it is expected that the vessel will provide food for these Guards and other Sharjah officials.
Quarantine Regulations: The rules governing the quarantine of vessels are the same as those found in other parts of the world.
Contraband: During loading it is prohibited for any unauthorised craft to come alongside vessels while at the LPG Terminal.
Garbage: The dumping of garbage and refuse overside is prohibited.
Shore Leave and Crew Changes: Vessel's personnel (other than medical emergency cases) are not allowed to embark or disembark from the vessel at the jetty. There are no facilities for crew changes at the jetty.
Visitors: Visitors are not allowed to embark or disembark from the vessel at the jetty.
Supplies: Commissary supplies, stewards stores, laundry services, fresh water, marine lubricants and bunkers are not available through the Operator and may not be loaded at the jetty. Any questions concerning the availability of such items from other sources and the loading of such items elsewhere should be handled through the vessel's Agent.
Readiness: As no berthing may be undertaken during hours of darkness, the Notice of Readiness will be accepted by the Terminal only between the hours of 0600 and 1800 provided that the vessel is apparently in all respects ready to moor and receive the cargo. Notice of Readiness will not be accepted during a period when the port is closed on account of adverse weather or when the vessel arrives prior to the date upon which it is nominated to load.

The foregoing paragraph notwithstanding, in no event shall a Notice of Readiness, whether previously accepted or not, be valid or binding on the Terminal unless and until such time as the vessel, her tanks and equipment, are, in fact, in every respect whatsoever in the proper condition and operation to receive the cargo.

Agency: The Operator does not perform any vessel agency functio Vessels calling at Hamriyah LPG Terminal must arrange for their o Agents.
AUTHORITY: *Owner:* Shalco (Sharjah LPG Co.) P.O.Box 787, Sharja United Arab Emirates. *Tel:* 543666. *Telex:* 68799.
Operator: Amoco Sharjah Oil Company, P.O.Box 1191, Sharjah, Uni Arab Emirates. *Tel:* 355100. *Telex:* 68685. *FAX:* 3551
Contact: B. G. Bramley, General Manager.

AGENT: See "Sharjah".

HULAYLAH TERMINAL, Ras Al Khaimah:

25.58 N. 55.56

LOCATION: The geographical location of the Hulaylah Terminal S is: Lat. 25° 57′ 26″ N., Long. 55° 56′ 11″ E.

Hulaylah Terminal is the export crude oil facility operated by Ras Khaimah Gas Commission (RAKGAS) and is located approxima 7 miles offshore from Mina Saqr, Ras Al Khaimah, United Arab Emira

Crude oil from the Saleh Offshore Field is transferred to shore ta located in approximate position 25° 58′ 26″ N., 55° 56′ 17″ E. from wh it is transferred to the SPM by pipeline.

Saleh Field production facilities are located at the following positio

	Latitude	*Longitude*
Saleh 1 and Production Platform	26° 11′ 31″ N.	55° 42′ 27″ E
Saleh 1 Flare	26° 11′ 45″ N.	55° 42′ 35″ E
Saleh 2 Platform	26° 10′ 43″ N.	55° 42′ 16″ E
Saleh 3 Platform	26° 10′ 11″ N.	55° 41′ 47″ E
Saleh 4 Platform	26° 10′ 27″ N.	55° 45′ 37″ E
Saleh 5 Platform	26° 09′ 51″ N.	55° 45′ 11″ E
Saleh 6/7 Platforms	26° 11′ 34″ N.	55° 43′ 51″ E

DOCUMENTS: None required.
PILOTAGE: The Mooring Master Boarding Area for the Hulay Terminal is 3 miles Westward of the SPM, or boarding will be at t anchorage as appropriate.

The RAKGAS Mooring Master will remain on board throughout t export vessel's stay on the berth to co-ordinate the petroleum trans operation; therefore, suitable and adequate accommodation shall provided for him on board the export vessel.
Arrival at Pilot Station/Anchorage: Means of access to the vessel by t RAKGAS Mooring Master shall be provided in accordance with t requirements of SOLAS, and early advice will be given by RAKGAS to the side of the vessel that access should be provided.

At night the access area shall be adequately illuminated to prov for the approach and boarding of the RAKGAS Mooring Mas Government Officials and for RAKGAS Representatives.

The Conditions of Entry into and Use of Hulaylah Terminal a Agreement for the Hiring of Tugs will be presented to the Master of t export tanker and shall be signed by him on behalf of himself, the ves and its Owners prior to departure from the pilot station/anchorage a commencement of berthing operations.

The Notice of Readiness will be accepted only between the hours 0600 and 1500 provided the RAKGAS Mooring Master is satisfied t the export vessel is apparently in all respects ready to moor and lo Notice of Readiness will not be accepted during a period when the p is closed on account of adverse weather, or when an export ves arrives prior to the date upon which it is nominated to load.

The foregoing paragraph notwithstanding, in no event shall a No of Readiness, whether previously accepted or not, be valid or bind on the Terminal unless and until such time as the export vessel, t tanks and equipment, are, in fact, in every respect whatsoever in t proper condition and operation to receive the cargo.
ANCHORAGES: Should it be necessary to anchor, then vessel sho proceed to the recommended Tanker Anchorage Area which is wi a circle 0.5 miles in diameter and with its centre located in posi Lat. 25° 58′ N., Long. 55° 53′ E.
MAX. SIZE: Max. deadweight 300,000 tons. Larger vessels require p clearance by the terminal.
HEALTH: No health clearance requirements currently in force.
RADIO: Following receipt of a nomination of an export vessel to l at the Hulaylah Terminal, RAKGAS will cable to that vessel via Bahr Radio (A9M) or advise vessel's Agent details of nomination, loading and temperature, and berthing prospects.

On receipt of this cable, and in any case not later than 72 hours p to arrival time at Hulaylah Terminal, the export vessel is required cable to RAKGAS via Bahrain Radio or via the Agent, the follow information:

(a) Name of vessel.
(b) ETA in GMT (U.A.E. time is GMT plus 4 hours throughout year).
(c) Name of Master.
(d) Estimated arrival draft, fore and aft, and displacement.
(e) Time for discharging clean ballast, if any.
(f) If vessel proceeding to any port(s) prior to Hulaylah, and if any delays anticipated.

Sections (a) and (b) of above message should be repeated via Bah Radio 48 hours, 24 hours and again 12 hours prior to the export vess arrival at the Hulaylah Terminal and at any other time when ETA chan more than 1 hour.

When approaching the Terminal, an export vessel should contac Terminal on VHF Channel 16 (156.8 MHz), establishing a wor channel and confirm ETA.
VHF: *Export Tanker:* When the export tanker is berthed at the S communication between the Terminal and the export tanker wil established on VHF Channel 16 or on a mutually agreed VHF cha

In those cases where the VHF equipment on board the export tanker is not compatible with the Terminal equipment, the RAKGAS Mooring Master will arrange for the availability of compatible VHF sets for use during the transfer operation. These sets shall be returned to the RAKGAS Mooring Master prior to his departure from the export tanker.

Approach to the Anchorage/Mooring Master Boarding Area: When within VHF communication range, Masters of export tankers should ascertain berthing prospects from the Terminal.

TUGS: Suitable tugs and line boats are chartered for each lifting and are for export tanker's account.

BERTHING: *Mooring/Unmooring Arrangements:* The export tanker will be moored to the SPM according to a mooring plan to be agreed between the RAKGAS Mooring Master and the Master of the export tanker.

LOADING: *Transfer Operations:* The RAKGAS Mooring Master will remain aboard the export tanker throughout the petroleum transfer operation and will co-ordinate all activities on board the export tanker with the Terminal.

The maximum loading rate available for the transfer operation will be about 10,000 bbls.p.h.

At all times during the transfer operation, a responsible deck officer shall be in charge of operations, either on deck or in the control room. On vessels with a central control room from which all operations are controlled, a deck watch in contact with the control room is required to continuously patrol the cargo deck, and monitor the manifold area of the export vessel. A crew member shall be kept on watch on the bow.

When the responsible export tanker officer has declared the export tanker ready to load with all necessary valves open, the Mooring Master will instruct the Terminal to commence the transfer.

At any time during the transfer operation, the rate can be reduced as requested by the Master or responsible officer of the export tanker.

The RAKGAS Mooring Master shall be given advance notice by the Master or responsible officer on the export tanker when a reduction of loading rate is required preparatory to completion of transfer.

After completion of loading, the vessel will be ullaged. A Bill of Lading, Cargo Manifest, Ullage Report, Certificate of Quantity, Certificate of Quality, Certificate of Origin, and Port Time Log will be completed. All such documents shall be signed by the Master of the export tanker prior to that vessel's departure. If required or requested by the Master of the export tanker, the Agent for the export tanker may sign the cargo documents on behalf of the export tanker's Master. The official quantity and quality of the crude oil delivered to the export tanker shall be determined by RAKGAS and shall be final and binding on the export tanker and her Owners and Charterers.

Hose Handling: The storage vessel will present a single 10 in., 150 ASA connection, hose will be connected on the port side. Hose connection/disconnection will be carried out by the export tanker's crew who are required to be at all times under the control of a responsible deck officer and undertake hose handling operations in co-operation with procedures advised by the RAKGAS Mooring Master.

The export tanker will be required to have ready a derrick at the port manifold area for the handling of the flexible hose.

Minimum Derrick Capacity:

Vessel size	*Derrick capacity*
up to 70,000 d.w.t.	7.5 tons
70,000 – 150,000 d.w.t	10.0 tons
over 150,000 d.w.t.	15.0 tons

Cargo Information: Oil loaded at the Hulaylah Terminal is Saleh Crude with an average API gravity of approximately 58°. The loading temperature will vary from 73°F in the Winter to 85°F in the Summer months. Some H_2S may be present in the crude oil.

Hydrogen Sulphide: Vessels nominated to load at the Hulaylah Terminal SPM should be advised that Saleh Crude may contain H_2S. Continued exposure over long periods to even small concentrations of hydrogen sulphide can cause headache and nausea. Exposure to high concentration may be dangerous and even fatal. Masters should ensure that personnel involved in the loading operation take the appropriate precautions as recommended by their Owners for handling cargo containing H_2S.

Deballasting Operations: Export vessels are required to arrive with sufficient ballast or cargo and be adequately trimmed for safe manoeuvring.

Hulaylah Terminal has no ballast reception or slop disposal facilities, and therefore, export vessels are required to arrive with sufficient clean ballast suitable for pumping directly to the sea. Export vessels arriving with ballast unsuitable for pumping to the sea may be rejected for loading, or will be required to keep that portion of their ballast unsuitable for discharge to the sea segregated on board. RAKGAS will not accept any claims for vessels unable to meet such requirements.

It is strictly against the law to pollute the waters of the United Arab Emirates, and any Master, his vessel and Owners, may be subject to prosecution by the United Arab Emirates Authorities if such pollution does occur.

Simultaneous Deballasting and Loading of Cargo Tanks: Under certain weather/sea conditions this practice may be necessary. In such circumstances, simultaneous deballasting and loading may be requested by the RAKGAS Mooring Master.

If such operations are found necessary, it shall be done at the sole risk of the export vessel, its Master and Owners, and the most stringent care and attention shall be taken by the export tanker. The Owners, shall remain fully responsible for, and indemnify and hold RAKGAS, its parent companies, subsidiaries, and affiliates, harmless from, any and all claims, demands, damages, liabilities, costs, fines, and expenses, of every kind whatsoever, arising out of, on account of, or in any way connected with the simultaneous deballasting and loading of the export tanker.

Inert Gas Systems: All crude tankers of 20,000 d.w.t. or greater nominated to load shall arrive with cargo tanks inerted to 8% oxygen or less by volume and pressurised as required by the SOLAS Convention. Normally cargo tanks under pressure will not be inspected by the Terminal Representative provided a declaration is signed by the Master prior to commencement of loading confirming that all compartments of the vessel have been prepared in all respects as required for the cargo to be loaded.

(a) Tank Inspection, Gauging, Sampling, Water Dips and Temperatures: Should it be necessary for tanks to be inspected, then it should only be done on a tank-by-tank basis. The system shall be maintained at about 200 mm. water gauge pressure except for the individual tank to be opened which, if possible, is to be isolated from the system and the sighting port opened with care. On completion of inspection the tank shall be secured and re-pressurised. The next tank is not to be isolated and opened until the preceding tank is secured and open to the IG system. All gauging, sampling, water dips and temperatures will be taken either through special fittings provided; or if it is necessary to open up tanks for this purpose, then this will be done one tank at a time as described above.

(b) Failure of IGS: If at any time the IGS is not maintaining the prescribed conditions, the RAKGAS Mooring Master shall order a suspension of transfer operations. The cost of any delays will be for the export vessel's account.

MEDICAL: Doctors and dentists available.

DENSITY: 1030.

FRESH WATER: Not available.

FUEL: It is not permitted to load bunkers while berthed at the SPM. Bunkers can be arranged at anchorage by vessels' local Agents.

CONSULS: At Dubai.

REPAIRS: Repair facilities are not readily available.

Repairs will not be permitted when the export vessel is berthed at the SPM.

SURVEYORS: At Dubai.

CUSTOMS ALLOWANCES: Most crew transit through Dubai where import allowances are:

1. 1,000 cigarettes or 200 cigars or 1 kilo of tobacco.
2. One litre toilet water and 150 gms. perfume.
3. No alcohol of more than 2% permitted without an import licence.
4. There are no restrictions outbound.

REPATRIATION: Launch service available.

AIRPORT: Ras Al Khaimah has an international airport but Dubai Airport has greater frequency of flights.

SHORE LEAVE: Permitted.

GARBAGE DISPOSAL/WASTE OIL DISPOSAL: Offshore facility – no services.

WEATHER: The winds in the Southern part of the Gulf are usually light and generally blow from the Western quadrant most of the year but are occasionally interrupted by winds from varying directions. The visibility along the Ras Al Khaimah coastline is generally good, but from June to September the Shamal blows over the Gulf area and frequently produces rough seas and stirs up dust clouds which can affect visibility at sea. The cold fronts which move down the Gulf from November to April frequently cause a North or N.W. wind of 20 knots or more along the Ras Al Khaimah coastline with accompanying swells.

High waves generally do not occur along the Ras Al Khaimah coastline since the winds are usually light in this area. On those occasions when the wind does become strong, the wave heights generally remain limited since the distance over which the wind can blow to generate waves is relatively short from most directions. This is due to the bend in the Gulf which tends to reduce the fetch of North winds (e.g. waves over 8 ft. occur 0.2% of the time).

Currents are omnidirectional and variable in strength. During the month of January 1984, currents in excess of 1 knot were recorded.

SAFETY: *Safety Requirements:* Masters will be given the RAKGAS Safety Requirement Letter by the RAKGAS Mooring Master prior to commencement of berthing operations, and a signed acknowledgement will be required.

Safety Check List: On completion of berthing and prior to the commencement of deballasting or cargo loading, the Ship Safety Check List will be completed following a joint inspection by the RAKGAS Mooring Master and a responsible export tanker's officer. The RAKGAS Safety Check List is based on the recommendations of the "International Safety Guide for Oil Tankers and Terminals" (ISGOTT).

GENERAL: *Operating Procedures:* Procedures for cargo and ballast operations shall be agreed in writing between the RAKGAS Mooring Master and the export tanker's Master and Chief Officer.

Flags: The national flags of the United Arab Emirates and Ras Al Khaimah shall be permanently displayed by vessels at the Hulaylah Terminal.

Alcohol: Masters are advised that drinking or sale of alcoholic beverages is strictly forbidden to U.A.E. National Citizens and are warned of the serious consequences of offering such drinks to the Terminal staff who may board the vessel.

Storing: It is not permitted to load stores while berthed at the SPM.

Agency: RAKGAS does not perform any vessel Agency functions. Vessels calling at the Hulaylah Terminal are required to arrange their own Agency representation from an Agency operating in Ras Al Khaimah.

AUTHORITY: Ras Al Khaimah Gas Commission (RAKGAS), P.O.Box 434, Ras Al Khaimah, United Arab Emirates. *Tel:* (07) 222555, 668364. *Telex:* 99155 Raknoc Em. *FAX:* (07) 222733, 668088. *Contact:* J.C. Andrews, Manager (Tel: 222555). E.J. Shreeve, Operations Superintendent.

AGENT: See "Mina Saqr".

JEBEL ALI, Dubai: 25.00 N., 55.03 E. (See Plan)

FLAG: U.A.E. and Dubai Emirate.

LOCATION: The Port of Jebel Ali is a major port situated some 35 km. S.W. of the city of Dubai.

The Port Control Tower is situated in position Lat. 24° 59.4′ N., Long. 55° 02.9′ E.

The Jebel Ali approach channel commences 12 km. off shore, the entrance to the channel being marked by a fairway buoy. The buoy is situated in Lat. 25° 06′ 54″ N., Long. 54° 56′ 33″ E.

The approach channel with a depth of 15.0 m. is buoyed and runs in a direction 315°T – 135°T towards the port. After 10.5 km. the channel takes a 25° bend and becomes the entrance channel which leads into the port on an alignment of 340°T – 160°T.

The approach channel has a width of 280 m. reducing to 235 m. In the bend the channel widens to 300 m. and in the entrance channel to 340 m.

The Outer Basin is 2.3 km. long and 600 m. wide with depth of 14 m. and the Inner Basin is 3.7 km. long and 425 m. wide with a depth of 11.5 m. The main axis of both basins is 047° – 227°.

All channel, basin and docks' bottoms are sandstone.

A dual purpose berth for LPG and other tankers is situated in the outer basin. Ships using this berth, for which a berth booking system operates, will generally be berthed starboard side to. A second tanker berth has been opened at Berth No. 2 in the 14 m. basin and is used mainly by vessels loading or discharging high flash point products. On this berth, vessels will normally berth starboard side to. A chemical tanker berth is situated on Quay 7, Berth 51, with depth of water at 11.5 m. Vessels may berth port or starboard side to. No ballast reception facilities are provided at these berths.

In all other berths ships can secure port or starboard side to.

DOCUMENTS: The following documentation shall be delivered to the Authority's Documentation Section at least 48 hours prior to the vessel's arrival. The Authority reserves the right not to commence cargo operations until the below listed documents are received.

(a) Discharging Vessels
3 copies Cargo Stowage Plans
8 copies Cargo Manifests
8 copies Cargo Declaration
3 copies Crew List
3 copies Hazardous and Dangerous Cargo Declaration
3 copies Hatch List
3 copies Arrival/Cargo Advice
1 copy Each Bill of Lading/Packing List

(b) Loading Vessels:
3 copies Cargo Stowage Plans
3 copies Cargo Loading List
8 copies Hazardous and Dangerous Cargo Declaration
1 copy Customs Endorsed Export Declaration (for each consignment).

On completion of loading, 8 copies of the vessel Manifest endorsed by Ports & Customs must be provided.

Note: For categories (a) and (b), in the absence of any hazardous or dangerous cargo, "Nil" Declaration *must* be made.

(c) Tankers:
3 copies Manifest
3 copies Cargo Plans
1 copy Certificate of discharge of previous cargo.

A copy of the "Notice of Readiness" should be made available to the Harbour Master on rquest.

Immigration: Three Crew Lists are required on arrival.

Immigration Offices are established in the port. The service is available 24 hours a day. However, Masters should advise their Agent that the ship may leave outside normal office hours and that the Agent should check that Immigration Officials will be available to clear the vessel outward. This also applies to public holidays.

Masters are advised that "Immigration Clearance" must be on board and sighted by the Pilot before he can take the vessel to sea.

MINIMUM REQUIREMENTS:

In the interest of avoiding delays, all vessels programmed for Jebel Ali should comply with the following minima and be fitted with:

(i) Fully operational Radar.
(ii) Fully operational VHF Radio with normal marine channels.
(iii) Sufficient crew to handle tugs' lines and moorings efficiently.
(iv) Efficient propulsion and deck machinery.
(v) Efficient and adequate moorings to secure vessel safely.
(vi) Efficient signalling equipment.
(vii) Fully operational Tachometer, Rudder and Helm indicators.
(viii) Efficient mooring stations communications systems.
(ix) An efficient anchor windlass and anchors.

If any of the above requirements cannot be complied with, the Harbour Master should be advised prior to arrival via "Jebel Ali Port Control".

PILOTAGE: Pilots are available on a 24-hour/day basis. Ships requiring a Pilot should call "Jebel Ali Port Control" on VHF Channel 16 at least 2 hours before arrival at Pilot Boarding Area.

All ships other than excepted ships, navigating whether by entry, leaving or moving within Jebel Ali shall be under the charge of a pilot.

The following ships will be excepted ships:

(i) Ships of War.
(ii) Pleasure Craft.
(iii) Ships of less than 150 n.r.t.
(iv) Tugs, dredgers, barges or similar vessels whose ordinary course of navigation does not exceed beyond the Gulf.
(v) Tenders of M.E.N.A.S.
(vi) Country Craft.

Pilots will board from fast launches, marked "Pilots" equipped with VHF, watch kept on Channel 16. Call sign "Jebel Ali Pilots".

Vessels requiring a Pilot should give at least 2 hours notice of arrival in the Pilot Boarding Area, but vessels may be instructed to approach the channel entrance by Port Control.

Outbound ships should request Pilot at least one hour prior departure. Masters should obtain "Master's Report" from the Inward P and return it completed before the Pilot leaves. Masters are advis that Outward Pilot cannot take the ship to sea, without having sigh valid "Immigration Clearance" first.

Pilot Boarding Areas: The Pilot boarding area is located North of t channel entrance. The centre of this area is in position Lat. 25° 09′ Long. 54° 54′ E. with a radius of 1 mile.

Pilots will normally meet and embark incoming vessels at the abo mentioned Pilot boarding area.

Masters are reminded to provide a safe lee.

Pilot Ladder Requirements: The following points are stressed:

(i) The rigging of pilot ladders and the embarkation a disembarkation of Pilots thereby shall be supervised by responsible officer of the ship.
(ii) Every pilot ladder shall be secured in a position clear of a possible discharges from the ship, and so that each step re firmly against the ship's side.
(iii) Every pilot ladder shall be secured in a positon where the P can gain convenient access to the ship after climbing not le than 5 ft. and not more than 30 ft..
(iv) Whenever the distance from the water to the point of acces the ship exceeds 30 ft., access from the pilot ladder to the s shall be by means of an accommodation ladder or equally sa and convenient means.
(v) A light shall be provided at night so that the pilot ladder overs and also the position where the Pilot boards the ship shal adequately lit.
(vi) Lifebuoy and heaving line should be available at the ladder.
(vii) When a pilot hoist is provided as the method of access, it m be of an "approved" type, complying with the recommendatio of the "European Maritime Pilots Association".

APPROACHES: Ships should make for "Mina Jebel Ali" light floa position Lat. 25° 10′ 30″ N., Long. 54° 52′ 15″ E. (Gp. Fl.3 ev 12 secs. 15 miles). This float lies on the axis of the channel leading t Jebel Ali Port i.e. from this float vessel should steer 135° to approa Pilot Boarding Area.

Vessel should await Pilot in the area North of the seaward end of t buoyed channel, marked by a fairway buoy. This buoy is a safe wa mark painted red and white vertical stripes. Light character is Fl. 10 s The centre of this waiting area, with a radius of 1 mile, is Lat. 25° 09′ and Long. 54° 54′ E.

ANCHORAGE: The holding ground is poor, ships are recommende use more chain than usual.

The anchorage is an area enclosed by the following four position

1.	Lat. 25° 11′ 20″ N.	Long. 54° 49′ 45″ E.
2.	Lat. 25° 08′ 12″ N.	Long. 54° 53′ 12″ E.
3.	Lat. 25° 05′ 18″ N.	Long. 54° 49′ 45″ E.
4.	Lat. 25° 08′ 20″ N.	Long. 54° 46′ 12″ E.

Ships will anchor here in a depth of approximately 16 m. – 20 (9 – 11 fathoms).

Pipe-line: All ships are warned that an untrenched pipeline lies Eas the channel. This line comes ashore in position 25° 01′ N., 55° 04′ 30 From this position it lies in a direction of 345° for approximately 10 mi thence assumes a direction of 313° towards the "Fatah Field" i.e. from 2 to 5 miles East of the buoyed entrance channel. Other untrench pipelines are laid on the seabed and are clearly marked on the Admi Charts of the area. Ships should **not** anchor near this or other pipeli nor should they approach the area with anchors walked back or trai

MAX. SIZE: No limit on LOA except Tanker Berth. Max. LOA Tan Berth 273 m.

Also see "Berthing", "Bulk Handling Facilities" and "Tankers".

RADIO: *ETA requirements:* (Also see "Tankers").

Vessels arriving at the Port of Jebel Ali are required to provide t Harbour Authority with the following estimated times of arrival:

(i) At least 48 hours prior to arrival or on leaving the last p whichever is later, via Bahrain Radio, Inmarsat, Telex No. 47 DPA EM or Fax: 04-835430. Ship/shore telephone may be u on 04-835326 only.
(ii) Confirm the vessel's estimated time of arrival at least 24 ho before arrival at the designated pilotage area.

Communications: The Port radio station maintains continuous listen watch on VHF Channel 16. The Port Emergency Channel is 18A coming within VHF range of "Jebel Ali Port Control", vessels sho establish VHF contact for the purpose of updating the estimated tim arrival, and at least 2 hours' notice of arrival in the Boarding Area sho be given.

Vessels are warned that VHF Channels are monitored a taperecorded and any misuse of VHF Channels will be reported to proper Authorities.

Notice of Arrival: Each vessel Owner, Operator or Charterer expec to dock a vessel at the port for the purpose of loading or discha cargo shall give the Authority 2 days prior notice of the arrival of s vessel and furnish such information as the Authority may requ Reconfirmation of the vessel's arrival shall be made by the vess Master on the day prior to arrival.

Pre-Arrival Information: Prior to arrival, all vessels regardless of tonn calling at the Port of Jebel Ali should provide "Jebel Ali Port Con with the following information:

(i) Name of vessel
(ii) Port of Registry
(iii) Name of Master
(iv) Gross Tonnage
(v) LOA
(vi) Draft
(vii) Cargo to discharge or load
(viii) Pilot boarding arrangements
(ix) Number of crew, indicating the number of deck crew availab manoeuvring
(x) Health information
(xi) Last port of call.

VHF: See "Radio" and "Pilotage".

RADAR: VTS harbour radar in Port Control Tower in position 29° 59.4′ N., 55° 02.9′ E.

The Control Tower is equipped with a Sperry Radar Vessel Traffic System. This equipment consists of a dual radar system combined with a data processor and computer. Traffic movements are monitored, and recorded within the Port limits and approaches. The Tower is continually manned by qualified Radar/Radio Operators.

TUGS: Three fire-fighting tugs "Asad", "Namer" and "Shadeed" are maintained in service by Dubai Ports Authority. These tugs are fully equipped with radar, VHF, towing winches and towlines. "Asad" and "Namer" are of 2,300 h.p. with a bollard pull of over 30 tons; "Shadeed" is of 3,100 h.p. with a bollard pull of over 40 tons. These vessels are fitted with multi-channel VHF radios. Other privately owned tugs are occasionally available in the port to assist if necessary.

Mooring boats: Three mooring boats, the "Dina", "Laila" and the "Wafa" are available at all times. These boats are also equipped with towing hooks and VHF.

BERTHING:

Berths No. 1 – 17: Depth 14.0 m.
Berths No. 18 – 66: Depth 11.5 m.
Tanker/LPG Berth No. 1: Depth 15 m.
Tanker Berth No.2: Depth 14 m.
"Star Energy" Berths: Depth 14.0 m.
Bulk Grain Berths: Depth 14.0 m.
Dubal Terminal: Depth 14.0 m.

Moorings: Bollards on the various quays and wharves are of capacity and spacing as listed below.

Quay/Wharf	*Capacity* (Tonnes)	*Spacing* (m.)
1, 2, 3	100	27
4A, 4B	70	30
5, 6, 7	70	30
8, 8 Basin	30	30
9 West	70	30
9 East, 10	70	20
West Wharf	15	14.4
East Wharf	15	14.4
Bitumen Wharf	30	20

It is essential that whilst alongside quays, moorings are tended carefully and regularly and conform with recommended mooring patterns for ship sizes. The average rise and fall is 1.14 m.

There are special 250 tonne bollards on Berths No. 5, 7, 12, 19, 20, 21, 22, 23, 25, 26, 43, 44, 45, 46, 48, 49, 52 and 53 for vessels over 300 m. in length. These berths can cater for laid-up VLCCs and are fitted with electric points and shore telephone points. All berths can be connected to fresh water points. Enquiries for further information and conditions to the Harbour Master.

General Cargo Areas: These are located on Quays No. 5, 6 and 10 with 21 m. – 30 m. wide paved aprons, covered and open storage, truck delivery and receiving docks.

Prior arrangements must be made with the Cargo Handling Manager for the discharge of obnoxious and hazardous cargo.

Storage: Seven transit warehouses provide more than 50,000 sq.m. of covered storage. Nine Dutch barns provide 24,000 sq.m. of semi-covered storage. Over 400,000 sq.m. paved open storage areas are provided.

Equipment: A full supply of supporting cargo handling equipment to complement general cargo operations is available. This includes 5 mobile hydraulic cranes (1×20 tons, 2×40 tons, 1×60 tons and 1×100 tons capacity) and 2 Gottwald cranes (1×260 E and 1×280 E) capable of lifting 80 tons and 100 tons respectively. Port Operations should be contacted to verify weight limits at various radii.

Ro-Ro Terminal: The Ro-Ro Terminal is situated at Berths 32-34, with two ramps specially designed for stern discharging vessels, and a water depth of 11.5 m.

Cold Store: The Cold Store is situated at Berth 31 and has a capacity of approximately 7,000 tons. Temperature can be separately controlled in each of eight rooms in the range of −29°C. to 13°C.

CONTAINER FACILITIES: The Container Terminal is situated at Berths No. 13 – 17, totalling 1,535 m., with 60 m. wide concrete aprons and a water depth of 14 m. Max. draft 13.25 m.

Storage: The Container Yard can accommodate over 46,000 T.E.U's.

The Container Freight Station provides 10,000 sq. m. of covered storage.

Temperature-controlled warehouse provides 6,700 sq.m. of cool storage at +10°C to +15°C as required.

Equipment: 2 fourth generation Reggianis, 1 third generation Deer Park, 3 third generation Mitsubishi and 2 Hitachi. All gantries are electric with telescopic spreaders to handle 20 ft., 35 ft., 40 ft. and 45 ft. containers and appropriate fittings for overheight and flat rack units. Maximum crane specifications:

S.W.L. under the spreader	41.0 tons.
S.W.L. under cargo hook beam	51.0 tons.
Distance from face or rubber fender to centre line of container at maximum outreach	43.0 m.
Top of container at maximum lift above quay level	32.3 m.
Top of container at lowest position below quay level	16.5 m.
Quay level above highest tide	2.0 m. (6 ft. 6 in.)
Quay level above lowest tide	4.0 m. (13 ft. 1 in.)
Container crane travel	1,535 m.
Container crane reach behind back rail	15.0 m.
Maximum weight of 20 ft., 35 ft., 40 ft. and 45 ft. container handled by spreader	41 tons
Maximum heavy lift with spreader removed	80 tons.

34 rubber tyred gantries, 30 at 1 over 5 stack height, four at 1 over 4 stack height. 20 toploaders of 35 tons capacity and 16 empty container handler lift trucks.

400 × 380 Volt reefer ISO and 42 × 230 Volt Mipco refrigerated container plugs with 24 hour monitoring service.

Flat bed trailers, low bed trailers, tractor units, mafis, goosenecks and an assortment of trucks.

Truck scale with a capacity of 50 tons.

A container cleaning service is available.

Container Terminal Crane Booking: Dubai Ports Authority operates a Crane Booking System for the Container Terminal. Cranes are booked in order of receipt of request. Agents should be consulted to assure timely booking of container cranes.

BULK HANDLING FACILITIES: *Dubal Terminal:* This facility is located on Quay 1, Berth No. 1. A travelling unloader equipped with 2 booms having a travel of 140 m. is used for discharging of alumina powder. Hourly capacity 380 t.p.h. through 2 booms. Outreach of boom 27 m. Max. draft 13.25 m.

Bulk Grain Terminal: This facility is located on Quay 1, Berths No. 3 – 4. Two travelling loader/unloader arms, with an outreach of 22.5 m. and a loading/unloading rate of approximately 800 t.p.h. each, are installed, and can travel 460 m. parallel with quay face. Max. draft 13.25 m.

STEVEDORES: Dubai Port Authority (Jebel Ali).

Normal Working Hours:

The normal working hours from Saturdays to Thursdays inclusive (but excluding Public Holidays) will be 0700 hrs. – 1200 hrs. and 1300 hrs. – 1600 hrs.

Any activity outside of normal working hours must be arranged with the Authority and overtime rates may apply.

Working hours are subject to change during the month of Ramadan.

MEDICAL: Medical facilities are provided by Dubai Hospitals, arrangements should be made by Agents. 24 hour emergency medical services are available. Ships should call Jebel Ali Port Control on VHF Channel 16 (Tel: 04-835251) or Port Security (Tel: 04-816222) to arrange ambulance.

TANKERS: *Tanker/LPG Berth No. 1:* This berth provides facilities for product tankers as well as LPG and condensate carriers. 6 loading arms are available to handle Product tankers through 10 in. connections with reducers available. On the LPG half of the jetty, there are 3 loading arms with 16 in. connections. Two vapour return lines are also fitted, 1 for propane and 1 for butane with 14 in. connections. Various reducers and straight pieces are also available. The depth of water in the berth is 15 m. Max. draft 14.25 m. on H.W. Max. LOA 273 m.

This berth is equipped with mooring hooks of 100 tons strength, each fitted with electric capstan. The hooks are tripped manually.

Tankers will generally be berthed starboard side to the Berth.

Tanker Berth No. 2: This berth provides facilities for product tankers, using 10 in. Chicksan arms. For certain products flexible pipeline connections are permissible. Various reducers are available. On this berth, Class 1 products can also be handled. Max. draft 13.25 m. Max. LOA 225 m.

Chemical Tanker Berth: A designated Chemical Tanker berth is operational at Berth No. 51. Depth of water at the berth is 11.5 m. Max. draft 10.75 m.

"Star Energy Resources" Berths: Star Energy Resources operate 2 product tanker berths on Quay 2 (Berths No. 8 and 9). Two ships upto 255 m. LOA each can be accommodated simultaneously on these berths, which are equipped with 2×12 in. Chicksan arms. Berths are also equipped with mooring hook assemblies, each fitted with capstans. The hooks are tripped manually. Maximum draft 13.25 m. Tankers can be berthed port or starboard side to the quay.

Vessels are warned that no dirty ballast discharge will be allowed within the limits of Jebel Ali. There are no shore ballast reception facilities.

Also see "General".

Vessel Requirements: Below, are details of information required by the terminal operators for accepting vessels for LPG, LNG and Condensate loading and Port Authority of Jebel Ali's requirements and regulations for a tanker in berth.

Dubai Port Authority (Jebel Ali) – Tanker Berth: Uniform mooring system is advisable, i.e., all synthetic or all wire for all moorings except backsprings. D.P.A. does not allow the use of nylon tails on wire moorings. Backsprings must be of wire.

Concerning deballasting requirements P.A.J.A. allows the discharge of permanent segregated clean ballast in the harbour. Clean tank ballast can only be discharged if a surveyor appointed by Agents at Owner's/Charterer's expense, certifies that the tank ballast is clean, that all cargo pumps and lines are clean and the surveyor remains on board to witness and if necessary stop the discharging of cargo tank ballast if it proves to be unclean. This operation takes place during daylight hours only.

It is also recommended that all efforts be made to cut down time taken by ships for documentation purposes after completion.

Bunkers may not be taken during cargo operations.

On all occasions, D.P.A. would berth all ships starboard-side-to on the tanker berth unless some particular "one off" technical reason prevents this.

LPG – Vessel Particulars: The following items shall be submitted with each vessel nomination. In the event that all the data is not available, the nominated vessel acceptance shall be tentative and subject to the approval of "Seller" Dubai Natural Gas Company Limited.

1. Vessel name and flag.
2. Vessel Master's name.
3. Vessel ETA at Jebel Ali.
4. Vessel communication channel.
5. Vessel description (weight, length, dimensions, etc.).
6. Loading connection: (a) Size. (b) Rating. (c) System – ASA/Metric/British, etc.
7. Height of the loading connection from the centre line of the flange to the first obstacle downward below each flange.
8. Distance from the loading flange face to ship's rail.
9. Distance between loading and vapour return connection centres.
10. Distance from the loading flange to the first obstacle toward the manifold.
11. Height of the ship's rail in front of the loading manifold.
12. Previous cargo and its origin.

13. Manifold sequence of the loading and vapour return connection.
14. Loading rate per product for this particular lifting.
15. Cargo tanks temperature per product upon vessel arrival at the loading port.
16. Can propane and butane be loaded simultaneously?
17. Cargo on board, its origin and specification per tank upon vessel arrival for loading.
18. Vessel meets Government, D.P.A. and seller regulation, or specify which regulation the vessel meets.
19. Vessel in possession of reducers, their type, size and rating.
20. Demurrage rate and conditions, if any.
21. Specify if vessel will install any mesh screens in their manifold during this lifting.
22. Amount to be loaded.
23. Vessel has nylon mooring lines.
24. Buyer or Agent to notify Dugas of the vessel location, quantity to be loaded and its ETA 72, 48 and 24 hours before the first day of the vessel's scheduled ETA.
25. Can propane and butane be purged and/or cooled simultaneously? (If applicable.)

LNG – Vessel Particulars: The following items shall be submitted with each vessel nomination. In the event that all the data is not available, the nominated vessel acceptance shall be tentative and subject to the approval of "Seller" Dubai Natural Gas Company Limited.

1. Vessel name and flag.
2. Vessel Master's name.
3. Vessel ETA at Jebel Ali.
4. Vessel communication channel.
5. Vessel description (weight, length, dimensions, etc.).
6. Loading connection:
   (a) Size.
   (b) Rating.
   (c) System – ASA/Metric/British, etc.
7. Height of the loading connection from the centre line of the flange to the first obstacle downward below each flange.
8. Distance from the loading flange face to ship's rail.
9. Distance between loading connection centres.
10. Distance from the loading flange to the first obstacle toward the manifold.
11. Height of the ship's rail in front of the loading manifold.
12. Previous cargo and its origin.
13. Vessel gas vapour venting system.
14. Loading rate for this particular lifting, per single loading arm connection.
15. Ballast on board condition (clean, dirty, etc.).
16. Deballasting estimated time required after berthing.
17. Cargo on board, its origin and specification per tank upon vessel arrival for loading.
18. Vessel meets Government, D.P.A. and seller regulation, or specify which regulation the vessel meets.
19. Vessel in possession of reducers, their type, size and rating.
20. Demurrage rate and conditions, if any.
21. Specify if vessel will install any mesh screen in their manifold during this lifting.
22. Amount to be loaded.
23. Vessel has nylon mooring lines.
24. Buyer or Agent to notify Dugas of the vessel location, quantity to be loaded and its ETA 72, 48 and 24 hours before the first day of the vessel's scheduled ETA.

Condensate – Vessel Particulars: The following items shall be submitted with each vessel nomination. In the event that all the data is not available, the nominated vessel acceptance shall be tentative and subject to the approval of "Seller" Arco Dubai.

1. Vessel name and flag.
2. Vessel Master's name.
3. Vessel ETA at Jebel Ali.
4. Vessel communication channel.
5. Vessel description (weight, length, dimensions, arrival draft fore and aft, estimated departure draft, etc.).
6. Loading connection:
   (a) Size.
   (b) Rating.
   (c) System – ASA/Metric/British, etc.
   (d) Is manifold located centre line of LOA.
7. Height of the loading connection from the centre line of the flange to the first obstacle downward below each flange.
8. Distance from the loading flange face to ship's rail.
9. Distance between loading connection centres.
10. Flange thickness. Maximum acceptable: 37 mm.
11. Clearance behind connecting flange for coupling claws. Minimum requirement: 240 mm.
12. Height of the ship's rail in front of the loading manifold.
13. Previous cargo and its origin.
14. Loading rate for this particular lifting. Minimum requirement 25,000 bbls p.h. per single loading arm connection.
15. Specify quantity of permanent and cargo tank ballast on board. Only permanent segregated ballast discharge allowed at Jebel Ali port. Repeat only permanent segregated ballast discharge allowed.
16. Estimated deballasting time required after berthing. Specify if simultaneous with loading.
17. Cargo on board, its origin and specification per tank upon vessel arrival for loading.
18. Vessel in possession of reducers, their type, size and rating.
19. Please confirm agreement release inert gas pressure in all tanks for inspection by Arco Surveyor.
20. Buyer or Agent to notify Arco of the vessel location, quantity to be loaded and its ETA 72, 48 and 24 hours before the first day of the vessel's scheduled ETA.
21. Arco Dubai advise starboard side alongside.
22. Arco Dubai advise loading arm size nominal 16 in. with provi for 16, 14 and 12 in. connection by hydraulic coupler.
23. Quantity to be loaded, in barrels. Arco Dubai advise
    API:–   Temp.:–

DENSITY: 1032.

FRESH WATER: Supplied by Dubai Water Department (Tel: 816749). Order through Agents. Water laid on at all berths.

FUEL: A Bunkering Barge is stationed in Jebel Ali operated by "E.P Co.". Arrangements for bunkers are to be made through vessels' Agen Barge can deliver diesel oil and/or fuel oil. Delivery by road tanker a available. Tel: 04-816759.

Lubricating Oils: Available, transported by road.

CONSULS: Embassies and Consulates in Dubai (Area Code 04).

Embassies:

Germany	Tel: 523352
United Kingdom	Tel: 521070

Consulates:

Bangladesh	Tel: 628966.	Norway	Tel: 533833

Malaysia	Tel: 285695	U.S.A.	Tel: 313115
Netherlands	Tel: 528700		

The foregoing are Embassies and Consulates situated in Dubai. M countries maintain diplomatic missions/embassies, etc., in Abu Dha some 120 km. from Jebel Ali.

REPAIRS: Berths are available for afloat repairs to be done by lo contractors.

Lay-up Berths for long and short periods can be arranged for vess up to 550,000 d.w.t. with draft up to 13.25 m. Special bollards a installed to provide 8 berths for ULCC class vessels.

Marine engineering firms with specialised workshops in Du undertake engineering repairs. Agents will make necess arrangements.

Repairs to radar, radio, echo sounders and other electro navigational and communication aids are available by ma manufacturers' Agents, (i.e. Marconi, Decca, Kelvin-Hugh Telefunken, etc.), being represented in Dubai and sets serviced trained engineers. Agents will advise.

A Port Authority diver can be arranged through vessel's Agent.

SURVEYORS: Lloyd's, B.V., A.B.S., N.V., N.K. and the Salv Association as well as other private qualified cargo, hull and eng surveyors and consultants are available.

Gas Free Certificates, Inert Gas Certificates and Hot Work Perm can be obtained through independent qualified surveyors who mus on Dubai Port's Authority (Jebel Ali) approved list. Agents will arra

Surveys: The following surveys and certification can be carried ou Jebel Ali: Load Line, Safety Equipment, Safety Construction, Radio

TELEPHONES: Ship board telephones available by arrangement.

Important Telephone Numbers at Jebel Ali:

Port Control	835326
Harbour Master & Port Control	835251
Police	816111
Port Health	816892
Customs	816374/5
Immigration	816844/816334
Ambulance and Fire Service	816222 (24 hours)
Security	816846/816578 ext. 218, 232, 233

SHORE LEAVE: The following is the standard procedure for shore le as dictated by the Port Immigration Department.

Crew members wishing to go ashore are to report to the P Immigration Office (Agent to arrange) and collect a "Marine Land Permit" which should be carried at all times. On returning to the s the permit should be handed back to the Port Police. The process i be repeated on every subsequent shore leave.

GARBAGE DISPOSAL: Skips are compulsory for domestic garb and are provided alongside ships and changed as necessary. Char Drhs. 70 per day and Drhs. 150 per skip change. Skips can also rented for industrial garbage. Contact Harbour Master for details.

WASTE OIL DISPOSAL: The port has no waste oil disposal facil but several local companies can arrange disposal by tanker truck agents can arrange these facilities. Charges are negotiable. Municip kapproval is required. Contact Harbour Master for details.

SEAMAN'S CLUBS: International Seamen's Club (Tel: 4355 Norwegian Seamen's Mission (Tel: 470561/3). Jebel Ali Internat Seamen's Centre: Situated on Quay No. 10. Tel: 835297. Hours: 11 2359 daily. Facilities: Bus service to and from berths; internat telephones; post box and stamps; small shop for tobacco, toilet writing materials, etc.; money changing; pool and darts; T.V. and vi library; snacks and full bar service.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.65 (F Rate).

WEATHER: *Weather and Currents:* Cross currents of up to 1.75 k may be experienced in the Approach Channel. These currents are and tide-induced.

Fresh winds are frequently experienced at Jebel Ali. However, d evening, night and morning hours, light Southeasterly winds pre veering to N.W. by noon and freshening to Force 4-5.

On occasions, especially during November-March, fog ma prevalent during early morning.

GENERAL: *Dirty Ballast and Refuse:* All vessels are warned th dirty ballast, bilges, etc., should be pumped out in the vicinity of the of Jebel Ali. Offenders will be prosecuted and the U.A.E. and D

Police maintain maritime and helicopter patrols to ensure no dirty ballast is discharged and no refuse is thrown overboard.

These rules apply while vessels are alongside and the Harbour Master may instruct offending vessels to leave or bar them from returning to Jebel Ali.

Rubbish skips supplied by the Port Authority at a charge and are compulsory.

Ballast Requirements: For the purpose of safe manoeuvring, the Harbour Master requires all vessels to maintain an acceptable ballasted condition.

Vessels should carry sufficient ballast so that the propeller can have maximum immersion whilst maintaining an acceptable stern trim.

Masters are reminded that no dirty ballast will be allowed to be discharged in Jebel Ali.

Tanker Ballast Discharge Rules:

1. Clean water ballast from tankers segregated ballast tanks may be discharged overside.
2. Clean water ballast from dedicated clean ballast tanks as defined in Marpol 73/78 may also be discharged in the port. However, if no separate ballast pumping system exists then such discharge must be monitored by an independent surveyor and the ballast discharged must be certified clean. This discharge operation may take place during daylight hours only.
3. Ships in the "C.O.W." mode may not discharge ballast from cargo tanks, unless such tanks have been thoroughly cleaned and have reverted to the status of C.B.T. since last carrying oil.
4. "Clean" ballast means ballast containing less than 15 parts per million of Hydro Carbons.
5. Not withstanding all the above, if any visible signs of pollution are seen on or below the surface around the ship discharging ballast, the ballast discharge will be stopped and no further discharge will be permitted.

Fumigation: Fumigation can be carried out by specialist firms.

Ships' Chandlers, Ship Supplies: All types of provisions – fresh and dry, and all types of fresh and frozen meat are available ex-Dubai. Arrangements through Agent and/or through direct VHF contacts with ship chandlers and provision merchants. Paints, ropes, etc., available as well as charts. Laundry services are also available.

Visitors Port Passes: Any Person entering the Port is required to have either a permanent or visitors temporary/day pass. Passes can be obtained from the Pass Office situated at the Main Entrance. The Pass Office operates daily from 0700 hours to 1900 hours.

Permanent passes cost Dh. 25 each and are valid for 12 calendar months from date of issue. Applicants are required to produce a Sponsor's letter and complete an application for Pass Form. Documents such as Passports and photographs are not required.

Temporary or Day passes which are free of charge are only issued to irregular visitors who have a confirmed appointment to visit the Port. No more than one of these passes a month will be issued to any individual. Day Passes can be obtained from the Pass Office or any Terminal Checkpoint.

Shops: A small supermarket is open in the port. Hours of work are: 0800 – 1300 hrs. Saturday to Thursday inclusive.

Bank: A bank complex is situated just outside of the port main gate. Most major banks or their correspondents have branches there.

Transport: Arrangements for taxis can only be made through the Agent.

Lights: Admiralty List of Lights Volume F. United States List of Lights Publication No. 112 (Defence Mapping Agency).

Radio Aids:

British: Admiralty List of Radio Signals, Volume 8.

American: Radio Navigational Aids (Defence Mapping Agency), Publication No. 117B (Pacific/Indian Ocean Area).

SHIPMASTER'S REPORT: June 1990.

Location: A third tanker loading/discharging facility is situated at Berths No. 8 and No. 9, on the N.E. face of the 14 m. basin. This facility is operated by Star Energy Corporation (See "Berthing").

Star Energy are based in Abu Dhabi, Telex No. 24160.

Documents: The documents listed in the "Guide" do not apply to tankers. Requirements for tankers are:

1 copy Arrival/Cargo Advice (supplied by Pilot).
2 copies Bonded Stores List.
2 copies Drugs and Firearms Declaration.
2 copies Crew Declaration.
3 copies Crew List.
1 copy Maritime Declaration of Health (only if sickness on board, or if it is necessary to have any vaccinations performed).

Ship's Agency also usually has own Arrival/Sailing forms to be completed.

Anchorage: The Eastern corner of the anchorage area has been found to have very poor holding ground, and it is suspected that there may be scattered coral heads in this area, as this vessel dragged anchor there in moderate weather conditions, and anchor flukes were later found to have been damaged by the nature of the bottom.

Radio: Jebel Ali Port Control listen on Channel 16, and usually conducts operations thereafter on Channel 69.

Tugs: There are usually 3 modern tugs, owned by the Port Authority, on duty: The 'Asad', 'Namer' and 'Shadeed'.

Tankers: Tanker Berth No. 8: Alongside continuous fendered quay at N.E. end of 14 m. basin, equipped with 1×12 in. Chicksan arm. Products handled at present are naphtha, gas oil and fuel oil.

Tanker Berth No. 9: Adjacent to No. 8, on same continuous quay, equipped with 2×12 in. Chicksan arms. As far as is known same products handled as at Berth No. 8.

Both berths can accommodate product carriers of up to, and sometimes in excess of 100,000 d.w.t., the larger vessels usually only part-load.

The terminal acts as a trans-shipment depot, for oil products supplied from other ports and refineries in the Gulf.

Vessels are berthed either side alongside at both berths.

Star Energy Complex: This is a self-contained area within the Jebel Ali Port Complex. The Operators enforce very strict security and safety procedures.

Crew members are not permitted to wander about or walk to the entrance gate, but must use the transport provided. This only operates on the hour, being summoned by radio. A pass is issued to each person leaving the area, and also a book must be signed. The passes will allow re-entry to the area on return, and are quite separate from the passes required by the Immigration Authorities. Provided the seamen are not leaving the Port Complex itself, e.g. visiting the Seaman's Club, no further passes are necessary.

Should, however, anyone wish to leave the Jebel Ali Port Area itself, to go to Dubai, the following procedure is necessary.

On arrival, most Shipping Agents supply forms which act as requests to the Immigration Authorities to issue a Shore Pass. This form is taken, along with a Passport size photo, and either Seaman's Book or Passport, to the Immigration Office near the Main Gate. An official pass will then be issued, with the photo affixed, after which the individual may leave the Port Area. *It is very important that this document is not lost.*

On return to Jebel Ali, the reverse procedure is necessary, presentation of the official pass will usually obtain the return of the identity document, after which the individual may proceed to his vessel. If the vessel is berthed at the Star Energy facility, their previously mentioned pass is required for admittance.

There are occasions when it may not be possible for individuals to recover their identity documents personally, or some may not have time to wait, in which case the official passes should be returned to the Master, and the Agent can take these to Immigration when Clearance is sought, when the documents in question will be given to him for return to the vessel. Clearance will not be issued until everything is in order, which is the reason for taking care not to allow anything to happen to the official pass.

Lengthy delays may be incurred in the case of any lost pass, as the individual in question must then go, in person, with the Agent, to the Immigration Office, if possible with an explanatory letter from the ship's Master. The procedure outlined above must be adhered to, so that there are no problems.

Departure: Pilots require minimum 1 hour's notice, via Harbour Control of vessel's sailing time. They are required to sight the clearance before leaving the berth, therefore it has been found advisable to actually have it on board before confirming sailing time.

AUTHORITY: Dubai Port Authority (Jebel Ali), P.O.Box 17000, Dubai, U.A.E. *Tel:* Jebel Ali (04) 835251/816578. *Telex:* 47398 DPA EM. *FAX:* Jebel Ali (04) 816093, 835430 (Marine). *Contact:* Captain R.E. Two Port Officers working on rotational basis represent the Port Authority at the Port. They are Captain A.Osman and Captain S.A.Shaffi. Telex: 52207 Apocru Em. Tel: Ruwais (081) 72089. Fax: (081) 72102.

PORT LIMITS: All waters Southward of Lat. 24° 26′ 48″ N., to the coast up to Spring High Water Mark, between meridians of Long. 52° 33′ 36″ E. and Long. 52° 46′ 36″ E., (that is, with reference to Chart 3780 B.A. & USHO, the whole waters of that Chart) and shall include all jetties, wharves, structures, sea-berths, reefs, rocks, sandbars and islands, excluding Sir Bani Yas Island, within the said area.

PILOTAGE: Pilotage is compulsory for all ships navigating within port limits other than exempted ships (See "General"). Ships may, however, drop anchor or sail from Gasha Anchorage without a Pilot. This rule is not applicable to U.A.E. Naval, Coast Guard vessels or country craft who may, having ascertained channel clearance from Port Control, proceed without the service of a Pilot.

Pilot Station: Pilots will board and disembark at the main Gasha Pilot Station as delineated on B.A. Chart No. 3780.

Use of North Channel: Masters of Exempted ships of suitable draft should use the North Channel and East Yabr Relief Channel when entering or leaving the port.

Pilotage Exemption Certificate: Port Pilotage Exemption Certificate may be granted to Masters of regular trading vessels of less than 3,000 n.r.t., upon the Port Officer's satisfaction of their competency. Such certificates shall be renewed annually.

Berthing and Unberthing at Oil and Gas Berths: Notwithstanding anything contained in these Rules berthing or unberthing at oil and gas berths at Jebel Dhanna or Ruwais shall be under the control of a Pilot.

Pilot Ladder: A clean and efficient pilot ladder fitted with spreaders and manropes shall be made available for the Pilot to embark or disembark and at night the ladder shall be illuminated with an efficient and safe light.

Accommodation Ladder and Pilot Ladder: Whenever as in the case of large vessels, the height of the deck above the water exceeds 30 ft., the accommodation ladder shall also be used in conjunction with the pilot ladder, and shall be lowered to about 22 ft. (7.0 m.) above the water with the pilot ladder immediately adjacent to the bottom platform of the accommodation ladder.

Mechanical Hoist: A mechanical hoist of an approved pattern shall be considered an acceptable alternative to a conventional pilot ladder to be used in conjunction with the accommodation ladder.

NOTE: Mechanical hoists whose operation relies upon a single wire are not of approved pattern under these rules.

Supervision of Pilot Ladders: The rigging of the pilot ladders for the embarkation and disembarkation of Pilots shall be supervised by a responsible ship's officer, and shall be so effected that the ladder is well clear of any overboard discharge and so that each step of the ladder rests securely against the side of the ship.

Safe embarkation and disembarkation: A Master of any ship navigating in the port, shall afford such suitable "weather lee" and speed reductions as may be directed by the assigned Authority Pilot in order to provide a safe embarkation or disembarkation operation.

Pilot to Advise Course and Speed: Vessels navigating within Port Limits shall proceed on such a course and at such speed as the Pilot advises.

Provided that when passing through the inner anchorage areas every vessel whether under Pilotage charge, or navigated by her Master with an Exemption Certificate, shall proceed with caution and at a moderate speed duly considering other vessels and cargo operations in the area.

Small High Speed Vessels: High speed vessels as of "Crew Boat" type shall proceed at a moderate speed to reduce the wave making wash in the vicinity of vessels, working cargo, dredging or construction works, diving operations, etc., until past and clear of these vessels or operations.

Anchors Ready for Use: Every ship prior to any movement within the port shall have both Bower Anchors (if two fitted) prepared for immediate emergency use. Masters shall, however, consult with the assigned Pilot (if any) before lowering an anchor to the sea surface.

Any Damage to Ship to be Notified: Before entry the Master shall inform the Port Authority of any damage to the vessel or any projection from the hull above or below water which may affect the vessel's draft, ship-handling qualities or berthing capability.

NOTE:

To ensure greater safety in the Jebel Dhanna Channel, in consultation with Messrs ADPPOC and executive manager of Petroleum Ports Authority, it has been decided to minimise the amount of paperwork the Pilot is expected to complete while in transit from Gasha Beacon to inner anchorage area.

Therefore a vessel arriving at Gasha while tendering her "Notic Readiness" will henceforth be required to pass to Jebel Dhanna:

1. Name of vessel.
2. Tonnage required.
3. Her maximum loading rate, always assuming 2×16 in. hoses.
4. Number of hours ballast.
5. Any health hazard infectious diseases/or none.
6. Draft outwardbound.
7. Any other pertinent information.

The Pilot is to obtain signature on "acceptance of port regulatio booklet prior to entering channel. All other documentation can completed after vessel is made fast in the berth. This will ensure distractions while in transit in the channel and further enhance exemplary safety standards.

All parties are kindly requested to comply with the slight change Jebel Dhanna/Ruwais documentation procedures to enhance sa requirements.

Note:

(i) The date, which the ship was built, is to be included in Sh Particulars.

(ii) Vessels over 20 years old will be subject to a daylight sa inspection.

TIDAL STREAMS: In the outer approaches to Jebel Dhanna-Ruw tidal streams would appear to attain a maximum of 1 knot while 1.7 kn may be encountered in the channel N.E. of Jazirat Sir Bani Yas.

Tidal currents in the area of the berths seldom exceed 0.4 knots.

The tides are generally diurnal, winds from N.E. and N.W. may ca an increase up to 0.6 m. in the height of the tide.

The highest average, spring high tide is 2.0 m. above chart datum

The highest average, neap high tide is 1.0 m. above chart datum

AIDS TO NAVIGATION: Approaches to Jebel Dhanna-Ruwais (B Admiralty Charts No. 3778, 3779 and 3780).

The outer channel for deep drafted vessels between Jazirat Zarak (Zirku) and Gasha Anchorage is marked by 6 buoys and 2 light flo as follows:

Name/No.	*Description*	*Characteristic*	*Position*
Outer Fairway	Safe Water Mark	Iso 10 secs.	24° 45′ 48″ 52° 53′ 12″
O1	Conical Green	Fl.G. 5 secs.	24° 46′ 20″ 52° 49′ 30″

Gasha	West Cardinal	Qk.Fl.(9) 15 secs.	24° 25′ 46″ 52° 34′ 25″

MENAS Notice No. 49/92:
Southern Gulf:

Jebel Dhanna Outer Fairway. The following buoy stations have be established:

Position: Lat. 24° 36.70′ N., Long. 52° 35.70′ E.
Name: JBD 05A.
Character: Fl (3) 10 sec. Shape – Pillar. Colour – BYB.

Position: Lat. 24° 34.80′ N., Long. 52° 32.40′ E.
Name: JBD 06.
Character: Fl R 6 sec. Shape – Can. Colour – Red.

Charts effected B.A. 3779 and 3780.

A relief route known as North Channel passes from the outer fair buoy S.E. of Creagh Shoal and enters the port East of Gasha Isla It is marked by:

Obstruction	Isolated Danger Mark	Gp.Fl.(2) 10 secs.	24° 37′ 50″ 52° 47′ 17″
North Channel	Safe Water Mark	Iso. 10 secs.	24° 30′ 00″ 52° 41′ 36″
West Kurkum	West Cardinal	Qk.Fl.(9) 15 secs.	24° 23′ 51″ 52° 41′ 31″
East Gasha	Green Conical	Fl.G. 5 secs.	24° 23′ 54″ 52° 41′ 15″

The least depth in this channel 7.5 m. (1980) occurs about 0.8 nau miles North of the Gasha/Kurkum entrance.

A Beacon was established at Price Shoal (1980) consisting of a with a bottle chamber at the top and a gas lantern.

Price Shoal	Red Pile Structure	Fl. 5 secs. 12 m. 14 miles Racon "P" 48 secs.	24° 17′ 24″ 52° 42′ 09″

ANCHORAGES: The main anchorage positions are defined on C No. 3780, and are identified by the letters of the alphabet. Vessel anchor not less than 2 miles West of Gasha Buoy and to keep Cha Entrance clear.

Explosives Anchorage: Anchorage bounded by the following poin

(i) 24° 13′ 30″ N., 52° 44′ 55″ E.
(ii) 24° 12′ 46″ N., 52° 45′ 48″ E.
(iii) 24° 13′ 18″ N., 52° 46′ 18″ E.
(iv) 24° 14′ 00″ N., 52° 45′ 27″ E.

Explosives Buoy: Mooring buoy in position Lat. 24° 09′ 36″ N., L 52° 46′ 18″ E., for the purpose of temporary mooring of barge pontoons carrying explosives.

CHANNELS:

Deep Water Channel: The channel marked at its outer end by:
Gasha Buoy in position Lat. 24° 25′ 46″ N., Long. 52° 34′ 25″ E.
marked on the West side by:

Buoy No. 1 in	Lat. 24° 24′ 28″ N.	Long. 52° 36′ 26″ E.

(ii) Stewart	in	Lat. 24° 20′ 09″ N. Long. 52° 40′ 05″ E.

The entrance to the Construction Wharf is marked by:

CW1	in	Lat. 24° 19′ 12″ N. Long. 52° 40′ 20″ E.
CW2	in	Lat. 24° 09′ 10″ N. Long. 52° 45′ 07″ E.
CW3	in	Lat. 24° 09′ 09″ N. Long. 52° 45′ 04″ E.
CW4	in	Lat. 24° 08′ 34″ N. Long. 52° 45′ 08″ E.

PROHIBITED AREAS: Prohibited Areas exist for a distance of 2 cables (1,200 ft. – 365 m.) around any berth at which any ship is engaged in loading or discharging any petroleum cargo of whatever description including crude oils and refined products whether in bulk or containers, LNG or LPG and no vessels or craft may enter such restricted areas without instructions from the Port Authority or Oil Company.

RESTRICTED AREAS:

Sea Berths: A restricted area exists around ADCO's sea-berths within an area bounded by a line from:

(a) Jebel Dhanna Jetty Light in Lat. 24° 11′ 20″ N., Long. 52° 37′ 51″ E., thence 359° to

(b) Light Beacon "T.13" in Lat. 24° 13′ 06″ N., Long. 52° 37′ 49″ E., thence 060° to

(c) in Lat. 24° 14′ 00″ N., Long. 52° 39′ 30″ E., thence to 139° to

(d) Buoy No. 17 in Lat. 24° 11′ 41″ N., Long. 52° 41′ 42″ E., thence 255.5° to the coast to

(e) in Lat. 24° 10′ 48″ N., Long. 52° 37′ 57″ E.

Navigation and anchorage within this area is strictly prohibited to all unauthorised vessels and those not under the control of a Pilot.

Refinery/GASCO/FERTIL: A restricted area exists around the Refinery, GASCO Jetties and FERTIL Jetties at Ruwais within an area bounded by a line from:

(a) in Lat. 24° 08′ 36″ N., Long. 52° 42′ 12″ E., thence 000° to
(b) in Lat. 24° 10′ 24″ N., Long. 52° 42′ 12″ E., thence 035.75° to
(c) in Lat. 24° 10′ 48″ N., Long. 52° 42′ 30″ E., thence 103.5° to
(d) in Lat. 24° 10′ 18″ N., Long. 52° 44′ 42″ E., thence 119.5° to
(e) in Lat. 24° 09′ 57″ N., Long. 52° 45′ 24″ E., thence 195° to
(f) Construction harbour jetty head in Lat. 24° 08′ 12″ N., Long. 52° 44′ 54″ E.

Navigation and anchorage is prohibited to all unauthorised vessels not under control of a Pilot. Within this area no vessel or craft may secure or make fast to the Petroleum Jetty without instruction from the Pilot, Port Officer or the Oil Company.

RESTRICTIONS:

Times of Entry or Leaving: Subject to limitations upon draft, under keel clearance and extreme adverse weather conditions, vessels may enter or leave at any time during the day or night.

Minimum Under Keel Clearance: To ensure safe channel passage, a minimum under keel clearance is required for all ships entering or leaving the port when deep loaded, as follows:

(a) 3 ft. (0.91 m.) for ships of less than 100,000 Summer d.w.t.

(b) 4 ft. (1.22 m.) for ships between 100,000 and 250,000 Summer d.w.t.

(c) 5 ft. (1.52 m.) for ships of over 250,000 Summer d.w.t.

And such under keel clearance may be increased at any time at the Port Authority's discretion having due regard to weather conditions.

NOTE: While observing the safety requirements of under keel clearance, tidal delays may be experienced as follows:

(a) Ships drawing 44 ft. (13.4 m.) may sail at any time.
(b) Ships drawing 45 ft. (13.7 m.) will rarely have to wait for the tide.
(c) Ships drawing 46 ft. (14.0 m.) will usually have to wait for the tide.
(d) Ships drawing 47 ft. (14.3 m.) will always have to wait for the tide.
(e) Ships drawing 48 ft. (14.6 m.) will occasionally be neaped.
(f) Ships drawing 49 ft. (14.9 m.) will be neaped ±294 days per year.

The best months are June, July and August.

Meteorological conditions may reduce the height of the tide by up to 1 ft. (0.305 m.)

Movements Within the Port Limits: No vessel may enter, leave or move within the confines of the port unless permission for moving is first obtained from the Port Control Office.

Outward Priority: When one ship is ready to leave and another to enter simultaneously, a deep loaded outward bound ship which requires to transit the "Deep Water Channel" on account of draft in excess of 30 ft. (9.14 m.) shall have priority subject to the provisions of Rules mentioned above.

HEALTH: *Quarantine and Medical Clearance:* The standard International Declaration of Health is required upon arrival. Free Pratique is obtained by radio.

There are no facilities for Derat at Ruwais.

If Free Pratique has not been granted prior to the vessel's arrival, the Master may contact Port Control for advice/instruction as per Port Health instructions.

Every vessel within the port shall display the appropriate quarantine signals as prescribed in the International Code of Signals.

ARRIVAL/DEPARTURE NOTICES: *Notice of Arrival:* The Master or Agent shall inform the Port Officer 72 hours prior to the vessel's arrival, giving the following details:

1. Name of vessel.
2. Flag.
3. G.r.t., n.r.t. and Summer Deadweight.
4. Arrival draft.
5. Nature of cargo and amount to be discharged or loaded if known.
6. ETA and subsequent amendments.
7. Deballasting time, type and quantity of ballast to be discharged.
8. Inerting time.
9. Date of expiry of the following certificates:
   (a) Load Line.
   (b) Ship Safety Construction Certificate.
   (c) Ship Safety Equipment Certificate.
   (d) Ship Safety Radio-Telegraphy – as appropriate.
   (e) Ship Safety Radio-Telephony – as appropriate.
   (f) Oil Liability Certificate (TOVALOP).
   (g) International Oil Pollution Liability (CLC).
   (h) Derat/Exemption Certificate.
   (i) Any other service required.

And shall confirm or amend such information at 48 hours and 24 hours before arrival.

Vessels should also advise:

1. The date and final port and country of her last loading at an Gulf or Omani port.

2. A list of ports and countries at which the vessel has called between 1. above and her arrival at Jebel Dhanna.

3. Should the tanker not have loaded in the Gulf or an Omani port since building, then a list of ports and countries at which the vessel has called from the date of building to her arrival at Jebel Dhanna.

In order to expedite Pilot attendance, Masters should endeavour to confirm their final ETA to "Port Control" Jebel Dhanna/Ruwais on VHF radio, Channel 9, 6 hours and 2 hours prior to arrival at anchorage.

Notice by Agent: The Agent shall also supply the Port Health Officer, Customs and Immigration, the requisite ship information 48 hours prior to arrival.

Notice of Departure: The Master or Agent of any ship within the port shall inform Port Control giving at least 12 hours' notice of departure and shall further confirm the time of departure 2 hours before being ready to sail.

BERTHING FACILITIES: The Port of Jebel Dhanna-Ruwais consists of two main oil terminals, one petroleum gas terminal, one bulk cargo terminal, a sulphur handling jetty and a small cargo harbour (See Admiralty Chart No. 3780).

The Crude Oil Terminal at Jebel Dhanna is operated by the Abu Dhabi Company for Onshore Oil Operations (ADCO) and consists of 3 C.B.M. Berths and 1 SBM capable of accepting tankers up to 330,000 d.w.t. and 1,215 ft., (370.3 m.) in length. Minimum depths at the berths are:

Berth No. 1: 51 ft. (15.54 m.) max. length of ship 950 ft. (289.6 m.).
Berth No. 2: 52 ft. (15.85 m.) max. length of ship 1,100 ft. (335.3 m.).
Berth No. 3: 55 ft. (16.76 m.) S.B.M.
Berth No. 4: 55 ft. (16.76 m.) max. length of ship 1,215 ft. (370.3 m.).

Also see "Section B".

The Refinery Terminal at Ruwais about 2.5 miles S.E. of the Jebel Dhanna Terminal Berths is owned and operated by the Abu Dhabi National Oil Company Ruwais Refinery and consists of a 3 km. jetty with 2 deep water berths and 4 coastal tanker berths for the exportation of refined petroleum products and importation of crude oil.

Also see "Section C".

The Abu Dhabi Gas Industries Ltd. (GASCO) Terminal consisting of a 2.6 km. trestle jetty and one berth lies about half a mile East of the Refinery Jetty and can accept LPG carriers in the range 28,000 cu.m. to 125,000 cu.m. There is a minimum depth alongside of 17.0 m.

Also see "Section D".

The Ruwais Fertiliser Industries (FERTIL) Jetty is designed for berthing combinations of vessels up to 2 fully laden 200 m. long, 25,000 d.w.t. bulk cargo vessels along its Eastern side. Provision is made at the Northern end of the jetty for the loading of liquid ammonia.

Also see "Section E".

A bulk sulphur export jetty with 6 berthing face piles capable of handling cargo vessels up to 25,000 tons d.w.t. with a depth of 36 ft. Loading via a single gantry. The jetty is also capable of receiving liquid sulphur.

Also see "Section F".

RUWAIS CARGO HANDLING SERVICE CONSTRUCTION JETTY:

General Information: ADPPOC, as the Port Operator, provides cargo handling service for the prime purpose of serving the construction and commissioning of the ADNOC and GASCO Refineries and Petroleum Export Terminals.

This undertaking is provided on an independent basis as an additional port facility and may be utilised by any importer who wishes to route cargo through the port to destinations in the Western region of Abu Dhabi.

A harbour, known as the Construction Jetty, consisting of 4 small cargo ship berths and 1 Ro-Ro Berth, is situated to the East of the Ruwais Petroleum complex. Vessels and barges with a draft of less than 4.2 m. may enter and lie safely alongside to discharge cargo. Larger cargo ships with a draft in excess of 4.2 m. will anchor in the cargo ship anchorages located N.N.W. 2 miles (approximately) from the Construction Jetty and discharge onto barges.

Extent of Service: Cargo will be worked in the cargo anchorages, weather permitting, during daylight hours only. The target minimum rate for discharge of general cargo will be 700 freight tons per day. In special circumstances these limitations may be modified to suit the dispatch and turn-round of the discharging freighter.

Procedure:

1. Consignee or his Agent must sign a Cargo Handling Indemnity form before discharge and vessel's Manager must sign Port's Conditions of Use receipt before entering port and berthing.

2. All Customs cargo documentation and clearance of vessels is the responsibility of the Shipping Agent/Consignee. Tally receipts will be supplied by the ADPPOC Cargo Representative on site.

3. The ship will normally be charged for port dues only as per 1984 Regulations and Tariff, except that, for working overstowed cargo, a charge per gang hour will be levied to the ship.

4. The consignee will normally pay the full handling charge per freight ton. The charge covers ship stevedoring, barge and towage, and either barge discharge to landed on quay, direct to trailer, or delivered to Custom's Pound.

5. Agents and/or consignees should advise their requirements, vessel ETAs and supply cargo manifests and stowage plans to: The Port Officer, Jebel Dhanna-Ruwais Port, ADPPOC, Ruwais, P.O.Box 61, Abu Dhabi. Tel: Ruwais 72018 daytime or Port Control Ruwais 75700, ext. 5762 (24 hours). Telex: 52207 Apocru EM. Fax: 72102.

PORT EQUIPMENT/CRAFT: The following craft and equipment are available in the port and subject to utilisation may be chartered or hired on application to the Station Manager who will advise the current rates.

Vessels:

3×3,200 h.p. twin screw shiphandling tugs with a bollard pull of 40 tons.

Equipped for fire fighting and oil dispersant spraying, fitted with 2 centrifugal pumps producing 680 cu.m. water/foam per hour to a height of 120 m. through a horizontal distance of 85 m.

Each tug carries 45 metric tons of foam and 11 metric tons oil concentrate dispersant.

3×15 m. twin screw mooring launches, 480 h.p. with 2 live-on-board crew.
4×15 m. single screw mooring launches, 360 h.p. each, no accommodation.
3×16 m. twin screw pilot-cum-ambulance vessels, 20 knots with live- on-board accommodation.
1 twin screw diving tender vessel.
1×12 m. single screw general purpose workboat.
1 barge with reinforced deck for heavy lifts.

Shore Equipment:

1×55 ton Manitowoc mobile crane with 30 m. boom.
1×10 ton forklift.

Miscellaneous:

Fully equipped marine workshops for repairs, overhauls to tu launches, vehicles, mooring buoys, etc.

Two double lock (2 man) decompression diving chambers in conditioned module.

MEDICAL: If any person suffers a serious injury or sickness within port limits and immediate medical attention becomes necessary Master of the vessel concerned or the person in charge of the locat shall notify the emergency to the Port Control on VHF Channel 9.

N.B. The Port "Casevac" system for such emergencies will be into immediate effect by the Port Control.

Masters of all vessels are hereby advised that a brief but conc description of the injury or sickness must be stated at the time reporting. In the event a crew member has to be landed hospitalisation the following items should accompany the casualty:

(a) Passport and/or Seaman's Discharge Book
(b) Vaccination Certificates
(c) Address of next of kin
(d) Brief report (if necessary pinned to an unconscious perso comprising:
    1. Time and cause of accident/sickness
    2. Time and description of medication administered, if any
    3. Further details of First Aid given, and/or symptoms notice
(e) Masters of vessels which are not berthed alongside the Ruwa jetties should prepare invalid cases for landing in a fast laun or picking up by helicopter e.g. Niel Robertson stretcher; a afford a weather lee (if possible) in adverse weather conditio

Medical/Police Assistance: The Master of any vessel within the Port which Medical or Police assistance is required shall make request such assistance through the Agent.

FRESH WATER: Fresh water is obtainable at the refinery berths a should be arranged through the ship's Agent.

FUEL: Bunkers are obtained at the refinery berths and should arranged through the ship's Agent.

The following bunker fuels are available:

A. Marine Diesel Oil

Test and Spec. Limits	*Method*	AST
1. Viscosity Kin. at 33°C, CS, Max.	1.4	D44
2. Carbon Residue Conradson Wt. Pct. Max.	1.5	D18
3. Flash Point °C, Min.	66	D93
4. Water Cont. Pct. Vol. Max.	0.25	D95
5. Sediment Pct. Wt. Max.	0.02	D47
6. Ash Pct. Wt. Max.	0.02	D48
7. Sulphur Pct. Wt. Max.	1.80	D12
8. Pour Point °C Max.	12	D97

7. Pour Point °C. Max.	24	D97
8. Sp. Gravity at 60/60° F. Max.	0.990	D12

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: U.A.E. Dirhams (Drhs).

CLIMATE: The cool winter season extends over November to Febru with mean daily maximum temperatures of 25° C. to 30° C. and ni temperatures of 10° C. to 15° C. The lowest recorded temperature be 4° C. Ground frost can occur inland.

The hot summer season extends over May to September w maximum day temperatures between 40° C. to 45° C.: the high recorded being 48° night temperatures are about 20° C. to 25° C.

Relative humidity is high throughout the year averaging between and 60 per cent by day and 75 to 80 per cent by night. Heavy dew m be experienced throughout the year.

Rainfall is usually associated with thunderstorms which are preva from November to May giving a total annual rainfall of 10 mm. to 50 m Rain is rare during the remaining months while in some years there none at all.

Throughout the year the prevailing winds are from the West to N North-East sector. They are strongest during November to April wh they occasionally reach gale force. Gusts of up to 50 knots have be recorded (April) and a 24-hours mean wind speed of 32 knots from North-West is on record (January) the Shamal or strong North-W wind may blow for periods up to three days and raise a rough sea w waves up to 4.5 m. off Gasha buoy and up to 2 m. at the berths in Je Dhanna. 'Land and Sea' breezes are experienced throughout the ye

Visibility is 10 nautical miles for 70% of the time and less th 2 nautical miles up to 5% of occasions due to dust haze or radiation Fog can occur during any month of the year but is most frequen Winter: normally it develops during the night and early morning a clears by 1000 hrs. Usually the fog banks drift to seaward towards Bani Yas Island.

Sea temperatures at 3 m. depth range from 20° C. (Winter) to 32 (Summer). During the Summer the 15 m. depth temperature is on degree or so lower than that at the surface.

GENERAL:

Stores: Emergency stores may be obtained by giving 48 hours' no to the Ship's Agent. These stores are not permitted to be loaded a oil or gas berth and must be taken on board in the anchorage.

Agency: Agency work is carried out by registered Shipping Agents w are appointed by the vessel's owners, Charterers or Master.

In no instance will ADPPOC or any of the Oil Companies unde the agency of a ship.

M.E.N.A.S. Light Dues: Masters are advised that the "M.E.N.A.S." Light Dues for the Gulf navigation aids, when applicable, are collected by the vessel's Agents for payment direct to "M.E.N.A.S.", Bahrain.

Flag: Every vessel within the port shall fly her own national flag and the flag of the United Arab Emirates from sunrise to sunset.

Inward Clearance: No person other than the Pilot, Police, Customs, Immigration and Port Health Officers shall be allowed on board any vessel before Inward Clearance has been granted by such officials.

Port Clearance: The Owner, Master or Agent of every vessel wishing to leave the Port shall obtain a Port Clearance.

Port Clearance may be withheld from any ship by the Port Authority for non-payment of dues or for any legal cause or restraint which has been duly ordered by the Court in Abu Dhabi.

Exempted Ship: To mean ships exempted from pilotage whose Master has been granted a Pilotage Exemption Certificate by the Harbour Master.

Excepted Ship: To mean vessels excepted from paying Port Dues. Excepted ships shall include the following vessels:–

(a) Vessels of the U.A.E. Defence Forces.

(b) Vessels belonging to U.A.E. Customs, Medical and Police Services.

(c) Dredgers, Survey Vessels and special ancillary non-cargo craft, on contract to the Port Authority, ADNOC.

(d) Light tenders belonging to or on contract to M.E.N.A.S.

(e) Vessels and Ships excepted from such charges by order of H.E. the Ruler.

Port Control: The officers currently situated at Ruwais Construction Wharf are responsible for all vessel traffic movements within the port limits and the implementation of the Port Officer's instructions pertaining to the management of the port.

N.B. – Vessels should communicate with the Port Control via VHF radio.

Heavy Lift: Any piece of cargo inclusive of transportation cradle whose deadweight is in excess of 35 long tons (35.56 tonnes).

Country Craft: Mechanically propelled vessels less than 100 n.r.t. engaged in the coastal trade which may also rely upon sails for motive power.

Rat Guards: Rat guards must be fitted to all mooring ropes and wires immediately a vessel is secured alongside a berth on a jetty or wharf.

Mooring Launches: All ships berthing or unberthing at a main sea berth, oil jetty or cargo wharf will be provided with a suitable Port Authority mooring launch (if required) to assist with the running of moorings and the lifting of submarine loading pipelines in the case of ADCO's sea berths.

Main Engine Readiness: Every vessel berthed at an Oil Terminal or cargo wharf shall maintain her engines in a state of constant readiness to move at all times. No repairs which may immobilise the vessel shall be permitted to be carried out while vessels are in the berths.

A Master of any ship securely anchored in an assigned anchorage area, may request permission from the Port Control to carry out routine engine repairs or overhaul. The granting of such permission will be subject to the respective Terminal approval that the berthing time factor is sufficient.

Sufficient Crew Onboard: Every vessel within the Port shall retain on board at all times a sufficient number of crew as may be necessary to perform any duties concerned with the safety and movement of the vessel.

Fire Wires: All ships berthed at the GASCO and Refinery Terminals shall provide 2 Tug Fire Wires, 1 forward and 1 aft, throughout the period of occupying such berth. The wires shall be robust, with one end fitted with a spliced eye, which shall be maintained at a height of 2 ft. above the sea surface on the outboard side of the ship, (i.e. opposite side from jetty). The inboard end of the wire shall be made fast securely on deck.

Craft Alongside: No Craft shall attempt to make fast to or go alongside a ship manoeuvring in the port before such ship has anchored unless specially permitted by the Master and if there is a Pilot on board, the Pilot.

Dirty Ballast: Whenever a ship enters port with ballast which it is necessary to discharge before or during loading, such ballast, in the case of water ballast, shall be clean and not liable to cause pollution of the sea and a certificate to that effect shall be handed to the Port Authority's representative before deballasting commences.

Pollution: Ashes, oils, chemicals, bilge water and other refuse shall not be discharged to the sea or thrown overboard within Port Limits.

The discharge to the sea of any substance whether liquid or solid, other than clean water ballast shall be deemed to cause pollution to the harbour.

The Master of any vessel, the Person in charge of a Terminal or construction operation contravening this rule so as to cause pollution shall be charged with an offence against these Rules and upon conviction be liable to a fine and shall also pay any expenses which may be incurred in the removal of such pollution.

Diving/Swimming: No person shall swim or dive from or near any vessel, jetty, quay or pier for the purposes of trading, recreation or sport.

Diving: No person shall engage in diving with the assistance of breathing apparatus within the Restricted Areas mentioned in Section 4 of these Rules without the written permission or instruction from the Port Authority.

Commercial Diving: Notwithstanding anything contained above, any person or company wishing to operate a Diver for commercial reasons within the Port, shall inform the Harbour Master giving full information of the Diving Operations, and shall conform with such precautions as he may direct in Permission to Dive.

Use of Ship's Radio: The use of the ship's radio within Port Limits is prohibited for the transmission of private messages.

When a ship is secured to an oil or gas loading berth the use of the ship's main radio equipment is totally prohibited. Intrinsically safe VHF radio equipment may be used for necessary port communications.

Ship's Dangerous Stores: Ship's stores of an inflammable or explosive nature, including pyrotechnic distress signals carried in accordance with the Convention for the Safety of Life at Sea shall be kept in a safe place securely closed and sealed while the vessel is moored in a berth. This Rule shall also apply to the vessel's paint locker.

Explosives: No person may bring explosives or dangerous goods into the Port without the written permission of the Port Authority. Vessels importing "explosives" or dangerous goods of an inflammable or corrosive nature will normally be assigned the "Explosives" anchorage on arrival. A Port Authority Representative will inspect the cargo and consult with the Master and Agent before discharge.

The unauthorised handling and detonating of any explosive or pyrotechnic device within the Port Limits is strictly prohibited. Where explosives are required for construction purposes the Contractor concerned must apply to the Harbour Master for written permission. Blasting for commercial purposes shall be under the strict control of the Port Authority.

Pollution Emergency: In the event that pollution of the Port waters occurs, regardless of cause the Person in charge or responsible for the operation, works or location where the pollution was initiated should immediately report the incident to the Port Control.

Where the pollution is serious, particularly oily pollution, the incident must be treated as a full emergency situation, and the call for assistance to the Port Control should be prefixed by the words "MAYDAY, MAYDAY" in order to gain immediate attention.

The Master of the vessel concerned or the Person in charge, shall also take such steps as may stop further pollution and contain or clean up any spillage of oil, etc., on the vessel's deck or jetty surfaces to remove the fire hazard potential.

N.B. – All port Users and Operators are advised that failure to report a pollution incident is an offence against these Rules and Persons found contravening this requirement will be prosecuted in the Abu Dhabi Courts and liable to heavy fines.

Ship's Lifeboats: The lowering of ship's lifeboats within the Port, except in the course of a regulation Lifeboat Drill duly authorised by the Port Authority, is strictly prohibited and during such drill the lifeboats shall not land on any part of the shore.

The use of any boat carried on any vessel solely for the purpose of recreation, pleasure or fishing shall be allowed only at the discretion of the Port Authority subject to the current Security Regulations in force at any time.

Inert Gas System: As the Government of Abu Dhabi have now ratified the Solas Convention, with effect from 1st January, 1984, no tanker will be accepted for loading in this port unless an Inert Gas System has been fitted.

Cargo Discharge Certificates: Abu Dhabi National Oil Company require documentation for cargoes of Refined Products loaded at Ruwais as follows:

1. Discharge Certificate showing:
   - (a) Port of discharge.
   - (b) Discharge quantity in tonnes.
   - (c) Date(s) of discharge.
   - (d) Name and nationality of vessel.
   - (e) Name of Master.
2. Copy of Bill of Lading.

Both documents must be signed by receiver and countersigned by Port Authorities and returned to:

A.D.N.O.C. Marketing Rpd Sl,
Post Box 898,
Abu Dhabi,
U.A.E.

In the event that cargoes of Refined Products are loaded at Umm al Nar the same procedure should be followed.

(B) JEBEL DHANNA – SEA BERTHS TERMINAL

LOCATION: 24° 11′ N. 52° 38′ E.

OPERATOR: ADPPOC is service contractor to Abu Dhabi Company for Onshore Oil Operations (ADCO).

APPROACHES: *(Inward Passage).*

Outer Route between Jazirat az Zarqa and Ghasha Tower Beacon marked by 2 light floats and 4 buoys. The 2 light floats are both port hand marks, and the buoys starboard hand, as indicated by shape, colour and light characteristics.

Inner Channel, from Ghasha Buoy to berths at Jebel Dhanna marked by 21 light buoys. Least depth in this channel is 46 ft. and minimum width of 800 ft. between Buoys No. 7 and 10.

(Outward Passage)

After clearing berth an outward bound vessel should steer to pass midway between Buoys No. 13 and 20, leaving Alaq Island to starboard. From Buoys No. 13 and 20 the same track is followed as for inward passage.

Navigation in shallow waters: The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Masters of ships should be guided by the following:

Due consideration should be given to the effect of squat at speed on vessel's draft in shallow water, bearing in mind vessel's trim.

If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.

Ensure accuracy of vessel's draft reading, including the midship draft, having in mind the tendency of vessels to sag and the adverse effect of a small list.

Reduce to minimum safe speed to pass over and near shoal areas.

Reduce to a minimum safe speed when negotiating turns in order to reduce heel under helm.

Note that list can mean an appreciable increase in draft.

When strong tidal streams are running across a channel, extra vigilance is required, and allowance made for set, particularly at reduced speed, to ensure vessel proceeds along mid channel.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
2 Manifests.
1 International Maritime Declaration of Health.

READINESS TO LOAD: If an accepted Tankship arrives at the Port of Jebel Dhanna and tenders Notice of Readiness to Load:

(i) Within its Set Range then running hours shall commence, berth or no berth, either six hours after such Notice of Readiness or at the time of connection of cargo loading hoses, whichever is the earlier.

(ii) Prior to the commencement of its Set Range then running hours shall commence at 1400 hrs. on the first day of its Set Range, berth or no berth, notwithstanding the fact that loading may have commenced for any reason prior to 1400 hrs. on the first day of its Set Range; or

(iii) After expiry of the Set Range, then running hours shall commence at the time of connection of cargo hoses.

Running hours shall finish at the time of disconnection of cargo loading hoses.

The Company will make every effort to load the tanker on arrival provided a berth is available and weather permitting.

MAX. SIZE: See "Berthing".
Also see Section "A" – "Restrictions".

VHF: Vessels are to maintain watch on VHF Channel 9 when berthed.

EQUIPMENT: Port and Starboard anchors to be fitted with anchor buoys and sufficient line to facilitate recovery of anchor in the event of loss.

4 good mooring lines of not less that 120 fathoms each and of a suitable size for the vessel. 2 additional 120 fathoms lines securely tailed to the first lines for occasions where 120 fathoms may not reach the stern buoys initially.

For vessels of 50,000 d.w.t. and larger, power mooring winches with 200 fathoms wire mooring rope are recommended.

Suitable new rope stoppers to be available forward and aft.

2 good stoppers for use on 40 mm. diameter wires. Preferably patent carpenter's stoppers.

2 good boat ropes 4.5 in. circumference of at least 200 ft. long.

A clean, safe pilot ladder of adequate length battened so as to prevent turning. A suitable line to be ready for hauling gear on board, such as hose clamps, reducers and elbows. A lifebuoy should be placed handy to this ladder.

Tankers of 40,000 d.w.t. and over should have rigged, when in ballast, an accommodation ladder lowered to about 12 ft. above water. This can be adjusted to suit the conditions. A pilot ladder should be rigged immediately adjacent to the accommodation ladder platform, to within 2 ft. of the water. This will enable the Pilot and others when the vessel is moored to ascend the pilot ladder clear of the launch and then step on to the lower platform of the accommodation ladder.

Deck machinery must be available at all times.

Whistle or siren must be available at all times.

Adequate deck lighting should be provided for night-time operations, with special emphasis on the following areas:
1. Overside at boarding position for Pilot.
2. Overside abreast of manifold, for hose lifting.
3. Working area around manifold.
4. Poop working area, for handling mooring ropes and wires.

Note: "Aldis" type signalling lamp to be available when mooring.

BERTHING: Berthing is by mooring to 2 anchors and stern buoys for CBM's or to SPM Berth. Arrangements in advance by contacting Jebel Dhanna Pilots on Channels 9 and 16.

Berths are approached on W.S.W. course passing S.E. of Alaq Island. Leading lights have been established which will lead ships on the line of the 2 anchors when in berth. A small marker buoy has been established to assist the Mooring Master in placing starboard anchor in correct position. Vessels berth heading N.W. Holding ground good. Bottom consists of clayey silt.

Sea Line Loading Berths. 4 Sea-Line Berths No. 1, 2, 3 and 4. Nos. 1 and 2 supplied by single 36 in. lines, and Nos. 3 and 4 supplied by 42 in. lines, each terminating in a header which passes under vessel in berth.

Berth Criteria:

Parameters	*Berth 1* CBM	*Berth 2* CMB	*Berth 3* SPM	*Berth 4* CBM
DWT (tons) Max.	140,000	250,000	450,000	330,000
DWT (tons) Min.	20,000	70,000	100,000	140,000
Length (ft.) Max.	950	1,100	1,237	1,215
Length (ft.) Min.	559	800	820	950
Max. Loading Rate (t.p.h.)	6,000	6,000	7,500	9,500
Strings of Flexible Hose	2×16 in.	2×16 in.	2×16 in.	2×16 in.
Length of Sealine Approx. (ft.)	16,200	16,000	20,500	17,200

Least depth of water available in berth, and swinging circle, after deducting 6 ft. for height above sea bed of sea line cradle is as follows: Berth No. 1, 51 ft.; Berth No. 2, 52 ft.; Berths No. 3 & 4, 55 ft.

Swinging circle defined as one and a half ship's lengths from dropping position of ship's inshore anchor.

The approximate draft limits quoted above are based on an underkeel clearance in the berths of 6 ft., rising tides permit deeper loading in berths.

Seawards ends of pipelines, terminate in 16 in. flexible hoses. Hoses are lifted on the port side of the vessel.

Additional information obtainable from Jebel Dhanna Pilots on Channel 16 prior to vessel's arrival.

HOSES: Derricks or cranes must be capable of lifting a string of hoses from the sea-bed to a height of 30 ft. above the deck. For lifting 16 in. diameter hoses, the lifting gear should have a SWL of not less than 10 tons.

Gear should be rigged on port side of the vessel in order to lift hoses.

It may be convenient to handle blank flanges, reducers, etc., with the derrick or crane. Reducers or adaptors should be bolted to the ship's flanges, so as to take 16 in. hoses.

Note: Where a vessel has 2 or more loading connections, those used should not be less than 7 ft. apart.

Hose Hang-off bitts are required at about 10 ft. from the ship's rail at the loading manifold to secure the submarine hoses on port side for CBM berths and the tanker rail hoses on port side for SPM berth.

S.B.M.: 30 sections × 30 ft. × 16 in.

LOADING: *Flash Point:* The flash point of Murban Crude is below 32° F.

Crude Oil Temperatures: While every effort will be made to keep the loading temperatures of export crude below 150° F., there may be times when this temperature is exceeded.

Whenever possible Masters will be advised when this temperature increase is likely to occur, but in Jebel Dhanna the temperature ashore varies according to loading rate, production rate, changes in production pattern from the field, tank levels, etc., and the temperature difference between shore and ship varies according to loading rate, quantity of cargo taken, berth occupied and when last used, etc., thus the ship's temperature obtained on a previous voyage may be substantially different to that obtained on the current voyage and the previous vessel's temperature can be taken as an approximate guide only.

ADCO will not accept any responsibility for the failure by the Master of any tanker loading at Jebel Dhanna to take appropriate action to receive hot oil, prevent any damage to his vessel and/or injury to his crew.

H_2S Content: Murban Crude contains concentrations of H_2S (Hydrogen Sulphide). Hydrogen sulphide has a disagreeable odour characteristic of rotten eggs which quickly deadens the sense of smell so that a dangerous concentration may be present which cannot be detected by odour. It is, therefore, important that when the presence of the gas is detected the area or compartment concerned should be left with all possible despatch until adequate ventilation can be carried out. The combustible gas indicator may not detect this type of gas. The foregoing must be dealt with in the light of experience where large quantities of crudes of this type have been carried without accident and we do not wish to exaggerate the dangers. However, the under-noted precautions have been evolved as necessary to provide against a possible accident and should be strictly observed.

During loading gas should only be allowed to escape via the agreed venting arrangements.

When ullaging or sampling, personnel should stand facing at right angles to the wind direction and so avoid inhaling gas. If H_2S is inadvertently inhaled the man should leave the area and not return until his sense of smell has been restored which means that at least two people should attend the operation.

No one should enter any pump room or any compartment where gas could collect unless another person is standing by.

Life lines, breathing apparatus and resuscitator should be ready available.

As a precautionary measure, the gas ejector for pump room should be put into operation at any time entry is made into this space whilst the possibility of H_2S gas entering pump room from cargo or empty tanks exist.

Loading Operations: The advice from the vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard the vessel has been completed. As soon as possible after such a signal has been received, and without further advice, loading will commence. Damage to hoses can occur if ship's valves are not open at the start of loading. The Mooring Master will not transmit any loading instructions to the shore until the officer-in-charge of the deck has satisfied him that the hoses are connected correctly and that all valves have been set for receiving cargo.

While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repairs are to be carried out while in berth which would immobilise the ship or impair her fire-fighting efficiency.

The Mooring Master will instruct the Master of the Ship as to any signals needed for local requirements.

The Mooring Master will bring a portable radio to the ship.

The radio may not be used for private conversation. Use of the ship's radio while at the loading berth is strictly prohibited.

When loading, the cargo being received shall be frequently measured thereby preventing loss of oil through a leaking hose. This particularly applies at night, as seepage of oil is practically invisible on the water during darkness.

Caution: The oil loading rates to ships are controlled on shore and an extremely dangerous situation can arise if a ship's valves are closed against the flow of oil.

Particular care must be exercised by ship's personnel to ensure that the Terminal is given timely advice should any reduction be required in the loading rate and adequate "Stand-by" notice must be given before the Final "Stop". At all times the Terminal must be advised when an increase in the loading pressure can be expected due to switching tanks, topping up, etc. To prevent excessive pressure from surge on ship/shore connections, ship's valves should be closed slowly.

The Terminal facilities at Jebel Dhanna have been designed so that tankers can be loaded by turbine driven loading pumps at max. rates up to 6,000 t.p.h. in Berth 1 and 7,500 t.p.h. in Berth 3, and 9,500 t.p.h. in Berth 4. Availability of max. loading rates is dependent on the number of berths occupied and operational circumstances.

If vessel is unable to accept the max. loading rate available, then ADCO will be grateful if you will give a brief explanation of the reason for the limitation and we suggest some of the reasons which may govern your restrictions:
(a) Inadequate venting system.
(b) Condition of ship's lines and valves.
(c) Inexperience of crew.

and there may be other reasons.

We are anxious to obtain this information in order to assist in formulating plans for future development.

The quantity of cargo received on board is the responsibility of the ship and no overage may be sent back ashore.

When loading is completed, hoses will be disconnected and lowered to the sea bed, under the supervision of the Mooring Master. Ships will then proceed to an anchorage allocated by the Port Authority or direct to sea.

BALLAST: No facilities for disposal of slops or dirty ballast.

When a vessel enters port waters in ballast, the ballast water for overside discharge must be clean and a declaration signed by the Master and delivered to the representative of the Terminal to this effect. Ashes, oil, oily water or other refuse must not be discharged overboard in port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in port waters.

It is essential that vessel is adequately ballasted to ensure safe handling and manoeuvring. Please comply with the Mooring Master's requests as to ballast quantity and disposition.

Jebel Dhanna is an open roadstead and subject to sudden changes in weather. On occasions it is of great advantage to commence loading whilst discharging ballast or prior to completely deballasting to avoid leaving the vessel in a flying light condition.

There must be no cleaning of boiler tubes whilst ship is in port.

MEDICAL: A hospital run by the Abu Dhabi National Oil Company (ADNOC) is situated adjacent to the Ruwais Industrial Complex. Ambulance facilities are available.

DENSITY: 1031.

FRESH WATER: Not available.

FIRE PRECAUTIONS: As laid down in the Abu Dhabi (Petroleum Ports) Law No. 12 of 1973 and ISGOTT Safety Guide.

CONSULS: None.

REPAIRS/DRY DOCKS: No facilities.

GANGWAY/DECK WATCHMEN: Not necessary.

CUSTOMS ALLOWANCES: Tobacco: No restrictions in quantity on board but must not be conveyed ashore or from one vessel to another without appropriate written permit from Customs Authorities and Port Officer. Wine and/or Spirit: Conveyance of alcoholic liquor from any vessel to the shore or from the shore to any vessel, or from one vessel to another, prohibited without appropriate written permits from Port Officer.

Shipmaster's Report: 1978.

All alcoholic liquor must be under bond and sealed.

REPATRIATION: With sufficient notice Agents will assist in any repatriation. Landing permit is required for all sign on/sign off personnel for which Agent requires Full Name/nationality/Seaman's Book/Passport Number and also 4 to 5 working days to process same. However, facilities are limited and if possible crew changes should be made at other ports.

Shipmaster's Report: 1978.

Immigration Authorities require at least 4 days' notice and preferably 7 days' notice via Agent.

AIRPORT: One mile distant, air strip owned by ADCO for private use. Nearest International Airport is Abu Dhabi the capital of the State.

TIME: Local time GMT plus 4 hours. No alterations to clocks during year.

POLICE/AMBULANCE/FIRE: The Abu Dhabi Defence Force, Oilfield Security Section maintains a police post at Jebel Dhanna and Ruwais and is responsible to act in case of accident or other emergency, whether ashore or in territorial waters.

TELEPHONES: Jebel Dhanna is connected to the international telephone system.

SERVICES: None.

SHORE LEAVE: Crews not allowed ashore.

IDENTIFICATION CARDS: Not required.

SHIPMASTER'S REPORT: December 1979.

Anchorage: Ghasha Anchorage apparently has good holding ground, bottom is sand with a little clay.

VHF: Call on Channel 16 or 9 (continuous watch). All operations carried out on Channel 9.

Medical: Any injury requiring treatment ashore necessitates having the following documents ready before the injured seaman can be transported to Ruwais Hospital.

1. Extract of Ship's log.
2. Master's report of the incident.
3. Two eye witness reports (if possible).
4. Pilot's report.
5. Letter from Master accepting responsibility for the injured man.

He must also take his Seaman's Book/Passport with him and all the above documents must be signed and ship's stamped by Master.

Gangway: Accommodation ladder usually port side but best to wait until vessel is nearly moored in order to determine best lee side.

Customs Allowances: Customs can be very strict. All alcohol must be locked up before arrival and they will then give an issue.

(C) RUWAIS – REFINERY TERMINAL

OPERATOR: ADPPOC is the service contractor to Abu Dhabi National Oil Co., (ADNOC).

GENERAL: The ADNOC Ruwais Refinery Terminal is situated about 2.5 miles SE of the Jebel Dhanna Sea Berths and consists of a trestle jetty 3 km. in length with 2 deep water berths and 4 coastal tanker berths. Vessels will berth port or starboard side at the discretion of the Pilot having regard for the tide and weather conditions.

RADIO: *Format for information required from vessels prior to berthing at Ruwais Refinery Terminal:*

A. Firm ETA Ruwais 72, 48, 36, 24 and 12 hours prior to arrival.
B. Cargo(es) (with quantity in M.tons) to be loaded and acceptable loading rate per hour per line. Number of lines for each cargo.
C. Cargo(es) on board on arrival (if any), with tanks and last port loaded.
D. Will cargo(es) ex-Ruwais be commingled with cargo on board. If so, indicate details.
E. Stowage of clean ballast to be discharged overboard. Indicate under ballast details below if discharge will take place during or prior to loading, as applicable.
   1. Quantity of clean ballast in tanks No.... nominated for Cargo loading at Ruwais.....M.tons
   2. In segregated ballast tanks.....M.tons
   3. In permanent ballast tanks.....M.tons
   4. Total time required for ballast discharging, prior to loading.....Hours

Note: Clean ballast oil content must be below 15 p.p.m. and samples will be drawn for tests to ensure compliance.

F. Quantity of dirty ballast (if any) to be discharged to the Refinery dirty ballast system and time required for discharging. This is subject to acceptance by the Refinery. Dirty ballast must be free of lead and/or chemical washings.
G. Last three cargoes handled by vessel in the following sequence:
   (i) The very last Cargo(es)/Stowage arrangements.
   (ii) The 2nd last Cargo(es)/Stowage arrangements.
   (iii) The 3rd last Cargo(es)/Stowage Rrangements.
H. Full details of tanks washing and cleaning carried out since the discharge of the last Cargo(es).
I. Draft on arrival and maximum expected draft on sailing.
J. Maximum freeboard on arrival after discharging ballast prior to loading and expected freeboard on sailing (including height from deck to connections at manifold) in metres.
K. Distance from vessel's rails to manifold connection and height of rails from deck.
L. Distance between manifold connections centre to centre in metres.
M. Displacement on arrival and expected displacement on sailing.
N. Bunkers/Water requirements.
O. Any other requirements.
P. SOLAS Protocols with latest revisions are strictly applied in this port and vessels should fully comply with all relevant regulations while in the port area.

   Accordingly, please advise if tanks are inerted per SOLAS requirements and condition of inert gas system fitted in vessel.

Please note vessels should arrive with all tanks properly inerted as applicable under SOLAS Protocol, unless otherwise advised by Ruwais Refinery to arrive in gas free condition to enable internal inspection at inner cabotage by Third Party Inspectors, prior to loading. In this case please advise time required to inert vessel's tanks after completion of inspection.

The above information should be made available 72 hours prior to arrival at Ruwais and is additional to the requirements of the Ruwais Port Officer.

Also see "Shipmaster's Report" dated January 1992.

VHF: The Refinery Terminal maintains VHF watch on Channel 16 and Channel 9 for ship/shore communications and once berthed, the vessel will be connected to the terminal by land line telephone, and a UHF hand set will be provided by shore.

The Pilot will bring on board UHF Hand Set for manoeuvring purposes only.

Arrival Telegram Ship/Shore: After the Pilot boards the Ship/Shore Arrival Telegram will be passed by VHF Radio Channel 16/9 as follows:

(1) Name of Vessel.
(2) Nationality and Port of Registry.
(3) a – Gross Registered Tonnage.
    b – Net Registered Tonnage.
    c – Summer Deadweight.
(4) Size of manifold.
(5) Are reducers to 12 in., 10 in. and 8 in. available on board?
(6) Are adequate nuts and bolts and gaskets available on board?
(7) Number of hours required to de-ballast and quantity.
(8) Vessel's maximum loading rate.
(9) Quantity and type of cargo.
    a –
    b –
    c –
(10) Last Port.
(11) Next Port.
(12) Master's Name.
(13) Date and time of arrival.
(14) Date and time of Pilot on Board.
(15) ETA at Berth.
(16) Arrival Draft.
(17) Estimated Departure Draft.
(18) Bunkers requirements (quantity and type).
(19) Drinking Water requirement quantity.
(20) Is the ballast lead free?

Also see "Shipmaster's Report" dated January 1992.

BERTHING:

Berth "B"

Berth "B" is designed to accommodate tankers in the range 9,100 to 104,000 tons displacement. Length of ship 118.5 m. to 280 m. The minimum depth alongside the berth is 12.7 m.

The berth consists of the Loading Platform, four mooring dolphins and four breasting dolphins connected by walkways.

On the Loading Platform a bank of six cargo Chicksan arms serve to load or discharge ships, namely:

2×12 in. dia. Each arm is provided for Fuel Oil loading and ballast unloading.
2×12 in. dia. Each arm is provided for Gasoline (Premium and Regular), Kerosene, Jet Fuel and Diesel Oil.
1×10 in. dia. For Bunker 'C' and Marine Diesel Oil loading.
1×12 in. dia. For Naphtha loading.

One 3 in. hose for drinking water is provided.

Products available for loading are Naphtha, Fuel Oil, Gasoline, Kerosene/Jet Fuel, Diesel Oil, Marine Diesel and Bunker 'C'.

Flow rates are as follows:

Naphtha	2,000 cu.m./h.
Reformate	1,400 cu.m./h.
Reg. Gasoline	1,400 cu.m./h.
Prem. Gasoline	1,400 cu.m./h.
Kerosene	2,800 cu.m./h.
Diesel Oil	3,000 cu.m./h.
Fuel Oil	3,200 cu.m./h.
Crude Oil	6,000 cu.m./h.
Bunker 'C'	1,000 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Drinking Water	100/300 cu.m./h.
Ballast	1,500 cu.m./h.

The loading arms are provided with:

(i) Hydraulic quick coupling.
(ii) Automatic drain system (emergency condition).
(iii) Electro hydraulic operation.
(iv) Range control system.
(v) Remote Control.
(vi) Connecting flange mating device.
(vii) Vacuum Breaker.

Berth "C"

Berth "C" is designed to accommodate vessels with range 26,000 to 130,000 tons displacement. Length of ship 180 m. to 295 m. The minimum depth alongside the berth is 16.8 m.

The berth consists of the Loading Platform, six mooring dolphins and four breasting dolphins connected by walkways.

On the Loading Platform a bank of seven cargo Chicksan arms serve to load or discharge the ship, namely:

3×12 in. dia. Each arm is provided for Crude Oil, ballast unloading and Fuel Oil loading.
2×12 in. dia. Each is provided for Gasoline, Kerosene, Diesel Oil loading.
1×10 in. dia. For Bunker 'C' and Marine Diesel Oil loading.
1×12 in. dia. For Naphtha loading.

One 3 in. hose for drinking water is provided.

Products available for loading are Naphtha, Gasoline, Kerosene/Jet Fuel, Diesel Oil, Fuel Oil, Marine Diesel and Bunker 'C'.

Flow rates are as follows:

Naphtha	2,000 cu.m./h.
Reformate	1,400 cu.m./h.
Reg. Gasoline	1,400 cu.m./h.
Prem. Gasoline	1,400 cu.m./h.
Kerosene	2,800 cu.m./h.
Diesel Oil	3,000 cu.m./h.
Fuel Oil	3,200 cu.m./h.
Crude Oil	6,000 cu.m./h.
Bunker 'C'	1,000 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Drinking Water	100/300 cu.m./h.
Ballast	1,500 cu.m./h.

The loading arms are provided with:

(i) Hydraulic quick coupling.
(ii) Automatic drain system (emergency condition).
(iii) Electro hydraulic operation.
(iv) Range control system.
(v) Remote control.
(vi) Connecting flange mating device.
(vii) Vacuum Breaker.

Also see "Shipmaster's Report" dated January 1992.

Coastal Berth 1

Coastal Berth 1 is the Inner Berth on the North side of the Cabotage Jetty. The Berth consists of the loading platform, four mooring dolphins and four breasting dolphins. Length of ship 70 m. to 118.5 m. The loading platform has a bank of five Chicksan loading arms with 8 in. diameter connections. The minimum depth alongside the berth is 9.1 m. Vessel size 2,600 to 9,100 tons displacement.

Products available are: Fuel Oil, Diesel, Kerosene/Jet Fuel, Gasoline, Bunker 'C' and Marine Diesel Oil. Ballast will be pumped ashore.

Flow rates are as follows:

Reg. Gasoline	1,000 cu.m./h.
Prem. Gasoline	1,000 cu.m./h.
Kerosene	900 cu.m./h.
Diesel Oil	900 cu.m./h.
Fuel Oil	800 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Bunker 'C'	900 cu.m./h.
Ballast	400 cu.m./h.
Drinking Water	100/300 cu.m./h.

One 3 in. flanged connection for fresh water.

The loading arms are provided with:

(i) Electro hydraulic operation.
(ii) Manual quick coupling and hydraulic emergency release.
(iii) Range control system.
(iv) Vacuum breaker.
(v) Remote control system.
(vi) Connecting flange mating device.

Coastal Berth 2

Coastal Berth 2 is the Inner Berth on the South side of the Cabotag Jetty and consists of the loading platform; four mooring dolphins an four breasting dolphins. Length of ship 70 m. to 118.5 m., size 2,600 t 9,100 tons displacement. The minimum depth alongside the berth i 8.7 m. The loading platform has a bank of two 8 in. diameter loadin arms.

vis. 1×8 in. to discharge ballast.
1×8 in. to load Bunker 'C', Marine Diesel or Fuel Oil. Th
unloading facilities are available by flexible hose.

Flow rates are as follows:

Fuel Oil	800 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Bunker 'C'	900 cu.m./h.
Ballast	400 cu.m./h.
Drinking Water	100/300 cu.m./h.

One 3 in. flanged connection for fresh water.

The loading arms are provided with:

(i) Electro hydraulic operation.
(ii) Manual quick coupling and hydraulic emergency release.
(iii) Range control system.
(iv) Vacuum breaker.
(v) Remote control system.
(vi) Connecting flange mating device.

Coastal Berths 3 & 4

The Outer Berth North and South side of the Cabotage Jetty each consi of four breasting dolphins and three mooring dolphins with a fou common mooring dolphin with Berths 1 & 2. Length of ship 70 m. t 118.5 m., size 2,600 to 9,100 tons displacement.

The minimum depth alongside the berth is 9.4 m. (No. 3) and 9.2 (No. 4). The berths are equipped with four 8 in. loading arms and a 3 i water connection.

Products available are: Diesel Oil, Kerosene/Jet Fuel, Gasolin Marine Diesel Oil, Bunker 'C'.

Ballast water will be pumped ashore.

Flow rates are as follows:

Reg. Gasoline	1,000 cu.m./h.
Prem. Gasoline	1,000 cu.m./h.
Kerosene	900 cu.m./h.
Diesel Oil	900 cu.m./h.
Fuel Oil	800 cu.m./h.
Marine Diesel Oil	300 cu.m./h.
Bunker 'C'	900 cu.m./h.
Ballast	400 cu.m./h.
Drinking Water	100/300 cu.m./h.

The loading arms are provided with:

(i) Electro hydraulic operation.
(ii) Manual quick coupling and hydraulic emergency release.
(iii) Vacuum breaker.
(iv) Remote control system.
(v) Range control system.
(vi) Connecting flange mating device.

BERTHING AIDS:

Berths 'B' and 'C' are equipped with a radar operated safety berthi system indicating by means of coloured lights the forward and a berthing velocity of the ship.

Two groups of coloured lights one forward and one aft indicate th safe/acceptable/dangerous lateral approach of the ship from a distanc of 50 m. off the berth.

BALLASTING/DEBALLASTING: Ruwais Refinery has dirty balla water treatment equipment and all dirty ballast shall be discharg ashore for treatment. (No dirty ballast may be discharged into the se and pollution of the waters of the port is an offence against the Po Regulation and the laws of Abu Dhabi).

Accepting dirty ballast into the refinery storage is subject to appro by refinery, a sample of the dirty ballast may be required for analys a letter from Master requesting permission to discharge is to be ma (letter is provided for Master's signature).

During loading/unloading all deck scuppers must be plugged. A precautions shall be taken to prevent oil or oily waters escaping into th sea during connection and disconnection of loading arms.

Normally the terminal Control Room will give a 10 minutes warni before deballasting may commence. Deballasting shall commence slow speed to check systems and back pressure.

Simultaneous deballasting with loading of cargo is permitted only the case of cargo of Bunker 'C'.

While encouraging quick turn around and the use of minimum balla upon arrival, sufficient ballast must be retained on board for the sa manoeuvring of the vessel at the Pilot's discretion.

LOADING AND UNLOADING:

(i) The Master should give the terminal a 'STAND BY' warni 10 minutes before ready to commence loading or dischargi
(ii) Upon 'COMMENCE LOADING' from the Master only one pu will be used to ensure a slow flow rate until it is established th all systems are operating correctly and pressures are const Full loading rate may then be ordered.
(iii) The vessel's cargo tanks shall be inspected prior to and du loading and should it be found that the tanks are not tight loading shall cease, the vessel be rejected and further loadi refused. The vessel will not be accepted later until satisfac evidence of repair is produced duly certified by ABS, Lloyd's other officially accredited classification society or surveyor.

(iv) During the hours of darkness vessels loading products or discharging crude oil or ballast shall rig overside lights to illuminate the surface of the sea around the ship to the Terminal Operators satisfaction to ensure that any oily products on the surface may be detected quickly and early action taken as appropriate.

DERAT: There are no facilities for Derat at Ruwais.

FUEL: Bunkers are obtainable at Refinery berths and should be arranged through the ship's Agent.

FRESH WATER: Fresh water is obtainable at Refinery berths and should be arranged through the ship's Agent.

STORES/PROVISIONS: Stores and provisions are not permitted to be loaded at Refinery berths and must be taken on board in the anchorage.

SHIPMASTER'S REPORT: January 1992 (Updated 1994).

Vessel called to load 25,000 tonnes of Reformate.

Documents:

1 copy Port Clearance.
2 copies Crew List.
2 copies Crew Personal Effects List.
2 copies Bonded Stores List.

As Customs and Immigration Officers do not come on board anymore for sealing Bonded Stores, etc., all paperwork is dealt with by ship's Agent. Consequently alcoholic liquor will not be under bond and sealed. However conveyance ashore or to another vessel is prohibited.

Restrictions: With winds of 18 knots or more, port is closed.

Radio: Prior to arrival, vessel received two telexes from ship's Agent, one for the Port Officer – Petroleum Ports Authority, and the other for Ruwais Refinery.

Message:

Following information required by Port Officer – Petroleum Port Authority 72 hours prior to the vessel's arrival, giving the following details in the given format:

Question	Answer
1.	ETA.
2.	Flag.
3.	G.r.t., n.r.t., and Summer d.w.t.
4.	Arrival and departure drafts.
5.	Cargo to be loaded/discharged.
6.	Type and quantity of ballast and deballasting time.
7.	Status of Inert Gas System (I.G.S.).
8.	Status of Air Conditioning (A.C.).
9.	Expiry of certificates.
I.	Load Line.
II.	Safety Construction.
III.	Safety Equipment.
IV.	Safety Radio.
V.	Oil Liability (Tovalop).
VI.	Oil Pollution Liability (C.L.C.).
VII.	International Oil Pollution Prevention (I.O.P.P.).
VIII.	Classification.
IX.	Certificate of Fitness (Gas Carriers).
X.	Derat Certificate.

The ETA is to be amended as necessary 48 hours, 24 hours and 12 hours prior to arrival.

Deballasting: Dirty ballast/slops can be discharged ashore as long as it does not contain any leaded petroleum residues or cleaning chemicals.

(D) RUWAIS – NGL TERMINAL:

LOCATION: 24° 09′ 49″ N. 52° 43′ 16″ E.

OPERATOR: Abu Dhabi Gas Industries Ltd. (GASCO).

GENERAL INFORMATION: The Terminal Regulations are issued for the information and guidance of Masters of vessels loading at the GASCO Jetty at Ruwais. After receipt of the first ETA advice from a gas carrier GASCO will cable the Master of the vessel instructions to carry out following tests and checks 24 hours prior to arrival:

1. Check condition (oxygen content) of atmosphere in void spaces around cargo tanks.
2. Check all reliquefaction units fully operational.
3. Check settings of cargo tank safety relief valves.
4. Test ESD (Emergency Shut Down) of cargo valves/pumps/boosters from all activating stations.
5. Check gas detecting unit with suitable spangas and have unit working continuously.
6. Test water spray system deck area, flush all lines and check nozzles for proper operation and coverage.
7. Check ventilation of control room and compressor room and have ducts set for LPG.
8. Check over-pressurising and motor-trip system of motor room.
9. Check navigation equipment and steering gear fully operational.

The results of above tests should be cabled to GASCO not less than 18 hours prior to arrival.

On arrival at the terminal, the Terminal Representative will discuss with the Master the safety requirements. Attention is drawn to the International Safety Guide for Oil Tankers and Terminals (ISGOTT) and the Safety Inspection Guildelines and Terminal Safety Check List for gas carriers as published by the International Chamber of Shipping and Oil Companies International Marine Forum (OCIMF). For efficient loading it is essential that the ship should be fitted with adequate equipment. Improvisations made after the ship has arrived alongside the jetty are not sound practice and result in delays and possible damage to the loading arms and other equipment.

Abu Dhabi Gas Industries Ltd. (GASCO) have equipped their terminal with loading machinery and mooring arrangements which will ensure tankers and gas carriers receiving their cargoes at a reasonable rate, thereby extending to the ship the benefit of a rapid turnaround.

Mooring, loading and unmooring are carried out by night as well as by day. Co-operation between the Ship's Officers and Terminal Representatives is essential to secure the full benefit of the facilities provided.

MAX. SIZE: *Gas Carriers:* 28,000 cu.m. – 125,000 cu.m.

Tankers: Minimum Size – 15,000 tonnes S.D.W.T. Max displacement on arrival 95,000 tonnes. Max. LOA 320 m.

TUGS: Twin screw tugs (35 tons bollard pull) are used for both berthing and unberthing of vessels. The number of tugs to be used is to the discretion of the Pilot but will normally be two for berthing and for unberthing. The tugs will use their own ropes and/or wires. The tugs are fitted with foam/water monitors, including one at approximately 19 m. above sea level, to assist in fire-fighting. Also fitted are spray booms to apply dispersants in case of oil spills.

BERTHING: *The Jetty:* The centreline of the GASCO-NGL Jetty Loading Platform is situated in 17 m. of water in position Lat. 24° 09′ 49″ N., Long. 52° 43′ 16″ E. with the berthing line in direction 305°/125°. Vessels are normally berthed heading 305°. A piping trestle and road, approximately 2,650 m. long, leads to the shore where the processing plant and storage tanks are located.

The jetty head comprises a loading platform (10 m. above chart datum), a utilities building, 4 breasting dolphins and 6 mooring dolphins. The dolphins are inter-connected by walkways. The distance between the 2 outermost dolphins is 340 m., between the 2 innermost breasting dolphins 42 m. and between the 2 outermost breasting dolphins 97 m.

On the loading platform there are 2×12 in. loading arms for loading Pentane Plus and discharge of dirty ballast/slops, 4×12 in. loading arms for loading/vapour return of Propane and Butane and 1×8 in. loading arm for bunkering (Rate – MFO 400 cu.m.p.h. and MDO 300 cu.m.p.h.). (For distance and disposition of loading arms see "Plan"). The LPG loading arms are fitted with an Emergency Release System (ERS). All loading arms except the bunker arms are fitted with an Emergency Shutdown System (ESD). Both ERS and ESD can be actuated automatically or manually. For detailed information about these systems you are referred to the separate letter on ESD/ERS handed over to Master by the Terminal Representative. The Master is to ensure that the personnel responsible for cargo operations are fully familiar with these systems.

On the Western end of the loading platform is a gangway tower with a 1.5 ton crane forming a integral part of this tower. On the Eastern end of the platform there is a tower mounted fire water and foam monitor. This monitor can be controlled manually or remotely from the jetty head or from the foot of the jetty aided by a television monitor.

An additional manually controlled firewater monitor is situated on each of the 2 inner breasting dolphins. In addition to this, water spray deluge systems are covering the loading arms area, the gangway, the surge drum area and the utilities building. Gas detection equipment is strategically placed near the loading arms and will give alarm in case of inadvertent gas escape. The loading arms area and tanker manifold area are monitored by closed circuit television from the control room situated in the utilities building on the jetty and from the main control room.

On the Eastern side of the loading platform is a boat landing stage where the mooring boats can tie-up.

Draft: The minimum water depth alongside the jetty is 17 m. below chart datum (C.D.). However, the Deep Water Channel imposes draft limitations on vessels departing from and entering the Port of Jebel Dhanna – Ruwais:

Also see Section "A" – "Restrictions".

Moorings: When at berth, vessels must be moored to the entire satisfaction of the Pilot and Terminal Representative. Vessels can berth either side alongside, depending on the ship's manifold layout and/or the prevailing weather conditions. The breasting dolphins are each equipped with 1,250 KN double quick release hooks and a power operated capstan. The mooring dolphins are each equipped with 1,250 KN triple quick release hooks and power operated capstan.

The minimum mooring requirements are 3 heading, 3 breast lines each end, 2 spring lines each end and 3 stern lines. Vessels must be ready at all times to put out extra moorings as requested by Terminal Personnel or dictated by weather changes. It is the Master's responsibility to ensure that vessel's mooring lines are checked frequently to prevent excessive movement of the vessel in berth, which could activate the ESD/ERS systems and/or cause severe damage to the loading arms and other terminal equipment.

Experience has shown that wholly synthetic moorings have too much elasticity and allow the vessel to range or drift away from the berth during periods of adverse weather.

Therefore the moorings should preferably be all steel wires.

As it is recognised that some vessels are not fitted out with complete steel wire moorings, such vessels may use synthetic moorings for head or stern ropes, but breasting and spring moorings are to be steel wires. However, mixed mooring for the same service is strictly prohibited.

NOTE: (October 1982). With immediate effect all vessels calling at the GASCO NGL Jetty are to be fitted with wires, for spring lines. Vessels unable to comply will be subjected to an inspection of mooring ropes by the Pilot on arrival and will be berthed only if Pilot is satisfied with the mooring lines available, and provided the weather forecast is favourable during the vessel's stay alongside. Pilot inspection of mooring lines will be carried out only during daylight hours.

The breasting dolphin's fender design criteria are based on providing for berthing energies acting in the horizontal plane for maximum displacement of 95,000 tonnes with an approach angle to the berthing line of 7° at a contact velocity of 15 cm. per second.

Yokohama Fenders protrude approximately 3.3 m. from the face of the loading deck, they provide for 100% contact of fenders on the vessel's perpendicular mid-body at light and loaded drafts, for the full range of vessel sizes.

Tension Winches: Vessels equipped with automatic tension winches should not use the automatic device and set the manual brake on these winches.

BALLAST: The jetty is equipped with dirty ballast/slops reception facilities. Tankers discharging dirty ballast/slops ashore will use the Pentane Plus loading arms from where a 24 in. pipeline runs to tanks in the Refinery adjacent to the LPG plant. The maximum ballast reception rate is 1,500 cu.m./hr. At least 48 hours prior to arrival, the Master is to advise GASCO how much dirty ballast/slops he expects to discharge to the shore facilities.

When the vessel arrives with clean ballast for overside discharge, the ballast water must be clean and a declaration to this effect needs to be signed by the Master and delivered to the Terminal Representative. There is a danger of violating pollution regulation if ballast taken on in polluted water is discharged in port. If it is necessary to take on ballast in polluted areas, this should be discharged during passage and replaced by cleaner ballast.

Ashes, oil, oily water, garbage or other refuse must not be discharged overboard in port waters. Scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in Port waters. However, gas carriers scuppers may be kept unplugged when not engaged in bunkering operations.

It is essential that the vessel is adequately ballasted to ensure safe handling and manoeuvring. Masters will be expected to accept the Pilot's advice as to the ballast quantity and disposition.

There must be no cleaning of boiler tubes whilst the ship is in port.

POLLUTION: Abu Dhabi Gas Industries Ltd. (GASCO) follows a clean seas policy, and in this respect the "Oil Record Book" referred to in the International Convention for the Prevention of Pollution from Ships, of 1973/78 can be inspected. Any vessel, the Master of which does not allow inspection of the "Oil Record Book," will be refused the use of the Company facilities at Ruwais.

If it is found that the information entered in the "Oil Record Book" is not in accordance with the requirements of the Convention the matter will be reported to the appropriate authority.

It is an offence to discharge dirty ballast, pump bilges or discharge refuse within the Port limits.

The Port Officer, or his nominee, is authorised to take samples, in accordance with an approved procedure, of ballast water to be discharged, or being discharged at Ruwais. Should test carried out on these samples indicate an average oil in water content of more than 15 p.p.m. then this may be used in evidence in any proceedings against you brought by the Port Authority in accordance with the Law.

In the event of your vessel discharging dirty ballast or spilling oil, cost for cleaning the pollution, third party claims and other expenses and fines shall be borne by the vessel.

COOLDOWN OF GAS CARRIERS: Vessels, when presenting themselves to load at GASCO terminal should in all cases be ready to load in all respects. For a gas carrier this means that the cargo tank atmosphere should be compatible with the product to be loaded and the cargo tank temperature close to the temperature of the product to be loaded (Propane −42°C, Butane −4°C).

Notwithstanding the above and providing notice is given well in advance, GASCO may, in exceptional cases, accept gas carriers not fully cooled-down. Each occasion will be considered separately giving due regard to the shipping programme and any other circumstances or restrictions.

GASCO will not accept any responsibility for the failure by the Master of any gas carrier loading at Ruwais to take appropriate action to receive cold liquefied gas, prevent any damage to his vessel and jetty installation and/or injury to his crew or Terminal personnel.

VENTING: During the loading of Pentane Plus, vessels should only allow vapours to escape via the agreed venting arrangement. If there is little wind movement, vapour may persist on deck. When there is a wind, it may, in crossing a deck house or structure, create a low pressure on the lee side thereby causing vapour to be carried towards the house or structure.

Either of these wind conditions may result in high local vapour concentration and, if so, it may be necessary to stop loading while the conditions persist.

Gas carriers are not allowed to have any vapours escape to atmosphere. During loading the pressure in the cargo tanks should be controlled by the use of their reliquefaction plant or by the use of the vapour return line to the shore. The control room should be notified prior to returning vapour ashore via the vapour return line and before stopping the return of vapour ashore.

Your attention is drawn to the information, as provided to you by the Terminal, on the properties and dangers of the cargo to be loaded on board your vessel, together with the actions required in case of an accident.

LOADING: *Loading Arms:* The LPG and Pentane Plus loading arms presentation flanges are 12 in. ANSI – 150 – flat face spiral groove.

For centre to centre distances and disposition of the loading arms, see "Plan Section". The LPG arms operating envelope parameters are as follows:

Vertical plane	:	From 7.7 m. to 24.0 m. above chart datum.
Horizontal plane	:	From 4.1 m. to 8.7 m. off the jetty face over the full vertical plane.
Safety Provision	:	Horizontal plane drift of 4.6 m. on either side of the centre line.
		Lateral plane drift of 4.6 m. outside the normal operating box envelope.

All four LPG loading arms can be connected to ships' manifold with a centre to centre spacing range of 1.6 m. to 3.5 m. for the full envelope including the outer drift envelope box.

The Pentane Plus loading arms operating envelopes are as follows:

Vertical plane	:	From 2.3 m. to 20.75 m. above chart datum.
Horizontal plane	:	From 6.4 m. to 9.3 m. off the jetty face over the full vertical plane.
Safety Provision	:	Horizontal plane drift of 4.6 m. on either side of the centre line.
		Lateral plane drift of 4.6 m. outside the normal operating box envelope.

However, to secure free access of Pentane Plus loading arms towar vessel's manifold, the height of railing in way of manifold on arrival shou not exceed 16.2 m. above Chart Datum.

The Pentane Plus loading arms can be connected to ships' manifo with a centre to centre spacing range of 0.6 m. to 2.1 m. for the f envelope including the outer drift envelope box.

Notwithstanding the above, the loading arms are fitted with ES systems and additionally the LPG arms with ERS which is actuate before the loading arms reach the outer limits of their envelopes.

The LPG loading arms are linked to the shore system which provide the following flexibility:

Loading arms are numbered from the gangway tower to East.
No. 1 – Propane Liquid or Propane Vapour Return
No. 2 – Propane Liquid or Propane Vapour Return
No. 3 – Butane Liquid or Butane Vapour Return
No. 4 – Butane Liquid or Butane Vapour Return

After berthing you are required to remove the blind flanges from th manifold connections to be used for loading and to indicate whi product is to be loaded through them and which connections are to b used for the Vapour Return lines, if required. The connection/disco nection of the 12 in. ANSI 150 loading arms and 8 in. ANSI 150 bunke arm will be carried out by Terminal personnel under the supervision a responsible ship's officer. If your manifold sizes do not correspon with the loading/bunker arms, you are requested to provide and fit th appropriate reduction pieces accordingly. Masters of gas carriers are ensure that the reduction pieces and gaskets used are suitable f loading of cryogenic cargoes.

Communications: To maintain necessary communications permanen during cargo operations and also in emergencies, you will be provide with a handie-talkie and a telephone.

We require that the handie-talkie is at all times attended to by th officer responsible for cargo operations. The handie-talkie enables th officer to communicate directly with the main control room and the je control room.

Furthermore, a telephone will be placed on your vessel. Additiona a console for activating the ESD will be put on board.

A ship's crew member, able to converse in English, must be prese near the ship's manifold at all times. The loading arm and ship's manifo area are covered by closed circuit televisions from the jetty control roo and main control room.

Emergency Procedures: In case of an **emergency on board** yo vessel, we require you to take the following action:

Raise the appropriate alarm and take the required action
Inform the Terminal via handie-talkie, telephone and jetty attenda or by activating the ESD.
Cease all cargo operations immediately and shut-down cargo syste completely.
Prepare to vacate the berth.

In case of an **emergency ashore,** we require you to take the follow action:

Cease cargo operations immediately and shut-down cargo system completely.
Stand-by on handie-talkie and telephone and keep contact with je attendant.
Stand-by to give any assistance.
Prepare to vacate the berth.

NOTE: The shore installation has been equipped with a range of saf devices and emergency shutdown systems, these could b activated automatically or manually from the jetty or on boa the vessel as the situation will call. All shutdowns are preced or accompanied by an alarm.

Loading Operations: The maximum loading rates for each product a as follows:

Product	*Tons/hr.*	*cu.m./hr.*
Propane	1,500	2,550
Butane	1,800	3,000
Pentane Plus	2,800	4,200

Propane and Butane can be loaded simultaneously. Loading ra can be adjusted either by stopping/starting one or more pumps or t opening/closing of the recirculation valves on the loading platform.

After berthing, the terminal representative will discuss with you t loading operations and emergency procedures. You are reminded t the responsibility as to the quantity of cargo to be loaded, rests with y as Master of the vessel and no cargo may be sent back ashore.

Whilst alongside the jetty, ships should be ready to move under th own power in the event of their breaking adrift, catching fire emergencies. No repairs are to be carried out whilst alongside wh would immobilise the ship or impair her fire-fighting efficiency.

CAUTION: The loading rates are controlled on shore and due to t long pipelines from the shore product tanks to the jetty head, and t high loading rates, an extremely dangerous situation can arise if sh valves are closed against the flow of liquids, which could lead to press surges liable to cause the blowing out of pipeline gaskets and/or sev damage to the loading arms.

Loading rates, loading rate reductions and stopping of ca procedures will be discussed with you prior to commenceme loading.

While alongside the jetty, no craft are allowed alongside the ves The lowering of lifeboats whilst alongside the jetty is strictly prohib except in emergencies.

Immediately after completion of loading, the loading arms wi disconnected and the vessel must be ready to proceed to se anchorage as directed.

STORES: The taking-on and/or landing of stores and ship's spares a the jetty is not allowed.

SHORE LEAVE: Crew members are not permitted shore leave.

SIGNALS: Vessels, whilst alongside the GASCO NGL-jetty, sha addition to those described in the port regulations, display the follo signals: by day: a red flag, by night: a red light visible from all direc

SHIPMASTER'S REPORT: December 1981 (Updated 1994). (Vessel loading Propane/Butane, g.r.t. 45,000, d.w.t. 56,000, draft 13.1 m., capacity 79,970 cu.m.).

Ruwais lies in the same general port area that encompasses Jebel Dhanna and at the moment consists of a petroleum products jetty and another to the S.E. which handles Pentanes and LPG.

Further again to the S.E. there is more port development for an ammonia/fertiliser berth and dry-cargo berths.

Ruwais is administered by ADPPOC, Abu Dhabi Petroleum Ports Operating Company, while the LPG berth comes under the immediate control of GASCO, Abu Dhabi Gas Industries Ltd.

The LPG loading platform is situated in position: Lat. 24° 09.8′ N., Long. 52° 43.3′ E., the trend of the platform and mooring dolphins being about 305° True, more or less in line with the current flow.

Approach: The vessel should have B.A. Charts 3778, 3779, 3780 and the recommended track on these should be followed for arrival and departure since it provides adequate water for a vessel of this size and draft. The route is well marked with large buoys and light floats which show up well visually and on the radar. An approach in poor visibility should thus be possible and made with confidence.

See Pilot Books and "Guide to Port Entry".

A waiting anchorage is provided off Gasha Buoy.

Pilotage: Pilots board off Gasha Buoy from launch of about 12/16 m. length; at the moment two launches are in commission.

Pilot ladder required about 1 m. above the water.

The length of pilotage to the first line ashore is about 2 hours.

Communications: Through Bahrain Radio. There is considerable evidence pointing to huge delays in cables between this radio station and the eventual recipient.

Before arrival the Agents sent a comprehensive questionnaire requesting safety checks and ship information. This is a standard cable and originates from GASCO.

VHF contact originally made on Channel 16 with the Pilots and Port Control, but their usual working frequency is Channel 9.

On boarding the Pilot issues a copy of the Port Regulations which should be studied prior to berthing.

Berth: This consists of the loading platform and mooring dolphins at the end of a 3 km. trestle. Minimum reported depth alongside is 16 m.

The jetty head consists of the loading platform, 42 m. long with two breasting dolphins at each end. Beyond these are the mooring dolphins, three forward and aft, the total length of the mooring system being 340 m., thus providing adequate moorings for most vessels.

The loading platform carries seven Chicksans, two for Pentane, one for bunkers and four for LPG. There is a control building on the berth together with closed circuit TV, gas detecting equipment, fire fighting monitors and sprinkler system.

The loading arms are all 12 in. 150 ASA. The Chicksans are fitted with automatic quick release and this will operate if the vessel surges more than 4 m. (two for'd and two metres aft) from her moored position. An automatic shutdown system is also fitted and the vessel is provided with a control box for these together with comprehensive instructions. A time of 10 secs. is quoted from operation to complete shutdown.

There is provision for two vapour return lines and two loading lines within the four Chicksan configuration and these are interchangeable to a degree.

Ship/shore communication is provided by the terminal who place on board, 2 portable VHF radios and a telephone close to the gangway.

Mooring: The normal 3.2.2 was recommended and there is a large mooring boat to assist. Dolphins are fitted with quick release hooks. Wires are required for spring and breast lines. Mixed mooring for the same servcie is not allowed.

Springs must be on mooring winches and the use of self tensioning winches is not allowed.

There are powerful tugs (3,300 h.p.) available for berthing.

Gangway: Ship's gangway should be turned in for berthing, a shore gangway is provided.

N.O.R.: Agent advised me to tender Notice of Readiness at the time of passing the Gasha Buoy.

E.D.P.: There is no Early Departure Procedure, the Master must sign Bills of Lading before sailing. Allow three to four hours after completion of loading to complete all paperwork.

Load Rates: Maximum loading rates for Propane and Butane are 2,550 and 3,000 cu.m./hr. respectively. The plant were able to supply at a very low initial rate at the commencement of loading.

Note: The Propane delivery temperature at vessel's manifold is −40°C during initial loading and −41°C thereafter.

Butane loading temperature was about 0°/−1°C.

Cargo Survey: Watson Gray, Inchape, S.G.S. and Saybolt are extending their service.

Density: Water density 1031.

General:

Stores: Not available.

Shore Leave: Definitely not allowed under any circumstances other than medical urgency.

Relief/Repatriation: Not possible.

Lloyd's Surveyor: A minimum of seven days' notice required.

Repairs: There are no repair facilities available. Whilst alongside main engines must be kept in immediate readiness.

Lifeboats: Permission *must* be sought from Port Authorities to carry out lifeboat drills. However, offshore lifeboat to be lowered to embarkation deck for emergency escape purpose.

Bonded Stores: No restrictions on tobacco. All alcohol should be collected and sealed. All cameras have to be collected and placed under seal.

Medical: Unless in cases of extreme urgency, totally unavailable.

Rat Guards: Must be fitted to all moorings.

Fresh Water: Not available.

Walport Films: Exchanges readily available with usual notice.

Entering Inwards: After the vessel's cargo nomination has been accepted she is allowed an "acceptance period" of one or two days in which to arrive at the port. Thus we arrived 7.5 hours after the expiration of our acceptance period and a vessel arriving 20 hours later received priority. This should be brought to the notice of Owners or Charterers, before arrival.

Papers: 1 copy Crew Declaration.
1 copy Bonded Stores List.
2 copies Crew List and Maritime Declaration of Health.

Bonded stores' seal checked on sailing. Customs checked both bars.

Note: Abu Dhabi operates a boycott against Israel.

The Master has to sign an undertaking to the effect that the cargo will not be discharged at a port under boycott and is given a form to be posted to Abu Dhabi from the discharge port as proof.

SHIP OPERATOR'S REPORT: February 1982 (Updated 1994).

The following is the criteria for gas carriers programmed to load propane/butane at Ruwais Terminal:

1. Maximum capacity 125,000 cu.m.
2. Minimum capacity 28,000 cu.m.
3. Minimum distance centre of manifold to end/start of flatside is 28 m.
4. Height of manifold above Chart Datum between 7.7 m. and 24.0 m.
5. *Maximum height of railing above Chart Datum in way of manifold is 21.8 m.*
6. Distance between ship's side and 12 in. manifold connections between 1.5 m. and 6.1 m.
7. Four loading arms (2 liquid, 2 vapour) can be connected if centre to centre distance between 12 in. connection is between 1.6 m. and 3.5 m.
8. Two loading arms (vapour or liquid) can be connected if centre to centre distance is between 1.1 m. and 1.6 m.
9. Vessel not to have carried ammonia on her latest two subsequent voyages.
10. Cargo tanks will be cooled down on arrival as per following temperatures:

Propane	Bottom	−40°C
	Middle	−30°C
	Top (excluding dome space)	−20°C
Butane	Bottom	−2°C

11. The cargo tanks pressure on arrival not to exceed 70 mbs.
12. Vessels calling at Ruwais for the first time, to inform GASCO Ruwais not less than 48 hours prior to arrival of the disposition of manifold connections from bow to stern, indicating which connection to be used for Propane, Butane, liquid or vapour together with the centre to centre distances between them (e.g. P/V-2.1, P/L-1.7, B/L-2.1, B/V), also an indication whether connections are dedicated or can be changed at short notice.
    Vessels fitted with non-standard OCIMF manifold will load one grade at a time, delays resulting from consecutive loading will be to the vessel's account.
13. Vessel to be able to load at combined minimum rate of 1,800 tonnes.p.h. if loading Propane/Butane simultaneously or 1,000 tonnes.p.h. when loading Propane or Butane only, with the vapour return connected and operational.
    Failure to load at above rate will result in delays to the vessel's account.
14. Minimum mooring requirements are as follows:
    3 head lines
    3 breast lines each end
    2 spring lines each end
    3 stern lines
    Preference is for all wire moorings, but 2 wires each end for spring lines are essential. Also mixed mooring for the same service is not allowed.
    Vessels unable to present wires for spring lines will have their mooring lines inspected by the Pilot on boarding. This inspection can only be carried out during daylight. If found satisfactory, the vessel will berth, provided the weather forecast, for the period the vessel is expected to be alongside, is favourable. Any delays resulting from vessel not able to present wires for spring lines, will be for vessel's account.
15. Although it is recommended to regulate vessel's manifold valves, closure time is 30 seconds. The minimum allowed time to close the liquid manifold valves in case of ESD activation is 20 seconds. In case of non-compliance, manifold valve closure time may dictate the loading rate.
16. Maximum allowable tank pressure throughout vessel's stay alongside is 70% of pressure safety relief valve (PSRV) set value.
17. Towing-off wires shall be made fast to bitts as far forward and aft as practicable on the offshore side. The wires shall be in good condition, of adequate strength and secured with minimum 5 turns on the bitts, a towing-off wires shall lead directly to the chock with 20 m. slack on deck. A heaving line made fast to the eye shall be used to maintain the eye of the wire between 1 m. and 2 m. above the water line at all times.
18. Vessel to possess valid Certificate of Fitness or relevant letter of compliance.

The following criteria for tankers programmed to load Pentane Plus at Ruwais Terminal:

1. Maximum displacement on berthing 95,000 tonnes.
2. After berthing and throughout the period when the loading arms are connected to the ship's manifold, height of railing in way of manifold shall not exceed 16.2 m. above Chart Datum.
    Note: Maximum water depth alongside is 17.0 m. below Chart Datum.
3. On completion of loading the minimum distance of manifold above Chart Datum is 2.3 m.
4. Maximum distance centre of manifold to bow/stern is 160 m.
5. Minimum distance centre of manifold to start/end of flatside is 34 m.

6. Distance ship's side to 12 in. manifold connection:
   Maximum 6.4 m.
   Minimum 3.5 m.
7. Centre to centre distance between manifold connections:
   Maximum 2.5 m.
   Minimum 0.6 m.
8. A minimum under-keel clearance is required for all ships entering or leaving the port when deep loaded, as follows:
   (a) 3 ft. (0.91 m.) for ships of less than 100,000 S.d.w.t.
   (b) 4 ft. (1.22 m.) for ships of between 100,000 and 250,000 S.d.w.t.
   (c) 5 ft. (1.52 m.) for ships of over 250,000 S.d.w.t.

   While observing the safety requirements of under-keel clearance, tidal delays may be experienced as follows:
   (a) Ships drawing 44 ft. (13.4 m.) may sail at any time.
   (b) Ships drawing 45 ft. (13.7 m.) will occasionally have to wait for the tide.
   (c) Ships drawing 46 ft. (14.0 m.) will usually have to wait for the tide.
   (d) Ships drawing 47 ft. (14.3 m.) will always have to wait for the tide.
9. Vessel normally to arrive with segregated ballast for overboard discharge. Vessel arriving with dirty ballast/slops can discharge these ashore, at a cost, provided:
   (a) ADNOC Refinery has adequate space to receive slops/dirty ballast.
   (b) Ample notice is given.
   (c) Composition of slops/dirty ballast is given.
   (d) Slops/dirty ballast is free of lead and chemicals.

   GASCO cannot be held responsible for delays/deadfreight/etc., in case of the Refinery cannot accept dirty ballast/slops.
10. Vessels should be able to vent gases only through suitable vent stacks fitted with proper spark arresters. High velocity valves shall be strictly maintained on "Auto" mode during the vessel's stay alongside.
11. Vessels fitted with fixed ullaging machines should load with a closed system. Manual ullage could be taken during topping, provided the ullage openings are opened momentarily only, and fitted with spark arresters.
12. Vessel's tanks to be inerted on arrival, with oxygen content below 6% by volume.
13. Minimum mooring requirements are as follows:
   3 head lines
   3 breast lines each end
   2 spring lines each end
   3 stern lines

   Preference is for all wire moorings, but 2 wires each end for spring lines are essential. Also mixed mooring for the same service is not allowed.

   Vessels unable to present wires for spring lines will have their mooring lines inspected by the Pilot on boarding. This inspection can only be carried out during daylight. If found satisfactory, the vessel will berth, provided the weather forecast, for the period the vessel is expected to be alongside, is favourable. Any delays resulting from vessel not able to present wires for spring lines, will be for vessel's account.
14. Vessels should be able to load at a rate of 6% of their S.d.w.t. in tonnes (e.g. S.d.w.t. 30,000 tonnes = Loading rate 1,800 tonnes). Failure to load at above rate will result in delays to the vessel's account.

   GASCO maximum loading rate through 2 loading arm connections is 4,200 cu.m./hr.
15. Towing-off wires shall be made fast to bitts as far forward and aft as practicable on the offshore side. The wire shall be in good condition, of adequate strength and secure with minimum 5 turns on the bitts, a towing-off wire shall lead directly to the chock with 20 m. slack on deck. A heaving line made fast to the eye shall be used to maintain the eye of the wire between 1 m. and 2 m. above the water line at all times.

OPERATOR: Abu Dhabi Gas Industries Ltd., P.O.Box 665, Abu Dhabi, U.A.E. *Tel:* 651100. *Telex:* 22365. *Cables:* Ongas. *FAX:* 6047414. *Contact:* Marine Superintendent.

(E) RUWAIS FERTILISER INDUSTRIES (FERTIL)

The bulk cargo terminal (FERTIL) at Ruwais comprises a 512 m. long jetty with in line berths to suit the export of bulk/bagged Urea and Liquid Ammonia. Three mooring dolphins at the seaward end of the jetty serve a Liquid Ammonia berth. Max. draft is 11 m., a 500 m. turning circle is provided off the jetty and vessels will normally be berthed port side alongside with ship providing its own access. Mooring lines should preferably be all steel wires. If this is not possible ropes and wires are not to be led to the same dolphin. A shore deballasting system is provided.

Provision has been made along the jetty for bag and bulk conveyors to load vessels with urea from a fertiliser plant 1 km. inshore.

The loading of ammonia is carried out from a loading arm at the North end of the jetty where vessels can berth using 3×100 ton capacity mooring dolphins.

OPERATOR: ADPPOC is the service contractor.

LOCATION: The jetty alignment and conveyor main setting out line is 10° West of North. The seaward limit of the jetty works are defined by the Northernmost mooring dolphin.

The terminal is located in 12 m. of water, due East of the NGL Jetty, and West of the Construction Wharf and is approached from a deep water channel serving other Ruwais jetties.

A turning basin is located N.E. of the jetty and is of 500 m. diame and has a minimum dredged depth of 12 m. below chart datum.

Vessels will normally be berthed against fender piles alongside t jetty on a heading of 350°.

NOTICE: *Ship's Arrival Advice:* It is strongly requested that full deta of the vessel including the number of crew and their nationalities sho be advised to us. This information is required by the oil installat protection unit. In the absence of this information the protection u would refuse permission for berthing of the ship. Therefore, you m ensure timely availability of this information so that it can be forwar to the authorities. Any delay caused in berthing due to non-availab of information shall be to your account.

Further, please note that the above information should be ma available as soon as the ship is nominated but not later than 24 hou after the nomination is confirmed. *Signed*: Plant Manager, Fertil.

BERTHING: *Jetty:* The jetty is designed for berthing combinations vessels up to 2 fully laden 200 m. long (25,000 d.w.t.) bulk cargo vesse along its Eastern side. Provision is made at the Northern end of the je for the loading of liquid ammonia.

The jetty deck is of concrete construction and is supported by verti 1 m. diameter tubular steel pipes.

Two turnround areas for jetty traffic are provided, one mid-way alo the jetty, the other at the Northern end.

The jetty is designed to support up to 3 ship loaders with a back conveyor system and up to 3×300 mm. diameter liquid ammonia lin

The 3 mooring dolphins at the Northern end of the jetty serve t Ammonia Berth and each has a bollard capacity of 100 tonnes and connected to the jetty by a system of concrete walkways.

The jetty and dolphins have a deck level 7.4 m. above Jebel Dhan Chart Datum.

The minimum dredged depth at the berth is 12 m. below Chart Datu

Fenders: The fender system has a design capacity of 55 tonne met per fender pile and the recommended berthing angle is 5°. The fend system absorbs energy by deflection of single 1,300 mm. diame tubular steel cantilever piles and twin Bridgestone Cell units which ha a frontal frame 4.2 m. high by 1.7 m. wide.

The fender face is set 4 m. seaward of the jetty deck edge.

The fender spacing is generally 15 m. along the main length of je and this extends to 31 m. for the Northern fenders located East of t mooring dolphins.

The fenders are suitable for vessels between 5,000 d.w.t. a 25,000 d.w.t.

Mooring: Ship lines will be taken to 100 ton "Bean Type" moor bollards located along the cope edge of the jetty. The general bolla spacing is 15 m. whilst at the shore end this extends to 30 m.

100 ton "Bean Type" bollards are positioned on the 3 moor dolphins located at the seaward end of the jetty. Ships' lines may taken to the dolphins by boat or via the concrete walkways provid from the jetty deck.

Landing Stage: A landing stage for small harbour craft is loca adjacent to the jetty near Pile Bent 55, some 600 m. South of t outermost dolphin.

Access Ladders: Access ladders to water level are provided on t fender piles at a spacing of 60 m. All mooring dolphins are provi with access ladders.

Services: Provision has been made for future electrical and mechan services in the jetty by ducts cast into the concrete deck or provis for hanger supports beneath the deck.

Loader Rails: A flat bottom loader rail having a gauge of 11 m. is secu to the concrete deck by Molyneaux Clips. Buffer stops are provided both the inshore and offshore limit of the rail. Provision has been ma for the future extension shorewards of the loader rail.

Approach From Shore: The approach to the jetty is via a d carriageway off the Corniche Road. The access road leading to the j is 600 m. long and 8 m. wide and bounded on one side by the exp conveyor housing.

Breakwaters: Rubble mound breakwaters protect the cooling wa intake channel located West of the jetty.

Rubble mound reclamation bunds built just landward of the reef de the land area.

A rock armoured cooling water outfall channel is located within t reclamation and located mid-way between the jetty and constru wharf.

LOADING: *Urea Loading Operation Procedure:* Firstly, the S Supervisor, after the arrival of the vessel, and after getting Clear Certificate, will discuss the necessary loading sequence for keeping vessel trim with ship's Cargo Officer.

When the sequence of operation has been agreed, the S Supervisor will inform operational group in Bagging Control Room shiploaders of the sequence required.

On receipt of this information, Bagging Control Operators will pre the bag counters or scales and line up other conveyors and mach depending upon the method of shipping required (i.e. bagged or b product) to the quantity agreed with the ship Cargo Master. Meanw the Shiploader Operator will have positioned his machine ready loading into the appropriate cargo hold defined by the sequenc operation.

Shiploader Operator will then give signal as "Shiploader in Load Position" and Bagging Control Room Operator will start sending ba bulk urea to jetty.

The pre-set bag counters or belt weighers will trip the conveyor sys (excluding the jetty conveyors) when the pre-set capacity has b realised. The signal to start again will be given by the "Shiplo Running" signal. On receipt of this signal in the Bagging Control Ro the shiploader will have traversed to its new loading position and wi ready for the next batch of product.

Photocells are provided in conveyors at bagging area to indicate number of bags loaded in ship's load. A cumulative reading (in num is recorded in Bagging Control Room.

For bulk urea loading, urea going to jetty conveyor is measured by weighing scales inside the Bagging Building. The weighing scale has load cells and belt speed detector for measuring the flow rate. The feed rate is indicated and also totalised cumulatively at Bagging Control Room, and also at the local control panel of weighing scale.

Normal operational shut-down shall be sequential and initiated from Bagging Control Room.

(F) ADNOC RUWAIS SULPHUR HANDLING TERMINAL (SHT)

The ADNOC Ruwais Sulphur Handling Terminal is situated at the East of the existing Fertil's Bulk Cargo Terminal at Ruwais and consists of an overall water length of 350 m., which lies in a S.E. direction at the existing jetty. This facility will accommodate at the present, the export of only granulated sulphur in bulk into bulk cargo vessels between the range of 5,000 d.w.t. to 25,000 d.w.t. and max. LOA 175 m.

The overall berthing arrangement includes 3 mooring dolphins and six breasting piles. The 2 centre breasting piles are equipped with quick release hooks for receiving vessels spring lines.

The loading of bulk sulphur is carried out by the telescopic boom of the quadrant shiploader which has 123 m. long travelling arc, having a design loading capacity of 1,000 tonnes/hr. and minimum loading rate of 400 cu.m./hr.

RADIO: *Format for Information required from Vessels prior to Berthing at SHT:*

(AAA)	ETA Ruwais.
(BBB)	Cargo quantities (in tonnes) to be loaded with intended stowage and acceptable loading rate per hour.
(CCC)	Cargo on board on arrival (if any) with stowage.
(CCC)	Last 3 cargoes carried by the vessel with stowage.
(EEE)	Details of hatch cleaning after the discharge of last cargo.
(FFF)	Any deballasting prior/during loading, quantity and time required.
(GGG)	Arrival and sailing draft/displacement.
(HHH)	G.r.t., n.r.t., Official No., year of built, Owner's name.
(III)	S.d.w.t., LOA, beam, flag, Port of Registry and Master's name.
(JJJ)	No. and type of hatches and their capacities.
(KKK)	No. of derricks and their capacities.
(LLL)	Last Port of Call, last port of discharge and next Port of Call.
(MMM)	Any requirements.
(NNN)	Any special requirements by Charterers/Owners with respect to N.O.R., loading before Laydays, etc.

Please note that vessels older than 15 years will be subject to daylight inspection by PPA prior to berthing.

OPERATOR: ADPPOC is the service contractor to ADNOC.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., Jebel Dhanna, United Arab Emirates. Tel: (971-2) 730500. Cables: "Confidence", Abu Dhabi. Telex: Abu Dhabi 22248 ("Gacauh EM"). Fax: Abu Dhabi 731328.

KHOR FAKKAN, Sharjah: 25.22 N. 56.22 E. (See Plan)

PORT LIMITS: See Plan of Khor Fakkan on B.A. Chart No. 3518.

DOCUMENTS: The following documents must be in the possession of the ship's Master on arrival, or must be forwarded to ship's Agent prior to arrival:

Immigration: board on arrival
- Crew Lists (2 copies)
- Passenger Lists (2 copies)
- Passports/Seaman's Identity Cards

Customs:
- Crew Lists (2 copies)
- Passenger Lists (2 copies)
- Cargo Manifests (2 copies)
- List of Alcoholic Beverages (2 copies)

Port Operator:
- Certificate of Registry (1 copy) on request
- Classification Certificates (1 copy) on request

The following documents should be handed to the Port Operator by the ship's Agent at least 24 hours prior to the vessel's arrival.
- Cargo Plan (1 copy)
- Discharge List (1 copy)
- Transhipment List (1 copy)
- Dangerous Cargo Manifest (1 copy)
- Refrigerated Container Manifest (1copy)

PILOTAGE: Pilotage is compulsory for all ships proceeding beyond the Fairway Buoy. Port Khor Fakkan operates a 24 hour, 7 day a week pilotage service. Vessels approaching the Port should await Pilot to seaward of the Fairway Buoy. The extremity of the breakwater (Lat. 25° 21′ 28″ N., Long. 56° 22′ 43″ E.) is marked by a white occulting light visible 10 miles.

"Gulf Pilot Khor Fakkan" on VHF Channel 16. Also on 2182, 2638, 2738, 3270, 3710 and 4136.3 kHz.

ANCHORAGE: A limited number of vessels may anchor in Khor Fakkan Bay to the North of the fairway with the prior approval of the Port Operator. Otherwise, anchoring not permitted within 12 miles of Khor Fakkan as the area is a prime tourist area.

MAX. SIZE: Max. draft entering and leaving is 39 ft., range max. 3.0 m., height of wharf at HW 1.8 m.

No restrictions on LOA.

HEALTH: Normal quarantine regulations apply. Radio Pratique will be granted on receipt of radio message from Master via his Agent, stating that no serious illness has occurred during the preceding 30 days.

All crew members must be in possession of valid cholera certificate. The Health Officer will board when the vessel is alongside.

RADIO: Bahrain Radio A9M.

Notice of Arrival: Vessel should advise its Agent ETA Port Khor Fakkan, giving draft, LOA and intended cargo operations to be performed at least 72 hours prior to arrival and confirm 48 hours and 24 hours prior to arrival.

Agents should arrange berthing and labour with the Port Operator. Vessel should contact Port Khor Fakkan Signal Station on VHF Channel 16 when within range.

VHF: Khor Fakkan Harbour Office can be contacted on Channel 16. All movement in and out of the harbour shall be notified to the control and permission to proceed obtained for each movement.

TUGS: 2 tugs of 2,100 h.p. each

BERTHING: Length of berth 430 m. Depth alongside 12.5 m. at LW. Mooring gangs and berthing launches are provided.

Port Equipment: 2×40 ton Booatse Gantry Cranes, 2×40 ton Mitsubishi gantry cranes; 4×40 ton electric transtainers; yard tractors and trailers. Additional equipment such as forklifts, mobile cranes, pallets and barges available on request from the Port Operator.

Storage Facilities: The terminal comprises an area of 100,000 sq. m. and is capable of handling 150,000 t.e.u.s per year.

Container Freight Station: A container freight station is available at Port Khalid, Sharjah close to the main highway linking Sharjah with its West coast neighbours.

Priority: Given to Container and Ro-Ro vessels.

STEVEDORES: *Working Hours:* The port will work on a 24 hour, 7 day a week basis ashore and afloat. Additional charges will apply outside normal working hours which are defined as follows:

Saturday to Thursday except Public Holidays (0600 – 2200 hrs.).

Normal working hours are subject to change during Ramadan when working hours will be at the discretion of the Port Operator. Requirements for port labour must be submitted by ship's Agent to the Port Operator by 1600 hrs. previous day.

MEDICAL: Upon application to ship's Agent, medical examination of crew members can be arranged. Personnel will either be sent to private doctor or to Public Health Department as circumstances dictate. Serious cases will be referred to Government Hospital Doctor.

FRESH WATER: Fresh water is obtainable. Agents must notify the tonnage required 48 hours prior to ship's arrival.

FUEL: Limited gas oil facilities only at present.

REPAIRS: Marine engineering workshops capable of handling most repairs are available.

SURVEYORS: Services are available upon request.

REPATRIATION: Proximity of Sharjah International Airport will permit efficient crew changes and repatriation. Offshore crew change facilities can be arranged.

Transit visas are not required for crew changes. Ship's passengers require a valid visa for transit or temporary stay.

AIRPORT: Sharjah and Dubai.

TIME: GMT plus 4 hours. Permanent.

BANKS: British Bank of the Middle East, P.O.Box 10030, Khor Fakkan, U.A.E. *Telex*: 89011 Bbmefj EM (stating for KFK.)

Grindlays Bank Ltd., P.O. Box 10149, Khor Fakkan, U.A.E. *Telex*: 89025 Grnly EM.

STORING: At anchorage – by off-shore crew change boats. Alongside – by truck alongside ship. Fork lift trucks and local labour available if required.

SHORE LEAVE: Shore leave is permitted.

GARBAGE DISPOSAL: Garbage skips can be arranged through the Port Authority and are placed alongside at the quay. Charges are U.A.E. Dirhams 50 per day.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.685 (Fixed Link).

GENERAL: Pollution: The provisions of the Khor Fakkan Maritime Law shall apply with respect to the operation of vessels in Khor Fakkan coastal waters.

Ships' Chandlers: Complete chandlering facilities are available, handling provisions, laundry and bonded stores.

Water for Labour: A supply of potable water is to be made available to port labour working on board a vessel.

SHIPMASTER'S REPORT: January 1986

If vessel calling for bunkers only Port Control insist that vessel anchors at least 4 miles off the Fairway Buoy. No Agent or port entry papers required in this case. If however, stores are taken or any crew members changed, an Agent must be appointed and port entry papers completed.

AUTHORITY: Sharjah Ports Authority, Port Khor Fakkan, P.O.Box 10542, Khor Fakkan, U.A.E. *Tel:* Khor Fakkan 85324/85027. *Telex:* 89023 SEAGUL EM. *Cables:* Mina Khor Fakkan. *Contact:* Captain Abdul Razik El Sharif, Harbour Master. *Port Operator:* Khor Fakkan Container Terminal Ltd., (A Division of Gulftainer), P.O.Box 10326, Khor Fakkan, U.A.E. *Tel:* 85604/5. *Telex:* 89064 Servic EM. *Contact:* Captain N. Smith, Terminal Manager.

AGENT: See "Sharjah".

MINA SAQR, Ras Al Khaimah: 25.59 N. 56.03 E.

(See Plan)

PORT LIMITS: "Mina Saqr" and its limits include all waters, installations and the creek of Hanna bounded within 3 mile radius to seaward from the main breakwater light in position Lat. 25° 58′ 48.35″ N., Long. 56° 02′ 43.7″ E.

LOCATION: The Port of Mina Saqr is situated 15 miles by sea and 22 km. by road North of Ras Al Khaimah. On Chart BA. 2888 it is 1 km. North of Hanna Creek in Lat. 25° 58′ N., Long. 56° 03.5′ E. Jubail Al Harim (6,843 ft.) overlooks the port, and is 10 miles East. The port is bounded by main and lee breakwater.

DOCUMENTS: Following documents to be forwarded to the Agents at least 7 days prior to the vessel's arrival:

3 copies Dangerous Cargo List.
2 copies Stowage Plans.
2 copies Hatch List.
6 copies Cargo Manifests.
1 copy each of Bills of Lading.

On vessels arrival, 4 copies of Crew Lists, 4 copies of Vaccination Lists, Crew Health Certificates, Ship's Certificates, etc. to be kept ready for inspection by the Officers.

PILOTAGE: Pilotage is compulsory. Pilot may board from launch or by tug at Approach Buoy (R and W pillar buoy Int. Qk. Fl.) in position Lat. 26° 00′ N., Long. 56° 02′ E. and in all cases a pilot ladder should be provided and a lee given. Pilotage service available 24 hours. Leading light PEL on 20 m. high tower, Red 3°, White 4°, Green 3°.

Master to contact "Mina Saqr Port Control" on VHF Channel 16 at least 2 hours prior to arrival. ETA cables to be sent to the "Harbour Master MINASAQR Ras Al Khaimah" and also to Agents. Vessels to keep listening watch on VHF Channel 16 and await instructions from port.

ANCHORAGE: The area bounded by the port limits and to seaward of the main breakwater has been reputed as an area with good holding ground. The co-ordinates of the anchorage on Chart B.A. 3737 are:

1. Lat. 25° 58′ 36″ N., Long. 56° 01′ 48″ E.
2. Lat. 25° 59′ 24″ N., Long. 55° 59′ 02″ E.
3. Lat. 26° 01′ 12″ N., Long. 56° 02′ 11″ E.

Depths are from 20 m. to 28 m.

MAX. SIZE: No restrictions on breadth of a vessel but length not to exceed 244 m. for easy berthing. Permissible draft in all the berths is 11.5 m. Range of tide is maximum 1.6 m.

HEALTH: Normal quarantine regulations apply and Pratique is granted subject to Port Health Authorities' approval. The Health Officer boards the ship only when vessel alongside. Suspected disease or fever on board vessel to be reported to Harbour Master by cable prior arrival and await instructions.

RADIO: All cables to be routed through Bahrain Radio. Vessels should cable their Agent, at least 72 hours prior to arrival, the ETA, LOA, expected draft on arrival, cargo and hatchwise stowage.

VHF: Port equipped with VHF Radio standby Channel 16 with other working Channels, port working Channel 67. Port Signal Station is manned 24 hours a day and should be contacted at least 2 hours prior to vessel's arrival. Vessels should report the ETA, LOA, draft, details of cargo to be discharged, stowage, etc.

RADAR: Port is equipped with 2 radars with range of 90 miles.

BERTHING: The harbour and entrance channel is 12.2 m. MLWST. A draft limit is imposed of 11.5 m. The harbour provides 165 acres of sheltered water and is enclosed by main and lee breakwaters. Deep water quays totalling 1,690 m. in length will provide berthing facilities for 8 ships. Included in this are 2 Ro/Ro ramps. 4 container cranes and supporting equipment are available.

The small boat harbour and fishing harbour provide a further 725 m. of quay, and offer a dredged depth of 4.5 m.

All the 8 berths, including 2 Ro/Ro berths are now in operation.

Distance between quay and water level maximum 3.8 m. at LW and 2.2 m. at HW.

Discharging to be carried out using port cranes. All berths are general cargo berths. Berths No. 3 and 5 have ramps for Ro/Ro vessels.

CRANES: 4 shore cranes available at any berth. Max. capacity 45 tons at 29 m. and 29.5 tons capacity at 41 m. radius, to handle containers loaded up to 35 tons under automatic spreader, as well as bulk materials with 10 cu.m. max. grab capacity at maximum of 41 m. outreach, and 3 mobile cranes 35 tons capacity available for small ships up to 7,000 tons d.w.t.

BULK CARGO FACILITIES: Berth No. 5 is allocated for loading of bulk cargo and Berth No. 7 for loading bulk cement. Bulk cargoes handled at present are iron ore, gypsum, cement, bauxite, clinker and aggregates, and vessels with these cargoes are allotted any of the general cargo berths subject to availability. No conveyor system or special equipment exist at present.

SPECIALISED CARGO HANDLING FACILITIES: 2 berths, Nos. 3 and 5 with ramps to accommodate Ro/Ro vessels. There is also one berth for bulk cement loading (Berth No.7). Length 180 m. Max. draft 11.5 m., rate of loading cement with hoses is 600 t.p.h. maximum.

An automatic moving shiploader for aggregate and limestone has been installed on Berth No. 5, length 200 m. Max. draft 11.5 m. alongside. The shiploader maximum loading rate is 1,500 t.p.h.

The port has container handling facilities at Quay No. 1, rate 50 – 60 TEU/hr.

STEVEDORES: Advance ETA cable to be sent by Master to the vessels' Agents to order required gangs to work on board vessels. Labour gangs are supplied by RAK Stevedoring Company. Telex No. 99129 RSC EM. Fax: (077) 67363., (who can be contacted via the Signal Station) and the gangs work on board the vessel directly under the supervision of the vessel's Officers RAK Stevedoring Company accepting no responsibility whatsoever for any damage either to the vessel or its cargo.

Working Hours: 0700 – 1400 hrs. and 1500 – 2100 hrs.

TUGS: 3×5,000 h.p. Tugs join the vessel at anchorage, the prac being to secure alongside, using ship's lines. Derricks should be swu in and gangways hoisted. Tugs are fitted with VHF.

MEDICAL: Advisable for Agents to receive at least 24 hours' advan notice of required medical attention but can also attend to this at sh notice. Hospital facilities are available. Officers/Crew should have va Cholera and Yellow Fever Certificates.

TANKERS: No tanker berth in port. Tankers will discharge at Ber No. 1, 2 and 3 through bunker line – this will be fuel and diesel oils on Fuel line 12 in., diesel line 8 in. and 6 in. hose. SBM offshore for load crude oil (See "Hulaylah Terminal").

DENSITY: 1024 – 1028.

FRESH WATER: Fresh water available in Berths No. 1 to 6 with 2 po to service tanks fore and aft as required on a 24 hour basis. Cos water will be Dh. 7/– per ton.

FUEL: Fuel oil, marine diesel oil, and gas oil can be supplied throu RAK Refuelling (Shell) or E.G.P.C. Telephone and telex numbers a available through the Port Signal Station. All sizes of reducers a available and pumping rates are fuel oil 200 t.p.h. and gas oil 250 t.p – 300 t.p.h., subject to vessel's receiving capacity. Presently there a 6 bunker points in Berths No. 1, 2 and 3.

Marine lubricants of all brands can also be supplied provi nomination through the suppliers is received sufficiently in advance.

FIRE PRECAUTIONS: The port has its own auxiliary fire brigade a when required, the services of the Ras Al Khaimah Fire Brigade a available.

CONSULS: None at this port but most of the consulates can contacted at Abu Dhabi or Dubai.

REPAIRS: Small repairs can be carried out in the port, but major w can only be carried out by companies in Dubai.

DRY DOCK: No dry dock in Mina Saqr. The nearest drydocks are Ajman and Dubai.

SURVEYORS: Draft, on-off hire and Bunker surveys are arrang through the Port Authority. All Classification Societies, Salva Associations and cargo inspection companies are available in Du and Sharjah.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

HATCHES: Opening/closing of the hatches to be carried out by the cr with the assistance of the stevedores, if necessary.

CUSTOMS ALLOWANCES: Normally, bonded stores are not sea by the Customs Authorities. However, only limited stock should be with the Officers/crew for their consumption on board vessel and t rest should be kept locked under the custody of the Master. Sale bonded stores is strictly prohibited and persons indulging in this wil punished according to local custom.

REPATRIATION: Efficient crew changes and repatriation can be car out on receipt of advance information.

AIRPORT: Ras Al Khaimah International Airport, situated about 45 South of Mina Saqr, operate daily flights to various destinations.

TIME: Local time is GMT plus 4 hours.

HOLIDAYS: Normal Muslim holidays during which time port wor hours will be restricted. Fridays are the weekly holidays.

POLICE/AMBULANCE/FIRE: All police, fire and ambulan emergencies should be notified on 999. General telephone numb are: 29351 for Police, 26668 for Ambulance and 21212 for Fire.

TELEPHONES: No telephones available for placing on board vesse However, a telephone is available in the Port Signal Station 24 hou day.

For international calls, Agent's offices situated outside port a should be used. Ras Al Khaimah has excellent communication to m countries as it has its own earth satellite station.

SERVICES: Ship chandlers, laundry, exchange of films, etc. avail in Ras Al Khaimah. Radio/radar repairs, tank cleaning equipm scamping (underwater cleaning) facilities, etc. can be arrang Garbage reception facilities available.

BANKS: National Bank of Ras Al Khaimah, Bank of Melli Iran, Un Arab Bank, National Bank of Abu Dhabi, Bank of Baroda, Bank of Om British Bank of Middle East, Bank du Caire, Commercial Bank of Du Bank of Arab Coast, Middle East Bank and Bank Libanaise pou Commerce.

STORING: See "Prelims".

1. By truck or barge.
2. No restrictions.
3. Yes.
4. Yes.
5. None.
6. Yes.

SHORE LEAVE: Can be granted and for this purpose the Agents sho hand over a Crew List to the Immigration Department who will is shore passes in exchange for Seaman's Book or Passport. Pri vessel's departure, Master to ensure that all shore passes are han over to the Agents who will surrender them to the Immigr Department, Seaman's Books/Passports will then be returned. Ag should advise Immigration Department by letter if any crew chang be effected.

GARBAGE DISPOSAL: Service available, drums are prov alongside. Tel: 668444. Charges Dhs 50.00 per trip (24 hour serv

WASTE OIL DISPOSAL: No facilities available.

SEAMAN'S CLUBS: None.

CURRENCY: Local currency is the U.A.E. Dirham.

REGULATIONS: None.

DELAYS: No berthing delays.

AUTHORITY: Ras Al Khaimah Port Services, P.O.Box 5130, Ra Khaimah, U.A.E. *Tel:* (07) 668444 (4 lines). *Telex:* 99280 Rakps *FAX:* (07) 668533. *Cables:* Minasaqr. *Contact:* Captain Hazem R Assaad, Port Manager.

Telex: 99226 ("GACRAK EM"). Tel: 221266. After office hours 352449. Fax: 229499.

Operators of ships' supply service and shipping agency: Crew changes, mail, spares and/or delivery of provisions, fresh water and lube oil, as well as arranging of bunkers.

Owners, Operators and Masters are welcome to contact G.A.C. Dubai by cable or telex regarding requirements and for coordination of rendezvous positions off Dubai or off Fujairah.

MINA ZAYED, Abu Dhabi: 24.32 N. 54.23 E. **(See Plan)**

COURTESY FLAG: Vessels calling at ports in the Emirate of Abu Dhabi should fly the flag of the United Arab Emirates as a courtesy flag.
DOCUMENTS: 5 copies of Cargo Manifest are required, with full cargo particulars, such as Bill of Lading number, marks/numbers, description, weight and measurement and IMO Class if any. It is essential that all this information against consignee/notify parties name, full contact address is given on the Manifest for each consignment. The Manifests should reach the Agent prior to arrival of vessel in order to be submitted to the Port Authorities 48 hours before the ship's arrival.

Also stowage particulars should be submitted with the Manifest in order that the Agent may advise the Port Authority of the equipment and labour required for efficient handling of the vessel.

Customs Require:
1 copy Crew List.
1 copy Stores List.
Immigration Require:
2 copies Crew List.
2 copies Passenger List, if any.
Quarantine Require:
Crew List
International Health Certificate.
Vaccination List.

PILOTAGE: Pilotage is compulsory for all vessels entering/leaving Mina Zayed. Pilotage 24 hours. Pilot will board incoming vessels within a radius of 1 nautical mile seaward of the Fairway Buoy (Lat. 24° 39.15′ N., Long. 54° 14.1′ E.). Ships should wait for Pilot in the area stated above and not enter the channel unless instructions to the contrary are given.
ANCHORAGE: Recommended anchorage for ships over draft of 9.45 m. is approximately 1 mile N.E. of Abu Dhabi Racon and for ships up to 9.45 m. draft approximately 0.9 miles S.W. of "Z 11" in position Lat. 24° 35.5′ N., Long. 54° 18.93′ E.
MAX. SIZE: Largest vessel up to draft 13.0 m. at general cargo berths, 13.0 m. at Container Terminal, no restriction on beam or length.

Max. rise and fall of tide is 2.0 m.

RADIO: Vessels are to give their ETAs by cable through Muscat or Bahrain Radio, addressed to "Port Authorities – Port Zayed, Harbour Office" at least 72 hours prior arrival. Port Control Tower equipped with HF transceiver operating on 2 frequencies and continuous watch on 2182 kHz.
VHF: Port Control Tower on VHF Channels 16, 12, 11, 9 and 6.
TUGS: 4 harbour tugs available, 2×2,400 h.p. and 2×1,250 h.p. Tugs fitted with VHF.
BERTHING: 21 deep water berths with a total quay length of 4,300 m. Berths No. 1, 2, 3 and 4 Container Terminal with depth 10.5 m. to 13.0 m.; Berths No. 5, 6, 7, 8 and 9 with depth 9.5 m.; Berths No. 10, 11, 12 and 13 with depth 6.0 m.; Berths No. 14, 15, 16, 17, 18 and 19 with depth 11.5 m.; Berths No. 20 and 21 with depth 10.5 m.

Storage: The Port has 13 closed storage sheds over an area of 102,300 sq.m. There are also 9 open sheds with a total area of 45,000 sq.m. and an open area (paved) of 1,104,000 sq.m. for the stacking or storage of various types of cargo such as timber, steel, construction materials and cars.

CRANES: Cranes for discharging available. Mobile cranes from 5 – 150 tons available. 3 container cranes 40 tons, fork-lift trucks and trailers, 2×40 tons straddle carriers.
CONTAINER HANDLING FACILITIES: *Container and Ro/Ro Facilities:* Container Terminal has 4 berths with a total length of 800 m. Two berths have a depth of 13.0 m. and 2 berths have a depth of 10.5 m. The berths are equipped with 3 Krupp modern container cranes of 40 tons capacity with an outreach of 39 m. 2×40 ton rail-mounted yard cranes, 2×40 tons, 2×15 tons, 2×8 tons Forklift trucks, 2×40 ton straddle carriers, 25 HK stacking containers, which accommodate 15,000 TEU's and there is a large LCL Terminal and a large area set aside for Ro/Ro equipment. 148 reefer plugs (480 volt, 32 amp), workshop for maintenance and repair of cranes and other equipment. Computer equipped control tower, radio network linking cranes, other equipment and offices and sheds.
BULK HANDLING FACILITIES: Bulk grain silo at Berth No. 19 has a storage capacity of 60,000 tons with discharge rate of 240 t.p.h.
STEVEDORES: Skilled manpower available for all kinds of cargo operations.

Working Hours: Working hours for stevedoring from 0700-2100 hrs. plus overtime on request.

Cargo is also handled on Fridays.

Container Terminal works 24 hours, 7 days a week.

MEDICAL: Fully equipped Government hospital, most medicines available. Private clinics available.
TANKERS: See "Das Island", "Umm Al Nar" and "Jebel Dhanna – Ruwais".
FRESH WATER: Available at all berths, or by barges.
FUEL: Diesel oil and gas oil is available by barges.
FIRE PRECAUTIONS: Port Zayed Fire Brigade is available 24 hours a day. The harbour tugs are fitted with fire-fighting equipment.
SURVEYORS: Lloyd's Agents: Abu Dhabi Maritime & Mercantile International, P.O.Box 247, Abu Dhabi, Tel: (2) 323131. Telex: 22245.
LAUNDRY: Reasonably good laundries available.
PROVISIONS: Can be arranged through ship's Agent.
AIRPORT: Abu Dhabi International Airport is 40 km. There are daily flights to all Gulf State Countries.
TIME: GMT plus 4 hours.
HOLIDAYS: Friday is weekly holiday. Cargo movement generally not affected by holidays.
SHORE LEAVE: Permitted. A permit can be obtained from Immigration Department. Absolutely necessary that every crew member be in possession of valid Seaman's Book.
GARBAGE DISPOSAL: Garbage collection service is available by providing drums alongside free of charge.
WASTE OIL DISPOSAL: Waste oil collection service is available. At present waste oil is collected by tankers which are provided by ship's agents at any time.
SEAMAN'S CLUBS: No clubs operating at the port. Public telephone service and postage facilities are available.
CURRENCY: U.A.E. Dirham (Drhs).
GENERAL: *Vessels discharging cargo at anchorage:* Anchorage ETA required: The Port Authority should like to draw the attention of all shipping agencies in Abu Dhabi, to supply the Traffic Department with the date of arrival of ships which are going to discharge their cargo at anchor.

To enable the Traffic Department to take the necessary action and to render the required facilities, it is necessary that manifests, documents relating to cargo and the date of arrival should be forwarded 48 hours before the actual arrival of ships.

DEVELOPMENTS: Fishing harbour under construction South of the Dhow Harbour.
AUTHORITY: Abu Dhabi Seaport Authority – Port Zayed, P.O.Box 422, Abu Dhabi, U.A.E. *Tel:* 730600. *Telex:* 22731 Portex EM. *FAX:* 731023.
Officials: H.H. Sheikh Saeed bin Zayed Al Nahyan, Chairman.
H.E. Hassan Mousa Al Qamzi, Under Secretary.
Mr. Mubarak Mohamed Al Buainain, Port Director.
Mr. Hamad bin Ali Al Darmaki, Deputy Port Director.
Mr. Hamad R. Al Nouami, Manager, Chairman's Office.
Captain Said Darwish Al Rumaithy, Harbour Master.
Mr. Rashid Hilal Al Busaidy, Container Terminal Manager.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., P.O.B. 377, Abu Dhabi, U.A.E. Cables: "Confidence", Abu Dhabi. Tel. 730500 (10 lines). After office hours Tel: 730381, 794490. Fax: 731328. Radio: Marine VHF radio, stand-by on Channel 16 (156.8 MHz), Call sign "Confidence, Abu Dhabi". Telex: 22248 ("Gacauh EM").

MUBAREK TERMINAL, Sharjah: 25.49 N. 55.11 E. **(See Plan)**

LOCATION: The Mubarek Oil Terminal is situated off the island of Abu Musa, and is under the jurisdiction of the Emirate of Sharjah and operated by the Crescent Petroleum Company.
DOCUMENTS: One Crew List and valid Health Certificate.
EARLY DEPARTURE PROCEDURE: In force. Vessel's Agent signs all documents on behalf of the Master including Bills of Lading.
PILOTAGE: Vessels to be moored, anchored or manoeuvred at Mubarek Oil Terminal will be boarded by Company Mooring Master in the close vicinity of the suggested anchorage area. Vessels must not enter the restricted limits of the terminal unless a Company Mooring Master is on board.

Ships are requested to have a pilot ladder safely and securely rigged and ready for immediate use and long enough to reach the Company Mooring Master's launch. A combination of pilot ladder and ship's accommodation ladder so arranged that personnel can first use pilot ladder until part way up the vessel's side and then transfer to the accommodation ladder is recommended, especially on very large ships. There should be adequate lighting at night. Vessels will provide a lee for the Company Mooring Master's launch when boarding and leaving.

The Company Mooring Master may require the vessel to anchor at any time he deems it necessary for the safety of the vessel or moorings or both or for infringement of the terminal regulations.

The Company Mooring Master shall be the sole authority as to when the terminal is open or closed for normal working due to weather conditions.

NAVIGATION AIDS: A floating oil storage vessel (F.S.U.)*Mubaraka* (87,000 d.w.t.) is used for storage of crude oil and for accommodation and headquarters of terminal personnel lies permanently moored to the SPM in position 25° 49′ N., 55° 10′ E. The *Mubaraka* is equipped with normal navigational warning lights and aids as required by convention.

A fixed oil production platform, incorporating crude oil treating facilities, rises approximately 50 ft. above water at Lat. 25° 50′ 43″ N., Long. 55° 11′ 49″ E. Said structures are equipped with 1 clear light and a fog horn, each with characteristics Mo(U) 30 secs. A permanently fixed flare structure (tripod) rises 150 ft. (flare tip) above water at Lat. 25° 50′ 56″ N., Long. 55° 12′ 00″ E., approximately 037°, 1,716 ft. from the oil production platform. In addition, there are numerous oil well head structures within the restricted area described below. All structures have standard navigation aids with characteristics the same as mentioned above.

READINESS: Notice of Readiness will not be accepted at time of arrival unless the vessel is in all respects ready to load. Arrival time will be considered the time the Company Mooring Master boards the vessel, or the time the vessel is within the approved anchorage area, whichever occurs first. Notice of Readiness is to be in English.

ANCHORAGE: An anchorage area diameter 6,000 ft. has been established with the centre in position Lat. 25° 46′ 45″ N., Long. 55° 13′ 13″ E.

RESTRICTED AREA: A restricted area of approx. 38 square miles has been established with a boundary formed by an imaginary line from:
(a) 25° 54′ 26″ N., 55° 13′ 49″ E. in a W.S.W. direction to
(b) 25° 15′ 14″ N., 55° 07′ 19″ E. thence in a S.S.E. direction to
(c) 25° 46′ 33″ N., 55° 09′ 37″ E. thence in a E.N.E. direction to
(d) 25° 49′ 44″ N., 55° 16′ 08″ E. thence in a N.N.W. direction to the position above.

Note: There are now 11 platforms within the restricted area and a New Central Platform is scheduled for installation in position Lat. 25° 50.7′ N., Long. 55° 11.7′ E. (approx.).

RESTRICTIONS: Max. distance bow to manifold 555 ft. (169 m.).

MAX. SIZE: Max. berthing deadweight 275,000 tons.

HEALTH: When arriving fly "Q" flag by day, and red over white light at night for quarantine service.

RADIO: Initial communication by radio between ship and Crescent Petroleum Company should be via Bahrain Radio, call sign "A9M", operating on a 24 hour basis or directly by telex to 68015 CRESPT EM.

Company Mooring Master will have sole control of radio installations during the period a vessel is manoeuvring or moored, and no radio transmissions will be permitted on board ship except by the express permission of the Mooring Master in each case, only the Mooring Master may transmit on Channels 71 and 17 during the period he is on board. He will have a VHF radio telephone with him.

Mubarek Oil Terminal Radio Station call sign "Crescent – 5" particulars are as follows:

Operated by Crescent Petroleum Company, Sharjah, position: Lat. 25° 49′ N., Long. 55° 10′ E.

Frequencies: Channels 71 and Marine Private 33 (157.650 MHz).

Hours of operation: 24 hours per day.

Mubarek Oil Terminal Control Centre keeps continuous watch on VHF radio telephone Channel 71 and 33. Vessel approaching the terminal not having Channel 71 will be contacted on Channel 16 when the terminal will request her to switch to an alternate channel.

Channel 71 is reserved and as an alternative Channel 17 for communications between ships in moorings and Mubarek Oil Terminal Movements Control Centre. This is a safety measure since oil flow to ships is controlled through Channel 71, which therefore must be clear at all times in case of need to stop oil flow for any cause.

Channel 16 is for calling and safety use only.

It is most important that ships establish communications with the terminal not less than 72 hours prior to arrival at the terminal giving ETA. Further ETA signals should be sent when the vessel is 24 hours, 12 hours and 4 hours distant, or any time a change of 1 hour in original ETA occurs. These messages should state specifically whether ETA is given in GMT or Local Time. The 72 hour signal should include the following:

ETA.
Last Port of Call.
If any Sickness on Board.
If vessel has Clean Bill of Health.
Cargo quantity and Grades expected to be lifted in barrels at 60°F.

The 12 hour signal should include definite indication as to whether the vessel is ready to load or not and should also include information on the time she will require to discharge ballast after arrival. Precise time of arrival should be given when the ship is 4 hours distant from the terminal.

Unreasonable insufficiency or inaccuracy in ETA messages may alter the order of berthing of ships to the advantage of those ships giving sufficient and accurate ETA messages. Acceptance of Notice of Readiness will also be affected by such insufficiency or inaccuracy.

On receipt of first signal from a vessel, terminal will transmit a message to her giving preliminary requirements of terminal. Masters are urged to comply with this in all details in order to facilitate vessel turnaround and government formalities.

TUGS: The Company maintains launches to assist in mooring and unmooring vessels. These are under the direct supervision and control of the Company Mooring Master.

BERTHING: Vessels to load crude oil cargo will be normally accepted and berthed in chronological order of arrival provided such vessels have current nomination for cargo valid at the time of tender, carry clean ballast if any, and have cargo tanks in a fit condition to receive cargo. Also, they must be in all respects properly equipped and ready to moor. Should berthing be delayed on account of bad weather, vessels will keep their position in line.

Vessels required to leave the terminal area on account of bad weather should keep in contact with the terminal via the Company radio station at Mubarek Oil Terminal, call sign "Mubarek Terminal", in order that they may be available when the weather is fit for resumption of operations. The Company reserves the right to load vessels out of turn following the return of good weather, to the extent that such loading "out of turn" does not materially delay the loading of other vessels in line. Further the Company reserves the right to decline to moor a specific vessel if its condition or facilities are unsafe for mooring or loading even though the terminal may be open to other vessels.

The Company Terminal Superintendent's decision on this will be final.

Mooring: Mooring is by the "Tandem" method, with the bow of the export tanker moored to the bow of the storage tanker *Mubaraka*. The mooring rope is a standard 21 in. circumference × 200 ft. nylon SPM rope, fitted with a 3 in. OCIMF chafe chain.

During the mooring-up operation a tug is made fast to the stern of the visiting tanker and remains attached throughout the entire loading operation, in order to maintain both vessels in alignment.

Tug and mooring boats are supplied by the Terminal, also vessels should note that mooring crews must be available fore and aft. Normally the tug will use its own tow rope, therefore a good quality messenger must be ready aft, as well as forward.

Average loading rate is 16,000 b.p.h.

EQUIPMENT: Vessels must have suitable winches or capstans in operating condition on the forecastle and poop decks.

All vessels should have ready messenger lines on forecastle hea bringing the mooring line aboard from single point mooring.

Mooring winches on forecastle head for handling 1×1 circumference synthetic fibre floating pick-up line.

Adequate mooring bitts to secure mooring line. A bow sto designed to O.C.I.M.F. standard is required at all times.

Hose lifting winch, derrick and gear rigged for 10.0 tons.

HOSES: After the vessel is securely moored the cargo hose wi hoisted on the port side. The hose is lifted by ship's gear and crew all connecting of the hose will be done by them. The lifting de equipment tackle, etc., should be topped off and ready on a Terminal loading hose is fitted with ASA 150 pound flat face 1 "Camlock" coupling and ships should have adapters and fitting enable this hose to be connected to the ship's manifold. The Comp Mooring Master advises the ship's personnel in hose lifting connecting procedure; however, a deck officer must be present and direct the ship's crew in all handling. The Company Mooring Master reject a ship for unsatisfactory hose handling.

Do not close valves against crude flow.

Emergency flow stop signal if all communications fail will b continuous sounding of the ship's whistle from either export tank *Mubaraka*.

CARGO SPECIFICATIONS: Mubarek Condensate Blend: Approxim API 50°.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Various consulates are located in Abu Dhabi and Dub

REPAIRS: No repairs, painting, etc., are to be made while ber unberthing or in the berth.

CUSTOMS: Cigarettes, cigars, tobacco, matches, spirits, wines, be perfume, arms, ammunition and possibly other items have to be lo up under Customs seal from time of arrival of ship until time of lea territorial waters.

TIME: Local time is GMT plus 4 hours throughout the year.

SERVICES: No supplies of any kind and no medical services (ex in case of emergency and subject to a doctor being available), or o services are available at Mubarek Oil Terminal.

SHORE LEAVE: Not permitted.

GARBAGE DISPOSAL: No facilities (Offshore Terminal).

WASTE OIL DISPOSAL: No facilities.

CURRENCY: U.A.E. Dirham.

GENERAL: *Light Dues:* The Middle East Navigation Aids Se (MENAS) charges light dues according to the size of the vessel and number of visits to the Gulf during the year.

Positively no provision is made for dirty ballast: Any ship arriving dirty ballast will be rejected and all costs accruing therefrom will b the ship's account. Notice of Readiness shall not be accepted vessel returns with clean ballast and tanks fit to receive cargo. She on second arrival tender a new notice of readiness to load.

Fire towing wires required fore and aft.

No swimming permitted whilst vessel in berth.

No fishing permitted at the berth or within the restricted navigation a

SHIPMASTER'S REPORT: December 1979 (Updated 1988).

Pilotage: Pilot flies out from Sharjah by helicopter and he carries o entry procedures. He will also take mail ashore for delivery to ves Agents. Mail must be placed in one envelope, addressed to Agents marked ship's mail.

Tankers: Loading rate commences at 1,000 t.p.h. and when every satisfactory increased to max. 2,000 t.p.h. Normal parcel is 500,000 ±0.0%. If vessel requires a plus % then give a Note of Protest t Pilot.

MUBARRAZ ISLAND, Abu Dhabi: 24.26. N. 53.32 E (HALAT AL MUBARRAZ) (See P

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
2 Manifests.
1 International Maritime Declaration of Health.

FLAG: All vessels calling at Mubarraz are required to fly the na flag of U.A.E. which are available from ship's Agent.

LOCATION: Mubarraz Island is located approximately Lat. 24° 2 Long. 53° 22′ E., some 55 miles West of Port of Abu Dhabi.

The island constitutes export terminal of crude oil produced b Dhabi Oil Company Limited (Japan). Crude oil produced fro Company's Mubarraz oilfield is transported to Central Facilities Pla (CFP) situated approximately 19 miles E.N.E. of Mubarraz Isla 4 in. to 14 in. flowlines, thence relayed by a 18 in. transmission l the Island. The Company has tank storage for 2,238,000 barrels of oil on the island.

Tanker loading is accomplished by means of a single-buoy-mo (SBM) system installed about 8 miles offshore East of the Island

Average API Gravity of crude oil to be located is 36.5° and flas is below 35° Fahrenheit.

PORT LIMITS: The port area of Mubarraz and its approaches cover the area bounded by straight lines connecting the following points:

(a) Lat. 24° 30.0′ N., Long. 53° 36.0′ E.
(b) Lat. 24° 24.0′ N., Long. 53° 36.0′ E.
(c) Lat. 24° 24.0′ N., Long. 53° 27.0′ E.
(d) Lat. 24° 26.7′ N., Long. 53° 21.7′ E.
(e) Lat. 24° 30.0′ N., Long. 53° 21.7′ E.

Masters of all vessels entering the Port must follow instruction from the Company's Port Master as to approaches, anchoring, berthing and unberthing.

APPROACHES: *Approaches to Mubarraz:* Japanese Charts No. 3173 and No. 3174 cover the approaches to Mubarraz. For tankers arriving at Mubarraz without necessary charts full information shall be given by telegram if a request is sent to "Confidence" Abu Dhabi via "A9M" Bahrain Radio a few days before arrival.

Alternatively, if the vessel has VHF, the buoy positions shall be given to her upon request to "Mubarraz Terminal" as she approaches but prior notice of requiring this service should be given in the vessel's arrival message.

Charts: The following charts are recommended for use in Abu Dhabi waters:

Japanese Charts No. 3173 and 3174
British Admiralty Charts No. 3733, 3734, 2889 and 3716.

6	24° 30.20′	53° 40.70′		
			214	3.50
7	24° 27.30′	53° 38.55′		
			240	2.20
8	24° 26.20′	53° 36.40′		
			261	3.10
9	24° 25.70′	53° 33.05′		
			Total Distance:	46.25

Anchorage Position	Lat. 24° 26.80′ N.	Long. 53° 34.00′ E.
S.B.M. Position	Lat. 24° 25.98′ N.	Long. 53° 31.54′ E.

Navigation in Shallow Waters: There are some shoals with depth of 14.9 m. (49 ft.) in the area between Buoys No. 14 and No. 15. Masters of outgoing vessels should pay due consideration to the effect of squat at speed on vessel's draft in the shallow water, bearing in mind vessel's trim.

Conspicuous Marks: Quick flash white navigation lights (visibility range 5 miles) are fixed on following platforms and the flare stacks adjacent to each platform are visible from distance:

MR-6 Platform	Lat. 24° 35′ 44″ N.	Long. 53° 43′ 53″ E.
CFP	Lat. 24° 30′ 09″ N.	Long. 53° 42′ 09″ E.
AA Platform	Lat. 24° 26′ 10″ N.	Long. 53° 39′ 55″ E.

PILOTAGE: Pilot is provided by the Oil Company at the request of the vessel's Master based on express understanding and condition that he is aboard the vessel for the purpose of assisting the Master and becomes, for such purpose, the servant of the owners of the vessel.

It is recommended that the Master of the vessel calling at Mubarraz for the first time requests Pilot to go aboard the vessel for both inward and outward passage of the channel. The Pilot will normally board the vessel in the vicinity of Buoy No. 5 and will advise the Master on approaches to the berth and he will remain on board to act as Mooring Master and direct loading operations.

Mooring Master: The Mooring Master provided by the Company will undertake pilotage, mooring and unmooring of the tankers.

The Mooring Master shall board vessels to be moored at SBM in the anchorage area or in the vicinity of Buoy No. 17. The Mooring Master will advise the Master of vessel on approaches to the SBM, mooring, unmooring, connecting and disconnecting hoses and all other operations within the port area. All manoeuvring of vessels within the port area shall be done only in accordance with the advice of the Mooring Master, subject to the understanding that in all cases and circumstances the Master of the vessel shall remain solely responsible for the safety and proper manoeuvring of the tanker. Master or one of his qualified deck officers must be on the bridge at all times while the vessel is being manoeuvred.

ANCHORAGE: The tanker anchorage is within 0.5 miles radius of Lat. 24° 26.8′ N., Long. 53° 34′ E. Depth of water from 15.5 m. - 18 m. (50 ft. to 59 ft.). The sea bed all around the anchorage is coral with approximately 6 ft. of loose sand. Holding is poor and a vessel is advised to pay out at least six shackles of chain.

Vessels will be advised by radio of a suitable anchorage if both anchorage and the berth are not immediately available. Vessels should under no circumstances anchor or wait at the South area of Lat.24° 57′ N. without obtaining prior approval of the Port Master.

Anchorage for Dry-cargo Ships: Anchorage for dry-cargo ships is directed by Port Master by VHF radio.

Prohibited Area for Navigation and Anchorage: The area within 1.15 miles radius from CFP is prohibited for navigation and anchorage. No vessels shall anchor within the range of 1.5 miles from submarine pipelines.

MAX. SIZE: See "Approaches" – depth over shoal areas; also see "Tides".

HEALTH: Vessels arriving at Mubarraz Terminal must carry the usual Bills of Health for ports visited on the voyage. Masters of vessels are requested to inform the Company if there is any person ill on board or if there has been sickness within the week prior to arrival.

Pratique is usually granted by Port Medical Officer through the Mooring Master or Agency Clerk.

RADIO: *Notice of Arrival:* Vessels should advise their ETA Mubarraz at least 72 hours and again 24 hours before arrival through normal radio service. As an alternative to the route through Bahrain Radio Station (A9M) vessels may send their first message through Singapore or Bombay.

Confirmation of ETA should be made a few hours before arrival at "Approach Buoy" by calling "Mubarraz Terminal" on Channel 16 VHF. After anchoring, vessels should advise their time of anchoring through VHF and thereafter maintain a continuous listening watch on Channel 16 until the Company's Mooring Master boards.

Tankers bound for Mubarraz should advise their ETA and other information 72, 48 and 24 hours before arrival.

Vessels may find it helpful to route their first message through Singapore, Bombay or Bahrain Radio Station. All cables should be addressed to the Company through ship's Agent.

The first message should be sent according to the following form, but any items which are the same with a recent previous voyage to this port may be omitted.

(1) ETA Mubarraz.
(2) Last Port.
(3) Next Port.
(4) Deballasting time.
(5) Quantity of cargo required.
(6) Maximum loading rate.
(7) Diameter of cargo manifold.
(8) Distance from manifold to ship's side.
(9) Derrick capacity.
(10) Diameter of fairlead.
(11) Name of Master.
(12) Number of crew.
(13) Whether Pilot is required or not.
(14) Acceptance of E.D.P. (Early Departure Procedure).

Radio Station in Mubarraz Terminal Office.

Short-range communication to Mubarraz Terminal Office can be made by calling "Mubarraz Terminal" on VHF radio telephone. Vessels should inform the office with their ETA preferably when they pass the Strait of Hormuz. After anchoring, vessels should advise anchoring time and maintain a listening watch on Channel 16 until Mooring Master boards.

Call Sign: "Mubarraz Terminal".

Frequency:	*Reception*	*Transmission*
F3	Channel 16	Channel 10, 12, 14

Operating Periods: Round the clock.

BALLAST: All vessels arriving at this port are required to have on board sufficient clean ballast to give a safe draft for manoeuvring purposes. Vessels arriving with insufficient ballast may be required to increase the quantity, should the Mooring Master consider that it would not be safe to berth the vessel for loading. As a general rule, vessels shall not start discharging ballast until mooring is completed.

Upon completion of deballasting the Mooring Master will inspect the tanks. If the tanks are not satisfactory, he may require further pumping until such time as they meet the required standard.

It is strictly prohibited to discharge oil, oily water or other refuse that may result in pollution of the sea. International oil pollution regulations must be strictly observed by all vessels. *The terminal does not have facilities to receive oily ballast.*

TUGS: One tug/workboat is always available for use for marine operations at this port and one mooring boat is available during loading.

BERTH: *Position of Buoy:* Lat. 24° 25.98′ N., Long. 53° 31.54′ E.
Depth of Water: 15.5 m. (50.85 ft.).

The berth is a single-buoy-mooring system consisting of a buoy 44.32 ft. (13.5 m.) in diameter, moored to 6 pendant legs of 3 in. high strength chain shackled to anchor piles at a radius of 855 ft. (260 m.), and having a rotating deck carrying the pipeline and mooring connections.

One 32 in. crude oil line has been laid approximately 52,500 ft. (16 km.) from the shore to a position close under the buoy. From the underwater manifold the crude oil goes to the buoy through a 20 in. underwater hose. The connection between turntable piping of SBM and tanker manifold consists of 1 hose string composed of 24 in. and 20 in. (Length 770 ft.) floating hoses and 2 hose strings composed of 16 in. (Length 120 ft.) tail hoses.

LOADING: The maximum loading rate of crude oil is 32,700 bbls./hr. or 5,200 kl./hr.

Notice of Readiness: The Master of each vessel should present a Notice of Readiness to load to the Company's Mooring Master who will sign it on behalf of the Company.

The Notice of Readiness should be tendered at the time of the vessel's arrival at the tanker anchorage area, which is, in principle, understood to be either the time of dropping the anchor in the anchorage, or, if the vessel does not anchor, the time that the Mooring Master boards to commence berthing.

The vessel, however, is prohibited from berthing unless she reaches Buoy No. 5 at least 5 hours before the sunset, and Notice of Readiness will not be accepted until the next sunrise even if the vessel has already anchored in the tanker anchorage area.

Notice of Readiness will not be accepted during periods when the port is closed. The port is "closed" when the weather is such that it is too rough for incoming tankers to berth. The decision regarding the opening and closing of the port will rest with Port Master.

When the vessel is ready in all respects for loading the ship's officer must inform the Mooring Master who will transmit the necessary messages to the control room on shore. Mooring Master is authorised to control all the loading operations.

All cargo documents and shore figures are usually prepared on board and the Mooring Master will sign the documents on behalf of the company

MOORING: The Company reserves the right to refuse to accept for berthing or loading any vessels considered unsuitable by reason of inadequate or unsatisfactory mooring equipment, insufficient derrick capacity, unusual manifold connection, inability to comply with the Safety Regulations, or any circumstances which would create unusual risk to the Company's berth, facilities, personnel and equipment whatsoever.

Preparation: Before Mooring Master boards, vessels should have ready the following:

(a) Jacob's Ladder on lee side.
(b) Hawser 1 each at fore and aft deck, polypropylene if possible.
(c) 1 steel crowbar.
(d) Port derrick with double wire rigged for minimum lift 5 tons.

After vessel is anchored, the Company's mooring and hose connection crew will board and pick up mooring and hose connection materials from tug/workboat. Vessel is requested to provide windlass and winch operators.

Mooring at Berth: Unless pilotage is required the Mooring Master will board the arriving vessels in the anchorage area. Vessels are requested to have pilot ladder safely and securely rigged ready for immediate use and long enough to meet the Mooring Master's launch. Vessels should have their crew standing by ready to receive mooring and hose connection materials and should maintain a lee until this is completed. Mooring Master will instruct the crew in the setting up of the forward mooring.

2 bollard ropes are made fast round the port bitts with their attached shackles about 5 ft. inboard from the fairleads as far forward as possible. The size of the fairlead opening should be at least 300 mm. (12 in.) to prevent chain from jamming in the fairleads.

Attached to the mooring connections on the buoy are two 18 in. nylon ropes (144 mm. dia., breaking strain 250 tons). These ropes are 50 m. long, and have at their free end a length of stud link chain which includes enlarged end link for receiving the shackles used on the deck of the tanker. From the outer end of this chain there are connected 2 mooring lines consisting of pick-up wires, pick-up ropes and a towing rope (port side only). The nylon rope is supported by "doughnut" floats and the chain is hung by large plastic buoys 5 ft. in diameter and coloured red and yellow.

Hose Connection: After completion of mooring the boat which has been holding the hoses clear during berthing will bring the floating hose to the ship's side and connect the derrick runner to the balance buoy. These are lifted aboard one by one and connected by distance piece which was already connected to vessel's manifold by hose connection crew during mooring operation.

Unmooring: After the hose disconnection is completed, mooring ropes are slacked off and then dropped into the water. Tug/work-boat will come alongside either before or after the vessel backs off the berth, whichever is convenient, and will receive mooring and hose connection materials.

MEDICAL: The Company operates a small clinic at Mubarraz. Master may obtain medical attention for ship's personnel from the ship's Agent who may in the case of serious illness or injury recommend treatment at the Abu Dhabi government hospital. The ship owner will be charged for all expenses incurred.

FRESH WATER: Not available at Mubarraz except in case of extreme emergency.

FUEL: Not available.

FIRE-FIGHTING: Tug/workboat stationed at Mubarraz Island is equipped for fire fighting and is usually on emergency stand-by during tanker loading operations.

CONSULS: No consular business is available at Mubarraz. However, various countries have representations in Abu Dhabi.

REPAIRS: There are no repair facilities at Mubarraz. However, radar and electronics repairs are available in Abu Dhabi and technicians can be sent to Mubarraz for repairs through notifying the ship's Agent.

SURVEYORS: Lloyd's, ABS, Veritas Surveyors are available in Abu Dhabi and they can be brought in if ample notice is given to ship's Agent.

CUSTOMS: Under normal circumstances Customs Officers do not bo tankers at this port but upon arrival the Master is required to subm the Customs through the ship's Agent a manifest of any cargo to landed at Mubarraz.

After loading is completed the Mooring Master will sign on behal Customs an Outward Manifest and issue the port clearance. These be handed to the Master by the Agent.

REPATRIATION: Not possible.

TIME: Local standard time at Abu Dhabi is GMT plus 4 hours throug year.

GARBAGE DISPOSAL: Not available (S.B.M.).

WASTE OIL DISPOSAL: Not available (S.B.M.).

SEAMAN'S CLUBS: None.

TIDES: The maximum tidal range in this area is 6 ft., the average t range at the Spring tide 3 ft. and the Chart Datum is 0.7 ft. below IS Tidal stream is variable according to the place and the lay of the la But the flowing tide usually runs South-Eastwards and ebbing tide No Westwards. Speed of a current is around 2 knots at the highest.

"Tide and Current Table" is published annually by the Compa applicable to Mubarraz and the surrounding area, and will be obtai on application to the Company.

WEATHER: Local weather at Mubarraz is almost similar to that of Je Dhanna and Abu Dhabi City, being extremely hot and humid in Summ Temperature sometimes soars as high as 50° Centigrade with al 100 per cent humidity in July and August.

GENERAL: *Engine:* The main engines and all gear must be in operable condition and in a state of immediate readiness whilst vessel is on the berth.

Stores: Provisions and deck stores not available.

Divers: The services of the Company diver may be available to ves where it is essential that a diver's services are required to enab vessel to sail. All requests for such services should be routed thro the ship's Agent to the Port Master.

Currency: All currencies approved except Israeli.

Mail: Mail can be received and sent through ship's Agent.

Dry Cargo Discharge: A "T" shaped jetty at Mubarraz Island accommodate a vessel with maximum 12 ft. draft. Discharge of dry ca must be arranged well in advance through ship's Agent in Abu Dh who will supply labour and barges from Abu Dhabi. No gear whatsoe is available at Mubarraz.

SAFETY:

No Smoking: Smoking on board the ship is strictly prohibited excep the smoking room situated in the aft accommodation and which been jointly agreed between the Mooring Master and the Master.

The responsibility for the strict observance of the safety of these roo rests with the ship, and the Company reserves the right to pro smoking in these rooms also should situation require at any time.

Accommodation: All accommodation doors, port holes and ventila must be closed during loading operations, and doors and opening machinery spaces in vicinity of ship's tanks are also to be closed.

Galley and Boiler Fires: As a general rule, the use of galley and b is not permitted. However, those appropriately equipped are conside safe for use, and their use will be mutually agreed between the Ma and the Mooring Master.

Radio Equipment: Radio, radar or other electronic equipment mus be energized while the ship is on the berth.

Air-conditioning Units: For safety, it is preferable that these recirculate the air within the accommodation but their use when dra air from outside the accommodation may be permitted provided tha Master and the Mooring Master agree that no danger exists. Shoul gas be detected within the accommodation or should there be danger of gas within the accommodation these units must be sto and the intakes closed. Window-type air-conditioners are forbidde all times.

Ship's Fire-fighting Equipment: This equipment must be in con readiness at all times with sufficient people on board for its effi operation.

Fire Watches: While the vessel is within the port area a continuous efficient fire watch shall be maintained on deck and in the engine r by the ship's crew. Fire-fighting equipment shall be in instant readi throughout the vessel and additional extinguishers must be availab the loading manifold while hoses are being connected and disconne Water should be available on deck service lines at all times and hoses connected at all fire stations for immediate use.

Swimming: No swimming in the sea berth area is permitted while ve are on berth.

AUTHORITY: Abu Dhabi Oil Co. Ltd. (Japan), P.O.Box 630, Abu D United Arab Emirates. *Tel:* Abu Dhabi 661100. *Telex:* 22260 Adoc *Cables:* "Oiljapan Abu Dhabi". *Contact:* Manager – Marine & Tran Department.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd appointed by Abu Dhabi Oil Co. Ltd. (Japan) as exclusive shi Agents for all vessels calling at Halat Al Mubarraz Terminal. The ad particulars are as follows:

National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., P.O.B. 37 Dhabi, United Arab Emirates, Cables: "Confidence", Abu D Telex: 22248 ("Gacauh EM"). Tel.: 730500 (10 lines). Fax: 73 After office hours 794490.

ETA messages shall be sent to National Shipping Gulf Agen (Abu Dhabi) Ltd., cable address: "Confidence", Abu Dhabi, via Da Radio.

Under favourable weather and transmitting conditions communi can also be performed over the VHF radio on the following frequ standing by on Channel 16 (156.8 MHz) and transmitting on Ch 10, call sign "Confidence", Abu Dhabi.

PORT RASHID, Dubai: 25.16 N. 55.16 E. (See Plan)

FLAG: U.A.E.
DOCUMENTS: The following should be airmailed to Agent to arrive 48 hours prior to arrival of vessel.

6 Dangerous Cargo Lists.
3 Stowage Plans.
3 Hatch Lists.
8 Cargo Manifests.
1 each Bill of Lading.
3 Crew Lists.

Radio Officer's Report: May 1989.
Agent: 5 copies Crew List.
Customs:
2 copies Crew Declaration.
2 copies Goods in the Care of the Master (i.e. Foreign Currency).
2 copies Drugs and Firearms Declarations.
2 copies Bonded Stores List.
Quarantine:
1 copy Maritime Declaration of Health.
1 copy Vaccination List.
Immigration:
Officials will not board the ship. Shore passes are obligatory and can be obtained at the main gate. The Agent will provide the shore pass request forms and photographs if needed. Our ship was at the container terminal so this might be different to other parts of the port.

APPROACHES: Black and white Pillar Buoy, flashing every 10 secs. in position Lat. 25° 21′ N., Long. 55° 14′ E. Marked "Dubai Approach".

Main light in position Lat. 25° 13′ 33″ N., Long. 55° 17′ 15″ E. (Situated on top of the Dubai Trade Centre – Centre Building) Gp. Fl. (2) white every 30 secs. 157 m. above MHWST. Visible 44 km.

Main Breakwater Light: Flash green twice every 30 sec.
Lee Breakwater Light: Flash red every 2.5 sec.

There are no hazards. Minimum depth in channel 13.0 m. Approach is from the North on a course of 182° true.

PILOTAGE: Compulsory. Pilot will board 24 hours a day, from a launch and a regulation pilot ladder must be provided, with manropes, and a lee given. Large vessels calling should provide an accommodation ladder with its lower platform within about 12 ft. above the waterline and a pilot ladder rigged on ship's side adjacent to the accommodation ladder platform.

The Master must sign the indemnity form provided by the Pilot before entering the harbour.

ANCHORAGE: Vessels should contact Dubai Port Control on VHF Channel 16, shifting to a working channel as instructed. Failing instructions they should anchor approximately 2 miles from the port entrance. Holding ground – Generally poor.

RESTRICTIONS: Minimum depth in channel 13 m. Max. rise and fall 2.0 m.

Vessels not working cargo immediately may enter port at the discretion of the Port Authority. Vessels may leave at any time.

MAX. SIZE: Depth alongside at Port Rashid Container Terminal is 12.8 m. and the tide is not expected to go as low as zero height on average more than 55 days in any one year. Therefore, Port Rashid are prepared to berth vessels up to 12.8 m. draft, at minimum speed at all times, provided vessels can discharge in such a manner as not to trim so as to cause an increase in maximum draft.

Maximum draft at general cargo berths is 11.5 m. Depths of water at general cargo berths varies from 9.3 m. – 11.5 m.

Vessels in excess of 260 m. length overall will be berthed at the Harbour Master's discretion.

Port Rashid consider that keel clearance is at the Master's discretion, and are prepared to berth vessels with minimum of 0.25 m. keel clearance.

RADIO: The Port Signal Station (Call sign "Dubai Port Control") is fully equipped with VHF radio and watch is maintained 24 hours per day on Channel 16, switching to Channel 68 for port operations.

The Signal Station is situated at the seaward end of Berth No. 1 at a height of 57 ft. above sea level.

Vessels should contact the signal station by VHF Channel 16 and request berthing instructions.

Vessels should advise their Agents the arrival time, LOA, draft and position of bunkering points should bunkers be required. Amended ETA should be advised by VHF. Vessel's Agent will in turn pass on the above information to the Port Authority.

HEALTH: Normal quarantine regulations apply and Pratique can be given by the Pilot on cargo vessels, always subject to the Health Authorities approval. Health Authorities only board when the vessel is alongside, except in the case of a suspected ship.

BERTHING:

Berth No.	Length of each Berth (m.)	Depth of Water (MLWS) (m.)	
1-4	177.105	10.05	No. 1
	192.48	9.77	No. 2
3-4	182.78	9.3	
5		9.3	
6-10	213	9.3	No. 6-8
		10.66	No. 9-10
11-15	172	9.3	
16	215	11.5	
17-24	180	11.5	
25	180	11.5	
26-27	180	11.5	
28-30	180	11.5	
31-32	230	11.5	No. 31
		12.8	No. 32
33-35	300	12.8	
S.O.T.		11.5	
Depth over pipeline		11.5	

General Cargo: 30 deep water berths with 17 storage sheds (each 120 m. × 60 m.) adjacent are available plus a coastal berth for small craft and vessels with less than 6.10 m. (20 ft.) draft. All berths are backed by extensive hard surface yard storage area.

Container Terminal: Comprising of Berths 31-35 with quay length of 1,350 m. served by 2×30 ton Tango, 4×41 ton Mitsubishi, 1×45 ton Kocks and 2×41 ton Regganne cranes.

Storage area with CFS consisting on 8 sheds (120 m. × 60 m. each).

27 straddle carriers and 18 RTG's radio linked to controller, 6 terminal/Ro-Ro tractors, 3×15 ton forklifts and 130 roll trailers.

Bunkers and water available alongside.

Computer controlled stacking areas and container tracking available to Agents/Owners.

Berth No. 35 also has large Ro/Ro ramp and Berths No. 15 and 17, each have a small Ro/Ro ramp.

Side and quarter ramp vessels can be accommodated at all berths.

TUGS: Three tugs of 2,400 h.p. are available with fire-fighting, pollution and salvage facilities, the practice being to secure alongside with 2 tug ropes therefore, gangway and derricks should be secured in-board.

Tugs are fitted with VHF. Contact should be made via Dubai Port Control or the Harbour Master.

CARGO HANDLING: *General Cargo Working hours:* Saturday – Thursday, 1st shift: 0700 – 1400 hrs. Special shift: 1400 – 1600 hrs.; 2nd shift: 1830 – 0030 hrs. Special shift: 0030 – 0530 hrs.

Container Terminal: Shift arrangement. 0700-1900, 1900-0700, seven days a week, 365 days a year.

Working hours are at the discretion of the Port Operations Manager.

Cargo is handled on Fridays and most Public Holidays. The Port Operations Manager may require full night work or special shifts in the interest of the Port. Overtime charges apply to all shifts worked outside of Normal 0700 hrs. – 1400 hrs. Saturday to Thursday, and all shifts worked on Fridays and Public Holidays.

Refrigerated cargoes should be stowed consignment by consignment, to facilitate discharge and Direct Delivery to consignees.

Each general cargo berth is provided with fork-lift trucks and tractor units and trailers.

Pallets are provided free of charge to assist cargo handling.

STEVEDORES: Ship's gangs are available for distribution to vessels through Agents, vessels should advise their requirements before arrival. The gangs board and operate under the supervision of ship's officers. No quay cranes are provided, so ship's derricks/cranes must be used.

MEDICAL: A comprehensive range of medical and dental services are available at Dubai.

TANKERS: Berth operated by Shell Markets (M.E.) Ltd., capable of taking vessels up to 260 m. long. Max. draft 11.3 m., vessels of 11.3 m. but not over 11.6 m. draft may be berthed by arrangement with the Harbour Master at HW.

FRESH WATER: Available at all berths. Rate 20 t.p.h. per hose.

FUEL: Shell Bunker Fuels are available at Berths No. 1 to 4, 6 to 9 and 16 to 35 in addition to Tanker Berth and include fuel oil, thin fuel oils, diesel and gasoil, pumping rate 300 t.p.h.: 48 hours' notice should be given to local Agents or Shell Markets (M.E.) Ltd., P.O.Box 307, Dubai. Tel: 450451; Telex: 5478 DB; Cables: Shell Dubai. Marine Lubricants and chemicals are available for delivery to the ship.

Delivery of fuel oil and gas oil at the Petroleum Jetty via 12 in. loading line at up to 500 long t.p.h.

CONSULS:

Belgium
China
Egypt
France
Germany
India
Iran
Japan
Jordan
Kuwait
Lebanon
Netherlands
Norway
Pakistan
Qatar
Saudi Arabia
Sweden
Taiwan
U.K.

REPAIRS: All types of deck and engine-room repairs available.

Container repair yard located near container terminal.

DRY DOCK: *Dubai Dry Dock:* A complete ship repair facility East of Port Rashid. Vessels up to 1,000,000 d.w.t. can be docked. Approach areas dredged to 11.5 m. enclosed by breakwater.

Dock No. 1	370 m.×66 m.	(350,000 tonnes)
No. 2	525 m.×100 m.	(1,000,000 tonnes)
No. 3	415 m.×80 m.	(500,000 tonnes)

Dockside Cranes:

2×120 tonnes	Safe working load	at 65.5 m. radius.
1× 25 tonnes	Safe working load	at 80.0 m. radius.
2× 15 tonnes	Safe working load	at 70.0 m. radius.

Tank Cleaning: Facilities available.

SURVEYORS: Cargo, Ship, Classification Societies and Salvage Association Surveyors available locally.

JOINING/REPATRIATION: Arriving crew holding valid Seaman's Book can be cleared from the airport and placed on board on the strength of a guarantee letter from the Agent to the Immigration Office.

According to the Immigration Regulation in force Agent is required to furnish the following Passport particulars to the Authorities for arranging the Transit Visa:

Full Name.
Father's Name.
Present Nationality.
Sex.
Occupation.
Religion.
Marital Status.
Place of Birth.
Date of Birth.
Qualifications.
Passport No.
Place and Date of Issue and Date of Expiry.

At times Agent receives incomplete details and there were instances when Agent had to collect the full details from the transit passenger himself to process the application prior to his clearance.

It is absolutely essential that wives wishing to join their husbands onboard vessels off Dubai or Fujairah must carry a photocopy of their husband's Seaman's Book.

This is essential as if a photocopy of the husband's Seaman's Book cannot be shown to the Immigration Authorities, the wife will be repatriated immediately.

Repatriating crew can be brought ashore with a similar guarantee tendering the air ticket to the Port Immigration Office. They must be picked up from the ship 24 hours prior to departure.

AIRPORT: International airport, 3.2 km.

EMERGENCY CO-ORDINATION CENTRE: Coastguard located adjacent port. Tel: 450520.

TELEPHONES: Situated in sheds, no connection made to vessels.

SHIP SUPPLY SERVICE: Crew changes, delivery of ship's mail, stores, spares, etc., can be effected by service boats off Dubai or Fujairah. Service is carried out by all local shipping Agents. See "Agent".

STORING: Complete shipchandling facilities available at short notice (via Agent).

SHORE LEAVE: Agents collect all passports on vessel's arrival, together with 3 copies of Crew List. Temporary shore leave passes are issued by the Immigration Office against Passports and Crew Lists.

GARBAGE DISPOSAL: Use of garbage skips in the port is compulsory. Skips are provided alongside each vessel at a daily rate of Drhs 30 per day, collection as required. Skips are also available for rubbish other than garbage at a daily rate of Drhs 150 per skip. Additional skip or rubbish disposal can be arranged via the agents.

WASTE OIL DISPOSAL: A waste oil disposal service is available. The service is carried out by Dubai Labour Supply Co. Tel: 534020. Fax: 534082. There are no shore storage tanks available, so waste oil is disposed of at Municipality disposal dumps, prior permission is required from Dubai Municipality. Road tanker capacity up to 6,000 gallons. Arrangements for disposal can be made via the vessel's agent who will obtain costs on application.

SEAMAN'S CLUBS: Dubai International Seafarers Centre, situated outside Port Rashid, approximately 10 minutes walk from main port gate. The centre is a non-religious club catering for all nationalities. Facilities include telephone, food and coffee shop, bar, swimming pool, pool table, darts, currency exchange, postal service, library, TV and video, family room, barbeque area, table tennis, bus and information service.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.673 (Fixed Rate).

AUTHORITY: Dubai Ports Authority, P.O. Box 17000, Dubai, U.A.E. *Tel:* 971-4-51800. *Telex:* 47398 Dpa Em). *FAX:* 4-816093 (Main Fax), 815929 (Admin.), 835430 (Marine), 816354 (General Cargo).

Officials: Sultan Ahmed Bin Sulayem, Chairman & Managing Director.
Jamal Majid Bin Thaniah, Assistant Managing Director Administration and Human Resources.
Saeed Al Tayer, Assistant Managing Director Free Zone.
H. Edward Bilkey and David Gibbons, Executive Directors.
Ahmed Butti Ahmed, Assistant Managing Director.
Roger Cornwell, Finance Director.
Edward Butler, Commercial Director.
Ahmed K. Abulhoul, Deputy Commercial Director.
John Fewer, Operations Director.
S. Ghanem, Director of Engineering.
Saif Sultan, Director FZ Sales and Marketing.
Len Chapman, Technical Director.
Mohammed Al Muallem, Deputy Technical Director.
Abdulla Al Hamli, Director Information Systems and Technology.

AGENT: Gulf Agency Company (Dubai) L.L.C., P.O.B. 2404, Dubai, U.A.E. Tel: 457555 (24 hours service). After office hours 480424, 440193. Telex: 45448, 45809 "Gacdb Em". Cables: "Confidence" Dubai. Fax: 457202, 450644. Radio: Marine VHF radio, stand-by on Channels 16 and 23 and SSB 2182 kHz. Call sign "Confidence Dubai".

Operators of ships' supply service and shipping agency; Crew changes, mail, spares and/or delivery of provisions, fresh water and lube oil, as well as arranging of bunkers.

Owners, Operators and Masters are welcome to contact G.A.C. Dubai by cable or telex regarding requirements and for coordination of rendezvous positions off Dubai, Fujairah and Mina Saqr (Ras Al Khaimah).

RAS AL-KHAIMAH: 25.45 N. 56.01 E.

There is a jetty, length 100 m., suitable for berthing smaller vessels, which is protected by a breakwater, and dredged to a depth of 3 m.

This is a small port for very small vessels only. *All* cargo vessels with cargo for Ras Al-Khaimah should assume discharge/loading will be carried out in Mina Saqr. For all other information, see entry for Mina Saqr.

Also see "Mina Saqr".

GARBAGE DISPOSAL: Available, drums are provided alongside. Service free of charge in daylight only. Tel: 332422.

AUTHORITY: Ras Al-Khaimah Port Services, P.O.Box 5130,Ras Al-Khaimah, U.A.E. *Tel:* 668444. *Telex:* 99280. *Cables:* Minasaqr. *FAX:* (07) 668533. *Contact:* Captain Hazem Raouf Assaad, Port Manager.

SHARJAH (Mina Khalid): 25.22 N. 55.24 E. (See Pla

DOCUMENTS: The following documents must be in the possessio the ship's Master on arrival or must be forwarded to ship's Agent p to ship's arrival:

Immigration: The U.A.E. Immigration Department's office in P Khalid, Sharjah operates 24 hours, 7 days per week. Master to sub Crew List, photographs of each crew member (photos not returned) a Passports/C.D.C. to Immigration Office on arrival. Passport/C.D.C. be returned to vessel before sailing. Joining/leaving crew must repor the Immigration Office before proceeding to vessel/airport.

Customs:
2 Crew Lists.
2 Passenger Lists.
2 List of Alcoholic Beverages.
2 Cargo Manifests.

Port Operations:
2 Cargo Manifests.
2 Dangerous Goods List.
2 Stowage Plans.
Certificate of Registration.
Classification Certificates.

The original of all the ship's Certificates shall be produced to any P Official on demand. Where a ship is more than 15 years old, a va Certificate of Condition issued by a recognised Surveyor shall be board.

Where Certificates are found to be invalid, the ship may be remov from the Port Area, at ship's expense and re-entry permitted only a validity has been established.

Failure to produce any Certificate to a Port Official when demand renders the Master liable to a fine of up to Dh. 5000, and the remo of the ship from the Port Area.

PILOTAGE: Pilotage is compulsory for all ships entering and leav the deep water harbour. On entry, Pilots will board to seaward of t Fairway Buoy; a pilot ladder should be provided. Port Khalid opera a 24 hour, 7 day week pilotage service. Notice is required bef 2200 hrs. for pilotage requirements between 2400 hrs. and 0600 hr

ANCHORAGE: The Fairway Buoy in position Lat. 25° 22.9' Long. 55° 22.9′ E. is a red and white pillar, Isophase every 6 se Vessels approaching should await Pilot to seaward of Fairway Bu anchoring if necessary.

Protected Anchorage: A limited number of vessels may ancho moorings within the deep water harbour with prior approval of the P Operator.

MAX. SIZE: Approach channel dredged to 12.0 m. MLLW. Max. d 11.5 m.

HEALTH: Normal Quarantine Regulations apply.

Radio Pratique will be granted on receipt of radio message fr Master, via his Agent, stating that no serious illness has occured du the preceding 30 days. All crew members must be in possession of va cholera certificates. The Health Officer will only board when the ves is alongside.

RADIO: *Notice of Arrival:*

Vessels should advise their Agent ETA Port Khalid, giving draft, LO and intended cargo operations to be performed, at least 72 hours p to arrival.

Agents should arrange berthing and labour with the Port Opera

VHF: Vessels should contact Port signal station on VHF Channel (Call sign "Sharjah Port Control") when within range. Working Chan 6, 12, 11, 74 and 67.

TUGS: Tug services are available for all ships entering the deep wa harbour. At the discretion of the Port Operator ships may be oblige use the services of a tug or tugs.

Tugs are fitted with VHF.

The harbour tugs are fitted with fire fighting hoses and monitors foam tanks.

BERTHING: Arrangements made with Harbour Master by ship's Ag for necessary berthing as required.

Berth No.	*Depth at MLLW*	*Usage*
1A	11.5 m.	Containers
1	10.5 m.	Containers
2	10.5 m.	Containers
3	8.5 m.	General Cargo
4	8.5 m.	General Cargo
5	9.5 m.	General Cargo/Ro-Ro
6	9.5 m.	General Cargo/Ro-Ro
7	9.5 m.	General Cargo/Ro-Ro
8	8.5 m.	Reefer
9	8.5 m.	General Cargo/Reefer
10	8.5 m.	General Cargo
11	9.5 m.	General Cargo

Total length Berths No. 1A, 1 and 2 – 575 m. Total length Berths N 4, 5, and 6 – 725 m. Deep water Berth No. 6 – 274 m. Berth No 220 m.

Total length Berths No. 8 and 9 – 360 m. Berth No. 10 – 210 m. B No. 11 – 195 m.

Equipment: The Sharjah Container Terminal (SCT) which comp Berths No. 1A, 1 & 2 in the deep water harbour is equipped 2 Liebherr T115 35 tonne gantry cranes; 2 Valmet 30 tons transtainers. SISU TV10 tugmaster tractor units for Ro-Ro container handlers and forklifts; LCL facilities available; 44 reefer for containers. These berths are also equipped with speci equipment to handle containers in the storage area. Each be provided with fork lift trucks, trailers and yard hustlers to facilita movement of cargo. Pallets are available to assist cargo han 2 heavy lift mobile cranes of 40 tons and 90 tons capacity are ava on request from the Port Operator. Other equipment, including c trailers, etc., will be made available upon request to the Port Op with 24 hours' notice.

Lighterage: Lighterage services are available.

Storage Facilities: Storage facilities consists of 11 sheds (2 of which are located in the Container Terminal area) having an area under roof of 28,000 sq.m. In addition, hard surfaced yards and Sharjah Container Terminal Stacking/Packing area provide extensive storage capacity.

Cold Store: A 5,000 ton capacity cold store (frozen and chilled) is located at Berth No. 8 with mechanical handling from ship's hold to store. Second cold store of 3,500 tons capacity also available.

STEVEDORES: The port will operate on a 24 hour, 7 day week basis ashore and afloat. Additional charges will apply outside normal working hours which are defined as follows:

Saturday to Thursday except public holidays.

First shift	0600 to 1400 hrs.
Second shift	1400 to 2200 hrs.
Third shift	2200 to 0600 hrs.

Overtime Rate Applicable:

General Cargo/Container Vessels: 3rd shift, Fridays and holidays.

Reefer Cargo Vessels: Fridays and holidays.

Car Carriers: Nil.

Normal working hours are subject to change during Ramadan, when working hours will be at the discretion of the Port Operator.

Requirements for port labour must be submitted by ship's Agent to the Port Operator by 1600 hrs. for work during the first shift on the following day and by 1100 hrs. on the same day for work during the second and third shifts.

MEDICAL: Upon application to ship's Agent, medical examination of crew members can be arranged. Personnel will either be sent to private Doctor or to Public Health Department, as circumstances dictate. Serious cases will be referred to Government Hospital Doctor. Distance to Al Qassemi Hospital in Sharjah is 8 km.

TANKERS: Tanker jetty situated in harbour on main breakwater. Max. size 60,000 d.w.t. Max. draft 9.5 m. Limited bunkering facilities.

DENSITY: 1025/1028.

FUEL: Deliveries of fuel oil, gas oil or blends may be arranged through vessel's Agents. Marine lubricants will be delivered to ship's side. Both services require 48 hours' notice.

FRESH WATER: Fresh water is obtainable at all berths.

REPAIRS: Good facilities for repairs. Divers available. Largest vessel for repairs 220,000 d.w.t.

DRY DOCKS: None.

SURVEYORS: Services are available upon request.

REPATRIATION: Proximity of Sharjah International Airport will permit efficient crew changes and repatriation. Off-shore crew changes facilities can be arranged.

Transit visas are not required for crew changes. Ship's passengers require a valid visa for transit or temporary stay.

AIRPORT: Dubai and Sharjah. Distance to Sharjah International Airport is 15 km.

HOLIDAYS: The following are days that will be observed as public holidays. Premium tariff rates will apply on these days.

1st January	New Year's Day
*22nd February	Ascension of the Prophet Night
*26th April	Eid al Fitr
*27th April	
*28th April	
*2nd July	Eid al Adha
*3rd July	
*4th July	
*5th July	
*23rd July	Hiriji New Year
11th October	Prophet's Birthday (Eid al Mawled)
2nd & 3rd December	U.A.E. National Day

*Dates are subject to change from year to year.

TIME: GMT plus 4 hours. Permanent.

SHORE LEAVE: Shore leave is permitted for crew members (0800 hrs. - 2000 hrs.) provided identification card or seaman's papers are deposited with Immigration office situated in the port and collected upon return. Also see "Documents."

GARBAGE DISPOSAL: Garbage skips can be arranged through the Port Authority and are placed alongside at the quay. Charges are U.A.E. Dirhams 50 per day.

WASTE OIL DISPOSAL: Not available.

SEAMAN'S CLUBS: None.

CURRENCY: U.A.E. Dirhams (Drhs). U.S.$ 1.00 = Drhs 3.685 (Fixed Link).

GENERAL: *Pollution:* The provisions of the Sharjah Maritime Law shall apply with respect to the operation of vessels in Sharjah Coastal Waters. Garbage disposal services are provided by the Port Operator and are compulsory.

Ship's Chandlers: Complete ship chandlering facilities are available, handling provisions, laundry and bonded stores.

Chart: B.A. Chart No. 3714.

Air-freighted spare parts and ships' mail to Sharjah should be addressed to GAC Sharjah, but sent to Sharjah International Airport or Dubai Airport marked "Ship's Stores In Transit for M/S . . ." Certificates of Origin should follow the airwaybill or in cases of emergency be sent to GAC Sharjah, soonest after shipment. Cable "Confidence" Sharjah, of flight details and airwaybill number.

UMM AL NAR, Abu Dhabi: 24.27 N. 54.29 E.

(See Plan)

LOCATION: The Umm Al Nar Petroleum Port is situated at the South Eastern tip of Abu Dhabi Island and consists of 2 island type berths connected to the shore through a causeway. Vessels will use Mina Zayed and Khawer Al-Bhagi navigation channels to the Port. The total length of both channels is 16 nautical miles. Vessels will berth port or starboard side to, at the discretion of the Pilot.

APPROACHES: *Water Depths:*

The channel depths are as follows:

(a) 13.0 m. for Mina Zayed navigation channel.

(b) 11.0 m. for Khawer Al Bhagi Navigation Channel keeping in mind that all levels are relative to C.D.

MAX. SIZE: The 2 jetties have been equipped with marine facilities to accommodate vessels having the following characteristics:

Max. size of vessel	30,000 d.w.t.
Min. Size of vessel	5,000 d.w.t.
Length overall	170 m.
Beam (max.)	26.50 m.
Draft (max.)	9.25 m.

HEALTH: Masters will be required to produce the standard International Bill of Health.

RADIO: *Arrival Telegram Ship/Shore:* On ship's arrival at the pilot station, a telegram shall be passed to the refinery through the ship's Agent with the following information:

ETA at berth.

Arrival draft.

Estimated departure draft.

Quantity and type of Cargo/Cargoes.

Vessel's maximum loading/discharging rate.

Quantity of dirty ballast and discharging rate.

Quantity of clean ballast to be discharged overboard and time required.

Size of manifold.

Are reducers to 6 in., 8 in. and 10 in. available on board?

Any vessel's requirements.

Master's Name.

BERTHING: Umm Al Nar Refinery Jetty consists of 2 berths, each of which accommodates vessels in the range of 5,000 d.w.t. to 30,000 d.w.t. and is provided with the following facilities:

(a) Loading platform.

(b) 4 mooring dolphins.

(c) 5 breasting dolphins (with 2.16 m. berthing line).

(d) 4 × 60 ton quick release hooks with capstan.

(e) 2 × 30 ton bollards.

(f) Hydraulically operated gangway.

(g) 2 fire-fighting monitor towers.

Each platform is provided with 6 loading arms having the following flexibility:

No.*	*Size of Flanges* (in.)	*Cargo Flexibility*	*Max. Rate* cu.m./hr.
1	6	Lub. oil	400
2	8	A.T.K.	1,000
3	6	Straight Run Residue	500
4	8	Mogas	1,000
5	10	Gas oil/Naphtha	1,500
6	10	Straight Run Residue/Ballast	1,000
7	3	Fresh water	13

*The loading arm numbers are from the gangway side.

Berthing Aids: Umm Al Nar Refinery Jetties are equipped with navigational aids to allow safe navigation during day and night, namely:

(a) 2 white coloured leading lights to affix navigation for channel's centre line, placed ashore at 5.0 m. and 11.0 m. above the ground level.

(b) 6 navigation lights with radar reflectors to define basin limits.

(c) Each jetty is provided with 4 red coloured lanterns, 2 at each end, at 5.0 m. above deck level. This is in addition to the operational flood lights.

(d) Each mooring dolphin is provided with flood lighting.

Moorings: When at berth, vessels must be moored to the entire satisfaction of the Pilot. The breasting dolphins are each equipped with 60 ton quick release hooks and a power operated capstan. the mooring dolphins are each equipped with 60 ton quick release hook and a power operated capstan.

Vessels must be ready at all times to put out extra moorings as requested by terminal personnel, or as dictated by weather changes. It is the Master's responsibility to ensure that vessel's mooring lines are checked frequently to prevent excessive movement of the vessel in berth, which could activate the ESD/ERS systems and/or cause severe damage to the loading arms and other terminal equipment.

LOADING/UNLOADING: Also see "Berthing."

(i) The Master must give the Terminal a "Stand By" warning 10 minutes before being ready to commence loading or discharging.

(ii) Upon "Commence Loading" from the Master or his deputy only 1 pump will be used to ensure a slow flow rate until it is established that all systems are operating correctly and pressures are constant. Full loading rate may then be ordered.

(iii) The vessel's cargo tanks shall be inspected prior to and during loading and should it be found that tanks are not tight all loading shall cease, the vessel be rejected and further loading refused. The vessel will not be accepted later until satisfactory evidence of repair is produced duly certified by ABS, Lloyd's or other officially accredited classification society or surveyor.

(iv) During the hours of darkness vessels loading/discharging products, lub. oil or ballast shall rig overside lights to illuminate the surface of the sea around the ship to the Terminal Operators satisfaction to ensure that any oily products on the surface may be detected quickly and early action taken as appropriate.

Deballasting: The jetties are equipped with dirty ballast/slops receiving facilities. Vessel discharging dirty ballasts/slops ashore will use the deballasting arm. The maximum ballast reception rate is 1,000 cu.m./hr. Prior to arrival the Master is to advise Umm Al Nar Refinery (through the arrival telegram) how much dirty ballast/slops on board to be discharged to the shore facilities. (A "Declaration Letter" is provided for Master's signature) accepting clean ballast for overside discharge is subject to a declaration signed by the Master and delivered to the terminal representative.

Communications: To maintain the necessary continuous communications between refinery, vessels and shore control rooms during cargo operations and also in emergencies, the vessel will be provided with a walkie-talkie set. It is required that this set must remain at all times with the officer responsible for the cargo operation.

FRESH WATER: Fresh water is obtainable at Refinery berths and should be arranged through the Ship's Agent.

FUEL: No Bunker facilities in Umm Al Nar Refinery Terminal.

GENERAL: *Customs:* Custom's officers will board the ship on arrival and prior to sailing for necessary port clearance.

Stores and Provisions: Stores and provisions are not permitted to be loaded at Refinery berths and must be taken on board in the anchorage.

South Basin: The South Basin has been closed for shipping recently due to its proximity to the intakes of the Power Station.

AUTHORITY: Petroleum Ports Authority – ADNOC, P.O.Box 898, Abu Dhabi, U.A.E. *Tel:* 6023450/1 and 6026386. *Telex:* 22215 ADNOC EM. *FAX:* 562687, 660106. *Contact:* Captain H. Masri, PPA – Manager. Captain A. M. Massoud, Port Officer.

AGENT: See "Mina Zayed".

ZIRKU ISLAND, Jazirat Zarakku, Abu Dhabi:
24.52 N. 53.04 E. **(See Plan)**

LOCATION: Zirku Island is located at 24° 52′ N., 53° 04′ E. approximately 75 nautical miles W.N.W. of Abu Dhabi.

It is 5 km. long and 2.5 km. wide.

A zone of very rugged hills with ridges is located in the N.N.W. with an elevated point of 163 m. and a low flat sandy and dusty zone in the S.S.E. where the airport lies.

(A) SERVICE HARBOUR
(B) OIL TERMINAL

(A) SERVICE HARBOUR

PORT LIMITS:

(a) Lat. 25° 03.0′ N., Long. 52° 53.3′ E.
(b) Lat. 25° 00.0′ N., Long. 52° 53.3′ E.
(c) Lat. 24° 48.9′ N., Long. 53° 04.8′ E.
(d) Lat. 24° 48.9′ N., Long. 53° 11.0′ E.
(e) Lat. 24° 56.8′ N., Long. 53° 11.0′ E.
(f) Lat. 25° 03.0′ N., Long. 53° 04.4′ E.

Refer to British Admiralty Chart 3778.

NAVIGATION: *Manoeuvring and Navigation:* All vessels should manoeuvre and navigate within the port in accordance with the International Regulations for the Prevention of Collision at Sea.

Lights and Shapes: All vessels should exhibit such lights and/or daytime marks as defined by International Regulations for the Prevention of Collisions at Sea.

Special attention should be paid by vessels, barges or tugs moored or anchored in the vicinity of the jetties which should show at night the lights defined in these regulations.

High Tide Manoeuvres: Deep draft vessels and barges will be berthed at high tide only.

Shallow Water: While proceeding to the jetties, Masters should pay sharp attention to navigation due to the presence of shallow water existing in the vicinity.

Caution: Masters should consider the possibility of having less water than predicted by tide tables after a long period of bad weather.

Harbour Facilities: No tugs or mooring launches are presently available, accordingly, vessels calling at Zirku harbour should have very good manoeuvrability.

Navigation Aids:

1. Flashing lighthouse (Zirku, Zarakuh or Zarqa) located at the top of the pylon on the hill.
Height = 200.86 m.
Lat. 24° 53.0′ N. Long. 53° 04.1′ E.
One flash every 10 seconds.
2. Flashing lighthouse at the end of the sea water intake.
Lat. 24° 53.0′ N. Long. 53° 05.3′ E.
Height = 9 m.
V.Q. (3) 5 secs.
3. Flashing lighthouse at the end of the main jetty.
Lat. 24° 52.3′ N. Long. 53° 05.5′ E.
Flash = Fixed and flashing (1) 10 secs.
Height = 11 m.
Colour = Green.
Obscured approximately 70° – 150° (80°).
4. *Aero Lights* (occasional).
Located on the airport control tower (green).
Lat. 24° 51.6′ N. Long. 53° 04.6′ E.
Located on the hill (red).
Lat. 24° 52.5′ N. Long. 53° 04.1′ E.
Height = 67 m.
5. *Two Flares:*
Lat. 24° 52.5′ N. Long. 53° 04.3′ E.
Height = 145 m.
Fixed red lights.
6. *Pylon on the hill top.*
Height = 200 m.
Fixed red lights.
7. *Anchorage Buoy.*
Lat. 24° 51.3′ N. Long. 53° 06.9′ E.
Yellow cylindrical.
Flashing yellow (1) 5 secs.
8. *Zirku Flare Platform "ZFP".*
Lat. 24° 51.5′ N. Long. 53° 02.6′ E.
Height = 85 m.
Mo "U" every 15 sec.
Range = 15 miles.

ANCHORAGE:

Waiting Anchorage: Small vessels and barges waiting for a b alongside the main jetty can anchor beyond 0.5 mile in the S.S.E. o end of existing jetty in approximately 7 m. of water depth.

Three fixed mooring buoys without lights have been installed at ar 0.7 mile in the South and S.E. of the main jetty.

Sharp lookout must be kept when navigating in these areas.

An anchoring buoy (yellow Fl. (1) 5 secs.) has been installe position: Lat. 24° 51.3′ N., Long. 53° 06.9′ E. marking the N.E. co of the waiting anchorage area (See Admiralty Chart 3778).

Prohibited Anchorage Areas: To avoid the underwater oil pipelines b damaged, prohibited anchorage areas are defined as follows:

0.5 nautical miles on each side of the M.O.L. (Main Oil Line) i line.

0.5 nautical miles on each side of the loading lines.

0.5 nautical miles on each side of the SATAH lines.

M.O.L. input line from Zakum field comes ashore on the middle o East Coast.

Loading lines to the oil terminal SPMs leave the Island from the N.V point of the Island.

Anchorage Berths and Moorings: All vessels or barges entering the should occupy such anchorage berth or mooring as may be directe the Port Supervisor and shall move to any other anchorage, bert mooring as and when required by this authority.

No vessel or barge shall shift or change the anchorage, bert mooring allotted without Port Supervisor authorisation exce instructed to do so.

No claim will be accepted by Company for berthing or moorin to arrival priority.

RADIO: International VHF Channels 16, 64, 68 and 19 have b allotted to "Zirku Island Traffic". Permanent watch maintained by "Z Island" on Channel 68, semi-duplex for vessels to Zirku Island and versa.

When contact established, change to Channel 64 or 19.

Channel 68 is to be used for ship to ship calling and conversati

ARRIVAL ADVICE: *Notice of Arrival:* Vessels and barges callin Zirku harbour should advise their ETA at least 48 hours before arrival by telex to Zirku Marine.

In case of change of the scheduled ETA by more than 6 hours Z Marine should be informed by the same way.

Confirmation of ETA should be sent a few hours before arrival at as soon as a radio link can be set up on VHF Channel 62 or 68 "Zirku Island" radio room.

Berthing prospects will be given to incoming ships by "Zirku Ma at this time. If the vessel is instructed to anchor, she must ke permanent watch on VHF Channel 16 or 68.

During berthing operations contact will be set up with "Zirku Ma on VHF Channel 68.

Arrival Message: The first message should be sent according t following form but any items which are the same as a recent pre voyage to this port may be omitted.

Name of vessel (tug or barge):
ETA Zirku.
Type of vessel.
Length.
Width.

Max. draft on arrival.
Cargo loaded (briefly).
Contractor charterer.
Name of Master.
Coming from and ETD.

BERTHING: Zirku Island Harbour is a private port, hence only ve and barges chartered by the Company Zadco (Zakum Develo Company), acting on behalf of ADNOC (Abu Dhabi Nation Company) and its contractors are allowed to moor alongside the je

Jetties: The main jetty located on the East coast of the Island is al to the general supplying of the Island and the transit of equipme the Company.

Temporary jetty "A" (on the South of the Island) is now com silted up.

Temporary jetty "B" (on the West of the Island) is now deter and no longer in use.

Vessels: Contractors shall charter tugs, barges, landing crafts, boats, etc. whose dimensions, weight and draft are suitable existing jetty.

Emergency use: Other craft may use this harbour only in emergency and must immediately report their arrival to the Port Supervisor.

All craft using the harbour are subject to the control of the port operating company representative. (Zirku Marine Superintendent or his deputy) and the Petroleum Ports Authority (Port Officer)

Berth Occupancy: The Port Supervisor will define the allocation of berth in accordance with the Company's requirements of priority upon Manager's recommendations.

Contractors should start discharging as soon as vessel or barge is berthed and should unload until all the cargo has been discharged.

Contractors should not store their cargo on the jetty. They must remove it as unloading proceeds.

Vessels and barges should leave as soon as the handling of cargo is completed in order to free the quays. The Port Supervisor can order vessels and barges to leave the quay at any time (even though not completely unloaded), so they must be able to move, therefore barge shall keep a tug alongside during the whole time of unloading.

BERTHING FACILITIES: *Main Jetty:* The main jetty located on the East coast of the island is approximately 1,200 m. long and orientated N.W./S.E.

The quay at the end of the main jetty has a water depth of 2 m. and is 12.5 m. long (41 ft.) at the inward end; 2.3 m.×40.5 m. long (132 ft.) in the centre and 3 m.×57 m. long (187 ft.) at the seaward end (water depth is calculated under chart datum C.D.)

The quay is fitted with 8×30 ton bollards, 12 pairs of rubber fenders from a level of 1.50 below C.D. to top of quay level and 3 steel ladders running from a level of 1.50 m. below C.D. to the top of quay level.

The quay available for berthing is 110 m. long (360 ft.) orientated N.W./S.E. as is the main jetty breakwater.

At the inward end a 20 m. long quay orientated S.W./N.E. is available for small launches though badly equipped with mooring points.

The Port Supervisor Office and Police ward room are located on the top part of the jetty. The jetty working area has been asphalted.

CRANES: Mobile cranes up to 100 tons are available.

Contractors have to supply the Island with their own mobile equipment to discharge vessels and barges, if not previously arranged with Company.

As soon as the unloading is completed users should remove their mobile equipment to keep the jetty area clear.

Location of Cranes: The main quay can bear anywhere a 30 ton crane (up to 45 tons for exceptional cases). For heavy loads two locations are defined as follows:

100 tons crane: one rectangle of which axle is situated at 15 m. from the inward end of the quay.

300 tons crane: the centre of the crane must be situated at 15 m. from the edges of the jetty seaward end.

MEDICAL: A medical officer is resident on the Island for emergency cases only. The Company maintains a small hospital.

FRESH WATER/FUEL:

Water and Fuel Loading and Unloading Critical Area:

Connection pipes are located on the inward and outward ends of the quay.

Inward end of the quay is fitted with 3 in. and 1 in. diesel oil connections and with 3 in. fresh water connection.

The outward end of the quay is fitted with 3 in. connections for fresh water and diesel oil and 8 in. line for fresh water. The Ship's Master should apply the safety rules and inform Zirku Marine about any unsafe conditions.

Ships coming for diesel oil or fresh water should be fitted with sufficient length of hoses to be connected to the Island fixed pipe.

A safety ball valve is required on shore and diesel oil hose.

SHORE LEAVE: No person may go on shore without authorisation from the Zirku Police Authority and only if in possession of Oil Field Security Pass.

SAFETY: *Reporting of emergency:* Should any vessel be in danger through fire, explosion, collision or whatsoever cause, the Master should immediately report the fact to the Port Supervisor and Port Officer (Petroleum Port Authority) by VHF Channel 62 or 68.

When alongside the main jetty they can report through the shore telephone system located on the jetty. Grey for Island Network, Red for Safety.

Phone Numbers:

Day and Night: Safety 56333
Radio Room 56666/56403
Clinic 56222.
Day: Marine Superintendent 56400.
Port Officer (PPA) 56471

Fire fighting equipment: There are 2 monitors and 3 hydrants supplied by a 12 in. pipe able to reach any point of the main jetty on emergency call.

Ship's fire fighting equipment: This equipment must be in constant readiness at all times with sufficient skillful personnel on board for its efficient operation.

Particular safety requirements for vessels unloading inflammable products:

All cargo/bunker tank lids must be closed.

A fire fighting hose must be ready for use and supplied with water near the piping and connection on the deck.

In the same way extinguishers must be disposed on the deck.

Cargo/bunker hoses must be properly rigged without leakage.

Cargo tanks being discharged and open to atmosphere must be fitted with an agreed venting system.

Foam and/or dry powder monitors, if fitted, shall be ready for use.

Portable fire extinguishers, shall be conveniently placed for use near the ship's hoses' connection.

A checking will be performed by the Safety Supervisor jointly with the Port Supervisor and the vessel's Master, and a form will be signed by the same, after which offloading of said hazardous cargo will be authorised.

EMERGENCY: *Emergency moving of vessels:* In case of accident vessels shall be able to move quickly, so no repairs to engines are allowed when alongside for self propelled vessels. Barges shall keep a tug alongside during the whole time of unloading.

WEATHER: *Winds:* Four kinds of winds on the Island: The most frequent (54% of the time) are named Shamals they blow from W.N.W. to N. principally in Winter. From N.N.E. to E.N.E. some 20% of the time the Noshi. Local effects of Monsoon, the Kaus blows from E. to S. 17% of the time.

Finally, during the Winter only, and 9% of the time blows from W.S.W. to W. the Suhaili.

Tides: Around Zirku Island the tide is of mixed type with small diurnal predominance, however this semi diurnal effect is not of great significance and for all practical purposes it can be taken that there is only one high water and one low water per day.

The mean spring tide range is approximately 1.2 m. The maximal range would be of about 1.4 m. The mean usual range would be 0.9 m.

Zirku Island tide prediction supplied by operating company, copy can be obtained from Marine Zirku.

There is a tide recorder on the main jetty. Tidal information also available from Zirku Marine on VHF, Channel 68.

Tidal Currents: At Zirku Island tidal currents are semi diurnal roughly flow runs from West to East and Ebb runs from East to West. Eddies are created at vicinity of any obstacle, (breakwater, jetties etc.) especially close to the South sandy end of the island. Currents can reach a speed of 2 knots. It is expected that these data are profoundly changed by winds, especially Shamal.

GENERAL: *Marks:* Name or number and draft marks should be readable from the jetties.

Unsuitable Vessels: The Port Officer reserves the right to refuse berthing and unloading of any vessels considered unsuitable by reason of inadequate or unsatisfactory mooring equipment, insufficient derrick capacity, insufficient fender protection, overloading, inability to comply with the safety regulations or any circumstances which would create unusual risk to the Company's jetties, quays, facilities, personnel and equipment whatsoever.

Prevention of Sea Pollution: It is strictly prohibited to discharge or throw overboard oil, oily water, chemicals, ashes, bilge water or other refuse within the port limits that may result in pollution of the sea.

International oil pollution conventions must be strictly observed by all vessels or crafts.

The Master of any vessel contravening this rule so as to cause pollution shall be charged with an offence against these rules and upon conviction be liable to a fine and shall be incurred in the removal of such pollution.

The harbour users, Contractors and all vessel Masters, before leaving and/or sailing should make sure that jetty area is clean and all their refuse has been removed.

National Courtesy Flag: All vessels calling at Zirku are required to fly their national flag and the national flag of Abu Dhabi.

Swimming & Diving: No person shall swim or dive from or near any vessel or alongside quay or berth.

No person shall engage in diving with the assistance of breathing apparatus within the above mentioned areas without the permission or instruction from the Port Authority.

GARBAGE DISPOSAL: See "Section B".

WASTE OIL DISPOSAL: See "Section B".

SEAMAN'S CLUBS: See "Section B".

CURRENCY: See "Section B".

(B) OIL TERMINAL

PORT LIMITS: The port area of Zirku Petroleum Port covers the area bounded by straight lines connecting the following points:

A:	Lat. 25° 03′ N. Long. 52° 53.3′ E.	B:	Lat. 25° 00′ N. Long. 52° 53.3′ E.
C:	Lat. 24° 48.9′ N. Long. 53° 04.8′ E.	D:	Lat. 24° 48.9′ N. Long. 53° 11′ E.
E:	Lat. 24° 56.8′ N. Long. 53° 11′ E.	F:	Lat. 25° 03′ N. Long. 53° 04.4′ E.

Masters of all vessels entering the port must follow instructions given by the Company's Marine Superintendent as to approach, anchoring, berthing and unberthing.

DOCUMENTS: On arrival the tanker should prepare the following documents to be handed over to the different authorities coming on board:

Tanker Enquiry Form (ZADCO Form).
Navigation Aids Dues Certificate (M.E.N.A.S. Form).
Notice of Readiness.
Crew List.
Certificate of Registry.
Load Line Certificate.
Safety Certificate (Equipment).
Oil Liability TOVALOP/CLC.
Derat Certificate.
Radio Certificate.
International Oil Pollution Prevention Certificate.
Suez Canal Tonnage Certificate.
Panama Canal Tonnage Certificate.

PILOTAGE:

1. *General:* On arrival and on departure the pilotage is compulsory within the Port Limits. The Company reserves the right to render the pilotage compulsory through the departure route for any reason. Nevertheless, upon Masters request Zirku Pilots could assist any tanker on Zirku Departure Route to and from Buoy No. 6 (Lat. 25° 13′ N., Long. 52° 59′ E.). Within Port Limits and on Zirku Departure Route the speed *shall not exceed 8 knots.*

2. *Direct Berthing:* Instructions for berthing having been received by voice communication the tanker should proceed to the agreed Pilot boarding point.

3. *Waiting:* In case of a berth not being available, the approaching tanker will be instructed to proceed to an anchorage area and anchor at the agreed location. The tanker will wait at this allotted location until further instructions.

4. *On Departure:* A Pilot will assist loaded tanker as stipulated in No. 1 above.

5. *Pilot Access:* The Pilot access should be in good condition, safe, clean and ready. Pilot ladders constructed of light material such as aluminium will not be accepted. Where the freeboard exceeds 10 m. the vessel should have a combination of accommodation ladder and pilot ladder rigged. The bottom of the accommodation ladder shall be at least 7 m. above the water line.

6. *Pilot Embarkation:* To embark the Pilot safely, the incoming tanker should reduce speed (no more than 5 knots), make a good lee to minimise adverse weather conditions and take the way off. On the tanker's deck the boarding of the Mooring/Loading Master should be attended by at least one officer and one A.B.

7. *Pilot Boat:*

Name	Gain
Engine	2×860 h.p.
Speed	20 knots
Marked	Zirku Pilot

Fibre Glass Hull

NAVIGATION AIDS:

Separation Scheme: A traffic separation scheme between Zakum Field and Umm Shaif Field crosses the port area.

This scheme includes:

(a) A separation zone, 0.75 nautical miles wide.
(b) A traffic lane for Westbound traffic, 1.25 nautical miles wide.
(c) A traffic lane for Eastbound traffic, 1.25 nautical miles wide.

The main traffic directions are: 050° – 230°
072° – 252°

This scheme is marked by the following two light buoys.

1. Zakum Middle
Lat. 25° 59.15′ N. Long. 53) 08.50′ E.
R.W.V.S. Pillar L.Fl. 10 sec.

2. Zakum West
Lat. 24° 56.60′ N. Long. 52° 59.85′ E.
R.W.V.S. ISO 6 sec.

Reference Charts: British Admiralty 3733, 3952, 2889, 3778.

Zirku Island:

Zirku, Zarakuh or Zarqa beacon:
Lat. 24° 53.0′ N. Long. 53° 04.2′ E.
Fl. 10 sec. 22 miles Height 200 m.

Main Jetty:
Lat. 24° 52.2′ N. Long. 53° 05.4′ E.
Fixed Green 7 miles and Flash 10 sec. Height 11 m. 9 M.

Sea Water Intake:
Lat. 24° 53′ N. Long. 53° 05.3′ E.
3 Fl. W. 5 sec. Height 9 m.

Radio Tower:
Lat. 24° 53′ N. Long. 53° 04.1′ E.
Fixed Red light – Height 198 m.

Zirku Flare Platform 'ZFP':
Lat. 24° 51.5′ N. Long. 53° 02.6′ E.
Flashing White light, morse "U" every 15 sec. Range 15 miles.

Flares:
Lat. 24° 52.5′ N. Long. 53° 04.3′ E.
Fixed Red light – Height 145 m.

Repeater Platform:
Lat. 25° 01.7′ N. Long. 52° 55.7′ E.
2 White flashing lights Morse "U" 15 sec. at level +18 m.
2 Red lights at level +34 m.
2 Red lights at level +51 m.
Horn Morse "U" every 30 sec.

Isolated Danger Mark:
Capped well-head.
Lat. 24° 59.8′ N. Long. 52° 57.1′ E.
Black-Red-Black – Pillar Fl. 2.5 sec.

Navigation Warning within Port Limits:

All vessels transiting through the Zarakkuh Port Limits are to follow the following procedures:

1. Vessels transiting along the Separation Zone may do so as normal.

2. Vessels intending to cross the Separation Zone Northwards must inform Zarakkuh Radio on Channels 16 or 68 of their intention and follow the instructions given.

3. Vessels Southbound, intending to cross the Northern Port Limits, must inform Zarakkuh Radio of their intention on Channels 16 or 68 and follow the instructions given.

4. No vessel is to pass between Buoy No. 1 (Lat. 25° 02′ N., Long. 53° 00.8′ E.) and the oil loading terminal or enter the no unauthorised entry limits around the oil loading terminal or the Repeater Tower (Lat. 25° 01′ 42″ N., Long. 52° 55′ 40″ E.), or "ZFP" (Lat. 24° 51.5′ N., Long. 53° 02.6′ E.).

MAX. SIZE: The SPMs are suitable for berthing tankers from 30,000 d.w.t. up to 350,000 d.w.t. loaded at 80% of their capacity.

The max. draft allowed for departure is 21 m.

ANCHORAGES: *Small Vessels Anchorage:* Located close to Zirku Jetty is designated for small vessels to service harbour.

1 Yellow buoy Fl. 5 sec. in N.E. corner (Lat. 24° 51.3′ Long. 53° 06.9′ E.).

Limits: Lat. 24° 51.3′ N. Lat. 24° 50.0′ N.
Long. 53° 07.0′ E. Long. 53° 07.0′ E.
and
Lat. 24° 51.3′ N. Lat. 24° 50.0′ N.
Long. 53° 05.4′ E. Long. 53° 05.4′ E.

Tankers East Anchorage:
Limits: Lat. 24° 56.8′ N. Lat. 24° 54.8′ N.
Long. 53° 11′ E. Long. 53° 11′ E.
and
Lat. 24° 56.8′ N. Lat. 24° 54.8′ N.
Long. 53° 07.8′ E. Long. 53° 07.8′ E.

Tankers North Anchorage:
Limits: Lat. 25° 03′ N. Lat. 25° 00′ N.
Long. 53° 02.2′ E. Long. 53° 02.2′ E.
and
Lat. 25° 03′ N. Lat. 25° 00′ N.
Long. 53° 04.4′ E. Long. 53° 04.4′ E.

where 2 buoys are installed at Eastern corners. Colour yellow – F yellow 5 sec.

This area is designated for incoming and outgoing deep draft tank

Prohibited Anchorage Area: Anchorage within Port Limits, out waiting anchorage areas is prohibited. Exceptional authorisation ma given by the Port Officer.

Sea-bed: The sea-bed in the Terminal area is rock, covered by a inches of loose sand. Some patches of coral can be found. Holdin poor and vessels are advised to pay out more cable than usual.

RADIO: Messages can be sent to the Company by the following me

Telex or Telegram through Bahrain Radio addressed to ZAD Marine. Telex No.: 22948 ZDCAUH EM. Cable: ZIR Marine.

Voice communication to "Zirku Marine" by SSB. Operation Mode Upper Side Band within a range of approximately 250 km.

Permanent watch on carrier frequency: 2036.4 kHz.

Talking on standard Marine Duplex HF Channel: 405, 605, 828

Notice of Arrival: Arrival Message shall be sent to ZADCO Ma 96 hours before arrival at the Port Limits.

Confirmation shall be given 72, 48, 24 and 6 hours from ETA.

Voice contact shall be made with "Zirku Marine" by SSB or VH hours prior to arrival.

Arrival Message: Arrival Message should contain the following:

Vessel's name and Master's Name/Abu Dhabi Agent's Name/Po Registry/n.r.t.
ETA Port Limits
Arrival drafts/Departure draft forward and aft
Quantity of ballast and Estimated deballasting time
Possibility of simultaneous operation/permanent ballast
Cargo required
Maximum loading rate and IGS and air-conditioning operative.
Part cargo and slops/to comingle
Expiry date Tovalop/CLC/IOPP
Derrick capacity/No. and size of manifolds/mooring brackets
Last Port of call and next Port/EDP accepted
Direction of approach

VHF: Voice communication to "Zirku Marine" by VHF Channels: 16 64 and 68. Channel 68 is used by the Pilots.

Permanent simultaneous watch maintained on these Channels.

Arrival: VHF contact should be made with Zirku Marine reques instructions.

Once contact has been established through Channel 16 fu conversation should be conducted on either Channel 64 or 19 u operator's instructions.

Pilot/Loading Master on board: Although he will bring on board his VHF communication units with private frequencies, the tanker should remain operational at all times.

At Anchorage: Permanent watch should be kept on Channel 16 an other Channels (64 or 68) as requested by the Zirku Marine opera

Traffic Separation: North-bound vessels intending to cross Separation Scheme, and South-bound vessels intending to cros North port limit, should report their intention on Channels 16 or 68 follow instructions.

TUGS: A tug of 2×1,500 h.p. and a mooring launch of 2×275 h.p assist the berthing. A second tug of similar dimensions will be add the terminal operations in late 1994.

SPMs: The terminal of Zirku Petroleum Port is located about 8 na miles N.N.W. of Zirku Island and consists of two single Point Mo buoys whose exact coordinates are as follows:

SPM "Alpha"	Lat. 25° 00′ 32″ N.	Long. 52° 59′ 02″ E.
SPM "Bravo"	Lat. 25° 01′ 36″ N.	Long. 52° 59′ 30″ E.

A small mooring buoy for small craft is in position: 0.3 miles We No. 1 channel buoy.

SPM Description: Both buoys are identical.

Buoy Body: The buoy is a circular steel structure with a diame approximately 12.5 m. It has a rotating assembly. The colour is or

Hoses: The buoy is equipped with 2×20 in. floating hoses with a tail end hose connection. The outer hose string is 296 m. and the one 285 m. Each string is equipped with winker lights.

Hawser: The mooring systems consist of a single 18 in. circumfe grommet hawser of double braided nylon, with an overall len 53.4 m., ended by a short length of 76 mm. diameter chafe cha

Light: The buoy is fitted with a navigation light emitting a Mors flashing signal every 15 seconds visual on 360° up to a 5 nautica range.

Fog Horn: Fitted on the buoy, emits a Morse "U" blast eve seconds and is activated when necessary by a remote control s

Radar Reflector: A radar reflector is installed on the buoy stru

Water Depth: The minimum water depth in the vicinity of the SPM is 27 m. above chart datum.

MOORING: All vessels arriving at this port are required to have adequate draft and trim for safe manoeuvring purposes. The propeller should be completely immersed. The recommended trim for manoeuvring in ballast is 3.0 m. List will not be tolerated.

Tanker Material Equipment: The tanker must have the port side derrick rigged for lifting the shore equipment on board, the minimum derrick capacity shall be 10 tons.

A good messenger line of approximately 4 in. circumference nylon line to be ready on the forecastle.

The forecastle should be fitted with Smit or Chain Stopper type brackets, strong mooring bitts and Panama Leads.

Terminal Material Equipment: One basket will be lifted on board with hose connection equipment and tanker mooring equipment if necessary.

Procedure: Full power must be available on tankers' main engine.

Once the optimum approach route has been selected the tug will pull away the hose strings and the tanker will proceed toward the buoy at a suitable speed.

When approximately 300 m. from the buoy the mooring launch will be instructed to bend on the messenger line from the Panama Lead to the mooring hawser pick up line.

The tanker will be brought to a dead stop at 60 m. from the buoy.

The chafe chain will then be winched aboard and secured.

Once the tanker is secured, the tug will pass its towline to the tanker's stern and then maintain tension on the towline throughout, to avoid any buoy kissing.

Emergency Fire Wire: All ships shall have a fire wire hanging from the bow and the stern to enable tugs to immediately connect in case of emergency – Circumference of wire to be at least 6 in.

Weather Limits: Mooring operation can be carried out in up to 25 knots wind speed and significant waves up to 5 ft.

HOSE CONNECTION: *Terminal Connection Team:* After mooring is completed, the hose connection team will board, to assist the crew.

Tanker Connection Team: An officer should attend the hoses with at least 3 deck hands and 1 boatswain. In addition one skilful winchman will be required.

Tanker Material Required: Miscellaneous tools, shackles, wires, ropes plus fire hose and extinguisher should be ready close to the manifold. The area around the manifold should remain free of all equipment to enable safe hose handling.

Terminal Material Supplied: 16 in. to 16 in. Spool pieces. Chain hoists, tirfors, gaskets, wrenches, flange bolt sets, butterfly valve handles, set of miscellaneous chains, ropes, slings, etc.

Flange size: The tail end hose flange size is a 16 in. camlock coupling. Before berthing the tanker manifold should be ready for direct connection, blind flange removed, and 16 in. to 16 in. spool piece fitted.

The two tanker manifold connections should be chosen in such a way that access to both flanges is possible.

Procedure: Having completed the mooring operation, the mooring launch will proceed to the end of the floating hoses to tow them to a position beneath the tanker's derrick hook.

The inner (or shorter) of the hoses will be lifted above deck level and the end swung inboard.

The hose will be lifted by such length to match the distance between the rail and the tanker manifold, then held with snubbing chains and the hose end lowered and connected to the manifold flanges.

The same operation will be performed on the outer (or longer) one.

LOADING: *Rate:* The maximum loading rate will be 12,500 cu.m.p.h. using both hoses.

Care will be taken not to exceed the rated working pressure to be supported by the hoses which is 15.5 bars (225 p.s.i.).

Procedure: Once the hoses have been connected and checked, the butterfly valves opened and the tanker pipe network set up, the Loading Master can give the go-ahead upon request from the Chief Officer and pumping will commence at slow speed at the beginning (by gravity), approximately 7,000 bbls./p.h., then the rate increased up to the rate requested by the Chief Officer.

An inspection of the floating hose strings and the buoy, including waters around the terminal, should also be made during the first few minutes of cargo transfer to ensure there is no leakage.

Once reached, the flow rate will be maintained until further instruction is given by the Chief Officer to the Mooring/Loading Master.

Valve Closure: No valves which will stop or seriously impair or reduce the flow rate of oil from the shore pumps are to be operated without prior agreement with the shore control room (ZCC) through the Loading Master.

10 minutes' notice should be given to the Loading Master for reducing the loading rate or stopping.

The practice of throttling back on the ship's cargo valves is to be avoided. If a lower rate is required, the shore is to be advised and the pumping rate will be reduced to the required level.

The Master will be held liable for any damage arising from the sudden cessation of flow caused by default of the ship.

It cannot be over-emphasised that to do so can be extremely dangerous and cause extensive damage to equipment in addition to possible oil pollution.

Failure of Communication: In case of failure of communications between the Loading Master and Zirku Control Room (ZCC), the loading will be automatically stopped.

Accommodation: Cabins: Two single cabins on board the tanker must be allotted to the Mooring/Loading Master and his Assistant.

Terminal Team: A rest room must be allotted to the hose connection team (3/4 people) should they be required to stay on board by the Mooring/Loading Master. This will only be the case in adverse weather conditions.

Working Location: The working location of the Mooring/Loading Master is the cargo control room.

A portable unit of around 25 kgs. will be installed in this room and operate from either a 110/115 v. or 220/240 v., 50/60 kHz. supply, such a socket must be available in the cargo control room.

Terminal Personnel: As long as the tanker is secured to the Buoy a permanent watch will be performed by the Mooring/Loading Master and/or his assistant in the cargo control room with the portable unit.

Contact will be permanently kept with the Zirku Control Room (ZCC) private VHF Channel.

Tanker Personnel: A tanker officer speaking English should be permanently on duty with the Mooring/Loading Master. The Chief Officer must be available at any time during the deballasting and loading operations (room and telephone number).

In addition to the tanker officer at least two crew members will be in contact with control room through adequate W/T and must be on duty permanently on the deck keeping watch on the tanker and terminal equipment.

Accommodation ladder will be continuously adjusted by the crewmen with regard to the sea state and tanker draft to provide safe access to the deck at any time of the operations.

Ullages: Ullage measurements shoud be taken by remote gauge while loading.

Opening the tank ullage lids should be avoided.

When necessity involves opening the lids the Mooring/Loading Master's approval must first be obtained.

The Mooring/Loading Master will check and approve the Ullage Report according to ullage measurements.

Characteristics:

API: around 34.5
S.G.: around 0.85
Temperature 20°C. to 35°C.

More accurate characteristics will be transmitted to the tanker on arrival.

BALLAST: *Quantity:* Tankers arriving at Zirku Petroleum Port for berthing should keep onboard at least 30% of their d.w.t. as ballast until further instructions received from the Mooring/Loading Master.

Tankers capable of deballasting and loading simultaneously should have on board a total of not less than the 30% d.w.t. requested for berthing so that in normal circumstances they will not be flying light whilst moored at the buoy.

Vessels arriving with insufficient ballast may be required to increase the quantity, should the Mooring/Loading Master consider it necessary.

Quality: Vessels arriving with ballast on board to be discharged into the sea must ensure that the ballast, lines and pumps are clean and free from oil before commencing discharge. If necessary the initial quantity and the drainings should be pumped into the slop-tank. A permanent deck watch shall be kept during this operation with overside lights displayed at night on both sides of the vessel at the discharge points.

Deballasting Facilities: There are no deballasting facilities at Zirku Terminal for receiving dirty ballast.

UNMOORING/DEPARTURE: As soon as the loading operation is completed, the vessel will vacate the berth.

The tanker's cargo manifold valves and butterfly valves at the hose end will be closed. The hoses once disconnected will be swung outboard and lowered to the water with the derrick and released.

The tanker will leave the terminal by slipping the mooring. Once the mooring is slipped, the tanker will put the engines astern, drop back until clear of the floating hose, and then steam clear of the terminal.

The mooring launch will be positioned to tow the floating hoses clear, where necessary. The tug will help the tanker to clear the terminal if so required by the Mooring/Loading Master. The mooring connection team will disembark at this stage and the terminal equipment be lowered into the tug. It will be necessary to make a lee to perform these operations safely.

Waiting Area: In the case of no "Early Departure Procedure" arrangements having been made, the tanker will be anchored in one of the anchorage areas waiting for cargo, documents which will be sent by the pilot boat as soon as possible.

In case of the tanker being delayed from sailing for any reason (engine repairs, waiting order, etc) the Mooring/Loading Master will disembark once securely anchored.

When the tanker is ready to sail through the North Departure Route, 2 hours' notice will be given to the Mooring/Loading Master.

Departure Route: Any deep draft tanker leaving Zirku Petroleum Port will proceed through the following departure route at a speed not exceeding 8 knots.

Buoy No. 1	Lat. 25° 02′ N., Long. 53° 00.8′ E.
East Mark	BYB VQ(3)5s.

To Das Channel Buoy No. 10. Leave to starboard.

MEDICAL: Although a medical officer is resident on Zirku Island, consultations will be possible only on an emergency basis.

DENSITY: The salinities are high as a result of the high rate of evaporation.

At the terminal, the water density depending on the sea temperature ranges from 1030 to 1035.

SERVICES: Following services are NOT available at Zirku Petroleum Port:

Bunkers.
Fresh Water.
Food.
Engine Repairs.
Deratisation.
Shore leave for the crew.
Crew changes.

GARBAGE DISPOSAL: Not available.

WASTE OIL DISPOSAL: Not available.
SEAMAN'S CLUBS: None.
CURRENCY: U.A.E. Dirhams.
WEATHER: *Seasons:* Two principal seasons can be distinguished in the Gulf. The cool "Winter" season extends from mid November to mid March and the hot "Summer" season from mid May to mid September. The two intermediate periods are transitional and the weather experienced may have either Summer or Winter characteristics.
Winds: The most frequent (54% of the time) is named 'Shamaal' and blows from W.N.W. to N. principally in Winter. The 'Noshi' blows from N.N.E. to E.N.E. for 20% of the time.

Local effects of Monsoon, called the 'Kaus', blows from E. to S. 17% of the time.

Finally, during Winter only, the 'Suhaili', blows for 9% of the time from W.S.W. to W.

The strength of these winds is approximately proportional to their probability of occurrence but at their strongest they can give rise to sandstorms and rough seas for several consecutive days.
Temperature: The extreme monthly mean values of air temperature are 20°C in February and 34°C in August with a lowest minimum of 9°C and a highest maximum of 44°C during the same months.
Tides: Around Zirku Island the tide is variable with small diurnal predominance. However this semi diurnal effect is not of great significance and for all practical purposes it can be said that there is only one high water and one low water per day.

The maximum range is about 1.5 m.

The mean usual range is 1.0 m.
Currents: At the terminal tidal currents are semi diurnal.

The current speed reaches 1 knot regularly at each tide.

Roughly the flood runs S.W. and the ebb N.E. but the turn of tide is very slow when the current directions are variable.

Predictions may be found to be considerably influenced by strong winds, especially the 'Shamaal'.
GENERAL: *Navigation Aids Dues:* The light dues for the Gulf navigational aids will be levied for the account of M.E.N.A.S.

These dues will be paid once per voyage at the first port of call in the Gulf.

Masters are requested to keep the receipt as a voucher if requested by any other Port authority within the Gulf.
Agency: Ship-owners must have their own representative Agency in Abu Dhabi.

Zadco will be acting as a sub-Agency to liaise with the main Agency in Abu Dhabi for all queries regarding mail, telexes, medical assistance, letters of Protest etc.
AUTHORITY: Petroleum Ports Authority – ADNOC, P.O.Box 898, Abu Dhabi, U.A.E. *Tel:* Abu Dhabi 6023450/1 or 6056471. *Telex:* 22948 ZDC AUH EM – Zirku. *FAX:* 6056472. *Contact:* Captain A. M. Gabal, PPA – Acting Manager. Captain H. Al-Holli or Captain M. Abu Shahba, Zirku – Port Officers.

AGENT: National Shipping Gulf Agency Co. (Abu Dhabi) Ltd., P.O.Box 377, Abu Dhabi, U.A.E. Cables: "Confidence" Abu Dhabi. Telex: 22248 ("Gacauh Em"). Tel: 730500. After hours 794490. Fax: 731328.

NOTES

Please also advise Shipping Guides Ltd.

United Kingdom

TELEPHONE CODES: On Sunday 16th April 1995, all U.K. telephone area codes are due to be changed. For most numbers this will simply involve inserting a "1" after the initial "0" in the area code. However the cities of Leeds, Sheffield, Nottingham, Leicester and Bristol will get a new area code and an additional digit in front of the current local telephone number (e.g. Bristol 0272 xxxxxx becomes 0117 9xxxxxx). We advise all subscribers to check locally where difficulties arise.

HEALTH – ALL PORTS:

PORT HEALTH (The Public Health (Ships) Regulations) 1979.

1. Simpler procedures for health clearance of ships arriving in the United Kingdom came into operation with effect from 1st April 1978.

2. Under these rules the Master of a ship arriving from a foreign port must report to the Port Health Authority†

(1) The occurrence on board during the voyage* of

(a) death, other than by accident,

(b) illness where the person or persons concerned

(i) has or had a temperature of 38°C or greater which was accompanied by a rash, glandular swelling or jaundice, or persisting for more than 48 hours;

(ii) has or had diarrhoea severe enough to interfere with work or normal activities, or

(2) the presence on board of

(a) a person suffering from an infectious disease or who has symptoms which may indicate the presence of infectious disease

(b) any animal or captive bird of any species including rodents and poultry, or mortality or illness among such animals or birds.

(3) any other circumstances which are likely to cause the spread of infectious disease.

If there is nothing to report under any of these headings the Master has no need to obtain health clearance unless an authorised officer otherwise directs. A proportion of ships will be boarded and checked. If any of the conditions in (1)a (1)b and (2)a or (3) have occurred permission (Free Pratique) from an authorised officer will be necessary before disembarkation or commencing operation.

3. If the Master has something to report under 2 above he must:

(1) send a radio message not more than 12 hours and where practicable not less than 4 hours before arrival, giving the relevant information, to the Port Health Authority

or, if the ship is not equipped with a radio transmitter, notify the Port Health Authority, wherever practicable before arrival and otherwise immediately on arrival;

(2) show or give the appropriate day or night signal when the ship enters the jurisdiction of the Port Health Authority (the codes are set out below);

(3) Until "Free Pratique" for health purposes has been given see to it that no person, other than Pilot, Customs officers, Immigration officer or authorised officer boards or leaves the ship without the permission of the medical officer;

(4) complete a Maritime Declaration of Health and arrange for it to be handed to the authorised officer.

In relation to the presence or illness of animals on board, etc., the requirements at (2), (3) and (4) do not apply but where plague has occurred or is suspected amongst rats or mice or there has been abnormal mortality among them, a Maritime Declaration of Health should be completed.

The requirement at 3(4) above does not apply to a ship which has come directly from a port in the excepted area of the Council of Europe, i.e., Belgium, France, Greece, the Irish Republic, Italy, Netherlands, Norway, Portugal, Spain and the United Kingdom.

4. Where it is necessary to obtain "Free Pratique" for health purposes the Master should have already to hand the authorised officer, a list of passengers and crew leaving the ship together with the addresses they are going to in the United Kingdom.

5. The Port Health/Medical Officer may, in circumstances other than those set out above, direct that the Master shall complete a Maritime Declaration of Health and that the Master shall apply restrictions on boarding or leaving the ship.

6. The Master of a ship that has met another ship, which has proceeded from a foreign port, or has met an off-shore installation, is required to comply with the rules in paragraphs 2-3 (but if the ship has proceeded from an excepted port a Maritime Declaration of Health need not be completed).

7. If the Port Health Authority† is satisfied that the Master of a ship was aware, or should have been aware, of conditions and failed to report them then action may be taken under the Public Health legislation which may result, on summary conviction, to a maximum fine of £5,000.

† Or the local Authority responsible for Port Health Control.

* If more than 4 weeks have elapsed since the voyage began it will suffice to give particulars for the last 4 weeks.

Animals/Animal Products: Animals and products of animal origin (including fishery products, eggs, honey, etc.), imported from countries outside the European Union, are subject to veterinary control and can only be landed at ports designated by the EC as Border Inspection Posts for specific products.

INTERNATIONAL CODE OF SIGNALS
PRATIQUE MESSAGES

ZS My vessel is "healthy" and I request Free Pratique Q
*I require Health Clearance QQ
ZT My Maritime Declaration of Health has negative answers to the six health questions.
ZU My Maritime Declaration of Health has a positive answer to question(s)..........(indicated by appropriate number(s)).
ZV I believe I have been in an infected area during the last thirty days.
ZW I require Port Medical Officer.
ZW1 Port Medical Officer will be available at (time indicated).
ZX You should make the appropriate Pratique signal.
ZY You have Pratique.
ZZ You should proceed to anchorage for Health Clearance (at place indicated).
ZZ1 Where is the anchorage for Health Clearance?
I have a doctor on board. AL
Have you a doctor? AM

*By night, a red light over a white light may be shown, where it can best be seen, by vessels requiring Health Clearance. These lights should *only* be about 2 m. (6 ft.) apart, should be exhibited within the precincts of a port, and should be visible all round the horizon *as nearly as possible*.

Health Clearance may be given in three ways:

(a) Wholly in plain language.

(b) Partly in the above signal code, remainder in plain language.

(c) Wholly in the above signal code.

Issued by the Health Departments of the United Kingdom.

GENERAL:

Regulations for tankers entering or leaving ports in the United Kingdom:

Application of the Regulations: The British Government have issued the following regulations, which came into force on 15th October, 1981, applicable to tankers of 1,600 g.r.t. and over of any nationality which:

Have a cargo of chemicals, gas or oil in bulk, or;

Have not been declared gas free after having carried such a cargo.

Reports: Before entering the limits of any harbour a report must be made to the Harbour Master of that harbour giving the following information:

(a) Name and call sign.
(b) Country of register.
(c) Length, draft and beam.
(d) Destination. (This may not be the same as the harbour through which the tanker is passing).
(e) ETA at pilot station or harbour limits.
(f) Brief description of cargo and quantity in tonnes.
(g) Is vessel fitted with inert gas system?
(h) If inert gas system is fitted, is it operational?
(i) Have cargo tanks been rendered non-inflammable?
(j) Has a certificate been issued that the vessel complies with the IMO Codes for the Construction and Equipment of Ships carrying:
  (i) Dangerous chemicals in bulk, or;
  (ii) Liquefied gases in bulk?
(k) Any defect in the hull, machinery, or equipment which may:
  (i) affect the safe manoeuvrability of the tanker or;
  (ii) affect the safety of other vessels in the vicinity of the harbour, or;
  (iii) constitute a hazard to the marine environment, or;
  (iv) constitute a hazard to persons or property in the vicinity of the harbour.

Any changes to the above which occur before entering the harbour limits or while within those limits must be notified to the Harbour Master.

Check List: A Check List is required by the Pilot and the Harbour Master giving the following information:

Details and classification of the vessel.

State of machinery, anchor, fire-fighting, navigational and radio equipment.

State of Safety Certificates and other documents.

Details of officers' Certificates of Competence.

Check List Forms can be obtained from Department of Transport Marine Offices at the following ports: Aberdeen, Avonmouth, Belfast, Cardiff, Dover, Falmouth, Glasgow, Great Yarmouth, Greenock, Hull, Leith, Liverpool, London, Middlesbrough, Milford Haven, Newcastle, Plymouth, Shetland (Mossbank), Swansea.

SHIP MOVEMENT REPORTING: Notice to Mariners No. 631/1986.

Ship Movement Reporting in the English Channel and Dover Strait.

From 1st July, 1986, a revised message format is to be used in the voluntary ship movement reporting system for the English Channel and Dover Strait (MAREP). The changes will bring the MAREP system into agreement with the General Principles for Ship Reporting Systems adopted by the International Maritime Organisation (IMO).

This Notice gives the new message format and also includes amendments to the description of the MAREP system which was given in former Notice No. 1520/81.

Ship Movement Reporting (MAREP): *Introduction:*

(1) The objective of the MAREP scheme is to assist the Mariner, to improve safety of navigation in the English Channel and Dover Strait, and to reduce the risk of pollution of the coasts of the United Kingdom and France in this area. Participation in the scheme is voluntary and the International Maritime Organisation (IMO), through its Maritime Safety Committee, has recommended that ships to which the scheme applies should participate. The transmission of reports is free of charge.

(2) The MAREP scheme provides for certain categories of ships to report-in to a number of designated shore stations in the area of the Traffic Separation Schemes and associated Inshore Traffic Zones off Ushant, off Casquets and in the Dover Strait. Broadcasts will be made by shore stations on a regular basis and as required and will include information on any known situations which could affect the safe navigation of ships in these Traffic Separation Schemes or associated Inshore Traffic Zones.

(3) Ships with certain defects and ships in other categories are also invited to report when elsewhere in the English Channel.

Participation:

(4) Ships of the following categories intending to enter the areas described in paragraph 5 below are invited to participate:

(a) All loaded oil and chemical tankers and loaded gas carriers of 1,600 g.r.t. and over.

(b) Any ship "not under command" or at anchor in a traffic sparation scheme or associated inshore zone.

(c) Any ship "restricted in her ability to manoeuvre", ships engaged in towing, deep draft ships, or ships with a defect in their propulsion or steering.

(d) Any ship with a defect in those navigational aids which could adversely affect her navigation under prevailing conditions.

When to Report:

(5) Ships mentioned above are invited to report to the designated shore stations (paragraph 8 below) when intending to enter:

(a) The Traffic Separation Schemes off Ushant and off Casquets, or their associated inshore traffic zones:

(i) Reports should be made at a distance of 10 nautical miles before entering the area described in (a) above.

(b) The Traffic Separation Scheme in the Dover Strait or the associated inshore traffic zones:

(i) On proceeding Eastward into this Scheme or its associated inshore traffic zones when arriving within 2 nautical miles of a line joining the Royal Sovereign Light Tower and Bassurelle Light Buoy and extended to the French coast.

(ii) When proceeding Southwestward, when arriving within 2 nautical miles of a line from North Foreland extended through the Falls Light Vessel to the Belgian coast.

(iii) When departing from a port within the associated inshore traffic zones.

(6) The phrase "entering a Traffic Separation Scheme" covers ships intending to use the traffic separation lanes, joining them from the side, or crossing the Schemes as described in Rule 10(b) and (c) of the International Regulations for Preventing Collisions at Sea, 1972.

(7) Any ship not under command or any ship of the categories described in paragraph 4(c) and (d) above wherever it is in the English Channel area (East of a line joining Ushant S.W. Buoy and Bishop Rock Lighthouse and West of the line described in paragraph 5(b) (ii) above) is invited to report to a shore station. These ships may be asked to make subsequent pre-arranged reports to shore stations.

Reports and Shore Stations:

(8) Ships with no defects should make a Position Report (POSREP). Ships with defects, i.e. when not under command, with a defect in propulsion or steering or as described in paragraph 4(d) above should make a Defect Report (DEFREP). Where appropriate a subsequent Change Report (CHANGEREP) should be made. Reports in the English language should be transmitted by VHF using the format at the Appendix and using for guidance the IMO Standard Marine Navigational Vocabulary and the International Code. The reports should be made to the following designated shore stations:

Traffic Separation Zone	*MAREP Receiving Station*	*VHF Frequency*
(a) Ushant	Ouessant Traffic	16 – 11
(b) Casquets	Jobourg Traffic	16 – 11
	Portland Coastguard	16 – 69

Channel 11 should be used for calling and working Ouessant and Jobourg Traffic, but these stations should be called outside the times set for broadcasts in paragraph 10.

Channel 69 should be used for calling and working Portland Coastguard.

(c) Dover Strait	Gris Nez Traffic	16 – 69
	Dover Coastguard	16 – 69

Channel 69 should be used for calling and working these stations.

(d) Ships requiring further information or assistance may be transferred by the Centres at Ushant, Jobourg and Gris Nez Traffic to Channel 79 and by Dover Coastguard to Channel 80.

(9) Ships referred to in paragraph 7 should make their report to the nearest designated station. If unable to make contact with any of these stations the report should be made through a Coast Radio Station and addressed to one of the designated stations.

Information Broadcasts:

(10) Routine broadcasts will be made by the Centres at Ushant, Jobourg, Gris Nez and Dover on VHF Channel 11 with additional routine broadcasts in restricted visibility at the following times:

	Clear Weather	*Restricted Visibility*
Ushant Traffic	H+10	H+25
	H+40	H+55
Jobourg Traffic	H+20	H+05
	H+50	H+35
Gris Nez Traffic	H+10	H+25
Dover Coastguard	H+40	H+55

(11) Urgent broadcasts will be transmitted as necessary at any time.

(12) All broadcasts will be preceded by a forewarning on VHF Channel 16.

(13) Broadcasts will cover navigational and traffic information of immediate interest and information on movements of ships which appear to be navigating within a traffic separation scheme contrary to the requirements of Rule 10 of the International Collision Regulations.

Ship's Radio Watch:

(14) In order to derive the fullest benefit from the MAREP scheme a continuous watch should be maintained between routine broadcasts on VHF Channel 16 (and on Channel 11 where two channel reception is available).

Caution

(15) It is emphasised that the MAREP scheme does not absolve the Master from his sole responsibility for the safe conduct of his ship.

APPENDIX: Ship Reporting System:

System Identifier MAREP

Type of Report POSREP (Position Report) or DEFREP (Defect Report) or CHANGEREP (Change Report)

Heading	*Text*	*Explanation or Example*
Identification of message	MAREP	
Type of message		POSREP
Identity of ship	ALFA+name of ship plus call sign	
Group date/hour	BRAVO+6 figure (Zulu)	Date of month: 2 figures Hours and minutes: 4 figures
Position	CHARLIE+Latitude and Longitude	Latitude: 4 figures followed by N or S Longitude: 5 figures followed by E or W
	or CHARLIE+name of port of departure	If the vessel is sailing fr a port in the coastal zon
	or DELTA+bearing – distance in relation to a sea mark	Bearing: 3 figures in degrees. Distance: 2 figures in miles from lan sea mark indicated
True Course	ECHO+true course	3 figures in degrees fro North
Speed	FOXTROT+speed in knots and tenths of knots	3 figures
Destination	INDIA+name of port of destination and probable time of arrival	
Radio-Communications	MIKE+VHF Channel number	Give number of VHF Channel monitored and applicable number of second Channel monitored
Draft	OSCAR+maximum present draft	4 figures in metres and centimetres
Cargo	PAPA+industrial name of product or IMDG Code No.+quantity	Nature of cargo. Quanti expressed in tonnes
Navigational Restrictions	QUEBEC+brief description in clear	Stopped, moored, hampered by draft; generally any restriction on manoeuvrability
Additional Comments	X-RAY+brief particulars	Any other information which may be useful.

Note: The headings QUEBEC and X-RAY can be omitted when there is nothing to report.

Specimen Messages:

GARBAGE/WASTE OIL DISPOSAL: *General Information:* Ports a terminals in the United Kingdom must by law provide reception facili for oily mixtures, chemicals and garbage from ships which need discharge these substances. The level of provision varies accordin the requirements of the ships usually visiting the port, some faci are only provided to meet specialised needs, whilst facilities for garba are almost universal. In some ports waste disposal companies contracted to provide the service, this is often by means of road vehic

Advance Notice Requirements: The use of specialised facilities demand advance notice and when this is required arrangements usually made by the ship's agent or by radio. Information on adva notice requirements is detailed, where available, under the relevant p entry, and is also available from the ports or terminals.

Fees: Ports and terminals may make a reasonable charge for the of reception facilities.

General: The responsible authorities must be informed if any wast be landed is contaminated by pest or disease organisms or wher disposal on land would present a risk to human or animal health o the environment.

Should any inadequacies be observed in the system, then s information should be reported to the local Marine Office of Department of Transport, which are listed below.

Marine Offices, Department of Transport:

London District, Central Court, 1 B Knoll Rise, Orpington BR6
Tel: 0689-890400. Telex: 8812573 dtisurg. Fax: 0689-890446.

North East and East of England District, Government Buildings, Broadway West, Gosforth, Newcastle upon Tyne NE3 2JL. Tel: 091-2857171. Telex: 537045 dotsurg. Fax: 091-2847464.

ABERDEEN: 57.09 N. 02.03 W. (See Plan)

DOCUMENTS:
1 Maritime Declaration of Health.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form 1B6.
1 Stores List.
1 Certificate of Deck Cargo Tonnage.
1 Light Certificate.
1 Port Dues Certificate.
Ship's Certificate of Registry.
Mercantile Marine Office Certificate – for British ships only.
Load-line Certificate.
Safety Equipment Certificate.
Lloyd's Certificate.
Derat Certificate.
Ship's Register.
Light Bills.
Safety Radio Certificate.

In addition, Manifests and Bills of Lading are usually sent to Agent direct from loading port.

PILOTAGE: Pilotage is compulsory except for vessels under 75 m. in length and there are 6 licensed Pilots. Boatage service, although not compulsory, is available. There are 10 licensed boatmen.

Vessels requiring a Pilot should give at least one hour's notice to Port Control.

Pilots normally board vessels in the vicinity of the Fairway Buoy. The pilot vessels fitted with VHF radio are of the MFV type and have a black hull with white cabin and the word "Pilot" displayed in front of the cabin.

There is a Navigation Control Service equipped with harbour surveillance radar which is operated by Navigation Control Officers who operate on a 24 hour basis.

RESTRICTIONS: Navigation Channel: Max. designed width 33.5 m., max. designed depth at HWOST 10.25 m. Traffic signals regulate the movement of vessels in the Navigation Channel.

Entrance to Victoria Dock, depth at MLWS 6.6 m., clear width at entrance 43 m.

MAX. SIZE: Assuming no siltation the port can accommodate vessels up to 160 m. in length, 24.4 m. beam and drawing up to 9.3 m. at MHWS or 8.3 at MHWN. Larger vessels may be accepted after consultation with the Harbour Master. A vessel 166 m. in length has been handled.

HEALTH: Foreign arrivals to complete Maritime Declaration of Health. They are cleared immediately on arrival by either a port doctor or an Officer of H.M. Customs depending on where the ship comes from and whether there is sickness on board.

Vessels arriving from ports within accepted area (N. European ports) and coastal arrivals need not present Declaration in all cases; when there is sickness on board the Port Health Authority must be informed preferably not more than 12 hours and not less than 3 hours before arrival.

Also see "Health – All Ports" before first UK port.

VHF: There is a VHF radio communications system which operates on Channels 6, 11, 12 and 16.

BERTHING: Tidal:

	Length	*Depth* MHWS
Tidal Harbour	1,574 m.	8.4 – 10.3 m.
Albert Basin	1,525 m.	8.4 – 13.6 m.
River Dee (Navigable)	928 m.	8.4 – 10.9 m.
River Dee Dock	410 m.	9.3 – 10.9 m.
Upper Dock	429 m.	9.0 – 10.3 m.
Victoria Dock	1,500 m.	10.3 – 13.6 m.

Deep-Water Berths:

No. 1 Atlantic Wharf: This is 137 m. long with 9.3 m. at MLWS. Excellent road and rail connection.

No. 2 Pacific Wharf: This is 205 m. long with 9.9 m. at MLWS. Open quay. 2×20 ton and 1×50 ton electric portal cranes capable of handling heavy lifts and containers. 1×3,000 t.p.d. grain conveyor, outreach of boom 27 m.

No. 3 Waterloo Quay: This is 172 m. long with 9.9 m. at MLWS. 2×20 ton cranes at Waterloo Quay West. Ro-Ro service operated by P&O to Shetland.

No. 4 Regent Quay East: This is 255 m. long with 9.9 m. at MLWS. Two transit sheds. 2×8 ton level luffing electric portal cranes capable of handling 11 tons at 25 m. radius. Excellent road connections. Forest products terminal in operation.

No. 5 Multi Berth Facility: 520 m. long with 9.6 m. of water at MLWS and 13.3 m. at MHWS. Two transit sheds.

FRESH WATER: This service is provided by the Grampian Region Water Services and is available at all quays.

REPAIRS: Ship repairing facilities and shipping supplies are offered by a number of private firms and individuals with premises beside the harbour.

DRY DOCKS: (Pontoon Docks).

	Overall Length (m.)	*Breadth at Entrance* (m.)	*Depth on Blocks* (m.)	*Lifting Capacity*
No. 1	55	8.8	4.9	700 tonnes
No. 4	64	11.6	5.5	1,000 tonnes

There is also one dry dock of 113 m. × 21 m.

SURVEYORS: Lloyd's and Det Norske Veritas.

MEDICAL: Doctors and hospitals facilities available. Agents should be advised in advance of any medical attention required.

CUSTOMS ALLOWANCES: At the discretion of Local Customs Inspector. Normal allowances are equivalent to 8 oz. of tobacco per man and equivalent to 1 bottle of wine per man. Allowances may be halved for home trade vessels. Vessels in port for more than 3 or 4 days may receive extra allowances.

CONSULS:
Danish Consulate, 59 Marischal Street, Aberdeen. Tel: 589921.
Faroes Commercial Attache, 150 Market Street, Aberdeen. Tel: 592777.
Finnish Consulate, 59 Marischal Street, Aberdeen. Tel: 589921.
French Consulate, (Home address) Correnie, Sauchen. Tel: (03303) 257.
German Consulate, 12 Albert Street, Aberdeen. Tel: 634467.
Icelandic Consulate, 59 Marischal Street, Aberdeen. Tel: 589921.
Italian Consulate, 6 King Street, Aberdeen. Tel: 640916/647135.
Netherlands Consulate, 16 Union Terrace, Aberdeen. Tel. 639106.
Norwegian Consulate, 59 Marischal Street, Aberdeen. Tel: 589921.
Swedish Consulate, 59 Marischal Street, Aberdeen. Tel: 589921.

AIRPORT: International airport nearby at Dyce. There are frequent daily jet services to London operated by British Airways, and in addition British Airways also operate services to Edinburgh, Glasgow, Prestwick, Wick, Orkney and Shetland. There are also services to Manchester and Birmingham.

Air U.K. operate direct services from Aberdeen to Amsterdam, Bergen, London (Stansted), Stavanger, Edinburgh, Leeds/Bradford, Humberside, Norwich and Teesside.

TIME: BST is GMT plus 1 hour. GMT during Winter months.

HOLIDAYS: 1st and 2nd January; Spring Holiday (variable date); Summer Holiday (variable date); September Holiday (variable date); Christmas Day (25th December).

POLICE/AMBULANCE/FIRE: Dial 999 from any telephone and ask for service required.

TELEPHONES: There are berths at which GPO telephone service can be made available to vessels. All operational posts are linked by telephone network.

GARBAGE DISPOSAL: The Port Authority provide skips for ship's garbage. These skips are placed in suitable positions all around the harbour and there is no charge for this service. There are numerous private local companies which can supply skips, and the agent can supply details of these.

WASTE OIL DISPOSAL: A collection service by road tankers is in operation. There are several local companies, details of which local agent can supply. There are no barges or shore storage tanks within the port.

SEAMAN'S CLUBS: Royal National Mission to Deep Sea Fishermen, 5 Palmerston Road, Aberdeen. Tel: 584651.

CURRENCY: U.K. Pound (U.K.£).

AUTHORITY: Aberdeen Harbour Board, 16 Regent Quay, Aberdeen AB9 1SS, United Kingdom. *Tel:* (0224) 592571. *FAX:* (0224) 571507. *Contact:* R.B. Braithwaite, General Manager. Captain C. Parker, Harbour Master. Captain E. Masson, Assistant Harbour Master.

ARBROATH: 56.33 N. 02.35 W. (See Plan)

APPROACHES: Arbroath, situated between Dundee and Montrose, has been recently downgraded from a commercial port to a fishing harbour.

There is a bar 400 m. S.E. of the Piers, depth 0.609 m. LWS, which is dangerous in heavy Easterly weather.

MAX. SIZE: Largest vessel, 65 m. length, 4 m. draft.

BERTHING: Outer harbour has an area of 1.5 ha., depth of 4.57 m. at HWST. Length of quayage 451 m.

Inner harbour has an area of 1 ha. Length of quayage 390 m.

FRESH WATER: Available.

FUEL: Diesel available.

AIRPORT: Dundee, 29 km.

REPAIRS: Can be carried out at repair yard.

DRY DOCKS: None. Patent Slipway 122 m. long. Length of cradle 32.6 m. Slipway can take vessels up to 250 tonnes displacement.

POLICE/AMBULANCE/FIRE: Dial 999.

Arbroath Harbour is a station for a R.N.L.I. Lifeboat "Inchcape" and an inshore inflatable boat.

GARBAGE DISPOSAL: A skip is provided free of charge and is sited by the slipway.

WASTE OIL DISPOSAL: No collection service available within the port, but BCS (Waste Oil) Ltd, Tel: Montrose 671267, may collect waste oil. A portable hand pump with a vertical lift of 18 ft. and a filter through which oily bilges can be pumped is available free from Harbour Master. Oil may be placed in waste oil tank situated on oil jetty (capacity approx. 200 gallons).

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Tayside Regional Council, Harbour Office, Arbroath Harbour, Tayside, DD11 1PD. *Tel:* Arbroath (0241) 872166. *FAX:* (0241) 878472. *Contact:* Captain G.D. Easton, Harbour Master.

ARDROSSAN: 55.38 N. 04.49 W. **(See Plan)**

DOCUMENTS: Normal documents required:
Customs Documents.
Health Documents.
Crew List.
Passenger List.
Ship's Papers, etc.

PILOTAGE: Pilotage compulsory for vessels over 80 m. LOA. Pilotage operated by Clyde Pilotage Authority. Pilot boards off Little Cumbrae Island. Pilot boat on VHF Channels 16 and 14.

24 hours notice required and amendment if ETA changes.

ANCHORAGE: In 12 to 15 fathoms 1 mile S.W. of breakwater.

RESTRICTIONS: 3 red lights vertically day and night above Port Control Tower (See "Plan") indicates "Port Closed".

MAX. SIZE: Eglinton Dock approx. 420 ft. by 57 ft. by 16 ft./18 ft. (depending on tide). North Montgomerie Pier – max. length 575 ft., max. draft, up to 70 ft. beam, 23 ft./26 ft.; over 70 ft. beam, 22 ft./25 ft.

HEALTH: All vessels requiring attention of Medical Officer shall show flag signal ZW by day, or between sunset and sunrise, either morse signal ZW by lamp, or a red light over a white light, not more than 6 ft. apart. Other vessels shall show flag signal "Q" by day, or between sunset and sunrise either morse signal Q by lamp or a red over a white light, not more than 6 ft. apart.

Certificate of Pratique will be issued by Customs Boarding Officer on receiving a satisfactory and fully completed Maritime Declaration of Health. No further formalities required at subsequent ports of call in the U.K.

Also see "Health – All Ports" before first U.K. port.

RADIO: VHF Channels 12, 14, and 16. Radio telephone via Portpatrick.

TUGS: On application to Clyde Tug Owners.

BERTHING: No special requirements except with draft over 16 ft. when vessel may be delayed waiting for tide.

STEVEDORES: Orders to be given by 1130 hrs. previous day.

MEDICAL: No advance notice required unless medical attention is necessary immediately on vessel's arrival. No hospital facilities in Ardrossan, nearest hospitals being at Irvine, 6 miles and Crosshouse 10 miles.

TANKERS: No facilities.

DENSITY: 1025.

FRESH WATER: Available continually at all berths.

FUEL: Marine oils available by road tanker.

FIRE PRECAUTIONS: Patrolman required for hazardous cargoes.

CONSULS: Norwegian Vice Consulate, Danish Vice Consulate: C.A. Mair (Shipping) Ltd., Winton Buildings, Ardrossan. Tel. Ardrossan 605284.

REPAIRS: Limited repair facilities.

GANGWAY/DECK WATCHMEN: Recommended.

OPENING/CLOSING HATCHES: Opened and closed by crew.

CERTIFICATES: Following Certificates are requested: Load Line, Safety Radio, Safety Equipment, Safety Construction, Derat, and Current Trinity House Light Bills.

CUSTOMS ALLOWANCES: Standard U.K. allowances.

REPATRIATION: Customs Boarding Officer acts for Immigration Dept. and arrangements for repatriation can be arranged in conjunction with ship's Agent.

AIRPORTS: Prestwick 18 miles. Glasgow 25 miles.

TIME: BST, that is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: 1st and 2nd January; Easter Monday; May Day, First Monday in May; Third Monday in July; First Monday in October; Christmas Day and Boxing Day. Cargo work may be available on certain holidays by special arrangement.

POLICE/AMBULANCE/FIRE: Police Tel. Saltcoats 468236; Ambulance, Fire: Ask telephone operator.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: Service available. Can be arranged by ship's agent through Ardrossan Harbour Co. Ltd. Charges on application (1991 cost £50 per collection).

WASTE OIL DISPOSAL: No shore tanks/barges or special berth available. The following companies operate a collection service:
Surface Control Ltd., Lloyd Street, Rutherglen.
Ailsa Industrial Services, 37 Clark Street, Paisley.
Mitchell Thomson Ltd., Robslee Drive, Thornliebank.
Amicoil, Braybrooke Chemical Services, Uddingston.
Kelvin Tank Services, Twechar Works, Kilsyth.
Tank Cleaners (Glasgow) Ltd., Robslee Drive, Giffnock, Glasgow G46 7TY.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (UK£).

DEVELOPMENTS: Roll-on/Roll-off berth for specialised traffic.

AUTHORITY: Ardrossan Harbour Company Limited, Harbour Office, Ardrossan, Ayrshire, KA22 8DB, United Kingdom. *Tel:* (0294) 463972. *FAX:* (0294) 605305. *Contact:* Captain W.D. Gillespie, Harbour Master. P.J. Abbott, Operations Manager.

RESTRICTIONS: Due to limited amount of berthing facilities, permis should be sought from the Harbour Master before entering the Har

MAX. SIZE: LOA 70 m. Draft 4.0 m. at HWOST. Vessels of up to 75 m. in length are able to berth at the New Centre Pier, which is a steel piled structure with a depth alongside of 2.9 m. at LW.
HEALTH: Standard regulations apply. Vessels should inform Port Health Officer Belfast of any sickness on board.
VHF: A listening watch is kept on VHF Channel 11 throughout 24 hours.
TUGS: Can be ordered from Belfast if required. Work boat of 28 h.p. available.
BERTHING: See "Max. Size" and "Developments".
BRIDGES: None.
STEVEDORES: None locally.
MEDICAL: Full hospital facilities available.
TANKERS: No facilities.
FRESH WATER: Available on Central Pier.
FUEL: Petrol and diesel available from tank on pier or by road tanker.
CONSULS: Nearest at Belfast.
REPAIRS: Minor repairs only.
SURVEYORS: Available from Belfast.
GANGWAY/DECK WATCHMEN: Not usually available.
HATCHES: Opening/closing done by ship's crew.
CUSTOMS ALLOWANCES: U.K. Regulations apply.
CARGO GEAR: The harbour's 5 tonne crawler crane has been removed, and in future vessels will have to use their own cargo gear, or hire one of the available mobile road cranes in the district.
REPATRIATION: Can be arranged by Agent.
AIRPORT: Aldergrove Airport, or Belfast City Airport (12 miles).
TIME: GMT plus 1 hour from late March – late October. GMT for rest of year.
POLICE/AMBULANCE/FIRE: Dial 999.
TELEPHONES: Cannot be placed on board. Several in vicinity of berth.
GARBAGE DISPOSAL: Bins available in waste compound and collection service is available.
WASTE OIL DISPOSAL: 300 gallons tank available. Arrangements should be made for large quantities.
SEAMAN'S CLUBS: None. All town facilities within walking distance.
SHORE LEAVE: No restrictions.
DELAYS: Berthing times will depend on the arrival drafts and fishing traffic.
DEVELOPMENTS: The new North Breakwater runs in a Northwesterly direction with seaward side built of S.H.E.D. units, and the sheltered S.W. side of corrugated steel piling, where safe berthing is available over a distance of 95 m. with a minimum depth of 3.7 m. at LW.

A 600 berth marina has been constructed in the inner harbour, where the minimum depth is approximately 2.0 m. at LW.
AUTHORITY: North Down Borough Council, Town Hall, Castle Grounds, Bangor, Co. Down, Northern Ireland BT20 4BT. *Tel:* (0247) 270371. *Contact:* Andrew Jaggers, Harbour Manager, Bangor Marina, Bangor BT20 5ED. Tel: (0247) 453297. Fax: (0247) 453450.

BARROW-IN-FURNESS: 54.07 N. 03.14 W. (See Plan)

PORT LIMITS: The seaward boundaries of the port extend from Scarth Channel in the North to Lightning Knoll Buoy in the South (Position – Lat. 53° 59.8′ N., Long. 03° 14.2′ W.).
DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Health Declaration.
Ship's Certificates and Cargo Documents.
PILOTAGE: Pilot boards at Lightning Knoll Buoy, using Pilot cutter, usually 2 or 3 hours before high water.

Barrow Pilot Vessel on VHF Channels 16 and 12. Vessels bound for Barrow should communicate their ETA at the Pilot Station through their local Agents or to the Harbour Master Barrow, at least 12 hours before arrival.
ANCHORAGE: At Lightning Knoll Buoy, depth of 10 m. at LW. In adverse weather conditions vessels proceed to Ramsey Bay, 70 km. away, for shelter.
RESTRICTIONS: A new dock entrance was constructed in 1991. The new entrance allows access from 2.5 hours before H.W. until 1 hour after H.W. The width of the new entrance is 36.6 m. with a sill 3.0 m. below L.A.T. Access to the port, which is protected from the prevailing Westerly winds by Walney Island, is gained from the Irish Sea through the harbour along the well-defined Walney Channel. The depth of water on the New Ramsden Dock entrance sill can range from 13.00 m. at highest high water springs to 9.4 m. at high water neaps.
MAX. SIZE: Length approx. 200 m. Beam 35 m. (approx.). Draft according to tide.
HEALTH: Vessels arriving from abroad are given Pratique by Customs Boarding Officers. In case of suspected disease or fever on board notify Agent prior arrival. Agent will advise Port Health Authorities.

Also see "Health – All Ports" before first U.K. port.
BERTHING:

Docks	*Water area in Hectares*	*Width of entrance*
Ramsden	22.5	30.48 m.
Buccleuch	13.0	30.48 m.
Devonshire	5.0	24.4 m.

Walney Channel Deep-water Berth: 140 m.×25 m.×6-8 m. depth.
Ramsden includes: Ramsden Dock Basin with 3 berths with a total quayage of 378 m., taking vessels of up to 9.15 m. draft, and Anchor Line Basin with three berths 256 m., 152.4 m., and 274.3 m., long respectively, taking vessels of up to 7.3 m. draft. Anchor Line berth equipped for Ro/Ro traffic.
RADIO: Local stations: Anglesey Radio, Port Patrick Radio.
VHF: Port VHF service. Call sign 'Ramsden Dock Radio'. Channel 16 (156.8 MHz) Calling and Safety. Channel 12 (156.6 MHz) Port Operations.
TUGS: Liverpool tugs available on request. Notice required.
DENSITY: 1015 to 1025.
FRESH WATER: Available from quayside hydrants.
FUEL: Can be obtained from bunkering facility at No. 3 Berth, Ramsden Dock Basin and Ramsden Dock Lock.

OPENING/CLOSING HATCHES: Handled by ship's crew.
AIRPORT: Manchester Airport. Walney Airport by arrangement.
TIME: As for other UK ports.
HOLIDAYS: As for other ports in England.
POLICE/AMBULANCE/FIRE: In emergency Tel. 999; for enquiries and other calls – Police: Barrow 824532; Ambulance: Carlisle (0228) 20345; Fire Service: Barrow 821363.
SHORE LEAVE: No restrictions.
IDENTIFICATION CARDS: Seaman's Book or Passport required by non-British crew.
GARBAGE DISPOSAL: Garbage skips will be provided by waste disposal contractors on request.
WASTE OIL DISPOSAL: Waste oil may be connected by waste disposal contractors on request.
SEAMAN'S CLUBS: None.
DEVELOPMENTS: Walney Channel and the approaches to Barrow were dredged during 1991 to provide deeper access for the new dock entrance.
AUTHORITY: Associated British Ports – Barrow and Silloth, Port Office, Ramsden Dock Road, Barrow-in-Furness, Cumbria, LA14 2TW. *Tel:* (0229) 822911. *FAX:* (0229) 835822. *Contact:* Captain J.W. Green, Port Manager and Harbour Master.

BARRY: 51.24 N. 03.16 W. (See Plan)

DOCUMENTS: Required for arrival:

C.142	2 copies	Crew Declaration
C.14	3 copies	Stores Declaration
C.13	2 copies	General Declaration (completed by Agent)
C.16	2 copies	Cargo Inward Declaration
C.74	1 copy	Master's Authority (Agent's complete)
C.1320	2 copies	Cargo in un-registered spaces.

These documents are to be completed and presented with copies of manifests and ship's documents at the time of report.
PILOTAGE: A.B.P. Pilots, Pier Head, Barry Docks. Amount of advance notice of ETA required: 24 hours. Final confirmation to be given by VHF or R/T when within 2 hours of pilot station. VHF channel or frequency to be used when contacting pilot boat or pilot station: VHF Channel 16 thence working channels as required.

Pilot Cutter: Black hull with "Pilot" in white on same and white superstructure.

Pilot boat is located near Breaksea Lanby Buoy. Smaller vessels may be boarded in Barry Roads.

Also see "Cardiff".
ANCHORAGE: Barry Roads, 10 fathoms, safe anchorage. Large vessels should anchor West of Breaksea Lanby Buoy. Small vessels 0.75 mile S.E. of Barry Dock Entrance.
RESTRICTIONS: Entrance only 4 hours before HW to 4 hours after HW.
HEALTH: See "Health – All Ports" before first U.K. port.
RADIO: Barry Docks Radio, Channel 11.
VHF: Channels 16, 11 and 22.
TUGS: Join vessel at Barry Roads. Tug's or ship's lines utilised.
BERTHING:

Dock	*Quay Length (Total) (m.)*	*Normal Depth of Water (m.)*	*Max. Size of Vessel Length (m.)*	*Beam (m.)*	*Draft (m.)*	*Max. d.w.t.*
No. 1 Dock	2,894	9.8	178	23	9.1	23,000
No. 2 Dock	(9,490 ft.)	9.8	178	23	9.1	23,000
No. 3 Dock Basin		Semi-tidal	178	23	9.1	23,000

Vessels up to 22.9 m. beam can be accepted on favourable tides. Max. 23,000 d.w.t. with draft of 9.1 m.
Storage and Warehousing Facilities: 3,700 sq.m. transit shed and 1,860 sq.m. temperature controlled holding store within dock basin. No. 2 Dock provides a further 2 transit sheds totalling 7,413 sq.m. Additional covered storage within the port area comprises 4 sheds totalling 7,686 sq.m. (82,650 sq. ft.). Ample open storage space is also available.
Cranage and Mechanical Handling: Basin: 4 × 6 tonne. No. 2 Dock, South Side: 4 × 6 tonne and 2 × 5 tonne. Berth No. 31: 5 × 10/11.5 tonne grabbing cranes.
Specialised Facilities:

(i) One of the largest tank storage facilities in Britain with tank capacity of more than 200,000 cu.m. suitable for oil, chemicals, and natural gas.

(ii) The port is licensed to handle explosives both in dock and at specially approved anchorages.

(iii) A bulk loading conveyor installed at No. 2 Dock is capable of handling coal and coke at a speed of 450 tonnes per hour and is served by road and rail, with stocking areas.

(iv) Windward Terminal: 6,400 sq.m. of storage area (temperature controlled). 4×6 ton quay cranes. Terminal can accommodate vessels of 10,000 d.w.t.

BRIDGES: Bridge swung to vessel's requirements.
STEVEDORES: An early ETA essential. Enables planning to be effected in conjunction with other work in port.
Port Working Hours: Monday – Thursday: 0700 – 1630 hrs. Friday 0700 – 1530 hrs.

Daily and weekend overtime available and shiftwork can also be arranged on request.
MEDICAL: Hospital facilities available. Advance notice desirable.
TANKERS: 6 tanker berths, maximum draft 28 ft.
DENSITY: Density 1020.
FRESH WATER: 15/20 t.p.h. per hose.
FUEL: By barge or road transport.
CONSULS: None. Many located at Cardiff 8 miles East of Barry.
REPAIRS: All types of repair undertaken by private ship repairers.
DRY DOCKS: One dry dock, length 286.5 m. and width 23.9 m. – not in use.
GANGWAY/DECK WATCHMEN: The services of watchmen provided at discretion of Shipowner or Agent.
OPENING/CLOSING HATCHES: Work normally undertaken by ship's crew but the port will, if requested, provide a crane to assist in this work on completion of a "Hatch beam form". Riggers may be employed on this work at request of shipowner.
CUSTOMS ALLOWANCES: Refer to Customs. Tel: Barry (0446) 420240.
REPATRIATION: All facilities available.
AIRPORT: Cardiff (Wales) Airport, 4 miles, served by regular airlines.
TIME: GMT, except late March – late October when British Summertime (GMT plus 1 hour) is in operation.
HOLIDAYS: Bank Holidays. Arrangements made to work if essential.
POLICE/AMBULANCE/FIRE: Call operator by dialling 999.
TELEPHONES: At main berths.
SHIP SUPPLY SERVICE: A Ship Supply Service could be provided by Cory Ship Towage with their tugs at Cardiff if required. Address: Cory Ship Towage Ltd., S.E. Wales Office, Alexandra Dock, Newport, Gwent. NP9 2NP. Tel: Newport 56835/6.
IDENTIFICATION CARDS: Not needed by Port Authority.
AUTHORITY: Associated British Ports, Pierhead Building, Bute Docks, Cardiff, South Glamorgan CF1 5TH. *Tel:* (0222) 471311. *Telex:* 498542. *FAX:* (0222) 471100. *Contact:* B.J. Harding, Port Manager, Cardiff and Barry. Captain R.S. Grubb, Dock and Harbour Master.

Barry: A.H. Starke, Port Superintendent, Barry. *Tel:* (0446) 700311. *Telex:* 498421. *FAX:* (0446) 700100.

BELFAST: 54.36 N. 05.56 W. (See Plan)

DOCUMENTS:
1 Passenger and Crew List for Immigration.
1 Crew Declaration C142 (for H.M. Customs).
1 List of Ship's Stores (for H.M. Customs).
1 Maritime Declaration of Health.
1 Cargo Manifest.

PILOTAGE: Pilotage compulsory for vessels over 100 m. LOA in the Outer Harbour and vessels over 75 m. in the Inner Harbour. Pilot station is situated at Belfast. It is manned continuously. Vessels requiring a Pilot should give as much advance notice as possible of ETA, but in any case not less than 2 hours. Pilots may be ordered through:

Port Operations Station, Tel. Belfast 781143 or VHF Channel 12.

Belfast Harbour Office, Tel. Belfast 0232-554422, 0900 – 1700 hrs. Monday-Friday.

There are 3 motor launches servicing Pilots. "Pilot Boat 1" is 33 ft. long, "Pilot Boat 2" is 44 ft. long, and "Mabel Helen" is 46 ft. 8 in. long. All vessels are painted orange with word "Pilot" in white letters on each side.

Pilot launches may be contacted on VHF Channel 12.

Usual international signals should be made for a Pilot. Pilots board from 1.5 to 2 miles S.E. of Carrickfergus. In poor visibility the pilot launch makes a sound signal of 4 short blasts. Vessels may be led into calm water before boarding.
ANCHORAGES: Safe anchorages, according to draft and size of vessel are available through Belfast Lough East of a line from Carrickfergus to Grey Point.
RESTRICTIONS: Intended depths in the entrance channels: Victoria Channel, sea to Refinery berths – 30 ft. below datum. Refinery to Thomson Wharf – 26 ft. below datum.

Musgrave Channel, 24 ft. below datum.

Herdman Channel, 24 ft. below datum.
MAX. SIZE: Vessels' size is restricted only by depth of water available. See "Restrictions", "Berthing" and "Tankers".
HEALTH: Use International Code quarantine signals. Master of a ship approaching a port in Northern Ireland from a foreign port other than an excepted port must ascertain state of health of all persons on board, and must fill in and sign Declaration of Health. It should be completed and ready to deliver to the Customs Officer, or authorised officer of the Port Health Authority, whichever first boards the ship.

If any suspected diseases on board, Free Pratique will not be granted by Her Majesty's Customs until the ship has been visited by the Port Medical Officer. Therefore in these cases notify "Portelth Belfast" by radio in advance.

Also see "Health – All Ports" before first U.K. port.
RADIO: The best station for messages, cables, etc., is Port Patrick, call signal GPK.
VHF: Belfast Port Operation and Information Service is situated at Port Control Office, located in Milewater Basin. A continuous watch is maintained on VHF on Channel 12. Call sign is Belfast Harbour Radio.
TUGS: Tugs are owned by Cory Ship Towage Ltd., Tel. Belfast 7432 They are fitted with VHF Channels 16, 14, 12, 8 and 6. Tugs norma meet inward bound vessels in vicinity of No. 20 beacon. Use of tu lines is optional.
BERTHING: The following berths are equipped for handling contai or drive-on, drive-off traffic:

Berth	*Max. draft (ft.)*
Victoria Terminal 1 Ro/Ro	24
Victoria Terminal 2 Ro/Ro	24
Donegall Quay 4 – Ro/Ro	18
Donegall Quay 5 – Fast Ferry	18
Ballast Quay (600 ton heavy Ro-Ro pad)	18
York Dock 1 and 2 (1×30 ton transporter crane)	24
Herdman Channel West – Unit load/Ro-Ro (2×30 tonne transporter cranes)	18
Stormont Wharf 2 (200 tonne cantilever crane)	28
Pollock Dock 7 (1×35 tonne derrick crane)	28

Numerous general cargo berths and cranage from 3 – 15 tonnes.

Gatx Terminals Ltd. have constructed a bulk liquid terminal for t storage of petroleum, chemical products, etc. Special tankers ship liq gas to the storage installation of Calor Kosangas (Northern Ireland) Lt and Flogas at Musgrave Channel.
STEVEDORES: Direct employment by private stevedores, 24 hou required.
MEDICAL: All kinds of medical treatment are available. Agent sho be given as much notice as possible for arrangements to be made.
TANKERS: Tankers have to observe (i) Chamber of Shipping Tan Safety Code. (ii) The Merchant Shipping (Tankers) (EEC requiremen Regulations 1981. (iii) The Dangerous Substances in Harbour Ar Regulations (Northern Ireland) 1991.

6,000 tons of tank washings can be processed at B.P. Oil Berth No *Tanker Berths:* Oil Berth No. 4 – 35 ft. Oil Berth No. 1 – 28 ft. Oil Be No. 2 – 28 ft. Oil Berth No. 3 – 28 ft.
DENSITY: Average density of water in Inner Harbour is about 10 and Outer Harbour is about 1024.
FRESH WATER: Available at almost all berths. Delivery is by hose a rate of approx. 30 t.p.h. Arrangements can be made through Harbo Radio.
FUEL: All grades of fuel oil are available by road tanker only. 48 hou advance notice of requirements should be given.
FIRE PRECAUTIONS: Special precautions for vessels carry petroleum, explosives, calcium carbide and dangerous goods are out in the appropriate by-laws. A copy of general port fire noti delivered to all ships on arrival.

Also see "Tankers".

Harland and Wolff Building Dock, length of floor 1,825 ft., bread floor and entrance 305 ft., level of sill 16 ft. 10 in. below datum.

Two other dry docks available.
GANGWAY/DECK WATCHMEN: Normally, a member of sh company acts as watchman. Shore watchmen may be obtained thro Agent.
OPENING/CLOSING HATCHES: By crew or stevedores.
CERTIFICATES: Register. Radio Certificate. Load Line Certific Safety Equipment Certificate. Safety Construction Certificate. Light B Passenger Certificate if applicable. Chain Register. Derat Certifica
CUSTOMS ALLOWANCES: Tobacco: 8 oz. tobacco are permitted man and issues are made at 8 day intervals. Wine and/or Spirits: W beer and spirit issues are made, in moderation, at 4 day intervals.
REPATRIATIONS: Crew may be changed and repatriations arrang Immigration must be informed.
AIRPORT: Aldergrove Airport is approximately 17 miles from Be There are daily flights to all parts of United Kingdom. Belfast City Ai has daily flights to many U.K. cities.
TIME: British Standard Time is kept, that is GMT plus 1 hour. Reve to GMT in Winter months.
HOLIDAYS: Stevedore holidays are 1st January, 17th March, Ea Monday and Easter Tuesday, 12th and 13th July and 25th and December.
POLICE/AMBULANCE/FIRE: All can be contacted by telephoning and ask for services required. Additionally: Fire Brigade Belfast 222 Ambulance Belfast 241212; Harbour Police Belfast 232235; *or thr* Belfast Harbour Radio on VHF Channel 12.
TELEPHONE: Telephone can be placed on board at certain ber
SERVICES: All principal makes of radio, radar and gyro equipme be serviced. Compass adjusting and D/F calibration can be carrie

Charts and publications available from Class A Admiralty Chart A Todd Chart Agency Ltd., 4 Seacliff Road, The Harbour, Bangor, Co Down, BT20 5EY. Tel: 0247-466640. Fax: 0247-471070.

SHORE LEAVE: Normally no restrictions on shore leave.
IDENTIFICATION CARDS: Seamen's identity cards required.
GARBAGE DISPOSAL: Services available through local agent.
WASTE OIL DISPOSAL: Service available through local agent.
SEAMAN'S CLUBS: Stella Maris (Residential), and Flying Angel. All services and facilities available.
GENERAL: *Charts:* B.A. No. 2198, 1753.
Pilot Books: NP40, Irish Coast Pilot.
Lights: Admiralty List of Lights, Volume A (NP74).
AUTHORITY: Belfast Harbour Commissioners, Corporation Square, Belfast BT1 3AL. *Tel:* (0232) 554422. *Telex:* 74204. *FAX:* (0232) 554411.
Contact: Captain Hugh O'Byrne, Harbour Master. G. Irwin, Chief Executive. J.F. McNamee, Chief Engineer. W. Wilson, Port Services Manager.

BLYTH: 55.08 N. 01.30 W. (See Plan)

DOCUMENTS:
Certificate of Registry.
Load Line Certificate.
Safety Radio Certificate.
Safety Equipment.
Safety Construction.
Light Dues Payments.
Customs Forms C13 and C142.
Bills of Lading, Manifest and Stowage Plan usually sent in advance of vessel.
List of Members of Crew (of ship arriving in U.K.) who are aliens or were engaged outside U.K. (Home Office Form I.B.6A). Passenger form to be completed when reporting vessel's arrival from foreign ports.

PILOTAGE: Call by VHF Channels 12 and 16 when approximately 2 hours off port. Pilot boats have black hull with white superstructure with word "Pilot" in black letters on the superstructure. Letters in white. Fly International Pilot Flag at masthead and at night show International Light Signals for pilot boat on station.

Vessel requiring Pilot sounds 2 short and 3 long blasts or exhibits International Code Flag "G". By night flashes International Code Signal "G" or "PT". Pilot boats operate and will board within radius of 2 miles of East Pier Lighthouse, or further, weather permitting. Pilots board at Pier end area during adverse weather.

ANCHORAGES: No anchorages within harbour – in good weather vessels can anchor off port East of Fairway Buoy.
RESTRICTIONS: No night restrictions. Entry according to draft. Channel dredged to 7.6 m. LAT and approaches 8.5 m. LAT. Upper River and South Harbour 6.7 m. LAT. Rise of tide 4.3 m. Springs, 2.1 m. Neaps.
MAX. SIZE: Bulk carriers up to 22,500 d.w.t. discharge at Alcan (U.K.) Limited Terminal. Max. draft 9.8 m. LOA 190 m.

For other berths max. length 190 m., draft 8.5 m.

HEALTH: International quarantine signals to be used. Pratique will be granted by Customs or Port Health Officer if Maritime Health Declaration is clean. If suspected diseases on board radio "Portelth Blyth" in advance advising details.

Also see "Health – All Ports" before first U.K. port.

RADIO: Cullercoats Radio, VHF Channel 26.
VHF: Details of movements within port given over VHF from Port Control Office (Tel: (0670)-352678). Calling Channel 16, working Channel 12.
TUGS: Normally join vessel at harbour entrance. Extra charge for use of tugs lines.
BERTHING: Alcan Bulk Alumina Terminal, dredged depth alongside 10.4 m. LAT. Alcan is offering the use of its ship unloading terminal at Blyth Harbour to other firms requiring bulk cargo unloading facilities.

North Quay, South Harbour, depth alongside 8.5 m. LAT.

Coal-loading berths and waiting berths, 5.2 m. to 8.5 m. LAT. West Quay, dredged depth 7.0 m. LAT (Sto-Ro/Ro-Ro Terminal "Blyth Progress"). South Side Berths, dredged depth 8.6 m. LAT. Wimbourne Quay (Sto-Ro Terminal – "Link Blyth" – Pontoon) dredged depth 6.7 m. LAT.

STEVEDORES: Blyth Harbour Commission, Traffic Department, South Harbour, Blyth. Tel. (0670) 352066. ETA requested day before arrival.
MEDICAL: Notice not necessary but advisable. Hospital facilities available. Inoculation, vaccinations and/or certificates not specifically required.
DENSITY: Sea water. Fresh water effect negligible.
FRESH WATER: Obtainable from shore hydrants. Rate of delivery varies from 10 t.p.h. – 50 t.p.h. according to location.
FUEL: Not available.
CONSULS: (At Newcastle-upon-Tyne) Denmark, Norway, Netherlands.
REPAIRS: All types of deck and engine repairs possible.
GANGWAY/DECK WATCHMEN: Not usually employed as these duties are carried out by the crews.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco: 50/250 grammes. Wine/Spirit: Wine up to 0.75 litres. Spirits up to 0.375 litres.
REPATRIATION: Can be arranged by H.M. Immigration Office, Blyth.
AIRPORT: 24 km. Served by regular airlines.
TIME: BST is GMT plus 1 hour. GMT in Winter months.
HOLIDAYS: Christmas Day; New Year's Day; Good Friday; Easter Monday; May Day (first Monday in May); Spring Bank Holiday (last Monday in May) and Late Summer Holiday. Cargo work can be arranged on these days by request.
POLICE/AMBULANCE/FIRE: Tel: 999.
TELEPHONES: Can be fixed aboard by arrangement.
IDENTIFICATION CARDS: Seaman's Book or Passport desirable.
GARBAGE DISPOSAL: Disposal skips are provided on BHC general cargo quays, for ships domestic garbage. Arrangements for other garbage should be made direct by agents or through the port authority for a contractor. As a guide, the undermentioned contractors have indicated an interest in contracting their services: T.James (Bedlington) Ltd., West Sleekburn, Northumberland NE22 7DJ (Tel: 0670 823153) and Hargreaves Clearwaste Ltd., Newtown Industrial Estate, Birtley, Chester-le-Street, Co. Durham, DH3 2QN (Tel: 091-4106621).
WASTE OIL DISPOSAL: The following companies are willing to undertake the collection of waste oil and oily waste from vessels. Arrangements for these services can be made through the local ship's agencies:

Cleanaway Ltd., Waste Services Division, Service Centre, Meadowfield, Ponteland, Newcastle upon Tyne, NE20 9SN. Tel: 0661 72640.

Hargreaves Clearwaste Ltd. Environment & Construction Materials Division, Newtown Industrial Estate, Birtley, Chester-le-Street, Co. Durham DH3 2QN. Tel: 091 4106621.

Effluents Services Ltd., 140 Moss Lane, Macclesfield, Cheshire, SK11 7YT. Tel: 0625 29666.

SEAMAN'S CLUBS: None.
CURRENCY: U.K. Pound (U.K.£).
AUTHORITY: Blyth Harbour Commission, 79 Bridge Street, Blyth, Northumberland NE24 2AW, United Kingdom. *Tel:* (0670) 352066. *Telex:* 537567. *FAX:* (0670) 368540, 355169. *Contact:* I. Robertsham, Chief Executive.

BOSTON: 52.58 N. 00.01 W. (See Plan)

DOCUMENTS: Usual U.K. requirements.
PILOTAGE: Compulsory for all vessels greater than 50 g.r.t. Pilot boards at Clay Hole from launch in the approaches to River Witham or at Boston Roads (non-compulsory). Pilot Office Tel: 0205-362114.
ANCHORAGES: Vessels awaiting tide anchor to South of Buoy No. 9 in depths of 7.3 m.

Anchorages available in Boston Deeps, depths 5.5 m. to 9.1 m.

RESTRICTIONS: Entrance to dock normally restricted to 2.5 hours before and 1.5 hours after HW.
Lock Dimensions: Lockable length 88.0 m., width 13.6 m., depth on sill 5.4 m. MHWN; 7.5 m. MHWS.

Sill clearance of 1.5 m. normally required.

MAX. SIZE: Dock: Length 100 m. Riverside quays: Length 90 m. Larger vessels may be accepted, tides permitting.
HEALTH: Normal U.K. procedure. Port Health Officer, Tel: 0205-363271.
VHF: Port radio station maintains VHF watch (Channels 16 and 12) during office hours and from 2.5 hours before till 1.5 hours after HW.
TUGS: 1 tug available, 7 tons bollard pull.
BERTHING: *Boston Dock:*
North Quay: Length 251 m.
South Quay: Length 257 m. Transit shed 2,787 sq.m.
West Quay: Length 137 m. Transit shed 2,160 sq.m.
Two Ro/Ro ramps.
Riverside Quay: Length 750 m. Transit shed 1,765 sq.m. Berths dry out at LW.
CRANES: At Boston Dock:
3×6 tonnes electric portal cranes.
1×25 tonnes Scotch Derrick.
4 mobile cranes.
1 Gottwald mobile heavy lift crane (50 tons).
At Riverside Quay: 1×7.5 tonnes electric portal crane.
Forklifts available at both Boston Dock and Riverside Quay.
BULK CARGO FACILITIES: Two silos, each capable of storing 5,000 tonnes.
(i) Banks Silos at Riverside Quay, with 2 loading towers.
(ii) Witham Wharf, opposite Riverside Quay. Privately owned.

Lingrain Silos: There is a 46,000 tonne grain silo adjacent to Dock and connected to North Quay. Mobile shiploaders available.

SPECIALISED CARGO-HANDLING FACILITIES: Containers are discharged at South Quay, using a 25 tonne Scotch Derrick and by a 35 ton container gantry on the North Quay. 20 ft. and 40 ft. containers are handled.

Container handling yard (2.1 ha.) with two reach stackers.

BRIDGES: A power cable with 150 ft. vertical clearance exists to East of lock.
STEVEDORES: Several local companies can supply stevedores.
MEDICAL: Doctors, dentists and hospital available locally.
FRESH WATER: Available.
FUEL: Available from road tankers. Contact Agents to make arrangements.
CONSULS: Denmark, Vice-Consul; Netherlands, Vice-Consul; and Norway, Vice-Consul.
REPAIRS: Can be undertaken by local companies.
CUSTOMS ALLOWANCES: Usual U.K. Regulations. H.M. Customs, Tel: 0205-363070.
TIME: GMT; Summertime kept from late March – late October (GMT plus 1 hour).
POLICE/AMBULANCE/FIRE: Dial 999 for emergency service.
GARBAGE DISPOSAL: MARPOL skips situated on dock. Larger quantities by arrangement with the port.
WASTE OIL DISPOSAL: By arrangement with Orcol (Tel: 0532-533571) or Hall & Campy, Nottingham (Tel: 0602-780321).
SEAMAN'S CLUBS: None.
CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Port of Boston Ltd., Dock Office, Boston PE21 6BN. *Tel:* 0205-365571. *FAX:* 0205-310126. *Cables:* Neptune, Boston. *Contact:* Captain B.D.C. Franklin, Harbour Master. Tel: 0205-362328 (direct). J.S. Sutcliffe, Managing Director. A. Woods, Commercial Manager.

BRAEFOOT BAY: 56.02 N. 03.19 W. (See Plan)

Braefoot Bay Marine Terminal is a facility shared between Exxon Chemical Olefins Inc. and Shell U.K. Exploration and Production, as the shipping point for the products of the Mossmorran gas fractionation complex situated approximately 7 km. inshore from the Terminal. The Terminal is located on the Fife Shore of the River Forth between the communities of Dalgety Bay and Aberdour and separated from the main shipping fairway by the Island of Inchcolm.

The Eastern jetty is operated by Exxon Chemical Olefins Inc. and exports Ethylene Pyrolysis Gasoline in ships between 4,000 cu.m. and 12,000 cu.m. capacity and gasoline in ships up to 20,000 tonnes S.d.w.t. and not exceeding 165 m. LOA.

The Western Jetty is operated by Shell U.K. Exploration and Production for the export of propane, butane, and natural gasoline in ships of up to approximately 60,000 cu.m. Ships of less than 15,000 cu.m. may be accommodated by special arrangement, provided their moorings are suitable and their manifolds are compatible with the loading arm envelope.

Each jetty carries out loading operations independently, while the coordination and administration of marine activities is the responsibility of the Braefoot Bay Supervisor who is the local senior representative for Braefoot Bay Marine Terminal appointed by Shell U.K. Exploration and Production and acting on behalf of itself and Exxon Chemical Olefins Inc. with direct responsibility for the Management of all ship-related activities at Braefoot Bay.

The products from Mossmorran are Ethylene, Propane, Butane and Gasoline, of which the Ethylene is manufactured and handled over the Eastern Jetty of the Terminal by Exxon Chemical Olefins Inc., while the other products are handled by Shell U.K. Exploration and Production over the Western Jetty of the Terminal. Shell U.K. Exploration and Production also have the facility to export Gasoline across the Eastern Jetty.

DOCUMENTS: See "Leith".

APPROACHES: "General Directions for Navigation in the River and Firth of Forth" are published by the Forth Ports PLC and administered by the Forth Navigation Service. Vessels entering or navigating the Forth must notify Forth Navigation Service 24 ours before entering and 1 our before leaving a berth, of their proposed intentions and obtain subsequent clearance to carry out such intentions. Forth Navigation Service can be contacted on VHF Channels 6 and 71, with working Channels 2 and 20.

PILOTAGE: Pilotage is compulsory for all vessels calling at or sailing from Braefoot Bay Marine Terminal.

Pilots are authorised by the Forth Pilotage PLC and must be ordered for both inward and outward passages through the ship's agent.

Vessels bound for the Forth must give 4 hours' notice of ETA and should confirm their ETA 2 hours before arrival at pilot station.

Pilots may be contacted by calling "Forth Pilots" on VHF Channel 16 and working on VHF Channel 14.

RESTRICTIONS:

(a) All movements are subject to the directions of the Forth Navigation Service.

Pilotage is compulsory for all ships arriving at, or departing from Braefoot Bay Marine Terminal.

Pilotage Exemption Certificates are not acceptable at Braefoot Bay Marine Terminal.

(b) (i) *Vessels will not be berthed if the weather as forecast by Glasgow Weather Centre over the planned time alongside indicates sustained wind speeds of 45 knots or more.*

(ii) *Vessels are not allowed to berth at the Braefoot Bay jetties if the mean wind speed exceeds 27 knots. In general, vessels will not sail if the wind speed exceeds 27 knots. However, if the forecast is for the wind to increase to greater than 50 knots, the berths may be cleared following consultation with the Chief Harbour Master.*

(iii) *Vessels will not be accepted for berthing at Braefoot Bay and departures will not be authorised unless visibility is at least half a nautical mile at the Braefoot Bay jetties.*

(c) In accordance with the agreement of the Terminal and Forth Ports PLC, the following directions for Navigation apply or as advised by the Terminal from time to time:

(i) All vessels bound for the Western Jetty or vessels of greater than 145 m. overall length bound for the Eastern Jetty shall only approach the Terminal through the Western Channel of Mortimers Deep. Vessels will berth port side alongside at a time dependent on tidal range.

(ii) Vessels of 145 m. length overall or less, bound for the Eastern Jetty may approach the Terminal via the Eastern or Western Channel of Mortimer's Deep. Those vessels approaching from the East will berth starboard side alongside on the ebb tide, whilst vessels approaching from the West berth port side alongside on the flood tide. Berthing times are dependent on tidal range.

(iii) All vessels departing from the Terminal shall do so through the Eastern Channel from Mortimers Deep.

Vessels berthed starboard side to the Eastern Jetty are required to turn off the berth when departing.

Also see "Regulations".

ANCHORAGE: Vessels requiring anchorage in the Forth Estuary (ot than in emergency) should apply to the Forth Navigation Serv (Harbour Master) for direction to a designated anchorage.

MAX. SIZE: Western Jetty: Depth 15.0 m. Eastern Jetty: Depth 10.0

Eastern exit channel bar depth (Hawkcraig Point leading line) – le depth by sounding 9.5 m., swept depth 8.5 m. below chart datum.

HEALTH: See "Health – All Ports" before first U.K. Port.

RADIO: *Pre-arrival information:*

Masters must send ETAs at least 72 hours in advance of arrival a thereafter advise of any variation of more than 12 hours.

Confirmation ETA should be sent at least 24 hours in advance arrival and thereafter advise of any variation of more than 4 hours. (Wh voyage duration is less than 72 hours, Masters should send ETA soon as possible.)

A standard pre-arrival message will be sent to each gas car requesting the following information/confirmation. A similar messa excluding items (l) to (s) will be sent to Natural Gasoline Tankers.

(a) Advise any defect in your vessel or equipment that may af cargo operations or manoeuvrability.

(b) Confirm vessel has full P & I Club cover.

(c) Confirm (if fitted) that Bow (and/or) Stern Thrusters a operational and fully submerged.

(d) Last port of call.

(e) Last 3 cargoes. Last: 2nd Last: 3rd Last:

(f) Amount and grades of any cargo required.

(g) Anticipated maximum loading rate and the arrival tank bot temperature.

(h) Anticipated loading time

(i) Arrival drafts.

(j) Sailing drafts.

(k) Confirm that only clean segregated ballast will be discharged the Terminal.

(l) Confirm that remotely-operated valves have been opera through a complete open/closed cycle to ensure pro functioning and ascertain valve type (Ball, Gate, etc.) and ac valve closing time.

N.B. *Remote valves must close within 30 seconds operation but so that the final 20% of valve movem takes at least 6 seconds.*

(m) Gas detection system is operational and set (high or low sensor Calibrated for the cargo to be loaded.

(n) Cargo transfer emergency stops tested from all locations ensure correct operations of valves, alarms and interlocks.

(o) Ensure operation of the Tank high level and pressure alarms a interlocks.

(p) Where adjustable setting safety valves are installed, confirm th are set for the cargo to be loaded.

(q) Confirm fire-fighting equipment including water spray system i operational and tested. Ship's fire main to be pressurised wh alongside at Terminal.

(r) Manifold configuration and presentation (forward to aft), e LVVL. It is most important that the specific duty (Ethyle Propane, etc., liquid or vapour service) of each presenta flange is known to the Terminal at least 24 hours prior to t ship's arrival. Delays consequential on non-compliance with t requirement will be for ship's account.

(s) If loading more than one grade, confirm that both can be loa concurrently.

N.B. *Vapour samples taken on arrival. Masters must ens all tanks have positive pressure.*

(t) For first time callers – Manifold configuration.

(i) Size rating and standard of connecting flanges, e 12 in. ANSI 150/8 in. ANSI 300/6 in. ANSI 300.

(ii) Distance of manifold centre line from bow.

(iii) Height above uppermost continuous deck.

(iv) Distance of manifold from ship's side.

(v) Maximum loaded draft.

(vi) Minimum draft whilst at berth.

(vii) Distance from face to first retaining bracket (maxim acceptable is 1,200 mm.).

(viii) Height of manifold above keel.

(ix) Distance between manifold flange centres.

(u) Details of *any defects in vessel or equipment* affecting ca operations or manoeuvrability or confirmation that there are known defects.

(v) Slip tubes must not be operated without prior written agreem from the Terminal.

(w) If applicable, confirm that the minimum mooring deploymen be as the mooring analysis information supplied by the Term

(x) To allow the Terminal to monitor ships navigational standa within pilotage waters, Masters are required to ensure charts a during pilotage showing courses and position fixing throug the pilotage are available for Terminal inspection until 12 h after berthing.

Note: The foregoing information is required in addition to the arrival information requirements of the Forth Ports PLC – SI 1 Merchant Shipping (Tankers) (EEC Requirement) 1981 refers.

Failure to send this message may result in the vessel being dela outside port limits.

Condensate tankers fitted with Inert Gas systems are to arrive inerted (oxygen content below 8%) ready to load as inerting of ca tanks is not permitted alongside.

Telex: A telex machine is sited at Braefoot Bay. The number is 72 MOSHIP G and is operable 24 hours per day. This telex number sh be used when relaying ETA, pre-arrival or other information relat expected loading. Otherwise messages should be transmitted thr the ship's agent.

FAX: A facsimile machine is also available at Braefoot Bay. The number is 0383-892100.

VHF: "Braefoot Terminal" maintains a listening watch on VHF from at least 3 hours before a vessel's berthing time until clear of port limits on departure on Channel 16 and may work on Channels 10, 12, 15, 44, 48, 69 or 73. (Channel 69 is the normal working Channel for Braefoot Bay Marine Terminal). Vessels at other times may establish need for communication with Braefoot Bay Marine Terminal via Forth Navigation Service or ship's agent.

RADAR: Port and Estuary Radar Service operated by Forth Navigation Service. (See "Leith").

TUGS: Only tugs licensed by the Forth Ports PLC to operate at Braefoot Bay Marine Terminal may do so. Tugs are available, provided 24 hours' notice of requirement is given through the ship's agent to Forth Estuary Towage Ltd.

The Companies reserve the right to suspend berthing/unberthing operations if, in the reasonable opinion of the Braefoot Bay Supervisor, vessels have not obtained adequate tug attendance. Delay costs incurred from such suspension will be for the vessel's own account.

Availability of tugs is assured by Forth Estuary Towage Ltd., provided at least 24 hours' notice of requirements is given in accordance with the agreed ordering and call-out procedures set out in the published Tariff. Tug orders placed through ships' Agents are to Forth Estuary Towage Ltd., Leith. 24 hours' notice of towage requirements is necessary for programming tug commitments and obtaining priority for service. In the event of ship delays within the 24 hours' notice period, cancellation or ETA adjustment for service previously ordered will not be subject to charge, provided that adjustment notice is received during normal working hours and that the tugs have not left their normal berths to attend on the vessel's original order.

The tugs available are as follows:

1×12 tonne bollard pull Voith Schneider.
2×19 tonne bollard pull Voith Schneider.
1×30 tonne bollard pull Voith Schneider.

Minimum Requirements: As a guide to ordering in advance and to avoid delays it is strongly recommended that the following table is regarded as minimum requirements for tug assistance:

East Jetty Towage Requirements:

LPG Carriers:

	Under 4,000 cu.m.	Over 4,000 cu.m. with Bow Thruster	Over 4,000 cu.m.
Berthing	1 × Small (12 tonnes B.P.)	1 × Small (12 tonnes B.P.)	2 × Small (12 tonnes B.P.)
Sailing	1 × Small (12 tonnes B.P.)	1 × Small (12 tonnes B.P.)	2 × Small (12 tonnes B.P.)

Condensate Carriers with Bow Thruster:

	Max. 20,000 S.d.w.t.	Max. 165 m. LOA
Berthing	1×small (12 ton B.P.)	2×medium (38 ton B.P.)
Sailing	1×small (12 ton B.P.)	1×medium (19 ton B.P.)

Condensate Carriers without Bow Thruster:

	Max. 20,000 S.d.w.t.	Max. 165 m. LOA
Berthing	2×small (12 ton B.P.)	2×medium (38 ton B.P.)
Sailing	1×small (12 ton B.P.)	2×medium (28 ton B.P.)

Western Jetty Towage Requirements:

LPG Carriers:

	Under 20,000 cu.m.	20,000 – 40,000 cu.m.	Over 40,000 cu.m.
Berthing	2 × Small (24 tonnes B.P.)	2 × Medium (38 tonnes B.P.)	1 × Large, 2 × Medium (68 tonnes B.P.)
Sailing	2 × Small (24 tonnes B.P.)	2 × Medium (38 tonnes B.P.)	1 × Large, 1 × Medium (49 tonnes B.P.)

All Berthings and Sailings are classed as Full Towage.

Condensate Carriers with Bow Thrusters:

	Under 25,000 cu.m.	Over 25,000 cu.m.
Berthing	1 × Small (12 tonnes B.P.)	2 × Medium (38 tonnes B.P.)
Sailing	1 × Small (12 tonnes B.P.)	1 × Medium (19 tonnes B.P.)

Condensate Carriers without Bow Thruster:

	Under 25,000 cu.m.	Over 25,000 cu.m.
Berthing	2 × Small (12 tonnes B.P.)	2 × Medium (38 tonnes B.P.)
Sailing	1 × Small (12 tonnes B.P.)	1 × Medium (38 tonnes B.P.)

Tugs attending vessels will normally rendezvous with arriving ships North of Inchkeith Island, and also escort departing vessels to Buoy No. 9. Tugs will make fast East of the Oxcars when approaching from the West and Braefoot Buoys No. 1 and 2 when approaching from the East.

At all times that the vessel is alongside the berth, a harbour tug will be in attendance. This tug will be moored at its dedicated buoy 1 mile to the East of the Terminal. In the event of adverse weather with wind speeds above 35 knots, the tug will be called upon to provide assistance as required. A Pilot will also be called to attend the vessel.

Out of hours and in emergency, tugs may be contacted through the Forth Navigation Service Duty Officer on VHF Channel 16, or direct on Channel 71.

Procedure for Stand-by Tug at Braefoot Bay: A minimum of one tug will be in attendance at Braefoot Bay whenever there is a vessel on either jetty. The tug will be moored to a specially laid mooring buoy situated to the South of the Eastern exit channel between Buoys No. 4 and No. 6, maintaining a listening watch on VHF Channel 69. Alternatively in the case of a heavy Easterly swell, the tug may moor to an Admiralty buoy off Dalgety Bay.

Vessels will not berth if forecast winds for the duration of the stay alongside indicates sustained wind speeds of 45 knots or more. If forecast wind speed exceeds 30 knots, then extra moorings, i.e. extra stern lines and forward spring, will be deployed on arrival at the Terminal.

Trigger Points for Action: These are based on a vessel already alongside the Terminal, with action to be taken when the actual sustained wind registered on the jetty wind anemometer or forecast wind as indicated in the following:

Wind Speed:	Action to be taken:
30 knots actual	Tug on stand-by. If additional moorings not deployed at time of mooring, ship will be requested to run out extra moorings as required.
35 knots actual	Tug will be requested to come alongside vessel after loading has stopped. Pilot will be called out.
40 knots actual	Request tug to push "on" vessel. Pilot on board.
50 knots actual	Discuss with Braefoot Bay Supervisor sailing/re-berthing intentions.

Boatmen: Only boatmen licensed by the Forth Ports PLC and approved by the Companies to do so may operate at Braefoot Bay Marine Terminal. Mooring boats will be available provided 24 hours' notice of requirement for berthing and reasonable notice of unberthing is given through ship's agent to the Mooring Contractor.

Pre-ordered mooring boats and mooring crews will be in attendance at the terminal 30 minutes in advance of the arranged berthing/departure time and can be contacted on VHF Channel 69.

Cancellation charges will be levied in the event of less than 3 hours' notice being given for amendments to previously confirmed berthing/sailing arrangements.

MOORING:

(a) All vessels will be subject to a computer mooring analysis to prove the required integrity of the mooring arrangements. This will be carried out by Braefoot Bay Marine Terminal. Every vessel will be required to deploy a minimum of 7 lines at each end.

If a vessel has a cubic capacity of greater than 39,000 cu.m., this analysis must be carried out prior to the vessel being accepted by the Terminal.

If a vessel has a cubic capacity of less than 39,000 cu.m., she may berth prior to the results of the analysis being known. In this interim period, the vessel will be required to deploy 6 head/stern lines, 2 breast lines and 3 springs at her Western extremity and 4 head/stern lines, 2 breast lines and 3 springs at her Eastern extremity.

Once the mooring integrity has been proven by the analysis, the vessel will be supplied with a copy of the required mooring pattern. The vessel will then be required to deploy her moorings as per this analysis. This mooring pattern is only permitted so long as the vessel complies with the lines and leads used in the mooring analysis. If the Master wishes to deviate from the mooring pattern upon which the analysis was carried out, he must first obtain the express permission of the Terminal and the Harbour Master. It must be stressed however, that permission would not normally be granted. Masters may increase the number of moorings to their requirements, over and above those required by the Terminal.

All mooring lines should be in good condition and without splices in their working length. Mooring ropes should be turned up on the bitts in the figure of eight style where possible.

Masters should not hesitate to increase the number of moorings if the weather is forecast to deteriorate.

Mooring wires/ropes must be spooled in the correct direction on the winch drum, ropes made fast on the drum ends backed up on bitts are not acceptable.

(b) Mooring lines used in any particular direction of service (head/stern lines, breast lines, springs) shall be of similar breaking strength, elasticity and material. Under no circumstances will a mixture of wire and synthetic ropes in the same direction of service and to the same dolphin be acceptable, except moorings additional to the requirements of (a) above.

(c) If conditions as in (a) cannot be complied with, the loading arms will not be connected.

(d) Once moored, ship's winches must be secured with the brakes hardened up. Winches must not be left on Automatic Tension.

Winch brakes should be tested as per OCIMF Guidelines and Recommendations, which states that they should be tested individually every two years or after completion of any modification or repair involving the winch brakes, or upon any evidence of premature brake slippage or related malfunctions. The Braefoot Bay Supervisor may ask to see records to confirm that such test have been carried out.

(e) Masters of vessels are responsible for ensuring that:

  (i) their vessels are safely secured in accordance with the preceeding paragraphs.
  (ii) a strict watch is kept on the vessel's moorings and that they are tended as required to prevent slack or overtaut lines and undue movement of the vessel.
  (iii) their vessel's mooring ropes or wires are secured only to the proper fixtures provided for that purpose, additionally fixed moorings are correctly wound onto the winch drums.
  (iv) sufficient persons are on duty to attend moorings whilst vessel is alongside.

(f) Whilst not removing the responsibility from the Master of ensuring that his vessel is securely moored, regular checks on moorings will be undertaken by the Braefoot Bay Supervisor, accompanied by a Ship's Officer.

(g) Failure of vessels to adequately tend to moorings will be considered as a breach of the Jetty Regulations.

BERTHING: *Pre-Operations Meeting and Inspection:*

Before any ship operations commence, a meeting will take place between the Braefoot Terminal Supervisor and the Ship's Master (or his authorised deputy). They will:

(a) Complete/carry out the ship/shore Safety Check Lists and Safety Inspection in accordance with the O.C.I.M.F. Standards.

(b) Discuss any deficiencies shown up by (a) above and agree any additional precautions required. The terminal reserves the right to refuse to load or discharge a vessel if the required standards are not met.

(c) Complete a loading/discharge plan that includes:

Connecting/disconnecting procedures
Quantities and grades of cargo to be loaded/discharged
Loading/discharge rates (See "Loading" – Pressure Surges)
Deballasting procedure (See "Ballast")
Vapour return procedure
Cargo line cooldown procedures.
Maximum permitted pressure at ship's rail
Location of Emergency Stop Buttons/use of Shore ESD Pendant.
Ensure that ship has on board data sheets for product being handled
Emergency Procedures (See "Safety").
Assigned smoking areas.
Static precautions.

(d) Check the previous cargo record (last 3 cargoes) and agree that ships' tanks are ready to receive product.

The Companies reserve the right to:

(i) Sample and analyse the condition of ships' tanks or quality of cargo and ballast tanks before commencing to load or discharge.
(ii) Instruct a third party independent surveyor for the sampling and measurement of cargo and/or tanks, the costs of which will be for the account of the Jetty Operating Company.
(iii) Place approved portable equipment on board as required for sampling, testing or communication purposes during loading/discharging operations.
(iv) Refuse to load product and/or accept return vapour when ships' tanks are not within specification for product to be loaded.

(e) The Master shall certify that, in accordance with the cargo plan of operation that has been tabled and discussed, the stress on the vessel's hull will not exceed tha maximum permissible level by the Classification Society and that she will have adequate stability throughout to leave the berth at any time.

BERTHING FACILITIES:

Western Jetty:

Jetty Operating Company: Shell U.K. Exploration and Production.

Manifold Limitations:

LPG/GASOLINE 12 in. 150 ASA flanged presentation arms:

Manifold flange set back from Ship side (m.)	*Manifold height above waterline* *Maximum* (m.)	*Minimum* (m.)
9.6 – 3.0	19.65	5.15
2.7	13.00	5.15
2.0	8.00	5.15

For multiple 12 in. arm connections, centre-to-centre distances for adjacent connections are minimum 1.3 m. and maximum 3.0 m.

For connection to 8 in. flange manifold, maximum allowable manifold height above waterline is 12.8 m.

LPG 8 in. 300 ASA flanged presentation arms:

Manifold flange set back from Ship side (m.)	*Manifold height above waterline* *Maximum* (m.)	*Minimum* (m.)
8.6 – 2.0	11.15	1.95

For connection of 2×8 in. arms, centre-to-centre distances for adjacent connections are minimum 0.75 m: and maximum 2.5 m.

N.B. For connection to any arm: Distance between ship's outboard presentation flange and the ship's first manifold piping restraining bracket must not exceed 1,200 mm. to prevent cantilever overstressing of ship's manifold pipework.

Berth Limitations: Maximum LOA 210 m., vessels over 39,000 cu.m. must have had a satisfactory Mooring Analysis carried out by Braefoot Bay Marine Terminal before being accepted as suitable for loading.

Minimum acceptable dimensions are: From mid-point of manifold to bow – 50 m.; from mid-point of manifold to stern – 60 m., providing that adequate moorings can be deployed and the vessel can comply to OCIMF mooring standards.

Product Loading and Vapour Return Facilities: Marine loading arms are capable of liquid or vapour service. Arrangement of loading arms is as follows when viewed from seaward:

West <———> East

Arm No.	7	4	3	2	1	6	5
Size (in.)	8	12	12	12	12	8	8
ASA	150	150	150	150	150	300	300
Duty	Unused	Butane or Gasoline	Butane or Gasoline	Propane	Propane	Butane or Propane	Butane or Propane

Only one loading arm can be designated for liquid duty for each product loaded. Provided vessel's manifold arrangement is suitable, propane and butane may be loaded simultaneously using 12-in. loading arms. For LPG loading, 2 arms will be connected for each product, one for liquid duty and the other for vapour return.

The following loading rates are available:

LPG via 12 in. arm	3,000 cu.m./hr.
LPG via 8 in. arm	1,100 cu.m./hr.
Gasoline via 12 in. arm	2,000 cu.m./hr.

LPG Loading: Product will be delivered to ships in a fully refrigerated state, i.e. Propane −42°C and Butane −4°C.

The operating company, at its sole discretion, will accept vapour return to storage, always subject to quality being acceptable to the company. Vapour samples will be taken from ship's tanks on arrival. Masters must be sure of positive pressure, and provided the following specificatio not exceeded, then vapour return to storage will normally be autho

(i) 0.3% vol. oxygen
(ii) 0.5% vol. non-condensable gas
(iii) 0.5% vol. propylene
(iv) 0.1% vol. butadiene
(v) 1.0% vol. nitrogen
(vi) 10 ppm ammonia
(vii) 10 ppm VCM
(viii) 5 ppm water vapour
(ix) 1 ppm H_2S
(x) 50 ppm methanol
(xi) 100 ppm acetone

Acceptance for vapour return to storage does not imply ship's ta are suitable for loading from a commercial cargo contamination p of view.

In an emergency or in exceptional circumstances, the use of the sh vapour system to the flare will be permitted to prevent possible ven of cargo vapours to atmosphere. Under no circumstances may the sh vapour system be used if the oxygen content of the vapour conta within the ship's tanks exceeds 4% volume.

Eastern Jetty:

Jetty Operating Company: Exxon Chemical Olefins Incorporated.

Manifold Limitations:

Ethylene 6 in. 300 ASA flanged presentation arms:

	Max. (m.)	*Min.* (m.)
Manifold height above waterline	11.2	2.75
Manifold set back from ship side	4.6	0.85

For connection of 2 arms, the minimum centre-to-centre adjac connection distance is 0.75 m. and the maximum distance is 1.5 m

Ethylene: Vapour return arm will be connected before loading operat commence to enable vessels to return vapour to storage tanks or fl Vapour return may go to flare, always provided the oxygen conten such vapour to flare does not exceed 2.0% by volume maximum may be established under the pre-operations meeting/inspection.

Exxon Chemical Olefins Inc., at its sole discretion, may accept vap return to storage, always subject to the quality being acceptable to Ex Chemical Olefins Inc. and provided that the last cargo was Ethylene that the vessel has been purged with Ethylene vapour to the satisfac of Exxon Chemical Olefins Inc.

Specification for ship's vapour for return to Shore Storage Tanks:

(i)	Ethylene	99.90 min. Mo
(ii)	Methane and Ethane	1,000 max. Mol
(iii)	Ethane	500 max. Mol
(iv)	Hydrogen	10 max. Mol
(v)	Propylene and Heavy Hydrocarbons	10 max. Mol
(vi)	Acetylene	5 max. Mol
(vii)	Carbon Monoxide	2 max. Mol
(viii)	Carbon Dioxide	5 max. Mol
(ix)	Oxygen	5 max. Mol
(x)	Sulphur	2 max. Mol
(xi)	Ammonia	1 max. Vol
(xii)	Nitrogen	100 max. Vol
(xiii)	Water	10 max. Wt
(xiv)	Solvents	10 max. Vol
(xv)	Oil	Negligible Vol

However, Exxon at its sole discretion may accept vapour return any vessel to shore storage provided that the quality of such va return is acceptable to Exxon. When appropriate, ships returning va to shore storage will be automatically credited for such returns.

Ethylene Loading/Vapour return rates available to ships are, via loading arms, upto 460 cu.m./hr.

Note: Ethylene is delivered to ships in fully refrigerated state, approximately −101°C.

There are no cargo heating facilities at this Terminal.

Gasoline: 1×10 in. 300 ASA flanged presentation arm with a piggyb 6 in. vapour return line suitable for loading gasoline (C5) Pyegas (C5+).

5 Shore supplied spool pieces are available as follows:

10 in. × 300 ASA – 12 in. 150 ASA
10 in. × 300 ASA – 10 in. 150 ASA
10 in. × 300 ASA – 8 in. 150 ASA
10 in. × 300 ASA – 6 in. 150 ASA
10 in. × 300 ASA – 4 in. 150 ASA

	Max.	Min.
Manifold height above waterline	16.5 m.	1.45 m
Manifold set back from ship side	4.6 m.	0.85 m

Maximum loading rate for Gasoline 2,000 cu.m./hr.
Maximum loading rate for Pyegas 1,100 cu.m./hr.

LOADING:

Marine Loading Arms: All products are delivered to ships via ma loading 'hard arm' units which are individually fitted with Emerg Release Systems (ERS).

The emergency release systems consist of 2 ball valves located a the presentation flange. Only after closure of the ball valves, wi hydraulic clamp between the ball valves open, leaving one ball v closing off the ship's manifold and the other closing off the loading The loading arm then returns to a position clear of the vessels's ma

On hearing 'ERS' alarm (an audible oscillating tone accompan a flashing red beacon) all staff should vacate the vicinity of the ma loading-arms. The emergency release system will be manually ini from onshore or AUTOMATICALLY in the case of over extension o loading arms, e.g. if ship drifting outside the loading arm envelop

Pressure Surge Precautions: Non-routine closing of the lo systems, automatic intervention or 'fail-safe' closure of ship Emergency Shut Down (ESD) valves can generate dangerous s pressures. A careful check of ship's ESD system will be made pr loading. The Master (or his deputy) will be asked to operate the s to enable timing of the valves and may be requested to have adjusted according to the provisions of the IMO Codes for Ships Carrying Liquified Gases in Bulk. The Terminal Operating Companies reserve the right to restrict loading rates if valve closure times are not compatible with rates otherwise agreed. Excess loading times caused by such a restriction will be charged to the ship if port time/lay time is exceeded.

The shore system is designed to withstand the high surge pressures which can be generated and safe emergency shut down will be accomplished by using the shore ESD pendant control provided to vessels.

In the event of an emergency the pendant 'ESD' must be activated, which will immediately result in:

1. On shore loading valves closure.
2. The stoppage of cargo flow.

Only Then may the Vessel Manually Activate its Own ESD. Ships Must Never Close Valves Against the Shore Loading Pumps

Masters are referred to ICS Safety Guide (Liquified Gas) paras, 1.8.2 and 4.5.2 and the International Safety Guide for Oil Tankers and Terminals paragraphs 6.5.5, 7.3 and 7.6.8 and Appendixes A and B.

Operational Procedures: The Loading/Discharge Plan and operation must comply with the following procedures:

(a) The Company will be responsible for connecting/disconnecting loading arms/hoses to the agreed ship's presentation flanges as indicated by the responsible ship's officer. In the event that the vessel does not have the appropriate reducer, a shore reducer may be available. The Terminal must be advised in the pre-arrival message of this requirement. The fitting and removal of the reducer is the responsibility of the ship. The Master must take adequate precautions to ensure the safety of Company workers and ensure that, where necessary, suitable guard rails are provided.

(b) The Loading Arms are normally purged and remain under Nitrogen between loading operations. Vessels must, therefore, be prepared to receive a small volume of Nitrogen vapour at the commencement of loading operations. (0.5 cu.m. at the Eastern Jetty, 10 cu.m. at the Western Jetty.)

The terminal staff will pressurise the loading arm with Nitrogen against the ship's manifold valve and the loading arm connection will be tested for leaks. When manifold has been proven 'tight' the loading arm will be depressurised and transfer commenced at the agreed starting rate.

(c) The responsible terminal representative and ship's officer will agree that systems are correctly lined up before transfer operations begin.

Loading must be commenced slowly to avoid rapid pressure build up. When liquid flow is established the terminal will increase rate as requested by the ship up to the agreed maximum bulk rate.

(d) During transfer operations, ship will confirm with the shore at intervals not exceeding 1 hour that they are in agreement with the quantity of product actually transferred and the quantity/time estimated to complete the operation.

(e) EXCEPT IN EMERGENCY VENTING OF LPG OR ETHYLENE VAPOURS TO ATMOSPHERE IS PROHIBITED AT BRAEFOOT BAY. All such displaced vapour must be reliquified on board by ship's systems and/or returned to shore via the vapour line

During loading of liquified gas carriers, the Jetty Operator must be advised of and log the ship's tank pressure every half hour if the vessel is retaining vapours on board, and every hour if vapours are being sent to shore or at the discretion of the Braefoot Bay Supervisor.

In all cases, the LPG vapour return line will be connected and available for pressure relief.

Displaced Natural Gasoline vapour shall only be vented to atmosphere as prescribed in the International Safety Guide for Oil Tankers and Terminals, Sections 3.3.2, 6.2.3 and 7.6.3. Closed loading procedure to be adopted at all times.

(f) During transfer operations:
  (i) An Operator/Technician will remain on the jetty at all times whilst the vessel is alongside.
  (ii) A responsible English speaking ship's officer equipped with an approved portable UHF radio tuned to the agreed ship/shore communication channel shall be on duty at all times.
  A portable radio will be provided on loan from the Terminal.
  (iii) A responsible member of the ship's crew capable of understanding and relaying the Jetty Operator/Technician's communications to the Responsible Ship's Officer shall be stationed on deck so that he can:
    (a) observe the manifold connections
    (b) observe the gangway
    (c) exchange visual/vocal signals with the Jetty Operator/Technician.
    (d) keep a visual check on moorings.
  (iv) The ship must inform the terminal and the terminal must advise the ship of any deviation from the agreed Loading/Discharge Plan.

(g) At least 5 minutes' notice must be given of transfer rate changes being required, and at least 15 minutes' notice for final completion of loading, except in emergency when the requirements of "Pressure Surge Precautions" (see above) must be observed.

(h) If for any reason there is an unusual evolution or accumulation of gas, loading shall be stopped or the loading rate into a particular tank reduced at the discretion of either the Terminal Supervision or responsible Ship's Officer.

(i) The vessel must by day fly Flag 'B' of the International Code, and by night exhibit an all round red light.

(j) Prior to, and on completion of loading/discharging an Operating Company Representative will witness ship's dips/ullages and obtain from the Master the quantity loaded according to ship's figures.

(k) Operations shall be stopped during electrical storms in the vicinity of the ship and all cargo valves shall be closed.

(l) During periods of high winds and/or on the instruction of either the Harbour Master or Braefoot Bay Supervisor, operations shall be stopped and the loading arms disconnected in accordance with tables (tables are in "Jetty Regulations and Information", supplied to vessel).

(m) At suitable intervals (not exceeding 4 hours) with regard to the estimated duration of cargo transfer, the responsible Terminal Representative and Ship's Officer will carry out a repetitive check and confirm that:

The Safety Check List remains valid
Operational procedures are satisfactory
Jetty Regulations are not being contravened.

BALLAST: *Avoidance of Pollution:*

(a) No oil or mixture containing oil shall be discharged or allowed to escape from a vessel while at the terminal, the approaches or in the River and Firth of Forth.

No garbage, or other materials, either liquid or solid shall be discharged overboard from a vessel, but shall be retained in suitable receptacles on board or arrangements made for disposal ashore.

(b) Discharge overboard of the clean ballast contained in the cargo tanks of clean petroleum product tankers is permitted, but only after inspection has been carried out by the Terminal Supervisor, who shall also obtain the approval of the Harbour Master prior to commencement of such ballast discharge. Discharge of clean segregated ballast water overboard is permitted subject to approval and/or inspection by the Terminal Supervisor.

The Forth Ports Authority Harbour Master will be informed if inspection either before or during discharge shows ballast water is contaminated and such discharge shall immediately cease.

Except as herein specified, all ballast water other than that contained in segregated ballast tanks shall be retained on board.

DIRTY BALLAST CANNOT BE DISCHARGED AT THIS TERMINAL

(c) By arrangement with the Terminal Supervisor oily residues and bilge slops may be discharged ashore via flexible hose provided that such discharge is not concurrent with product transfer via hard arms and that delays so incurred are for ship's own account if port time/laytime is exceeded.

The onshore oily slops reception tank has a limited handling capacity and in no case will slops quantities in excess of 100 tonnes be accepted from any one vessel. Slops transfer to this facility for ships at the Eastern Jetty is via a 20 cu.m. holding tank and transfer rates limited to 5 tonnes per hour.

(d) Prior to Oil (including Natural Gasoline) or slops transfer the Anti-Pollution Check List must be completed and no leakage or spillage shall be swept or allowed to leak overboard. Swabs or sawdust used for mopping up spillages must be brought ashore for destruction.

Any leakage or spillage must be reported immediately to the Terminal Supervisor and operations suspended until the leakage or spillage has been cleaned up to the satisfaction of the Terminal Supervisor and the Harbour Master. The Terminal Supervisor may mobilise resources to assist in the containment and cleaning of pollution caused by a ship, without the authority of the Master but in such action he shall be considered to be acting on behalf of the Master and with his approval.

It is statutory requirement that any pollution be immediately reported to the Harbour Master.

MEDICAL: Doctors and Hospitals in Kirkcaldy and Inverkeithing.

DENSITY: 1015 – 1025 (depending on rainfall).

FRESH WATER: Potable fresh water is normally available from hydrants at each jetty. Ships requiring water are responsible for supplying and connecting their own hoses to the jetty hydrant as indicated available by the Jetty Operator. Shore technicians will start and stop potable water on West Jetty at ship request.

FUEL: Supply of Bunker Fuel Oil is not possible from the jetties, however, bunkering arrangements can be made at anchorage or, if suitable, from Grangemouth.

CONSULS: See "Leith".

REPAIRS/DRY DOCKS: See "Grangemouth".

AIRPORT: Edinburgh Airport 20 miles.

POLICE/AMBULANCE/FIRE: Control have a direct line.

TELEPHONES: A public telephone is located at the jetty trestleway root. This telephone will only accept phone cards, a supply of which can be purchased from the ship's agent.

Smoking is expressly prohibited in the telephone kiosk, infringements by individuals of this regulation will necessitate withdrawal of the facility.

A public card-operated payphone is located in the Security Gatehouse at the main entrance. There is also a metered telephone available at the Gatehouse for use at the Master's discretion, all charges being authorised by the Master for payment by ship's agent.

STORING: *General cargo, bunkering and stores handling:*

(a) Handling of general cargo is not permitted at the Terminal.

(b) Bunker services are not available to ships ex-jetty.

(c) The handling of ship's stores may be permitted during cargo operations provided the Terminal is given prior notice of the requirement. On arrival, the Braefoot Bay Supervisor and Master will agree the timing for taking stores and any special precautions required, subject to the following:

  (i) the cargo operations remain adequately supervised.
  (ii) any cargo operation which may allow vapours to escape on deck should be stopped whilst stores are being handled, e.g. sampling or disconnection of loading arms.

(d) Flammable or dangerous goods in drums or other containers, liquified gas in cylinders, drums of oil or paint, steel plates and any other heavy metal parts shall not be handled during:

  (i) loading or transfer of LPG, Ethylene or Natural Gasoline.
  (ii) gas-freeing, purging or tank cleaning.
  (iii) whenever loading arms are connected.

(e) Stores items contained within section (d) should not be landed directly onto a vessel's steel deck. Rubber or suitable matting should be used to prevent possible spark generation. At no time may drums or gas cylinders be rolled along the deck or jetty.

(f) The jetty cranes are for hose-handling and other jetty purposes. They may only be operated by Terminal staff and may only assist in loading items of ship's stores, provided that Terminal staff are available to operate a crane without detriment to their other duties.

(g) Under no circumstances will stores delivery vehicles be allowed on the jetty head or approach beyond the designated points for setting down ship's stores. One vehicle at a time is permitted to visit a vessel. Other vehicles scheduled to deliver stores must queue outside the main gate until given permission to enter. All delivery vehicles are to be parked as directed by Terminal staff, such that access for the Emergency Services is not obstructed.

(h) The size and weight of ship's stores delivered by road vehicle are to be such that they can always be physically manhandled and carted between set-down point and ship by delivery staff or ship's crew. Larger deliveries of stores and heavy items of equipment may be loaded from a barge by arrangement with agents and subject to Regulation 15.

(i) Delays due to storing are for vessel's account where lay/port time is exceeded.

GARBAGE DISPOSAL: The terminal provides facilities for the reception and disposal of ship's garbage. Under SI.1988 No.2293, "Garbage" is defined as all kinds of victual, domestic and operational waste, excluding fresh fish and parts thereof, generated during the normal operation of the ship and liable to be disposed of continuously or periodically, except sewage originating from ships.

To comply with the regulations, the following arrangements have been made:

(a) 6 Eurobins (capacity 1.1 cu.m.) are positioned at the jetty root for the disposal of double bagged and tied food waste. Additionally one mini-skip has been placed with the above disposal of solid waste, e.g. general rubbish but *not food waste*.

(b) All garbage must be double-bagged and sealed. A stock of heavy-duty plastic bags and ties are held and issued on request to vessels requiring to land garbage.

(c) After berthing, vessel confirms request to land garbage by completing relevant section in Ship/Shore Check List. All garbage must be sealed and labelled as to their contents. No leaking or open bags will be acceptable and cost of cleaning shore facilities in the event of spillage will be passed on to vessel. Garbage bags must not be thrown from the ship onto the jetty. They must be either hand-carried or the shore crane utilised before loading arms are connected or after loading arms are disconnected.

(d) Ship's crew must collect the Eurobins from the jetty root area and return them there after completion of landing garbage. The bins should not be filled to such extent that the covers will not close.

(e) The Eurobins are mounted on wheels for easy transportation.

WASTE OIL DISPOSAL: The terminal regulations state that:

(a) No oil or mixture containing oil shall be discharged or allowed to escape from a vessel while at the Terminal, the approaches or in the River and Firth of Forth.

No garbage or other materials, either liquid or solid, shall be discharged overboard from a vessel, but shall be retained in suitable receptacles on board or arrrangements made for disposal ashore.

(b) Discharge of clean, segregated ballast water overboard is permitted subject to approval and/or inspection by the Terminal Supervisor.

The Forth Ports Authority Harbour Master will be informed if inspection, either before or during discharge, shows ballast water is contaminated and such discharge shall immediately cease.

All ballast water other than that contained in segregated ballast tanks shall be retained on board.

(c) By arrangement with the Terminal Supervisor, oily residues and bilge slops may be discharged ashore provided that such discharge is not concurrent with product transfer and that delays so incurred are for ship's account if port time/lay time is exceeded.

(d) Prior to oil (including natural gasoline) or slops transfer, the anti-pollution Check List must be completed and no leakage or spillage shall be swept or allowed to leak overboard. Swabs or sawdust used for mopping up spillages must be brought ashore for destruction.

(e) Vessels are prohibited from the internal transfer of oil whilst alongside.

(f) Dirty ballast cannot be discharged at this Terminal.

Any leakage or spillage must be reported immediately to the Terminal Supervisor and operations suspended until the leakage has been cleaned up to his satisfaction and that of the Harbour Master. The Terminal Supervisor may mobilise resources to assist in the containment and cleaning of pollution caused by a ship without the authority of the Master, but in such action he shall be considered to be acting on behalf of the Master and with his approval.

It is a statutory requirement that any pollution be immediately reported to the Harbour Master.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

SAFETY: *Emergency Signals:*

(a) Fire and onshore emergency alarm.
  1. At the Western Jetty: Intermittent siren.
  2. At the Eastern Jetty: Continuous sound for 30 seconds.

In the event of siren failure alarm will be sounded by air horns.

(b) Onshore emergency (other than fire).
  1. At the Western Jetty: Air Horns.
  2. At the Eastern Jetty: Continuous warble for 30 seconds.

(c) Shipboard emergency (or reported from ship): At least 6 blasts, each of not less than 10 seconds duration.

NOTE: Onshore, alarm may be raised by activating one of the "Break Glass" fire alarms situated at numerous points throughout the terminal – this will also automatically activate the jetty spray systems.

Actions in Event of Emergency:

Ashore: Sound alarm signal.
Terminal staff will communicate with you via:
1. The UHF portable radio (supplied on arrival).
2. The jetty operator.
3. The jetty loudspeaker system.
4. The Marine VHF Channel 16.

In any emergency, terminal staff will shut down loading operatio may activate fixed water spray system and implement the Term Emergency Plan as appropriate to the incident:

Aboard: Sound alarm signal.
Inform terminal by communications systems as listed abov
You must be prepared to:
1. Cease all cargo operations.
2. Close all cargo valves.
3. Disconnect ship to shore pipelines (shore hard loading a may be emergency disconnected by terminal staff).
4. Move your ship (engines to immediate readiness) subjec the overriding control of the Harbour Master.

Emergency Towing Wires: Emergency towing wires of adequ strength and condition must be positioned on both the offshore bow a quarter of the ship with the towing eyes maintained just above wa level.

They must be properly made fast on the ship's bollards while hav sufficient slack flaked out on deck for effective towing, the slack be secured from running free by rope yarns or other easily broken mea

Emergency Precautions: In order to meet emergencies ships must

(a) Retain sufficient suitable crew members on board at all times man emergency services and to move the ship if so directed by Term or Port Authority personnel.

(b) Have adequate emergency equipment and fire fight appliances, including main emergency fire pumps, ready for immed use. Fire main to be pressurised *before berthing* and for the durat of berth occupancy. The appliances will include at least:

(i) Two fire hoses, fitted with jet/spray nozzles, uncoiled a connected to the fire main on the main deck.
(ii) Portable fire extinguishers, of the dry chemical ty conveniently placed near the ship's fire manifold.
(iii) An International Ship/Shore Connection available and clea *signposted* at an agreed position on the ship's fire main ready connection to the shore main.
(iv) Where a vessel is equipped with a fixed dry powder syst hoses should be run out and control boxes open for access
(v) The ship's offshore lifeboat shall be rigged ready for lowe and use as an emergency escape.
(vi) A pilot ladder or accommodation ladder shall be rigged positioned on the outboard side of the vessel ready immediate lowering as a means of escape in the event of emergency.

In the event of an emergency, the Master must proceed as agree the "Pre-Operations Meeting and Inspection".

State of Readiness and Engine Immobilisation:

(a) The ship must be able to move under its own power at sh notice.

(b) Repairs or other work which may immobilise the vessel are allowed. If unavoidable breakdown occurs, then repairs may be allow alongside provided approval is given in writing by the Braefoot B Supervisor who shall also obtain the Harbour Master's agreement a is conditional on the Master hiring sufficient standby tugs to move vessel if so required.

(c) Should immobilisation as in (b) above occur, the respective j Operating Companies reserve the right to order tug or tugs as ab on the Master's behalf.

(d) *Engines are not to be tested whilst hard-arms are connec and/or the gangway is on deck.*

Vehicle and Personnel Access and Security:

(a) Only authorised persons or those with entry permits issued the Terminal Management will be allowed through the terminal secu gates.

Ship's personnel must have a temporary pass for clearance with security guard at the entrance gate.

Masters will be provided with a supply of suitable pass envelope the Braefoot Bay Supervisor. The Master or ship's Agent is require furnish a list of chandlers, services, new crew members and author visitors expected during the ship's stay at the terminal. Ship's agen required to provide Security staff with a crew list as soon as poss after berthing.

Persons who have not been authorised or notified as above wi refused entry to the terminal until the Security Guard has been g clearance from the Braefoot Bay Supervisor.

(b) As pedestrians (other than plant employees and author personnel) are not allowed passage through the terminal, transpo the main gate will be provided by Security staff on request from the root (Western Jetty) or the safety boat landing (Eastern Jetty), by ca "Braefoot Control" on the radios provided.

(c) Visiting vehicles are not normally allowed beyond the gateho parking area and must not proceed onto the jetty trestleways wi the express permission of the Braefoot Bay Supervisor. No vehicle proceed past any "NO ENTRY" sign indicating that Class A petro is being handled or that petroleum vapour may be present.

Vehicles and their contents which are permitted to enter the Ma Terminal do so at the owners' risk and drivers must obey all traffic s plant traffic regulations, or directions given by Terminal Staff. S vehicles shall not be parked in position obstructing fire hydr roadside alarms or other traffic. If parked, keys will be left in ign the ignition switched off and the doors unlocked. If required unattended vehicle may be moved by Terminal Staff.

(d) In the interests of Safety and Security any vehicle or pe entering or leaving the terminal is liable to be searched for contr material or unauthorised persons. Acceptance of this requiremen condition of entry. Persons who appear to be under the influen alcohol or drugs will not be allowed access to or from ships a terminal unless escorted by a responsible Ship's Officer.

Personnel Access to/from Ships:

(a) When available, access between jetty and vessel will be provided by the Company by means of a gangway tower structure. The operation of such gangway will be the responsibility of the jetty Operating Company, but Masters shall ensure that personnel can safely transfer between the ship's main deck and the gangway. When, for any reason, the gangway tower is not available, Masters of vessels shall provide a means of safe access between jetty and ship, which shall when necessary include an upper platform and bulwark ladder to provide safe access to the ship's deck. The means of access shall be provided with stanchions, guard ropes, securing lines and safety netting, shall be adequately illuminated and shall be maintained in a clean and well tended condition.

A lifebuoy with at least 25 m. of lifeline attached shall be positioned on the vessel near the gangway.

(b) No person other than H.M. Customs and Excise, Port Health Authorities, Pilots or other H.M. Customs Authorised personnel is allowed to board or disembark from a vessel berthing at the Marine Terminal from a foreign port until Clearance and the Master's permission has been obtained.

(c) Boarding and disembarking shall be by gangway only except in emergency.

Scuppers and Drip Trays: During transfer of gasoline and slops, deck scuppers and drain holes must be suitably plugged and accumulated water drained off as required. Scuppers should otherwise remain open during LPG loading operations.

Drip trays must be placed under connections and likewise drained of accumulated water.

Prior to transfer of any oil product the ANTI-POLLUTION CHECK LIST MUST BE COMPLETED.

Portable R/T Sets, Hand Lamps and Electrical Equipment: Portable R/T sets, lamps and hand lamps, electric or otherwise shall not be used unless of an approved type (e.g. B.A.S.E.E.F.A.).

The use of portable electric lamps and equipment on wandering electric cables is prohibited in any cargo or adjacent ballast space, pumproom, compressor room, cofferdam, bunker compartment, hold or anywhere over the cargo tanks.

Portable domestic radios, photographic flash equipment, electronic calculators, tape recorders or any other battery powered equipment of non-approved type shall not be used on the main deck nor in any other place where petroleum gases may be encountered. Mobile telephones may be transported through the Terminal to the ship for use in an approved area providing all battery power is disconnected and transported separately during the transit.

Ship's Radio and Radar Equipment: Except for VHF and UHF communications (with radiated power of 1 watt or less), ship's main radio station, including emergency transmitters, shall not be used while the ship is within 400 m. of the Terminal. While berthed at the Terminal, the transmitting aerials shall be disconnected and earthed.

It is *prohibited* to operate ship-borne radar having a *peak pulse in excess of 60 kW.* within the following distances of the Terminal:

1. Radar operating below 2 GHz – 400 metres.
2. Radar operating above 2 GHz – 200 metres.

The preceding prohibitions and restrictions do not preclude the testing of a vessel's normal communications transmitter operating on a frequency between 415 kHz and 26 kHz or ship-borne radar with a peak pulse power exceeding 60 kW in the area of the Terminal, providing the vessel's associated electrical equipment does not present a source of ignition, *and that the express permission of the Harbour Master and Marine Superintendent have been obtained prior to testing.*

Repair Work: Repair work involving either hot or cold work or the use of naked lights is prohibited unless the permission of the Braefoot Bay Supervisor has been requested and granted in writing and the conditions and precautions required by the Braefoot Bay Supervisor are rigidly observed.

Repair work includes but is not restricted to boiler tube clearing, chipping and scraping, hull painting, testing or servicing of electrical equipment (including radar and radio installations).

If permission is granted a list of shore workmen employed on the vessel must be given to the Braefoot Bay Supervisor before work commences.

(The Harbour Master's permission is also required in the case of hot work and certain repair work including test transmissions of radio or radar equipment.)

Tank Cleaning/Gas Freeing: Tank cleaning, inerting, purging or gas freeing *may not* be carried out at this terminal. In unavoidable and exceptional cases, and then under specific circumstances, approval in writing may be granted in advance or under a repair work permit as in "Repair Work" above.

Movements of Tugs and Other Craft: During berthing, unberthing and cargo handling operations no vessel or small craft shall be allowed alongside the vessel unless authorised by the Braefoot Bay Supervisor and agreed by the Master.

When tugs or authorised craft are alongside or assisting a vessel, all cargo system openings must be closed unless tanks are gas free.

GENERAL:

Forth Ports Authority/Dockyard Port of Rosyth: The Forth Ports PLC is the controlling body for the waters of the Firth of Forth in conjunction with the Ministry of Defence through the Queen's Harbour Master, Rosyth.

The Rules as to Navigating in the dockyard port of Rosyth are published under the Dockyard Port of Rosyth Order 1975 and are summarised as a note to the "River of Firth of Forth Byelaws". As general information, the Rules impose a speed limit of 12 knots on vessels exceeding 120 m. in length and 15 knots on vessels less than 120 m. in length.

The Rules also detail the signals for prohibition of movement in the "Protected Channel" (being approximately the Main Fairway in a Westerly direction from Buoy No. 13, passing South of Inchcolm Island) to Rosyth Dockyard and the signals (3 red lights in a vertical line or black cylinder by day) denoting one of Her Majesty's vessels underway, and from which, other vessels shall keep clear (within the Dockyard Port).

Copies of the "River and Firth of Forth Byelaws" and "Directions for Navigation" may be obtained from the Forth Ports PLC, Shipping Agents or on request to the Terminal Supervisor.

Tides: The predicted tides in the Forth Estuary may be significantly affected by weather conditions, e.g. strong winds from N.N.E. through E. to E.S.E., or heavy rainfall.

The range for Spring Tides is 5.0 m., the range for Neap Tides is 2.5 m.

The Highest Astronomical Tide is 6.3 m. The Lowest Astronomical Tide is 0.0 m.

The breasting line of the jetties at Braefoot Bay is 052°/232° and the direction of tidal flow is approximately 260° on the Flood and 066° on the Ebb with maximum rates of 2.6 knots (Springs) and 1.3 knots (Neaps).

Shipping Agents: There are approximately 30 companies operating as shipping agents in the Forth Estuary, therefore Masters are requested to confirm their Agents' name in any direct communication to the Terminal.

Communications:

UHF Radio: The terminal will supply an approved UHF handset radio to the vessel Master or his deputy for use during the loading operation. The radio will be used for contact with the Terminal Staff during normal loading operation and for notification of an emergency condition.

The handset radio must be returned to the Braefoot Bay Supervisor prior to departure.

Acknowledgement of the return of the handset radio will be noted on the vessel's copy of the "Master's Receipt for Shipping Documents".

Normal UHF operations channel is UHF Channel 2. All communications must be directed through *"Shell Control" for vessels on the Western Jetty and through "Exxon Control" for vessels on the Eastern Jetty.*

Klaxon: Each jetty is equipped with air horns for audible alarm of fire, and an oscillating tone siren for imminent E.R.S. activation. One short blast may be sounded if required to gain attention of ship's deck personnel if there is an urgent need for communication.

REGULATIONS: *Rules for the Movement of Tankers using Braefoot LPG Terminal:*

1. Every tanker destined for the terminal shall regulate its approach so as not to arrive before the agreed berthing time.

2. When a tanker is turning from the channel for deep draft vessels into Mortimer's Deep to approach the terminal from S.W., no other vessel shall enter that section of the channel between No. 15 light-buoy and a line joining Hound Point and Hopeward Point; or when turning into Mortimer's Deep to approach the terminal from the East, no other vessel shall enter that section of the channel between Nos. 7 and 11 light-buoys.

3. When any tanker is leaving the terminal it shall do so, except in an emergency, in an Easterly direction.

4. When a tanker having left the terminal is entering the channel for deep draft vessels from Mortimer's Deep in an Easterly direction, no other vessel shall enter that section of the channel between Nos. 7 and 11 lightbuoys. In addition if such a tanker is loaded with liquified gas and is more than 145 m. in length, no other vessel, whether navigating within or without the channel for deep draft vessels, shall approach within 1 mile of the tanker while it is within that section of the channel between No. 13 light buoy and Fairway light buoy at 3° W.

5. When tankers are navigating within or without the channel for deep draft vessels between Fairway light buoy and a line joining Hound Point and Hopeward Point it may be necessary to hold or slow down other vessels. Inward bound vessels may be directed to a holding area North of No. 3 light buoy until an outward bound tanker is sufficiently far downstream.

6. No vessel shall enter Mortimer's Deep when the terminal is occupied or when a tanker is manoeuvring in the area, except that a second tanker may enter and berth when the first tanker is securely berthed.

7. Radio transmissions and the operation of radar are prohibited in the vicinity of the terminal, except that a vessel's normal equipment may be tested provided that a source of ignition is not present and that the Chief Harbour Master's permission has been obtained.

Ship's radar equipment having a peak pulse of less than 60 kW. may be operated for berthing and unberthing and at times when cargo operations are not taking place.

SHIPMASTER'S REPORT: November 1984 (updated 1990).

Vessel called at Braefoot Bay Marine Terminal for the purpose of loading LPG (Butane).

The terminal is operated by Shell Expro and Exxon Chemical Olefins, and is located 3 miles East of the Forth Railway Bridge on the North side of the Firth.

Port Limits: Within the area of the Firth of Forth Navigation Authority.

Documents:

Register and Light dues.
All Safety Certificates.
Derat Certificate.
Health Declaration.
Cargo Documents.
Last Port Clearance or Coastwise Documents.
2 copies C.13 Customs General Declaration.
3 copies C.14 Customs Stores Declaration.
2 copies C.142 Customs Crew Declaration.
6 copies Crew Lists.
2 copies Ship's Stores Lists.

Pilotage: Compulsory in the Firth of Forth. Pilot boards at Fairway Buoy in position 56° 03.5′ N., 03° 00′ W. VHF Channel 16. 24 hours' advance notice required.

Anchorage: Allocated by Forth Navigation Service, usually Aberlady Bay.

Restrictions: Vessels enter Mortimer's Deep from the West, leave to the East, in what is called clockwise navigation.

Therefore berthing is done on the start of the flood, turning off Buoy No. 17, ensuring, especially in a Westerly wind, that the tide has really started to flood.

Sail an hour before high water to cross the bar at about the top of the flood.

The Exxon jetty may, however, allow berthing/entry from the East for smaller vessels.

Max. Size: Shell Jetty 60,000 cu.m. Esso Jetty 12,000 cu.m.

Health: See 'Health – All Ports' before first UK port.

Radio: Wick GKR.

VHF: Forth Navigation Service Channel 71 (working on Channel 20) controls traffic and reporting in points.

Braefoot Terminal: Channels 69 and 73.

Tugs: Channel 69.

Public Channels: Forth Radio Channels 16 and 24.

Radar: Forth Navigation Service locates vessels at Port Limits, and checks identity by VHF.

Ships Radars are to be switched off within 300 m. of the terminal and must not be switched on whilst alongside, except for pre-sailing checks provided loading operations have been completed.

Tugs: Join the vessel off Inchkeith and make fast (tugs lines) before Oxcar. 5 tugs are available, 1×27 tonne, 2×19 tonne and 2×12 tonnes bollard pull. Larger vessels use 3 tugs for berthing (1×27 tonne, 2×19 tonnes) and 2 tugs for sailing (1×27 tonne, 1×19 tonne).

In an emergency tugs take 1.5 hours to reach the vessel.

Berth: Rate of loading Butane, 1,900 cu.m./p.h.

Shore gangway used.

Medical: Good facilities nearby at Dunfermline and Kirkcaldy.

Density: 1025.

Fresh Water: Available ex-mains for nominal fee.

Fuel: M.D.O. available (Max. loading rate 40 cu.m./p.h.), only at the Shell jetty.

Fire Precautions: Normal for LPG – 3 allocated onboard smoking areas.

Consuls: Numerous in Edinburgh. If vessel bound for U.S.A. then Consulate requires 48 hours to visa 2 Crew Lists, thus these should be left behind with the Agent who will arrange for express delivery to the discharge port.

Gangway/Deck Watchmen: Not necessary.

Customs Allowances: Normal U.K. Regulations apply.

Repatriation/Airport: Edinburgh Airport nearby has shuttle flights at one to two hour intervals to London Heathrow.

Time: GMT plus 1 hour (BST) in Summer months.

Police/Ambulance/Fire: Telephone 999.

Emergency Co-ordination Centre: VHF Channel 16, Forth Navigation Service and/or Forth Coastguard.

Telephones: None onboard, Public Pay phone at jetty root.

Storing: Stores have to be manhandled/hand trucked along 200 m. of jetty before lifting onboard with jetty crane. Alternatively they can be delivered by barge, but not concurrent with cargo and liable to weather delays.

Only Diesel engined stores lorries are permitted in the terminal and Ship Chandlers and Laundries should be made well aware of this.

Shore Leave: Permitted, but personnel are not allowed to walk through the installation and so rely very much on the Marine Officer on duty for a lift to the gatehouse.

Identification Cards: Shore passes are issued.

If visitors for the ship's complement are expected, it is wise to leave a list with Security at the terminal gate, to expedite their boarding.

Regulations: 72 hours in advance of arrival send to Agents, asking them to relay same, questionnaire replies to Harbour Master Forth Ports and also to Braefoot Terminal. (See "Radio" → pre-arrival information and "General" before first UK port.)

General: Laundry facilities are available, good quality.

AUTHORITY: Shell U.K. Exploration and Production, P.O.Box 16, Mossmorran, Cowdenbeath, Fife, KY4 8EL. *Tel:* (0383) 892000, 892123. *Telex:* 728244 Moshell G. Shipping Department 728245 Moship G. *FAX:* 0383-892100. *Contact:* Captain D.J. Pringle, Terminal Supervisor. Captain P.W. Marsland, Day Co-ordinator.

BRIDLINGTON: 54.05 N. 00.12 W.

DOCUMENTS:

Crew List.
Passengers List.
Ship's Register.
Customs Documents.
Manifests.
Bills of Lading.
Ship's papers.

PILOTAGE: Vessels approach within 0.25 mile, flying "G" Flag. Local fishermen act as Pilots and board approx. 1 hour prior to berthing time.

ANCHORAGES: For small vessels of not more than 12 ft. draft, 1 mile S.E. of harbour. Deeper-drafted vessels 3 miles East of Harbour. Good holding grounds except in heavy weather from East to South.

RESTRICTIONS: In accordance with state of tide and draft restrictions.

HEALTH: Pratique required from all vessels other than from a British port. "Q" Flag to be flown.

Also see "Health – All Ports" before first U.K. port.

RADIO: Humber Radio Station is the best for a vessel to route E etc.

VHF: Call sign "Bridlington Harbour". Call on Channel 16. Working and 14.

TUGS: None available.

BERTHING: No cargo vessels. Fishing harbour handles fishing vess and yachts.

MEDICAL: Agents require advance notice of required medical atten Hospital facilities available. Relevant medical information, i.e. fever, e required.

DENSITY: Sea water.

FRESH WATER: Unlimited quantity available. Delivery from sh pipeline at the rate of 3 t.p.h.

FUEL: All grades available. Delivery by road tankers.

CONSULS: No local Consuls. Nearest port of availability is Hull.

REPAIRS: Limited engine and deck repairs.

REPATRIATION: No facilities exist for crew change.

AIRPORT: Yeadon, 45 miles, served by regular airlines.

HOLIDAYS: Normal Bank Holidays. Fish landings can be worked these days.

POLICE/AMBULANCE/FIRE: Police Bridlington 672222; Ambula 0482 – 881198; Fire 73585.

TELEPHONES: No arrangements exist for placing telephones abo

SHORE LEAVE: Crew members allowed ashore.

IDENTIFICATION CARDS: Not required.

GARBAGE DISPOSAL: A skip is provided for depositing bagg garbage and other refuse.

WASTE OIL DISPOSAL: A tank (approx. capacity 160 galls.) is provi for waste sump oil, etc. Collection can be arranged through the Harb Master's Office.

SEAMAN'S CLUBS: None.

CURRENCY: U.K.Pound (U.K.£).

AUTHORITY: Bridlington Harbour Commissioners, Harbour Offi Harbour Road, Bridlington, East Yorkshire YO15 2NR. *Tel:* (02 670148/9. *FAX:* (0262) 602041. *Contact:* T. Dealtry, Harbour Maste

BRISTOL (Avonmouth): 51.30 N. 02.43 W. (See Pla

DOCUMENTS:

1 Maritime Declaration of Health.
1 Vaccination Certificate.
1 Crew's Effects List.
2 Ship's Report by Master.
1 Home Office Form I.B.6.
1 Stores List.
1 Certificate of Deck Cargo tonnage.
1 Grain Certificate.
1 Light Certificate.
1 Port Dues Certificate.
1 Passenger List.
1 Landing Card for each passenger.
Ship's Certificate of Registry.
Derat or Derat Exemption Certificate.
Mercantile Marine Office Certificate (British ships only).

In addition, Manifests and Bills of Lading are usually sent to Agent d from loading port.

APPROACHES: *Cautionary Advice:* Several points should be born mind.

Tides in the Bristol Channel are strong (up to 5 knots at Springs) their effect must be allowed for accordingly.

Vessels should slow down in ample time before reaching the p station.

From the English and Welsh Grounds Lightbuoy inwards, navig becomes more difficult as the channel for deep draft vessels narr Traffic is heavier and more congested with vessels entering and lea the docks, some of which are small vessels without Pilots. The chan however, is well buoyed.

PILOTAGE: Compulsory for vessels of 85 m. LOA and over an vessels carrying dangerous substances in bulk of 70 m. LOA and o

Boarding and landing station is one mile North of Breaksea Light Pilots board from 50 ft. motor pilot boat, black hull, white superstruc "Bristol and Gloucester Pilots" in white letters amidships, operating Barry Harbour. VHF Channel 16 calling, 6 working.

Pilot ordering: Tel: (0272) 822257. Fax: (0272) 235320. Telegr Address: "Brispilot Avonmouth". Details of rates and other partic available from Haven Master, R.E. Dock Entrance, Avonmouth.

Pilotage is from sea to berth and vice versa.

ANCHORAGES: Barry Road affords good anchorage in mod weather for small vessels awaiting a Pilot. Large vessels should a West of Breaksea, clear of pilot boarding area.

RESTRICTIONS: Royal Portbury and Royal Edward Locks are ma from 4.5 hours before to 3.5 hours after HW.

MAX. SIZE: *Royal Portbury:* Max. length 950 ft., max. beam 13 draft 43 ft. 06 in.

Royal Edward: Max. length 690 ft., max. beam 98 ft., draft 34 ft

Avonmouth Dock through Junction Cut from Royal Edward: Max. l 560 ft., max. beam 75 ft., draft 26 ft. 6 in.

Note: The above quoted drafts are for tides that reach below High Water i.e. on many tides a greater draft could be accommo on a few tides vessels of the quoted draft would be neaped.

HEALTH: Foreign arrivals are required to complete Maritime Declaration of Health and to report to Port Health Authority by radio, sickness, prior to arrival if possible, otherwise report on arrival at dock entrance.

Onus of reporting sickness is the personal responsibility of the Master.

All vessels are required to report the presence of animals or birds aboard vessel and any disease amongst such animals or birds.

Vessels arriving from ports within the excepted area and coastal arrivals need not present Declaration, but when there is sickness on board Port Health Authority must be informed.

Also see "Health – All Ports" before first U.K. port.

RADIO: See Admiralty List of Radio Signals, Volume 1.

Pre-Arrival Information: Vessels complying with Dangerous Substances and Tanker Reporting Regulations should do so through ships' agents or by Tel: (0272) 822257 or by Fax: (0272) 235320 or by Telex: 44240 PBAAM G marked "Urgent Attention Avonmouth Signal Station", or by Telegraph "Brispilot Avonmouth".

VESSEL TRAFFIC SERVICE: For estuary and port approaches: Calling and Working: VHF Channel 12, alternative Working Channels 9 and 11. Call sign "Avonmouth Radio". Vessels should report on passing Breaksea Lightfloat, English and Welsh Grounds Lightbuoy and Welsh Hook Buoy. Radar coverage of all port approaches maintained. VTS will provide on request radar, tide, weather, navigational warnings and traffic information. Vessels should maintain continuous listening watch on VHF Channel 12 whilst in tidal waters.

Port Operations Service for lock working and enclosed docks: Calling and Working: VHF Channel 14. Call signs: "Royal Portbury Dock Radio" or "Royal Edward Dock Radio" as required.

TUGS: Large ships for Royal Portbury Dock are normally met by tugs West of Portishead and other vessels in King Road.

Ships for Royal Edward Dock docking on flood tide normally meet tugs at old oil jetty to Northward of the entrance lock. Vessels docking on ebb tide, tugs join between Firefly and Cockburn Buoys.

BERTHING: Boatmen and Hobblers should be ordered to take lines in lock and on berth unless vessel intends to use own crew.

The port is owned and operated by First Corporate Shipping Ltd. trading as the Bristol Port Company. The Bristol Port Company is the statutory harbour authority for the commercial port and its tidal approaches.

Avonmouth, Royal Edward Docks: There is 12,320 ft. of operational quay at the Royal Edward Dock, Avonmouth, including dry and liquid bulk berths with a self contained oil basin containing 8 berths, 4 of which are equipped with common user pipeline systems. The LPG berth is in the oil basin.

Other berths are equipped to handle forest products (crane discharge), bulk commodities, animal feedstuffs, metals and general cargo. There are dedicated berths for the Bell Line Container Terminal, food grains, cement, sulphuric acid and dredged aggregates.

Royal Portbury Dock: The Bristol Port Company's modern Royal Portbury Dock is equipped to handle Lo/Lo and Ro/Ro traffic. Berths No. 1 and 2 (length 575 m.) are backed by 24 hectares of paved area for forest products. 25,000 sq.m. of modern warehouses dedicated to forest products is also available. Berths No. 3 and 4 are predominantly dedicated to car and vehicle imports and exports, and can accommodate the largest side ramp or quarter ramp Ro/Ro vessels, and also offer fixed quay cut out ramps for smaller vessels. In addition to paved quays, there are in excess of 42 hectares of paved areas available, with a further 42 hectares as yet uncommitted. Walon Ltd. operates two terminals of 18 and 10 hectares.

The Bristol Port Co., in a joint venture with National Power, has built and commissioned the most advanced bulk terminal in Europe on Berths No. 5 and 6. The bulk stockyard is connected to a rail loading facility at Avonmouth via a tunnel under the River Avon. The bulk terminal is capable of handling animal feedstuffs direct to a major new storage warehouse located on Berth No. 5, operated as a joint venture by the Bristol Port Co. and Tate & Lyle Ltd.

United Molasses Company, a Division of Tate & Lyle Ltd., operates an import and distribution depot with a tankage capacity of 53,000 tonnes. This development is situated behind Berth No. 4, where Redland Plasterboard have constructed a plasterboard manufacturing terminal on a 30 acre site.

Developments on the Portbury Estate include factories for Ashton Corrugated (Southern) and Christies Panel Products, and the retail giant ASDA, who have built a regional distribution centre on a 20 acre site. These new developments join a large cold store owned by Frigoscandia, an animal compounding mill for BOCM-Silcock Ltd. and the Peter Lane Group's transport and distribution depot. Proton Cars of Malaysia has its new U.K. Headquarters on the Portbury Estate.

CRANES: Various types up to 12.5 tonnes at Avonmouth together with one 150 tonne floating crane.

STEVEDORES: At least 24 hours notice required in order that necessary labour may be allocated.

MEDICAL: Absolutely necessary for Agent to have as much notice as possible of any medical attention required. All facilities available.

DENSITY: Avonmouth Docks: Average density 1012 to 1015; in the river fluctuates according to tides.

FRESH WATER: Available at most berths, 24 hours a day from hoses connected to standpipe. Delivery rate 25 – 30 t.p.h.

FUEL: Most grades available – 24 hours notice required.

FIRE PRECAUTIONS: Approval needed to carry out hot work on board or on the adjacent quay. Special regulations apply in the oil basin.

CONSULS:

Belgian Consul
Chilean Consul
Danish Consul
French Consular Agent
Finnish Vice Consul
German Consul
Greek Consul
Italian Consular Agent
Netherlands Vice Consul
Norwegian Vice Consul
Spanish Vice Consul
Swedish Vice Consul

REPAIRS: Most types of repairs are carried out. Contact Avonmouth Ship Repairers Ltd., Royal Edward Dock, Avonmouth, Bristol. Tel: Bristol (0272) 820615.

DRY DOCK:

	Total length	*Length over blocks*	*Width of Entrance*	*Depth of water on sill*
Avonmouth Docks	875 ft.	850 ft.	100 ft.	32 ft.

GANGWAY/DECK WATCHMEN: Not absolutely necessary – Available if required.

OPENING/CLOSING HATCHES: If crew open hatches on the first day then they must continue to do so whilst vessel is discharging/loading, otherwise dockers attend to this.

CERTIFICATES: Load Line Certificate, Safety Equipment Certificate, Lloyd's Construction Certificate, Derat Certificate, Ship's Register, Light Bills, Safety Radio Certificate.

CUSTOMS ALLOWANCES: Current allowance for crew members of British and foreign ships in British waters available on request from H.M.Customs:

REPATRIATION: Repatriation can be effected to all parts of world.

AIRPORT: Local airport approximately 12 miles away. London can be reached in 1.5 hours by train.

TIME: BST is GMT plus 1 hour. GMT in Winter months.

HOLIDAYS: New Year's Day; Easter (varies); May Day; Spring Bank Holiday (last Monday in May): Summer Bank Holiday (varies, usually last Monday in August); Christmas Day (25th December); Boxing Day (26th December). Work can be arranged on these holidays, except 25th December.

POLICE/AMBULANCE/FIRE: *Royal Portbury and Avonmouth Docks:* Dock services can be contacted by dialling 4444 on port's exchange or 820000, Extension 4510, on British Telecom exchange.

Otherwise dial 999 on British Telecom. Exchange for national emergency services.

MARINE RESCUE CO-ORDINATION CENTRE: H.M. Coastguard, Mumbles, Swansea, West Glamorgan. Tel: (0792) 366534, 367761.

TELEPHONES: Can be put on board at most berths.

BANKS: National Westminster Bank Ltd., 1 Gloucester Road, Avonmouth. Tel: 823991.

Barclays Bank Ltd., Gloucester Road, Avonmouth. Tel: 822814.

Lloyds Bank Ltd., 265 Avonmouth Road, Avonmouth. Tel: 827191/2. (Major international banks located in Bristol's finance sector centred mainly around the "Corn Street" locality).

SHIP SUPPLY SERVICE: At Avonmouth limited services could be provided by the tug company, Cory Towage, Tel: (0272) 822021.

The pilot boat at Barry occasionally assists with sick crew members, limited numbers of personnel and small packages. Tel: (0272) 822354.

IDENTIFICATION CARDS: Not necessary unless being repatriated.

GARBAGE DISPOSAL: Palladin bins available throughout the docks. Free collection twice weekly. Bins placed alongside at ship's request, £ 15 charge for ship's stay. Cargo waste is incinerated by Port Authority, as is dunnage. Contact Keith Young. Tel: 820000.

WASTE OIL DISPOSAL: Reception facilities for tank washings, contaminated bilge water and other large quantities of oily waste can be arranged by ship's Agent to road tanker vehicle on the berth. Further advice can be obtained from Avonmouth Signal Station, Tel: (0272) 822257. Fax: (0272) 235320.

Drums placed around dock for small quantities of oily waste. Waste oil is collected by Port Authority and is taken to motor shop and recycled (750 galls. tank). If ship's waste is in ship's own drums, the Port Authority will collect on request. Private companies can be contracted by ship if required.

SEAMAN'S CLUBS: Avonmouth International Seafarers Centre, Gloucester Road, Avonmouth, Bristol. Tel: 0272-822335. Facilities include shop, telephone, postal facilities, currency exchange, snooker, pool, table tennis, chapel, TV and video, books, bar and transport on request.

CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.67 (1.3.94).

DEVELOPMENTS: See "Berthing".

AUTHORITY: The Bristol Port Company, St.Andrew's Road, Avonmouth, Bristol BS11 9DQ. *Tel:* (0272) 820000. *Telex:* 44240. *FAX:* (0272) 820698. *Contact:* T. Mordaunt, Chairman.

AGENT: Denholm Shipping Services Ltd., Avonmouth Docks, Avonmouth, Bristol BS11 9DN. Tel: 01-179-820491. After office hours: 01-454-633490. Telex: 44168. Fax: 01-179-826272. Cables: "Denholm Avonmouth".

BRIXHAM: 50.24 N. 03.30 W. (See Plan)

PORT LIMITS: The area below the level of high water enclosed by:

(a) An imaginary line drawn from Shoalstone Point in the Parish of Brixham, extending in a W.N.Westerly direction for a distance of 6,500 ft. or thereabouts, until it intersects the imaginary line next described;

(b) An imaginary line drawn from the centre of the Old Quarry at O.S. Ref. SX91445723, in a N.Easterly direction for a distance of 3,000 ft., or thereabouts, until it intersects the imaginary line first described, and;

(c) The land line of the coast from the centre of Old Quarry aforesaid to the said Shoalstone Point.

DOCUMENTS:

1 Crew List,
1 Passenger List,
2 General Declarations (Customs),
1 Health Document,
1 Manifest,
1 Each Bill of Lading,
1 Ship's Papers,
1 Ship's Certificates,
or
as for other small U.K. Ports.

PILOTAGE: Competant Harbour Authority (C.H.A.) pilot. Tel. Brixham (0803) 882214. If no reply after hours, Tel. Brixham (0803) 882060.
DEEP SEA AND COASTAL PILOTAGE: Pilots for all European and U.K. ports including the Baltic.

Ships requiring a Pilot at Brixham should cable at least 48 hours before arrival to "Deep Sea and Coastal Pilots" (Telex: 911847 Pilots G) or "Hammond, Dover" advising and updating ETA Brixham.

2 hours before arrival Brixham – contact "Brixham Pilots" on VHF Channel 9. Pilots board by fast launch 1 mile N.E. Berry Head (or by arrangement). Pilot boats, length 40 ft. and 50 ft., black hull, orange wheelhouse, with "Pilot" in black on wheelhouse. Listening VHF Channel 9.

Also see "London" – Pilotage.
ANCHORAGES: In Torbay or outside port limits. Contact pilot station on VHF Channel 9 for advice.
MAX. SIZE: Unlimited at anchor. Also see "Berthing".
HEALTH: See "Health – All Ports" before first U.K. port.

CALEDONIAN CANAL: 57.27 N. 04.18 W.

PORT LIMITS: Craft are considered to be within the Canal when they have entered the sea lock structures.
DOCUMENTS: Masters of craft on through passage must report to the Sea Lock Office at Corpach with the ship's measurement certificates to enable toll declaration to be made. Masters of craft on partial passage starting and returning to the East coast should report to the Clachnaharry Canal Office.
PILOTAGE: Approach pilotage compulsory at Inverness end. Contact Inverness Pilots by Link Call through Inverness 232845 or 235264 (Ships of NRT under 100 tons are exempted). Pilotage within the Canal and West approaches optional. For Pilotage into Corpach from the West contact Mr. H. McKinnon at Corpach by Link Call to Corpach 304 and for Canal Pilotage, by Link Call to Caledonian Canal Office, Inverness 233140.
RESTRICTIONS: Entrances to sea locks restricted for 2 hours either side of LW springs. There is generally no restriction at LW neaps. The Canal is operated on normal manning from 0800 hrs. until 1700 hrs. (Sundays excepted).
MAX. SIZE: 48.77 m. (160 ft.) length overall × 10.67 m. (35 ft.) beam × 2.74 m. (9 ft.) draft fresh water or, alternatively, 45.72 m. (150 ft.) × 10.67 m. (35 ft.) × 4.11 m. (13 ft. 6 in.) draft fresh water.

Corpach sea lock will admit craft to the Corpach Basin only of size 61.87 m. (203 ft.) length overall × 10.67 m. (35 ft.) beam × 4.11 m. (13 ft. 6 in.) draft fresh water.

All dimensions are overall and *NOT* moulded.
HEALTH: Vessels from foreign ports will be boarded by the Customs/Immigration/Health at the sea locks and they should fly the appropriate international flags on approach.

Also see "Health – All Ports" before first U.K. port.
RADIO: Western approaches via Oban Radio. Eastern approaches via Wick or Stonehaven Radio.
VHF: VHF at Corpach Sea Lock. Call Sign "Corpach Dock".
RADAR: None.
TUGS: A Canal tug is available if required. Service should not be required on normal passage.
BERTHING: At Corpach Old and New Wharves (limited Customs approval). At Inverness Glenmhor and Glen Albyn Wharves below Muirton and Upper Muirton Wharf at the top of Muirton. Water depth available for craft having 4.110 m. (13 ft. 6 in.). Normally ships gear or road mobile cranes used.
BRIDGES: Road and rail swing bridges are operated to permit the passage of craft. Headroom restricted to 36.576 m. (120 ft.) by overhead electric cables near Inverness.

Kessock Bridge at Inverness: Headroom restricted to 28.96 m. (95 ft.) over HW springs.
STEVEDORES: Traffic to Scottish Pulp and Paper Mills at Corpach unloaded by Pulp Mill gangs. Elsewhere arranged through Shipping Agent.
MEDICAL: Normal General Practitioners service available at main centres along the Canal. Full Hospital facilities at Inverness.
FRESH WATER: Fire hose supply available at Glen Albyn Wharf, Inverness. Small domestic supplies available at the main lock flights.
FUEL: Available by road tanker from principal oil companies by telephoning Shell, Inverness 238850 or Fort William 2404; Esso, Inverness 237222 or Fort William 2903.
REPAIRS/DRY DOCK: Limited repairing facilities at the Inverness Boatbuilding, Inverness.

Dry dock facilities at Corpach Boat Builders, Corpach.
AIRPORT: Highlands and Islands domestic flights from Inverness (Dalcross).
POLICE/FIRE/AMBULANCE: Emergency calls to these services on 999.
GARBAGE DISPOSAL: Eurobins at all locations.
WASTE OIL DISPOSAL: This can be arranged through local companies.
SEAMAN'S CLUBS: None.
GENERAL: The Caledonian Canal is part of the Customs Port of Inverness.
AUTHORITY: British Waterways Board. Caledonian Canal Office, Seaport Marina, Muirtown Wharf, Inverness IV3 5LS. *Tel:* Inverness (0463) 233140. *FAX:* (0463) 710942. *Contact:* At Corpach: P. Kennedy. Tel: (03977) 249. At Inverness: H. Ross, Canal Manager. Tel: (0463) 233140.

CAMPBELTOWN: 55.25 N. 05.36 W. (See Plan)

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
1 Stores List.
1 Personal Effect List.
Ship's Register.
1 Manifest or Bill of Lading.
PILOTAGE: Although *not* in Clyde Port Authority area, where large vessels are concerned, it is advisable to have the services of a qualified Clyde River Pilot or where applicable a Certificated Naval Pilot. As neither are based in Campbeltown, it is essential that at least 24 hours notice be given to Agent, when required.
ANCHORAGE: For large vessels in 6 to 10 fathoms in the area between the Orange leading lights and the Methe Bank Buoy, for smaller vessels a wider area can be used but South side of loch best holding.
HEALTH: Normal UK Port requirements. In event of disease or fever prior notice should be given to Agent.

Also see "Health – All Ports" before first U.K. port.
RADIO: All messages through normal coastal stations or by radio telephones via Portpatrick Radio when nearer port. Cables should be addressed to Agents.
RADAR/VHF: No port radar service. Direct contact with Harbour Authority on VHF Channels 12, 13 and 14. P.O.L. Depot, Campbeltown can be called on 30 – 40 mile radius on Channels 6, 12, 18. Same channels for tugs, lying off port, when arranged previously.
TUGS: Must be ordered at least 24 hours beforehand as they come from Glasgow area further North on River Clyde. Precise requirements concerning arrival/departure times requested owing to heavy costs entailed for waiting time.
BULK CARGO FACILITIES: Berth for vessel up to 230 ft. in length with maximum permissible draft 12 ft. (Salt water). Discharge by shore crane, Maximum lifting 5 tons.
SPECIALISED CARGO HANDLING FACILITIES: One berth for Roll-on/Roll-off ferry inside harbour, max. draft of vessel 12 ft. General cargo discharged.
STEVEDORES: Agents arrange all cargo discharges, including mechanical handling. Portable cranes only available. Ship's gear used when available to minimise costs.
MEDICAL: One casualty hospital available. Serious casualties transferred to Glasgow either by air or road, according to condition. Five local doctors.
TANKERS: All intended arrivals should be notified to Officer-in-Charge, P.O.L. Depot, Campbeltown (Tel. No. 0586/552226) at earliest.

P.O.L. Jetty, minimum depth, 40 ft. One discharging berth available.
FRESH WATER: Available at all times, delivery by hose.
FUEL: Marine gas oil supplied on commercial quay. Naval requirements by arrangement with P.O.L. depot.
REPAIRS: Minimal repairs only. Notify Agent as early as possible.
SURVEYORS: Arrange through shipping Agents.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Ship's option.
CARGO GEAR: See "Stevedores". Ship's gear preferred where possible.
REPATRIATION: Air service available once daily in forenoon, except Sunday.
AIRPORT: Machrihanish – 3 miles distant.
TIME: GMT. GMT plus 1 hour in Summer.
HOLIDAYS: New Years Day (1st January) Christmas Day, Boxing Day, 3 Statutory Local Holidays, Annual Holidays 1st fortnight in August.

Work can be carried out by arrangement with Stevedores.
POLICE/AMBULANCE/FIRE: Dial 999.
EMERGENCY CO-ORDINATION CENTRE: Coastguard, New Quay, Campbeltown, Tel: 2770.
TELEPHONES: By arrangement.
SERVICES: Laundry/Dry Cleaner, Minimal Radar/Radio, VHF Repairs. No tank-cleaning equipment available or compass adjusting.
IDENTIFICATION CARDS: Not required. P.O.L. Depot request production of Seamen's Cards.
BANKS: Bank of Scotland, 9 Longrow, Campbeltown. Tel: 552274.
Royal Bank of Scotland, 11 Castlehill, Campbeltown. Tel: 553617.
Clydesdale Bank, 19 Longrow, Campbeltown. Tel: 552130.
Trustees Savings Bank, Bolgam Street. Tel: 552550.
SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.
GARBAGE DISPOSAL: Skips are provided on the quay and are collected on Tuesdays and Thursdays.
WASTE OIL DISPOSAL: No service available locally.
SEAMAN'S CLUBS: No Seamen's Clubs. Sporting events can be arranged with prior notice to local clubs.
CURRENCY: U.K.Pound (U.K.£). U.S.$ 1.00 = U.K.£ 0.67 (1.3.94).

These documents are to be completed and presented with copies of manifests and ship's documents at the time of report.
PILOTAGE: Pilotage not compulsory except for vessels carrying passengers. Pilots embark from pilot cutters operating from Barry Harbour.

A.B.P. Pilot cutters are marked with "Pilots" in white on each side and operate radio continuous watch on VHF. Minimum of 24 hours notice required of ETA.

Pilot operations from Marine Operations Office in Barry.
Tel: (0446) 732665, 735466.
Fax: (0446) 735466.
Telex: 498180 Sewpil G.
24 hour manning.
Pilot cutter keeps watch on VHF Channel 16 and then as required.

ANCHORAGE: Barry Roads: Good anchorages in moderate weather in depths from 5 to 6 fathoms (9.1 m. to 11 m.) about 0.5 miles S.W. of the entrance to Barry Docks. Clay bottom.

RESTRICTIONS: Entry to docks restricted to a period of 4 hours before and 3 hours after high tide, according to size and draft of vessel.

Entrance lock 850 ft. length, 90 ft. wide.

MAX. SIZE:

Queen Alexandra Dock: LOA 650 ft., beam 88 ft. 3 in., max. draft 34 ft.

Roath Dock: LOA 650 ft., beam 85 ft., max. draft 33 ft.

Vessels near maximum dimensions may be accepted on certain tides after consultation with the Dock and Harbour Master.

HEALTH: Maritime Declaration of Health to be made to Port Authority or Customs Officer, whoever boards ship first. In event of contagious fever on board, Port Health Authority must be advised by radio before arrival. No Pratique necessary if vessel is entering port from another port in U.K.

Also see "Health – All Ports" before first U.K. port.

RADIO: Ilfracombe Radio and Portishead Radio.

VHF: A port operation VHF service maintained at dock entrance during tidal hours. Call sign "Cardiff Radio" calling on Channel 16 and operating on Channel 14 or Channel 11. There is also "Severn Radio".

TUGS: Tugs normally join vessel 0.5 mile to seaward of Outer Wrach Channel Buoy, and arrangements for attendance of tugs should be made through ship's Agent.

BERTHING: Arranged through Dock and Harbour Master, and berths within docks are flat quays. Rise and fall usually varies up to 1 ft.

Dock	*Quay Length (Total) (m.)*	*Normal Depth of Water (m.)*	*Max. Size of Vessel Length (m.)*	*Beam (m.)*	*Draft (m.)*	*Approx. d.w.t.*
Queen Alexandra	2,234	11.3	198.12	26.9	10.37	33,000
Roath Dock and	2,181	11.0	198.12	26.06	10.37	33,000
Roath Basin	1,174	11.0	158.00	21.30	8.50	18,000

Storage and Warehousing Facilities: Quayside: 5 transit sheds – 32,810 sq.m. (351,050 sq.ft.).

Back sheds: 13,870 sq.m. (149,280 sq.ft.).

Open storage: 8.7 hectares (21.5 acres) with a further 17.4 hectares (43 acres) managed by independent terminal operators.

Cranage and Mechanical Handling: Crane capacity: 1×15 tonnes; 8×7.5 tonnes; 3×5 tonnes; 7×3 tonnes.

2 additional 10 tonne grabbing cranes are provided by a terminal operator within the docks. The port provides a fleet of fork lift trucks for quayside cargo handling ranging from 4,000 lb. to 88,000 lb. capacity.

SPECIALISED CARGO HANDLING FACILITIES:

(i) Cold Storage: King's Wharf Cold Store, owned by Associated British Ports has a capacity of approximately 9,200 tonnes and can operate with temperatures down to –28°C.

(ii) Cool Storage: Cool store with a capacity of approximately 60,000 cartons at any one time. The store is equipped with cooling machinery to maintain temperatures at 50°F – 55°F. (10°C – 13°C.).

(iii) Timber Terminals: Bulk carriers received at deep water berths, discharge of 2,000 cu.m. of timber in a single gang shift, large hardstanding storage areas plus covered accommodation for woodpulp and specialised timber products.

(iv) Combi Vessels: A modern front loading truck of 40 tonne capacity, capable of stowing containers three-high, available for handling.

(v) Bulk Cargoes: 1 grain loading appliance.

(vi) 2 Scrap Berths.

BRIDGES: Bridges throughout the port can be operated on tide times.

STEVEDORES: Arrangements for employment of stevedores undertaken by A.B.P. through ship's Agent.

Port Working Hours:

	Day Work	*Shift Work*
Monday – Friday	0700 – 1630	0600 – 1400
		1400 – 2200
Saturday	0700 – 1130	0600 – 1000
		1000 – 1400
Sunday	0600 – 1400	0600 – 1400
		1400 – 2200

Vessels may also choose to work 0700 – 1630 (2 hours extra to finish if need be), Monday – Friday.

MEDICAL: All facilities available. Agents should be advised in advance if medical services required.

TANKERS: 2 tanker berths available, one in Queen Alexandra Dock and one in Roath Dock. Special instructions are issued to Master on arrival at port. Average discharge approximately 448 cu.m.p.h.

DENSITY: 1008-1018.

FRESH WATER: Available 24 hours daily from quayside, delivery 20 t.p.h. maximum.

FUEL: Fuel of all grades available.

FIRE PRECAUTIONS: For tankers, strict fire precautions required in accordance with latest safety procedures (Notice to Masters refers).

Emergency Action – Fire: In the event of an outbreak of fire (no matter how small) immediately dial 999 on the ship-to-shore telephone. When the operator answers, say "Fire", and wait until you are connected to the Fire Station Control. Then repeat: "Fire at Berth, (name of berth)". In event of the ship-to-shore telephone being inaccessible or out of order, use short blasts on ship's siren to alert Police and Port Authority. VHF can be used on tide times.

REPAIRS: All types of repairs possible.

DRY DOCKS:

	Length	*Width at Entrance*
Bute Dry Dock	182 m. (597 ft.)	21.7 m. (71 ft.)

Bute Dry Dock owned and operated by Bristol Channel Ship Repairs Ltd.

No. 3 Berth (Most bulk cargoes)	76 m
No. 4 Berth (Coal,Sulphur, Meal, etc.)	64 m

Vessels discharging take bottom on soft mud.

Average discharge 2 grabs 150 t.p.h. at No. 3 and 4 Berth.

STEVEDORES: Provided by Messrs. John Kelly Ltd., Tel: 626 Telex: 74210 and Kane Shipping, Tel: 51999.

MEDICAL: One hospital available.

TANKERS: Discharge controlled by Texaco Ltd., as plant is owned them privately. Rate of discharge approximately 200 t.p.h. 2×8 diameter pipes and 1×6 in. pipe.

Usual safety precautions prevail.

Tankers not to enter port without permission of Harbour Master.

Max. draft MHWST 4.88 m.

DENSITY: 1024.

FRESH WATER: Supplied alongside quay approximately 10 t.p.h.

FUEL: Supplied by road tankers. All grades available from major Companies.

CONSULS: None. Most countries are represented at Port of Bel approximately 9 miles from harbour.

REPAIRS: Light repairs and welding only major repairs can be arran at Belfast.

DRY DOCKS: None. Nearest at Belfast.

SURVEYORS: Most Classification Societies based at Belfast.

GANGWAY/DECK WATCHMEN: Not compulsory.
OPENING/CLOSING HATCHES: All vessels by crew.
CERTIFICATES: Ship's Register on arrival.
CUSTOMS ALLOWANCES: 200 cigarettes each crew member. Spirit, wine, etc., at discretion of Water Guard.
CARGO GEAR: Three crawler mounted diesel grab cranes, 3,100 kg. and 3,045 kg.
REPATRIATION: Good facilities for crew changes. Good railway and bus services.
AIRPORT: Belfast Airport approximately 22 miles served by regular lines.
TIME: GMT, plus 1 hour in Summertime.
HOLIDAYS: New Years Day, Easter Monday and Tuesday. 12th and 13th July, Christmas Day and Boxing Day.
POLICE/FIRE/AMBULANCE: Carrickfergus 62021.
TELEPHONES: Not possible to place on board. Good phone service convenient to ships.
SERVICES: All services readily available from Port of Belfast.
SHIP SUPPLY SERVICE: Off-shore service operated from the Port of Carrickfergus by 2 tugs, the "Ceres" and "Cobh".
Lagan Marine Services, 2 Downhill Park, Newtownabbey, Co. Antrim, BT36 6TX, Northern Ireland. Tel: Glengormley 2353, Belfast 746051.
GARBAGE DISPOSAL: Skips provided for general garbage but no galley slops allowed. They are collected once weekly by Carrickfergus Borough Council, free of charge.
WASTE OIL DISPOSAL: Service available using 16 tonne tanker trucks. Contact Irish Waste, 116-120 Duncrue St., Belfast BT3 9AR. Tel: Belfast 746327.
SEAMAN'S CLUBS: Nearest seamans clubs are in Belfast, 12 miles distant. Mission to Seamen and Stella Maris.
CURRENCY: U.K.Pound (U.K.£).
SHORE LEAVE: After clearing inwards no restriction on shore leave.
IDENTIFICATION CARDS: Not required.
AUTHORITY: Carrickfergus Borough Council and Harbour Master, Town Hall, Carrickfergus, Co. Antrim, BT38 7DN. *Tel:* (09603) 51604 (Council) 51292 (Harbour Master). *FAX:* (09603) 66676 (Harbour Master). *Contact:* Captain R. S. Heddles, Harbour Master/Manager.

CASTLETOWN, Isle of Man: 54.04 N. 04.40 W.

PORT LIMITS: Castletown Bay, North of line between Scarlet Point and Langness Lighthouse.
DOCUMENTS: Same as U.K.
PILOTAGE: If required, Pilot will board East of can buoy in bay.
ANCHORAGE: About 2 cables East of red can buoy. Exposed to S.-S.W.'ly weather.
RESTRICTIONS: Berthing at HW only. Max. draft 11.5 ft. Springs, 9.5 ft. Neaps.
MAX. SIZE: LOA 170 ft., beam 27.5 ft., draft subject to tides.
HEALTH: Same as U.K. ports.
VHF: Calling Channel 16, working Channel 12. Listening only when vessels due.
TUGS: None.
BERTHING: 4 berths, 170 ft. max. length. All dry out.
CRANES: Mobile crane, SWL 7.5 tons available.
BRIDGES: At entrance to Inner Harbour. Opened on request.
STEVEDORES: 24 hours notice should be given to Agent.
MEDICAL: Full hospital facilities available.
TANKERS: No facilities.
DENSITY: 1025.
FRESH WATER: Available ex-hydrant at all berths.
FUEL: Diesel available.
FIRE PRECAUTIONS: Usual.
CONSULS: None.
REPAIRS: Minor repairs only.
DRY DOCKS: None.
SURVEYORS: I.O.M. Harbour Board, Marine Administration. Tel: (0624) 23813. Telex: 629335 Iomhar G.
HATCHES: Crew or stevedores to operate hatches.
CUSTOMS ALLOWANCES: Same as U.K.
CARGO GEAR: Ship's gear or mobile crane used.
AIRPORT: 2 miles away. Daily flights to U.K. and Eire.
TIME: GMT and BST.

EMERGENCY CO-ORDINATION CENTRE: Liverpool Coastguard, Tel: 051-9313341.
SERVICES: Compass adjusting.
SHORE LEAVE: Permitted.
IDENTIFICATION CARDS: Seaman's Book sufficient.
AUTHORITY: Department of Highways, Ports and Properties, Harbour's Division, Sea Terminal Buildings, P.O.Box 11, Douglas, Isle of Man. Tel: (0624) 23813 (ext.153). *Telex:* 629335 Iomhar G.*FAX:* (0624) 27238. *Contact:* Captain W.B. Kinley, Chief Harbour Master (I.O.M.).

CLYDE PORT (Including Glasgow, Greenock, Finnart and Hunterston): 55.51 N. 04.16 W. (See Plan)

PORT LIMITS: For limits of jurisdiction see "Plans" – "Firth of Clyde and Sea Lochs".
DOCUMENTS: Following required on arrival:
3 Crew Lists on IMO Standard Form.
3 General Declarations. Customs Form C13.
3 Ships Stores Declarations. Customs Form C14.
2 Cargo Manifests. Customs Form C16.
1 Personal Effects Declaration. Customs Form C142.
1 Declaration of Health.
Bills of Lading.
Register.
Load Line Certificate.
Safety Equipment Certificate.
Safety Radio Certificate.
Safety Construction Certificate.
Derat or Derat Exemption Certificate.
PILOTAGE: Compulsory pilotage.

1. *The Seaward Limit of Compulsory Pilotage* means an imaginary line commencing at the intersection of the line of Longitude 05° 06′ W., with the North shore of Loch Striven, and then proceeding due South to the North shore of the Island of Bute, and by the same line of Longitude, from the South shore of the Island of Bute, to the Latitude of Gull Point on Little Cumbrae Island; thence by a line extending due East (T) to Gull Point; thence by a line proceeding in the direction 143° (T) for a distance of 7 nautical miles; and thence by a line proceeding in the direction 053° (T) to the Northern boundary of the Harbour of Saltcoats.
   The Landward Limit of Compulsory Pilotage means the West side of Albert Bridge in the City of Glasgow.
   The Inner Pilotage Area means that part of the River and Firth of Clyde, including Greenock. The navigable river channels Garelock, Loch Long and Loch Goil contained within an imaginary line from Kempock Point proceeding in the direction 295°(T) to Strone Point.
   The Outer Pilotage Area means that part of the Firth of Clyde, Holy Loch and Loch Striven within the area bounded by an imaginary line from Kempock Point proceeding in the direction 295°(T) to Strone Point and The Seaward Limit of Compulsory Pilotage.
   The Compulsory Pilotage District means that part of the area of jurisdiction of the Clydeport Ltd. as defined in the Clydeport Authority Confirmation Act 1965 and subsequent amendment(s) contained between the seaward limit of Compulsory Pilotage and the landward limit of Compulsory Pilotage.
2. The following vessels will be required to engage the services of an authorised Clyde Pilot when navigating within the Compulsory Pilotage Area of Clydeport.
   (a) Vessels over 80 m. length overall (LOA), carrying dangerous substances as defined in the Dangerous Substances in Harbour Areas, Regulations 1987, in bulk and all vessels which are not Gas Free.
   (b) All vessels of 25 m. length overall (LOA), carrying in excess of 12 passengers.

Note: Passenger vessels as above (b) proceeding to Loch Fyne or Kyles of Bute will also require the services of a licensed Pilot.

3. A vessel not carrying passengers navigating within the Compulsory Pilotage Areas and complying with the following conditions shall be exempt from Compulsory Pilotage.
   In the Inner Pilotage Area:
   (a) Vessels not exceeding 70 m. length overall (LOA).
   (b) Vessels not exceeding 60 m. length overall (LOA) proceeding East of No. 1 Buoy.
   (c) Vessels under tow, dumb barges, etc., when proceeding East of No. 1 Buoy not exceeding 35 m. length overall (LOA).
   In the Outer Pilotage Area:
   (a) All vessels up to 120 m. length overall (LOA) transiting the area. Vessels up to 80 m. length overall (LOA) proceeding to Hunterston, Loch Strivan, Inverkip, or other berths or anchorages within the Outer Pilotage Area.
   (b) Ardrossan, vessels not exceeding 100 m. length overall (LOA).
4. In the event of the Master or First Mate of any of above vessels holding a current Pilotage Exemption Certificate issued by Clydeport, the services of an Authorised Clyde Pilot will not be required unless requested and available.
5. *Voluntary Pilotage:*
   If requested and subject to the services of a Pilot being on offer, any vessel may request pilotage when navigating within the jurisdiction of Clydeport.
6. The Clydeport directs that vessels, which are subject to Compulsory Pilotage or request voluntary pilotage as aforementioned, shall:
   (1) Give such notice of estimated time of arrival or departure as may be required by Clydeport Notice to Mariners or other appropriate notification. Failure to provide such notice, or failure to arrive or depart within 2 hours of the notified time, will be penalised by a charge in accordance with that specified in the Clydeport Schedule of Charges.
   (2) Board or disembark a Pilot at a previously arranged location determined by the Pilotage Area to be served and weather conditions prevailing.

ANCHORAGES: Anchorages are available for vessels of all drafts in the Tail of the Bank area (off Greenock) and lower Firth of Clyde.

Anchorages are allocated by Clyde Port Estuary Radio. The anchorage positions are shown on Admiralty Charts Nos. 1907 and 1994.

RESTRICTIONS: Vessels entering the river channel are restricted to a maximum fresh water draft of 9.7 m. Entry time for deeply laden vessels is dependent on the rise of tide.

Damaged vessels and vessels that are not in class must have a current Seaworthy Certificate and prior permission from the Harbour Master before entering the area of jurisdiction of the port.

MAX. SIZE: As agreed by Clydeport Ltd. for berths in Glasgow and Greenock and subject to consideration of particular circumstances prevailing in each case.
HEALTH: Masters should report by radio to "Porthealth Glasgow" any infectious illness which has occurred, or which has been suspected, during the voyage.

Also see "Health – All Ports" before first U.K. port.
RADIO: Traffic should be routed through any British coast station.
VHF: Clyde Port Estuary on Channels 16, 14, 12 and 11 for all communications regarding pilotage and navigation.
RADAR: There is no port radar.
TUGS: As required by Master and under advice of the Pilot. Tug's lines are always used.
BERTHING: *General, Bulk, Scrap and Project Cargoes:* Discharged and loaded at Shieldhall Riverside Quay and King George V Dock, Glasgow.

Bulk Cargoes, Forest Products, Container and Ro-Ro Vessels: Handled at Greenock Terminal where 2 ships can work simultaneously. Berth is equipped with 1×40 ton and 2×35 ton transporter cranes with an outreach of 105 ft. beyond the line of the cope. The quay is 1,200 ft. long with a depth of 12.6 m. at Chart Datum.

Ro-Ro Units: Can be handled at King George V Dock, Glasgow and at James Watt Dock and Garvel Basin, Greenock.
BULK HANDLING FACILITIES: Iron ore and coal are handled at Clydeport Hunterston Terminal where discharging vessels up to 350,000 d.w.t. and loading vessels up to 70,000 d.w.tonnes can be accommodated. Depth alongside up to 29 m. Max. draft 26.0 m. 2 unloaders, rates up to 3,000 tonnes per hour for ore and 1,000 tonnes per hour for coal.

Scrap iron and minerals are handled at Rothesay Dock (Clydebank) where vessels up to 535 ft. in length with a draft up to 9.4 m. in fresh water may be accommodated. With prior arrangement vessel in excess of 535 ft. may be accepted. Product tankers are also handled within this dock.

Bulk molasses is handled at a berth within the Great Harbour Greenock. Vessels using this berth are restricted to a fresh water draft of 7.1 m.

Grain is grab discharged at Meadowside Quay (Glasgow) to the 132,000 tonne granary which is situated behind the dockside goods sheds. Max. draft for vessels using Meadowside Quay is 9.7 m. in fresh water.
CRANES: Cranes presently in use by Clydeport Ltd. at Glasgow are: 2×10 tons, 1×25 tons, 1×30 tons, 1×35 tons, 1×160 tons.
BRIDGES: Erskine Bridge, which spans the navigable river channel, has a 59.92 m. on centre line, clearance above chart datum 1975.
STEVEDORES: Arranged by ship's Agent in accordance with Master's advice of ETA.
MEDICAL: Full medical and hospital facilities available.
TANKERS: BP Oil Ltd.: Privately operated crude oil terminal at Finnart.

The terminal is located on the East side of Loch Long (Lat. 56° 07′ N., Long. 04° 50′ W.) 25 miles from the pilot station off Little Cumbrae. There are 2 berths of which No. 3 accommodates about 300,000 d.w.t. tankers with a max. draft 75 ft. and No. 2 Berth, to the S.W., is used for about 200,000 d.w.t. with a max. draft 54.5 ft. and smaller tankers.

Berth Approach and Berthing: The berths are well sheltered, the water in Loch Long is deep and, with little tidal flow, berthing can be done at any state of the tide.

Berthing is done only in daylight, but ships can sail at any time. Vessels are turned about 0.5 miles seaward with tug assistance and backed up to the berth port side to, head out.

Tugs push on the off-shore side to breast the vessel alongside until secured.

Moorings: Ship's moorings are landed by launches. The usual pattern of moorings at Berth No. 3 is 5 head ropes, 5 stern ropes, 1 ship's breast rope at each end and 2 backsprings at each end to the jetty head. A 5.5 in. wire with "braidline" tail is provided by the shore as an additional breast mooring at each end. All ship's ropes are secured to quick release hooks.

At Berth No. 2 vessels secure to bollards with 4 head ropes, 4 stern ropes and 1 backspring at each end to the jetty head. A shore wire is provided at each end as a breast mooring.

Gangway: At Berth No. 3 a shore gangway is provided. At Berth No. 2 the ship must provide a safe gangway. Access to and from the ship must be by the gangway only.

Limitation on Height of Ship's Manifold: Prior notice must be given to the terminal if the height of the ship's manifold will exceed 68 ft. above waterline.

Cargo Handling: Each berth has the following Woodfield Combination hose/booms: 4 for crude oil (10 in. on Berth No. 2, 16 in. on Berth No. 3), and 2 for fuel oil imports and bunkering (8 in. on Berth No. 2, 10 in. on Berth No. 3). These connect with tankfarm by 2×12 in. fuel oil pipelines and 14×12 in., 24 in., 42 in. crude oil pipelines.

The maximum pressure allowed is 200 p.s.i.

There are facilities for loading lube oils.

Ballast and Slops: There is no facility for receiving dirty ballast or slops at the terminal. The tank cleaning berth at Greenock is no longer in operation.

Density of Water: The specific gravity averages 1.012 at the berths.

Services: No bunkers are available over the jetty. Ample prior notice is required for delivery by barge. Fuel and diesel oils are delivered by a barge with a fuel oil capacity of 440 tons and a diesel oil capacity of 118 tons. A 6 in. hose is used and the barge delivers both grades at 100 t.p.h.

Fresh water, of good soft quality, is piped to the berths at 50 t.p.h. Maximum quantity is 500 tons.

Normal domestic services, stores, laundry, etc. may be handled over the jetty with permission of the Terminal Authority.

A 1.5 ton crane is available for use at the berths.

A coin-operated telephone will be put on board, upon request.

Esso: Located at Bowling. This is a privately owned product distribu terminal, located 11 miles from Kempock Point (Gourock Pilots) a 9 miles up the River Clyde on the North Bank. The terminal is no supplied by land pipeline. There is an operational ocean tanker ber Vessels currently restricted to 6.5 m. draft. A non-operational coas berth is maintained on a care and maintenance basis.
DENSITY: Glasgow – Fresh; Greenock – Brackish; Hunterston – Sa
FRESH WATER: Available by hose at all berths operated b Clydeport Ltd.
FUEL: Most major oil companies are represented in Glasgow. All grad of bunker oil can be supplied by road tanker and by pipeline at Bowli Terminal.
FIRE PRECAUTIONS: Masters of vessels at the Authority's berths a given, on arrival, a copy of the Port Regulations and Emergen Procedures.

Oil tanker berths are privately owned and the operators issue th own Fire Regulations.
CONSULS:

Belgium
Brazil

COLCHESTER: 51.54 N. 00.55 E. (See Plan)

PORT LIMITS: Brightlingsea Anchorage.

DOCUMENTS: As normal British port.

PILOTAGE: If Pilot required from Sunk to Brightlingsea, as much notice as possible should be given to Harwich Pilots by R/T or VHF Channel 16/9. Pilots board near Sunk Light Vessel. ETA's for ships proceeding directly to Brightlingsea can be passed through Harwich, which has a far greater range than Colchester. River pilots can also be ordered directly via "Colchester Harbour Radio", if during operating hours on Channel 68.

ANCHORAGES: Off Brightlingsea, in approximately 8 m. – 10 m.

RESTRICTIONS: Vessels with deck cargoes of timber, and vessels which are large for the port not worked at night.

MAX. SIZE: Max. length at Colchester, 63 m. Max. length at Rowhedge 85 m. (90 m. by special arrangement with Harbour Master). Depths of water available – Tables supplied on request.

HEALTH: Normal procedure. Any abnormal conditions advise Harbour Master. Pratique automatic if from U.K. port.

Also see "Health – All Ports" before first U.K. port.

RADIO: North Foreland Radio, Humber Radio or Niton Radio. 2182 kHz.

VHF: "Colchester Harbour Radio", VHF Channel 68. Office hours watch plus tide time watch when ships expected. Vessels should call when approaching port anchorage, giving deepest draft, and keep listening watch on Channel 68 when manoeuvring.

RADAR: None.

TUGS: Small motor tug available through Harbour Master. Private tugs also available.

BERTHING: 1,500 m. of public (corporation) quays. 150 m. quay at Rowhedge.

CRANES: A number of 4 ton – 6 ton mobile cranes.

BULK CARGO FACILITIES: Bulk cargoes handled at most berths, 3 grain silos.

STEVEDORES: Arranged by Local Agents. Average rate for all cargoes 100 t.p.h.

MEDICAL: Advance notice if possible. Hospital available.

TANKERS: No facilities.

DENSITY: Density varies with tide, average 1015.

FRESH WATER: Fresh water points on quays, rate approximately 9 tonnes/p.h., cost £13.0 to £25.0, based on size of vessel.

FUEL: All fuel deliveries by road tanker.

FIRE PRECAUTIONS: None.

CONSULS: None.

REPAIRS: No facilities.

SURVEYORS: Lloyd's Agent (W. Fieldgate & Son) or ship's Agent can arrange.

GANGWAY/DECK WATCHMEN: Not normally required.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: British standard allowance.

CARGO GEAR: Shore gear, no heavy lifts.

REPATRIATION: Arranged by Agents.

AIRPORT: London 70 miles. Stansted 30 miles.

TIME: GMT. GMT plus 1 hour in Summer.

HOLIDAYS: Normal British holidays, work sometimes arranged.

POLICE/AMBULANCE/FIRE: Tel. 999.

EMERGENCY CO-ORDINATION CENTRE: U.K. Coastguard – Dial 999 or VHF Channel 16 or Tel: Walton-on-Naze 5518. Harbour Emergencies – Call on VHF Channel 16 or Tel: 827316.

TELEPHONES: None.

SERVICES: Compass adjusting arranged by Agents.

BANKS: Barclays, Midland, Nat-West, Lloyd's and Williams & Glyn all have branches in the town.

STORING: See "Prelims".

1. By truck.
2. Not applicable.
3. Yes, subject to cargo handling.
4. Yes
5. Normal U.K. Requirements.
6. Yes.

GARBAGE DISPOSAL: Bins on quays.

WASTE OIL DISPOSAL: By arrangement with Harbour Office.

SEAMAN'S CLUBS: None.

SHORE LEAVE: Allowed.

IDENTIFICATION CARDS: Not required.

DELAYS: Normally tidal delays only.

AUTHORITY: Colchester Borough Council, Harbour Office, Walter Radcliffe Way, Wivenhoe, Essex CO7 9JR. *Tel:* Colchester (0206) 827316. *FAX:* (0206) 827023. *Contact:* Captain R. Harris, Harbour Master.

COLERAINE: 55.08 N. 06.40 W. (See Plan)

PORT LIMITS: 5.5 mile tidal stretch of the River Bann to the river entrance.

River entrance: 55° 10′ N., 06° 46′ W.

DOCUMENTS: Normal U.K. requirements.

PILOTAGE: Compulsory, order through Agents or direct from Harbour Office or Pilot. 24 hours notice preferred. Pilot Station, Portstewart Bay. Pilot boat call sign "S. G. Martin", call on Channel 12, working Channel 12.

ANCHORAGES: Vessels awaiting tide can anchor in Portstewart Bay in offshore winds or in Skerry Roads, East of Portrush.

RESTRICTIONS: The port is tidal and deeper vessels are restricted to high tides. Limited night working.

MAX. SIZE: The recommended maximums are 75 m. length, 12.0 m. breadth and 4.2 m. draft.

HEALTH: Normal U.K. procedure.

TUGS: Not normally required, nearest available tug is at Londonderry Harbour.

BERTHING: Main Quay 900 ft., 2 detached wharves 140 ft. and 150 ft. and separate Oil Jetty. Max. draft vessels may ground safely on mud at LWST.

CRANES: Two Priestman Lion 35 grabbing cranes for bulk coal, etc. 1×35 ton Henderson derrick crane for containers or heavier lifts.

SPECIALISED CARGO HANDLING FACILITIES: No facilities for Ro/Ro traffic.

BRIDGES: A railway bridge with 60 ft. lifting span crosses the river 0.5 miles down stream from the Harbour.

STEVEDORES: Messrs Wm. Dalzell & Sons Ltd. Tel: (0265) 54365. Telex: 74512. Fax: (0265) 58230.

MEDICAL: Full hospital/medical facilities available.

DENSITY: Varies between fresh and salt, depending on weather and tide conditions.

FRESH WATER: Fresh water is available from mains hydrants at all berths.

FUEL: All grades available, 48 hours notice advisable.

REPAIRS: Local engineers can carry out most repairs. Divers also available for underwater work.

DRY DOCKS: None.

HATCHES: Hatches normally opened or closed by the crew.

AIRPORT: Belfast International (Aldergrove) 40 miles. Belfast (harbour airport) 60 miles, Eglinton, 24 miles.

HOLIDAYS: 1st January, Easter Monday/Tuesday, May Day, 12th/13th July, Last Monday in August, 25th/26th December.

POLICE/AMBULANCE/FIRE: Tel: 999 in emergencies.

GARBAGE DISPOSAL: Plastic bags made available and removed by harbour staff. No charge. Skips can be arranged at cost through the harbour office. 6 cu.m. skip costs £30, 3 cu.m. skip costs £22, 2 cu.m. skip costs £20. Prices correct at April 1994.

WASTE OIL DISPOSAL: Service available using local contractors: For clean waste oil, contact Capital Fuels, Ballynahinch, Tel: 0238-561574. For dirty waste oil, contact Irish Waste Services, Belfast, Tel: 0232-746327. Small quantities can be accepted at harbour's own facility.

SEAMAN'S CLUBS: No seaman's clubs.

CURRENCY: U.K.Pound (U.K.£).

DELAYS: Vessels may be delayed by swell at the river entrance in bad weather conditions.

AUTHORITY: Coleraine Harbour Commissioners, The Harbour Office, The Quay, Coleraine BT52 1BJ, Co. Londonderry. *Tel:* 0265-42012. *FAX:* (0265) 52000. *Contact:* Harbour Office.

COWES (including Newport, Isle of Wight): 50.46 N. 01.18 W. (See Plan)

PORT LIMITS: As shown on British Admiralty Charts.

DOCUMENTS: As for "Portsmouth".

PILOTAGE: Pilotage is compulsory for vessels of 50 m. and above in length overall and passenger vessels of 20 m. and above in length overall whilst carrying more than 12 passengers/sub-standard ships.

Boarding/landing points for Cowes Pilots: Vessels up to 61 m. in length overall, in vicinity of Prince Consort Buoy. Vessels of 61 m. and above in length overall (bound to/from Cowes): (a) Western Limit ABP Southampton, in vicinity of Gurnard Buoy. (b) Eastern Inner Limit ABP Southampton (North Sturbridge Buoy).

Note: 6 hours (minimum) notice required.

Cowes Pilots also conduct vessels to berths in Newport Harbour area of jurisdiction.

Pilots board from launches "Thosbro"/"Blaavand", which are equipped with multi-channel VHF radio. A Pilot can be obtained by making a link call to Isle of Wight (0983) 293812 (24 hour service). During office hours Pilots can be obtained by link call to the Harbour Office Cowes (0983) 293952 or by VHF radio ("Cowes Harbour Radio") Channel 69. After office hours telephone (0983) 295733/293812/292033.

Note: Vessels of 61 m. to 150 m. in length overall may board an ABP Southampton Pilot on a voluntary basis at the Eastern Outer Limit (Nab Tower). For boarding/notification arrangements see "Southampton". Such vessels preceding into Cowes Harbour/River Medina will board a Cowes Pilot in the vicinity of the Prince Consort Buoy.

MAX. SIZE: Cowes – 95 m. (312 ft.) long, 4.7 m. (15 ft. 06 in.) draft at MHWN, 5.3 m. (17 ft.06 in.) draft at MHWS. Vessels must expect to take the bottom in soft mud at LW. Newport – 150 ft. long, 9 ft. 06 in. draft at MHWS. Newport Harbour practically dries out at LW.

ANCHORAGES: Vessels less than 61 m. LOA waiting to proceed to Cowes or Newport should anchor in Cowes Roads, S.E. of Prince Consort Buoy and North of all yacht moorings. Vessels of more than 61 m. LOA, awaiting a Pilot, should anchor in the vicinity of the Saltmead Buoy (Western Solent) or St. Helens Roads (Eastern Solent). The prohibited anchorage on either side of the leading line must be respected, and vessels must not obstruct the fairway into Cowes, nor the deep water channel used by large vessels bound for Southampton. The mooring buoy is reserved for the Trinity House lighthouse tender and naval vessels. Mooring chains run East and West for 500 ft. from each of these mooring buoys. Tidal streams in the anchorage are strong. Cowes is an international yachting centre, and the anchorage is often crowded with small craft, especially during July, August and September.

Cowes Roads anchorage, North of the deep water channel, is used by large vessels waiting to berth in Southampton Water, taking bunkers or changing crews.

RESTRICTIONS: Tankers may load and discharge at all times, subject to the Petroleum Acts.

FLOATING BRIDGE: A chain ferry plies between East and West Cowes. An all-round flashing white light is shown from the leading end of the bridge when under way. Approaching vessels should sound 1 prolonged blast on the whistle when not less than 0.5 mile away and establish VHF radio contact before passing (See "Radio/VHF"). The bridge gives way to all river traffic. The chains of the ferry are at least 2 ft. above the river bottom in mid-channel at all times.

HEALTH: See "Portsmouth".

RADIO/VHF: Commercial vessels should make an "All Ships" call on VHF Channel 69 before entering the harbour or leaving a berth in the harbour. The call should give the name of the vessel and its intentions. Such vessels should maintain a listening watch on VHF Channel 69 when underway within the harbour and respond to other vessels' calls.

Port radio: Call sign "Cowes Harbour Radio", VHF Channel 69. Listens during office hours Monday – Friday, and harbour launches listen at weekends.

Commercial vessels should establish contact with Floating Bridge, call sign "Cowes Chain Ferry", on VHF Channel 69 before passing, both inward and outward.

Southampton VTS, the port operations and radar station for the port of Southampton, will often assist in cases of difficulty, although there is no obligation for them to do so and they accept no responsibility. Southampton VTS on VHF Channels 16, 14, 12, 11, 10, 18, 20 and 22. Medium frequency through Niton Radio.

TUGS: Harbour tug (3.5 ton bollard pull) and tow-boat launches are available to assist vessels.

BERTHING: *Medina Wharf:* Vessels 17 ft. 06 in., Spring draft, LOA 312 ft. Loading and unloading bulk cargoes of stone, coal, fertilisers, grain, etc.

Kingston Wharf: Vessels of 17 ft. 06 in. draft (MHWS). LOA 245 ft. Unloading bulk cargoes of stone, aggregates and fuel oil.

CRANES: Hammerhead crane at Souter Shipyard Ltd., 50 tons.

Medina Wharf: 2 grabbing cranes of 4.5 cu.m. for bulk cargoes.

Kingston Wharf: 1 grabbing crane for stone/aggregate cargoes. 3 marine arms for bulk fuel oil.

STEVEDORES: By arrangement with Agent and wharf owners. Normal working hours: 0800 – 1700 hrs. Monday to Friday. Overtime on Saturdays, etc., by arrangement. No work on public holidays.

MEDICAL: All medical facilities are available. Agent should be given advance notice of requirements. If call is solely to land sick personnel, see "Southampton" entry.

DENSITY: Cowes – 1025 salt water.

Newport – varies according to amount of recent rainfall and state of tide.

SHIP SUPPLY SERVICE: *Thomas Bros.:* 2×40 ft. launches (20 knots) available throughout 24 hours for stores – 12 persons – liberty boats, surveys, etc., and marine contract work – U.K. and Northern France. Tel: (0983) 293812.

Solent Cruises: 2×45 ft. fast vessels with twin screw, D.O.T. Load Line Exemption, able to carry up to 89 persons (reduced number in Winter).

Solent Cruises are contractors to the local authorities for the transfer of sick persons from the Isle of Wight to the mainland.

Contact on VHF Channel 16, (Jenny Lee – 2 RAH) when afloat or Telephone Isle of Wight (0983) 64602.

A 24 hour service is offered for transport of personnel, stores and passengers.

Marine Support and Towage Limited: Tel: (0983) 295369, 296424, 297363 (24 hours). Office (0983) 296934.

Details of Vessels:

Name	*Length*	*General Description and Capabilities*
Roperunner	33 ft.	Heavily fendered steel work launch, used for running mooring ropes/wires for large vessels 6,000 tons – 250,000 tons. Large open after work space, forward wheelhouse. Fitted with radar and multi-channel VHF radio. 120 h.p. diesel, 1 ton bollard pull. Speed 8 knots.
A. Stopford	40 ft.	Keith Nelson twin screw diesel fast launch, for personnel transport and light storage duties, open after cockpit with towage facility. Licenced for 12 passengers. 2×145 h.p. diesels. Speed 16 knots – 18 knots. Fitted with radar, VHF radio and echo sounder.
Beaver	32 ft.	Steel work launch used for running mooring ropes/wires and towage. Large open after work space, forward wheel house. Fitted with multi-channel VHF radio, radar pending, diesel engine, 2 tonne bollard pull.
Trio	47 ft.	Steel work launch used for running mooring ropes/wires and towage duties. Fitted with radar and multi-channel VHF radio, diesel engine, 4 tonne bollard pull.

These vessels are available on hourly, daily or long term cha U.K. coast or continent. Company is experienced in offshore back- ship supply, etc. A 24 hour office facility call out is maintained.

St. Helens Laundry Ltd.: Tel: (0983) 872250, 873731.

Able to supply laundry and dry cleaning services to any vessels Southampton Docks, Fawley Terminal, Netley, The Solent, Portsmou Harbour or Docks, and the St. Helens Roads and Nab Anchorages.

FRESH WATER: Available on all commercial wharves.

FUEL: Fuel and Diesel oil available by arrangement with Agent.

OPENING/CLOSING HATCHES: By ship's crew.

REPAIRS: All hull and engine repairs undertaken to vessels capable Cowes entry.

SERVICES: Compass adjuster, radar and radio mechanics availab locally. Charts and general stores available locally.

OIL POLLUTION: Cowes and the Solent are world-famous yach centres. Pollution is dealt with severely.

EMERGENCY CO-ORDINATION CENTRE: H.M.Coastguard, Lee-o Solent. Call "Solent Coastguard" on VHF Channel 16 (24 hours) for emergencies, including oil pollution.

GARBAGE DISPOSAL: Garbage skips available. Contact ship's Agent for service.

WASTE OIL DISPOSAL: Various waste oil disposal contractors available. Contact ship's Agent for service.

SEAMAN'S CLUBS: None.

DEVELOPMENTS: Queen's Dock, opened in late 1987, includes warehousing and nearly 30 acres of lay down area for cargoes such as timber, coal, scrap, containers, etc.

A new Ro/Ro Terminal opened in Spring 1992, and is served by M.V. "Contender" (owned by Orcargo), which operates a daily service to Kirkwall in the Orkney Islands. The M.V. "Contender" is 80 m. in length, 2,292 g.r.t., and carries 12 freight trailers and 12 passengers.

Supply Base Berth No. 3 to be extended in 1995.

(B) NIGG OIL TERMINAL

LOCATION: Nigg Oil Terminal operated by B.P., provides shipping facilities for crude oil piped ashore from the Beatrice Field in the Moray Firth and third party traffic brought in by sea. The terminal is located on the North side of the Cromarty Firth in approximate position Lat. 57° 41.5′ N., Long. 4° 02.5′ W. and comprises a single berth jetty linked to the shore by a trestled roadway.

PILOTAGE: Pilotage is compulsory. Invergordon Pilot will board from a tug at the Fairway Buoy. Call "Invergordon Pilots" on VHF Channels 16 or 11, working on Channel 13.

ANCHORAGE: The recommended anchorage for vessels awaiting a berth is 1 mile South of the fairway buoy in approximate position Lat. 57° 40′ N., Long. 3° 54′ W. An anchorage within the Cromarty Firth may be made available by the Port Authority.

RESTRICTIONS: *Depth alongside berth:* A minimum depth of water of 21 m. below chart datum is available alongside the berth.
